This explains the word *tannimittaphalakṣaṇāt* in the preceding verse.

¹It refers to gods, men.

कर्तृत्वं चास्याविद्यातो न स्वतः कर्तृतात्मनः ।
कर्तेव भोक्ताप्यज्ञः स्याद्विद्यायां द्वयमप्यसत् ॥१७८८॥

And, on the part of this (Ātman¹), the character of an agent (of some action) comes from ignorance; Ātman does not become an agent (of some action) on its own. This ignorant one is also the enjoyer², as he is an agent (of some action); but when there is knowledge (of the Brahman) both these³ are unreal. [1788]

¹This refers to *dehalingavān* mentioned in verse 1783 above.

²The enjoyer of pleasure and pain which are the result of his activities.

³It refers to *kartr̥tva* and *bhoktr̥tva*.

अभुक्तस्याप्युपात्तस्य ह्यविद्यापिहितात्मनाम् ।
आत्मयाथात्म्यविज्ञानात्कर्मणो ऽतः क्षयो भवेत् ॥१७८९॥

There is therefore the destruction of ritual activity in the case of them who are wrapped in ignorance — even of that activity which one has performed and whose fruit one has not enjoyed by (one's having acquired) the knowledge of the true nature of the Self. [1789]

This answers away a stand taken on a Smṛti passage *nābhuktam kṣīyate karma kalpakośitair api* [a variant in line no. 2200 (in app. 1, no. 16) under *Mahābhārata* 13.37.17-19 in Poona critical ed.].

सर्वं सर्वस्य कार्यम् स्यात्सर्वं सर्वस्य कारणम् ।
असंहतं मिथो नालं जडं वस्तु प्रवर्तितुम् ॥१७९०॥

All can be (related to) all as the effect, all can be (related to) all as the cause; no non-sentient things can perform activity unless they are mutually combined. [1790]

The Sāṃkhya idea of *saṃghāta-parārthatva* may be noted here. The NKL edition reads text as *sarvaḥ sarvasya ... syāt, sarvaḥ sarvasya kāraṇam ...* but this does not make specific difference in interpretation. However the reading in AnSS edition may be preferred, because of the reference to *jaḍa vastu* in the second half.

सर्वः सर्वस्य भोक्तैव चित्प्राधान्यविवक्षया ।
बाह्योपरक्तबुद्धीनां भोगश्चिदवसानता ॥१७९१॥

All beings are enjoyers of all (other) beings and things, since there is a desire (on the part of the Śruti) to point out the principal significance of the sentience. (And) an enjoyment of those, the knowledge about whom is tinted with that notion of (them as) external and ends in (their acceptance by) sentience. [1791]

मधुब्राह्मणविद्यायामिदमेव प्रवक्ष्यते ।
वस्तुवैकात्म्यप्रसिद्ध्यर्थं प्राधान्यातियत्नतः ॥१७९२॥

In the lore of the Madhu Brāhmaṇa this very thing will be stated in order carefully to establish the uniqueness of the (real) thing as the principal (in significance). [1792]

एवं सत्ययमात्मेति संहतो जगदात्मना ।
लोको भोज्यः पशुर्ज्ञेयो देवादेरुपकारकः ॥१७९३॥

This being so, the statement *ayam ātmā ...* means that the entire conglomeration of the world is an object of enjoyment by the Lord of the universe and it is (to be considered) an animal subservient to gods and others. [1793]

देवादिभिरुपात्तो ऽयमित्येतद्गम्यते कृतः ।
अस्यार्थस्य प्रसिद्ध्यर्थं स यदित्यादि भण्यते ॥१७९४॥

[Now follows in verses 1794 -1799 the explanation of *sa yaj juhoti*.]

(A question may be asked:) How is it understood that this¹ is taken up by gods and others (for enjoyment)? In order to establish this matter, it is said *sa yad* ... [1794]

In verse 1792 above, reference was made to a passage in the Madhu Brāhmaṇa so that one compares the thought of this Brāhmaṇa with one in that Brāhmaṇa; but here is adduced a statement from the Brāhmaṇa itself, viz. *sa yaj juhoti* ...

¹This refers to *ātmā lokah* in verse 1783.

यो देवतां समुद्दिश्य द्रव्यत्यागः स उच्यते ।
याग आसेचनाधिक्याद्धोमाख्यः स्यात्स एव तु ॥१७९५॥

That which is being given away as sacrificial material intended for a deity is called *yāga*; but the same is known by the name *homa* when there is more of pouring (into the fire) etc. [1795]

yāga is merely giving and may be connected with all objects, *homa* seems to refer to what is liquid and poured into the fire.

लोकत्वस्य विधेयत्वाद्यज्जुहोतीत्यनुद्यते ।
नानूक्तिं केचिदिच्छन्ति देवाद्यार्जितसिद्धये ॥१७९६॥

The words *yaj juhoti* ... are an Arthavāda, since the state of being a *loka* is to be effected by this (performance). (Yet) some¹ do not accept (lit. desire) Anuvāda for the sake of establishing that (the result of the sacrifice) is what is acquired by gods and others.² [1796]

¹This refers to Bhartṛprapañca and his followers.

²Add: through the performance.

नावश्यकार्यता चैषां सिद्धातो ऽन्यत्र मानतः ।
नित्यत्वाद्धेतुवचनं न युक्त्यातो ऽवगम्यते ॥१७९७॥
यच्चाप्यहरहर्वेदमनुब्रूते प्रयत्नवान् ।

ऋषीणां तेन लोको ऽयं गृहस्थो भोज्य उच्यते ॥१७९८॥

(The answer to this is:) These do not have to be performed necessarily since they are obtained from (i.e. heard¹) elsewhere as obligatory; therefore there is no statement of them as the cause is under- stood by reasoning [1797]

and that a person, making every effort, repeats the Veda day after day² (and therefore) thereby are expressed the *loka* of the *ṛṣis* and the householder as an object of enjoyment.³

[1798]

The verse 1798 explains *yad anubrūte tena ṛṣīṇām*.

¹Cp. *Śatapatha Brāhmaṇa* 5.2.2.1, also CU 8.15.1: *sa khalv evaṃ vartayan yāvadāyusaṃ brahmalokaṃ sampadyate*.

²This refers to the recitation of the Brahma-yajña formula, it is for the repayment of the debt to the *ṛṣis*. This explains 'and others' in verse 1796.

³*bhojya* explains *loka*.

उत्तरेष्वपि वाक्येषु समाना योजनेक्ष्यताम् ।

अक्षराणां न तत्रास्ति वस्तु किञ्चित्तिरोहितम् ॥१७९९॥

In the subsequent sentences (of the Śruti) also should be accepted (lit. seen) similar employment¹. There is not any thing² kept concealed in the Vedic texts (lit. letters). [1799]

There is no other purport in those words. One cannot doubt that it is so. This has reference to the Śruti *yat pitṛbhyaḥ ...*; again to justify 'and others'.

¹Supply: of words. That is, the use of the words in the same sense.

²Namely, other import.

यस्मात्सर्वाणि भूतानि सर्वदोपकरोत्ययम् ।

अविनाशमतस्तानि तस्येच्छन्त्यात्मदेहवत् ॥१८००॥

[Verses 1800-1805 are an explanation of *yathā ha vai svāya lokāya ...*]

Since this¹ (person) ever renders service to all beings and the elements; therefore, they wish for him non-destruction like that of their own bodies. [1800]

The idea is that of give-and-take between men and gods and others — all is indicative of *avidyājanitavyavahāra*.

¹It refers to sacrificer.

स्वकर्माजितसंभोगदायित्वे ऽस्ति न कश्चन ।
देवादीनां विशेषो ऽत्र गृहस्थस्वात्मदेहयोः ॥१८०१॥

There is not any particular distinction (or speciality) among gods and others in respect of bodies of their own and those of the sacrificers, with regard to granting (i.e. producing) whichever enjoyment is obtained by their own activities. [1801]

This justifies the word *svadehavat* in the preceding verse.

ब्रह्मविद्याहुताशेन विनाशो ऽस्याप्यकर्तृता ।
अयं नाशो महानस्य ह्यन्यः शक्यश्चिकित्सितुम् ॥१८०२॥

The destruction of this one (viz. the sacrificer) by fire in the form of the lore of the Brahman is also (of the nature of) his becoming a non-agent (of any activity); this destruction of this (sacrifice) is indeed great; any other (destrunction) can be thought of (as curable). [1802]

अतः श्रुतिवचो न्याय्यं तस्मादेषामितीरितम् ।
मा भूत्सर्वस्वहानिर्नो ब्रह्मयाथात्म्यविद्यया ॥१८०३॥

Therefore is declared the statement in the Śruti, (and) that is justifiable, viz. *tasmād eṣām* ...; (this is intended to convey:) Let there not be the loss of all of his (means etc.) by (or through) the acquisition of the lore of the knowledge of the true nature of the Brahman. [1803]

This explains why gods protect the sacrificer, as understood in

the preceding verse.

अवश्यमृणवत्कृत्यं यावज्जीवादिवाक्यतः ।
यथोक्तं विदितं वेदे तथा स्मृतिवचःसु च ॥१८०४॥

[Verses 1804-1805 explain the sentence *tad vā etad viditam mīmāṃsitam*.]

Certainly it is understood from the sentence *yāvajjīva* ... etc. that there is invariably (ritual) activity (of a human being) who is indebted (to gods and others), as known in the statement of the Veda and also in the statements of the Smṛtis. [1804]

This refers to the statement of what are called the five great sacrifices which a householder is required to perform every day. Refer to SP and NKL for the Śruti and the Smṛti and SP for the sentences from *Gītā*

अवदानविधौ तच्च विशेषेण विचारितम् ।
ऋणं हेत्यर्थवादिषु तस्मात्कुर्याद्यथोदितम् ॥१८०५॥

And that is discussed in relation to the injunction regarding cutting of oblations at a sacrifice (and) in the supplementary repetitive statements like *ṛṇam ha* ...; therefore one should do what is told.¹ [1805]

tad vā etad viditam is explained in verse 1804 and *mīmāṃsitam* in verse 1805. NKL gives a short and yet clear explanation; SP brings out at length the notion of *Mīmāṃsā*.

¹In the context of the injunction, the statement *jāyamāno vai brāhmaṇaḥ* ... is a supplementary statement. Refer to *Taittirīya Saṃhitā* 6.3.10.5.

Now follows up to the end, i.e. verse 1853, the explanation of BU 1.4.17.

प्रवृत्तौ च निवृत्तौ च यथोक्तस्याधिकारिणः ।
स्वातन्त्र्ये सति संसारसृत्तौ कस्मात्प्रवर्तते ॥१८०६॥

In the case of a person who is eligible, as stated (before), there is freedom¹ in respect of both undertaking (an activity) and keeping from (it); then, why is it that he begins to act in this transmigratory world?² [1806]

This explains *ātmaivedam* ... (BU 1.4.17).

¹This refers to the capacity either to perform an activity or to keep from it.

²That is, how does he undertake the performance of ritual activity?

न तु विध्वस्तनिःशेषसंसारानर्थवर्त्तमानि ।
निर्वृत्तिलक्षणे वाच्यं केनायं प्रेर्यते ऽवशः ॥१८०७॥

But, it should not be asked: By whom or what he, the helpless one, is incited to take to the path where the entire mass of undesirable things of the transmigratory world are destroyed, viz. that which is called keeping from activity? [1807]

This is complementary to the preceding verse, in the form of a question. This sets aside the notion of one's natural inclination towards the path of keeping from activity.

¹The AnSS edition has *preryate vaśaḥ*, a wrong reading. NKL reads correctly — supported by SP's paraphrase *paratantravat*. We have adopted it.

रक्षन्ति ननु देवास्तं न विशिष्टाधिकारिणम् ।
ते ऽपि रक्षन्ति यत्नेन न च सामान्यमानुषम् ॥१८०८॥

But, (it may be argued,) gods protect him (viz. the human being) and not the one with some special eligibility¹ and, further, they do so with (special) care; (the answer is:) (But) not any common being. [1808]

This is in answer to the question in verse 1806 above. The first three lines are expressive of a doubt; the fourth, of the answer.

अन्यथा कृतनाशः स्यादकृताभ्यागमस्तथा ।
सामान्यनररक्षायां तस्मादेतदनुत्तरम् ॥१८०९॥

If it were otherwise, that would mean annulment of what is performed and acceptance of what is not performed. Therefore, this¹ is well said, namely, it is for the protection of any common being. [1809]

The idea is: If performance etc. were meant only for a Brahma-cārin, that should mean his performance secured the protection for himself and there was no need of gods' help. These two are *kṛtanāśa* and *akṛtabhyāgama* respectively. That means: They expect even a common man to perform rituals.

¹Namely, gods protect all men alike.

नाप्यविद्येति वक्तव्यं तस्या ध्वान्तैकमात्रतः ।
मिथ्याधीमात्रहेतुत्वात्प्रेरकत्वं न युक्तिमत् ॥१८१०॥

Also it should not be said that it is ignorance (which incites a person to activity), since it is only (of the nature of) darkness (i.e. ignorance). And it is caused by only false knowledge and therefore its capacity to incite (a human being to activity) is not reasonable. [1810]

अनर्थपरिपाकत्वमपि जानन्प्रवर्तते ।
पारतन्त्र्यमृते दृष्टा प्रवृत्तिर्नेदृशी क्वचित् ॥१८११॥

(It might be said:) A person proceeds (to perform ritual activity) knowing (full) well (*api*) that it has the undesirable as its results (and this he does) even without his dependence (on any other); (it has to be observed that) such an activity is nowhere seen. [1811]

तस्माच्छ्रेयोर्थिनः पुंसः प्रेरको ऽनिष्टकर्मणि ।
वक्तव्यस्तन्निरासार्थमित्यर्था स्यात्परा श्रुतिः ॥१८१२॥

Therefore (it is argued), it is to be pointed out as to who incites to undesirable activity a person who desires for bliss.

In order to answer away that, therefore, there follows the subsequent Śruti¹. [1812]

¹Namely, that one which incites a person to act.

प्राप्ताशेषपुमर्थो ऽयं स्वत एवेह मानवः ।
निरस्ताशेषानर्थश्च तन्मोहाद्विपरीतधीः ॥१८१३॥
अनाप्तपुरुषार्थो ऽयं निःशेषानर्थसंकलः ।
इत्यकामयतानाप्तान्पुमर्थान्साधनैर्जडः ॥१८१४॥

Here (i.e. in this world) a man, who has by himself secured the fulfilment of the entire ends of human endeavour, who has completely removed all the undesirables, and who has, therefore, contrary knowledge¹, because of infatuation (i.e. ignorance), [1813]

and who has not obtained any ends of human endeavour, is affected by all the undesirables, and therefore, the fool, desires to secure by those means the ends of (human) endeavour which were not secured. [1814]

These verses explain how a man comes to have desire that leads him towards activity, and also wrong knowledge.

¹Or, wrong knowledge.

जिहासति तथानर्थानविद्वानात्मनि श्रितान् ।
अविद्योद्धूतकामः सन्नथो खल्विति च श्रुतिः ॥१८१५॥

And, consequently (*tathā*), not knowing all those undesirables which have resorted to his inner self, he wishes to throw them away; therefore there is the Śruti statement *atho khalv...*¹[1815]

¹*atho khalv āhuḥ kāmamaya evāyam puruṣaḥ* (BU 4.4.5).

अकामतः क्रिया काचिद्दृश्यते नेह कस्यचित् ।
यद्यद्वि कुरुते किञ्चित्तत्तत्कामस्य चेष्टितम् ॥१८१६॥

Now in the case of anyone is noticed any activity (which has proceeded) from absence of desire; for, whatever little (also)

he does is all of it the result (lit. activity) of desire. [1816]

Cf. *Manusmṛti* 2.4 with some differences; *akāmasya ... karhicit*.

काम एष क्रोध एष इत्यादिवचनं स्मृतेः ।
प्रवर्तको नापरो ऽतः कामादित्यवसीयते ॥१८१७॥

This is desire, this is anger etc. are the statement(s) by (lit. of) the Smṛti(s); therefore, it is understood (lit. concluded) that none else than desire incites (a human being to activity).

[1817]

This is *Gītā* 3.37.

Verses 1818-1839 explain the meaning of 'ātmaivedam agra āsīd eka eva'.

प्राग्दाराद्यभिसंबन्धादेकाकयेव पुमानभूत् ।
ऊर्ध्वं दारादिसंबन्धात्पुत्रपौत्रादिसंयुतेः ॥१८१८॥
विस्तारितकुटुम्बं तं कस्मैचित्कश्चिदन्तिके ।
व्याचष्टे कामसंभूतं पुत्रपौत्रादिविस्तरम् ॥१८१९॥

Man was all alone before he had taken a wife because later he was connected, through his relation to (his) wife and others, with a son, grandson and others. Him, who had (thus) extended his family, someone described to someone else as influenced by desire and having an extension (of his family in) sons, grandsons and others. [1818-1819]

प्राग्दारोद्वहनात्कृत्स्नं कुटुम्बं यत्प्रपश्यसि ।
आत्मैवैकः पुमानासीन्नासौत्पुत्रादि किञ्चन ॥१८२०॥
आत्मप्रत्ययनिर्ग्राह्यं केवलं प्राग्भूदिदम् ।
पुत्रपौत्रादिसंभिन्नं कुटुम्बं यत्प्रपश्यसि ॥१८२१॥

Whatever family you see (of a man) was all, before he took a wife, only one single man; not anyone like a son etc. was there. [1820]

Whatever you now see, viz. a family, made up of by sons,

grandsons etc., was formerly just a single (person) to be taken only in the form of the consciousness (of him). [1821]

कामाद्यशेषबीजात्माप्रज्ञातात्मैकतत्त्वकः ।

सो ऽतिग्रहग्रहाविष्टो विपरीतार्थनिश्चयः ॥१८२२॥

He (was then) one who was of the nature of the seed (i.e. origin) of desires etc., who had not known the true nature of the inner self, who was possessed by goblins with the great goblin of desire (as the preeminent among them), and who had decided (finally) the objects to be otherwise. [1822]

This explains the meaning of *saḥ* in *so 'kāmayata*.

¹That is to say: He did not know them in their true nature.

स्वतः कृत्स्नो ऽप्यसंबोधादकृत्स्नो विपरीतधीः ।

तृष्णया प्रहितो बालः सो ऽकामयत मानवः ॥१८२३॥

कर्माधिकारेहेतुर्मे जाया स्यात्कर्मसाधनम् ।

पूर्वपूर्वस्य हेतुत्वमथशब्दैरिहोच्यते ॥१८२४॥

Complete though he himself was; he was (yet) incomplete because he did not have the knowledge (of the nature of the inner self), and who had a knowledge that was otherwise (than truth), he was impelled by desire (lit. thirst), the ignorant human being, and entertained desires: [1823]

Let me have a wife, the basis (lit. cause) of eligibility to perform (any ritual) activity and (also) a helping hand (lit. means) in the activity. Each preceding (among these) has the nature of the cause (of every subsequent) — that is here mentioned by (the repetition of) ¹ the word *atha*. [1824]

¹This is the force of the plural form *athaśabdaiḥ*.

अथ प्रजात्मना तस्यां जायेय स्थास्नुकर्मणे ।

स पुत्रेणैवेति वचस्तथा च श्रूयते स्फुटम् ॥१८२५॥

(Then he thought,) 'Let me be born from her in the form of an offspring for (the performance of) the ever staying (ritual)

activity.' For (ca), a statement is clearly heard (in the Śruti)
*sa putreṇaiva ...*¹ [1825]

¹*sa putreṇaivāsmiṇ loka pratitiṣṭhati* (BU 1.5.17).

दैवमानुषवित्तेन संपन्नो ऽहमथोत्तरम् ।
 कर्म कुर्यां यथाप्राप्तं दृष्टादृष्टार्थसिद्धये ॥१८२६॥

Now, subsequently, I have become rich with all wealth, divine and human, let me (now) perform (ritual) activity, as comes to me in a matter of course in order that I acquire both the seen and the unseen fruit.' [1826]

एतावानेव कामो ऽस्य नातो ऽन्यो ऽर्थो ऽवशिष्यते ।
 साध्यसाधनरूपे हि द्वे एवात्रैषणे यतः ॥१८२७॥

Only this much¹ is his desire; therefore, there remains for him no other object of desire (to be acquired), since, in this his desire, he has only two (things), viz. what is to be accomplished and what can accomplish that (for him). [1827]

¹This emphasises or points to the sacrificer's having a son etc. as the certain means to the acquisition of the three *lokas*: of men, of gods and of *pitrs*.

एषणे एव चाप्येते साध्यसाधनकल्पिते ।
 पुमर्थस्यानवसितेरैकात्म्याप्रसिद्धितः ॥१८२८॥

And these two desires are thought of only in the form of what is to be accomplished and what accomplishes that; for, there is no complete accomplishing of the ends of human endeavour owing to (his) not having a acquired (or known) the uniqueness of the Ātman. [1828]

This asserts the inutility of having a son etc. in respect of the final goal of life, viz. liberation.

लाकत्रयासंगृहीतेरेतावानिति दुर्घटम् ॥१८२९॥

Since wife and others are of the nature of the means of accomplishing a man's ritual activity, therefore there is no acquisition of the ends of (human) endeavour (through them) and (it might be argued:) Since there is no inclusion of the three worlds (in the expression of the desires by the man), (the word) *etāvan* is (really) difficult to construe. [1829]

न लोकत्रयसाध्यस्य साधनैकव्यपाश्रयात् ।
आक्षिप्तसाध्यं साध्यत्वादितरत्कर्मसाधनम् ॥१८३०॥
लोकत्रयफलं यस्मादुत्पत्त्याद्यात्मकं मतम् ।
कर्मानाक्षिप्य नात्मानं तच्चापि लभते स्वतः ॥१८३१॥

(The answer is:) No. (This is not so), since what is to be accomplished, viz. the three worlds, depends only on the means of accomplishing (the same); since that is to be accomplished, as implied by dependence on the means; (and) that other is a means;¹ [1830]
since it is held that the fruit, viz. the three worlds, is of the nature of what is produced etc.², (and) that (fruit) also will not come into being, on its own, without implying (=depending on) activity. [1831]

¹AnSS edition reads: *itarat karmasāadhanam*, while NKL edition reads *itarat karma sāadhanam*. The idea is: Having a son etc. are the means to the performance of ritual activity and that implies the three *lokas* to be accomplished thereby *necessarily*.

²That is, *utpatti*, *āpti*, *samskṛti* and *vikṛti*.

समाप्तिः कर्मणो नापि लोकत्रयफलादृते ।
अन्तर्णीतफलं तस्मादिह साधनमुच्यते ॥१८३२॥

Completion of (ritual) activity also cannot be said to have been there unless (there has resulted) the fruit in the form of the three worlds; as such, in this connection,¹ the means

Cf. *ākṣiptasādhya* in verse 1830 above.

¹Reference is made to *lokavyavahāra*.

एषणैकैव तेनेयमुत्तरत्राभिधास्यते ॥१८३३॥
अर्थात्साध्याभिधानं स्यात्साधनाभिहितौ यथा ।
भोजने ऽभिहिते पुंसो ह्यर्थात्तृप्तिः प्रतीयते ॥१८३४॥

Therefore, only one desire will be expressed in the subsequent portion. [1833]

Evidently then there would be the mention (i.e. understanding) of what is to be accomplished, even when there is mention made of the means of accomplishing that; this is as when mention is made of a man's taking meals and which implies that there is satisfaction of (the human being) from the object (of desire, viz. food). [1834]

साध्यसाधनरूपे द्वे एषणे काम उच्यते ।
अयथावस्तुरूपत्वादात्माज्ञानैकहेतुके ॥१८३५॥

These two desires, which have the form of what is to be accomplished and what accomplishes that, are called 'desire', since they are of the nature of what is not Reality and are having only ignorance about (the nature of) the Ātman as their cause (i.e. origin). [1835]

This has a reference to *ubhe hyete eṣaṇe eva* (BU 4.4.22).

विश्वासो ऽतो ऽत्र विदुषा न कार्यः स्वप्नलाभवत् ।
व्युत्थायैवैषणाभ्यो ऽतः प्रत्यग्ज्ञानं समाश्रयेत् ॥१८३६॥

Therefore, a learned man should not trust in (i.e. depend on) this¹ as in some profit (or gain) in a dream. Therefore, having risen above all (kinds of) desire, (a person) should take recourse to the knowledge of the inner self. [1836]

¹Namely, *sādhya* and *sādhana*, both called *kāma*.

इच्छन्पि यतो नातो भयो विन्देदतो ऽधिकम् ।

तस्मादविद्याभूमिष्ठः कृत्स्न एतावता भवेत् ॥१८३७॥

Since, even desiring, he would not secure any more fruit than this (viz. the three worlds); therefore, resting on ignorance, he would be complete by this much.¹ [1837]

This explains *necchanś ca na ato bhūyān vindet ... eva tāvan manyate*.

¹The magnitude of the three worlds is smaller than the extense of the Brahman; yet he would consider himself to be complete in all respects. Cf. verse 1839 below.

एकैकमपि जायादेर्यावन्नाप्नोति पुरुषः ।
अकृत्स्नस्तावदस्मीति जडः संभावयत्ययम् ॥१८३८॥

So long as a man does not obtain even one of wife and others (viz. son, grandson, wealth etc.),¹ he, the fool, considers himself as incomplete! [1838]

¹See verse 1840 below.

यावदेते यथोद्दिष्टा आप्ताः स्युः कामपूर्वकाः ।
कृत्स्नो ऽस्मीति तदात्मानं संभावयति मानवः ॥१८३९॥

(But) when these, as enumerated before, are obtained (after they were) desired (by him), this human being considers himself to have been complete. [1839]

Now follows the explanation of 'mana evāsyātmā'.

आत्मजायाप्रजावित्तविद्याभिः पञ्चभिः कृतम् ।
कर्म पाङ्क्तं भवेदेवं पाङ्क्तेन च्छन्दसा मितम् ॥१८४०॥

An activity, done by a person himself, his wife, his offsprings, with his wealth, his knowledge (of the world), i.e. by or with these five, becomes Pāṅkta, since it is (i.e. can be) compared (*mita*) with the metre Pāṅkti. [1840]

Pāṅkti is a Vedic *chandas* 'metre' which contains lines of five letters each. Therefore, mere similarity of the number five leads to this statement. The Upaniṣad calls *karman* also as Pāṅkta like the metre. This is one of the Brāhmaṇical tendencies to establish fanciful equation. (This is known as *bandhutā* philosophy of the Brāhmaṇa texts.)

बाह्यस्य कर्मणस्तावदात्माद्यैः पाङ्क्ततोदिता ।
तेष्वसत्स्वथ पाङ्क्तत्वमुच्यते ऽध्यात्मकर्मणः ॥१८४१॥

To begin with, it was mentioned that the external activity¹ of the person himself and others² is Pāṅkta. Then, in their absence, there is a statement made of the Pāṅkta character of what is done within the body (*adhyātma*).³ [1841]

This explains *mana evāśya*.

¹This singular signifies plural; therefore, there is reference to all external activities. By 'external' is meant the physical movements of the various agents.

²Cf. *ātmajāyāprajāvittavidyābhiḥ pañcabhiḥ* in the preceding verse.

³This refers to the various internal activities — in a word, (called) *dhyāna*.

बाह्याध्यात्मिकभेदेन कर्मैतदुभयात्मकम् ।
पाङ्क्तं यथा तद्वति तथैतदभिधीयते ॥१८४२॥

Activity is of two types, (that is) differentiated as external and what is done within a body; now is explained as to how it (i.e. the twofold *karman*) becomes Pāṅkta. [1842]

अध्यात्मं मन एवात्मा तदायत्तत्वकारणात् ।
वाग्जायादिप्रवृत्तीनां यजमानवदेव तत् ॥१८४३॥

manas which rests in the body is the Ātman, since it depends on that; (and) that is, in the same way, related to the activities of speech, wife and others; (therefore, it is) like a sacrificer.

[1843]

वाक्च जायेति विज्ञेया तदधीनत्वकारणात् ।
यद्ध्यायतीह मनसा वाचा वक्ति तदेव हि ॥१८४४॥

And speech should be known as wife, for it depends on her; and *vāk* speaks indeed that which one thinks of in *manas*.¹

[1844]

This explains *vāk jāyā*.

¹This points out the dependence of speech on *manas*.

संप्रधार्य मनो वाचा मन्त्रलौकिकरूपया ।
अथ प्रस्पन्दते ऽत्यर्थं सा क्रिया प्राण उच्यते ॥१८४५॥

manas, after having decided (the nature of some object), proceeds to activity by speech in the form of Mantras and worldly talk (only) profusely; therefore, that activity (of *manas*) is called *Prāṇa*.

[1845]

Cf. NKL: *prāṇaśabdena kriyocyate* and SP: *ubhayanirvārtiyā ceṣṭā prāṇaḥ* [*ubhaya* = *vāk* and *manas*]. Also, see the next verse.

आगमार्थं विनिश्चित्य मनसाथ प्रवर्तते ।
प्राणः प्रजेति तां चेष्टां प्राहुर्वेदविदो जनाः ॥१८४६॥

Prāṇa becomes active after *manas* has decided the meaning of what is heard;¹ therefore the persons, who know the Veda, describe that activity in words: *prāṇa* is *prajā*.

[1846]

This explains the purport of *prāṇaḥ prajā*.

¹Or, the Vedic text; traditional text.

द्विधैवाध्यात्मिकं वित्तं कार्यभेदात्प्रचक्षते ।
दैवमानुषताप्यस्य साधनत्वोपचारतः ॥१८४७॥

They describe the wealth which is dependent on the body as twofold on account of (two) distinct purposes (served by it);¹ and its nature as divine and human is also metaphorically

(so expressed) because of its being the means (towards them).²

[1847]

¹NKL explains: *cakṣuṣā rūpadhīḥ śrotreṇa śabdadhīḥ— iti kārya-bhedāt.*

²This is explained in the next two verses.

परीक्ष्य चक्षुषा यस्माल्लभते गोधनादिकम् ।
चक्षुः स्यान्मानुषं वित्तं यथायुर्घृतमुच्यते ॥१८४८॥

Since a person gets a cow and (other) wealth (only) after well examining (it) with the eye, therefore, (a human) eye is called human wealth, this is in the same way as ghee is called life.

[1848]

This is the explanation of *cakṣur mānuṣam*.

Ghee brings richness to man's life; therefore, the common man says 'ghee is life.' In the same way, the eye sees the nature of the wealth and later on the man gets it. Therefore, they say that the eye is the human wealth.

दैवभावाप्तितो दैवं ज्ञानं वित्तमिहोच्यते ।
तत्साधनत्वाच्छ्रोत्रस्य श्रोत्रमाध्यात्मिकं धनं ॥१८४९॥

On account of one's acquiring the nature of a divine being, one's knowledge about the divine world is called (in this context) wealth; and because it has the ear as the means (of securing it); therefore, the ear is called divine wealth (which is resting in the body).

[1849]

This explains *śrotram daivam*.

बाह्यवागादिचेष्टा च या चान्तःकरणाश्रया ।
देहे ऽभिव्यज्यते यस्मादात्मा कर्म ततो भवेत् ॥१८५०॥

And since whatever activity of external organ as speech etc., that rests on the internal organ, reveals itself in the body,

and is therefore called Ātman; from that proceeds activity.
[1850]

This is the explanation of *ātmaiva*.

संमितः संख्यया पादैः पाङ्क्तस्य च्छन्दसो यतः ।
पाङ्क्तो यज्ञस्ततः सद्भिः सर्वदा समुदाहृतः ॥१८५१॥

Since (the sacrifice) is comparable in number with the *pādas* 'feet' of the metre, it is ever called by the wise as Pāṅkta.
[1851]

Cf. verse 1840 above.

तत्कार्यत्वात्पशुः पाङ्क्तो यच्च किञ्चिच्चराचरम् ।
तच्चापि पञ्चभूतोत्थं विद्यात्पाङ्क्तमशेषतः ॥१८५२॥

Also the animal (of the sacrifice), being related to that as its object (and) whatever is movable and immovable — all that which has arisen from the five elements — the whole of it is Pāṅkta.
[1852]

पाङ्क्तकर्मात्मको यज्ञो यज्ञकार्यमिदं जगत् ।
एतद्याथात्म्यतो ज्ञात्वा तदेवाप्नोत्यशेषतः ॥१८५३॥

Sacrifice is of the nature of Pāṅkta activity and this world is the product of sacrifice; (therefore) having known this in its true nature, (a man) obtains that in its entirety.
[1853]

In verses 1851-1853 the text speaks of the sacrifice and its relation to bodily and other activities which are *sādhyasāadhanātmaka* and therefore rooted in *avidyā*. Another point to be noted is that the character of the sacrifice as Pāṅkta is related to both ritual and philosophical thought. This explains the name of this section *Puruṣavidha Brāhmaṇa*.

**BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA**

1.5

Saptāṇna Brāhmaṇa

अथ योऽन्यामिति ग्रन्थादारभ्योरुप्रयत्नतः ।
अविद्यायाः समाम्नाता आ समाप्तेर्विभूतयः ॥१॥
अध्यायस्यात्र चाविद्वान्वर्णाद्यात्माभिमानवान् ।
धर्मेण नियतात्मा सञ्जुहोत्यादिस्वकर्मभिः ॥२॥
देवादिक्रिमिपर्यन्तं बिभर्ति जगदव्ययम् ।
एवमेव जगद्योनिरेकैकः कर्मकृन्नरः ॥३॥

Beginning with the statement *atha yo 'nyām*, there have been enumerated up to the end of this chapter, with great care,¹ various appearances² of ignorance. [1]

Also in this connection is understood³ one who is ignorant and has a regard for Varṇa etc., (and) being controlled in oneself by Dharma (religious duty) (and) performing one's own duties, viz. offering oblations etc., [2]

sustains, without perishing,⁴ this world, beginning with gods etc. and ending with insects. Just in this way, each sacrificer, a human being, becomes the creator of this world. [3]

In BUBV 1.1-2 the worship of some deity by a sacrificer and then his death are described first. Later, his being a sacrificer is said to be his becoming identical with the deity, viz. Agni=Prāṇa. In BUBV 1.3, the Udgīthagāna which a sacrificer sings in a sacrifice is raised to the highest level, i.e. it is said to be the most potential part of the sacrifice. And, in BUBV 1.4, the Performer is Himself described in terms of a human sacrificer. Thus, a slow change of process is noticed in the foregone chapters and now this chapter of *saptāṇna* 'seven foods' describes the initial sacrificer as a creator of food.

¹SP repeats *uruprayatna*, perhaps to mean 'with great effort'.

²Or alternatively, modifications.

³This has reference to BU 1.4.16.

⁴It is an adverb expressing 'without *vyaya*'.

कृत्स्नेन जगता यद्वत्कर्मकृत्समुपार्जितः ।
यथोक्तकर्मीभिस्तेन जगत्तद्वदुपार्जितम् ॥४॥
स्वदेहवद्यतो भुङ्क्त एकैकोऽनवशेषतः ।
साधारणानि वस्तूनि तथासाधारणान्यपि ॥५॥

As the (initial) performer of (sacrificial) activities (i.e. the Sūtrātman) was obtained¹ by the entire world (of human beings), in the same way was obtained this world by that,² through (the performance of) ritual activities as prescribed (in the Śāstras), [4]
since each (individual) enjoys (i.e. experiences) all common and also uncommon objects in the same way as (he does) his own body.³ [5]

¹That is, brought into existence.

²It means: *karmakṛt* 'the initial sacrificer'.

³The verse justifies the statement in verse 4. The body is obtained and experienced by an individual through his doings (in earlier life); in the same way, the experience of all worldly objects, without exception, is owing to his earlier doing (i.e. *karman*).

स्वकर्मणानुपात्तस्य न च भोगोऽत्र दृश्यते ।
एकैकेनोपकारित्वात्तस्माज्जगदुपार्जितम् ॥६॥

Here (i.e. in this world) is not seen any enjoyment of what is not obtained¹ by one's own performance (of duty); therefore each thing becoming helpful, the world is (described as) what is obtained (by each one through that). [6]

This verse also justifies the statement in verse 4.

For every enjoyment there needs to be an enjoyer. Things of the world are enjoyable and, therefore each human being is described here as an enjoyer or an obtainer.

There is a stress on one's making an effort (or undertaking an activity) in order that one deserves enjoyment. It is noticed that one cannot enjoy what another has obtained through effort. This stress has become necessary in view of what one might point out as an object of enjoyment for all, e.g. the sight of the milky way (*svarnadī*)— suggestion of NKL.

¹This refers to *bhogyā*.

स्वभावतोऽखिलं कर्म धर्माधर्मादिलक्षणम् ।
साधारणविशेषात्मफलमारभते द्विधा ॥७॥

Each (ritual act) is by its nature characterized as either Dharma or Adharma and it begins (lit. produces) twofold fruits of the nature of the general and the particular.¹ [7]

This verse justifies the word *svakarmanā* in the preceding verse.

¹The word 'general' refers to *adṛṣṭa* and the word 'particular' to such performance as leads to *dṛṣṭa*, viz. becoming rich or attaining to heaven. Or perhaps 'general' is what is shared by one in common with others and 'particular' is what one enjoys by oneself.

गुणप्रधानभावेन साधारणविशेषतः ।
सूत्रादेः कर्मणः कार्यं किम्यन्तस्याभिजायते ॥८॥

In the case of (the world of) beings, beginning with the Sūtra and ending with insects, there is produced the result of (each) activity which stands in the relation of the principal and the subordinate, being either general or particular (in nature). [8]

This verse justifies the word *miśra* as understood from *ādi* in the preceding verse. See note above.

द्रव्यादिदर्शनाधीनं फलं सर्वस्य कर्मणः ।
साधारणादिसंभेदभिन्नं तेन क्रियाफलम् ॥९॥

In the case of each activity (it is seen that) the result depends upon the material etc.¹ which is noticed (in the activity); therefore the result of (each) activity is characterized by a variety of the general etc.² [9]

¹This refers to *kriyā* etc.

²That is, the general or the particular or of mixed nature, as suggested by *ādi*— see the next verse.

NKL points out *svakalatradarśana* as an instance of particular nature and *nṛtyekṣaṇa* of general or common nature.

क्वचित्साधारणात्मैव तथासाधारणं क्वचित् ।
क्वचिच्चोभयथा कार्यं द्रव्यादीक्ष्णचित्रतः ॥१०॥

In some case, the result is of general nature; similarly, in some other case, of particular nature and, in yet some others, of both (i.e. of a mixed nature)— (this is so) on account of the various seeing (or view) of the material etc. [10]

समासव्यासतस्तस्माद्यथोक्तज्ञानकर्मभिः ।
एकैकेन जगत्कृत्स्नमुपात्तं भोगसिद्धये ॥११॥

Therefore each one (of the human beings) has obtained the entire world for the acquisition of pleasure by the knowledge and the activity (related to them), as already stated, either jointly by them or severally. [11]

सर्वः सर्वस्य कर्ता च कार्यं चापि यथा तथा ।
मधुविद्याप्रसङ्गेन विस्पष्टमभिधास्यते ॥१२॥

It will be clearly explained in the context of the lore of Madhu as to how (each one of) all (beings) is the agent and so also the effect of every (activity). [12]

This is to justify the *hetu hetumadbhāva* implied in the previous verse.

यदजीजनत्फलं कर्ता स्वकर्मज्ञानसाधनः ।
सप्तान्नप्रविभागेन तद्विभज्य प्रदर्श्यते ॥१३॥

Now is explained the varied result, divided in seven categories of food, namely that (result) which the agent, possessed of the means of his activity and knowing, produced (thereby).

[13]

SP supplies *dhyānārtham iti śeṣaḥ*. This means: for *upāsanā* (NKL). The word *dhyāna* or *upāsanā* becomes significant in relation to a few of the following verses.

Cf. the note by the editor of NKL: *svakarmādinā sṛṣṭasya jagataḥ saptadhā vibhaktasya sūtrātmakasya svātmanā dhyānaṃ sūtrabhāvaphalakaṃ vidhātum idam brāhmaṇam ity arthaḥ*.

त्रीण्यन्नानि फलं कर्तुश्चत्वार्यन्नानि यानि तु ।
प्रयोगसमवायित्वात्तानि स्युः कर्मसाधनम् ॥१४॥

The result (of the activity) of the agent, viz. three foods and those (others) which are four foods, all are together the means of (that individual's) activity, inseparably connected with the performance of ritual.

[14]

The seven foods that are under discussion are divided into two groups: (1) *manas*, *Vāk* and *Prāṇa* together form one group and these three do not become connected with actual performance, viz. ritual activity. (2) The commonly eaten food, *huta* (what is poured into the fire) and *prahuta* (what is offered outside the fire or on the hand of a priest)— these (two foods) are for gods and that food, which is given to animals, viz. milk form the other group. In respect of the first group, we cannot overlook that whatever is created was for the enjoyment of the

sacrificer (*sarvaṃ sarvasya bhogyam*).

So far are mentioned, or rather, enumerated, the seven foods which come from the *sūtragrantha*, viz. the enumerative verses in BU. Later, in BU 1.5.2ff. are explained the meanings of the Mantras in BU.

Verses 15-97 are the discussion of BU 1.5.2.

विज्ञानात्मा पिता तावन्न मनो न प्रजापतिः ।
अविशिष्टाधिकारित्वान्न विज्ञानात्मनोऽपरः ॥१५॥

To begin with (it is stated) that the individual self, (who possesses) knowledge, is the father (of the creation); not *manas*, not also Prajāpati.¹ (This is so) because (anything) else than the individual self, possessing knowledge, is not a specifically eligible performer. [15]

This explains the word *pitā* in *yat saptānnāni ... pitā* of BU.

¹Namely, Hiranyagarbha.

सिद्धितत्त्वान्मनसस्तथा व्यन्नात्मनः प्रभोः ।
साधारणात्मनः स्रष्टा नातः क्षेत्रज्ञतोऽपरः ॥१६॥

Since *manas* is what is contemplated for creation and also (*tathā*) (since Prajāpati is) the master, who is the common self and comprises three foods, there is not¹ a creator other than the individual self (lit. knower of the field). [16]

This is the reason for excluding *manas* and Hiranyagarbha as possible meaning(s) of *pitā*.

Though reference was made to *manas* as *siṣṛkṣita*, it should not be overlooked that Prajāpati also was a product produced by the Ātman; cf. *dvayor api sṛṣṭiniviṣṭatvena kāryakoṭiniviṣṭatā na kāraṇatvam ity arthaḥ* (SP).

¹That, iṣ, cannot be.

ग्रन्थार्थधारणाशक्तिर्मेधा यद्यपि भण्यते ।
तथापि ज्ञानमेवेह साधनत्वाद्विवक्षितम् ॥१७॥

Even if it is said (i.e. understood) that *medhā* (means) capacity to grasp (or, better perhaps, retain) the meaning of a work (studied); yet here, in this context, it is intended to express only knowledge, since it is a means (to ritual activity).¹ [17]

This verse explains the word *medhā* in the statement of BU: *medhayā 'janayat pitā*.

¹This is to exclude the lore of the Brahman which is opposed to common knowledge.

शास्त्रीयलौकिकज्ञानाविशेषग्रहसिद्धये ।
सामान्यज्ञानग्रहणं मेधयेत्यभिधित्सितम् ॥१८॥

By the use of the word *medhayā*, it is intended to express the grasping of common knowledge, (this is) with a view to establishing the non-distinction between knowledge acquired from the Śāstras and from the worldly (dealings). [18]

One may recall here how Śaṅkara has in his *Adhyāsabhāṣya* pointed to the similarity between worldly and Śāstric dealings.

This verse intends to avert the probable notion on the part of the reader of the Upaniṣad that the reference to knowledge has connection with *dhyāna* or *upāsanā* and that which was in the context (from the third Brāhmaṇa); cf. *jñānenājanayad ity ukte dhyānenaiveti prakaraṇānurodhī bhramah syāt tannivṛttyartham medhāgrahaṇam* (SP).

तपःशब्देन कृच्छ्रादि यदि नामाभिधीयते ।
तथापि कर्मग्रहणं सप्तान्नोद्धृतिहेतुतः ॥१९॥

Though indeed by the word *tapas* is expressed (an activity) such as *kṛcchra*,¹ even then (here) is to be understood an activity (in general), for it is the cause of production of the

sevenfold foods.

[19]

¹This refers to bodily mortification which can be for either penance or expiation of some wrong done by one.

धिया धियेति लिङ्गाच्च गृह्यते ज्ञानकर्मणी ।
मेधातपोगिरा नान्ये ग्राह्ये तदफलत्वतः ॥२०॥

Also, from the expression of the cause *dhiyā dhiyā* ... are understood knowledge and activity (viz. performance of the ritual); (therefore) by the (use of) the words *medhā* and *tapas*, are not to be understood two other meanings,¹ for they do not produce any result (lit. fruit).² [20]

This explains the reference to *dhī* in this very *kaṇḍikā*.

¹*medhā* means grasping, and *tapas* means practising penances.

²That is, they do not raise a sacrificer to the status of Prajāpati and are in no way responsible for the creation of the world.

पाङ्क्तं हि प्रकृतं कर्म वेदेति ज्ञानमेव च ।
विहाय नातः प्रकृतं युक्तोऽप्रकृतसंग्रहः ॥२१॥

Indeed what is in the context is the Pāṅkta (i.e. fivefold) activity; and knowledge is expressed by the word *veda* 'he knew'; therefore it is not proper to accept what is not in the context by setting aside what is in the context. [21]

This is the conclusion of the discussion of *medhā* and *tapas*. It emphasises that *dhī* and *karman* are, in this context, the meanings of the two words. SP points out that the usually accepted meanings of the two words would involve the faults of *prakṛtahāni* and *aprakṛtakalpanā*.

Also, this has reference to *eṣa pāṅkto yajñah ... ya evaṃ veda* (BI 1.4.17).

मेधातपोतिरेकेण नान्यत्स्यात्साधनं यतः ।

प्रसिद्धत्वादतो हीति व्याचष्टे श्रुतिरञ्जसा ॥२२॥

Since there is no means to ritual activity in addition to (i.e. beside) *medhā* and *tapas*, therefore the Śruti has clearly stated the words *ato hi*, for the two are known (means of activity).

[22]

This brings out the stress on the word *hi* in *medhayā hi tapasājanayat pitā*. Also, this serves to emphasise that *medhā* and *tapas*, thus understood, can result into one's agency in the act of creation (*sraṣṭṛtva*).

अस्य भोक्तृसमूहस्य साधारणमचीकलृपत् ।
एकमन्नं पिता सृष्ट्वा तच्चेदं यदिहाद्यते ॥२३॥

The father (of the creation or the world) intended one common food for this (entire) mass of enjoyers and, after creating that, (he created) this food which is what is eaten here (by all).

[23]

This refers to BU: *ekam asya ... miśraṃ hy etat*.

यदिदं प्राणिभिर्नित्यमद्यतेऽहरहस्तृषा ।
साधारणमिदं युक्तं सर्वभूतस्थितेस्ततः ॥२४॥

Since this (food) is ever eaten by (all) beings, day after day and with relish (lit. thirst), therefore this is properly (called) common (food for all beings) owing to the sustenance of all beings thereby.

[24]

स य एतदुपास्तेऽन्नमसाधारणरूपतः ।
पाप्मनो नैव स द्रष्टा व्यावर्तत इहातुरः ॥२५॥

He, who worships this (common) food, holding it as uncommon, cannot keep (lit. turn away) from (sin), since thus seeing, he is a weakling¹ in respect of this.²

[25]

This has a reference to BU 1.5.2: *sa ya etad upāste*.

¹The word *ātura* here means: a person who is weak in his understanding of 'the significance of food', since he uses the food only for himself. In other words, he does not hold it as food to be commonly shared.

²This is for *iha* in the sense of *annaviniyoga* (SP).

उपासनं च तात्पर्यमिह श्रुत्याभिधीयते ।
मोघमन्नमिति तथा मन्त्रे ताच्छील्यनिन्दनम् ॥२६॥

In this respect,¹ *upāsana* means 'being devoted (or attached) to that'²— thus it is said in the Śruti, viz. in the Mantra *mogham annam ...*³ and so also is there a censure of being attached to that.² [26]

The third line in this verse is metrically faulty; the sixth letter is short.

¹Cf. SP: *sādhāraṇam annam saptamyarthah* (i.e. *ihārthah*).

²*sādhāraṇam annam*.

³*Taittirīya Brāhmaṇa* 2.8.8: *mogham annam apracetāḥ satyam bravīmi vadha it sa tasya, nāryamāṇam puṣyati no sakhāyam kevalāgho bhavati kevalādī*. This is an Arthavāda in respect of common food enjoyed by only one person who is the sacrificer.

In verses 29 to 38, there is a statement of *Bhārṭṛprapañca*'s explanation of *ekam asya sādhāraṇam* and its refutation as well.

वैश्वदेवं हि नामैतद्यदन्नमुपसाध्यते ।
नालमेतद्धि सर्वेषां पाप्मनां विनिवृत्तये ॥२७॥
इत्येवं केचिदिच्छन्ति तत्तु युक्त्या न युज्यते ।
अनूक्तेर्यदिदमिति सिद्धोऽर्थोऽनूद्यते यतः ॥२८॥
प्रात्यक्ष्यं न च तस्यास्ति शास्त्रमात्रप्रमाणतः ।
यथा सर्वात्तृवक्त्रान्तस्थस्य प्रत्यक्षता तथा ॥२९॥

'It is indeed meant that this (common) food is what is utilized

(*upasādhyate*) for (the performance of) Vaiśvadeva;¹ certainly, this (food) is not capable of removing (or warding off) all the sins', [27]

thus, do some² hold. But that does not get justified by any reason inasmuch as it is given without a basis in (the Śruti-) statement— thus, here is restatement of what is already established. [28]

And that food (used for Vaiśvadeva) is not directly perceptible as such, for it is (understood) only from Śāstra;³ (thus) it does not have that direct perceptibility which the food that enters into the mouths of all eaters has. [29]

This verse also has its third line metrically faulty; the sixth letter is short.

¹Vaiśvadeva is offering of oblations made to all gods by one before one's daily meals (i.e. both in the morning and in the evening). It is a compulsory (*nitya*) rite to be performed by a householder; cf. *Manusmṛti* 3.84-91 (verse 90 in particular).

²This refers to *Bhārṭṛprapañca*.

³Namely, *Manusmṛti*.

प्रतिप्राणि ममेदं स्यादभिलाषश्च दृश्यते ।
सर्वप्राण्यंशमिश्रत्वं ततोऽस्मिन्नवसीयते ॥३०॥

And it is noticed in the case of every being that there is a desire, 'May this (food) be mine'; therefore it is concluded that, in respect of this (food), there is the character of the share for all beings. [30]

This is Sureśvara's justification in respect of the commonly shared food. For this reason, that food also cannot be exception to what is called food and is enjoyed in common.

नात्मार्थं पाचयेदन्नमिति चापि स्मृतेर्वचः ।
तैर्दत्तानप्रदायैभ्यो यो भुङ्क्ते स्तेन एव सः ।
अन्नादे भ्रूणहा माष्टीत्यादीह वचनं स्मृतेः ॥३१॥

Also, there is a statement of a Smṛti, viz. 'One should not get food cooked for only oneself'¹; so also, there are such statements² from a Smṛti as 'He is indeed a robber who enjoys the foods from which he does not give to others...'³ (and) 'He transfers⁴ his sin to the eater of his food—the one who is the killer of a foetus.'⁵ [31]

Reference to various Smṛti sentences is for rejecting Bhartr-prapañca's view that *sādhāraṇa* food is Vaiśvadeva food, that is holding the *asādhāraṇa* food as *sādhāraṇa*.

¹SP supplies after *nātmārtham* ... *annam* three more *pādas*: *na vṛthā ghātayet paśum, na caikaḥ svayam aśnīyāt* and *vidhi-varjaṃ na nirvāpet*. Cp. *Rgveda* 10.117.6.

²*vacanam* stands for *vacanāni* (*jātāv ekavacanam*). *Manusmṛti* 3.105, 107 and 108. Cp. SP. This is understood from *ādi*.

³*Gītā* 3.13ab.

⁴*mārṣti* = *kṣipati* (NKL).

⁵*Manusmṛti* 8.317. SP however reads: *annādeḥ* ... *mārṣti anena abhiśaṃsati, stenah prayukto rājani yāvan nānṛtasamkaraḥ*. Also, it states: *vakṣyati hi variṣṭhabrahmatā ceha bhrūṇahety abhi-dhīyate*.

तस्यापि चान्तःपातित्वात्सर्वाद्यस्यैव युक्तिमान् ।
ग्रहस्तस्य गृहीतौ तु नास्यान्तःपातिता तथा ॥३२॥

Since that¹ also falls (i.e. is included) in (general food), understanding only of that which is eaten by all is proper (i.e. reasonable). As against this, if only that is understood, it is not included in (general food) in the same way.² [32]

This is one more reason in support of the author's view.

¹It means: the food for Vaiśvadeva.

²Read SP: *yathā sarvānnādye 'ntarbhūtaṃ vaiśvadevānnaṃ na tathā tasminn annāntaram ity arthaḥ*.

असृष्टाविनियोगत्वे प्राप्नुतस्तद्ग्रहे सति ।
सर्वप्राणिभिराद्यस्य तच्चानिष्टं प्रसज्यते ॥३३॥

If that¹ is understood (under reference to, or in connection with, that injunction), then there follow two faults: *asṛṣṭatva* 'not being created (by the father, viz. the sacrificer)', and *avinīyogatva* 'not being employed in the (relevant) ritual'. And that would invite the undesired contingency in respect of the food which is to be eaten by all beings. [33]

Yet another fault in the view of Bhartṛprapañca is introduced. This is further clarified in the next verse.

¹Namely, food for Vaiśvadeva.

अव्यावृत्तिश्च पाप्मभ्यो वैश्वदेवान्नसंग्रहे ।
न न्याय्यं वचनं तस्य शास्त्रमात्रव्यपाश्रयात् ॥३४॥

Also, not keeping from sins by accepting the food for Vaiśvadeva is not reasonable,¹ since that² has a basis merely in the Śāstra. [34]

This is yet further fault in the same view. The food for Vaiśvadeva is not eaten in ordinary way like any other *kāmya* 'what is desired' food.

¹It means: not in keeping with the teaching of the scriptures.

²This refers to the food for Vaiśvadeva.

अल्पीयःपापहानिश्च नापि शब्दात्प्रतीयते ।
न स पाप्मन इत्यस्मादश्रुता न च गृह्यते ॥३५॥

Also it is not understood from the word (viz. injunction regarding Vaiśvadeva) that there is the removal of (only) a small sin. And that is not understood from the statement *na sa pāpmanah* ... (for it is) not heard¹ there. [35]

¹SP understands this as the two faults: *śrutahāni* and

aśrutakalpanā.

सर्वाद्यान्नगृहीतौ तु हेतुर्गमक इष्यते ।
असाधारणकारित्वं तस्य साधारणात्मनः ॥३६॥

And (*tu*) there is accepted here an indication (of) the reason¹ for understanding (by *sādhāraṇa*) all eatable food; viz. that it has the capacity to render food of common nature into uncommon food. [36]

This explains the purposeful use in BU of the word *miśra*. The word would be purposeless, if one accepted the view of Bhartṛprapañca. In BU, *sādhāraṇa* food is described as of *miśra* character also; cf. *miśraṃ hy etat*. This description indicates that the food, which is not commonly shared, also brings sin to the eater of it.

¹Actually, the indication, the reason (used in apposition).

सर्वप्राणभृदन्नस्य तस्माद्ग्रहणमिष्यते ।
उक्तौ युक्तिबलादत्र नान्यस्येति विनिश्चितिः ॥३७॥

Therefore it is desired to understand (in this context, only) that food for (i.e. which is eaten by) all living beings. (Thus) on the strength of reasons (stated), here (in the Upaniṣad) the decision is: there cannot (be the acceptance) of any other (food). [37]

This is the author's concluding remark.

पापानिर्मोकहेतूक्तिर्मिश्रमित्यभिधीयते ।
सर्वार्थस्य हि पापाय यतोऽसाधारणीक्रिया ॥३८॥

(In the use of) the word *miśra* is stated the cause for the non-removal of sin; since rendering uncommon that food which is meant for all is (to point to its) resulting into sin. [38]

This is reaffirming how the word *miśra* in BU goes against Bhartṛprapañca's view.

प्रक्षेपोऽग्नौ हुतं विद्यात्तत्पूर्वं बलिकर्म च ।
प्रहुतं चेह विज्ञेयं ते देवेभ्यो ददौ पिता ॥३९॥

[Verses 39-45 explain the meaning of the words *dve devān abhājayat*.]

One should understand that the offering (of food) into the fire as *huta* and that every (offering of) ritual oblation is preceded by that (*huta*). Also *prahuta* is understood here as that which the father (viz. the sacrificer) gave to (i.e. intended for) the gods. [39]

देवेभ्योऽन्ने यतः प्रत्ते हुतप्रहुतलक्षणे ।
तानुद्दिश्य ततोऽद्यापि जुह्वति प्र च जुह्वति ॥४०॥

(And) since the two foods characterized as *huta* and *prahuta* were (in the yore) offered to the gods, therefore even today, they pour the oblation into the fire and also offer (some other outside the fire) intending (it) for them. [40]

This verse explains the word *tasmāt* in the Śruti.

यतः सूत्रपदे द्वित्वमविशेषेण चोदितम् ।
श्रौतस्मार्तविभागेन तत एतद्विकल्पितम् ॥४१॥
स्मार्तान्नानन्तरोक्तत्वात्स्मार्तत्वं स्याद्वयोस्तयोः ।
अग्निहोत्राभिसंबन्धात्स्यातां वा श्रुतिचोदिते ॥४२॥
मन्त्रे द्वित्वाविशिष्टत्वाद्धुतप्रहुतलक्षणे ।
श्रुत्यातस्ते विकल्प्येते श्रौते स्मार्ते हि तुल्यवत् ॥४३॥

[Here is now stated the purport of the Śruti statement *atho āhuḥ*. This is to explain the twofold mention of *juhvati* and *prajuhvati* in the previous verse.]

Since the twofold character (of oblations) is stated (lit. enjoined) in the Sūtra (i.e. in the Śruti-Mantra) without any specification,¹ therefore they are subjected to option viz. in the division: the Śrauta and the Smārta.² [41]

The two (foods *huta* and *prahuta* mentioned earlier) would have the character of the Smārta, since they are mentioned immediately after the Smārta food¹ or rather, (both these) can be regarded as 'those stated (i.e. enjoined) in the Śruti (Śrauta)' since they have a connection with the Agnihotra.³ [42]

Since (the two divine foods), which are characterized as *huta* and *prahuta*, are described by the Śruti as being two, without any specification, they are subjected to option (by the opponent); for, (both) the Śrauta⁴ and the Smārta (are) equal (in status). [43]

In verses 41-43 Sureśvara justifies the option regarding *hutaprahuta* foods and *dārśapūrṇamāsa* foods. The reason for doing this is: In the Mantra portion *dve anne hutaprahute vā dārśapūrṇamāsau vā*, there is no specification of the natures of the two foods and that gives rise to the sense of options. Verse 41 gives the reason for the option. Again, the foods are mentioned as *sādhāraṇa* and are therefore included in *smārtāṇṇa* and, further, they are mentioned immediately after *smārtāṇṇa*. Therefore they are *huta* and *prahuta* foods. But, since they are described as *devāṇne* 'foods for gods' and are thus mentioned in the nearness of the ritual of Agnihotra wherein are mentioned the Darśa and Pūrṇamāsa *grahas* (i.e. foods), therefore the foods can be called *śrautāṇṇa* also. In verse 43, the word *tulyavat* points to the *tulyatva* which is the basis for option (*tulyatvam vikalpahetuḥ*).

¹That is, without any specific mention of the distinction between the two oblations.

²This gives the reason for optionally understanding the word *dve* as the Śrauta and the Smārta oblations, referring to the foods for gods as can belong to *huta* and *prahuta* varieties and

also to oblations in the Darśa and Pūrṇamāsa sacrifices. This option entails the first line of the next verse.

³This is another reason for holding two options. The commonly shared food is included among the Smārta foods.

⁴This refers to the Darśa and Pūrṇamāsa foods.

दर्शश्च पौर्णमासश्च देवान्ने ते यतः श्रुते ।
प्रायस्ताभ्यां न कामाय यष्टव्यमिति गम्यते ॥४४॥

Since (the two foods) Darśa and Pūrṇamāsa are heard (i.e. enjoined) in the Śruti, therefore it is understood that one should not perform the sacrifice with those two foods for obtaining one's desire. [44]

This is based on the authority of the Śruti statement *tasmān neṣṭiyājukaḥ syāt*. The objector's argument is that *dve devān abhājayat* refers only to Darśa and Pūrṇamāsa foods. Therefore the option, mentioned in verse 41 above, cannot be entertained. This is barred by *na kāmāya yaṣṭavyam*.

नेहेष्टयो निषिध्यन्ते देवप्राधान्यसिद्धये ।
ताच्छीलिकोक्ताश्च वणात्तच्छीलत्वं निवार्यते ॥४५॥

Here,¹ *iṣṭis* (small rites performed with desires) are not negated owing (to the desire) to establish the principal significance of the god. By the mention (lit. hearing) of the suffix *ukañ*, which goes with (i.e. refers to) one's being in the habit of performing that (rite), is warded off the character (of the sacrificer) as being given to its performance. [45]

This explains the significance of the suffix *ukañ* in *iṣṭiyājuka* and also explains away the possible doubt that the Darśa and Pūrṇamāsa rites are performed with the desire for heaven.

The author stresses on the significance of the form *iṣṭiyājuka* and points out that Darśa and Pūrṇamāsa rites, though performed with some desire, are not performed by mere habit. Thus only

the habitual performance of rites is warded off.

¹That is, in the statement *neṣṭiyājukaḥ*....

प्रसक्तान्यपि नोच्यन्ते त्रीण्यन्नान्यत्र कारणात् ।
तेषां फलत्वादुक्तेभ्यः साधनेभ्योऽन्यता यतः ॥४६॥
सौकर्यप्रतिपत्तेश्च भूयोविषयतस्तथा ।
साधनैकसजातित्वादानन्तर्यमकारणम् ॥४७॥

Here (i.e. in this Brāhmaṇa), three foods, though contingent¹ for (good) reason, are not discussed (first) because of their character as the fruit (resulting) from those (i.e. the foods) mentioned (earlier) and (thus) there is their difference from those means (to fruits). [46]

Also (this is so done) for easy understanding (of the difference between the means and the end)² and also because they (i.e. the three foods) cover quite a large sphere of things. (The seventh food is mentioned together with the first three) because it has the same character as theirs, viz. that of a means (or cause). The immediately following of the three (*sādhya*) foods does not have any (specific) purpose. [47]

The Vārtika (of course, following the Bhāṣya) has proceeded to explain the seventh food (viz. *paśvanna*) immediately after the first three are explained and it has thus ignored, for the time being, the three foods which are mentioned in the Brāhmaṇa before that (viz. *paśvanna*)— this is, in other words, to explain the purpose of what is called *pāṭhakramātikrama* 'varying the sequence in the original text'.

This explains how the Vārtika and the Bhāṣya refer to the less authoritativeness of the *pāṭhakrama* than that of the *arthakrama* (i.e. the sequence of the purpose). It is an accepted principle that the *arthakrama* is stronger than the *pāṭhakrama*.

The purpose of Darśa and Pūrṇamāsa rites is attainment of heaven; it is not warded off.

¹Cf. SP: *pāṭhakramāt kāraṇāt prāptāni*. Yet further, SP observes: *atha vā paśvannasya sādhanatvād uktasādhanatraye tasya*

*buddhisāmnidhyāc caturthatvena vyākhyānam, tato 'nnatrayavy-
ākhyety ukte saukaryeṇa pratipattir ataś ca pāṭhānādara ity arthaḥ.*

²The three foods, being of the nature of the Sūtra (i.e. Virāj), are of the nature of the end (i.e. result) to be achieved, whereas the others are the means to be employed, i.e. they cannot to be secured— they are infinite in their extent.

पयोऽन्नमेव प्रायेण मनुष्याः पशुभिः सह ।
भुञ्जते पय एवाग्रे तेषामन्नमतोऽस्तु तत् ॥४८॥
भुञ्जते पय एवाग्रे क्रमेणान्यत्तृणादि हि ।
अतोऽनुमीयते पित्रा तेभ्यः प्रतं पयः पुरा ॥४९॥

(The word) *payas* just means food; (for) generally human beings, along with (i.e. as well as) animals, consume (i.e. enjoy) only milk in the beginning; therefore let that (viz. *payah*) be the food. [48]

They (viz. the animals) eat (i.e. enjoy) milk first and then subsequently (i.e. gradually) (begin to) graze (lit. eat) grass etc. For this reason, it is concluded¹ that the father gave them (i.e. men and animals) milk before (anything else). [49]

This explains *paśubhya ekam prāyacchad iti tat payah*.

¹*anumīyate = dr̥ṣṭānusārāt kalpyate*. So it is understood on the basis of what is seen in the life of the humans and the animals (SP and NKL).

पशवः पय एवाग्रे भुञ्जते नापरं ततः ।
कथमेतद्विजानीम इत्येतदभिधीयते ॥५०॥

Animals¹ consume (i.e. enjoy) only milk first (and) not anything else than that. (In order to explain) how we are to know this, there is now stated (in the following verse(s)): [50]

¹This refers to the humans as well as to the animals; because the Śruti considers both the bipeds and the quadrupeds.

यत एवमतो लोके कुमारं जातमग्रतः ।
जातरूपव्यवहितं लेहयन्ति घृतं जनाः ॥५१॥
तस्यानु तदभावे वा पाययन्ति स्तनं शिशुम् ।

[Verses 51 and 52ab explain *tasmāt kumāraṃ jātaṃ ghr̥taṃ vaivāgre pratilehayanti stanam vānudhāpayanti.*]

Since this is so, therefore, in the world, do the people first make a new-born child lick ghee¹ in touch with (i.e. touched by or rubbed on) (a piece of) gold. [51]

Only after that (doing), or (even) in the absence of that, do they put the child on (the mother's) breast. [52ab]

¹Since ghee is a product of milk, it is identified with the latter.

पशुष्वपि तथा जातं वत्सं कश्चित्प्रपृच्छति ॥५२॥
कियांस्ते वयसा वत्स इत्याचष्टे वयो यथा ।
अतृणाद इति तृणं नाद्याप्यति मनागपि ॥५३॥
वर्तते पयसैवासावद्यापीत्यवसीयते ।

So also, in respect of the animals, (they do the same). In relation to a new-born calf, someone asks: [52cd]

'How old is your young one (here, the calf)?'. Thus (asked), one states the age in this manner: 'It is not yet an eater of grass; that is to say, it does not eat even a little of grass.'

[53]

It subsists on only milk yet— so is this understood. [54ab]

प्राण्यप्राणि जगत्सर्वं तस्मिन्नेव प्रतिष्ठितम् ॥५४॥

(Indeed) all the world comprising living beings and non-living things¹ is supported on that (i.e. milk) only. [54cd]

¹The word *prāṇyaprāṇi* literally means: whatever being that

breathes and whatever thing that does not breathe.

पयसीदं जगन्मग्नमित्येतद्गम्यते कृतः ।
प्रसिद्धेर्गम्यते न्यायाद्यतोऽसावभिधीयते ॥५५॥

‘Whence is it understood that this world is supported by (lit. has merged in) only milk?’, (asks someone). (The answer is:) ‘So is it understood for a reason, viz. usage,¹ since that is (so) expressed (i.e. declared). [55]

¹SP: *śrautī prasiddhir eva nyāyaḥ*. Read BU: *tasmin sarvaṃ pratiṣṭhitam yac ca prāṇiti yac ca ncti; payasi hīdaṃ sarvaṃ pratiṣṭhitam yac ca prāṇiti yac ca na*.

आहुतिः पय एव स्यादाज्यं वा पय एव वा ।
पय एवाहुतिः सर्वमित्येतच्च श्रुतेर्मितेः ॥५६॥

An offering into the fire should be of only milk, or of clarified butter or milk. All that is offering is but milk and this is (understood) from the Śruti, the authoritative means (of knowing). [56]

Here the Vārtika refers to the usage among the ritualists which, they hold, has come from some Śruti; viz. *ghṛtāhutiṃ vā payāhutiṃ vobhayam tv etat paya eva* (Śatapatha Brāhmaṇa 2.2.4.4). Here, *miti* is for *māna* (i.e. *pramāṇa*), used in opposition to Śruti.

अथैषाज्याहुतिर्यज्ञे यद्विः सर्वरूपकम् ।
पशुश्चाप्याज्यमेवैतत्करोतीत्यपि चागमः ॥५७॥

Now, this offering of clarified butter in a sacrifice is what is offerings in all forms. So also is the tradition that a sacrificer (while offering) an animal, does offer only this, viz. clarified butter. [57]

This verse paraphrases the Śruti which is cited above in the note on the previous verse. It supports the said known usage.

It states the inference drawn from the Śruti; SP reads: *tatraiva śrutyantaram āha ... ājyāhutes tāvat payastvaṃ tadvikāratvād yac ca yajñe sarvarūpakam puroḍāśātmakam havir yaś ca paśur etat sarvam ājyam evābhighārasaṃskārāt karoti puruṣo na hi carvādy ājyānabhighāritam homyam payaś cājyam iti sarvasya payastvam ity āgamaśāsanam ity arthaḥ.*

आज्याभिघारसंस्कारात्सर्वमेव पयो हविः ।
पयस्येव जगत्कृत्स्नमग्निहोत्रे प्रतिष्ठितम् ॥५८॥

Indeed all offering is but milk on account of its modification (i.e. purification) by the sprinkling of clarified butter on it. (Therefore) the entire world is thus supported in (or established in) only milk, viz. in Agnihotra.¹ [58]

¹The Vārtika justifies this reference to the Agnihotra in the next verse.

ते वा एते इति तथा परिणामोऽखिलं जगत् ।
अग्निहोत्राहुतेः साक्षाच्छ्रुतावेव समीरितम् ॥५९॥

It is (so) stated in the Śruti itself, viz. in *te vā ete ...* that offering of the Agnihotra has as its result all the world.¹ [59]

Reference to the Agnihotra offerings in the preceding verse needed some support. Therefore this Vārtika points to the purport of the Śruti *te vā ete āhūtī hute utkrāmatas te antarikṣam āviśataḥ* (Śatapatha Brāhmaṇa 11.6.2.6). This should not be taken to set aside *apūrva* or *adrṣṭa* effected by the Agnihotra.

¹The word *pariṇāma* here stands for 'effect' (*kārya* or *phala*).

अग्नौ प्रास्ताहुतिः सम्यगादित्यमुपतिष्ठते ।
आदित्याज्जायते वृष्टिर्वृष्टेरन्नं ततः प्रजाः ॥६०॥

He who has poured his offering into the fire well attends on the Sun. From Āditya proceeds rain, from rain food and thence the created beings. [60]

This is from *Manusmṛti* 3.66; for support to what is expressed in the last quarter, refer to *Gītā* 3.14.

पयोद्रव्याहुतेश्चैतत्परिणामोऽखिलं जगत् ।
एतच्च श्रुतितः सिद्धं विश्वमाहुतिकारणम् ॥६१॥

And¹ the entire world is but the result of the offering of the material, viz. milk; and this is established by (the statement in) the Śruti: All the world has offering as its cause. [61]

With reference to the two *cas*, read SP: *apūrvasaṃgrahārtham ādyaś cakāro dvitīyaḥ smṛtisamuccayārthaḥ*.

यथोक्तदर्शनस्तुत्यै दर्शनान्तरकुत्सनम् ।
तस्मिन्सर्वमिति ह्यस्य दर्शनस्य विधित्सया ॥६२॥

(Now follows) the censure of another view in order to praise the already stated view, viz. in that (offering of milk) all (the world is) supported— indeed, this is done (only)¹ with a desire to enjoin (the adoption of the first) view. [62]

¹ 'Indeed' and '(only)' are by the force of *hi*. Cf. SP: *na hi nindā nindyam ninditum api tu vidheyam stotum iti- nyāyadyotako hiśabdaḥ*. Also NKL: *paradarśananindā na niṣ- edhārthā, kim tu atra vidhitsitopāsanastutyarthā ity arthaḥ*.

पयसैवाग्निहोत्रं हि जुह्वत्संवत्सरं द्विजः ।
जयत्येव पुनर्मृत्युं न भूयो मृतिभाग्भवेत् ॥६३॥
संवत्सरे प्रयोगाणामग्निहोत्रे हि संख्यया ।
षष्ट्युत्तराणि त्रीण्येव शतानीति विनिश्चितम् ॥६४॥
क्षपाहान्यपि तावन्ति संख्ययेह भवन्ति हि ।

शतानि सप्त संख्याताः प्रयोगार्धाश्च विंशतिः ॥६५॥
 याजुष्मत्योऽपि तावत्य इष्टकाः स्युः प्रजापतेः ।
 संवत्सराग्नेश्चित्यस्य पुंसो नाड्यस्तथैव च ॥६६॥
 संपदैवाहुतीर्विद्वान्संपाद्याग्नेस्तथेष्टकाः ।
 संवत्सरमवाप्नोति स्वनाडीसंख्यया नरः ॥६७॥
 पुमान्संवत्सरोऽग्निश्च नाड्यहोरात्रयाजुषैः ।
 संपदैते समाः सर्वे तस्मात्संवत्सरश्रुतिः ॥६८॥
 संवत्सरात्मसंपत्त्या कालात्मानं समश्नुते ।
 इत्येवंदृष्टयो धीरा यदाहुरसदेव तत् ॥६९॥

[Now is stated in details the other view; viz. *saṃvatsaram payasā juhvat apa punar mr̥tyum jayati*. And, finally, it is rejected.]

Indeed a twice born, who worships the Agnihotra with milk for a year, overcomes (lit. wins) a second death, i.e. he does not become subject to death again.¹ [63]

It is decided that there are, in a year, three hundred and sixty performances of Agnihotra in number. [64]

Indeed, days and nights also are as many in number (and therefore) the halves of the performances (of the ritual) are counted to be seven hundred and twenty. [65]

Also, as many are the bricks of Prajāpati² related to the Yajus Mantras and similar (i.e. equal in number) are (the bricks) of the fire to be worshipped throughout the year. So also are the veins (in the body) of a man (equal in number). [66]

By means of this very riches,³ that is after making the offering (to Agnihotra fire) and the bricks (of the fire) equal in number with the veins in his own body, a person, who knows (the nature of Vedic ritual) obtains the year.⁴ [67]

A sacrificer (lit. man), a year and the fire— these are all, by this riches, equal with what belongs to the Yajus (viz. Mantras of them, i.e. bricks), the veins and the days and nights. Therefore is there the hearing (i.e. mention) in the Śruti of a Saṃvatsara. [68]

Thus, by producing himself in the nature (or form) of a Saṃvatsara (i.e. Prajāpati) does (a sacrificer) attain the nature of Kāla (i.e. Prajāpati); all this, which the wise ones have thus held in their view, is false (i.e. wrong). [69]

¹The purport is: The sacrificer under reference dies and does not become born or embodied again.

²It is identified with Saṃvatsara.

³This riches consists in the above said large number of them.

⁴Verses 64-67 have thus explained the idea of sacrificer's overcoming death. This view is typically ritualistic in character. The Agnihotra-Upāsana has a basis in the Śruti passages: *tasya ha vā etasyāgnihotrasya sapta ca śatāni viṃśatis ca saṃvatsare sāyamāhutayaḥ sapta caiva śatāni viṃśatis ca saṃvatsare prātar-āhutayaḥ* and *tāvatyo 'gner iṣṭakāḥ*. The performance of the ritual produces, according to this view, the mystically significant similarity among the offerings, the different measures or units of time and the veins in a human body. This effects the attainment of Saṃvatsara (identical with Prajāpati) and deathlessness.

Verse 67 offers quite some difficulty of construe and translation.

पयस्यन्तर्हितं विश्वं पश्यन्नेवं पयो नरः ।
एकयैव स आहुत्या जगदात्मानमश्नुते ॥७०॥

[Now follows the refutation of the view just stated.]

Thus,¹ seeing the entire world as resting (lit. concealed) in milk (and worshipping the Agnihotra) with milk an individual obtains the Ātman of the world by means of just a single offering. [70]

This is to say: One does not have to keep on performing the Agnihotra ritual for one full year. Making only one offering of milk, one can attain one's goal, viz. becoming one with Prajāpati.

¹That is, in accordance with the view earlier stated and

acceptable to Sureśvara.

तत्रैवं सति को मूढो द्राघीयांसं प्रतीक्षते ।
संवत्सरावधिं कालं सकृदाहुतिसाधने ॥७१॥

This being so, which fool would wait for the longer time of a year's duration while there is (available) the means of securing (the Ātman of the world) through only offering one?

[71]

This emphasises why the author discards the other earlier mentioned view.

पयो द्रव्यं यथातत्त्वदर्शी चेच्छद्भयान्वितः ।
यदैवाहर्जुहोतीत्थं हन्ति मृत्युं तदैव सः ॥७२॥
एकयैव स आहुत्या देवेभ्योऽन्नं ह्यशेषतः ।
प्रयच्छति यतो नातः प्रयोगान्तरमीक्ष्यते ॥७३॥
हुतमेवं जगत्कृत्स्नं नातोऽन्यदवशिष्यते ।
यथोक्तदर्शनात्तस्मात्सर्वाप्त्या मृत्युजिद्वेत् ॥७४॥

If one who sees the truth as (discussed just before) offers on some one day the material, viz. milk, overcomes (lit. strikes down) death just then.

[72]

Since he offers all food to the gods in (i.e. by making) a single offering (of milk), there is therefore no need of another performance (i.e. of making any more offering).

[73]

Thus, in accordance with the view which we have stated, what is thus offered (viz. milk) is the entire world and there does not therefore remain anything (to be offered); therefore the sacrificer would become a conquerer (lit. overcomer) of death through his obtaining all.¹

[74]

Verse 72 is the explanation of the sentence *yad ahar eva ...*

Verse 73 explains the sentence *sarvaṃ hi ...* and supplies the reason for the statement in verse 72 above.

Our text and translation of verse 73 follow the reading -*īkṣyate*

in the AnSS and the NKL editions. However, the variant reading *-īkṣate* given in the AnSS edition gives alternative translation, which is better; thus: One does not wait to make for another performance (viz. making an offering every day of the year).

Verse 74 sums up the reason for holding the view stated so far.

¹This may refer to the whole world (*krtsnam jagat*) which is the same as *saṃvatsara* 'Prajāpati'. SP, however, refers 'all' to becoming one with all gods which consequently results into absence of any further (birth and) death.

उक्तवद्भूदि संभाव्य वक्ष्यमाणान्यपि श्रुतिः ।
अन्नानि कस्मादित्याह प्रश्नवाक्यविवक्षया ॥७५॥

Now, having considered the (three) foods, which are (yet) to be stated, as similar to (those already) stated, the Śruti states (the question) *kasmāt tāni...*; (this) through a desire (to make) a statement in answer to the question. [75]

In BU the question *kasmāt tāni* occurs even before there is the statement of the three remaining foods. The author explains the purpose of this: The three foods to be stated are in nature similar to the earlier stated foods, viz. the creation of the sacrificer.

अद्यमानान्यथान्नानि यथोक्तान्यत्तृभिः सदा ।
कस्मात्क्षयं न संयान्ति यवपूर्णकुसूलवत् ॥७६॥

Now (a question arises:) The foods, that are thus stated, ever being enjoyed (lit. eaten) by the eaters, why do they not get exhausted (i.e. do not decrease) just like a granary full of barley (and other corn)? [76]

This explains the purpose of *kasmāt tāni* and is the paraphrase of the Upaniṣadic words *na kṣīyante 'dyamānāni*.

प्रश्नस्य कस्मात्तानीति श्रुत्यैवाचार्यभूतया ।
पुरुषो वा इति गिरा हेतुरुक्तोऽक्षये परः ॥७७॥

To the question *kasmāt tāni* asked by the Śruti, which has (as if) become a preceptor, is stated (in answer) the subsequent reason for the non-decrease (of food) in the word(s) *puruṣo vā* [77]

अद्यते चेत्सदैवान्नं जन्यते न तु तत्ततः ।
यथोक्तः स्यादयं दोषो न तु तन्नैह जन्यते ॥७८॥

There could be this fault which is mentioned (by the questioner), if food were ever eaten and not produced. But, that is not so, (for, in this context, it should be noted that) it is (ever) produced. [78]

अन्नाक्षयत्वहेतुत्वात्पुरुषोऽक्षितिश्च्यते ।
स हि धीहाप्रबन्धेन सर्वदान्नं करोत्यतः ॥७९॥

The sacrificer is called (one having) non-decrease, since he is the cause of the non-decreasing character of food— indeed, by the continuity of knowledge and performance (of the ritual),¹ he ever produces food. [79]

This explains the meaning of the word *akṣiti* according to *hetuhetumadbhāva*.

¹The word *īhā* stands for *karman* as is warranted by the word *kriyābuddhi* in the following verse. Cf. BUBV 1.4.451.

क्रियाबुद्धिप्रबन्धेन यतो भोक्ताप्यहर्निशम् ।
तदन्नं जनयत्येव तस्मादन्नं न हीयते ॥८०॥

Since, by the continuity of knowledge and performance (of the ritual), the enjoyer on his part thus creates the food, therefore the food does not ever get exhausted. [80]

भोगदस्यैव भोगेन सृज्यमानत्वहेतुतः ।
अन्नाक्षयो भवेदेवं तयोरव्यतिरेकतः ॥८१॥

On account of the enjoyment of what yields enjoyment (and) owing to its being (continuously) created, there would be such (i.e. as described) non-decrease of food; this is thanks to the invariable¹ relation of the two (viz. enjoyment and what is enjoyed). [81]

We have followed the reading in the AnSS edition. NKL reads *bhogādasyaiva* in place of *bhogadasyaiva*. It is difficult to decide whether following the latter is correct. SP understands *avyatireka* as *mithoyoga* 'the inseparable relation' of enjoyment which employs the enjoyer.

¹This is *avyatireka* 'inseparability'.

सुखदुःखादिसंवित्तिः फलं पूर्वस्य कर्मणः ।
रागद्वेषक्रिया तत्र स्यात्फलान्तरसिद्धये ॥८२॥

Experience of pleasure, pain etc.¹ is the result of the former performance(s); and the performance through attachment and/or aversion would produce another result. [82]

One performs ritual actions and thereby secures enjoyment and happiness which in turn produce attachment to and/on aversion for some thing(s) and this would produce continuity of action and the consequent production of food— this justifies *annākṣaya* mentioned in verse 81 above.

¹The word etc. refers to various or particular forms of pleasure and pain.

रागादिपूर्वकं कर्म जायते फलवद्यतः ।
रागादिरहितं तत्तु निष्फलं सुप्तवागिव ॥८३॥

Since a performance which has proceeded from attachment etc.¹ produces (further) results (i.e. becomes fruitful); therefore

that which has not proceeded from any attachment etc. does not produce any result(s), like the chatter of a sleeper. [83]

This verse explains further the statement in the preceding verse.

This explanation is a good example of the author's use of the *anvayavyatireka* method. On this method, cf. our book [Vol.1:1982] Introduction.

को हेतुरक्षयत्वे स्यादिति पृष्टमथाधुना ।
तद्विदः फलसिद्ध्यर्थं भूयः प्रश्नोऽयमुच्यते ।
अक्षितित्वं कथं पुंस इत्येतच्चाधुनोच्यते ॥८४॥

Now it is asked: What is the cause of the non-decreasing character (of food)?— This question is asked once again with a view to establishing that there is a (positive) result for (the activity of) the knower of that.¹ And now it is later stated as to how there is the non-decreasing character of the man (viz. the sacrificer)² also. [84]

¹This is rather *kriyābuddhiprabandha* of verse 80 above; cf. the next verse.

²Yet perhaps, as SP points out: *akṣayahetutvagunaḥkasaptānnātmaḥkaprajāpatipuruṣopāsaka* is meant.

स हीदमन्नं कुरुते तत्तत्कालप्रसूतया ।
धिया धिया हि पुरुषः कर्मभिश्चान्नमात्मनः ॥८५॥

Indeed, he produces this food by every (new) thought and activities¹ which have occurred to his mind from time to time; for, the man (viz. the sacrificer) produces food for himself by activities. [85]

¹*dhiyā dhiyā* and *karmabhiḥ* refer to *kriyābuddhiprabandha*.

भुज्यमानान्यपि ततो न क्षीयन्ते प्रबन्धतः ॥८६॥

Therefore foods, though being continuously eaten, never get exhausted through the continuity (of their being eaten and produced). [86]

यथैव पुरुषोऽन्नानां भोक्तात्यन्तं तथैव सः ।
कर्ताप्यत्यन्तमेव स्यादन्योन्याव्यरितेकतः ॥८७॥

As the sacrificer is verily the enjoyer of the foods, so also is he verily the maker (of them), since the two (the sacrificer and the food)¹ have invariable association (with each other). [87]

¹This refers to their nature, viz. *kartṛtva* and *bhokṛtva*, cf. SP.

एवं प्रबन्धरूपेण साध्यसाधनलक्षणम् ।
अविद्यापटसंवीतचेतसां स्थास्निववेक्ष्यते ॥८८॥

Thus, among those whose intellect (*cetas*) is enwrapped by the bondage (or band) of Avidyā, (the food) characterized as both the effect and the cause is understood¹ (lit. seen) to be permanent, as it were, in their continuity.² [88]

¹Our text and translation follow the variant reading *-vekṣyate* and not the printed text of the AnSS edition. This is supported by the NKL edition and is better acceptable.

²NKL explains *prabandha* as *gaṅgāpravāhavat śrotorūpa*.

एतच्च भण्यते श्रुत्या पुंसो वैराग्यसिद्धये ।
संसारादविरक्तस्य मुक्तीच्छा नेह कस्यचित् ॥८९॥

And this is stated by the Śruti for establishing aversion (to worldly existence) on the part of the man who is not averse to transmigratory existence; for, there is not ever noticed here (in the case of such a man) the desire for liberation. [89]

फलहेत्वोर्मिथोऽत्यन्तं सर्वदाव्यतिरेकतः ।
सम्यग्ज्ञानादृते नास्ति तद्वेतुच्छित्तिकारणम् ॥९०॥

Thus, owing to the ever obtaining inseparable association of the cause and the effect (viz. the sacrificer and the food), there is not any means other than right knowledge¹ for the destruction of its cause.² [90]

This is to justify the second line of the preceding verse.

¹This is about the nature of the Ātman; or perhaps about the nature of *kriyābuddhī* as leading to impermanence.

²This refers to *avirakti* 'absence of aversion to worldly existence' caused by Avidyā.

त्यक्त्वान्यत्सकलं तस्मात्सम्यग्ज्ञानस्य लब्धये ।
मनोवाक्तनुचेष्टाभिर्महान्तं यत्नमाचरेत् ॥९१॥

Therefore for securing right knowledge¹ (a man) should first abandon everything else and make very great effort by his *manas*, Vāk and body. [91]

This sets aside the notion that some performance (*karman*) is necessary, in addition to knowledge.

¹See note 1 on the preceding verse.

पुंसोऽक्षितित्वं यो वेद तस्येदं फलमुच्यते ।
सोऽन्नमत्ति प्रतीकेन वृत्त्यान्नं मुख्ययात्ति सः ॥९२॥

Now is stated the result of (the Śruti statement:) 'He, who knows the non-decreasing character of the sacrificer in the statement *so 'nnam atti* ... 'he (i.e. the sacrificer) eats food by the mouth', in its (meaning conveyed by) its (i.e. the word's) primary function. [92]

नैवविद्वुणतामेति ह्यन्नं प्रति कदाचन ।
प्रधानभूतः सन्भुङ्क्ते सर्वदान्नं स कामतः ॥९३॥

(The sacrificer) knowing thus does not ever become subordinate to food; being the principal (i.e. possessing greater importance), he ever enjoys the food, at (his) will. [93]

In this verse, the statement of the preceding verse is presented in the *vyatireka* form.

अपि देवान्स संयाति तथोर्जं चोपजीवति ।
प्रशंसैषा यथोक्तस्य विज्ञानस्येति निश्चितिः ॥९४॥

He unites with the gods and also lives on vital food (or on energy) (*ūrjam upajīva-*). This is the praise of the specific knowledge¹ which is stated (before)— this is the decision. [94]

The first line is the paraphrase of a *praśaṃsāpara arthavāda*.

¹The word *viññāna* is explained as *saviśeṣajñāna*. Cf. our book [Vol.1:1982] Introduction.

अन्नत्रयं यदुत्कृष्टं तस्यायं निर्णयोऽधुना ।
शरीरकार्यसंस्थस्य वर्ण्यतेऽध्यात्मरूपकम् ॥९५॥

There is now the decision regarding that which is the excellent, viz. the triad of food, which abides in the subtle body and the gross one¹— this is of the nature of the body.² [95]

This is to introduce, now after the discussion of four foods, the exposition of the ideas about the three foods *manas*, *Vāk* and *Prāṇa* which remain in connection with gross and subtle bodies and the *Ātman* (as the principal or vital wind in the body).

¹SP translates *śarīra* as *sūkṣma* and *kārya* as *sthūla*.

²The word *ātman*, meaning the principal wind in the body, refers to the body.

प्रयोगसमवायित्वं पूर्वेष्वन्नेषु वर्णितम् ।
 भोक्तारश्चापि ये तेषां तेऽपि श्रुत्योपवर्णिताः ॥९६॥
 प्रयोगसमवायित्वात्पूर्वेषां कर्मणां सताम् ।
 मनआदित्रयं कार्यं तादर्थ्येनोत्तरा श्रुतिः ॥९७॥

In respect of the earlier (stated) foods, there is described their character of being intimately connected with the performance (of ritual) and those also are described who are the enjoyers¹ of them (viz. the foods) in the Śruti. [96]

The earlier (stated foods) being the causes² (lit. actions), inasmuch as they are intimately connected with the performance (of ritual) and the triad beginning with *manas*³ being the effect, (now proceeds) the subsequent (portion of the) Śruti to convey that meaning. [97]

¹SP points out that these include *caṇḍāla* etc., Indra and other gods, and the animals.

²Sureśvara uses the word *karman* in the sense of *kāraṇa*.

³Namely, *manas*, Vāk and Prāṇa.

Verses 98-154 are the discussion of BU 1.5.3.

उत्पाद्य त्रीण्यथान्नानि मेधया तपसा पिता ।
 मनो वाचं तथा प्राणमात्मार्थे तानि चाकरोत् ॥९८॥

The father (i.e. the sacrificer), having first created by his thought and activity¹ the three foods, viz. *manas*, Vāk and Prāṇa, put them to his own² use. [98]

¹This is equivalent to *buddhikriyā* stated earlier in verse 80 and *dhiyā dhiyā* in verse 85.

²We have taken the word *ātmārthe* as equivalent of *svārthe*; that is, the word *ātman* is understood as a reflexive pronoun.

मनसोऽस्तित्वसिद्ध्यर्थं श्रुत्योपन्यस्यतेऽनुमा ।
 सतश्च तस्य कामादिरूपाण्यपि च वक्ष्यति ॥९९॥

The Śruti has put forth an argument (lit. inferential statement) in order to establish the existence of *manas*; and now¹ it will state the properties² of even (*ca*)³ that existing (*manas*),⁴ viz. desire etc. [99]

This is the exposition of *anyatramanāḥ*

¹This is the force of (*sataś*) *ca*.

²The word *rūpāṇi* refers to various *dharma*s; cf. reference to *dharma* in the immediately following verses.

³Cf. SP: *dharmīṇā dharmasamuccayārtham api cety uktam*.

⁴Existing means 'what is inferred' (as the word *anumā* signifies); cf. SP on *sataś ca* = *mitasya ca*.

अविद्याधिकृतावस्यां धर्मधर्म्यादिसंगतिः ।

अविद्याकार्यसंस्थैव न त्वसौ प्रत्यगात्मनः ॥१००॥

(The Śruti means to convey that) the connection of properties and what has properties is (possible only) in the state which is governed by Avidyā, viz. it belongs to the effect of Avidyā and¹ it does not belong to the individual self (in its unaffected form). [100]

¹*tu* is here almost for *ca*, yet alternatively 'however'. Then translate '... of Avidyā. However, it does not ...'

इत्येतत्प्रतिपत्त्यर्थं परो ग्रन्थोऽवतार्यते ।

मा भूत्कामादिधर्मित्वमात्मनीति ऽयत्यते ॥१०१॥

In order to convey (or explain) this,¹ the subsequent² portion (of the Śruti) is introduced. (Also) there is an effort made to the effect that the character of possessing properties such as desire etc. does not cling to (i.e. belong to) the Ātman. [101]

¹That is, the meaning of *anyatramanāḥ*

²This refers to the arguments adduced for proving the existence of *manas*. Cf. NKL with note: *kim atra mānam*— note on this: *pratyagātmani dharmadharmisaṃgatya bhāve mānam kim*.

पृष्ठो जरद्गवं यान्तमद्राक्षीस्त्वमितीतरः ।

ततोऽन्यत्रमना आसं नातोऽद्राक्षं त्वदीरितम् ॥१०२॥

[Verses 102-107 are the exposition of the Śruti *anyatramanāh*]

Asked (by someone): 'Did you see an old bull going by?', the person says, 'My mind (*manas*) was elsewhere, therefore I did not see what you asked about.' [102]

The known worldly example in relation to the absence of *manas* is adduced as an evidence for proving the existence of *manas*! For explanation, read SP: *jaradgavadhīhetau viṣayādaṁ saty api kadācid eva taddhīr jāyamānā hetvantaram ākṣipaty arthādisāṃnidhye kadācid eva jñānotpattir ity arthāpattir manaḥsādhikety arthaḥ*. Also NKL (with note): *jaradgavadhīhetu-* (note: *atra dhīpadena antaḥkaraṇavṛttir ucyate*) *-sākalye sati kadācid eva jāyamānajñānam, viṣayād vyatiriktahetusāpekṣam, tasmin* (note: *-dhīviṣaye*) *sati kadācit jāyamānatvāt, yad evaṁ tad evam, yathā chedyādisamavadhāne kadācid eva jāyamānachidikriyā tadatirikta-kuṭhārasāpekṣā ity anumānam ity arthaḥ*.

विषयान्तरसंबद्धं मनो दृष्टं घटादिवत् ।

आत्मैकसाक्षिकं तच्च ह्युक्तार्थापत्तिसंश्रयात् ॥१०३॥

manas is understood (lit. seen) like a pitcher etc., as connected with another object and it has only the individual self as its seer— this, by resorting to the contingency implied (lit. stated) before.¹ [103]

This refers to the worldly situation stated in the preceding verse.

¹Cf. verse 102cd above.

अस्त्यात्मा चित्स्वभावोऽत्र चक्षुश्चाविकलं तथा ।
सप्रकाशं गवाश्वं च न च पश्यति चेतनः ॥१०४॥
अतोऽनुमीयतेऽस्त्यन्यद्यस्मिन्नसति नेक्षते ।
द्रष्टादि संहतं सर्वं यस्मिंश्च सति वीक्षते ॥१०५॥

(Here¹) there is the Ātman having the nature of sentience and also an eye which is not defective and, further, the bull and the horse have also light on them and yet the sentient (person) does not see it. [104]

Therefore it is concluded that there is something else,² which, not being there,³ a person does not see and only while that exists there (in the ensemble), one can see all the things collected,⁴ viz. the seer etc. [105]

In verse 102, there is no mention of a horse, but this is immaterial.

¹In the case mentioned in verse 102 above.

²That refers to the Ātman, the seer as in verse 103 above.

³That is, not associated with a body.

⁴The word *samhata* stands for a collection of a seeing person, his eyes etc., the object and the light.

यत्तदस्ति मनस्तत्स्यात्प्रसिद्ध्या चास्ति तन्मनः ।
अभून्मम मनोऽन्यत्र यतो नाद्राक्षमित्यतः ॥१०६॥

Whatever it is is *manas* and that *manas* does exist (is understood) by the commonly known (incident, when it was said):¹ 'Since my mind was elsewhere, therefore I did not see (what you asked).' [106]

See verse 102 above.

SP refers *prasiddhi* to the well-known episode of the maker of arrows. The episode refers to a maker of arrows who did not notice the king who had passed by him. Consequently, when

he was asked if he had seen the king, he answered, 'Since my mind ... asked).' Obviously, his mind was completely engrossed in arrow-making and, therefore, did not have any connection whatsoever with other things or his surrounding. The stress here is on the engrossment of one's mind in one's doing. But Sureśvara uses this incident to emphasise that everything exists because *manas* exists there, as connected with it.

सदप्यात्मादिकं सर्वं दर्शनादावकारणम् ।
मनसैव यतो द्रष्टा गवादीह प्रपश्यति ॥१०७॥

All, viz. the self and others¹ being there (in the situation of seeing) though, they are not the cause of the perception (lit. seeing) (of an object), since the seer sees a bull etc.² only through *manas*. [107]

¹Cf. note 4 on verses 104-105 above.

²The word etc. refers to a horse; cf. verse 104 above.

निःशेषप्रत्ययाधारधर्म्यस्तित्वं प्रसाध्य हि ।
कामादिधर्मसिद्ध्यर्थं काम इत्याद्यथोच्यते ॥१०८॥

[Now follows the exposition of *kāmaḥ saṃkalpaḥ*....]

Having (thus) established the existence of what possesses the properties (of seeing etc.) and is the support of entire perception, there is now stated (in the Śruti) *kāmaḥ* ... with a view to establishing the properties, desire and others. [108]

साधनान्येव मनसो बुद्धिकर्मेन्द्रियाण्यपि ।
सहैवायतनैः सर्वैः प्राधान्यं मनसस्ततः ॥१०९॥

Also, Buddhi 'intellect' and (various) organs of activity, together with their abodes- (viz. their bases in the bodies), are only the means; therefore *manas* has the principal status among them. [109]

Buddhi and organs of activity can be the means for an individual only if they abide in a body; cf *cakṣuḥ* (*indriya*) is *kṛṣṇatārāgravartin*.

विषयाभिलाषः कामः स्यान्न विशेषेऽस्ति कारणम् ।
इन्द्रियालोचितार्थस्य स्यात्संकल्पोऽवधारणम् ॥११०॥

kama 'longing for objects' is desire— there is no reason for stating any specific example.¹ *saṃkalpa* is decision (about) the specific nature) of an object perceived by a sense-organ.

[110]

¹This is an instance where Sureśvara comments on what he thinks is an unnecessary or irrelevant explanation in the BU, viz. *kāma* as *strīvyatīkarābhilāṣa*. Thus, this is an example of a Vārtika referring to *durukta* in the Bhāṣya. Read SP: *strīvyatīkarābhilāṣa iti bhāṣye viśeṣoktir ayuktety āha*.

अनिश्चयात्मिका वृत्तिर्विचिकित्सेत्युदाहृता ।
आस्तिक्यबुद्धिः श्रद्धा स्यादश्रद्धा तद्विरोधिनी ॥१११॥

vicikitsā 'doubt' is explained as modification (of Buddhi 'intellect') which is of the nature of indecision (about the nature of the object perceived). *śraddhā* 'faith' is belief in (the existence of) the object perceived and *aśraddhā* 'want of faith' is what is opposed to it.

[111]

धृतिश्रद्धे विना न स्युः कामाद्याः कारणादृते ।
यतोऽकामादयोऽप्यत्र ह्युक्ता एवार्थतो मताः ॥११२॥

There would not be *kāma* etc. without their cause, i.e. without *dhṛti* 'retention' and *śraddhā*, since, here (i.e. in this sentence of the Śruti), absence of *kāma* etc. are also accepted (as resulting) from (some) object.¹

[112]

¹This is a very cryptic statement. The 'object' here stands for that about the existence of which an individual has some notion (lit. faith) or that from which he has to withhold himself (cf. the next verse). NKL states this in brief thus: *śraddhādhṛtyoḥ kāmādihetutvāt tayoḥ abhāvoktyā tatkāryakāmādyabhāvo 'py arthād ukta evety arthaḥ*. The explanation in SP is however clearer, more lengthy though it is.

धारणं च धृतिर्ज्ञेया बुद्ध्योपात्तस्य वस्तुनः ।
विपर्ययोऽधृतिस्तस्या हीर्लज्जेत्यभिधीयते ॥११३॥

And *dhṛti* is to be understood as retention (lit. holding) of an object grasped (or decided) by Buddhi; its opposite is *adṛti*. (And) *hrī* is what is called (or known as) shame. [113]

विज्ञानं निश्चितं धीः स्याद्भयं भीरभिधीयते ।
एतत्सर्वं मनो ज्ञेयमिति तादात्म्यमुच्यते ॥११४॥

viññāna is understanding that is decided (a definite notion about the nature of an object); *bhī* is called that what is fear—all this should be understood as (various forms of) *manas*, (since) here is stated the oneness (of cause and effect¹). [114]

¹The word 'effect' refers to *vr̥ttyantara* 'a modification' (in form) of *manas*.

बुद्धेश्च मनसश्चैक्यं विवक्षित्वोपसंहतिः ।
इन्द्रियाण्यपि सर्वाणि स्वान्तस्यैव तु वृत्तयः ॥११५॥
यतः स्वकार्यनिर्देशः स्वान्तस्य स्पर्शनेन्द्रिये ।
मन एव ततो ज्ञेयं शरीरेन्द्रियसंहतिः ॥११६॥

[Now follows the explanation of *tasmād api*]

There is then made, after the Śruti's having intended to convey the oneness of Buddhi and *manas*, the concluding statement: All the organs are but modifications of one's internal organ

(viz. *manas*), [115]
 since, in respect of the sense of touch, there is the mention
 of the effect of one's internal organ. Therefore the ensemble
 of a body and the organs is to be understood as only *manas*.
 [116]

In these two verses, Sureśvara follows the Sāṃkhya use of
 the word *ṛtti* in the sense of modification of *manas*, viz. the
 effects and the causes.

In the first line of verse 116, Sureśvara has intended the
 Upaniṣadic illustration of a man touched by somebody from
 behind and his knowing about the same. Thus, actually an organ
 comes into contact with an object and it is *manas* that grasps
 it.

पुंसो भोगप्रसिद्ध्यर्थं वैचित्र्यं धीर्निगच्छति ।
 देहेन्द्रियाद्यवस्थाभिरतो धीः सर्वमेव तु ॥११७॥

(Thus) *manas*¹ attains variety (of forms) in order that one
 (viz. the sacrificer or individual) secures enjoyment; therefore
 all is but *manas* appearing in various states of the body and
 organs. [117]

¹In this verse, Sureśvara uses the word *dhī* in the sense of
manas.

जिघ्रन्ती भवति घ्राणं पश्यन्ती चक्षुरुच्यते ।
 शृण्वती भवति श्रोत्रमिति व्यासोऽप्यभाषत ॥११८॥
 शकलं कृष्णमणु स्थलमिति धीः कर्मणो वशात् ।
 द्वैताधिकारमापन्ना वैश्वरूप्यं निगच्छति ॥११९॥

While smelling, (the same *manas*¹) becomes (the organ called)
ghrāṇa; while seeing, it is called *cakṣuh*; (and further) while
 hearing, it becomes *śrotra*— thus has Vyāsa also declared
 (i.e. explained).² [118]
manas, falling within the compass (i.e. province) of duality,

becomes white, black, subtle and gross thanks to (the variety of) *karman* 'object',— (and thus) it attains variety (of forms).

[119]

Vyāsa is the author of the *Mahābhārata*. Sureśvara cites earlier authors for showing how his explanation is correct.

¹Here also, *dhīh*=*manas*. See note under verse 117 above.

²Cp. the first quarter with *Mahābhārata* 12.240.5c (*jighratī* for *jighrantī*), the second quarter with 12.240.5b (with a little difference) and the third quarter with 12.240.4c.

प्रत्यक्चिद्देशभेदेन न हि शुक्लादिवस्तुनः ।

सत्ता संभाव्यतेऽन्यत्र प्रत्यग्वद्ग्राह्यवस्तुनः ॥१२०॥

Certainly it is impossible that there is existence of any object white etc. as apart from sentience in an individual in the same way as the inner self (that can obtain) elsewhere than in an object of our perception.

[120]

Sureśvara affirms here that, really speaking, grasping various objects is owing to the appearance (*vivarta*) of the inner sentience. In other words, worldly knowledge is but Avidyā.

नातः शुक्लादिवस्त्वस्ति बुद्धिरेव क्रियावशात् ।

शुक्लादिरूपतामेति पुरुषार्थप्रसिद्धये ॥१२१॥

Therefore there does not exist (any) object white etc.; it is just *manas* which, owing to (various) activities (of the organs of activity), attains the character of white etc. for securing the end of an individual.

[121]

Here *Buddhi* stands for *manas*; cf. *dhī* above.

धीर्विपर्ययरूपेयं यतः शुक्लादिरूपिणी ।

मन एवेत्यतः प्राज्ञाः सर्वरूपं प्रचक्षते ॥१२२॥

Since this *dhī*,¹ having the (various) forms white etc., is but *manas*, therefore the wise ones declare it as possessed of all forms. [122]

¹*dhī* here appears to be *ṛtṭyantara* 'some modification' of *manas*. Cf. SP: *rūpadheyam sarvaṁ dhīmātram ... dhīr eva sarvaṁ rūpam iti viduṣāṁ paribhāṣā*.

आत्मार्थेनैव सत्यत्वं कृत्स्नात्मीयस्य वस्तुनः ।
तस्य तन्मात्रयाथात्म्यादिति पूर्वमवादिषम् ॥१२३॥

I have already stated¹ that the reality of all the belongings (lit. things) of one² is only by their being useful to³ the individual self, since they have oneness with only that. [123]

This is to affirm again that *manas* is in reality the Ātman.

¹In verse 120 above.

²That is, one's own, *ātmīya* < *ātman*, reflexive pronoun.

³Or, serving the purpose of.

अपि सर्वाणीन्द्रियाणि मन एव यतस्ततः ।
पृष्ठतोऽपि नरः स्पृष्टो मनसैव प्रपद्यते ॥१२४॥

Also, since all organs are only *manas*; therefore a man, when touched even from behind, understands (about it) by *manas* itself. [124]

This is the meaning of the Upaniṣadic statement *tasmād api*, though its purport was explained in earlier verses, cf. verses 117-119. This is clarified further in the following verses.

पराङ्मुख उपस्पृष्टः पाणेः स्पर्शोऽयमीदृशः ।
इति स्पर्शविशेषं ना मनसैव प्रपद्यते ॥१२५॥

A man, who is touched (by someone) from behind,¹ understands, the specific touch only with *manas* thus: "This

kind of touch is that of a hand.'

[125]

¹It literally means: while he is facing away (from one who touches him).

त्वचोपस्पृष्टिमात्रेण स्पर्शमात्रं प्रपद्यते ।
स्पर्शनादिविशेषं तु मनसैव प्रपद्यते ॥१२६॥

He grasps by the sense of touch merely by the touch (lit. touching); but it is only by *manas* that he understands the specific character of touch etc.¹ [126]

¹The word etc. indicates the functions of other organs similar to the sense of touch. *sparsana* = *upaspr̥ṣṭi* (*upa* does not modify the sense of the verb root *spṛś*).

मनसैव यतोऽशेषकरणस्वार्थधीभवः ।
सर्वं हि मन एवेति श्रुतिराह वचस्ततः ॥१२७॥

Since there is the rise of understanding of their own objects by all the organs, thanks only to *manas*, therefore the Śruti has declared 'All is indeed *manas*.' [127]

मनस्तावत्सुनिर्णीतं शरीरं चेन्द्रियाणि च ।
तदनन्तरतो वाचो व्याख्या प्रस्तूयतेऽधुना ॥१२८॥

[Now is introduced the discussion on Vāk (among the three foods).]

In the beginning (*tāvat*) is explained *manas*, so also the body and organs;¹ thereafter is now introduced the explanation of Vāk. [128]

¹That is, the ensemble of them.

यः कश्चेत्यविशेषोक्तिर्नादवर्णपदोक्तिभिः ।

संयोगोत्थो वियोगोत्थो यश्चापि प्रत्ययात्मकः ॥१२९॥
 वागेव स इति ज्ञेयः कुतो यस्मादियं सदा ।
 समानयोने रूपस्य वाक्प्रमाऽतोऽवबोधिका ॥१३०॥

The statement in the Śruti *yaḥ kaś ca* is not a mention of some specific (function). (It means:) Whatever be it, viz. what is of the nature of some experience that has arisen from the combination or from the separation of sounds, syllables and words, it has to be known as Vāk. (One asks:) ‘Why (is this so)?’ (and the answer is:) ‘Since it is ever Vāk that causes the (right) understanding of (any) form which arises from the same source.’¹ [129-130]

¹Cf. verse 119b and verse 122a above.

वागेव प्रत्ययादौ स्यादित्येतद्गम्यते कुतः ।
 स्वाभिधेयावबोधस्य ह्या समाप्तेरियं यतः ॥१३१॥
 यतोऽत्यर्थं प्रवृत्ता वाग्घटबोधे प्रदीपवत् ।
 अर्थावबोधनं कार्यं वाचो नान्यदितोऽपरम् ॥१३२॥

(A question is asked:) Whence is it understood that it is only Vāk that is at the source¹ of perception? (The answer is:) (It is so) since this one (viz. Vāk) continues to be (i.e. to function) till one grasps the meaning² of its own expression. [131]

Since Vāk functions beyond (revealing) the object (which is to be known)³ (*atyartham*), like a lamp in perceiving a pitcher, (therefore) the function of Vāk revealing the (nature of an) object⁴ is not anything beyond this.⁵ [132]

¹Namely, the cause.

²The word *samāpti* refers to both the completion of the function and one’s obtaining or grasping the meaning.

³Namely, the meaning of the word(s).

⁴Or alternatively, the meaning of its expression.

⁵Word and experience (caused by it), viz. *śabda* and *pratyaya*

are together the revealer of the meaning— they are not distinguished (or they do not differentiate themselves). Therefore the utterance of a word and one's grasp of its meaning are but one continued function (i.e. there is no relation of the cause and the effect). Cf. SP: *śabdapratyāṇ arthaprakāśakāṇ ato na tau vācas tattvato bhidyete*. It is in this sense that the simile of the lamp is to be understood; it is not to be understood in its limited sphere.

शब्दोच्चारणशक्तं हि ननु वाग्निन्द्रियं मतम् ।
कथं तद्विषयः शब्दो वागित्यत्राभिधीयते ॥१३३॥

Now, (one might ask:) They understand Vāk as the organ of speech which is capable of uttering a word; how is it then said that the word,¹ which is (but) its effect,² is Vāk? [133]

¹Word is equivalent of *nāda* and/or *varṇa* in verse 129 above and is only one aspect of Vāk.

²This is for *viśaya*, lit. an object; *artha* of a *pada*.

सत्यमन्यत्र तदग्राह्यं तस्य तत्रैव योग्यतः ।
इह त्वन्नत्रयस्यैव सर्वात्मत्वं विवक्षितम् ॥१३४॥

(The answer is:) True,¹ that is to be so understood elsewhere,² for it (viz. the word *vāk*) is used there to convey with propriety³ only that (organ). Here, however, it is intended to convey that the triad of foods alone has the nature of as all.⁴ [134]

¹That is, the question is rightly asked.

²This refers to the organ of speech.

³*yogyataḥ* = *yogyatvataḥ*.

⁴This precludes the other possible meanings of the word *vāk*, in accordance with the maxim *śabdānām anekārthatvāt*. The meaning is thus restricted.

मनोऽन्तःपाति निखिलं रूपं यद्वद्विवक्ष्यते ।
तस्य प्रकाशकस्तद्वत्सर्वः शब्दो विवक्ष्यते ॥१३५॥

As all form, i.e. the entire (world of form), is sought to be expressed as included in (the meaning of) *manas*, so every word is desired (or understood) to be expressive of what illuminates that (viz. Vāk). [135]

प्रकाशस्यैव सर्वस्य शब्दत्वप्रतिपत्तये ।
एषा हि नेत्यतो वक्ति वाग्निन्द्रियनिवृत्तये ॥१३६॥

Therefore in order that one understands¹ every illuminator of all objects² as having the nature of sound and also for setting aside the sense of (mere) organ of speech, the Śruti states *eṣā hi na* [136]

¹Alternatively, ... understands as word all that illuminates the objects, as

²This refers to 'all words (in the language)'.

रूपात्मकं यथा चक्षु रूपस्यैव प्रकाशकम् ।
वाक्च शब्दात्मिका तद्वच्छब्दस्यैवास्तु दीपिका ॥१३७॥

[Verses 137-142 are a short discussion of the view of Bharṭṛ-prapañca on the meaning of the expression in the Śruti *eṣā hi na* This has no basis in the BUB. Therefore this is what one can regard as *anukta* by Śaṅkara.]

(One might hold:) As *cakṣus*, which is of the nature of the form of an object, is the illuminator only of the form,¹ so also should Vāk, which is of the nature of (all spoken) word, be taken as the illuminator of (lit. be a lamp for) the (spoken) word alone.² [137]

¹The word *rūpa* is, in this context, *rūpāṇi (jātāv ekavacanam)*.

²Supply: and not of its sense, or object signified by it.

इति चोद्यं समाशङ्क्य परिहारं प्रचक्षते ।
एषा हि नेति केचित्तु नेयं दीपादिवन्मता ॥१३८॥

Keeping this¹ objection in view, some offer an argument in answer: (The Śruti statement) *eṣā hi na ...* (conveys) that this one (viz. Vāk) is not understood as similar to a lamp etc.²

[138]

¹That is, what is stated in verse 137 above.

²Cf. note 5 (end of it) on verse 132 above.

श्रोत्रादिकरणग्राह्यं सर्वं तद्रूपमुच्यते ।
तस्य प्रकाशिकैवेयं न प्रकाश्या प्रदीपवत् ॥१३९॥

All, that is (to be) perceived by various organs, viz. ears and others, is called form; but this one (viz. Vāk) is the illuminator of that (viz. forms) and is not itself to be illuminated just like a lamp¹ (by anything else).

[139]

¹Cf. BSB 2.1.4 (p.441): *na hi pradīpau parasparasyopakurutaḥ*.

प्रकाश्यमेव चात्यन्तं मनो रूपं यथा तथा ।
प्रकाशिकैव चात्यन्तं वाग्रूपस्येति निश्चितिः ॥१४०॥

And, as *manas* is totally the forms which are to be illuminated (by it), so also does Vāk totally illuminate all forms— this is the decision.

[140]

This is to emphasise that Vāk is 'illuminator'.

प्रकाश्यमेव रूपं स्यात्प्रकाशो वाक्तथैव च ।
विद्यादेतद्समासेन लक्षणं रूपसंज्ञयोः ॥१४१॥

Form is only what is to be illuminated and Vāk is, in the same way, (only) the illuminator (lit. light); this should be

known as the brief explanation of form and name. [141]

This is to distinguish Vāk, i.e. name, from the object, i.e. form, to be illuminated.

नामापि गृह्यमाणं सद्रूपं भवति शैवल्यवत् ।
रूपं च बोधयत्तद्वन्नामपक्षेऽवतिष्ठते ॥१४२॥

Further (*api*), name (i.e. Vāk), being grasped (by the individual self), is, like whiteness, a form and also (*tadvat*)¹ remains in the class (called) name.² [142]

Once again, it is stressed that Vāk is both '(what is) illuminated' and the illuminator.

¹ *tadvat* = *tathā ca*.

² *saṃjñā* in the verse is for *nāma*, i.e. (in reality) Vāk.

एवं वाङ्मनसे सम्यग्व्याख्याय प्रविभागशः ।
तयोर्विधरणः प्राणस्त्वनिरुक्तोऽथ भण्यते ॥१४३॥

[Now is explained the nature of Prāṇa.]

Having thus clearly explained Vāk and *manas* one by one (*pravibhāgaśaḥ*), the Śruti now explains Prāṇa, their supporter,¹ which is not explained (so far). [143]

¹ Cf. BU 4.4.22.

अन इत्यविशिष्टस्य वायोर्ग्रहणमिष्यते ।
स एव प्रादिसंबन्धाद्विशेषार्थो भवेदसुः ॥१४४॥

By the word *ana* is understood (lit. desired to be signified) wind which is unspecified; and the same, viz. Asu, has specified meanings owing to its connection with (*upasargas*) beginning with *pra*.¹ [144]

NKL points out that 'wind' in the body is called by names Prāṇa, Apāna etc., but *in reality* there is only one wind. Read: *prāṇādibheda anupādhikaḥ na svābhāvikaḥ*.

¹The term *prādi* is used by Pāṇini and other grammarians for *upasargas*; here, they are used with *ana* mentioned in verses 145-149 below.

उत्सर्गो मुखनासाभ्यां पिण्डस्य प्रणतिस्तथा ।
 प्राणो नाम मरुद्वृत्तिरपानस्त्वधुनोच्यते ॥१४५॥
 अवाग्वायोरपश्वासो देहस्यावाग्गतिस्तथा ।
 अपान एष कथितो व्यानः सांप्रतमुच्यते ॥१४६॥
 वीर्यवत्कर्महेतुत्वं व्याप्य देहे च वर्तनम् ।
 व्यानवृत्तिरियं प्रोक्ता ह्युदानाख्यापि कीर्त्यते ॥१४७॥
 योद्यमादिक्रियाहेतुस्तथाभ्युदयकर्मकृत् ।
 उत्कर्षहेतुर्देहे तु वृत्तिः सौदानसंज्ञिता ॥१४८॥
 समाहरति वृत्तीयो हृद्देशे कीलवत्स्थितः ।
 स समान इति ज्ञेयः सर्वकार्योपसंहतिः ॥१४९॥

The movement outside by mouth and nostrils and also ¹ the advancing of the body is called Prāṇa. It abides ² in Marut 'the wind'. Now is explained Apāna: [145]

The downward movement of the wind in the body and also the downward movement of the body is called Apāna, Now is explained Vyāna: [146]

Being the cause of action which is full of strength and also the movement in (the whole of) the body is called the function ³ Vyāna. Now is explained (the function) called Udāna. [147]

That function, which is the cause of activities, viz. rising up etc., which brings about worldly prosperity and which is the cause of well-being, is called as the function Udāna. [148]

The one who conducts (the aforesaid) functions, ⁴ residing in the region of the heart, ⁵ like a (firmly driven in) nail, is to be known as Samāna, the one who accomplishes (or leads)

all (human) activities.

[149]

¹This is for *tathā*. But SP understands by *tathā* a reference to other places in the body where *prāṇa* functions, viz. *nābhi*, *stana* and *pādāṅguṣṭha*.

²*ṛtti* here seems to have derived from verb root *ṛt* 'to be', i.e. 'to abide'.

³Sureśvara specifically uses the word *ṛtti* in verses 147, 148 and 149 but not in verses 145 and 146.

⁴There is mention made of *ṛttis* 'functions' which were understood in verses 145-148; this indicates that the words *prāṇa* etc. are functions as well as those that perform them (*ṛtti-ṛttimadabhedena nirdeśaḥ*).

⁵*hrd* is indicative of *nābhi* and other regions of the wind.

यस्यैता वृत्तयः प्रोक्ता वृत्तिमान्सोऽन उच्यते ।
संपूर्यावस्थितो देहं शाकल्यप्रश्ननिष्ठितः ॥१५०॥

That is called Ana, the performer of functions, (that is to say) the one whose functions are thus stated; that one, having occupied the body, remains in the body— (the one) stated in conclusion (of the answer to the question) of Śākalya.¹

[150]

¹This is a reference to BU 4.9.26: *kasminn udānaḥ pratiṣṭhitah, samāna iti*. The mention of Ana as separate from Prāṇa etc. in the BU is thus explained.

प्राणशब्दः पुरा प्रोक्तो वृत्तिमात्राभिधायकः ।
अन्ते वृत्तिमदर्थः स्यात्सर्वं प्राण इतीरणात् ॥१५१॥

The word *prāṇa* which is used herebefore¹ is expressive of all functions,² but that (i.e. the same) occurring in the end refers to the one which performs those functions; (this is so) on the authority of the statement *sarvam prāṇaḥ*.³

[151]

This verse justifies the note after verse 149 above.

¹In the relevant portions of the BU and the BUBV.

²That is, all *ṛttis*.

³Cf. CU 3.15 also.

नाम रूपं तथा कर्म संहतं सत् त्रिदण्डवत् ।
मिथः संकीर्णवृत्तिस्थं देह आत्मेति चोच्यते ॥१५२॥

Name, form and activity— (this triad) holding together like three sticks,¹ (intermixing their) functions, is the body and also the Ātman.² [152]

¹The sticks together are called *kuḍya* etc. 'roof, wall etc. of a thatched hut'. The number three is owing to the force of the triad of foods, though it is merely descriptive and stands for many.

²This stands as a synonym of *deha*.

एतावानेव संघातो देहः प्राणादिरूपकः ।
वाङ्मयोऽथ प्राणमयस्तथैव च मनोमयः ॥१५३॥

Only this much ensemble is called the body and has the form of Prāṇa etc.,¹ (and) that is made up of what is of the nature of Vāk, that of Prāṇa and also that of *manas*. [153]

¹That is, *manas*, Vāk and Prāṇa.

नामात्र वाङ्मयं सर्वं रूपं सर्वं मनोमयम् ।
तद्वत्प्राणमयं कर्म देहस्यास्यैष संग्रहः ॥१५४॥

In this (context), name is all that is made up of Vāk, all (that is called) form is what is made up of *manas* and similarly (all) activity is made up of Prāṇa— this is a brief statement¹ (i.e. description of the nature) of this² body. [154]

¹The term *saṃgraha* technically stands for a statement of some

proposition in brief— a sort of summing up of the argument.

²This is to say: the directly perceptible body.

Now follows the discussion of BU 1.5.4-10. In verses 155-167 there is description of manas, Vāk and Prāṇa with reference to the ādhibhautika world. Sureśvara clarifies the matter of BU under the sphere of manas, Vāk and Prāṇa; it is to be noted that he does not follow the sequence of the readings in the BU.

अन्नत्रयविभागोऽयमध्यात्म उपवर्णितः ।

अथाधिभूतविषये विभागस्तस्य कीर्त्यते ॥१५५॥

(So far) is explained this division of the three foods, which is in relation to the body, and now is being stated (in the following) the division of that in respect of what belongs to matter. [155]

भूर्लोकं जानतर्ग्वेदं देवा माता च वागियम् ।

अधिभूत इह प्रोक्ता विज्ञातं यच्च सा च वाक् ॥१५६॥

[In verses 156-160, Sureśvara explains what is called *pariāya-pāñcaka* 'the five forms' for the worship of Vāk, *manas* and Prāṇa each. They are the five triads, viz. (i) *lokatraya*, (ii) *vedatraya*, (iii) *deva-pitr-manuṣya*, (iv) *pitṛ-mātr-prajā* and (v) *vijñāta-vijijñāsyā-avijñāta*. This is based on the Śruti passage: *trayo lokā eta eva ... prāṇa enaṁ tad bhūtvāvati*.]

Know (this Vāk) as this world and the *Rgveda*. This Vāk which is described as abiding in the elements is the gods and the mother. And, further, what is objective knowledge (or, the knowledge of objects, viz. *vijñāna*) is also Vāk. [156]

अन्तरिक्षं यजर्वेदः पितरश्च पिता तथा ।

इह यच्च विजिज्ञास्यं तन्मनोऽत्राधिभौतिकम् ॥१५७॥

The sky (i.e. the middle world), the *Yajurveda*, the manes and the father and whatever here (i.e. in the worldly dealings) is wished to be known,¹ all that is *manas* in respect of the material (or elemental) world. [157]

¹ *vijijñāsyā* here is in contrast with *vijñāta* in the preceding verse.

द्युलोकः सामवेदश्च मनुष्याः प्रजया सह ।
यच्च किञ्चिदविज्ञातं प्राणोऽसावाधिभौतिकः ॥१५८॥

The heaven, the *Sāmaveda*, men together with offspring and whatever has been unknown are all that *Prāṇa* who is related to the material (or elemental) world. [158]

यत्किञ्चिदिह विज्ञातं तद्वाग्रूपं प्रचक्षते ।
मनोरूपं विजिज्ञास्यं प्राणस्याज्ञातमेव तु ॥१५९॥

Whatever is here (in the world) known is, they say, the manifestation (lit. form) of *Vāk* and whatever is wished to be known is the manifestation (lit. form) of *manas*, but (or and) whatever of *Prāṇa* is unknown. [159]

भूर्लोकदिषु सर्वेषु मनोवाक्प्राणलक्षणम् ।
यथासंभवमायोज्यमेकैकस्मिन्त्रयं त्रयम् ॥१६०॥

All these three, viz. this triad having the nature of *manas*, *Vāk* and *Prāṇa*, is to be connected with each one of all these regions beginning with this world,¹ according to suitability. [160]

¹ Referring to *bhuvah-* and *svah-* also.

अधिभूते यतोऽशक्या वक्तुं वागादिविस्तृतिः ।
यत्किञ्चेत्युपसंहारं लक्षणोक्त्या ततोऽकरोत् ॥१६१॥

As the extent of Vāk etc. in respect of the material (or elemental) world is impossible to state, (the Upaniṣad) stated, by way of conclusion, this general statement¹ *yat kiṃ ca*. [161]

¹Cf. *lakṣaṇoktiḥ sāmānyavacanam* (SP).

लक्षणेनैव संसिद्ध आधिभौतिकसंग्रहे ।
त्रय इत्यादिकोक्तिस्तु नियमार्थेति निश्चयः ॥१६२॥

(Thus) after the brief statement of the material (or elemental) world is established by (i.e. in the form of) a general statement, the (subsequent) statement beginning with (the word) *trayaḥ* is for restricting¹ (its scope)— this is the decision. [162]

¹SP explains thus: This refers to the meditation on these three foods as *manas*, Vāk and Prāṇa and not to any other foods. Cf. *bhūrādyātmanā vāgādi dhyeyam iti niyantum*.

व्याख्याने प्रस्तुते त्वस्मिन्नविद्यायाः समन्ततः ।
कार्यकारणरूपेण तस्या एषोपसंहतिः ॥१६३॥

While there was (thus) introduced an exposition on Avidyā all around, there is (here) this concluding remark (or brief statement) about it as one (appearing) in the form of causes and effects. [163]

Earlier there is stated the variety of the forms of Avidyā in their full extent, but now the same is briefly stated as having cause and effect relation among them.

.. प्राणात्मना तदज्ञातं ब्रह्म कारणमुच्यते ।
नामात्मना तु तन्मानं मनोरूपं च मीयते ॥१६४॥

In the form of Prāṇa is stated that Brahman which has been unknown, as the cause; the knowledge (*māna*) of it¹ however is grasped (*mīyate*)¹ in the form of a name and it is in the

form of *manas*.

[164]

¹*mīyate* means *viśeṣato jñāyate*. As a result, it has not been known as the real cause.

यतोऽविद्यैव सर्वेयं मनोवाक्प्राणलक्षणा ।
अतस्तत्तत्त्वसंबोधात्तां जग्ध्वामृतमश्नुते ॥१६५॥

Since all this, which is in the form of (i.e. is characterized as) *manas*, Vāk, and Prāṇa, is but Avidyā; therefore after having eaten up (i.e. overcome) that and having thus known the true nature of them ² one attains immortality.³ [165]

¹Namely, Avidyā.

²Namely, *manas*, Vāk and Prāṇa— these as the Brahman.

³*amṛta* is for *amṛtatva*.

विज्ञातादन्यदेवैतद्विज्ञातात्तथा पृथक् ।
ब्रह्मैतदुभयं जग्ध्वा पूर्णमेवावशिष्यते ॥१६६॥

This Brahman, which is quite distinct from what is known ¹ and from what is not known,² overcomes both (of them), and (then it) remains only as full.³ [166]

¹This is used in the worldly way (*vyavahārabhūmau*).

²Cp. *Kenopaniṣad* 1.4ab: *anyad eva tad veditād atho aviditād adhi*.

³Cf. *pūrṇam adaḥ pūrṇam idam ... pūrṇasya pūrṇam ādāya pūrṇam evāvaśiṣyate* (BU 5.1.1).

विज्ञातादिविदं भोगैर्वागाद्या देवता नरम् ।
विज्ञातादिस्वरूपेण तमवन्ति पृथक्पृथक् ॥१६७॥

The gods Vāk and others, each one of them severally, product (or favour) ¹ the individual, the knower of them in their forms, which are known etc.² by (yielding to him) enjoyments. [167]

¹This is vedic use of the verb root *av* in a double sense.

²The word etc. stands for *vijijñāsyā* and *avijñāta*.

Now follows the discussion of BU 1.5.11 up to verse 177.

वागादयस्तावदुक्ताः संक्षेपेणाधिभौतिकाः ।
तेषामेवाधिदैवेऽथ व्याख्या प्रस्तूयतेऽधुना ॥१६८॥

So far, Vāk etc. in relation to the material (or elemental) world have been explained in brief and now is introduced an explanation of the same with respect to the sphere of the gods. [168]

This connects what follows, viz. *tasyai vācaḥ* ... with the preceding exposition.

अध्यात्ममधिभूतं च यस्या रूपं पुरोदितम् ।
अधिदैवविवक्षायां तस्या वाच इदं वपुः ॥१६९॥

That Vāk, whose manifestation (or form) with respect to the body and the material (or elemental) world has been explained earlier, has (now, it will be stated,) this form with respect to the sphere the gods. [169]

This is the meaning of *tasyai vācaḥ*

अध्यात्ममधिभूतं च व्याख्याता यात्र वाक्पुरा ।
वाचा सर्वाधिदैविक्या संव्याप्ता साविभागतः ॥१७०॥

Among these (viz. Vāk etc.),¹ Vāk, which has been earlier explained with respect to the body and the material (or elemental) world, is wholly² covered by Vāk in relation to all their gods. [170]

This explains *tad yāvatī*

The twofold nature of Vāk, which is earlier explained, is the effect (*vr̥tṭyantara*) of this Vāk which is to be explained now, i.e. it is really *kāraṇarūpā*.

¹This is for *atra* = *madhye vāgādhīnām* (SP).

²Cf. *dvididhayā ādhidaivikyā kāraṇabhūtayā vācā tādātmyena vyāptā ity arthaḥ* (SP).

Here, Sureśvara introduces Bhartṛprapañca's explanation of *vācaḥ pṛthivī* ... which he appears to find acceptable. Bhartṛprapañca's view runs up to verse 177.

तामसं कठिनं चोर्वी शरीरं वाच उच्यते ।
अग्नेः प्रकाशरूपस्य साधारत्वेन संस्थिता ॥१७१॥

This earth is called the body of Vāk; it is full of darkness and is hard and that (earth) has remained as the support of Agni which is in the form of Light. [171]

SP reports Bhartṛprapañca's comment: *vāco 'dhidaivam pṛthivī śarīram kāṭhinyād ghanatvāt tāmasam*.

The second line explains *jyotīrūpam*

अग्निस्तु सात्त्विकं रूपमाधेयत्वेन स क्षितौ ।
वर्तते तामसे रूपे दैव्येवं द्विविधा हि वाक् ॥१७२॥

And Agni is that form (of Vāk) which is full of Sattva(guṇa) and it obtains in the earth, and remains in the form of darkness as what is supported. Thus, this divine Vāk (exists in a) twofold (form). [172]

This is the purport of Bhartṛprapañca's Bhāṣya: *saiṣā dvividhena rūpeṇa pāṛthivena taijasena cāvasthitā* with reference to *ādhārā-dheyavibhāga*.

अध्यात्ममधिभूतं च वागेकैवाधिदैविकी ।
सामान्यव्यक्तिभेदेन ह्येकानेका च सोच्यते ॥१७३॥

इत्येवं केचिदिच्छन्ति तथान्यादृगपीष्यते ।
तत्रैवं सति वाग्रूपे एवंव्याख्यातरूपके ॥१७४॥

In relation to the body and to the material (or elemental) world, there is Vāk, all alone, as related to it, and that¹ is described as one and also as many with respect to the distinction of (its one) common and particular forms.² [173]
Thus think some³ and, in this way is (that Vāk) understood to be of a different nature. That being so (understood),⁴ these are the two manifestations (or forms) of that Vāk⁵ thus explained (above). [174]

¹The word *sā* refers to Agni (i.e. Vāk in this form)— SP.

²This refers to Bhartṛprapañca's Bhāṣya *adhivaivam ca sarvam agnir ekām devatām upādadaḥ ekaikaḥ kṛtsnām devatām upādatte* on *sāmānya*....

³This is the conclusion in Bhartṛprapañca's view; cf. SP: *adhyātmādhībhūtādhidaiveṣu sāmānyaviśeṣabhāvavad avasthāvad-* (NKL: *avasthāvasthāvad-*) *-bhāvena aṁśāṁśibhāvena ca tair iṣṭā vāgdevatā*.

⁴What follows explains Bhartṛprapañca's word *tatra*.

⁵That is, in its common and particular nature.

यावत्येषा च वागुक्ता तस्या इत्येवमादिना ।
अध्यात्मादिपरिच्छिन्ना या वाक्सा तावती मता ॥१७५॥

And that Vāk of whatever extent (or measure)¹ that is explained there in the words *tasyai* etc. as (what is) delimited (or marked) by its relation to body etc.² is wholly (or, all of it) understood by the word *tāvatī* as related to gods. [175]

This explains Bhartṛprapañca's Bhāṣya: *yāvaty eva vāg adhy-ātmam adhibhūtam vā tāvatī* (SP).

¹This has reference to *ekānekatva*.

²The word etc. refers to *adhibhūta*.

वागध्यात्मेऽधिभते च तावत्येषाधिदैविकी ।
तेन तेन विशेषेण देवतैव यतो भवेत् ॥१७६॥

This (Vāk) in relation to the gods is also of as much extent (or measure) as that which is in relation to the body and to the material (or elemental) world, since it becomes that god with that particular characteristic of the same. [176]

In the previous verse was stated the oneness of *ādhidaivika* Vāk with *adhyātmādhībhūta* (viz. twofold) Vāk.

This explains *kiṃ kāraṇam* in Bhartṛprapañca's comment.

एकैकत्राधिकारेऽग्निः स एव व्यवतिष्ठते ।
पृथिव्यग्निस्वरूपेण क्वचिद्वागात्मना भवेत् ॥१७७॥

In respect of each sphere, there remains (i.e. abides) the same Agni, but, at some place,¹ it remains in the form of fire on earth and, at some other, as having the nature of Vāk. [177]

This explains *tāvan ayam agniḥ* in BUB. Bhartṛprapañca is in agreement, as his remark quoted by SP shows. Thus read: *uktam hi— sa evāyam agniḥ pṛthivyātmanā vāgātmanā vaikai-kasminn adhikārasthale (= -sthāne) kārtsnyena draṣṭavyaḥ*.

¹This refers to the *adhidaivādivibhāga*.

Now follows the discussion of BU 1.5.12 up to verse 192.

यथोदितमिदं योज्यं मनःप्राणात्मनोरपि ।
दैव्यां वाचि यदुद्दिष्टं तुल्यव्याख्यानहेतुतः ॥१७८॥

This (explanation), which is (earlier) offered, in respect of divine Vāk, is to be held (or accepted) in respect of *manas* and *Prāṇa* also, on account of the similar explanations.¹ [178]

This refers to the BU passage *athaitasya manah* ... in whose

explanation Sureśvara holds both Śaṅkara and Bhartṛprapañca to have adopted the same method as in that of Vāk, i.e. while explaining the words *tasyai vācaḥ* ... and *tāvatī* ... in verses 168ff.

¹It refers to the similarity in explaining the earlier and subsequent passages. In other words, Sureśvara sees unity of purport in them. Cf. SP: *pūrvottaravākyānām* to be supplied after *tulyavyākhyānahetutaḥ*.

अध्यात्ममधिभूतं च प्रजा गीर्मनसोर्यथा ।

अधिदैवेऽपि तद्वाच्यमित्यर्थः पर आगमः ॥१७९॥

As (there has been described) the offspring (or effect) of speech (Vāk) and *manas* with respect to the body and to the material (or elemental) world, so also has it to be described with respect to the sphere of the gods— with this purpose proceeds the subsequent Śruti. [179]

This refers to *tau mithunam* ... 'jāyata. SP and NKL here clarify thus: *mana evāsyātmā vāg jāyā prāṇaḥ prajety adhyātme mana eva pitā vān mātā prāṇaḥ prajety adhibhūte ca vān-manasayoḥ prāṇasya prajātvam uktam tathādhidaive 'pi tasya prajātvam vācyam ityevamarthā śrutiḥ*.

मनसश्चन्द्रभावो हि सर्वत्र श्रूयते स्फुटः ।

तस्यादित्येन संबन्धः कस्मादत्राभिधीयते ॥१८०॥

(A question arises:) Indeed, everywhere¹ (in Upaniṣadic passages) *manas* is clearly heard to become the moon; therefore how is here stated its relation² to Āditya? [180]

In verses 180-182, Sureśvara's wording appears to be somewhat puzzling! The words *sambandha*, *saṁdhatte* and *abhisambandha* point to connection and not to origination.

The word *prasava* seems to show affinity with the verb *pracodayāt* in the well-known Gāyatrī (i.e. Savitr) Mantra. Also, cf. the usual ritual formula: *devasya tvā savituḥ prasave* ... However, *candra-*

bhāvaḥ (*sarvatra śrūyate sphuṭaḥ*)— cf. the citation in SP (quoted above)— possibly acceptable to Bhartṛprapañca would justify the word *anugrahavyapekṣā* in the following verse. The correctness of the translation is therefore doubtful.

¹This refers to BU 3.1.6: *brahmaṇārtvijā manasā candreṇa* and *Rgveda* 10.90.13 = *Vājasaneyī Saṃhitā* 31.12: *candramā manaso jātaḥ*. Cf. SP quoting thus: *uktaṃ ca sarvatra hi manasā candro bhavatīti*— possibly Bhartṛprapañca.

²This is identity of the two.

विवक्षितत्वादैक्यस्य मनोबुद्ध्योरतः श्रुतिः ।
 आदित्येनैव संधत्ते मनश्चन्द्रमसा न तु ॥१८१॥
 प्रसवाधिकृतेश्चात्र सावित्रः प्रसवस्ततः ।
 सवित्रैवाभिसंबन्धो मनसस्तेन शस्यते ॥१८२॥

(The answer is:) Since there is intended the oneness of *manas* and Buddhi, therefore does the Śruti relate *manas* only to Āditya and not to Candramas. [181]

Also since there is here the topic of origination,¹ therefore the origin (of *manas*) is from Savitr; thus there is (here) praised the close connection of *manas* only with Savitr (= Āditya).²

[182]

The question in verse 180 is answered in the light of the Bhāṣya of Bhartṛprapañca. Read SP: *manobuddhyor abhedanātmabhūtatvād iti bhartṛprapañcabhāṣyeṇa pariharati*. Read in this context: *manobuddhyor aikyaṃ vivakṣitam, tayoś ca pradhānam buddhir niścayātmavād ato buddhidevatayaiva manaḥ saṃdhatte śrutir na tu candramasā, tadabhedam abhidatte savitā buddhidevateti hi gāyatrīvidāṃ maryādeti bhāvaḥ*. The reason for so doing by the Śruti is given in verse 181. Verse 182 states another reason for the close connection of *manas* with Āditya.

¹The basis of this is the Śruti: *tataḥ prāṇo 'jāyata*.

²Read SP: (*prāṇasya manaso janmocyate*) *tac ca sarvaṃ savitr-hetukaṃ savitrpadasya sarvaprāṇiprasavaḥ tau pravṛtter atas tena-iva manasas tādātmyena saṃgatiḥ*.

अनुग्रहव्यपेक्षायां मनसश्चन्द्रमा भवेत् ।
अधिदैवं तथादित्यश्चक्षुषो देवता मता ॥१८३॥

With a help (lit. favour) in view,¹ Candramas is (lit. becomes)² (the god) of *manas* and (*tathā*) Āditya is accepted as the god of eye, with respect to the sphere of gods.³ [183]

This verse answers a query as to the purport of the Śruti passages which speak about the relation between Candramas and *manas* and also that between eye and Āditya.

The verse keeps in view the objector's question which is stated in verse 180 above. It refers to the relation between *manas* and Candramas. Possibly the questioner has in mind the sentence *brahmaṇartvijā manasā candreṇa* (BU 3.1.6)— this is quoted in the note on verse 180. Sureśvara has in mind the relation between *manas* and Candramas and also that between *cakṣus* and Āditya in BU and BUB 3.1.6 and 3.1.4 respectively. In BUB 3.1.6 has the following (which explains the first line): *tena candramasā manasāvalambanena karmaphalaṃ svargaṃ lokam prāpnoty atimucyate iti bhāvaḥ* and also *adhyātmam yajñasya yajamānasya yad idam prasiddham manaḥ so 'sau candro 'dhi-daivam*.

BU 3.1.4 runs thus (only some part is quoted): *kena yajamāno 'horātrābhyāṃ atimucyata ity adhvaryuṇartvijā cakṣuṣādityena ... tad yad idam cakṣuḥ so 'sāvādityaḥ* This implies *cakṣus* as *adhyātmā* and Āditya as *adhidaiva*.

Yet see SP: *yathāhuḥ— yatra hi manas ca buddhiś ca bhedenā vivakṣyate tatra kāmasaṃkalpādiviṣayasya manasāś candramā devatātha punar yadā kriyāprasavādiṣu vyāpriyate tadā prasava-karma vyāpnuvan manaḥ savitrdaivatam bhavatīti*. (Possibly from Bhartṛprapañca?) Possibly SP has the following to convey: *anugraha* is *upakāra* which has the nature of *prerana*. When Candramas and *manas* are not accepted as identical, such an *anugraha* is expected by *manas* and Candramas is the impelling god for *manas*. So also, Āditya is impelling god for *cakṣus*. But

this is with respect to the sphere of gods as conveyed by *adhidaiva* in the second line. It implies the non-difference between *manas* and *Buddhi*, though the latter is of principal importance. Then *buddhyadhiṣṭhātrdevatā* is identified with *manas* and that further implies: the *ādityātmaka manas* is connected with *agnyātmaka vāk*. Possibly SP has the following to convey: *anugraha* is *upakāra* which has the nature of *prerāṇa*. When Candramas and *manas* are not accepted as identical, such an *anugraha* is expected by *manas* and Candramas is the impelling god for *manas*. So also, Āditya is impelling god for *cakṣus*. But this is with respect to the sphere of gods as conveyed by *adhidaiva* in the second line. It implies the non-difference between *manas* and *Buddhi*, though the latter is of principal importance. Then *buddhyadhiṣṭhātrdevatā* is identified with *manas* and that further implies: the *ādityātmaka manas* is connected with *agnyātmaka vāk*. Our translation and notes thereon show difference from SP.

¹Refer to BU 3.1.6. The note above has a reference to *vyavahārabhūmi*, i.e. ritual and therefore the sacrificer wins the favour of Candramas.

²The word *adhidaiva* in the last part of the quotation above is the basis for this. Also, *bhavet* is for *bhavati*.

³This argument is like that in note 1 above and clarifies the relation between *cakṣus* and Āditya.

From verse 184 onwards will be offered another explanation of tau mithunam ... which was explained in verses 179ff. It will be shown that Prāṇa originates from Agni and Āditya which are Vāk and manas in the sphere of gods.

अग्निरेव यतः सर्वप्रकाशो जगतीष्यते ।

रूपाणां प्रविभागश्च त्वष्टृपाकनिबन्धनः ॥१८४॥

Since only Agni is accepted (lit. desired) in this world as the illuminator¹ of all (creation) (and) the distinction of (various) forms (i.e. manifestations) is also dependent (only) on illumination (lit. heating) by Tvaṣṭṛ² (i.e. Savitr or Āditya),

(therefore all creation originated from Āditya).

[184]

¹Agni, here the terrestrial fire or the Sun, illuminates (i.e. is the light on) the various objects in the world. This means: it is the originator of those objects— this is in relation to the material (or elemental) world. Read *Praśnopaniṣad* 1.5: *athāditya udayan ... yat sarvam prakāśayati*, also *Jaiminiyopaniṣad* 1.34.8: *imām ekām pṛthivīm vasta eka ity agnir ha sah*.

²God Tvaṣṭṛ called as Savitṛ or Āditya is the illuminator (or originator) of all manifest forms— this is in relation to the world of gods. This is understood from *Maitrāyaṇyupaniṣad* 6.15: *dve vāva brahmaṇo rūpe kālāś cākālāś ca ... atha ya ādityādyah sa kālāḥ sakalāḥ ... kālāḥ pacati bhūtāni*.

तयोर्गीर्मनसोरेवं प्रकाशप्रसवात्मनोः ।

प्राग्यथोक्तात्मनोर्योगात्प्राणोऽभूदन्तरिक्षगः ॥१८५॥

[This is the meaning of *tataḥ prāṇo 'jāyata*.]

Thus it is from those two, viz. Vāk and *manas*, who are of the nature of light and origination (and) whose nature has been described before, that there originated Prāṇa who moves about in the sky.¹

[185]

¹This refers to god Āditya— thus distinguished from the earthly fire or the Sun.

प्राणोऽभवद्यथाध्यात्मे प्रजा वाक्स्वान्तयोस्तथा ।

प्राणस्यैवाधिदैवेऽपि प्रसवोऽयमिहोच्यते ॥१८६॥

As Prāṇa became the offspring of Vāk and *manas*, in relation to what is abiding in a body; so also, in the sphere of the gods, this¹ is the birth (or origination) of Prāṇa.

[186]

¹That is, owing to the union of Vāk and *manas*. This is the conclusion of the thought which continued from verse 179 above.

नान्नत्रयं व्यपेक्ष्येह जन्म प्राणस्य कथ्यते ।
किंतु पाङ्क्तक्रियापेक्षं प्राणजन्माभिधीयते ॥१८७॥

Here (i.e. in this sentence that is explained), the origin (lit. birth) of Prāṇa is not stated, in view of the three foods; but this origin of Prāṇa is stated in view the performance of Pāṅktakarman (=ritual activity). [187]

This explains how *tataḥ prāṇo 'jāyata* is not a repetition of *mano vācam prāṇam* in BU 1.5.3 earlier.

स यथाध्यात्मिके देहे प्राणस्तद्वत्प्रजापतेः ।
अन्तरिक्षगतः प्राणः स एष परमेश्वरः ॥१८८॥

As, in relation to the body,¹ Prāṇa (was born) from Prajāpati, so also was it born (from the divine Vāk and *manas*, in the sphere of gods).² That Prāṇa, which abides in the mid-region is this overlord. [188]

¹This stands for *adhibhūta* 'elemental world' also.

²Translation is based on SP.

यतोऽसपत्नस्तेनायमिन्द्र इत्यभिधीयते ।
ननु वाङ्मनसे स्तोऽस्य तत्कुतोऽस्यासपत्नता ॥१८९॥

As this one is without any opponent,¹ therefore it is called Indra.² Here (one might ask:) But there are Vāk and *manas* (beside Prāṇa); how then can it be without any opponent? [189]

¹This refers to Parameśvara in verse 188 above. The intended meaning is: one without a second.

²Vāyu, i.e. Indra, who is thus mentioned, is the overlord of the gods.

नैवं वाङ्मनसे यस्मात्प्राणवृत्त्यैव जीवतः ।
यदनेनान्नमत्तीति तस्मादेत इतीरणात् ॥१९०॥

(The answer is:) This cannot be so, since Vāk and *manas* continue to be (lit. are) alive owing only to the function of Prāṇa— (this is said) on the authority of the statements *yad anenānnam atti* and *tasmād etc.*¹ [190]

¹Read: *yad annenānnam atti tenaitās tṛpyanti* (BU 1.3.18) and *tasmād etc etenākhyāyante prāṇāḥ* (BU 1.5.21).

प्राणस्यैव यतो वृत्ति उक्ते वाङ्मनसे अपि ।
प्राणस्यातोऽद्वितीयत्वं ततश्चेन्द्रत्वमेव च ॥१९१॥

Since it is said that Vāk and *manas* also are the modifications of Prāṇa itself, therefore Prāṇa has singular nature¹ and has, as a consequence, the nature of the moon. [191]

¹It is literally, being one without a second.

न सपत्नो भवत्यस्य योऽसपत्नं विवेद हि ।
असपत्नमुपासीनः ससपत्नः कुतो भवेत् ॥१९२॥

He, who knows (this one) as having no opponent, does not have any opponent. How can one have an opponent (for oneself), who (lit. when he) is devoted to that who has no opponent. [192]

This is an Arthavāda *nāsyā sapatno bhavati*.

Now, follows the discussion of BU 1.5.13 up to verse 202.

उक्ता पाङ्क्तानुरोधेन वाङ्मनःप्राणसंश्रया ।
अन्नत्रयविभागेन प्रक्रिया त्वधुनोच्यते ॥१९३॥

So far has been explained (the result) related to Vāk, *manas*

and Prāṇa, in accordance with the Pāṅkta(karman). Now is explained the result (of their worship)¹ in accordance with the division of the three foods. [193]

What now follows is for explaining away the apparent contradiction involved in first accepting Vāk and *manas* to have originated from Prāṇa and as its subordinates and later in accepting them as its equal— cf. *te ete sarva eva samāḥ*. The earlier explanation referred to *pāṅkta karman* which implied the *guṇapradhāna* relation of Prāṇa and *vāṇmanase*. Now, the same relation is not accepted. There is equal status of them all, in connection with Upāsanā.

¹The word *prakriyā* means *phalam* 'result'; cf. SP: *tatphalasya pāṅktatvaṃ vaktum*. NKL agrees. Also, see verse 203 below.

अध्यात्ममधिभूतं च तथा चैवाधिदैवतम् ।
उक्ता वागादयः सर्वे समा एवेति गृह्यताम् ॥१९४॥

Vāk etc. are explained in relation to the body and the material (or elemental) world and also in relation to the world of the gods (as subordinate to Prāṇa); (but) let it be accepted that all (the three) of them are just equal (in status). [194]

This is the explanation of *ta ete sarva eva samāḥ*.

साम्यं केन प्रकारेणेत्यनन्ता इत्यतोऽवदत् ॥१९५॥

(In answer to the question:) 'In what way is there equality (among them)?', the Śruti has stated *anantāḥ* [195]

नन्वध्यात्मेऽधिभूते च परिच्छिन्नाः पुरोदिताः ।
वागादयस्त्वह कथमनन्ता इत्युदीरणम् ॥१९६॥
नैतदेवं यतोऽनन्ताः सर्वे भावा यथोदिताः ।
वाचा सर्वाधिदैविक्या लोकादेरप्यनन्तता ॥१९७॥

(On this, one would ask a question:) But it was (earlier) stated

that, in relation to the body and to the material (or elemental) world, Vāk etc. are delimited; how then is there the statement that they are *ananta* 'endless'? [196]

(The answer is:) This is not so, since all those things (lit. becomings) that were enumerated are endless; the regions etc.¹ also have endlessness thanks to the Vāk² being related to the entire world of gods. [197]

This objection is based on the contradiction involved between the earlier and later statements. It is explained away in the following verse. The answer is given: The endlessness of Vāk etc. follows from their being related to gods.

This is one reason for saying Vāk etc. are infinite.

¹Cf. SP: *bhurādilokānām tadantasthadevādinām ca* for the explanation of the word etc.

²The word *vācā* implies *manasā prāṇena ca*.

अधिकारपरिच्छेदे सर्वं यस्मात्समाप्यते ।
नासंहतायाः कर्तृत्वं देवतायाः स्वतोऽपरैः ॥१९८॥
स्वाधिकारविनिष्पत्तौ देवता देवतागणम् ।
सर्वमेवात्मसात्कृत्वा तत्तत्कार्यं करोति हि ॥१९९॥

Since all¹ is put together² (by one) in the accomplishing of some function (or activity);³ (and) there is no agency on the part of the divinity which is not contained (or delimited) by itself or by others;⁴ [198]
for,⁵ in accomplishing its own function (or activity),⁶ (every) god gets united with⁷ the entire group of gods and (only) then it can produce every effect.⁸ [199]

¹This stands for *vāgādi*.

²That is, put within limits.

³*adhikārapariccheda* = *vyāpāranirvṛttiḥ* (SP), (*-niṣpattiḥ* NKL); cf. *svādhikāraviniṣpatti* in the next verse.

⁴The divinity is all, viz. Vāk, *manas* and *Prāṇa*, together; this togetherness is not effected by anyone else. As a result, it is

capable of producing effects which are infinite in number. The next verse clarifies this thought.

⁵This is because of *hi*. This is according to SP which cites a line (possibly from the Bhāṣya of Bhartṛprapañca, cf. the note by the editor of NKL). It appears that Bhartṛprapañca has based his explanation of the relevant Upaniṣadic passage on Madhu Brāhmaṇa (NKL). Read: *yathāhuḥ— yat pṛthivyā ānanyam devatāyās tad ekaikasminn ādhyātimika ādhībhautike cādhikāra-paricchede parisamāpyata iti*.

⁶Alternatively, while producing its own effects.

⁷It literally means: containing the entire group of gods within itself.

⁸Or, each of the various effects.

आभतसंप्लवस्थानमानन्त्यं चेह गृह्यते ।
कर्मकार्यस्य हि सतो मुख्यानन्त्यं न युक्तिमत् ॥२००॥

And, in this (sentence), endlessness¹ is understood as the existence of the entire ensemble (of these gods) up to the (absolute) merger of (all) beings.² But (one might observe:) Indeed, endlessness in its principal sense cannot stand to reason,³ when it is an effect of (some) function. [200]

¹Cf. note in the NKL edition: *deśataḥ kālataḥ vastutaś ca paricchedaśūnyatvam* (unlimitedness).

²Cf. *ā saṃsārāt sthitaḥ* in BUBV 1.6.40.

³That is to say: it is not reasonable since it involves opposition to Śruti statements regarding the perishable nature of whatever is born (or produced).

एवं सतीह योऽनन्तानुपास्ते सततोद्यतः ।
सोऽनन्तमेव वागादिलोकमाप्नोति मानवः ॥२०१॥

This being so, (a person) who, ever agile, worships the endless (Vāk etc.) obtains in this (worship)¹ the region of Vāk etc. which is only endless. [201]

This explains *sa yo haitān*

Here is understood the endlessness of the region of Vāk etc.

¹*vāgādyupāsanā* which is *adhikṛtā*. The words 'ever agile ... (worship)' refer to *aparicchinnatva* of *deśa-kāla-vastu*.

उपास्तेऽन्तवतो यस्तु सोऽन्तवन्तमवाप्नुते ।
लोकं यतस्ततोऽनन्तमेत्यनन्तात्मभावनात् ॥२०२॥

But he, who worships (Vāk etc.) which have an end (or a limit), obtains only that region which has an end (or limit). (Therefore the Śruti means:) A man will attain to the infinite world, by being devoted to (or meditating on) (Vāk etc.) as endless. [202]

SP clarifies this thus: *aparicchinne 'nnatraye sūtrātmany ātmatā-dhyānād iti yāvat*.

Now follows the discussion of BU 1.5.14 up to verse 216.

अधिकारो द्वयोरत्र प्रकृतः पाङ्क्तकर्मणः ।
प्रक्रियान्नत्रयस्यापि विभागः प्रकृतस्तथा ॥२०३॥

So far (*atra*) is discussed the sphere of the two.¹ (Now), there is introduced (in this section) the division of the results and of the three foods in relation to the Pāṅktakarman. [203]

¹Namely, Upāsanā and its result.

तत्राधिदैवमुक्तानि त्रीण्यन्नानि विभागशः ।
सोपासनानि पाङ्क्तस्य वक्तव्यमवशिष्यते ॥२०४॥

In that context have been stated the three foods, in relation to the sphere of the gods as in distinct divisions,¹ together with the worship of the same. There now remains to be stated (the result of those three) in relation to Pāṅkta(karman). [204]

¹It means: as *dhyāna* (or *Upāsanā*) and its result (in the case of each).

अधिदैवे त्रयं तूक्तं मनोवाक्प्राणलक्षणम् ।
पाङ्क्तस्य कर्मणः कार्यं नोक्तं वित्तं च कर्म च ॥२०५॥

In relation to the sphere of the god has been already stated the triad (of foods), characterized as *manas*, *Vāk* and *Prāṇa*; but the result of the *Pāṅktakarman*, viz. wealth (*vitta*) and performance (*karman*), has not been stated. [205]

manas, *Vāk* and *Prāṇa* have been stated as *mātā*, *pitā* and *prajā*. But *vitta* and *karman* were not stated, i.e. the character of the *Pāṅktakarman* had not been stated in its fullness.

पाङ्क्तस्य कर्मणः कार्यं न तावदवगम्यते ।
पाङ्क्तत्वसिद्धये यावन्नोच्येते वित्तकर्मणी ॥२०६॥

Indeed, the result of the *Pāṅktakarman* cannot be understood so long as the *vitta* and *karman* of it are not stated for establishing its character as *Pāṅkta*. [206]

The subsequent section describes the *Pāṅkta* character of the result by describing *vitta* etc.

लोककालात्मको देवो विराट्संज्ञः प्रजापतिः ।
तस्याधिलोकमात्मोक्तो योऽयमन्नत्रयात्मकः ॥२०७॥

Prajāpati, (otherwise) called as *Virāj*, is the god having the nature of the region(s) (*loka*) and time (*kāla*). His nature in relation to the regions has been (already) described, i.e. as of the nature of the three foods. [207]

अधिकालं तु योऽस्यात्मा सोऽयं चन्द्रमसोच्यते ।
पक्षमासर्तुवर्षादेः स कर्ता कर्मणोऽनिशम् ॥२०८॥

But (or, And) that which is his nature as related to time is here conveyed by (the word) *candramas*; he is incessantly (lit. day and night) the agent of the *karman* (result), viz. of a fortnight, a month, a season, a year etc. [208]

This explains why Prajāpati is called Kāla. The second line expresses the *karman*, i.e. the result of its activity.

हानिवृद्धिस्वभावेन वित्तं चाप्यत्र लक्ष्यते ।
कलाकाष्ठालवाद्यात्मा विश्वं विपरिणामयन् ।
प्राणपिण्डात्मकः काल आ महाप्रलयात्स्थितः ॥२०९॥

Also, in this context,¹ *vitta* 'wealth' is understood (lit. characterized) by its nature of gradual waning and waxing. This Kāla, having the nature of Prāṇa and body² and having the nature of *kalā*, *kāṣṭhā*, *lava* etc.,³ has remained up to the absolute merger, modifying⁴ all (the world). [209]

¹That is, in relation to Candramas.

²That is, being Sūtrātman and Virāj.

³This means division of time. In this respect, NKL states the following: *lavādilakṣaṇam anyatroktam; nalinīdalasaṃhatyām sūkṣmasūchyabhivedhane, dale dale tu yaḥ kālaḥ sa kālo lavavācakaḥ* (1) *lavaiḥ truṭiḥ syāt trimśadbhiḥ kalām tāvattruṭim viduḥ, kāṣṭhā tāvatkalā jāṇeyā tāvatkāṣṭhā nimeṣakaḥ* (2).

⁴In other words, effecting changes. In BUB it was stated: *jagadvipariṇāmayitṛtvam karma*— this needed to be explained. Therefore this is stated, i.e. continued existence and modifying the world.

यैकावशिष्यतै तस्य कला पक्षक्षये तथा ।
प्रविश्य प्राणभृत्सर्वं पक्षतो जायते पुनः ॥ २१०॥

That small part (or digit) of it (viz. *kalā*), which remains even when a full fortnight¹ has passed— this one, bearing *prāṇa*

'life', enters into all and (gradually) waxes (lit. becomes born again and again) in the second fortnight.² [210]

¹This stands for the dark fortnight of a month.

²This refers to the bright half of the month. The variant reading given in AnSS edition and mentioned by SP is *pakṣatau*; it sounds better as it is in apposition to *pakṣakṣaye* in the first line. Both are terms of Locative. For this, SP's explanation is useful. Read: *strī pakṣatiḥ pakṣamūlam iti hi paṭhanti, jāyate dvitīyakalāyukto bhavatīti yāvat*.

रात्रौ यस्मात्स एतस्यां प्रविश्यास्ते प्रजापतिः ।
प्राणभृन्निखिलं तस्माद्विंशं तस्यां परित्यजेत् ॥२११॥

Since Prajāpati, bearing all life within,¹ (first) enters into this night² and remains (i.e. continues to be there); therefore one (i.e. the sacrificer) should abandon (all) killing in that (night).³

[211]

This explains *tasmād enam*

¹This, under the lead of the preceding verse. Yet, in accordance with SP on verse 213 below, it may be possible to take this phrase as a qualifier of 'one' (i.e. the sacrificer). However, this explanation by SP does not appear to be right.

²Namely, *amāvasyā*.

³The word 'night' stands for both day and night. There is here reference to the ritual performance on the new moon day.

कलाभिरस्तः कृत्ताभिः कृकलास इति स्मृतः ।
हिंसां न कुर्यात्तस्यापि किंन्वनारब्धहिंसनम् ॥२१२॥

(Prajāpati) who is given up (lit. discarded) by the digits which are cut off, (one by one) is known as *kṛkalāsa*¹ 'a chameleon'. One should not (therefore) kill (or, cause injury to) even 'that'. What then to say about such killing as has not been undertaken (lit. is not begun)?

[212]

This is the meaning of *api kṛkalāsasya*; *yaugikārtha* as NKL puts it.

¹This stands for 'a chameleon' which is supposed to be an evil animal. Cf. NKL: *kṛkalāśaśabdasya prāṇiviśeṣe rūḍhim āśrityāha*. Read BUB: *kṛkalāśo hi pāpatmā svabhāvenaiva hiṃsyate prāṇibhir dṛṣṭo 'py amaṅgalaḥ* (on BU 1.5.14, at the end).

सामिप्रमापितस्यापि रात्रौ तस्यां विवर्जयेत् ।
प्राणभृद्धिसनं यत्नात्किन्वनारब्धपीडनम् ॥२१३॥

On that night,¹ one should give up with care even what is half killed.² What to say then about causing harm to any live animal which has yet to be undertaken? [213]

¹It stands for the new moon day.

²Namely, the killing of what still bears life. This in view of *sāmipramāpitasya = ardhahiṃsitasya* (NKL) which justifies the word *yatnāt*; *yatna* is correctly explained by SP as *hiṃsānimitte saty api tannivṛttiḥ*. We have taken *prāṇabhṛddhiṃsanam* as one word and as the object of the verb. However, SP connects *prāṇabhṛt* with the agent of *vivarjayet*. Note by the editor of NKL also points out: *prāṇabhṛd iti bhinnam padam karṭṛvācakam*.

कृकलासे प्रसिद्धा या हिंसा प्राणभृतां स्वतः ।
तामप्यत्र न कुर्वीत किमु वक्तव्यमन्यतः ॥२१४॥

The killing of a chameleon is only naturally known among those who bear life (i.e. men)¹— (but) one should not undertake even that at this time (*atra = amāvasyā*). What to say then about some other (killing)? [214]

¹Here, Sureśvara uses the word *prāṇabhṛt* in a different sense.

एतस्या एव पजायै देवताया निषेधनम् ।
प्राणभृद्धिसनस्यैह नान्यदस्य प्रयोजनम् ॥२१५॥

(This) prohibition points to the worship of this very god (viz. Prajāpati).¹ There is not any other purpose here (in this mention) of the killing of what bears life.² [215]

Killing of beings has been prohibited by the well-known dictum *na himsyāt sarvā bhūtāni* [... *maitrāyaṇagataścaret* (*Mahābhārata* 3.203.45; 12.269.5; 12.316.18), or ... *nāṇṛtaṃ vā vadetkavacit* (*Kūrma Purāṇa* 553.7(2.16); *Padma Purāṇa* 1.55.1; *Saura Purāṇa* 18.1)]. Therefore there can be the question as to why there should be this specific prohibition. This question is answered in this verse.

¹See verse 212 above.

²This justifies our acceptance of *prāṇabhṛddhimśanam* as one word in verse 213 above.

स्मृतावपि निषिद्धेयं हिंसा पर्वसु कर्मिणाम् ।
विशिष्टफलसंगत्या इहोक्तिः सत्यवद्ववेत् ॥२१६॥

In the *Smṛti*¹ also, this (or such) killing during the *parvans* has been prohibited for the ritualists. The statement (of it) here would be like truth on account of connection of the ritual(s) with specific result(s).² [216]

¹Read: *vanaspatigate some yas tu himsyād vanaspatīn, ghorāyām bhrūṇahatyāyām yujyate natra saṁśayaḥ* (1) and *vīrudho ghātayed yas tu vīrutsamsthe niśākare, patraṃ vā pātayed ekam brahmahatyām sa vindate* (2); quoted by both SP and NKL. Quotations not traced. Yet cp. the first line of the second verse with *chinattī vīrudho yas tu ... niśākare* in *Viṣṇu Purāṇa* 2.12.10.

²SP points out in this context the Mīmāṃsā method: *vidhir vā saṃyogāntarāt* and remarks: *satyavacanaviśeṣeṇa vihitam api kratvartham viśeṣeṇa vidhīyate tathāviśeṣeṇa niśiddhāpi himsā-māvāsyāyām viśeṣeṇa niśiddhyate pāpakṣayādiviśiṣṭaphalasiddhyartham iti*.

Now follows the discussion of BU 1.5.15 up to verse 220.

केवलज्ञानमात्रेण मा भूत् त्र्यन्नात्मकं फलम् ।
परात्मज्ञानवत्तस्मात्तस्योपासनमुच्यते ॥२१७॥

Lest it might mean that the fruit in the form of the triad of foods would result from merely knowing (about the food),¹ even as from the knowledge of the highest (Ātman),² therefore the worship³ of that (viz. the three foods) is now stated here.

[217]

This explains the purport of the following Śruti *yo vai samvatsarah*

¹The *kevalajñāna* does not refer to *kevalātmajñāna*. *kevala* means 'only' or 'merely' and *jñāna* means *annatrayasvarūpajñāna* and which precludes any ritual performance.

²This is *vyatirekadṛṣṭānta* 'contrary example'.

³By worship one should not understand meditation on Prajāpati. Here we refer to being 'attached to or in pursuit of' (the three foods). This is by being devoted to the same.

वित्तमेव कला मे स्युः कल्पयित्वा ध्रुवां स्वयम् ।
इत्युपासीत यः सोऽथ कलात्मानं प्रपद्यते ॥२१८॥

He, who, (having the thought)¹ 'May the digits (of Prajāpati) be my wealth',² and considering himself³ to be the (sixteenth) permanent digit, would worship (or be devoted to) Prajāpati, will attain the nature of the (sixteenth) digit.

[218]

This explains the purpose of *tasya vittam eva*.

¹*kalpayitvā* connects itself with *vittam* ... *syuḥ* and with *dhruvām svayam* in keeping with *dehalīdīpanyāya*.

²Cf. SP and NKL: *svavitte pañcadaśakalādrṣṭim kṛtvā*.

³This refers to the individual self of the worshipper.

यथोक्तगुणकं विद्वानुपासीत प्रजापतिम् ।

आरोप्यात्मशरीरेऽस्मिंस्तत्साधर्म्येण संततम् ॥२१९॥

A knower should ever worship Prajāpati, whose qualities have been stated, after superimposing him (=Prajāpati) on this his own¹ body with the notion of similar properties. [219]

The nature of worship in verse 218 is further clarified.

¹ *ātman* in *ātmaśarīra* is a reflexive pronoun, meaning (*sva*-).

वित्तमेव कलास्तस्य तद्वान्युपचयौ क्रिया ।
ध्रुवास्य देह एवायं जीवन्स्यात्षोडशी कला ॥२२०॥

His (i.e. the worshipper's) own wealth itself is the digits of him (viz. Prajāpati), the decrease and increase of the same are (Prajāpati's) activity,¹ and his own living body is this one's (viz. Prajāpati's) sixteenth digit. [220]

The idea of the similarity mentioned in the preceding verse is clarified in this verse.

¹ That is, his modifying the various forms in the world.

Now follows the discussion of BU 1.5.16 up to verse 261.

सोऽकामयत जायेति साधनान्येव नः श्रुतिः ।
अब्रवीन्न तु तत्साध्यं तदुक्त्यर्थं परा श्रुतिः ॥२२१॥

[A view may be held thus: In the earlier part of the Upaniṣad the result has been already declared, viz. a sacrificer's becoming Prajāpati, therefore the Śruti *atha trayo vāva lokāḥ* ... would become meaningless. Therefore in order to refute that view there follow verses 221-224.]

In the words *so 'kāmayata jāyā* ... (BU 1.4.17), the Śruti declared to us only the means, but it did not declare what is to be achieved thereby. (Therefore) the subsequent Śruti (proceeds) to state the same. [221]

This points out the purposefulness of the subsequent Śruti.

साधनोक्त्यैव तत्साध्यं यदि नामावसीयते ।
विशिष्टफलसंबन्धो न तथापि प्रतीयते ॥२२२॥

If (it is held that) indeed what is to be achieved can be understood by a mere statement about the means, even then their connection with any specific result is not understood.¹

[222]

¹There is a statement of mere *sādharmya*, but the result is not stated in the usual words *idam asya phalam* For this reason the subsequent Śruti is to be added.

पुत्रादिसाधनानां स्यादुत्पत्त्यादिसमन्वयात् ।
साध्यं लोकत्रयमतस्त्रयो वावेति च श्रुतिः ॥२२३॥

(One would say:) The three worlds¹ could be (achieved) by the means, viz. a son etc.,² on account of their invariable relation to origination etc.³ Therefore the Śruti proceeds (to state) *trayo vāva*

[223]

¹Sureśvara hints at liberation which also could be achieved by these means.

²The word etc. refers to *jāyā*, *vitta* and *karman*.

³The word etc. refers to *sthiti*, *pralaya*.

त्रय एव यतो लोकाः साध्याः पुत्रादिसाधनैः ।
तन्मुमुक्षुरतो मुक्त्यै त्यजेत्सर्वैषणा यतिः ॥२२४॥

[Here, Sureśvara introduces in the second line the view of an objector to the view of Bhartṛprapañca.]

Only these three worlds would be achieved by the means, namely the son etc.; therefore one who is desirous of liberation,

(i.e. one who is going to be) a mendicant, should give up all hankerings in order to achieve liberation. [224]

अन्यथैवाभिसंबन्धं केचिदत्र प्रचक्षते ।
ज्ञानादेव पुमर्थाप्तिर्निष्फले सुतकर्मणी ॥२२५॥

In this respect,¹ some² explain the connection (of *trayo vāva* ... with the preceding portion) in quite a different way.³ (But the objector's view is:) Since the end of human life⁴ can be achieved by mere worship of the three foods (lit. by knowledge of it);⁵ therefore (having) a son etc. and doing the performance of rituals are futile. [225]

¹That is, with reference to the words *trayo vāva*

²Bhartṛprapañca.

³Bhartṛprapañca has first anticipated an objector's view which Sureśvara states in verses 225cd and 226. Then he states Bhartṛprapañca's own view in verse 227ab. After that, he states the objector's view in full from verse 227cd up to verse 232c.

⁴This is becoming Prajāpati that has the nature of the three foods.

⁵*jñāna* is here (*annatraya*-)*upāsana*.

निःशेषफलसंप्राप्तेर्दर्शनादेव केवलात् ।
सुतादिना न तर्ह्यर्थो नापि स्यात्पाङ्क्तकर्मणा ॥२२६॥

Since by mere understanding (lit. seeing)¹ that there results the acquisition of complete fruit, there would not be any use of (having) a son etc.² and so also by (the performance of) any Pāṅktakarman. [226]

The view of the objector is further clarified in this verse.

¹This is *jñāna* mentioned in verse 225.

²The word etc. refers to wife and others mentioned earlier; cf. BU 1.4.1840: *ātmajāyāprajāvittavidyāḥ*.

तयोरिहार्थवत्त्वाय त्रयो वावेति भण्यते ।
परीक्ष्यैतत्परिग्राह्यं न तु निर्युक्तिकं बुधैः ॥२२७॥

(But the view of Bhartṛprapañca is:) The statement *trayo vāva* is made with a view to (justifying) the meaningfulness of the two.¹ the objector's answer to Bhartṛprapañca is:) This (idea of combination) can be accepted by the wise only after (properly) examining (the utility of the same) and (*tu*) not when it is without any reason. [227]

The first line restates (in brief) the view of Bhartṛprapañca and from the second line begins its refutation which continues up to verse 232c.

¹Namely, having a son and performing the ritual in combination with the knowledge (about rituals) and their results.

स्वफलेऽन्यानपेक्षाणां साधनानां समुच्चयः ।
न युक्तो निरपेक्षत्वाद्गमनेक्षणयोरिव ॥२२८॥

It is not proper to posit a combination of such means as are, in regard to their own results, independent (i.e. not expectant) of any others, in the same way as (the combination of the activities of) going and seeing are independent (of each other). [228]

SP points out that a blind man and a lame man do not combine, if they do not expect help of each other.

अन्यापेक्षाणि चेद्बुधैः कर्मैकत्वं तदा भवेत् ।
समुच्चित्तिर्न चैकस्य रुद्रेणापि समर्थ्यते ॥२२९॥

If (the means), depending on other(s) would produce unity of action, then there could be combination. No (such combination) would be justified by even Rudra.¹ [229]

The idea of verse 228 above is further clarified here.

¹The exact significance of the mention of Rudra cannot be guessed. Is it perhaps to signify the most mighty and capable god, the one who can achieve what is impossible.

तन्तुवीरणमृद्धारुसाधनानां पृथक्त्वतः ।
पटादिकार्यनिष्पत्तौ न तेषां स्यात्समुच्चयः ॥२३०॥

Since threads, straws, clay and (pieces of) wood are such means as have a distinction from one another,¹ there could not be a combination of them for producing such an effect as (one) piece of cloth etc.² [230]

¹That is, they are wholly unrelated to one another.

²The word etc. stands for a pitcher or a hut and others.

तुरीवेमशलाकादेः स्वकार्येऽन्योन्यसंहतेः ।
समुच्चितिरयुक्तेयं तदाप्येकत्वहेतुतः ॥२३१॥

To posit the combination of wem and woof and a wooden pin of the spindle etc. in producing their effect (or product) by combining together¹ would be unreasonable for the reason that they have oneness as the means. . [231]

The last quarter should have been *tadāpyaikatvahetutaḥ*. (?)

¹A combination does not effect oneness; the things mentioned here together form just one means towards producing a piece of cloth.

लोकत्रयस्य संप्राप्तिर्विद्ययैवेति चेन्मतम् ।
तस्याः सर्वाप्तिहेतुत्वान्नैतदेवं पृथक्त्वतः ॥२३२॥

If it is held that there results the aquisition of the three worlds only through the knowledge,¹ since it is the cause of obtaining all results; (Bhartṛprapañca says:) That is not so. They, viz. the means, are distinct from one another.² [232]

¹The word 'knowledge' refers to *annatrayasvarūpajñāna*. NKL reads: *samuccayāyogāc ca*.

²Bhartṛprapañca's refutation of the objector's view begins here. SP adds here: *uktam hi— vidyayaiva sarvabhāvāpattyā lokatrayāptir iti na prthakkāraṇatvād iti*; possibly this is from Bhartṛprapañca's Bhāṣya.

प्रत्येकं भिन्नसाध्यं हि पुत्रकर्मादिसाधनम् ।
एकाकिन्या न तत्साध्यं विद्ययैवेति निश्चयिः ॥२३३॥

Since (*hi*) each means, viz. a son, ritual activity etc. has a different purpose, only through knowledge cannot be achieved (all) that ¹— this is the decision. [233]

¹That is, the purposes of all of the means, or rather *sarvāpti*.

पुत्रेणैवेत्यतो वक्ति साधनान्तरनिहुतिम् ।
ज्योतिषेत्यत्र संचोद्य परिहारं प्रचक्षते ॥२३४॥

(Here, the objector states:) In (the words) *putreṇaiva*,¹ the Śruti affirms the denial (lit. concealment) of any other means (to the winning of the world of men) and (also) raising an objection (to this) in (the words) *jyotiṣemam*, they state the solution (of the same) thus: [234]

Thus, Bhartṛprapañca's objector points out that the emphasis (on *putreṇa*) by *eva* cannot be accepted in view of *jyotiṣemam* which is contrary to what is stated with emphasis on *eva*. The solution to these two apparently contradictory Śrutis is stated by them (who agree with him).

प्राप्त्यतिक्रमसंभित्तेर्विषयप्रविभागतः ॥२३५॥
नैतदेवं यतो नेह पुत्रोत्पत्त्यतिरेकतः ।
साधनान्तरजय्योऽयं लोकोऽतश्चोदितं न सत् ॥२३६॥

This is so, since there is distinction (*sambhitti*) made between

winning and conquering (*prāpti* and *atikrama*); that is, there is division of the results (obtained by the two).¹ [235]

(Bhartṛprapañca replies:) This is not so, for it is not (stated) here² that this world has to be conquered by another means' which is distinct (or apart) from one's begetting a son. Therefore (what is called) objection is not valid. [236]

Verse 236 explains what SP calls *avadhāraṇasādhaka*, viz. *na hi putrotpādanād anyena manuṣyalokajayo 'sti*; (SP and NKL seem to take these words as of Bhartṛprapañca's Bhāṣya). This sets aside the idea of objection in *jyotiṣemam*.

¹*prāptya* ... and *viṣayaprabhāgataḥ* stand in apposition.

²Namely, in this passage *so 'yam manuṣyalokaḥ*

ज्योतिष्टोमेन संप्राप्तिर्भोगायैव तु तत्कुतः ।
सुतेनातिक्रमोऽप्राप्तेः प्राप्तो निर्विषयस्ततः ॥२३७॥

Through (the performance of) a Jyotiṣṭoma, there is the winning of the world only for enjoyment, how then can there be the transcending (of it) by (begetting) a son? Since that (viz. winning etc.) has not followed (having a son) would have no scope.¹ [237]

Thus Bhartṛprapañca clarifies his idea.

¹This would involve the fault 'meaninglessness of the Śruti'. This suggests the wrong in the objector's view.

यद्येवं तर्हि संत्याज्यं ज्योतिषेति वचः श्रुतम् ।
मैवं मनुष्यलोकस्य यतस्तत्राप्तिरिष्यते ॥२३८॥
प्राप्तस्य ज्योतिषा तस्य पुत्रेणातिक्रमो जयः ।

(Yet an objection is raised:) If this is so, then the statement heard in the Śruti viz. *jyotiṣā* ... is to be given up. (Bhartṛprapañca answers:) Do not say so, since there is accepted in the sentence the winning of the world of men.

[238]

(There, in that context) winning means the conquering of what is obtained through a Jyotiṣṭoma sacrifice by means of (begetting) a son. [239ab]

This explains the BUB *kim idānīm tat pratiṣedhyate*. The objector's argument is based on one and the same meaning of the words *jaya* and *atikrama* in the two sentences *putreṇaiva ... jayyaḥ* and *jyotiṣemam ... jayati*. Also, this would mean: Like the word *gau*, the word *jaya* also has more meanings than one. This should, according to him, render the latter statement redundant.

This is explained in the next verse.

Yet read SP: *tatra* (i.e. in *jyotiṣṭomena* ...) *manuṣyalokaprāptir jayo 'bhipreta iha* (i.e. in *putreṇaiva* ...) *tu tato vyāvṛttir iti viśeṣa iti (bhartṛprapañca)bhāṣyenottaram*.

इति निर्युक्तिकं कैश्चिद्व्याख्यानं यत्नतः कृतम् ॥२३९॥

Thus, an explanation is given by some,¹ with (great effort). [239cd]

This is now Sureśvara's reply; here begins his refutation of Bhartṛprapañca's view regarding *putreṇaivāyaṃ loko jayyaḥ*.

¹That is, Bhartṛprapañca.

जय्य एव सुतेनायं लोक इत्यवधार्यते ।
ज्योतिषापि स चेज्जेयो जीयतां न निषिध्यते ॥२४०॥
नरलोकः सुतेनायं जय्य एवेति गण्यते ।
एवेत्ययोगावच्छिन्नौ नान्ययोगव्यपेक्षया ॥२४१॥

[Now follows a detailed treatment of Bhartṛprapañca's view.]

It is emphasised that this world (of men) has to be conquered (only) through (begetting) a son.¹ (And) if that is to be won even through (the performance of) a Jyotiṣṭoma (sacrifice), let it be won; that is not declined (by us).² [240]

It is stated (in the Śruti) that this world of men is indeed to be conquered through (begetting) a son. (In this sentence, the emphasis on ... the particle) *eva* is for excluding connection of (any) other (means) with it. [241]

The purport of the argument is: The supposed opposition between *prāpti* and *atikrama* (cf. verses 234-235 above) is not warranted. If more means can help the winning, there is nothing unwelcome.

¹In *putreṇaiva*, the emphasis is on that no other means can ever conquer the world, i.e. the performance of Jyotiṣṭoma would help in only attaining it and not in conquering it. Read NKL: *avadhāraṇena anyayogavyavacchedārthena virodhāt jyotiṣo na tat-phalatvam*.

²Here Sureśvara uses the word *jeya* beside the word *jayya*. The first indicates the utility of Jyotiṣṭoma in winning the world, whereas the second emphasises one's conquering (lit. transcending) it. The performance of Jyotiṣṭoma can be useful thus in addition to begetting a son. There is no objection to the help derived by its performance.

अतिक्रमो जयार्थश्चेत्सामर्थ्यादेव सिद्धितः ।

पितृलोकाद्यसंप्राप्तेस्तत्रातिक्रमगीर्वृथा ॥२४२॥

(It may be held:) the word *jaya* has the meaning of *atikrama* for the reason that the accomplishment (of the desired result) follows from the *sāmarthyā* 'capacity (of the word) for conveying that ¹ meaning'. (But this is obviated by the answer: No, that cannot be accepted) since, in that case, there would not be acquisition of the world of the manes (as well) and this would render the (Śruti's) use of the word *atikrama* meaningless.² [242]

This is a reply to the argument in *prāptasya jyotiṣā* ... (verse 239) above.

¹One might understand the word to convey the sense of enjoyment of the world and (also the) consequent conquering

of it as well— this, through the (peculiar) capacity of word— and, as such, there follows the acquisition of the end (*jaya*). Therefore *putreṇaiva* is redundant.

²The answer is: The argument of the objector would apply to the acquisition of the world of the manes as well and then the Śruti statements *karmanā pitṛlokaḥ* and *vidyayā devalokaḥ* would demand the use of the word *atikrama* in the proposed sense and that is undesirable, or opposed to the meaningfulness of the Śruti.

नापुत्रस्येति निःशेषलोकास्तौ साधनं सुतः ।
श्रूयते मन्दपालादि तथा चात्र निदर्शनम् ॥२४३॥

In the Śruti statement *nāputrasya ...*¹ is heard that (begetting) a son is the means towards securing all the worlds; (and), in that context, there are illustrations seen (in the stories of) Mandapāla² and others. [243]

¹Cf. *Aitareya Brāhmaṇa* 7.13.12: *nāputrasya loko 'stīti tat sarve paśavo viduḥ, tasmāt te mātṛāpi mithunībhavanti*.

²SP quotes three verses from the *Mahābhārata* and NKL other two verses. Cf. *Mahābhārata* 12.220.7ff.; yet read verse 12 in particular: *tad apākriyate sarvaṃ yajñena tapasā sutaiḥ, tapasvī yajñakṛd vāpi na tu te vidyate prajā*. To explain *ādi* after *mandapāla*, NKL refers to another person called Citraketu and SP to Pāṇḍu.

श्रुतं साध्यं समुल्लङ्घ्य नातोऽन्यत्कामजं फलम् ।
प्रत्यग्विविदिषान्यत्र कर्मणां श्रूयते फलम् ॥२४४॥

Therefore (one should not think of) a result which arises from one's desire, after setting aside what is heard (in the Śruti) as (the one) to be achieved.¹ The desire to know the one within (*pratyak*) is heard to be the result elsewhere and not (in the context of) rituals.² [244]

¹This line seeks to reject an objector's view that 'begetting a son can be considered as useful for attaining to all the worlds as well', the reason for rejection being 'this view is not heard in the Śruti'.

²This sets aside another view of the objector: 'As the Siddhāntin gives up *svargādi* which is described in the scriptures as what is to be achieved and accepts the desire to know sentiency within to be the result, so should he discard the notion of merely attaining the worlds and then accept the winning (*atikrama*) of the same. These situations are similar in respect of the two faults *śrutahāni* and *aśrutakalpanā*.' The Siddhāntin's answer is that the two faults suggested by the objector with respect to *putreṇaiva* etc. refer to one portion of the Śruti, viz. ritualistic. As against this, the Siddhāntin gives up what is said in one section and accepts what is taught in another; there do not therefore occur the two faults.

किञ्च भुक्त्वाथवाभुक्त्वा ज्योतिष्टोमफलं नरः ।
अतिक्रामेदिमं लोकं नोभयत्रापि युज्यते ॥२४५॥

And what is more, a man may or may not have enjoyed the result of (the performance of a) Jyotiṣṭoma sacrifice, but he might yet win this world.¹ But, in the context of both, (the statement:) '(Through begetting a son) one wins this world' does not get (properly) construed.² [245]

This states another reason as to why the word *jayya* cannot have the sense of *atikrama*.

¹This expresses a possible view that the word *jayya* does not mean *atikrama*.

²This is explained in the following two/three verses.

भुक्त्वातिलङ्घनं तावद्विनापि सुतजन्मना ।
निःशेषकर्मकार्याणां भोगेनैव समाप्तिः ॥२४६॥

Even when there is not the birth of a son, there can be

transcending of the world after enjoying (the result of Jyotiṣṭoma), since all the effects (i.e. results) of all the activities are completely consumed after their enjoyment. [246]

This refers to the first alternative suggested, viz. *bhuktvā*.

परब्रह्मात्मविज्ञानजन्मनापि हि कर्मणाम् ।
नाभुक्त्वा फलमाप्नोति निर्वृतिं परमां नरः ॥२४७॥

Even by the rise of the specific knowledge about the highest Brahman, i.e. the Ātman, a man cannot obtain the highest delight, unless he has experienced (lit. enjoyed) the results of the ritual activities (which he has performed earlier). [247]

This refers to the second alternative, viz. *abhuktvā*. The argument is: The knowledge about the highest Brahman does not (or cannot) destroy one's activity that is already performed—and naturally the results of that activity also—since the activity and its result(s) get exhausted only through the enjoyment of the latter. For this, see the statement of the Śruti: *kṣīyante cāśya karmaṇī* (cf. *Muṇḍakopaniṣad* 2.2.9). This holds good in the next Adhyāya of the Upaniṣad, (*cāturthika*, as SP describes it). Note also the oft-quoted line *prārabdhakarmaṇām bhogād eva kṣayah*. And this argument is in conformity with Bhartṛprapañca's theory of the combination of knowledge and ritual activity.

नैरर्थक्यप्रसक्तिश्च ज्योतिष्टोमादिकर्मणः ।
न चेद्भुक्तं फलं तस्य तदभावेऽपि चात्ययः ॥२४८॥

And (therefore) there is the contingency, viz. futility of the ritual activities¹ (such as) the performance of a Jyotiṣṭoma,² if the result of it (viz. the worlds) is not enjoyed. In the absence of that³ also, (there follows the contingency, viz.) transgression (of the Śruti). [248]

¹This is *jātāv ekavacanam*.

²The word 'and' in the beginning shows how this is an additional argument against the first alternative which would appear acceptable. But against this, it can be pointed out: This alternative would invite the fault of considering the Śruti *jyotiṣemam* ... meaningless and therefore unauthoritative.

³The argument in the last part of the verse is very cryptic; it has two parts: (a) *tadabhāve 'pi=jyotiṣtomaphalābhāve 'pi* 'even if it were held that the Jyotiṣtoma does not produce any result'; this entails the view that there need not be any consideration of the result of the *nitya* 'obligatory' performance of the Jyotiṣtoma. (b) It would mean 'transcending of the world is possible, even if a son were not begotten,' and that would be transgression of (i.e. opposition to) the Śruti: *putreṇaiva* ... Transgression consists in yet another way: the result of the performance of the Jyotiṣtoma gets exhausted through the enjoyment of the world and as such the inutility of the Jyotiṣtoma remains in this case also.

चन्द्रलोकादिसंप्राप्तिः श्रूयते कर्मणः फलम् ।

पुण्यलोका भवन्तीति तथा च श्रुतिः स्फुटम् ॥२४९॥

It is heard that the result of ritual (activity)¹ is the attainment of the region of the moon² etc. So also, (it is) clearly (heard in the Śruti) that (the performers of rituals) will be (the dwellers) of the holy worlds.³ [249]

This affirms that even *nitya karmans* must bear results (refer to (b) in note 3 above).

¹Cf. *karmanā pitṛlokaḥ* (BU 1.5.16) which sets aside the possible argument that ritual activity might not produce a result.

²Cf. BU 6.2.16; also *Gītā* 8.25.

³See the clear Śruti *sarva ete puṇyalokā bhavanti* (CU 2.23.1).

सुतजन्मादिभिश्चेत्स्यात्सर्वकर्मफलात्ययः ।

परब्रह्मैकविज्ञानं निष्फलं वः प्रसज्यते ॥२५०॥

If there can be transcending of the results of all the rituals through the birth of a son etc.,¹ then, in your view, a contingency would follow, viz. the specific knowledge (about the nature) of the highest Brahman would be fruitless. [250]

This is yet another argument against Bhartṛprapañca.

¹The word etc. stands for *jyotiṣtomādikarman* and *sarva-karmaphala* for the *atikrama* of the worlds of men, manes and gods.

अनुच्छित्तिश्च भोगेन स्पष्टं श्रुतिवचः श्रुतम् ।
धिया धियेति वाक्येन भोगादेव क्रियोत्थितेः ॥२५१॥

There is a clear statement of the Śruti heard, viz. that there is no cutting off (of the worldly bondage) through enjoyment; for, by the sentence *dhyā dhyā* ... (there is already stated) the beginning (or undertaking) of rituals for (securing) enjoyments.¹ [251]

The argument is: Enjoyment of one result creates a longing for some other object of enjoyment which, in turn, gives rise to yet another ritual activity.

Here ends Sureśvara's refutation of the view of Bhartṛprapañca.

¹This is against the argument: Enjoyment of the results would render the birth of a son inutile.

Now follows the exposition of na karmanā pitṛlokao vidyayā devalokah.

कर्मणा पितृलोकाप्तिर्नाश्रुतेरन्यसाधना ।
कर्मैवोपास्तिरूपं यत्तद्विद्येत्यत्र भण्यते ॥२५२॥
देवलोकाप्तिर्बन्धाद्देवताविषयैव सा ।
विद्या न तु निरस्तान्यप्रत्यङ्मात्रैकगोचरा ॥२५३॥

The attainment of the world of the manes is effected through ritual activity; it is not dependent on any other means, since

there is no hearing of that (in the Śruti). What is here called Vidyā is but ritual activity that has the nature of meditation (*upāsti*). [252]

That Vidyā has for its object only gods, since it is related to attaining the world of the gods; but it is not that which is within a body (*pratyak*) and has completely set aside every other (object). [253]

This means that *vidyā* in this context does not mean *brahmavidyā*.

मनुते यन्न मनसा मनो येन मतं सदा ।
तदेव विद्धि ब्रह्मेति न त्विदं यदुपासते ॥२५४॥

Know only that as the Brahman, namely that which one does not ponder over in one's mind, that through which, the mind is ever known (or understood); and not that which they worship (or meditate on). [254]

This is the paraphrase of *Kenopaniṣad* 1.6. This is given here for setting aside the notion of any *Upāsanā/Dhyāna*; for that would involve opposition to Śruti.

उपासिक्रियया व्याप्तिरब्रह्मत्वस्य लक्षणम् ।
इति श्रुत्यैव निर्दिष्टं नोपास्यं ब्रह्म तेन नः ॥२५५॥

It is declared by the Śruti itself that the attainment (of something) through the activity of meditation is but a characteristic of what is non-Brahman; therefore the Brahman cannot be for us an object of meditation. [255]

This is confirming the *Kāthopaniṣad* passage paraphrased in the preceding verse.

विद्यया देवलोकाप्तिः श्रुतत्वादेव कारणात् ।
नैवकाराभिसंबन्धादेवेत्यत्र न संगतिः ॥२५६॥

[In verses 252-255, Sureśvara seems to explain Bhartṛprapañca's Bhāṣya: *karmaṇā agnihotrādinā kevalena pitṛloko jetavyo na putreṇa nāpi vidyayā tayā devaloko na putreṇa nāpi karmaṇā* with reference to *karmaṇā pitṛlokaḥ* and *vidyayā devalokaḥ*. Here the relevant portion of BUB is: ... *yathā ca putreṇa jetavyas tathottaratra vakṣyāmo nānyena karmaṇā vidyayā veti vākyaśeṣaḥ karmaṇāgnihotrādilakṣaṇena kevalena pitṛloko jetavyo na putreṇa nāpi karmaṇā*. But it seems that Sureśvara does not feel happy with BUB because Śaṅkara appears to insert *eva* after both *vidyayā* and *karmaṇā* and then explain the two sentences. Therefore (perhaps) with dissatisfaction, Sureśvara discusses the *durukta* in BUB; cf. SP and NKL.]

That there is attainment of the world of gods through Vidyā (is accepted) only because it has been so heard; not because of the connection (of the word *vidyā*) with (the word) *eva*. Indeed, in this context, *eva* does not construe well (with the words *vidyayā* etc.¹ [256]

¹Sureśvara has in mind verse 279; cf. SP and NKL.

Now follows the exposition of devaloko vai lokānām

भयःफला यतो विद्या पूर्वाभ्यां तेन सादराः ।
विद्यामेव प्रशंसन्ति न तथा पुत्रकर्मणी ॥२५७॥

Since in comparison with the former two (viz. begetting a son and performing an activity) Vidyā has greater fruit (to yield), therefore they (viz. the seers), full of respect for it, praise only Vidyā, not so (begetting) a son and (performing) an activity. [257]

लोकानां श्रेष्ठ इति च न चेदासिर्विवक्षिता ।
सर्वलोकेष्विदं वाक्यमत्यये दुर्घटं भवेत् ॥२५८॥

If it were not intended in the statement *lokānām śreṣṭhaḥ* that there is attainment (of *loka* etc.), then this statement would be, for all the people, difficult to understand well in (relation to the world) *atyaya*. [258]

The purport is to refute the view that: the words *lokānām śreṣṭhaḥ* are in praise of the world of gods. But that would not be correctly understandable, if the notion of *atyaya* as equivalent of *jaya* is borne in mind.

अत्ययश्चेदभिप्रेतः पुत्रोत्पत्त्यादिभिस्त्रिभिः ।
अपास्तर्णोऽथ स कथं कर्मस्वेष नियुज्यते ॥२५९॥

If 'winning' is understood to result from (lit. to be effected by) the three,¹ viz. those beginning with begetting a son, how then would a man, who has paid off his three debts,² be enjoined to perform rituals?³ [259]

¹If begetting a son etc. were understood to effect the winning of the worlds, that would mean loss of body (both gross and subtle bodies), non-performance of sacrifices, and consequently non-paying of the well-known three debts (which ought to be paid by an individual). Where was the need for him to perform rituals then?

²That is, *pitṛ-ṛṇa*, *ṛṣi-ṛṇa*, *deva-ṛṇa*. This is understood from a quotation Kullūka's commentary on *Manusmṛti* 3.36 (Nirṇayasagar Press, 1946) = *Taittirīya Saṃhitā* 6.3.10.5: *jāyamāno vai brāhmaṇas tribhir ṛṇair ṛṇavā jāyate yajñena devebhyaḥ prajayā pitṛbhyaḥ svādhyāyena ṛṣibhyaḥ*. Also cf. note 2 on BUBV 2.4 (see our book [Vol.1:1982] p.89).

³Cf. *saṃkrāmītmabhāvo 'pi nāgnihotram parityajet* (quotation in SP untraced).

ऋणानि त्रीण्यपाकृत्य मनो मोक्षे निवेशयेत् ।
इति पूर्वाश्रमे वासो ध्वस्तर्णस्य निषिध्यते ॥२६०॥
यथानपाकृतर्णस्य मोक्षेच्छा वार्यते तथा ।

अनधीत्य द्विजो वेदानित्यादिवचनान्मनोः ॥२६१॥

As in the case of one who has paid off the (three) debts, there is denied (or prohibited) the acceptance of the former order of life¹ in (Manu's) words 'Having paid off the three debts, one should fix one's mind on liberation', [260] so also is prohibited one's desire for liberation in the case of one who has not paid off the (three) debts as expressed in the words of Manu *anadhītya dvijaḥ*² [261]

This has a basis in *Manusmṛti* 6.37 and goes against what is said in the preceding verse. The fault in Bhartṛprapañca's argument is its being opposed to the teaching of Manu.

Here ends the refutation of Bhartṛprapañca's view which demanded attention.

¹Namely, the state of a householder.

²*Manusmṛti* 2.168: *yo 'nadhītya dvijo vedān anyatra kurute śramam, sa jīvann eva sūdratvam āśu gacchati sāvayaḥ*. Also see note 2 on verse 259 above.

Now follows the discussion of BU 1.5.17 up to verse 327.

इष्ट्वेति च तथा क्त्वान्तश्रवणात्पूर्वकालता ।
नीत्वा समाप्तिं कर्माणि फलवन्त्यफलानि च ॥२६२॥
शुद्धधीः प्रव्रजेत्पश्चाद्विरक्तः कर्मणां फलात् ।
इत्यनुक्रमसंन्यासे संप्रतिरूपदिश्यते ॥२६३॥

[Here and in the following verses (up to verse 273) there is a discussion on matters (or doubts/queries) related to renunciation (liberation).]

So also, since there is heard the form *iṣṭvā*, which ends in the suffix *ktvā*,¹ there is (understood the time of the ritual which is to be performed) before (seeking liberation)— that is to say, having completed the performance of rituals, be they fruitful or otherwise, [262]

a man with purified intellect should renounce and later become averse to the results of rituals; thus, there is prescribed the rite of Sampratti 'entrusting (the ritual duties) to the son'² at the time of renouncing (worldly life) in the due order of one's religious duties.³ [263]

¹This is based on the word *iṣtvā* in *Manusmṛti* 6.36: *adhitya vidhivad vedān putrān utpādya dharmataḥ, iṣtvā ca śaktito yajñair mano mokṣe niveśayet*.

²Otherwise called as *sampradāna*, in *Kauṣītakyupaniṣad* 2.15.

³For details of this, see SP.

योऽनुक्रमेणेति तथा श्रुतौ स्पष्टमिदं वचः ॥२६४॥

अननुक्रमसंन्यासे न संप्रतिक्रियेष्ट्यते ।

पुत्रे सत्येव सा यस्मान्नास्त्यसौ ब्रह्मचारिणः ॥२६५॥

In this respect (*tathā*), there is a clear statement in the Śruti *yo 'nukramena*¹ [264]

But (or, And) the rite of Sampratti is not desired (i.e. accepted) when there is no renunciation in the due order of one's religious duties, for that (rite of Sampratti) is possible only when a son was born to one. (Therefore) that (rite) is not (possible) in the case of a celibate. [265]

¹SP reports it to be a passage from the *Kāthaka Śruti* (mentioned by some as *Kāthaśrutyupaniṣad*) whereas NKL reports it as from the *Kauṣītaki* and Sureśvara also refers to *Kauṣītaki* in verse 309 below. Yet what is quoted in both SP and NKL does not agree with the passage in the *Kauṣītakyupaniṣad*. However, cf. *Kāthaśrutyupaniṣad* (and also *Samnyāsopaniṣad*) 1.1.

यद्यपुत्र इति वचः संभवे सति युक्तिमत् ।

निरस्तदारसंबन्धे न तु स्याद्ब्रह्मचारिणि ॥२६६॥

The words 'if one does not have a son'¹ would be reasonable, if there is the possibility (of one's renouncing). But, in the

case of a celibate who has (already) kept from (lit. discarded) the relation to a wife, it would not be (reasonable). [266]

This argument proceeds from someone's query about the purpose of the sentence *yady aputraḥ* ... in relation to renunciation. Sureśvara points out that it also refers only to a householder, thus confirming what is said in the preceding verse.

¹SP reports the complete sentence: *yady aputro bhavaty ātmānam eva sarvaṁ dhyātvānapekṣamāṇaḥ prācīm udīcīm vā diśam pravrajat*; NKL reports it as from the *Kauṣītakyupaniṣad*, but it is not there.

ब्रह्मचर्यादेवेत्यादिवाक्यानि शतशः श्रुतौ ।
श्रूयन्ते तु ऋणवचो विरोधात्स्यादपस्मृतिः ॥२६७॥

Sentences such as *brahmacaryād eva* ... are heard in the Śruti many (lit. hundreds of) times and (*tu*) the statement regarding the debts would be a wrong Smṛti,¹ on account of its opposition (to the teaching of the Śruti). [267]

This is an answer to the doubt: 'Renunciation is prescribed only for a householder, may or may not he have a son; as for the celibate, he cannot renounce.' But that cannot be taken as authoritative, for the Śruti has at several places prescribed renunciation even for a celibate. Refer to *Jābālopaniṣad* 4 which prescribes renunciation even from the student's stage. Therefore the Smṛti's import regarding the debt to be repaid by a celibate, which is directly opposed to the Śruti, is unauthoritative. As indicated by SP, read in this context SV 436cd and 437ab: *pratyakṣavedāvacanaprāmāṇyādyāśrayatvataḥ, ādau saṁnyāsasam-siddher ṛnānīti hy apsamṛtiḥ*.

tu ṛnavaco is an instance of absence of Saṁdhi.

¹*apasmṛtiḥ* could be wrong Smṛti, i.e. it is authoritative. Translation holds *apasmṛtiḥ* as a complement of *ṛnavacaḥ*.

वेदाहमितिमन्त्रोक्तेस्तमेवेत्यवधारणात् ।

निषेधान्नान्य इत्युक्तेर्न मुक्तिः सुतजन्मतः ॥२६८॥

There cannot be liberation obtained through the birth of a son (for the following reasons: viz.) because there is a statement in the Mantra *vedāham* ...¹ (in the beginning), because there is an emphatic statement in (the words) *tam eva* ...² (later) and also because there is a (clear) denial of it (understood) from the statement *nānyaḥ*³ [268]

This is for clearing away the notion that renunciation is not necessary for achieving liberation, since it can be obtained by merely begetting a son. But renunciation is a means towards (*brahma-jñāna*).

¹ *vedāham etam puruṣam* (*Taittirīya Āraṇyaka* 3.12.8.)

² *tam evam vidvān amṛta iha bhavati* (*Ibid*). And also, *tam eva viditvātimṛtyum eti* (*Ibid*).

³ *nānyaḥ panthā vidyate 'yanāya* (*Ibid*).

न तत्र दक्षिणा यन्ति विद्ययैव तदाप्यते ।

इति न्याय्यं श्रुतेर्वाक्यं कस्मान्नाद्रियतेऽञ्जसा ॥२६९॥

Why then not accept regardfully the statement from the Śruti which follows reason, viz. *na tatra dakṣiṇā yanti*¹ and *vidyayaiva tad āpyate*?² [269]

Here is stressed the insignificance of rituals and the effectiveness of Jñāna.

¹ Cf. *Śatapatha Brāhmaṇa* 10.5.4.16.

² Citation not traced.

संन्यासमेवोपक्रम्य संप्रतिः श्रूयते श्रुतौ ।

यथान्यत्र तथेहापि कस्मान्नाभ्युपगम्यते ॥२७०॥

(One would ask:) As there is heard elsewhere¹ in the Śruti (the statement regarding the rite of) Sampratti, in the words beginning with *saṃnyāsam eva*, why is it not, in the same

way, accepted here¹ also?²

[270]

This argument is based on what is known as *sarvavedānta-pratyaya* 'unity of thought in the Upaniṣads'.

¹This refers to the *Kauṣītakyupaniṣad*, cf. note 2 on verse 263 above.

²The questioner has in mind one who is about to die and therefore perform the rite of Sampratti. He means: that rite should not be understood as ancillary merely to renunciation.

सर्वकर्मनिवृत्तिर्हि जीवतोऽत्र विधीयते ।
 एकमेव व्रतमिति संन्यासिन्येव युक्तिमत् ॥२७१॥
 लब्धत्र्यन्नात्मकफलो भावनाज्ञानकर्मभिः ।
 संन्यस्ताशेषकर्मा सन्बोध्यतेऽजातशत्रुणा ॥२७२॥

(This is not so) because, here (i.e. in BU 1.5.23), cessation from all performances (of duties) is prescribed in the case of one who is alive (and) statement *ekam eva vratam* is reasonable only in the case of one who has renounced. [271]
 (For example, Gārgya) who had obtained the result which was in the nature of the acquisition of the three foods by means of his devotion, knowledge and performances and had given up all religious performances was enlightened by Ajātaśatru.¹ [272]

This is in answer to the question in verse 270 above.

¹This has reference to BU 2.1 which contains the dialogue between Gārgya Bālāki and Ajātaśatru.

नामरूपक्रियादेहः सर्वोऽस्मीत्यभिमानवान् ।
 अतत्त्वज्ञोऽधिकार्यत्र विद्याया उपवर्ण्यते ॥२७३॥

(For) in this context is described a person who is entitled (to undertake renunciation)— he who is possessed of a notion 'I am all this, viz. what is made up of name, form, activity and body' and is thus one not knowing the reality (in respect

of the true nature of the self).

[273]

अयं लोकश्च पुत्रेण यादृशेन च जीयते ।
तादृक्पुत्रोऽत्र वक्तव्य इत्यारब्धोत्तरा श्रुतिः ॥२७४॥

[In verses 265-273 Sureśvara had given his own idea about the connection of the sentence *athātaḥ samprattiḥ* in BU 1.5.17 to the preceding passage. Now in verses 274-278 he states that connection which is stated in BUB.]

The subsequent Śruti, viz. *athātaḥ samprattiḥ*, has therefore begun with the intention to speak of such a son as through whom this world (relevant here in this situation) (and also others)¹ can be won.

[274]

¹This is the force of *ca*; it refers to Pitrloka and Devaloka.

पुत्रकर्मापरज्ञाननृपित्रमरलोकतः ।
व्याख्यातो नियमोऽन्योन्यं फलसाधनसंगतेः ॥२७५॥

Here is explained the invariable rule regarding the mutual relation of the results and their means, viz. a son, ritual performance(s), worldly knowledge and the worlds of men, manes and gods.¹

[275]

¹The three, viz. the son, (*apara*)*jñāna* and ritual are the means and the other three, viz. the worlds, are the results.

पुत्रकर्मार्थमात्रत्वान्न पृथक्साधनान्तरम् ।
जाया मानुषवित्तं च कर्मैकार्थत्वकारणात् ॥२७६॥

And a wife is not (mentioned as) a distinct means, since she is helpful only for (begetting) a son and for (performing) ritual activity;¹ and a man's wealth also (is not so mentioned) since it is helpful merely for the (performance of) ritual activity.²

[276]

¹A wife is in these two ways indirectly related to *loka-trayaprāpti*.

²Wealth is subservient to the ritual performance(s).

स्वरूपलाभमात्रेण साधनत्वं निगच्छतः ।
कर्मज्ञाने सुतस्तस्य साधनत्वं व्रजेत्कथम् ॥२७७॥

Ritual performance(s) and knowledge about the same come to have their character as the means (to the attainment of the three worlds) only by coming into existence, how then could a son become the means (towards that)? ¹ [277]

¹SP clarifies the thought thus: *putraś tu manuṣyalokajaye na tathā* (i.e. like *Vidyā* and *karman*) *hetuḥ, dravyatvāt; na hi dravyam kriyānāviṣṭam sādhanam drṣṭam*. That is: a son is *dravya* which is useful in the performance; by himself he cannot bring about *manuṣyalokajaya*.

इत्येवमभिसंबन्धो वक्तुर्भाष्यकृतः स्फुटः ।
अस्मदुक्ताविरोधीति तेन नेहातियत्यते ॥२७८॥

This is the clear connection (of Sampratti with *lokajaya*), (as given by) the writer of the Bhāṣya. (And) since it is not opposed to what we have said, there is no special effort made (*atiyatyate*) here (to discuss it further). [278]

Mention was made in verse 256 of BUB's insertion of *eva* in the sentences *karmanā pitṛlokaḥ* and *vidyayā devalokaḥ*. That demands some discussion, since the preceding verse states the non-opposition between Sureśvara and Śaṅkara regarding the explanation of the relevant section. Verses 279-281 serve this purpose.

पुत्रश्चेदनुशिष्टः स्याल्लोकस्तेनैव जीयते ।
नान्येन कर्मणात्रार्थो नृलोकजयसिद्धये ॥२७९॥

पुत्रस्यैवावधृतय एवकारो भवेदयम् ।
पितृदेवलोकसंप्राप्तिः श्रुतेहान्यैश्च साधनैः ॥२८०॥

If a son has been instructed,¹ only then is won through him the world (of men); there is not any purpose (served here² by) any other (means, viz.) ritual performance(s) in achieving the conquest of the world of men; [279]
as such, this specification by the insertion of (the word) *eva* is only in respect of a son— and, (as for) the attainment of the worlds of the manes and the gods, it is heard (to occur) through other means.³ [280]

The idea is: A son can win for his father the *manuṣyaloka* by performing the remainder of his duties and by the enjoyment of the result of the performance (*bhoga*). But this latter is secured by the father through the performance of Jyotiṣṭoma also— not necessarily through his son.

The third quarter of verse 280 is metrically faulty— one letter more in the line and the fifth letter is long.

¹Supply: regarding the duties unperformed (or, which were yet to be performed) by the father.

²This word (*atra*) refers only to *manuṣyaloka*.

³The idea is: The winning of the world of the manes is not dependent only on the obligatory ritual performance; it can be secured through a *saṅkalpa* for it— this involves Śrutivirodha and renders the insertion of *eva* purposeless; cf. *saṅkalpād evāsyā pitarāḥ samuttiṣṭhanti* (CU 8.2.1). This implies similar inutility of *eva* in respect of the world of gods also; cf. *nāpi vidyayaiva devalokajayaḥ* (understood) *saṃnyāsād brahmaṇaḥ sthānam*, quotation not traced.

व्याख्यानमिदमेवात्र विदोषं दोषवत्परम् ।
इदमेव ततो ग्राह्यं न तु यद्दोषवन्मतम् ॥२८१॥

Only this explanation (regarding the insertion of the word *eva* which is given by me) here is faultless; the other is faulty.

Only this much is to be accepted from that (viz. BUB), but not that which is considered (by me) as faulty. [281]

अथानन्तरमेवोक्तात्कर्मोपासनचेष्टितात् ।
अतस्तत्फलनिष्पत्तेः संप्रतिः संविधीयते ॥२८२॥

[Now follows the explanation of the BU sentence *athātaḥ samprattiḥ*, after the connection of that sentence with Sureśvara's own comment and BUB has been thus stated.]

atha means now, i.e. 'immediately after this statement about the performance(s) of the ritual(s) and meditation,' as also for securing the result of that there is prescribed the ritual of Sampratti.¹ [282]

¹ *karmopāsanaceṣṭita* mentioned in the first line. Commentators add that the ritual of Sampratti is an ancillary to Kramasamnyāsa which is related to Upāsana by securing its result.

यतो मनुष्यलोकोऽयं विशिष्टसुतसाधनः ।
तस्मात्संप्रतिकर्मेह वक्तव्यं तत्फलार्थिने ॥२८३॥

Since this world of men has a specifically qualified son as its means there is to be stated the ritual of Sampratti for one who is desirous of its result. [283]

This is considered by Sureśvara as another meaning of the word *ataḥ*. The word 'therefore' conveys the sense of 'desire for a son and (through begetting him)' for the result.

विदुषैव तु कर्तव्या संप्रतिर्नाविपरिचिता ।
यतोऽतः सूत्रिता नेयं सूत्रकृद्भिरनित्यतः ॥२८४॥

Since the ritual of Sampratti has to be undertaken by a knower¹ and not by one who is not a knower; therefore it has not been stated by Sūtrakāras in their (Śrauta) Sūtras,

owing to its non-obligatory character.

[284]

¹That is, one who knows the purpose of Sampratti ritual, as only an ancillary to renunciation.

संप्रतिरिति नामैतदात्मसंस्कारकर्मणः ।
प्रतिपत्तिक्रिया वा स्यादातुरन्यासदर्शनात् ॥२८५॥

Sampratti is the name of a performance of some rite for one's own Samskāra. Or, it is ¹ an action of entrusting ² as noticed from the transferring (of his own duties) by an afflicted person.

[285]

¹*syāt = asti.*

²*pratipatti* is the meaning of *sampratti*.

प्रेष्यन्निति च कालोऽस्य कर्मणोऽत्र विधीयते ।
जातकादिपरिज्ञानाज्ज्ञातुं कालोऽपि शक्यते ॥२८६॥

And in the word *praiṣyan* is prescribed here the time (for the performance) of this rite. And time also, ¹ it is possible to know from one's knowledge of a horoscope etc. ²

[286]

¹The word 'also' implies the time of death (beside the future happenings in a man's life). Cf. SP: *sampadādijñānaṃ drṣṭāntayitum apiśabdah*.

²The word etc. stands for an omen or a dream which is indicative of the ensuing death.

मुमूर्षुश्च पिता पुत्रमथाहूयानुमन्त्रयेत् ।
त्वं ब्रह्मेत्यादिभिर्वाक्यैः सोऽपि प्रत्याह बोधितः ॥२८७॥

Now, ¹ a father, who is about to die, should first call his son (to himself) and then instruct him in the sentences such as *tvam brahma ...* ² and he (viz. the son) also, thus instructed, answers him (in the words *aham brahma ...*).

[287]

¹This is introductory 'Now' for *atha*. Or *ca* has, according to SP, the purpose of excluding any other doing.

²This is BU 1.5.17.

कर्मभ्यः प्रव्रजिष्यन्वा प्रैष्यन्नित्यभिधीयते ।
धातूपसर्गयोर्मुख्यस्तथार्थोऽप्याश्रितो भवेत् ॥२८८॥

Or, perhaps, the word *praiṣyan* is stated (in the Śruti) in the sense of '(when one is) about to renounce ritual performances'. In that way also, the principal meaning of the root and the preposition, understood (together), would be accepted (lit. be resorted to). [288]

अहं ब्रह्मेति पितरं पूर्वमेवोपशिक्षितः ।
प्रतिवक्तुं न शक्तः स्यान्न चेत्प्राविशिक्षितो भवेत् ॥२८९॥

(The son) should answer in the words *aham brahma ...* 'I am Brahman,' being already instructed.¹ (But) he would not be able to answer, if he were not instructed before. [289]

¹Supply: by the father, even long before he is about to renounce or die.

पुत्रानुमन्त्रणस्यार्थं व्याचष्टे स्वयमेव नः ।
श्रुतिस्तिरोहितार्थत्वान्मन्त्राणामित्यतोऽवदत् ॥२९०॥

The Śruti itself explained to us the meaning of what is to be instructed to the son, since the meaning of the Mantras is concealed; so has he (viz. the Bhāṣyakāra) said. [290]

In this, he intends to explain *yad vai kiṃ ca* Here, Sureśvara points out his agreement with Śaṅkara.

अनुक्तं यदधीतं स्याद्यच्चाध्येतव्यमिष्यते ।
यच्चानधीतं तस्योक्तौ ब्रह्मेत्यत्रैकता भवेत् ॥२९१॥

anūkta means what is studied¹ and also what is desired to be studied and is not studied; (therefore) in the mention of that,² there is unification in the Brahman. [291]

¹It literally means: that which is repeated (after the teacher has, in the course of his lessons, uttered).

²This refers to *anūkta*.

त्वं ब्रह्मेतीह वाक्यार्थो ह्ययमत्र विवक्षितः ।
अध्येतव्यार्थनिष्पत्तिस्त्वनिष्पत्त्या मया कृता ॥२९२॥

This¹ one is the intended meaning here,² i.e. of the sentence *tvam brahma* I have explained here what is to be studied, because it was not explained (before). [292]

This is what the father says to the son.

The second line of the verse appears somewhat difficult. Even the variant readings in the AnSS edition do not help.

¹The word 'this' means: what is stated in the preceding verse.

²The word 'here' refers to the explanatory prose sentence in BU *yad vai kiṃ ca tasya sarvasya brahmety ekatā* together with the Mantra *tvam brahma*

यावन्मत्कर्तृकं किञ्चिन्मानेन प्रतिपाद्यते ।
त्वत्कर्तृकं तदस्त्वत्र पितुरेवं विवक्षितम् ॥२९३॥

[Now follows the exposition of *ye vai ke ... yajña ity ekatā*.]

Such is the father's intended (meaning): Whatever is prescribed by the authoritative means (viz. the Śruti) as what is to be undertaken by me should now be what is to be undertaken by you. [293]

This explains the prose in BU: *ye vai ke ca yajñāḥ ... lokāḥ ity ekatā*.

लोकोक्त्यैव हि यज्ञानां तत्फलत्वाद्ग्रहे सति ।
नित्ययज्ञगृहीत्यर्थं के च यज्ञा इतीरणम् ॥२९४॥

And the statement (*ye vai*)¹ *ke ca yajñāḥ* is for understanding obligatory sacrifices, lest by the very mention of the word *loka* there is the acceptance (or understanding) of the sacrifices as having the same² as their result. [294]

¹We have supplied these words in the round brackets, for they occur in the Śruti and which, for the sake of metre, Sureśvara has omitted.

²The word *tat* is expressive of *loka* as the result.

ब्रह्मेत्यादिपदार्थोऽयमुक्तस्तावत्समासतः ।
त्वं ब्रह्मेति तु वाक्यार्थः श्रुत्येदानीं विभाव्यते ॥२९५॥

So far, the meaning of the word *brahma* etc.¹ has been explained in brief. Now² is explained by the Śruti the meaning of the (entire) statement *tvam brahma ... (loka ity ekatā)*. [295]

¹Namely, *tvam brahma*, *tvam yajñāḥ* and *tvam lokāḥ*.

²This is for introducing the exposition on *etāvad vā* as on the 'sentence'.

एतावदेव कर्तव्यं गृहिणेहाधिकारिणा ।
वेदा यज्ञाश्च लोकाश्च नातोऽन्योऽर्थोऽवशिष्यते ॥२९६॥

Only this much¹ has to be undertaken here² by a householder who is eligible for it; (this is to say:) the Vedas (are to be studied), sacrifices (are to be performed) and the worlds (are to be attained);³ there remains nothing else (to undertake).

[296]

This is the meaning of *etāvad vā idam sarvam*.

¹Namely, all this which has been enumerated.

²Namely, in respect of ritual activity.

³Supply *adhyetavyāḥ*, *yaṣṭavyāḥ* and *jetavyāḥ* after *vedāḥ* etc. respectively.

यथोक्तार्थचिकीर्षुः संस्तन्मयस्तत्क्रतुः स्वतः ।
 इतोऽधिकारबन्धान्माऽभुनजत्पालयेदिति ॥२९७॥
 चेतस्याधाय वाक्यार्थमिममाह पिता सुतम् ।
 त्वं ब्रह्मेत्यादिवाक्यानां नातोऽन्योऽर्थो विवक्षितः ॥२९८॥

Himself being desirous of performing the ritual activities as are stated (in the scriptures), being devoted to them and having the intention to perform the same and having kept in mind the thought: 'May (this son) release me, i.e. protect me, from this, the bondage of responsibility (lit. the state of being enjoined to do all that is mentioned above)', the father has conveyed to the son this meaning of the sentences, viz. *tvam brahma*¹ No other meaning is intended. [297-298]

¹Hereby is denied any other meaning of the sentences.

यत उक्तं चिकीर्षुः सन्ननुशिष्टश्च तादृशः ।
 अतो लोकहितार्थं तं पुत्रमाहुर्मनीषिणः ॥२९९॥
 अनुशिष्टो यतः पुत्रः पित्रैवैति समर्थताम् ।
 अनुशिष्टमतो लोक्यं पुत्रमाहुर्विपश्चितः ॥३००॥

The wise ones have called him a son, who is desirous of doing what is told (him by his father),¹ who is instructed in that way,² and who has therefore become helpful (to the father), (securing) for the benefit (of the acquisition) of *loka* 'the world of men'. [299]

Since the son is instructed by the father himself for his entitlement (to do what is required of him), the learned call this thus instructed son as useful for (effecting the attainment of) the world (of men). [300]

This is the meaning of the Śruti: *tasmāt putram anuśiṣṭam*

lokyam āhuḥ, tasmād enam anuśāsati.

¹This refers to his asking him to continue to undertake what he did earlier.

²That is, what he was told in the rite of Sampratti, viz. *tvam brahma tvam yajñas tvam lokas tvam sarvam*

पितरश्चात एवैनमनुशासति सत्सुतम् ।

अनुशिष्टेन पुत्रेण लौक्यः स्यामिति यत्नतः ॥३०१॥

Just for this, do the fathers¹ instruct their good sons² with the thought (lit. carefully) 'Let me be fit for (the attainment of) the world (of men) through this son who is instructed by me.' [301]

¹Namely, those who undertook their religious duties (mentioned earlier).

²*sutam* is for *sutān* (*jātāv ekavacanam*).

संक्रामितात्मभारोऽपि नाग्निहोत्रं परित्यजेत् ।

इत्येतत्कर्मरागोक्तं निष्प्रमाणं न गृह्यते ॥३०२॥

[Verses 301-312 refute the view of Bhartṛprapañca regarding continuous performance of Agnihotra till the end of one's life, even though the rite of Sampratti has been performed.]

The statement which pertains to attachment to ritual activity, viz. 'A person should not give up (the observance of) Agnihotra, even if he has transferred (or entrusted) his own responsibility (to the son)', is not accepted as one devoid of any authority. [302]

This verse states in brief the view of Bhartṛprapañca and marks the beginning of its refutation also. The words in inverted commas are the view of Bhartṛprapañca. SP cites his words: *sa eṣa samprattiṃ kṛtvā yāvaj jīvati na tāvad agnihotram utsrjet*. The word *iti* after *saṃkrāmitātma- ... parityajet* seems to show the

passage is a quotation— this is untraced.

संप्रतिलिङ्गात्संन्यासविधिरत्र विवक्षितः ।
निःशेषोपनिषन्मानमेकं ज्ञानमितीष्यते ॥३०३॥

Here is intended (to prescribe) the injunction regarding renunciation (as is clear) from its indication, viz. the ritual of Sampratti.¹ (Indeed) it is desired that knowledge has (only) one authoritative means (for it), viz. all the Upaniṣads.² [303]

¹The *Kāthaka Śruti* (cf. note 1 on verse 265 above) has prescribed it as an ancillary to renunciation.

²This refers to *sarvavedāntapratyayanyāya*. It is intended to bring out that the Upaniṣads teach the pursuit of the Brahman, the knowledge about the nature of it, and also the attainment of the same, but not the performances of rituals as understood by Bhartṛprapañca. Therefore it is to be accepted here that they prescribe only renunciation.

अयन्नात्मभावसंप्राप्तेर्जीवतैव कृतत्वतः ।
साधनानां फलान्तत्वात्संन्यासः किं निवार्यते ॥३०४॥

Why then reject (the prescription of) renunciation,¹ if one can have achieved, in one's life-time,² oneness with (lit. the nature of) the three foods³ in accordance with the rule that the means⁴ culminate in (acquiring) the results? [304]

¹Supply: immediately after the performance of the Sampratti ritual. Here there is reference to Bhartṛprapañca's view; see note under verse 302 above.

²Or, while one is continuing to live.

³This is the same as becoming (one with) Prajāpati (or Sūtra).

⁴Namely, Upāsanā.

यावज्जीवश्रुतिप्राप्तेर्न चेत्तत्याग इष्यते ।
प्रयोगावसितैर्नैवं जरिणोऽधिकृतिर्न च ॥३०५॥

प्रातर्देशावसानत्वादग्निहोत्रादिकर्मणः ।

नित्यानामपि संन्यासः कर्मणां स्यात्तदैव तु ॥३०६॥

If it is understood (lit. desired) that, since there is a Śruti regarding (the performance of rituals by one) till the end of one's life, renunciation is not to be resorted to; it is not to be so accepted, for there is (possible) the cessation of the ritual¹ and there is no eligibility of one who has grown old.²

[305]

(And) since the rituals of Agnihotra etc. conclude at the end of the duration of the morning and in specific regions, non-performance of obligatory rites³ (has to resorted to) at that very time.⁴

[306]

One more objection is understood, viz. *kurvann eveha karmāṇi* ... (Īsopaniṣad 2) is a Śruti that is opposed to renunciation. That is answered.

¹This is in the case of one who is unable to perform ritual activity in its entirety on account of weakness.

²Cf. *jīrṇo vā viramet* (quotation in NKL, not traced).

³Agnihotra etc. are obligatory rites to be performed.

⁴This suggests one's giving up of rituals when one wishes to renounce.

संक्रामितात्मभारस्य त्वं ब्रह्मेति वचोऽर्थवत् ।

तदा स्यात्सर्वकर्माणि यदि संन्यस्य तिष्ठति ॥३०७॥

If a person continues to live after having renounced all ritual activities, only then would the statement (of the Śruti) *tvam brahma* ... be meaningful in the case of him who has transferred his own responsibility to the son.

[307]

This is one more argument in favour of renunciation immediately after the performance of the Sampratti ritual.

सर्वात्मकार्यनिचयपुत्रसंक्रामितत्वतः ।

न चेत्तित्यक्षितं सर्वं प्रतिप्रसवगीर्भवेत् ॥३०८॥

If it were not intended that all (ritual performance) should be renounced after the entire mass of one's ritual activity was transferred to the son, then there would have been (in the Śruti) the prohibitive injunction (to activity). [308]

कौषीतकिश्रुतौ तद्वद्बृहस्थस्यैव जीवतः ।
संन्यासः श्रूयते स्पष्टः पुत्रैश्वर्ये सुखं वसेत् ॥३०९॥

In the same way¹ there is in the *Kauṣītaki Śruti* a clear (injunction regarding such) renunciation even while a householder is alive, (viz.) 'May he stay happily while the son is in prosperity.' [309]

In the discussion of renunciation and the ritual of Sampratti, BUBV refers to the *Kauṣītaki Śruti* by name, whereas SP has mentioned (in the same context) the *Kāthaka Śruti*, cf. SP on verses 264-265 and 303 above! Here also, SP points out the agreement between the *Kāthaka* and the Vārtika. We were unable to trace the quotation *putraiśvarye vā vaset* (though Jacob quoted in his Concordance) only *vṛddhāśraṃ vā gacchet* which is cited by SP. This seems to be *Kāthaśrutyupaniṣad* (not verified by us). But see *Manusmṛti* 6.95 for *putraiśvarye*

¹That is, to the same effect, viz. supporting what is said in the preceding verse.

संन्यस्य सर्वकर्माणि सर्वदोषानपानुदन् ।
इत्यादि मनुनाप्युक्तं तद्विरुद्धं च भण्यते ॥३१०॥

And also a statement made by Manu, viz. *saṃnyasya sarva-karmāṇi sarvadoṣān apānudan* ...¹ where there is said what is in opposition to that.² [310]

¹The NKL edition reads *apānudet* (not so in *Manusmṛti* 6.95). SP points out that Manu also accepted *kramasaṃnyāsa* as seen

from his long quotation of Manu's verses, viz. 6.92-96.

²This refers to the objection which is understood in verses 305ff.

उपास्तितफलमेवास्य पितुर्यद्वदिहोच्यते ।
प्रतिप्रसूयते कस्मान्नाग्निहोत्रादिकं तथा ॥३११॥

(We wish to ask:) As here ¹ is stated only the result of that worship ² in favour of the father, ³ why is not the ritual activity of Agnihotra etc. prohibited (in an injunction) in the same way? [311]

This reaffirms what is stated in verse 306cd above. The objector's argument is: In the sentence regarding the ritual of Sampratti, renunciation of all (ritual) activity is not intended. The answer is: As there is no prohibitive injunction in regard to Agnihotra, so it is not here also.

¹That is, in *pr̥thivyaī cainam* ... (BU 1.5.18).

²This implies that no other ritual is prescribed.

³He who has transferred his own duties to the son.

एकमेवेत्यवधृतेर्युक्तं प्राणव्रतं पितुः ।
संस्कारकत्वात्तस्यैव न तदन्यदिहेष्यते ॥३१२॥

(Also) from the specification (in the Śruti statement) by (the words) *ekam eva*, it is proper to understand (the observance of) the *prāṇavṛata* in the case of the father, ¹ since that is for effecting a Saṃskāra on him. There is nothing other than that ² to be accepted (or desired). [312]

This sets aside a possible counter-argument that *ekam eva* ... is prohibitive of *prāṇanādivyāpāra* 'the function of breathing'. The argument against that is: that function is understood to be necessary in the observance of *prāṇavṛata*.

¹Supply: who has performed the Sampratti ritual and is renouncing.

²That is, *prāṇavrata*.

म्रियते स यदैवंवित्पुत्रसंक्रामितक्रतुः ।
क्रत्वञ्जितैस्तदा प्राणैः सह पुत्रं विशत्ययम् ॥३१३॥

When such a person, who, knowing this, has transferred his thoughts¹ (about the performance of sacrifices)² to the son, dies, and then enters into his son with his *prāṇas*, which are marked (lit. annointed) by his thoughts (as said above). [313]

This explains *sa yadaivamvid*

¹That is, his resolve.

²Supply: and other duties.

प्रागात्मक्रतुसंक्रान्तेरभूद्यादृक्क्रतुः पिता ।
स तादृक्क्रतुबिम्बोऽस्य संक्रान्तः स्वसुते पितुः ॥३१४॥

Possessed of whichever thought (regarding ritual activity) be the father before the transfer of his own thought (to the son), that (thought), with a reflection similar to it, will be transferred into the son. [314]

The objector could question about the nature of the father's entry into his son, which is mentioned in the preceding verse—'Could it be similar to the entry of a serpent into a hole?' The answer is: The body of a person cannot enter into another's; there is only a metaphorical entry! It is the transfer of the thought about ritual performances. This is clarified further in the next verse.

जलार्कस्येव संक्रान्तिः स्वाभासभ्रमकारणात् ।
परोपाधिनिमित्तैव कौटस्थ्यात्प्रत्यगात्मनः ॥३१५॥

This reflection (lit. entry) is like (that of) the Sun in water on account of the error about its own appearance;¹ (that reflection) is caused by the limiting adjunct of another, owing

to the immutability of the inner self.

[315]

This clearly shows that the rite of Sampratti etc., all of them, fall in the sphere of Avidyā. The truth is that there is only the appearance of the inner self in the body of the son and so on.

In this context, SP makes some worth-noting observations: (we give them somewhat briefly though— perhaps at the cost of clarity!) At first, an objector raises the question: Does the *saṃkrānti* mean that of the *upādhi* 'delimiting adjunct', viz. the body, or alternatively that of the inner self? The first alternative is discarded, for the body of the father cannot get into that of the son. So also, the entry of the father's inner self into the son is not possible. What appears to be the case is that the father's thought regarding rituals only appears (i.e. is taken) to enter into the son much in the same way as the Sun seems to enter water. And finally, the consequence is that the inner self appears to have entered into the son! Real entry is impossible, for the reason that the inner self is immutable.

¹This is an incidental reference to the Ābhāsa theory of Sureśvara.

ऋत्वज्जितंधियो यद्वत्स्वात्मदेहस्य साक्षिता ।
तद्वत्पुत्रादिदेहेषु मोहान्नानात्मविभ्रमः ॥३१६॥

As one's own body has the ability to perceive (i.e. experience) the thoughts marked by some sacrifice, so also there (is that ability to perceive) in the bodies¹ of the son etc. The various appearances of the Ātman, (i.e. the father's inner self) are caused by ignorance.

[316]

¹This is a reference to the variously acting body of the son.

स्वाधिकारसुतावेशात्पितृवाविशतीत्यतः ।
स्वयं निरधिकारस्तु दैवप्राणोऽवतिष्ठते ॥३१७॥

Since it is that by transferring unto his son his own eligibility the father himself enters into (the son) and (*tu*),¹ as such, being (now) bereft of his own eligibility,² he himself stays in the form of the divine Prāṇa.³ [317]

This reaffirms the thought in the preceding verse.

¹Or alternatively, but.

²Supply: for performing ritual activity.

³This refers to the result of his Upāsana, viz. oneness with Prāṇa.

आध्यात्मिकेन देहेन न्यनकार्यसमाप्तये ।
पिता पुत्रेण कुर्वाण आस्तै तत्फलभुक्स्वयम् ॥३१८॥

(Thus), for accomplishing lesser activity the father stays on with a body which is (wholly) resting in (or, fixed on) the Ātman and keeps on doing the same (activity) through his son, (but) himself enjoying the result of the same. [318]

The father who has transferred to his son the eligibility for the performance of rituals continues to live, doing small activities through the son and enjoying the fruit of the same.

दैवसाधनसंपन्नः पुत्र एवावतिष्ठते ।
पिता तु तत्फलात्मैव न तु साधनरूपभृत् ॥३१९॥

Being possessed of the divine means, the father stays in the son; the father is, however, in the form of the result (of Sampratti and renunciation), but not bearing a form that is a means.¹ [319]

This is to explain away any supposed duality of bodies, viz. the body of the son and the divine body (i.e. *daiva-prāṇa-yukta* body) of the father.

¹SP offers two alternative explanations of this verse; our translation is based on the second alternative (this seems to

be adopted by NKL also). The first alternative of SP is: The father has entered into the son by having the state of one who causes the performance of the ritual activity (*kāraṇakotīniviṣṭa*) but does not stay there as the agent of the ritual activity (*sādhana-rūpa*); he has at the same time continued to be of the nature of the (known) result, viz. *Sūtra-rūpa*. This is to say: *hetuphalabhedād dvirūpaḥ*.

नाकारि कार्यं यत्पित्रा स्वाधीत्यादि प्रमादतः ।
तत्पूरणात्पितृस्त्राणात्पुत्र इत्यधिधीयते ॥३२०॥

By completing whatever of the father's study of the Veda etc.,¹ that was not done by him through some fault, and thus protecting him thereby is the son signified (by the noun) *putra*.²

[320]

¹The word etc. stands for performance of rituals.

²This is a typical Brāhmaṇic derivation in BU— viz. derivation of one noun from two verb roots *pṛ* and *tra*.

संपूर्णस्वात्मकार्योऽयं पिता दैवात्मना स्थितः ।
पितुः सामिकृतं कार्यं पूरयन्वर्तते सुतः ॥३२१॥

[Now there is the exposition of the Śruti passage *sa yady anena*]

This father,¹ who has accomplished all of his duties, now remains in the divine body² (and the son) keeps on completing the incomplete (lit. half-done) activity of the father.³ [321]

¹Namely, one who has performed the Sampratti ritual.

²Cp. *daivaprāṇaḥ* in verse 317 above.

³This is in support of the derivation of the word *putra* offered in the preceding verse.

मृतेरच्छिद्यते लोकः साधनोच्छित्तिहेतुतः ।

पितुरित्यपि नाशङ्का कार्या यस्मात्स एव तु ।
पुत्रेणैव शरीरेण कुर्वन्नास्ते नवं नवम् ॥३२२॥

Further, an objection should not be raised that, in the case of the father, the world (of men) gets lost (lit. destroyed) by his death, viz. by the cause of the destruction of the means,¹ since he himself keeps on doing the rituals, one after another,² through his body, verily the son. [322]

This explains *sa putreṇaivāsmil loke*

¹This indicates the body, *jāyā*, *putra*, *dravya* etc. which belonged to him in his life-time.

²This is a free rendering for 'whatever remained to be done' (lit. every new activity).

पुत्रेणैवेत्यतो वक्ति नित्याधिकृतिसिद्धये ।
जयतीमं पिता लोकमेवंभूतेन सूनुना ॥३२३॥

Therefore, the Śruti states (the words) *putreṇaiva*, in order that the obligatory entitlement to duty is established. (Indeed) a father wins this world through a son who has become thus (i.e. as instructed). [323]

न त्वात्मलाभमात्रेण जयः स्याज्ज्ञानकर्मवत् ।
पुत्राधिकारानुत्त्यर्थमथशब्दः प्रयुज्यते ॥३२४॥

But, the winning (of the world of men) would not result merely from the son's being born, in the same way as from knowledge and activity.¹ The word *atha*² is (now) used for setting aside the topic of the son. [324]

In verses 322-323 was explained the purport of the Śruti *sa putreṇa* The first line of this verse (i.e. 324) states the difference between a son (i.e. begetting him etc.) and *vidyā-karmanī* (i.e. *jñānakarmanī*). Now a new sentence begins with the word *atha* and starts a new topic, viz. the discussion of

the meaning of *evam* which does not refer to a son.

¹As these two, only on being produced, become instrumental in the attaining of the worlds of the manes and of the gods.

²In *athainam ete devāḥ prāṇā amṛtā āviśanti*.

कृतसंप्रत्तिकं दैवाः प्राण वागादयः समम् ।

पितरं संविशन्त्युक्ताः सदा तद्भावभावितम् ॥३२५॥

The divine Prāṇa, Vāk etc., which have been mentioned,¹ all of them, enter together into (a father) who has performed the Sampratti ritual and who has ever considered himself to become the same.² [325]

¹Supply: as *amṛtāḥ*.

²Namely, Śrauta Prāṇa.

पृथिव्यै चैनमित्यादि तद्व्याचष्टे यथा तथा ।

हेत्वर्थो वाथशब्दोऽयं यस्मात्संक्रामितक्रतुः ॥३२६॥

As the Śruti has explained that (viz. father's entering into the son) in the sentence *pr̥thivyai cainam* ..., so (is there stated) the word *atha* to convey the sense of the reason, viz. Prāṇas, since the father has transferred his own thoughts (of rituals unto the son). [326]

The preceding verse referred to the entering of Prāṇa, Vāk etc. into a father who has performed the Sampratti ritual; now in this verse is explained the nature of that entering, i.e. transference of thoughts etc.

तद्वियोगादतो दैवा आविशन्ति यथोदिताः ॥३२७॥

Therefore, at the separation from that,¹ the divine Prāṇa etc., which are already described,² enter (into the son). [327]

¹The word 'that' stands for the father's intention to perform

the ritual duties. Separation stands for transference.

²Supply: as *amṛtāḥ*.

Now follows the discussion of BU 1.5.18 up to verse 346.

श्रुतिस्था या हि वाक्स्याः पञ्चमीयं परा भवेत् ।
ततो लब्धात्मलाभायाः प्रथमा जन्महेतुतः ॥३२८॥

That Vāk¹ which has been (relevant in this discussion) in the Śruti is (now mentioned) subsequently (by the word *vāk*) in the Ablative case and (later, the same word is put) in the Nominative case signifying (that Vāk)² which has come to exist from that (earlier mentioned Vāk) since that is the source of its origin. [328]

Here is an answer to some ticklish question: The word *vāk* occurs in the sentence *pr̥thivyaī cainam agneś ca daivī vāg āviśati*— first as *pr̥thivyaī* in the Ablative (the Dative standing for the Ablative, owing to case attraction in *agneḥ*— a Vedic peculiarity) and later in the Nominative. How is one to account for the two cases?

The verse is explained by SP thus: *yā śrutidṛṣṭā prakṛtā grāhyā vāk pūrvasiddhopāśyasūtrarūpā tasyāḥ parastāt pr̥thivyā agner iti cāpādānapañcamī; ādhārādheyabhūtopāśyasūtravāgrūpād apādānāt prāptaprakṛtopāśakaphalabhūtavācaḥ parastād daivī vāg iti prathamety arthaḥ*.

The exactness of the translation is doubtful!

¹This is Sūtrarūpa Vāk which one has to worship (or meditate on).

²This is divine Vāk which is the result obtained by the worshipper.

वाचं संश्रुत्य वाक्यस्थां चिनुते भावनामयीम् ।
उपादानमतः श्रौती स्याद्वाणी भावनात्मनः ॥३२९॥

Having heard (i.e. known) the Vāk (of the nature of the

Sūtrātman) which is conveyed by the sentence (of the Śruti),¹ he adopts (that speech) which is full of devotion² (to the Sūtrātman) as the means.³ Then there will follow the (divine Vāk), mentioned in the Śruti (in the father) who has been (intensely) thinking (about Sūtrātman). [329]

This explains why it is said in the preceding verse that Vāk has come into existence.

¹This is the Vāk that is in the nature of the Sūtrātman.

²*bhāvanāmayī* refers to the devotee's (i.e. Upāsaka's) speech which is full of devotion to the Sūtrātman— it is consequently capable of bringing about a change in his nature, i.e. he becomes the Sūtrātman.

³It is that *vāṇī* which is explained in the preceding note—as a means it is naturally beneficial to the devotee, since thereby he attains the nature of the Sūtrātman. The adoption of this Vāk by the devotee means its coming into existence.

न हि वस्तु स्वतःसिद्धमन्यत्स्यास्तपरमात्मनः ।
सदेवेत्यादिकं शास्त्रं बाधितं स्यात्तथा सति ॥३३०॥

Verily, the thing, which is self-established, cannot be other than the highest Ātman. If it were there,¹ the scriptural text beginning with the words *sat eva ...* would be opposed.² [330]

This answers an objection by Bhartṛprapañca.

It is time and again mentioned in previous verses that the Sūtrātman is *svataḥsiddha* 'self-established'; therefore there is an objector's argument here. The devotee's speech, becoming one with the Sūtra-vāk, would then be *svataḥsiddha*, i.e. it has to be considered as 'unborn'!

¹This is to suggest the acceptance of the Sūtrātman as *svataḥsiddha*.

²This is then the consequence of the preceding.

धिया धियेति कार्यत्वं कृत्स्नस्य जगतः स्वयम् ।

श्रुत्यैव स्पष्टमाख्यातं नातोऽभिव्यक्तीरिष्यते ॥३३१॥

In the words *dhiyā dhiyā* it is clearly stated by the Śruti itself that the entire world is but an effect;¹ therefore the manifestation of the same² is not acceptable (lit. desired). [331]

The verse rejects a statement possibly in the Bhāṣya of Bhartṛprapañca: *bhinnaghaṭapradīpaprakāśavad abhivyaktimātram vācaḥ* as reported by NKL(note) in the comment on verse 330.

¹This means it is not *svataḥsiddha*, since, like every effect, it is produced.

²*abhivyakti* means the appearance of what has been already existing.

आर्तश्रुतेश्च प्राणादि वाचारम्भणशास्त्रतः ।

नात्मवत्स्यात्स्वतःसिद्धमुत्पत्त्यादिश्रुतेस्तथा ॥३३२॥

Prāṇa etc. cannot be self-established like the Ātman (as it is evident) from the statement regarding an *ārta* 'what is an effect/perishable', from the text about the (world as mere) activity of Vāk and also from the scriptural statement regarding their origin etc. [332]

This answers the preceding argument: Vāk etc. cannot be *svataḥsiddha*.

¹Cf. *ato 'nyad ārtam* (BU 3.4.2; 3.5.1; 3.7.23); *vācārambhaṇam vikāro nāmadheyam* (CU 6.1.4) and *etasmāj jāyate prāṇaḥ* (*Muṇḍakopaniṣad* 2.1.3).

कर्तृभिः क्रियते तस्माद्वावनाज्ञानकर्मभिः ।

अयन्नात्मकमिदं विश्वं नातोऽभिव्यक्तिरिष्यते ॥३३३॥

Therefore this world, which is of the nature of the three foods is produced by the performers (of rituals) through their devotion, knowledge and activity. Consequently, manifestation of the same is not acceptable. [333]

This gives some more reasons as to why *prāṇa* etc. are not said to be self-established.

ब्रह्मैवेदं तथात्मैव पुरुषश्चेति चागमः ।
एवं सत्यर्थवान्नः स्यादन्यथा स्यादनर्थकः ॥३३४॥

And the Vedāntic tradition (i.e. Vedāntic instruction): '(all) this is only Brahman,¹ also the Ātman² and Puruṣa³ as well' would be for us meaningful, only if this is accepted;⁴ otherwise, it would be meaningless. [334]

¹Cf. *Muṇḍakopaniṣad* 2.2.12.

²Cf. CU 7.25.2.

³Cf. *Muṇḍakopaniṣad* 2.1.4; *Śvetāśvataropaniṣad* 3.15.

⁴This refers to the non-acceptance of the manifestation, mentioned in verses 331-332.

पुत्रकर्मापरज्ञानसाधनान्यपरे जगः ।
मनुष्यलोकपित्रमरलोकेभ्यः स्युर्निवृत्तये ॥३३५॥
एवं मोक्षार्थतां तेषां पुत्रादीनां प्रचक्षते ।
लोकव्यावृत्तिमार्गेण श्रुतिस्तेषां निषेधकृत् ॥३३६॥
काम्यमेवाखिलं पाङ्क्तं कर्मेत्येवं प्रकृत्य तु ।
पुत्रादीनां स्वसाध्यार्थविनियोगोपसंहृतेः ॥३३७॥

Others have held (lit. sung): The means, viz. the son, the ritual activity and lower (lit. other)¹ knowledge, (lead to liberation);² (these are) for the attainment of the worlds of men, the manes and the gods.³ [335]

Thus they hold (lit. speak) that the son and others serve the purpose of (attaining) liberation, in such a way that the (three) worlds come to cease.⁴ (But) the Śruti decries (or censures) them, [336]

for, beginning with the remark that the entire Pāṅktakarman is but caused by desire, it has concluded with the injunction regarding the son etc. (to be used) towards the (effecting)

of the (desired result).

[337]

¹Supply: than the knowledge of the Brahman. Or, *vijñāna* 'subject-object oriented knowledge'.

²This is on the authority of the Śruti and the Smṛti regarding the removal of death— this is the view of Mīmāṃsakas.

³This is the view of Bhartṛprapañca who holds that this attainment of the worlds, when combined with the knowledge of the Ātman, would lead to liberation.

⁴This means: They are transcendent. (According to both the Mīmāṃsakas and Bhartṛprapañca.)

संसारफलतैवातः पुत्रादेर्गम्यते श्रुतेः ।
अविद्वद्विषयैवात ऋणश्रुतिरपीष्यते ॥३३८॥

Therefore it is understood from the Śruti that the son etc. have the nature of producing (only) transmigratory existence as the result. Therefore the statement regarding the debts¹ is also understood as referring to a non-knowing person.² [338]

¹Cf. verses 259 and 260 above.

²That is, the non-knower of the Ātman.

प्रजया किं करिष्याम इत्येवं च प्रवक्ष्यति ।
नातो विदितवेद्यस्य कथंचित्स्यादृणश्रुतिः ॥३३९॥

Further, (the Śruti) will state (lit. say) *prajayā kim kariṣyāmaḥ*;¹ therefore there would not ever be a statement regarding the debts in the case of one who has known what is to be known.²

[339]

¹BU 4.4.22.

²This refers to the Brahman.

व्यावृत्त्यर्थानि नैतानि पुत्रादीनि यथा तथा ।
पृथिव्यै चैनमित्याद्या स्वयं निर्वृत्ति नः श्रुतिः ॥३४०॥

The Śruti beginning with *prthivyaī cainam* itself explains to us as to how these, viz. a son etc., are not for the cessation (of the world). [340]

In verses 337-339, Sureśvara refuted the view of Mīmāṃsakas and thereby some part of Bhartṛprapañca's argument also. Now, in verses 340-346, he refutes the view of Bhartṛprapañca in other respects.

न च त्र्यन्नात्मसंप्राप्तिः कैवल्यमिति युज्यते ।
तस्या मेधातपोजत्वात्पौनःपुन्येन तच्छ्रुतेः ॥३४१॥

Also, it is not reasonable (to hold) that the acquisition of the three foods means (attaining) *kaivalya* 'uniqueness',¹ because that² is repeatedly³ heard to be (resulting) from *medhā* and *tapas*.⁴ [341]

¹That is, Brahmanhood (*brahmatva*).

²Namely, acquisition of the three foods.

³Cf. the repetition in *dhiyā dhiyā*.

⁴The reason is: what is produced cannot be permanent (and here Brahman).

तथा क्षयश्रुतेस्तस्य यद्वैतदितिवाक्यतः ।
पृथिवी शरीरमित्युक्तेः शरीरित्वं प्रजापतेः ॥३४२॥
नामरूपक्रियात्वेन मोहकार्योपसंहृतेः ॥३४३॥

In the same way, by hearing about its decrease from the Śruti sentence *yad dhaitat*¹ (and) from the statement *prthivī śarīram*,² (it follows that) Prajāpati is possessed of a body, [342]

(and also) from the concluding remark³ about the effects of ignorance which have the nature of name, form and activity. [343]

This means: the three foods which are but this world are perishable. That is becoming the three foods (Sūtrātman) is not liberation.

¹Cf. BU 1.5.2.

²Cf. BU 1.5.11.

³Cf. BU 1.6.1.

करयचिन्मुक्तयेऽलं स्यात्कस्यचित् व्यन्नवित्तये ।
सकृच्छ्रुतं वचोऽशक्तं विधातुं द्वयमञ्जसा ॥३४४॥

If a statement is understood (once) to be for effecting liberation of someone¹ (and at another time) to be for his attainment of the form of the three foods,² it is then to be pointed out that the statement heard only once cannot smoothly yield two meanings.³ [344]

This is in answer to one who might hold one and the same Śruti statement to serve (more than one, i.e.) two purposes in the same way the Sun or water serve many purposes.

¹Some hold that in the case of one who has become averse to ritual performances can, by being possessed of the nature of the three foods (the same as *sūtrātmatva*), attain liberation.

²This is in the case of one who is not averse to ritual performances. This one becomes the Sūtrātman but is not liberated.

³This is considered as the fault called Vākyabheda. In Śruti, a sentence can yield only one sense, not two. See SP's citation: *ekasya vākyasya sakṛcchṛtasya nānekārthatvam, bhidyate hi tathā vākyam*.

भूर्यथता प्रकाशादेः प्रत्यक्षादेव कारणात् ।
न त्वागमैकगम्येषु तथात्वमवसीयते ॥३४५॥

It is on account of the direct perception of light that it has (the capacity to reveal) many objects; but that sort of capacity¹ cannot be accepted (viz. understood) in respect of matters

to be known only from the Śruti.

[345]

¹Namely, *bhūryarthaprakāśatā*.

श्वेतोऽसौ धावतीत्यादेरनेकोक्तित्वकारणात् ।
अनेकार्थावसायः स्यान्न त्वेवमिह युज्यते ॥३४६॥

In the statements like *śveto 'sau dhāvati* and others, there can be understanding of more meanings than one (lit. not (only) one meaning), since (in that statement) there can be the state of expressing more meanings than one; but such a happening is not reasonably accepted here.¹ [346]

Here ends Sureśvara's refutation of Bhartṛprapañca's view.

¹This means: in the case of the Śruti.

Now follows the exposition of the sentence sa evaṃvit ... in BU 1.5.20. (Sureśvara has left out commenting on BU 1.5.19, since that kaṇḍikā does not appear to make any specifically new/additional argument.)

निःशेषभूतात्मैकः सन्नधिदैवात्मना स्थितः ।
भूतपापैरसंकीर्णो दैवं सुखमुपाश्नुते ॥३४७॥

Having become the Ātman of all beings, this one alone¹ stays in the form of the superior divine being (viz. Prajāpati) and, being unaffected² by the sorrows (lit. sins) of beings,³ he enjoys happiness. [347]

This is the purport of the sentence *sa evaṃvit sarveṣāṃ bhūtānām ātmā bhavati yathaiṣā devatāivam*.

¹Becoming one with Prajāpati means not expecting anything else, for there exists none other.

²How he is unaffected will be clarified later in verses 353-361 below. Here, *pāpa* is used in opposition to *sukha*.

³*bhūtapāpaiḥ asaṃkīrṇaḥ* explains away a doubt arising from

becoming *sarvabhūtātmā* which would bring to him the sins of all beings.

सर्वभूतात्मभूतोऽसौ सर्वानन्यत्वदर्शनः ।
जगदुत्पत्तिसंहारैः क्रीडन्निव विचेष्टते ॥३४८॥

The one, who has become the Ātman of all beings and the seer of the non-distinction of all,¹ keeps on doing (various) activities, viz. creation and destruction of the world, enjoying sport as it were. [348]

This explains the meaning of the sentence taken up for discussion.

¹Non-distinction of all from himself (who is now Prajāpati), therefore not seeing himself as different from all things in the world.

वाक्च सा सर्वभूतानां श्रोत्रं त्वग्रसनं मनः ।
घ्राणपादादयः सर्वे सर्वोपादानकारणात् ॥३४९॥

And that Vāk is the ear of all beings, the sense of touch (lit. skin), the tongue, and the *manas* (of all). All of these, viz. the sense of smell, the feet etc., (it becomes) on account of taking all of them (i.e. these of the beings) as the means (of its activity). [349]

ज्ञानं सप्रतिघं यद्वत्कार्यं वास्मासु दृश्यते ।
नैवमीशस्य सर्वत्र पूर्वोक्तादेव कारणात् ॥३५०॥

As it is noticed amongst us that knowledge or activity is with limitations, so is it never¹ (seen in the case) of the Lord (Prajāpati), for the reason already stated.² [350]

This verse points out that the worshipper of the three foods (*annatrayopāsaka*) is not only the Prāṇa of all, but is also their Vāk.

¹ *na sarvatra* 'never', or 'nowhere'.

² Because of *sarvātmatva*; cf. verse 347 above.

किंच सर्वाणि भूतानि तमवन्ति यथाबलम् ।
इममर्थं श्रुतिर्वक्ति दृष्टान्तेन प्रयत्नतः ॥३५१॥

Moreover, all beings protect¹ him (i.e. the worshipper of the three foods) according to their own strength. (And) this thought does the Śruti state with an illustration, with great care.² [351]

This is the purport of *sa yathaitaṁ devatām ... gacchati* which explains the nature of the worship.

¹ Already (under verse 167) we have noticed the use of verb root *av* in the sense of 'to protect, or to favour'; cf next verse also.

² Or, very carefully.

पूर्वजन्माभिनिर्वृतां यथैवावन्ति देवताम् ।
तथैवैवंविदं भोगैः सर्वभूतानि सर्वदा ॥३५२॥

As they (viz. the worshippers of Prāṇa etc.) protect (i.e. keep secure or, favour=serve) the divinity (viz. Vāk), which the sacrificer has secured¹ in his earlier life, so do all beings ever (protect) the knower of all this by (yielding) various enjoyments. [352]

This is the paraphrase (or explanation) of *sa yathaitāṁ*

¹ That is, (Vāk) with which he has become one; cf. SP: *pūrvasiddhadevatā* and therefore the worshipper as *tadbhāva-sākṣātkāravat*.

सर्वभूतात्मतापत्तिर्यद्येवंविद इष्यते ।
संगतिर्भौतिकैर्न स्यात्तस्य दुःखादिभिः कथम् ॥३५३॥

(An objection is raised:) If it is desired (by you) that there is for such a knower (i.e. the worshipper of Prāṇa etc.) the

attainment of the nature of all beings, then how is it that there is no connection of him with the miseries etc. experienced by (or belonging to) those beings? [353]

This verse raises a question about what is said in verse 347 above, viz. *bhūtapāpair asaṃkīrṇaḥ*.

नापरिच्छिन्नबुद्धित्वात्तस्य दुःखाद्युपप्लुतिः ।
कुक्षिस्थकिमिदुःखैर्नो न मनागपि संगतिः ॥३५४॥

[This and the following verses (up to 361) are the answer to the preceding verse.]

(The answer is:) There is no affliction by grief etc.¹ in the case of him, because he has unlimited knowledge. Also, there is not even a little connection with the miseries caused by small worms which reside in the belly.² [354]

¹The word etc. implies *sukha*.

²This is to say that the worshipper who has attained oneness with Prajāpati (or Sūtrātman), might still have worms in the belly. But they cannot affect him as in his earlier life. Cp. the oft-quoted line *prārabdhakarmanām* ... cited under verse 257 above.

अस्मदाद्यभिमानित्वे तस्यास्मद्दुःखसंगतिः ।
तस्य कृत्स्नाभिमानित्वान्नास्मन्मात्राभिमानता ॥३५५॥

There is his connection with our (common-felt) sorrows, only while he entertains ego.¹ (But) now when he comes to have the awareness of oneness of being (identical with) all (in the world), he does not entertain his identity with 'I' etc. [355]

¹The words 'entertains ego' are a brief expression for 'having the notions such as 'I', 'mine' etc.

ईश्वरत्वाच्च तस्यास्मद्दुःखैर्न स्यात्समागमः ।
अस्माकं दुःखसंप्राप्तिरनैश्वर्यकृतैव तु ॥३५६॥

On account of his being the overlord (of all), he does not have any connection with our sorrows. As against this, our experiencing sorrow is caused by not having attained the overlordship. [356]

This is to say: Despite entertaining identity with all, this one does not experience our sorrows— we feel them because we are not one with 'Íśvara' (i.e. Prajāpati or Sūtrātman).

इत्यादि हृदये कृत्वा न्यायं श्रुतिरुदाहरत् ।
यद्दुःखं किंचेति विस्पष्टं प्रजादुःखनिषेधकृत् ॥३५७॥

Keeping all this¹ in mind, the Śruti has introduced the rule in clear words *yad u kiṃ ca*, which denies (in the case of this one who has become one with Prajāpati) the miseries of the beings. [357]

¹*ityādi* means this: *iti* is for what is stated in the preceding verses. *ādi* refers to the worshipper's achieving *sarvakṛttva* and *sarvātmatva*.

यच्छोचन्ति प्रजाः सर्वा दुःखैराध्यात्मिकादिभिः ।
आसामेवात्मभिः साकं तद्दुःखमुपयुज्यते ॥३५८॥

Whatever all the beings grieve over, viz. the miseries pertaining to the body etc.,¹ is to be connected (only) with their bodies.² [358]

This is the meaning of *yad u kiṃ cemāḥ prajāḥ śocanti amaivāsāṃ tad bhavati*.

¹The word etc. stands for *ādhibhautika* 'caused by elements' and *ādhidaivika* 'caused by gods'.

²This is about the common or ordinary people who have to

experience (verb root *bhuj*) the miseries (implying happiness as well) as *bhoga*. These are caused by their identifying themselves with various limitations of their intellect.

यथोक्तन्यायतो दुःखं न सार्धं देवतात्मना ।

कृतनाशस्तथा च स्यादकृताभ्यागमस्तथा ॥३५९॥

On account of the reason(s) stated above, there is no misery (accompanying) him, who has become divine in nature. (But, if it were that)¹ there would follow (these two faults, viz.) nullifying what is done and also the acceptance of what is not done.² [359]

The emphasis on *eva* in the preceding verse is explained. Further, the objector again says: 'This Upāsaka, who has obtained oneness with Prajāpati and is also possessed of the nature of all beings (cf. *sarvātmata*), must experience the *bhogas* of all.' To this, there is an answer.

¹That is, if he (the *sarvātman*) was understood to suffer misery.

²This is the reason why the worshipper, (now) identical with the divine, does not suffer. Here, *kṛtanāśa* literally means destruction of (i.e. nullifying) what is earlier done (Upāsana) and *akṛtābhyāgama* means acceptance of result(s) produced by some activity which is not done by the worshipper (Upāsaka).

पुण्यमेव कृतं यस्मात्पुण्यमेवामुमेत्यतः ।

पापस्याकरणादेव नैति पापं कदाचन ॥३६०॥

Since only merit was collected (by the worshipper in his earlier life), therefore only merit comes to him (and) only by not doing any sin, (now in this later state of oneness with Prajāpati), he never comes to have any sin. [360]

The first line explains *punyaṃ evāmuṃ gacchati* and the sentence *na ha vai devān pāpaṃ gacchati* clarifies the second line of the previous verse.

अग्निं न त्प्रेक्षते शैत्यमग्निवस्तुस्वभावतः ।
पाप्मानो देवतां तद्वद्देवतात्मस्वभावतः ॥३६१॥

Cold does not affect (lit. come to) fire because of the nature of fire as it is; in the same way sins (do not affect) the god (viz. Prajāpati) because of his nature, viz. godhood. [361]

This illustrates the thought in the preceding verse.

Now follows the discussion of BU 1.5.21-22 up to verse 375.

सर्व एव समाः प्राणा इत्युक्तेः साम्यनिश्चितौ ।
उपासने विकल्पेन प्राप्ते मीमांस्यते व्रतम् ॥३६२॥
दैववागादिसंपत्तिर्मृतस्य त्र्यन्नदर्शिनः ।
जीवता किं व्रतं धार्यमिति मीमांस्यतेऽधुना ॥३६३॥

Since it was (earlier) stated that all Prāṇas (i.e. Prāṇa, *manas* and Vāk)¹ are all equal and there was (thus) the decision of their equality, there now follows a doubt as regards their worship² and therefore is the vow (or meditation) being considered (in what follows). [362]

(It is learnt that) when a person, who knows (himself as) the three foods, dies, he becomes the divine Vāk etc. Therefore is now considered what vow should be followed by that while he is alive. [363]

What now follows has the purport of answering one who would have said that the discussion of 'seven foods' is completed at the end of BU 1.5.20 and then questioned about the purpose of *athāto vratamīmāṃsā*. Verses 362 and 363 state the purport of the whole argument.

SP and NKL point out the substance in the argument thus: under the doubt if 'any one of the three (i.e. *manas*, Vāk and Prāṇa) is to be worshipped (i.e. meditated upon) or all the three are to be worshipped together' and the decision is that

Prāṇa is to be worshipped principally.

¹Refer to verse 194 above; also cf. BU: *te ete sarve eva samāḥ sarve anantāḥ* ... mentioned under that verse.

²Regarding the superiority of the *upāsya* 'object to be worshipped'.

सर्वात्मकर्मसंन्यासात्प्राप्ते नैष्कर्म्यरूपके ।
प्राणव्रतविधानार्थं परो ग्रन्थोऽवतार्यते ॥३६४॥

(Now) is introduced the subsequent portion (of the Śruti) for presenting the vow of (i.e. the meditation on) Prāṇa, (for a person) after he has attained the state of not having to perform (any ritual activity) by having given up his own ritual activities in their entirety.¹ [364]

¹This refers to the time of his performing the Sampratti ritual.

बहूक्त्यैव तु सर्वेषां सिद्धं पूर्वमुपासनम् ।
स यो हैतानिति ततो नेदं पूर्वमपेक्षते ॥३६५॥

By the very reference to many (objects of Upāsana) in the statement *sa yo haitān* ... there is already established the worship of all. Therefore it is not that this vow is related only to Prāṇa. This (vow, viz. the one under consideration) expects (that sentence: *sa yo haitān* to precede it). [365]

This verse anticipates the opponent's view: 'There is reference to the vow of only Prāṇa' and answers it: The earlier sentence (cf. 1.5.13) precedes the statement *athāto vratamīmāṃsā*.

वाक्स्वान्तयोः स्वरूपोक्तिर्वृथैव स्यात्पुरोदिता ।
तयोरुपासनं नो चेत्प्राणवत्स्याद्विवक्षितम् ॥३६६॥

(The argument above goes further:) The description of the nature of Vāk and *manas* which is given earlier would be meaningless if their worship (also) were not intended to be

in the same way as of Prāṇa.

[366]

मृत्युना श्रमरूपेण ग्रस्ता वागादयो यतः ।

म्लोचन्त्यपि च श्राम्यन्ति तेन भग्नव्रताः स्मृताः ॥३६७॥

Since Vāk etc.¹ are overpowered by death in the form of fatigue, they (i.e. the gods) feel fatigue and (Vāk etc.) become tired; therefore they are stated to have abandoned (or, have been lost to) their vows (i.e. activities).

[367]

This explains the meaning of *tasmād ete etenākhyāyante prāṇa iti*.

¹The word etc. refers to *manas* and the gods connected with Vāk and *manas*.

तद्रूपो मध्यमो वायुः श्रमास्तमयवर्जितः ।

यतौऽभग्नव्रतस्तस्मात्तस्यैव व्रतमाश्रयेत् ॥३६८॥

[Here follows the story of the quarrel amongst various organs.]

The middle wind and Vāyu,¹ having its² form, was not affected by (lit. was without) fatigue and (final) loss. (Thus) since it had not abandoned its vow (i.e. activity); therefore one should take to (i.e. observe) the vow of it alone.

[368]

This refers to *athemam eva nāpnod yo 'yam madhyamaḥ prāṇaḥ*.

¹The words *madhyama* and *vāyu* refer to the *adhyātma* and *adhidaiva* forms of Wind (=Prāṇa).

²The word 'it' refers to Prāṇa, i.e. Mṛtyu.

प्राणे म्लोचन्ति वायौ च वागाद्यग्न्यादयो यतः ।

प्राणस्यैव व्रतं धार्यमतो नान्यस्य कस्यचित् ॥३६९॥

Since the Vāk etc. and Agni etc.¹ merge (lit. become lost) into Prāṇa, therefore the vow only of Prāṇa is to be undertaken

and not of any other.²

[369]

¹The first etc. refers to *manas* and the second to the gods of Vāk and *manas*.

²It means: because Upāsanā of Prāṇa includes that of Vāk and *manas* also. This is clarified in the next verse.

प्राणैकालिङ्गनात्प्राणा यथा तन्नामरूपिणः ।
आसन्प्राणविदप्येवं प्राणात्मोपासनाद्वेत् ॥३७०॥

Since, on account of their (viz. of Vāk and others) having clung to Prāṇa, they came to have its name and form, therefore a knower of (the nature of) Prāṇa also comes to have, through his meditation on that, the name and form of Prāṇa likewise.

[370]

This is the purport of *tasmād ete*

सर्वेन्द्रियेषु यावान् स्यात्परिस्पन्दः क्रियात्मसु ।
प्राणस्यैव स विज्ञेयस्तेषां त्वर्थप्रकाशनम् ॥३७१॥

Whatever movement¹ is noticed in all organs² which have the nature of doing activity, let that be known as of Prāṇa and, as for them, there is only (the function of) revealing³ their own objects.

[371]

¹The word 'movement' stands for every activity, even illuminating or revealing; i.e. causing perception of objects.

²These are eleven in all; five *jñānendriyas*, five *karmendriyas* and the eleventh is *manas*.

³The word 'revealing' signifies all movement (clarified in the note 1 above).

यथा वागादयस्तद्वदधिदैवेऽपि योजयेत् ।
अग्न्यादिषु परिस्पन्दो वायोरेवेति निश्चयः ॥३७२॥

As Vāk etc. (have become known by the name and form of Prāṇa), so also, in the case of the sphere of gods, should one (i.e. the worshipper) understand. The decision is: whatever be the movement (noticeable) in Agni and others, it is only that of Vāyu.¹ [372]

¹NKL points out *calanasya prāṇadharmatva* (SP: *calanasva-bhāva*).

वागाद्यनुग्रहः सिद्धस्त्वग्न्यादेः कर्म केवलम् ।
सर्वेन्द्रियाणामात्मैव प्राणो सर्गो लयस्तथा ॥३७३॥

The favour of Agni and others¹ done to Vāk and others² is (thus) established (in the Śruti) as the singular (or matchless) doing (of Prāṇa). (Therefore) Prāṇa is the (real) nature of all organs³ and also their origin and merger (i.e. the end/the meeting point).⁴ [373]

The first line refers to the Śruti statements *agnir vāg bhūtvā* (*Aitareyopaniṣad* 1.2.4) and others. That means the favour done to Vāk etc. which are explained in note 2 on verse 371 above.

¹These are various gods who superintend over the activities of the organs. Their entry into these latter is their favour.

²Others mean the remaining organs.

³This is, in reality, not merely of organs, but also of their gods.

⁴This means: where they finally merge in.

प्राणरूपाभिधानाभ्यां ख्याता वागादयो यथा ।
प्राणवित्संज्ञया ख्यातिं याति विद्वत्कुलं तथा ॥३७४॥

As Vāk and others have been known by the form and name of Prāṇa, so also, does the family of a knower (i.e. the worshipper) of Prāṇa become known as (lit. by the name) the knower of Prāṇa. [374]

यश्चापि प्राणवित्स्पर्धी स्पर्धामनु स मृत्युवत् ।
शोषमित्रा मृतिं याति द्विष्यान्नातोऽनवेदिनम् ॥३७५॥

And whosoever is a rival with the knower of Prāṇa becomes, after (entering into) rivalry with him, withered as after death, and then (or finally) dies. Therefore one should not be inimical to the knower of Prāṇa. [375]

This explains the meaning of *ya u haivaṃvidā spardhate anuśuṣyaty anuśuṣya haivantato mriyate*.

Now follows the discussion of Bu 1.5.23 up to the end.

ब्राह्मणोक्तार्थदाढ्याय श्लोको मन्त्रोऽनुकीर्त्यते ।
यतश्चोदेति सूर्योऽसौ यत्र चास्तं निगच्छति ॥३७६॥
प्रश्नरूपमिदं वाक्यं यतः प्रत्युक्तिरुच्यते ।
प्राणादित्यादिना भानोरुदयास्तमयौ कथम् ॥३७७॥

With a view to supporting the matter stated in the Brāhmaṇa¹ there is now stated a verse, a Mantra,² viz. *yataś codeti sūryo 'sau, yatra cāstaṃ nigacchati*.³ [376]

This Śruti statement has the form of a question, since there is an answer stated in the words *prāṇāt*⁴ (And, on this, the question is:) How are there the rise and the setting understood in the case of the Sun?⁵ [377]

¹That is, the explanation (in prose) of the original Mantras in the Upaniṣad; cf. the usual remark in Vedic literature: *tasyoktam brāhmaṇam*.

²*śloka* and Mantra are in apposition. In usual practice, *śloka* is used for a metrical verse in non-Śāstric literature, while Mantra is for a verse in sacred literature or Śruti. Yet, Sureśvara is here using the words in only one sense. The *kaṇḍikā* states: *athaiṣa śloko bhavati*. SP points out that the purpose of the preposition in *anukīrtyate* is to point out that the second line of this Vārtika is not a Mantra— it is *śloka* (already known

as Kārikā, it being in Śāstric literature).

³BU 1.5.1-2.

⁴In the Vedic *yataś chodeti* ... there is not used the interrogative particle *kim* or (or its form). Yet, since what follows as an answer indicates the character of a question.

⁵It means: On what authority it is so said? This is because the Śruti states that these are used on account of Prāṇa.

यदा वै पुरुषः शेते प्राणमप्येति वाक्त्तदा ।
चक्षुः श्रोत्रं मनस्तद्वज्जायते तत एव च ॥३७८॥

When a man sleeps, then does Vāk enter into the Prāṇa, (so also do) eyes, ears and *manas*. Also (each¹ one of them) originates only from that.² [378]

In the preceding verse the question is asked about the rise and the setting— this is for merger— of the Sun. The answer, given in the Śruti (cf. note 5 on that verse), is: 'On account of Prāṇa.' Now, in order to explain that answer, Sureśvara first states the rise and merger of Vāk etc. as caused by Prāṇa and then (in verse 379) those of Fire etc., Fire being taken as the Sun (also).

¹The word 'each' is used in view of every singular form *caḥṣus* and *śrotra*.

²This implies also their merger into Prāṇa.

अधिदैवतमप्येवं वायोरग्न्यादिसंभवः ।
अप्ययश्च यथाध्यात्मं श्रेयान्प्राणस्ततोऽन्यतः ॥३७९॥

In the world of gods also, the origination of Agni and others is from Vāyu (i.e. Prāṇa) likewise; so also is their merger (into it). Therefore, in relation to the body, Prāṇa is superior to others (viz. *prāṇas* 'organs'). [379]

आत्मैव प्राणशब्दः स्यात्प्राणबन्धनवाक्यतः ।
असदेवेदमित्युक्तेरात्मनो भानुसंभवः ॥३८०॥

The Ātman is signified by the word *prāṇa*; (this is understood) from the Śruti statement *prāṇabandhana*¹ (Also) from the statement *asad evedam*² (it follows that) the rise³ (lit. birth) of the Sun is from the Ātman. [380]

For explanation see SP on this verse; it is too elaborate to reproduce.

¹Cf. CU 6.8.2.

²CU 3.19.1.

³This implies the setting also.

यत् एव समुत्पत्तिस्तत्रैव प्रलयोऽपि च ।
मृदो जातस्य कुम्भस्य न लयो वीरणादिषु ॥३८१॥

From what there is rise (or, origination of the Sun etc.), in that itself is there (the) merger of them as well. (Verily) a pitcher, which is produced from clay, does not have its merger into a wooden pin of the spindle etc.¹ [381]

¹The second line is a *vyatikadṛṣṭānta* 'contrary example'. The word *ādi* stands for various means (i.e. material causes) of other kinds of production.

वागादिगणधारित्वाद्धर्मं वायुव्रतं विदुः ।
चक्रिरे दधिरे धर्मं धारणं प्रकृतं यतः ॥३८२॥

They have known the vow of Prāṇa as Dharma, since it (i.e. Prāṇa) sustains the entire group (of organs) that is headed by Vāk, since they have made, i.e. held, that as Dharma from which all sustenance is obtained (or understood). [382]

This refers to the Śruti: *taṁ devāś cakrire dharmam*

अद्यापि क्रियते तैस्तत्कर्तारश्चापि तत्सुराः ।
अधियन्त यममुर्हि तस्मिन्काले पराजिताः ।

धर्मव्रतं तदेवाद्य बिभ्रत्यग्न्यादयः शुभम् ॥३८३॥

Even now (that vow) is observed by them; also (their gods) will observe that which they observed¹ then, at that time, when they were defeated. The same auspicious vow of Dharma do Agni and others observe (even) today. [383]

¹This refers to *yad vā ete amum adhriyanta*

अभग्नं मृत्युना यस्मात्प्राणस्यैव व्रतं ततः ।
एकमेव व्रतं प्राणं चरेदा मरणात्सदा ॥३८४॥

Since the vow of (i.e. observed by) Prāṇa was not overcome (i.e. was not set to nought) by death (and fatigue), therefore one should ever observe only one vow, viz. Prāṇa,¹ till death. [384]

¹*vrataṁ prāṇam* are really *prāṇavratam*. Translation takes the words in apposition. In that case, Prāṇa is to be understood as 'called Prāṇa'.

प्राण्यादपान्यात्प्राणात्मा ह्युक्त्यादिष्वपि कर्मसु ।
अन्तर्भावो यतोऽमीषां श्रोत्रादीन्द्रियकर्मणाम् ॥३८५॥
प्राणकर्मणि तेनैतदेकमेव व्रतं चरेत् ॥३८६॥

May (an individual) breathe in (and/or) breathe out, he is of the nature of Prāṇa in all (his) doings, viz. speaking etc., for the functions of the organs, ears etc., are included in the doing of Prāṇa. Therefore one should observe this vow, the only one (vow). [385-386]

प्राणापानात्मकं यस्माद्व्रतं प्राणैककर्तृकम् ।
प्राण्यादपान्याच्च ततो नित्यमा मरणाद्बुधः ॥३८७॥

Since the vow, which is of the nature of breathing in and breathing out, has Prāṇa alone as its agent, therefore a wise

man should ever, till his death, breathe in and breathe out,
[considering the same as the observance of the vow of Prāṇa.]¹

[387]

¹The words in the square brackets need to be supplied. Cf. SP: *budhaḥ sarveṣu vāgādivyāpāreṣu prāṇavyāpāradr̥ṣṭis tad upā-sīta.*

प्राणात्मनैव वागादिव्रतान्यपि चरेत्सदा ।
वागाद्यासङ्गवत्तन्मां पाप्मा मा प्रापदासुरः ॥३८८॥
इत्येवमभिसंधिः सन्निवृत्तान्प्राणव्रतं चरेत् ।
प्राणव्रतं चेदारब्धम् चिकीर्षेत्तत्समापनम् ॥३८९॥

One should ever perform the vows of Vāk and others also as only those, which have the nature of Prāṇa, bearing in mind this intention: Let not the demoniac sin come to me like my attachment to Vāk and others.

If the vow of Prāṇa is (once) commenced (by a person), let him desire to complete the same. [388-389]

अभ्यस्तेनामृतेर्यस्मात्सायुज्यादि समश्नुते ।
ऋयन्नात्मदेवतायास्तु तस्मादेवं विधीयते ॥३९०॥

Since, by continuous (lit. repeated) observance (of this vow), one attains union etc.¹ (with Prāṇa), therefore is prescribed thus this vow to the god who has the nature of the three foods. [390]

¹The word etc. refers to *sālokya* and *sārūpya*.

इति श्रीबृहदारण्यकोपनिषद्भाष्यवार्तिके प्रथमाध्यायस्य

पञ्चमं ब्राह्मणम् ॥५॥

**BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA**

1.6

[The Brāhmaṇa is not known by any specific name.]

This is about introducing BU 1.6.

तद्वेदमित्यविद्याया उक्तं कार्यमशेषतः ।
उक्तार्थस्यैव संक्षेपस्त्रयं वा इत्यथोच्यते ॥१॥

In the words *tad dhedam*¹ has been stated the entire (world of the) effects of Avidyā and, now, in the words *trayaṃ vā* ... is stated a summary of what has been said.² [1]

This justifies the introduction of the Brāhmaṇa (viz. BU 1.6) beginning with the words *trayaṃ vā*.

¹That is, from BU 1.4.7 to the end of BU 1.5—this is an extensive discussion on Avidyā.

²This shows the purpose of summing up the contents of BU 1.4.7ff.— cf. SP *saṃkṣepavistarau ca sukhapratipattiyartham iṣṭau*.

अज्ञातैकात्म्यकार्यं तद्यदेतदभिर्शब्दितम् ।
न तु विध्वस्तसंमोहप्रत्यङ्मात्रसतत्त्वगम् ॥२॥
एवमुक्ते विरक्तोऽस्मान्मुमुक्षुः श्रद्धयान्वितः ।
ब्रह्मज्ञानेऽधिकारी स्यात्कथं नामेति भण्यते ॥३॥

That is the effect of the absence of the knowledge of the uniqueness of the Ātman which is thus (*etat*) mentioned and (*tu*) not that which pertains only to the inner self, together with its nature, the ignorance about which can be destroyed.

[2]

That being said, a person, (who has become) averse (to the world) would be desirous of liberation, would be possessed of faith and would be entitled to the knowledge of the

Brahman. How this is to be is stated (in the following Brāhmaṇa). [3]

These two verses point out the purposefulness of these concluding remarks on the portion between BU 1.4.7 and the end of BU 1.5; that is to consider how a person, who has become averse to this world (which is caused by Avidyā), would become entitled to acquiring the knowledge of the Brahman.

अविद्योत्थपुमर्थेभ्यो विमुखीभूतमानसः ।
आत्मतत्त्वविजिज्ञासुस्तद्व्यावृत्तो भवेन्नरः ॥४॥

(It is to this purpose:) A man, whose mind has turned away from the aims of human life (the notions about which) had arisen from Avidyā, and has become desirous of knowing about the true nature of the Ātman, becomes¹ averse to them.²

[4]

This is to stress the need of aversion to worldly existence.

¹Sureśvara uses *bhavet* for *bhavati* (in the manner of Vedic injunctions).

²The word 'them' refers to *avidyotthapumarthas*, viz. those which have been described in BU 1.4.7.

बाह्यार्थबद्धधिषणः प्रत्यग्याथात्म्यवित्तये ।
नालं विरोधात्पुरुषः पराञ्चीत्यागमोक्तितः ॥५॥

A person, who has fixed his intellect on the external objects, is not able to get to know the true nature of the inner self, since that (viz. his attempt towards knowing that) involves opposition (as seen) from the Śruti statement *parāñci khāni*¹

[5]

This states why a person, non-averse to the world, is unable to ascertain the nature of Reality.

¹*parāñci khāni vyatṛṇāt svayambhūh.. (Kāthopaniṣad 4.1).*

अविद्यामात्रहेतुत्वं न त्वैकात्म्यानुसारिता ।
यथोक्तवस्तुनः कस्मादित्येतत्प्रतिपाद्यते ॥६॥

It is discussed¹ as to why the thing which is stated² has only Avidyā as its cause and does not have the capacity to follow the uniqueness of the Ātman. [6]

¹That is, ... will be discussed in BU 1.6.

²This refers to the world consisting in the seven foods which are discussed in BU 1.5.

अज्ञातादात्मनः साक्षादभिव्यक्तिः पुरोदिता ।
अहेतुफलरूपस्य नामरूपक्रियात्मभिः ॥७॥

There has been earlier stated the direct manifestation from the unknown Ātman which is by nature not a cause and/or an effect and (has become known by) name, form and action.

[7]

There is, to begin with, a discussion on prapañca which consists in name, form and action. Now follows the discussion of BU 1.6.1.

नामाद्यात्मकतैवास्य ब्रह्मादेः स्थावरावधेः ।
न तु वस्त्वन्तरं तत्स्याद्यथा तदिह वर्ण्यते ॥८॥

This world,¹ beginning with the Brahman up to what does not move has merely the nature of name etc.² It is (really) nothing other (than the real) thing. How that is is explained here.³ [8]

¹Supply: which has the nature of the three foods.

²The word etc. refers to form and action.

³That is, in this Brāhmaṇa, viz. 1.6.

कारणत्वसमानत्वस्वात्मलाभत्वहेतुभिः ।
नामाद्यात्मकतैतस्य प्रपञ्चस्य प्रसाध्यते ॥९॥

It is by (giving) reason, (i.e. by stating that) this world has a cause,¹ equality (among its three constituents²) and origination,³ that it is established to have the nature of name etc. [9]

¹ *kāraṇatva = kāraṇavattva.*

² The three foods (*annatraya*) are meant.

³ In NKL, there is a note: name etc. are *uktha*, *sāman* and *brahan* and have, therefore, the nature of the cause etc. Cf. verses 13-15 below based on the Śruti passage *teṣāṃ vāg ity eteṣāṃ*

अनेकभेदसंभिन्नं यदेतद्व्याकृतं जगत् ।
नामरूपक्रियातत्त्वमेतत्सर्वं प्रतीयताम् ॥१०॥

Let it be understood that this world, which has become manifest, is entirely made up of (or, characterized by) numerous variety (in it) and has the nature of name, form and action. [10]

त्रयं वा इदमित्येवं प्रतिज्ञार्थमिदं वचः ।
हेतूक्तिरुत्तरो ग्रन्थस्तेषामित्यादिनोच्यते ॥११॥

Or rather, this, viz. (the words) *trayaṃ vā idam ...*, is thus a statement for (merely) enunciating (what has been already discussed) and the subsequent portion (of this Brāhmaṇa), which begins with the word *teṣāṃ* is the statement of the reason. [11]

According to NKL, *trayaṃ vā* does not repeat what is conveyed by *teṣāṃ nāmnām* (this is in the note on this verse).

वागित्यनेन शब्देन नादमात्रं विवक्ष्यते ।

अपजुहुषितत्वात् नादोत्थस्य विकारतः ॥१२॥

By the word *vāk* is intended all that is sound, since it is intended to conceal¹ what has arisen from sound as its effect.²

[12]

¹NKL (text and commentary) read *apajuhūṣitatvāt* for *apajuhnuṣitatvāt* in the AnSS edition (text and commentary). It is difficult to decide what NKL seeks to convey.

²*vikārataḥ* is for *vikāratvataḥ*.

एषां नामविकाराणामुक्थं नादस्तदुत्थितेः ।
सर्वनाम्नामतो नाद उक्थमित्यभिधीयते ॥१३॥

Sound is the *uktha* (or origin) of all these modifications, viz. names, because they arise from that. Therefore the sound is described as the *uktha*, i.e. origin of all names. [13]

SP points out: all names (i.e. words in language) are, in essence, not different from their cause (*uktha*) like a pitcher from clay.

¹This explains *etad eṣām uktham* in BU. In this entire context (i.e. in what follows) *uktha* is understood as 'origin' or 'cause'.

तथा सामान्यतो वाचो विशेषाणां तदात्मता ।
न हि निष्कृष्य सामान्याद्विशेषः कश्चिदीक्ष्यते ॥१४॥

So also, sound is the *sāman* (generality) of all the modifications, viz. particular (expressions) of speech, since they arise from the other (i.e. from *sāman*). No particular (object) is experienced as taken away from (i.e. without) generality. [14]

This explains *etad eṣām sāma*. SP remarks that all particular names are understood (or, derived) from their generality and each has that in it like the *idam* portion continuing in the apprehension of a serpent etc. in a rope (in false knowledge).

आत्मत्वाच्च तथा वाचो नात्मीयोऽन्योऽवशिष्यते ।
कात्स्न्येनैवाभिसंबन्धादात्मीयस्येह वस्तुनः ॥१५॥

So also, owing to the nature of Vāk as the Ātman¹ (of all modifications of speech), there is not left out any other (as an effect) of the Ātman; this is because all the things here have, in their entirety, a close connection with the Ātman.

[15]

This explains *etad eṣām brahma*. SP adds: Since Vāk is the Ātman of all sounds, they are not different from it, as a pitcher is not different from on account of (i.e. since it is made from) clay.

¹That is, the essence.

कार्यकारणगो भेदः प्राप्तो लोके य ईक्ष्यते ।
अविचारितसंसिद्धः सोऽयं श्रुत्या निषिध्यते ॥१६॥

Whatever distinction between cause(s) and effect(s) obtains in this world is (but) established in the absence of (proper) thought and that is (here) rejected by the Śruti.

[16]

The verse intends to state: The three preceding verses have rejected all 'distinction' in speech, since all of them are but one (viz. Vāk) in their essence. That distinction has proceeded from want of proper reasoning.

एवं सति प्रमाणत्वमपूर्वार्थावबोधनात् ।
अन्यथातोऽनुवादः स्याच्छ्रुतेर्ज्ञातार्थबोधनात् ॥१७॥

If this is so, there is authoritativeness¹ (in the Brāhmaṇa), for it would be capable of informing (us) of a thing not known before. If it were otherwise, (this Śruti) would have been only an Arthavāda by its informing us about what has been already known.

[17]

The purport of this verse, together with its preceding, is: to establish *abheda* among all sounds and *bheda* among them is, in reality, only falsely conceived.

¹Or, meaningfulness/purposefulness.

Now follows the discussion of BU 1.6.2.

चक्षुषो विषयश्चक्षुःशब्देनेहाभिधीयते ।
रूपाणामिति संबन्धाद्रूपात्मत्वात्तथैव च ॥१८॥

Here (in this section), the objects¹ of the eye are stated by the word *cakṣus*, because they have connection with *rūpāṇām...*² and also because they are of the nature of the form.³ [18]

¹Singular stands for the plural according to *jātāv ekavacanam*.

²In *rūpāṇām* ... there is reference to particular *rūpas* 'forms'.

³That is to say: *cakṣus* 'eye' is but an effect of *rūpa* which is the generality in all forms. Therefore the objects of the eye are but form. This is explained in the next verse.

यद्यद्वि रूप्यते किञ्चिच्छब्दस्पर्शादिकं धिया ।
तत्तद्रूपमिति ज्ञेयं तैजसत्वाविशेषतः ॥१९॥

Whatever, be it word and touch etc., is grasped (lit. seen) by a person's intellect, is to be known as *rūpa* 'form' since (each one of them) is uniformly of the nature of *tejas*.¹ [19]

This explains why one does not have to understand only whiteness etc. as *rūpa*.

¹*cakṣus* is described as *tejas*, therefore its objects are *taijasa* and, as such, *rūpa*.

त्वाष्ट्रमेव हि सर्वत्र तेजो रूपादिलक्षणम् ।
तस्माद्विषयसामान्यं चक्षुःशब्देन भण्यते ॥२०॥

Everywhere only the *tejas* of the Tvaṣṭṛ¹ is the cause of form

etc.;² therefore generality in all the forms is referred to by the word *cakṣus*. [20]

¹This stands for Savitr. Cf. 1.5.184.

²'Cause of form etc.' is really the illuminator of form etc. The word etc. has a reference to *yat ... śabdasparśādikaṃ rūpyate dhiyā* in the preceding verse.

हेतुतज्जाविभागेन कार्यकारणहेतुतः ।
वाचारम्भणशास्त्राच्च विकारानृततोच्यते ॥२१॥

This is assertion of the falsity (or unreality) of the modification, because, as the cause and its effects, there is (always) identity between a cause and its effect, and also on the basis of the scriptural statement about the function of speech.¹ [21]

This general remark is introduced here for justifying what is said above, viz. without the generality called *rūpa*, there cannot be (or exist) the particular or individual *rūpas* 'forms'.

It seems from SP on the next verse that this is an explanation of the statement about *uktha*.

¹Cf. *vācārambhaṇam vikāro nāmedheyam* (CU 6.1.4-6).

अन्तर्भावश्च सामान्ये विशेषणामथोच्यते ।
सामान्यमेतत्सर्वेषां विशेषाणां समं हि तैः ॥२२॥

And then there is stated the inclusion of (all) the particulars in generality, for indeed generality of all particulars is equal to all of them. [22]

This explains the statement about *sāman* above.

न विशेषो न सामान्यं भेदतोऽभेदतोऽस्ति नः ।
तथा रूपविशेषाणां रूपमात्रात्मकत्वतः ।
स्रग्वत्सर्पादिकान्यद्वद्रूपं सर्वं बिभर्ति हि ॥२३॥

According to us, there does not (really) exist either particularity or generality, be it owing to the distinction or non-distinction among forms because all the particular forms are thus only (the general) form in nature and which bears all (other forms) just as a garland bears the form of a snake etc. [23]

From the word *tathā*, there is the explanation of *etad eṣāṃ brahma*.

Now follows the discussion of BU 1.6.3.

उक्तं समासतस्तावदेकत्वं नामरूपयोः ।
कर्मणोऽपि तथैकत्वमधुना प्रतिपाद्यते ॥२४॥

Thus far is stated in brief oneness of name and form. Similarly the oneness of action also is explained. [24]

SP clarifies: As all particular names are explained as only 'name' and all particular forms are only 'form', so are all actions but 'action'.

वाक्चक्षुशब्दतो यद्वद्गृह्यते विषयस्तयोः ।
आत्मनो विषयस्तद्वदात्मशब्देन गृह्यते ॥२५॥

As from the words *vāk* and *cakṣus* are understood the objects of the two; so also from the word *ātman*¹ is grasped the effect(s)² of it. [25]

¹Here the word *ātman* is the body.

²The effect (singular for plural) stands for the organ(s).

सर्वेन्द्रियपरिस्पन्दो व्यज्यते नः शरीरके ।
शरीरविषयस्तस्मादात्मेत्यत्राभिधीयते ॥२६॥

The activities¹ of all organs is revealed in our body; therefore

by the word *ātman* is expressed here the activities² of the body.³ [26]

¹This is *jātāv ekavacanam*.

²Here, *viśaya* stands for activity. Singular indicates plural, as in the preceding line.

³In *śarīra*, the suffix *-ka* indicates the little importance of the body; cf. SP on this word in verse 33 below.

आत्मैव त्वस्य कर्मेति तथैवाभिहितं पुरा ।
अतोऽत्र कर्मसामान्यं गृह्यते देहसंश्रितम् ॥२७॥

So it was stated earlier¹ in *ātmaiva tasya karma*; therefore, in this context, action in general is understood as supported by the body. [27]

¹BUBV 1.4.1845 and 1850.

नाम रूपं तथा कर्म यदेतत्त्रयमीरितम् ।
एकमेव भवत्येतत्त्रयं सद्देहमात्रकम् ॥२८॥

This triad, viz. name, form and action, which has been (thus) described before, is but one and this triad, which is but the body, is *sat* 'the existent (or reality)'. [28]

This explains the meaning of *tad etat trayam*.

विकर्तृत्वेन कर्मात्र नामरूपात्मनोर्भवेत् ।
कर्मणः साधनत्वेन नामरूपे व्यवस्थिते ॥२९॥

In this (body) is¹ here action the modifier² of what have the nature of name and form; (indeed) name and form have remained as the means to action. [29]

¹*bhavet*=*bhavati* in Vedic manner; cf. note 1 on verse 4.

²*vikartr* 'acting (mutually as the cause and the result)'— SP.

रूपमेव प्रतिष्ठा स्यात्सर्वदा नामकर्मणोः ।
न हि रूपमनाश्रित्य विद्येते नामकर्मणी ॥३०॥

Ever¹ would form be the support of name and action, for name and form cannot exist without having resorted to form.

[30]

This explains the significance of the word *itaretarāśraya* in BUB with a view to stating how *rūpa* is the support of *nāma* and *karman*.

¹The word 'ever' refers to the time so long as these two are limited in a body.

प्राण एव प्रतिष्ठैवं सदा स्यान्नामरूपयोः ।
प्राणैकात्म्याश्रयाद्यस्मादात्मलाभः सदा तयोः ॥३१॥

In the same way, Prāṇa alone would ever¹ be the support of name and form, since the two ever have their origin in their oneness with Prāṇa.

[31]

¹See note on the preceding verse.

तद्वद्वागाश्रयत्वं च तयोः स्याद्रूपकर्मणोः ।
वाचा प्रकाशयमाने ते प्रयुज्येते यतः सदा ॥३२॥

In the same way,¹ the two, viz. form and action, would be having their support in Vāk, since the two are used (in worldly doings) (only) when they are illuminated by Vāk.

[32]

¹This means: these two also become perceived through their oneness with Vāk.

आश्रयाश्रयिभावेन नामरूपक्रियात्मनाम् ।
एकार्थानां सतां तेषां संहतिः स्याच्छरीरके ॥३३॥

In a body, there remains (or exists) the ensemble of those which are of the nature of name, form and action and (which function) for one another as the support and the supported, serving the purpose of only one (viz. the Ātman). [33]

This explains the word *saṃhatam* in BUB.

एकः सन्नेष आत्मापि त्रयमेतत्प्रपद्यते ।
नामद्रूपक्रियाभिन्नो देहोऽयं गृह्यते यतः ॥३४॥

This Ātman also, remaining only one, becomes these three,¹ since this body is understood as characterized by name, form and action. [34]

¹Namely, name, form and action.

एतन्मयोऽयमात्मेति तथा पूर्वं प्रपञ्चितम् ।
एतावद्व्याकृतं सर्वं यदेतत्संहतं त्रिभिः ॥३५॥

It has been earlier explained that this Ātman is made up of this (i.e. triad, name, form and action);¹ only this much is all that is manifest, viz. the one which formed (lit. collected) into one (whole) by these three. [35]

¹Cf. BU 1.5.3.

तदेतत्खलु वैराजं नामरूपक्रियात्मकम् ।
नामरूपात्मसत्त्येन च्छन्नं प्राणामृतं तु तत् ॥३६॥

Thus is this indeed the form of Virāj which is made up of (the nature of) name, form and action; (indeed) that is immortal Prāṇa which is called (lit. covered) by the truth, viz. the body¹ consisting in name and form. [36]

¹The word *ātman* here refers to body; cf. verse 25 above. This refers to the body of Virāj.

प्राणशब्देन लिङ्गात्मा भण्यते करणात्मकः ।
पिण्डस्य मरणे नैतन्म्रियतेऽतोऽमृतं मतम् ॥३७॥

By the word *prāṇa* is expressed the subtle body which is of the nature of (i.e. made up of) organs, (but) when the body dies, it does not die; therefore it is considered to be immortal.

[37]

This explains *prāṇo vā amṛtam*.

पृथिव्यग्निभूतानि सत्संज्ञान्यत्र लक्षयेत् ।
त्यत्संज्ञके तु विज्ञेये वाय्वाकाशे महात्मभिः ॥३८॥

Here (among the five known (elements) one should note *pr̥thivī*, *ap* and *agni* as having the designation *sat* (and) the wise ones¹ (lit. the great ones) should know *vāyu* and *ākāśa* to have the designation *tyat*.

[38]

There is now the derivation of the word *satya* from two words *sat* and *tyat*. (This is an example of the well-known typical Brāhmaṇic tendency to offer such etymology!) It explains the word *sattya* in *nāmarūpe sattyaṁ*.

¹SP clarifies *mahātmabhiḥ* thus: *mahaty ātmany avacchinne ceto dhārayutum icchadbhiḥ*.

सच्च त्यच्चेति तत्सत्यं पञ्चभूतात्मकं विदुः ।
करणायतनं स्थूलं वैराजं यत्प्रचक्षते ॥३९॥

Therefore what are *sat* and *tyat* are, they have known, (the reality) made up of five elements and this gross abode of organs is what they call as the gross form of Virāj. [39]

It is gross, since it can be called by a name; i.e. it is an object which can be perceived (or rather, it is knowable).

pr̥thivī, *ap* and *agni* are directly perceptible, whereas *vāyu*

and *ākāśa* are imperceptible. These latter are known as *mahat*, the possible Ātman. *vāyu* indicates *mukhya prāṇa*. (?)

अस्याप्यन्तर्गतः प्राणो विज्ञानात्मेति यं विदुः ।
आ संसारात्स्थितः स्थास्नुः परिणामात्मकः सदा ॥४०॥

And the one, whom they (=the wise ones) have known as the knowing self (*viññānātman*), the Prāṇa is within this (form of Virāj). That has remained permanent up to the end of transmigratory existence,¹ (but) ever in the form of the modifications.² [40]

¹Cp. *ābhūtasamplavasthāna* in BUBV 1.5.200.

²That is, the manifest world. This is the nature of the abode of organs, the form of Virāj, mentioned in the preceding verse.

यथाकर्म यथाज्ञानमुपादत्ते शरीरकम् ।
प्लुष्यादिना समोऽतौऽयं श्रुतावप्यभिधीयते ॥४१॥

This one (viz. Virāj) takes up a body according to action or according to knowledge (of an individual).¹ Therefore this one is sung (or described) in the Śruti also as similar (in size) to a gnat.² [41]

This explains why the subtle body of Virāj undergoes transmigratory existence (as said in the preceding verse; this subtle body is in reality somewhat gross, for it is similar to a gnat (in size)— this on the authority of the Śruti— and can then be subject to modification, i.e. various manifestations.

¹Supply: while he lead his life.

²Cf. BU 1.3.22 and BUBV 1.3.305: *samaḥ pluṣiṇā*.

उपात्ताशेषभूतोऽयं यथोक्तोपात्तदेवतः ।
कृत्स्नाविद्यौत्थमानी च प्रत्यगज्ञानकारणात् ॥४२॥

This one,¹ which has taken up² all the elements, who has

(also) taken up the gods³ that are (already) mentioned and which, therefore, feels itself to be (identical with) all that has arisen out of Avidyā, (is so⁴) on account of ignorance about (the true nature of) the inner self.⁵ [42]

¹That is, the body of Virāj which is so far described as both gross and subtle— naturally the various organs (eleven in number, as pointed out earlier in a note on verse 1.5.371.

²That is, assumed the forms of.

³Supply: who are associated with the organs.

⁴That is, subject to transmigration.

⁵The Sūtrātman (i.e. the self of Virāj) is really the inner self of the individual, but it is overpowered by ignorance.

हैरण्यगर्भे तत्त्वज्ञो वैराजे च शरीरके ।
आबद्धात्माभिमानोऽयं गार्ग्योऽविद्यासमन्वितः ॥४३॥
कृत्स्नसंसारमान्येष सर्वोऽस्मीति व्यवस्थितः ।
ब्रह्मोपदेशविषयः श्रुत्यैवोत्थाप्यते जडः ॥४४॥

This Gārgya, who is a knower (in respect) of the body of Hiranyagarbha and (that of) Virāj¹ and feels himself to be one with the same, is (thus) overpowered (lit. accompanied) by Avidyā and, considering all this world (i.e. transmigratory existence) as his own, has remained (or, is happy) in the state of feeling 'I am all (this).' (This one), the ignorant one, is (now)² introduced by the Śruti as the recipient³ of the knowledge of the Brahman. [43-44]

This forms the purport of the concluding sentence in BU 1.6.

¹The two bodies are subtle and gross.

²This refers to BU 2.1.1 which is to follow immediately.

³The word *viṣaya* stands for *adhikārī* 'eligible to receive'.

नामरूपाभिमानाभ्यां मर्त्याभ्याममृतः स्वयम् ।
प्राणः करणसंघातश्छन्नः संवेष्टितः सदा ॥४५॥

Prāṇa itself being immortal, is ever concealed, it is thus covered by the group of organs by (the subtle and the gross bodies which are) mortal (i.e. perishable) and have association (lit. oneness) with name, form and ego. [45]

This explains the meaning of *tābhyām* etc.

There is now in verses 46-51 the explanation in respect of the passage, tad etat trayam, as given by Bhartṛprapañca and then follows Sureśvara's refutation of it up to the end.

संप्रदायविदस्त्वत्र नानात्वैकत्ववादिनः ।
भिन्नाभिन्नात्मकं ब्रह्म नामरूपादिवज्जगुः ॥४६॥

But, in this respect,¹ the knowers of Vedānta tradition,² who hold (lit. advocate) difference and non-difference³ (among name etc.), have stated (lit. sung) the Brahman (to be) consisting in difference and non-difference just like name, form etc.⁴ [46]

¹That is, in respect of the sentence *trayam ca tad ekam* which refers to name, form and action.

²SP holds this as reference to Bhartṛprapañca (in the plural) for deriding him.

³The word etc. indicates *karman*.

त्रयं सदेकमेव स्यादेकं सत्तद्यथा त्रयम् ।
अनेनैवानुमानेन विद्याद्ब्रह्मापि तादृशम् ॥४७॥

Being a triad (i.e. three), it is¹ one; so also, being one, it is a triad. With (the help of) this illustration,² one should know that the Brahman also is likewise³ (viz. like the triad). [47]

This refers to *trayam sat ekam ayam ātmā* which states the oneness of the three and *ātmā ekaḥ sann etat trayam* stating

‘one is three’. This explanation of Bhartṛprapañca is opposed to Sureśvara’s position: ‘the Brahman is not like the three (or triad)’.

¹That is, they are.

²This is for *anumāna*, viz. *drṣṭānta*.

³That is, *bhinnābhinna*.

दृगादिशक्त्यनेकत्वेऽप्येकमेव परं विदुः ।
शक्तिशक्तिमतोरैक्यादद्वैतमिति भण्यते ॥४८॥

They¹ have known the highest one to be only one² even though there is oneness the manyness/plurality of powers (or capacities) of seeing etc.³ (And) the non-duality (of the Brahman) is posited (i.e. stated in the Śruti) for the reason that capacity and what is capable are, in reality, (but) one.⁴

[48]

¹Namely, seers of the Vedānta.

²This suggests that, being *bhinnābhinna*, it can have so many powers.

³The word etc. refers to hearing, touching and other functions of organs.

⁴This shows that there is not involved any contradiction with the Śruti.

सास्नादिषु यथा गोत्वमभेदेन व्यवस्थितम् ।
मिथः सास्नादयो भिन्ना गोत्वाभिन्नास्तथापि ते ॥४९॥

(This non-difference in difference is noticed thus:) As *gotva* (cowness) obtains as common in (lit. non-different) among many (animals) having a dewlap etc. the animals having a dewlap etc. are (at the same time) differentiated (from one another) and yet are not differentiated from *gotva*.² [49]

This illustration here paves way to Bhartṛprapañca’s argument about the Brahman.

¹That means: oneness of the Brahman exists among many objects which are but the single Brahman.

²The implication is: the various objects in the world can be considered as *bhinnābhinna*.

भिन्नाभिन्नात्मता यद्वत्स्थूलेष्वर्थेषु दृश्यते ।
सूक्ष्मेष्वपि तथा विद्यादनुमानबलाद्बुधः ॥५०॥

(Therefore) as being different and yet non-different is noticed among gross objects, so (it is noticed) among even subtle objects ¹ — thus should an intelligent man know on the strength of the illustration. [50]

¹This refers to the power of seeing and similar others— and consequently to the Brahman.

परपक्षे न दृष्टान्तः कश्चिदप्युपलभ्यते ।
भिन्नाभिन्नात्मकं तस्मात्सर्वं वस्त्विति निश्चयः ॥५१॥

In the view of the other (i.e. the opponent), ¹ there is not a single illustration available; ² therefore the decision is that all objects are both different and non-different. ³ [51]

¹That is: in confirmation of the theory of the other Advaitin.

²Supply: for proving his view.

³This includes even the Brahman (as a *vastu*).

Now follows the refutation of Bhartṛprapañca's view.

अनुमानैकसिद्धत्वाद्विन्नाभिन्नात्मवस्तुनः ।
आगमेनात्र किं कार्यं लिङ्गसिद्धानुवादिना ॥५२॥

If (thus) the thing which is in nature both differentiated and non-differentiated becomes known (or established) through (the help of) an illustration, what (then) is the use, in regard to this, of the Śruti which (merely) repeats what is known through

an illustration? ¹

[52]

The argument about the meaninglessness of the Śruti, in the form of a question, is for asserting the inutility of *anumāna* and for silencing Bhartṛprapañca who also does not hold the Śruti as meaningless.

¹*liṅga* 'lit. a characteristic' is here used as an equivalent of *anumāna* (used in the first line) in the sense of 'illustration'; cf. verse 47 above.

न चागमस्य तात्पर्यमेवंभूतेऽस्ति वस्तुनि ।
अस्थूलं नेति नेतीति ज्ञाताज्ञातह्युतेस्तथा ॥५३॥

Also, the Śruti does not purport (to convey) a thing which has been thus,¹ for there is in it the negation of what is either known or unknown in the words *asthūlam*² and *neti neti*.³

[53]

This rejects the idea that the Śruti is the authority for holding the Brahman as both differentiated and non-differentiated.

¹That is *bhinnābhinna*.

²Cf. BU 2.8.8.

³Cf. BU 3.9.26; 4.4.22; 4.5.15.

विशेषात्मनिषेधाय तथा सामान्यरूपिणः ।
क्षुरविश्वंभरौ श्रुत्या दृष्टान्तौ प्रतिपादितौ ॥५४॥

(Further) the Śruti¹ has adduced the illustrations of a knife and Viśvambhara 'the supporter of all the world' for rejecting (the view that the Brahman is of) the nature of a particular object and also of what has the form of generality. [54]

¹This refers to BU 1.4.7; cf. BUBV 1.4.636-645 and also 648-658.

अन्त्या विशेषा दृष्टान्तः परपक्षेऽपि विद्यते ।

त्वत्पक्ष एव दृष्टान्तो यथा नास्ति तथोच्यते ॥५५॥

(As regards the statement that) particular objects have an end (i.e. limit), there is in (your) opponent's view an illustration; but there is not (i.e. cannot be) any illustration in your view itself. How it is not (there) is now (i.e. hereafter) explained.

[55]

This is in answer to the argument in verse 51 above, meaning: what Bhartṛprapañca has said to be the fault in the others' view is really in his own view.

In the third quarter, the reading in the NKL edition (text and commentary) is *tavaiva pakṣe* for *tvatpakṣa eva*.

निःसामान्या विशेषाः स्युर्गोता तेभ्यो न चेद्विरुक् ।
अथ व्यावर्तते तेभ्यो गोत्वं ते खण्डवद्भवेत् ॥५६॥

The particular objects (viz. the cows) would be without generality in them, if *gotā* (= *gotva*) were not differentiated (i.e. existing apart) from them.¹ But if (*atha*) it differs (i.e. exists apart) from them, (only) then *gotva* would be, in your view, like any single (i.e. particular) object.² [56]

¹The first line presupposes that cowness is not different (*abhinna*) from the individual objects; this means non-acceptance of 'generality'!

²This line contends the argument that generality is distinct (*bhinna*) from the individual objects; that means: what is called generality is also a particular.

व्यावृत्तं यदि भिन्नेभ्यस्त्वयाभिन्नगिरोच्यते ।
व्यावृत्तं न विशेषश्चेत्यहो विद्याविचेष्टितम् ॥५७॥

If what does not exist in the distinct (individual) objects, as described (by you) in the words '(It is) non-different from them, and what exists apart from (others) is not a particular

(object)', then (we have to say:) 'Oh! What achievement of learning!' [57]

The verse is in derision of the view that 'cowness' is both different and non-different (*bhinnābhinna*) from the particular cows. It presupposes generality as different from the nature of the particulars.

अव्यावृत्तं विशेषेभ्यस्त्वथ सामान्यमुच्यते ।
सामान्यस्य विशेषत्वाद्विशेषा एव केवलाः ॥५८॥

And again, what does not exist in the particular (objects) is described by you as generality, then generality, being (another) particular, (there would remain) only particulars! [58]

This presupposes generality as non-different from the nature of the particulars— cf. also verse 56 above.

न ह्यभिन्नधिया गोत्वं विशेषेषु प्रतीयते ।
विशेषमात्रनिष्ठत्वाद्विन्नाभिन्नं किमुच्यते ॥५९॥

Indeed, *gotva* is not noticed among particular (cows) with the notion that it is non-different (from them); (thus) because it does exist only among particulars, why is it said that it is 'different and non-different'? [59]

This verse refers to the common experience of generality among cows and sets aside the possibility— suggested by the preceding verse— that there would remain only particulars.

अभेदः किं तयोर्योगः किं वैकात्म्यमभिन्नता ।
नाभेदो मेषयोर्योगे यथा भिन्नौ तथा युतौ ॥६०॥

(A question can be asked thus:) Is non-difference the conjunction of the two?¹ or is it oneness in nature or non-difference? (But it has to be observed that) there is not

non-distinction as in the case of two lambs' conjunction, (for the simple reason that) they are conjoint,² since they are different. [60]

It is now proposed to discuss the nature of *abheda* or *abhinnatā*.

¹This refers to the two notions of generality and of particularity.

²The notion of the conjunction of two objects presupposes the distinction (i.e. separate existence) of the two.

व्यामिश्रं यदि वा शुद्धं गोत्वं भेदेषु गम्यते ।
नोभयत्राप्यभिन्नत्वमसाधारण्यसंस्थितेः ॥६१॥

(Possibly) cowness is grasped (or understood) among (cows) different (from one another) in its mixed form¹ or pure.² But (the situation is:) in both the cases, there is no non-difference (of cowness from them) on account of its existence in such of its nature as is uncommon.³ [61]

This argument pertains to the nature of the experience (or grasping) of cowness among cows, disproving their *bhinnābhinnatva*.

¹Namely, that cowness and the individuality of the cow as one single object of experience.

²That is, *gotva* 'cowness' as distinct from a *go* 'cow'.

³That is to say: *gotva* is noticed in each of the individual cows and is, at the same time, distinguished from each.

भेदेषु चोपयुक्तं तद्गोत्वं तद्वा पृथक्स्थितम् ।
सामान्यं वा विशेषो वा कोऽनयोरभिधीयताम् ॥६२॥

And that cowness, be it existing¹ in the different (cows)² or existing apart from them, which of the two³ is it, as generality or particularity⁴ (of cows)? [62]

This argument assumes the non-difference (*abheda*) of cowness

and cows and discusses whether cowness is distinct or non-distinct [as NKL puts it: *iṣad-abhinna* or *atyantābhinna*] from cows. It suggests the difficulty felt in either case while deciding cowness at the *sāmānya* or *viśeṣa* in any cow.

¹This is for *upayuktam*, 'conveying the sense of *a-prthak-sthitam*, i.e. non-different, which is in contrast with *prthak-sthitam*, i.e. different.

²Different (cows) is for *bhedas*.

³Namely, *a-prthak-sthita gotva* and *prthak-sthita gotva*.

⁴The meaning is: Is cowness, whether non-different or different from the cows, their generality or particularity. Let this be remembered here that *sāmānya* or *viśeṣa* is a *guṇa* in some *vyakti*.

उपयुक्तं विशेषत्वादितरस्याप्यनन्वयात् ।

भिन्नाभिन्नात्मतां नैति द्वैरूप्यासंभवात्तयोः ॥६३॥

If it is held to be non-different (i.e. existing among the individual cows), it has the nature of what is particular¹ and the other² also cannot persist (in each individual³)— thus, it cannot have twofold⁴ nature. [63]

This argues against the non-different existence of cowness among individual cows.

¹Namely, it is particularity, i.e. it ceases to be generality. Since it is included in an individual, it cannot be said to be in another individual. This is to be understood thus: *gotva*, being included in an individual cow (i.e. a particular body), has to be different from every other cow.

²Namely, distinct existence. This is an example of Sureśvara's typically cryptic style. *itara* (in the second quarter) is used here in contrast with *upayukta* (in the first quarter) and stands for 'what is different', i.e. 'what exists as distinct'. Then the argument follows: If it is different, that cannot be said to exist in every other individual. It is like some particular called *Khaṇḍa* which cannot exist in another individual called *Muṇḍa*.

³It is not connected with them as generality.

⁴Namely, of generality and of particularity.

वस्तुवृत्तं न सामान्यं न विशेषस्तथैव च ।
अपेक्षामात्रतः सिद्धेर्व्योम्नि काष्ण्यादिवृत्तवत् ॥६४॥

The nature ¹ of anything is neither generality nor particularity, (since the two, viz. generality and particularity) come to exist only through the expectancy (of (or, dependence on) each other) ² as darkness etc. ³ come to exist in the sky ³ (etc. owing to one's imagination). ⁴ [64]

The argument is: What we call generality and particularity are in reality the products of our imagination; i.e. we form the notions of them. This is exactly like our forming a notion of the darkness of the sky; it really does not exist, it is but imaginary.

¹Sureśvara uses *vastuvṛtta* in the sense of *vastusva- bhāva* (= *vastusvarūpa*).

²The two expressions generality and particularity represent our notion about the relation among things. Neither can be understood without the other.

³Darkness is really 'the blue of the sky'; it is only a product of imagination. *ādi* is possibly for serpent or silver seen through the notion about it.

⁴This is to emphasise the non-duality of what is merely conceived, i.e. taken as existing. Cf. *Gauḍapāḍakārikā* 4.57.

प्रत्यभिज्ञानतोऽभेदः खण्डमुण्डस्थगोत्वयोः ।
एकाधिकरणज्ञानात्खण्डाद्यैस्तद्विभिन्नता ॥६५॥

(There is a likely argument of Bhartṛprapañca:) There is non-difference of the two *gotvas*, viz. that *gotva* which exists in Khaṇḍa and that which exists in Muṇḍa ¹ on account of the recognition of it ² and owing to (its) having (only) one (individual) for its support. It (viz. *gotva*) appears to be different (on account of its association) with Khaṇḍa and

others.³

[65]

Bhartṛprapañca would argue about *bhinnābhinnatā* thus: *gotva* seen in Khaṇḍa is recognised as that seen in Muṇḍa; this explains *abhinnatā*. Yet when it is seen only in Khaṇḍa it has to be considered as existing in one particular substratum and that seen in Muṇḍa exists only there. This explains their difference (*bhinnatā*). *bhinnābhinnatā* of *gotva* is thus justified.

¹These could be the names of particular bulls. (If they were names of cows, then there could be the words Khaṇḍā and Muṇḍā).

²One recognises that *gotva* in Khaṇḍa is the same as that seen in Muṇḍa. Therefore 'it' stands for the two *gotvas*.

³This presupposes the *abheda* of *gotva* and *go(vyakti)*. That being so, the *gotva* in Khaṇḍa cannot be the *gotva* in Muṇḍa. And, consequently, these two are different (*bhinna*).

भिन्नाधिकरणज्ञानान्नैवमप्यभिदा तयोः ।

सामान्येऽभिन्नधीर्यस्माद्विन्नेष्वेव तु भिन्नधीः ॥६६॥

(This is the answer to the above:) Even in this way, there cannot be (posited) non-difference between the two¹ on account of the knowledge of (two) different (individuals as their) supports, since there is knowledge of non-difference only in respect of generality, but knowledge of difference (occurs) in respect of what are different (viz. individuals).² [66]

This is to say that though *sāmānya* (viz. *gotva*) and *viśeṣa* (viz. *govyaktitva*) are thus noticed in one individual as their support, they cannot be *bhinnābhinna*. The reason for this is: *gotva* is *anuvṛtta* 'occurring again' in other cows while *govyaktitva* is *vyāvṛtta* 'non-occurring (or absent) in others'. Thus this *sāmānādhikarāṇya* (cf. *ekādhikarāṇa* in the preceding verse) is like in the instance of the 'blue' in 'a lotus'.

¹That is, *gotva* in Khaṇḍa and that in Muṇḍa.

²This argument is summed up by NKL: (*gotvayoḥ*) *abheda-*

buddheḥ sāmānyaviṣayatvān naikādhikaranyam ity arthaḥ.

प्रत्यक्षेणानुपात्तत्वान्न स्मृतिस्तद्वितीक्षणम् ।
न हि प्रत्यक्षतोऽप्राप्तं स्मर्यते वस्तु किञ्चन ॥६७॥

Again the memory (of *gotva*) does not mean the seeing of it, since that is not grasped by direct perception. Indeed, a thing which is not grasped by direct perception is (said to be) remembered. [67]

The argument pertains to *pratyabhijñāna*. It answers what is said in verse 65 above. It is argued that *gotva* in Muṇḍa is directly perceived and it reminds one of the *gotva* in Khaṇḍa which was earlier perceived; it is not directly perceived. That goes to disprove the difference in non-difference of *gotva*.

सामानाधिकरण्यस्य विभिन्नार्थव्यपाश्रयात् ।
अभेदधीः कथं तत्र विशेषणविशेष्ययोः ॥६८॥

Since existence in the same substratum is here supported in different objects (of cognition),¹ how could there be the perception of non-difference between what are (really) a qualifier and the qualified?² [68]

The argument in this verse proceeds to answer away the objector's notion— based on recognition— that the two (viz. generality and particularity) have one and the same substratum and therefore they are *abhinna*; cf. verse 65 above. Existence of *gotva* and *khaṇḍatva* cannot be a valid basis for the argument about *bhinnābhinnatā*.

¹This means *gotva* (i.e. *jāti*) and *khaṇḍatva* (i.e. *vyakti*) in one individual cow.

²Thus: *jāti*, while it belongs to a *vyakti*, distinguishes it from other *vyaktis* and a *vyakti* is therefore *jātivīṣiṣṭa*. Here SP and NKL point out: In a blue lotus, blue is blue, and a lotus is a lotus; and there is a lotus qualified (i.e. distinguished from

lotuses of other colours) by the adjective blue. The two, namely blue and lotus cannot therefore be identical.

अभिन्नवचसा भिन्नप्रतिषेधोऽभिधीयते ।
प्राप्तस्य भिन्नरूपस्य शून्यतातः प्रसज्यते ॥६९॥

By (the use of) the word non-different is expressed the rejection of (the nature of) what is different. (Therefore) from this (rejection)¹ there follows meaninglessness² of what obtains as having the nature of a different (object). [69]

It is refuted that *bhedābhāva* is the meaning of the word *abheda*. The word *abhinna* can be understood to reject the notion of *bheda*.

¹This is the rejection of the identity of what is conjoined as a qualifier and what is qualified.

²*śūnyatā* is *asiddhi* of *abhinnatā*.

वचो भेदनिषेधं चेन्न कुर्याद्वेदवाक्यवत् ।
भिन्नाभिन्नात्मतापक्षहानिरेवं प्रसज्यते ॥७०॥

In case a statement would not reject (lit. prohibit) *bheda* in the same way as a statement which conveys *bheda* does, then also there certainly follows rejection (lit. loss) of the view which advocates the nature of non-difference in difference.

[70]

This verse considers the possibility that someone would understand the word *abhinna* as not conveying the rejection of *bheda*. In this case, such a person would take *abhinna* to mean *anyabheda*. (This is like the word *aśveta aśva* 'a horse, of any colour other than white'.) Therefore *bhinnābhinna* would mean *bhinna* and *bhinnāntara* (another *bhinna*).

तत्रकौण्डिन्यवन्न्यायो न चेहाप्यवसीयते ।
उत्सर्गानवकाशत्वाच्छून्यतैवात आपतेत् ॥७१॥

Also, there does not apply here the reasoning¹ as (in the maxim of) 'butter-milk to Kaundinya',² since there is no occasion for any general rule (to be set aside);³ and, as such, there follows only meaninglessness.⁴ [71]

There is yet more argument regarding *abheda* in the sense of what is other than *bheda*. The objector can, in reply to the two preceding verses, raise some difficulty thus: *abheda* may, in any one of the two senses, tend to reject the view of difference in non-difference, but that should not show the meaninglessness of the view. It is possible to understand the meaningfulness of some action prohibited in the case of an individual when an action is recommended in respect of all. It can be put thus: *sarvatra prāptasya kāryasya viśeṣavidhinā niṣiddhasya na śūnyatā* (= *asiddhiḥ*). See note 2 below.

¹ *nyāya* here stands for *anumāna* which is really reasoning with some illustration (cf. verse 50 above— that is also called *drṣṭānta* in verse 51 above).

² 'Butter-milk to Kaundinya' is a well-known maxim. It is connected with two instructions: (1) *āryebhyo dadhi dīyatām* 'Curds may be give to the respectable persons (*āryas*)' and (2) *takram kaundinyāya* 'Butter-milk to Kaundinya'. Here, according to (1), which is a general instruction, Kaundinya is already included among the respectable persons and should have been therefore served with curds, but (2) points out an exception to (1). This is thus an example of a general rule together with the mention of an exception to it. This means rejection of *dadhi* for Kaundinya which is otherwise to be given to all (*sarvatra prāpta*), but this rejection/prohibition is not meaningless. Similar procedure can apply to *bhinnābhinna* view, as Bhartṛprapañca might argue.

³ The meaning of *abheda* and that of what is other than *bheda* do not stand in the relation of a general rule and its exception. It is not a case similar to Kaundinya's (in the note 3 above).

⁴ Cf. note 2 on verse 69 above.

भिन्नौ जातिगुणौ द्रव्यात्स्वानुभूत्यनुरोधतः ।
तद्विरोधादभिन्नत्वं कथं मानात्प्रतीयते ॥७२॥

(Again) *jāti* 'genus' and *guṇa* 'property' are distinct from a *dravya* 'substratum'¹ — this is in accordance with general experience. Hence, while there is opposition to it,² how could (their) non-difference be understood from the illustration?³

[72]

This verse rejects yet another alternative meaning of *abheda*, viz. what expresses (or, conveys the sense of) the opposite of *bheda*.

¹For example, *gotva* 'cowness' and *sāsnādimattva* 'having a dewlap etc.' are different from an individual cow.

²The word 'it', here, stands for one's own experience of the distinction between *jāti* or *guṇa* and *dravya*, viz. a cow.

³The illustration of butter-milk to Kaundinya. Here, *māna* stands for *anumāna* which is 'illustration' as noticed above. This points out how the non-difference of the property (or properties) of a substance from itself cannot be proved on the basis of *utsargāpavādanyāya* 'the rule regarding a general rule and a particular'.

अभिन्नं सद्विभिन्नत्वं न कथंचित्प्रपद्यते ।
स्वाश्रयत्वादभिन्नस्य कुतोऽस्य स्यात्पराश्रयः ॥७३॥

Being non-different (from another), a thing cannot in any way have the nature of being different from it. Also, how then can what is non-different from its another substratum? [73]

The argument here is for the final rejection of the three above-mentioned views regarding the meaning of *abheda* and for the consequent acceptance of *abheda*. Sureśvara, accepting non-difference alone as the meaning of *abheda*, points out that the non-difference of all so-called things, being their real nature,

सामान्यं च विशेषश्च द्रव्यतन्त्रौ मतौ यदि ।
असामान्यविशेषात्मद्रव्यवत्प्राप्नुतश्च तौ ॥७८॥

If (again) genus and a particularity are held to be non-different from¹ substance(s), they would obtain² as what are neither genus nor particularity but (only) as substance(s).³ [78]

¹*dravyatantra* is understood here as *dravyābhinna*, i.e. non-different from (or one with) substance(s). This is Sureśvara's peculiar use of the word *tantra*.

²That is, become perceived or known.

³This means— they would be just *dravya*. In other words, one could not postulate the notions of *sāmānya* and *viśeṣa* and, as a consequence, any consideration about their *bhinnābhinnatā* would not arise.

गुणतन्त्रं यदा द्रव्यं प्रसिद्धेर्बाधनं तदा ।
एकस्यानेकतापत्तिर्द्रव्यस्यापि प्रसज्यते ॥७९॥

If a substance is taken to be non-different¹ from a property (of it), then that is opposed to what is common knowledge. Also, there would result in the case of a substance the contingency of having manyness even if it is one single substance. [79]

This sets aside that *dravya* can be considered by one as included in (i.e. identical with) *sāmānya*.

¹*gunatantra* is *gunābhinna*. Cp. note 1 on the preceding verse.

द्रव्येणैवाभिसंबन्धाद्गुणानां न परस्परम् ।
अन्योन्यानभिसंबन्धान्न विशेषस्तथेतरत् ॥८०॥

Owing to the close connection¹ of the properties² with only a substance, there cannot be mutual (connection) among them; (and) since there is no mutual relation among themselves, there cannot be any particularity, nor can there be the other.³ [80]

This sets aside the possible notion of the inclusion of genus and/or particularity with *dravya*.

¹This stands for non-difference; *abhisambandha* = *abheda*.

²These are genus and particularity.

³That is, any genus.

सामान्येतरतो भिन्नं द्रव्यं चेद्वदतो मतम् ।
तन्निषेधेन तत्सिद्धेः कथं स्यात्तदभिन्नता ॥८१॥

(Now) if it is your opinion that substance is different from genus and the other,¹ then, since by the denial of the same (viz. the two)² that (viz. substance) gets established, how could there be then non-difference between them? [81]

The notion of difference between *dravya* and *sāmānya-viśeṣa* (discussed in the two ways above) leads to the rejection of their *bhinnābhinnatā*.

¹That is, particularities.

²That is, *sāmānya* and *viśeṣa*.

अथाभिन्नं मतं ताभ्यां द्रव्यस्यापहवस्ततः ।
न विशेषो न सामान्यमन्योन्यासंगतेर्भवेत् ॥८२॥

If again it is understood as non-different from the two, there would result the denial (of the existence) of a substance; (for) there could not exist (i.e. be conceivable) either particularity or genus owing to the non-association¹ of them. [82]

¹That is, absence of *āśrayāśrayibhāva*.

भिन्नाभेदादभिन्नस्य भेदः स्यात्पिण्डवद्ध्रुवम् ।
पिण्डश्च सर्वगस्तद्वज्ज्ञेत्वाभेदात्प्रसज्यते ॥८३॥

On account of the non-different being identical with what is different, there will certainly be a difference of what is

non-different (from the other), as (there is a difference) of a body (from another). And it would contingently follow that a body, being non-different from *gotva*, will obtain among all (cows). [83]

While discussing (what he considers as) the wrong (or unacceptable) in Bhartṛprapañca's view, Sureśvara uses such expressions (i.e. words and phrases) as would cause some confusion for a reader. Thus, here he uses the words *bhinnābheda*, and *abhinna* for *sāmānya* and *viśeṣa*. (In some subsequent verses also, he uses *jāti* and *vyakti*; *samasta* and *vyasta* for the same.)

With this in view, the following should clarify the argument in this verse which pertains to the relation of non-difference between *jāti* or *sāmānya* and *vyakti* or *viśeṣa*. Thus, according to the advocate of the theory of *bhedābheda*, *sāmānya* (= *gotva*) being non-different from *viśeṣa* (= *govyakti*) will have difference from *viśeṣa* (*govyakti*) which (also) is not different from the non-different (= *sāmānya*).

अन्योन्याव्यतिरेकित्वादैकात्म्यं प्राप्नुयात्तयोः ।
ततः प्रत्यक्षबाधः स्यात्तद्वेदो हि तदाश्रयः ॥८४॥

(Further) there would be oneness of nature of the two on account of their being inseparable from each other and there would result from that opposition to direct perception,¹ since the difference between the two rests on the two (themselves as different). [84]

It would be useful to write the relevant part of the verse by using the words *sāmānya* and *viśeṣa* in suitable places (and with a little modification) thus: *sāmānyaviśeṣayor abhinnatvāt* (= *avyatirekitvāt*) *tayoḥ aikātmyam* (= *ekasvarūpavattvam*) ... *sāmānyaviśeṣabhedo hi (bhinna-)sāmānyaviśeṣāśrayaḥ*.

¹This pertains to *anubhūtivirodha*.

व्यस्ताभेदात्समस्तोऽर्थो व्यस्तवन्न मनागपि ।
समस्ताकारवज्ज्ञानं कुर्यात्प्रत्यक्षबाधतः ॥८५॥

Owing to (its) non-difference with a particular object, generality would not, like (some) particular object, yield even a little knowledge of what has the nature of generality— since (that would involve) stultification of what is directly perceived by its having the nature of a particular. [85]

This verse also needs replacement of its original words by other relevant words; then the verse would read: *viśeṣābhedāt sāmānyarūpo 'rthaḥ viśeṣavan na manāg api sāmānyākāravaj-jñānam kuryāt, (tena) pratyakṣabādhah (bhaved ity) atah.*

The argument is: generality, being non-different from particularity, would not, like any particular object, yield even a little knowledge of what has the nature (lit. shape) of generality. If it yielded that, there would be disagreement with (our) daily experience in direct perception.

व्यस्ताभेदेऽपि चेत्कुर्यात्समस्तधिषणां बलात् ।
व्यस्तात्मनासमस्तोऽपि कुर्यात्प्लुषिधियं गिरिः ॥८६॥

In case there is accepted non-difference (of genus) from a particular and yet it¹ would cause the knowledge² of (what is) genus, then (it has to be accepted) that a mountain, which is not genus, would give rise to the knowledge of an ant, by its nature of a particular. [86]

¹That is, a particular.

²*dhiṣaṇā = buddhi, jñāna.*

असाधारणरूपेण भेदो जगति निश्चितः ।
साधारण्यं तयोर्मानात्समस्तव्यस्तयोः कुतः ॥८७॥

The difference (between genus and particularity) has been (already) decided in this world¹ on account of their non-

common nature. (Therefore) by what authoritative means of knowing (could there be) non-difference between genus and particularity? [87]

¹This is reference to *vyavahārabhūmi*. Once again, *anubhūti* (of conventional *pramāṇaprameyavyavahāra*) is the basis of Sureśvara's argument.

सर्वाभेदाच्च सर्वस्य रज्ज्वां सर्पादिबुद्धयः ।
रज्जुबुद्धिवदेव स्युस्तद्धीरचाप्यहिबुद्धिवत् ॥८८॥

And, further, everything (lit. all that is thing) being non-different from every (other) thing, there would arise the knowledge of a serpent etc.¹ in a rope just like the knowledge of (it as a) rope and the knowledge of that (viz. rope, would also be) like that of a serpent.² [88]

The argument is: In the theory of non-difference in difference there cannot be postulated any *pramāṇa* as right or false.

¹Sureśvara's use of *ādi* refers to other mistaken objects involved in an error— yet this use of mere *rajivām* in connection with *sarpādi* is a bit of non-careful expression (which he has adopted, possibly for metre's sake).

²This knowledge of a serpent is what is accepted as correct knowledge— not an error (*bhrama*). The earlier reference to it meant error.

निषेधविधिहेतूनां सर्वेषां सर्ववस्तुषु ।
समाप्तेरधिकारानामप्रवृत्तिः प्रसज्यते ॥८९॥

(Also) there follows the contingency that all (the Śruti statements which) pertain to prohibition and/or injunction¹ would decide² the eligibility of all³ (persons) in respect of all activities⁴ and (thus) there would result non-activity. [89]

The argument here pertains to the absence of any distinction

as *pramāṇa* and *apramāṇa* which would result from the view of non-difference in difference. There would be no means for deciding what statement in the Śruti is *niṣcdha* or *vidhi* and, consequently, anybody would enter upon any ritual activity. This is undesirable! Cf. a quotation in SP: *apravittinivṛttīdam prāptam sarvatra hi jagat*— possibly from the Bhāṣya of Bhartṛprapañca.

¹It literally means: are (i.e. act as) the causes indicating prohibition or injunction.

²That is, would be understood as laying down

³Cf. SP: *adhikārāṇam pravṛttyādihetumatām adhikāriṇām ity arthaḥ* and NKL: *adhikārāṇām pravṛttinivṛttinimittabrāhmaṇa-tvādīnām*. NKL appears preferable.

⁴Cf. NKL: *sarvavastuṣu caṇḍālādiṣv api bhāvād ity arthaḥ*. SP does not specifically explain this, yet seems to accept what we have given in translation; cf. its remark— we quote only relevant words— *sarveṣām brahmakṣatrādīnam adhikṛtānām sarveṣu brhas-patisavarājasūyādiṣu*

अभावमानक्लृप्त्यर्थो यश्चायासः कृतो महान् ।
निष्फलः सोऽभिसंवृतो भिन्नाभिन्नाव्यवस्थितौ ॥९०॥

This (thus, i.e. above discussed) disorderliness¹ (in the theory of) difference in non-difference obtaining, the great effort, which is made (by its advocate) for postulating the (authoritative) means of deciding (the nature of) *abhāva*,² has become (or proved to be) without utility (lit. fruitless). [90]

The thought in this verse presupposed that all things are different and non-different from all others (*sarvam sarvasmād bhinnābhinnam*). It is then argued that the theory of non-difference in difference [*bhinnābhinna* would literally mean different and yet not different; this order is maintained in the verse and its translation] is advocated without a quite carefully formulated view on *pramāṇas*. Accepting that theory would only yield improper results, particularly in respect of Vedic texts. Cf. NKL's remark: *ghaṭādeḥ bhūtalādyātmanā grhyamāṇasya*

yogyānupalambhāsiddheḥ. SP gives more details regarding *yogyānupalabdher akimcitkaratva*.

¹This means: the theory of *bhedābheda* is not coherently postulated. That is to say, it is unsystematic.

²*abhāva* suggests *bhedābhāva*.

स्वविशेषानुरोधित्वं सामान्यानां मतं यदि ।

समस्तव्यस्ततापक्षस्तदा कुप्यति कल्पितः ॥९१॥

(Again) if it is held that all that is genus¹ resembles (in nature) the particulars related to itself,² then there would be defiance of³ what is conceived as the theory of genus and particularity. [91]

This verse argues about another aspect of the theory of *bhedābheda*; it would mean that some genus is different and non-different from some particulars (connected with it). According to Sureśvara, this involves the fault of *ardhajaratiya* 'regarding a half of someone as old' (as SP calls it); or as NKL puts it thus: *kimcit kutaścid (bhinnābhinnam)*.

¹SP points out that the mention of the relation between genus and particulars is indicative of the relation between (i) a whole and its parts, (ii) properties and what possesses them, and (iii) effects and causes.

²Again, SP explains: *kvacid bhinnābhinnatātyāge sarvatra tattyāgaḥ*. Possibly it means: cowness is associated with only some cows and not with some others. NKL remarks: *gotvaṁ svavyaktibhiḥ bhinnabhinnaṁ, āsvatvādy api tathā*.

³It literally means: the theory would be angry (this means 'violated').

न चापि सर्वसामान्यविशेषार्थावबुद्धये ।

कश्चिदप्यधिकार्यस्ति कृत्स्नेऽपि जगतीदृशः ॥९२॥

And there is not in the whole world a single such person¹ who is capable of (lit. eligible for) understanding all the things

having the natures of genus and particular.

[92]

The thought is here of knowing or worshipping (perhaps, meditating on) what are genus and particular. The view of *bhedābheda* would not lead any person to any certainty in respect of them (as shown above). This culminates into meaninglessness of his knowledge or worship.

न वेदार्थो न चापीदृक्कर्केणाप्युपपद्यते ।
भिन्नाभिन्नेक्षणं सर्वं यथोक्तन्यायवर्त्मना ॥९३॥

According to the explanation which we have thus far given, neither the entire view of *bhedābheda* of this kind nor the meaning of the Veda (according to it) can by any reason be taken as acceptable.

[93]

इति श्रीबृहदारण्यकोपनिषद्भाष्यवार्तिके प्रथमाध्यायस्य
षष्ठं ब्राह्मणम् ॥६॥

बृहदारण्यकोपनिषद्भाष्यवार्तिके प्रथमाध्यायः ॥१॥

BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA

2.1

Ajātaśatru Brāhmaṇa

तद्धेदमित्यविज्ञातप्रत्यक्तत्त्वादिदं जगत् ।
रज्ज्वां सर्पादिवज्जातं नामरूपक्रियात्मकम् ॥१॥

(In the words) *tad dhedam* ...¹ (is described) this world as having the nature of name, form and activity, since the truth (or, true nature) of the inner self has not been known—this (origin) is as (that of a) serpent etc.² (which seems to) become born from (lit. in, i.e. in the place of) a rope.³ [1]

This is a statement in an extremely brief form, of what was discussed in BU 1.4.

¹This has a reference to BU 1.4.7.

²The word etc. stands for other objects like a piece of silver, a double moon and such other objects which are seen (or perceived) in a misapprehension (or, superimposition, i.e. falsely conceived objects).

³It appears that, for the sake of metre, Sureśvara has used *rajyvām* in the place of *rajyvādaḥ* which was necessary (or required) in view of *sarpādi*.

अनिश्चिता यथा रज्जुरन्धकारे विकल्पिता ।
सर्पधारादिभिर्भावैस्तद्वदात्मा विकल्पितः ॥२॥

“As a rope, which is not determined (as such), is, in darkness, mistaken for (various) becomings, viz. a serpent or a stream (of water)—in the same way is the Ātman (variously) conceived.” [2]

This is *Gauḍapāḍakārikā* 2.17. It is adduced as an authoritative support for what is said in the preceding verse.

अनर्थहेतुरज्ञानं तदुत्थं चाखिलं जगत् ।
प्रतीचोऽनर्थ इत्यस्माद्वीतोऽत्यर्थं मुमुक्षति ॥३॥

The cause of the undesirable is ignorance¹ and the entire world is the product of that.² An individual³ intensely seeks to release himself (from it,⁴) since that is the undesirable for the inner self.⁵

[3]

¹Translation follows AnSS edition. NKL edition reads *anarthahetur ajñātaḥ* 'The cause of the undesirable is not known, (i.e. identified).' The use of the word 'undesirable' is to indicate the final opinion of the Vedānta on Avidyā.

²Literally, has arisen from that ignorance.

³Individual means a human being of the transmigratory world—in reality 'the product of Avidyā'.

⁴It can refer *either* to the undesirable effects of ignorance *or* to ignorance itself.

⁵The inner self refers to the sentience within an individual's body.

पुरुषार्थोऽखिलानर्थप्रध्वस्तिः प्रत्यगात्मनः ।
सम्यक्तत्त्वपरिज्ञानं पुरुषार्थस्य कारणम् ॥४॥

For the inner self,¹ the end of life² is the removal³ of all the undesirable; (indeed) the effective means⁴ to the end of one's life is the complete⁵ (*pari*) correct⁶ knowledge of the truth⁷ about it.

[4]

This states how every individual self is beset with the undesirable.

¹Here, it stands for an individual in the transmigratory world.

²Literally, the end of human life; the desired achievement of a human being.

³Literally, destruction. Yet, 'removal' means securing release from all evils of worldly life.

⁴*kāraṇam* could mean 'efficient cause'. Yet the words 'the effective means' are used for effectively removing every evil and thereby serving to effect the overall achievement of final release.

⁵The preposition *pari* is significant; it refers to the knowledge of the nature of the bondage for the inner self and its effects as well.

⁶*samyak* precludes the views of other non-Vedāntic thinkers.

⁷Truth stands for the true knowledge of everything which has appeared to have been associated with the inner self.

निरस्ताशेषानर्थाप्तकृत्स्नाह्लादसतत्त्वकः ।

स्वतो यतोऽयं संसारी तेनाज्ञो विपरीतदृक् ॥५॥

Since this transmigratory being is by its nature¹ of the nature of one that has obtained the entire delight after having dispelled away every undesirable (effect), therefore, the one who has not known (the true nature of it)² sees (all this)³ otherwise.⁴

[5]

This states why *tattvaparijñāna* in verse 4 secures the end of human life.

¹Or literally, by itself. That is to say: not made so by any other agency.

²This refers to the transmigratory being, though it finally signifies the inner self.

³'All this' means 'whatever is known as worldly thing or being'.

⁴This refers to the effect of Avidyā, i.e. the inner self which is taken to be an individual being, possessing various belongings and passing under different vicissitudes (i.e. phases) of life.

मोहमात्रान्तरायत्वात्पुरुषार्थस्य नापरम् ।

अविद्याध्वंसिनो बोधात्किञ्चित्साधनमिष्यते ॥६॥

Since, (securing) the end of human life has only ignorance¹

as its hindrance, therefore, there is not accepted (in Vedānta) any means other than knowledge² as the destroyer of ignorance. [6]

This verse sets aside the idea of any other means to *mokṣa*.

¹This verse uses both *moha* and *avidyā* as synonyms.

²This is *samyaktattvaparijñāna* of verse 4 above. The other means could be, according to SP, either *prasaṅkhyāna* (NKL: *dhīsamuccita karman*) or *karman* (NKL: *kevala karman*).

आत्मेत्येवेति विद्यायाः सूत्रमित्युदितं पुरा ।
उपोद्धातस्तथा तस्य प्रागुक्तः सप्रयोजनः ॥७॥

Earlier, there has been stated the principal thought¹ of the lore (of the Ātman)² in the words *ātmety eva ...*; so also (*tathā*) the introductory to it has been already (*prāk*) stated, together with its purpose.³ [7]

This brings out clearly the meaningfulness of BU 1.4.

¹*sūtram* is here the principal thought which is enunciated at BU 1.4.7.

²Here only 'lore' is referred to; it means Ātmavidyā or Brahavidyā—cf. verse 9 below.

³This appears to be understood from *tad etat padanīyam asya sarvasya yad ayam ātmā* in BU 1.4.7 up to *ātmā hy eṣāṃ sa bhavati* in BU 1.4.10. This long passage is described as the *prayojana* in SP thus: *ākṣepapūrvakaṃ prayojanaṃ tad āhur ityādāv uktam ity āha*. The reference seems to be to BUB 1.4.9.

प्रतीचि साक्षाद्विज्ञाते ज्ञेयं सर्वं समाप्यते ।
निःशेषतस्तमोऽवस्तेः पुमर्थश्च समाप्यते ॥८॥

When the inner self is directly¹ known, all that is to be known is obtained² (and thus), as the entire darkness³ is destroyed, the end of (a human being's) life is obtained. [8]

This stresses upon the purposefulness of *pratyaktattvavijñāna*.

¹This refers to one's experience or realisation (*anubhavāvagati*); cf. BSB *brahmāvagatir hi puruṣārthaḥ* (i.e. *mokṣaḥ*) (1.1.1, pp. 77-78).

²Here 'obtained' has the meaning of 'known'—(also elsewhere) the latter one means 'secured or got'.

³It stands metaphorically for ignorance which is referred to as *moha* and also as *Avidyā* in verse 6 above.

यत एवमतः पश्येदात्मन्यात्मानमद्वयम् ।
आत्मैको ब्रह्मविद्याया विषयः श्रुतितो मतः ॥९॥

Since this is so, therefore, one should see within one's self¹ the Ātman, which has no duality.² (Indeed), only the Ātman has been known from the Śruti as the object (i.e. the subject matter) of the lore of the Brahman.³ [9]

¹This refers to the inner self of one who is desirous of liberation. The Ātman here is, at least at the verbal level, different from the Ātman which is subsequently identified as the Brahman.

²To complete, add: (associated with it).

³This line accepts the worldly dealing (*vyavahāra*) of language, i.e. the knower-knowable relation understood from the use of words. This suggests the greatness of the Ātman (cf. SP: *svamahimapratiṣṭhatvārthaṁ viśinaṣṭi*).

अथ योऽन्यामिति तथाविद्यां चानूद्य नश्वरीम् ।
आध्यायावसितेः कार्यं तस्या व्याख्यातमञ्जसा ॥१०॥

Then, in the words *atha yo 'nyām ...*,¹ (the Upaniṣad or Śruti) first makes a statement² about the perishable³ ignorance and has, in the natural course,⁴ explained fully its⁵ effect up to the end of the Adhyāya.⁶ [10]

This explains *anarthahetu* understood in verse 3 above.

¹This refers to BU 1.4.10: *atha yo 'nyām devatām upāste ...*

na sa veda.

²*anūdyā* literally means 'having restated'. But here the reference is to the clear statement of/about Avidyā.

³It signifies the destructible nature of Avidyā.

⁴Literally, smoothly, or in a straight manner.

⁵This refers to Avidyā.

⁶That is, up to the end of BU 1.6 (i.e. first Adhyāya).

अध्यात्ममधिभूतं च तथा चैवाधिदैवतम् ।
 भूतं भवद्विष्यं च साध्यं साधनमेव च ।
 जनिमत्सर्वमेवेदमविद्यायाः समुत्थितम् ॥११॥
 संक्षिप्य चाप्युपन्यस्तमध्यायान्ते च तत्पुनः ॥१२॥
 त्रयं वा इदमित्येवं रूपं नाम च कर्म च ।
 त्रयस्यापि च संक्षेपो लिङ्गदेहात्मसंहतिः ॥१३॥
 त्रैलोक्यात्मशरीर्येष विश्वरूपः प्रजापतिः ।
 अन्तर्णीताखिलानन्तदेवतः प्राणविग्रहः ॥१४॥

What pertains to a body, what to the sphere of the elements, what again to the sphere of deities; what (belonged) to the past, what is of the present and what is going to be;¹ what is the means and also what the end(s); whatever has an origin²—all this, which has arisen from ignorance, [11] is indeed³ presented again at the end of that Adhyāya after giving it in brief. [12]

(And) thus in *trayam vā idam ...*⁴ the triad of form, name and action is stated in brief,⁵ a conglomeration of the subtle body and the Ātman. [13]

(That is to say: This is) Prajāpati, (later) assuming various (lit. all) forms, possessed of a body in the form of the triad of worlds⁶ and having a manifestation (lit. body) in Prāṇa⁷ with all the deities⁸ concealed within. [14]

This is a brief statement of the contents of the Saptāṇṇa Brāhmaṇa, i.e. BU 1.5 and 1.6. Verse 14 explains the contents of verse 12.

¹Or literally, what is becoming. *bhaviṣya* is for *bhaviṣyat*.

²Literally, what has a birth.

³*ca*, used twice in verse 12, stands for emphasis, conveyed only once by 'indeed'.

⁴Read BU 1.6.1: *trayaṃ vā idam ...*

⁵Read BU 1.6.3: *tad etat trayam ...* and this refers to the *kāryakāraṇasaṃghāta* (SP).

⁶This refers to the *kārya* as a whole, the embodied (subtle form, viz. the Sūtrātman).

⁷This refers to the sentience in a body.

⁸Reference is thus made to the organs and the deities superintending over them.

अविज्ञातात्मतत्त्वः संस्तदध्यस्ताभिमानवान् ।

पराक्प्रवृत्तेर्विरतो विद्याया विषयस्त्वयम् ॥१५॥

साक्षात्कृतात्मभावोऽयमेवंलक्षणवस्तुनि ।

श्रुत्योपस्थाप्यते गार्ग्यो ब्रह्मविद्याभिधित्सया ॥१६॥

This one (viz. Gārgya), being one who has not known the true nature of the Ātman, who has had the consciousness (or, ego) of being what is superimposed¹ on it (viz. the Ātman) and who has become averse to action (prescribed by religion), is the person eligible (*viṣaya*)² for the instruction (about the Ātman, i.e. the Brahman). [15]

He has directly understood the Ātman in the thing, which has such nature³ (and therefore) he, Gārgya, is presented by the Śruti (as the *viṣaya*) with the desire to state⁴ the instruction about the Brahman. [16]

This refers to the purpose of the narrative in BU 2.1.

¹This refers to the *lingadehātmasaṃhati* of verse 13 above (which is clarified further) and the consequent misapprehension about the nature of the Ātman.

²*viṣaya* is for *adhikārin*, one of the four Anubandhas of the discussion.

³This refers to verse 14 above.

⁴That is, to expound.

अकृत्स्नब्रह्मवेदित्वाद्दृप्तोऽसावल्पकस्ततः ।
न हि पूर्णपरिज्ञानः कश्चिद्दृष्यति निर्द्वयः ॥१७॥

Since he had not known about the Brahman in its fullness, he was therefore very proud and of less importance.¹ Indeed, one, who possesses complete knowledge (of the Brahman),² is never proud—the one who does not have (any consciousness or awareness of) duality.³ [17]

This explains how Gārgya Ajātaśatru is considered as eligible for receiving instruction regarding the Brahman.

¹This refers to the eligibility of Gārgya as a pupil, i.e. his inferior status as compared to that of Kāśya.

²Refer to verse 4 above.

³Literally, one who has got over (viz. discarded) the notion of duality.

समाप्ताशेषविज्ञेयपुरुषार्थस्तथा परः ।
अजातशत्रुरैकात्म्याद्गार्ग्याचार्यः प्रकल्पते ॥१८॥

So also, the other one, who has obtained¹ (the knowledge of) the entire knowable, which is the (ultimate) end of life, viz. Ajātaśatru can be the preceptor of Gārgya, owing to his (having realised) the singleness of the Ātman. [18]

This answers away the doubt about the non-eligibility of Gārgya for being the preceptor.

¹Namely, known or acquired (the full knowledge of the Ātman).

व्याख्यातायामविद्यायां तदुच्छिन्नावथाधुना ।
आत्मेत्येवेति सूत्रस्य व्याख्या प्रस्तूयते स्फुटा ॥१९॥
श्रुत्या गार्ग्याद्युपन्यासशिष्याचार्यस्वरूपया ।
सुखावबोधसिद्धयर्थमियमाख्यायिकोदिता ॥२०॥

(Thus) when ignorance has been (fully) explained (in the earlier Adhyāya), there is now introduced a clear exposition of the enunciation *ātmety evopāsīta* in order that it (i.e. ignorance) is removed (lit. destroyed). [19]

The Śruti has stated the narrative which has in the introductory (part) a pupil in the form of Gārgya and the preceptor (in the form of Ajātaśatru), for the purpose that an easy understanding (of the lore of the Brahman) is secured. [20]

According to SP, these two verses have the purpose of showing how the narrative in BU 2.1 is fruitful; read SP: *asaṁdigdhā-bādhita-phalavajjñānodayāya*.

Now follows in verses 21-28 the statement of *Bhartṛprapañca* regarding the connection between BU first Adhyāya and BU 2.1 and also the refutation thereof.

अन्ये त्वत्राभिसंबन्धमेवं व्याचक्षते बुधाः ।
 स एष इत्यपन्यस्तो विज्ञानात्मा हि यः पुरा ॥२१॥
 गार्ग्यकार्येतिहासेन वक्ष्यते तस्य निर्णयः ।
 कर्त्र्यो भोक्त्र्यश्च देहेऽस्मिन्देवता एव नापरः ।
 श्रुतिर्गार्ग्यात्मना सेयं पूर्वपक्षमभाषत ॥२२॥
 आत्मनोऽस्ति त्वकर्तृत्वभोक्तृत्वप्रतिपत्तये ॥२३॥

The other learned (scholars),¹ however, expound the connection here (i.e. of BU 2.1 to the earlier portion of BU) thus: The knowing inner self (*viññānātman*) which was introduced (in the discussion) earlier, in the words *sa eṣa...*² [21]

has its decision³ stated in the narrative of Gārgya and Kāśya; that is: In this body, the agents (of actions etc.) and the enjoyers are the deities (and it is stated later:⁴) 'not any other'⁵ — thus has the Śruti stated the *prima facie* view in the form (of the words) of Gārgya. [22]

(This, the Śruti has done) for establishing the existence of the Ātman (and) its capacity to do activities and to enjoy

(the fruits thereof).

[23]

¹This use of the plural is possibly in mock respect for Bhartṛprapañca.

²Read *sa eṣa iha praviṣṭaḥ* in BU 1.4.7.

³This is literal translation; it stands for 'fuller and clear explanation'.

⁴Read SP: *aparaśabdād ūrdhvam iti padam adhyāhṛtya pūrvapakṣapadena yojanīyam*. SP adds further (possibly a statement in the commentary of Bhartṛprapañca): *yathāhulī bhoktryaś ca devatāḥ karaṇādhiṣṭhātryaś ca kim anyad vijñānātmanā kāryam asty etasmin darśane sthito gārgyaḥ pūrvapakṣaparigrahāyotthāpyata iti*.

⁵Namely, the Ātman. This is stated with the purpose of averting a doubt about the uselessness of the decision, for already the thought of the *vijñānātman* is clear (NKL).

श्रुत्या सिद्धान्तसिद्धयर्थं काश्यरूपं प्रकल्पितम् ।

निष्फलत्वात्स चायुक्तः प्रकृतानभिसंगतेः ॥२४॥

Then, for proving the Siddhānta, the Śruti has thought of (or, presented) the part of Kāśya. And¹ that (connection) is opposed to reason,² for it does not serve any purpose³ and is not (properly) connected with what has been undertaken (or, begun).⁴ [24]

¹In verse 24cd begins the refutation of Bhartṛprapañca's view.

²The particle *nañ* has the sense of opposition—not the sense of negation.

³That is to say: The Ātman does not have any need to perform any action for an enjoyment or towards an end.

⁴The main purpose of the Śruti is to establish only the singleness of the Ātman—cf. BU 1.4.10: *tad ātmānam evāvet*—and its not having any purpose to achieve. As such, the idea of *karṭṛtva* and *bhokṭṛtva* of the Ātman which Bhartṛprapañca posits, is purposeless (read SP: *na hi jīvasya vāstave karṭṛtvādau*

tatsiddhiḥ— where *tat* refers to *ātmakarṭṛtvādi*). This is clarified in the next verse.

देवतास्तित्वपक्षेऽपि किमस्तित्वादि नेष्यते ।
देहाद्विन्नस्य विज्ञातुरिष्टं चेन्निष्फलः श्रमः ॥२५॥

(One might ask:) “Why not accept the existence etc.¹ (of the Ātman, apart from the gross body) even after accepting the existence (etc.)¹ of the deities (as proposed)?²” (In answer, it is said:) If you thus desire to accept (the existence etc. of) the knower (i.e. *viññātr*) apart from the body, then that effort (to seek to prove that desired end) is purposeless (lit. fruitless).³

[25]

¹The word etc. stands for *karṭṛtva* and *bhokṭṛtva*.

²Cf. verse 22cd above.

³There is thus stated by Sureśvara his view (as opposed to that of Bhartṛprapañca) is free from any blemish. This is clarified in the following two and a half verses.

अज्ञातैकात्म्ययाथात्म्यो यदा त्विह विवक्ष्यते ।
अविद्याकार्यनिष्ठः सञ्श्रुत्या गार्ग्यशरीरया ॥२६॥
पूर्वपक्षितयाशेषदुःखहेतूपशान्तये ।
पूर्वपक्षनिदानच्छिन्नाशयः सिद्धान्तवाद्यपि ॥२७॥
श्रुत्येहोत्थाप्यतेऽशेषवेदान्तार्थावबुद्धये ।
सर्वोऽप्येष तदा यत्नः फलवान्स्यान्न चान्यथा ॥२८॥
श्रद्धाचारादिविध्यर्था यदि वाख्यायिका त्वियम् ।

When (i.e. as against Bhartṛprapañca's view) it is taken that the intention of the Śruti referring to Gārgya,¹ a person given to activities proceeding from ignorance, [26]
as the holder of the *prima facie* view; and, so also, Kāśya as the exponent of the Siddhānta, as the remover (lit. destroyer) of the decision² of the holder of the *prima facie* view, [27]
is mentioned the Śruti so that one knows the entire (or,

complete) meaning of the Vedānta (i.e. Upaniṣad), only then,³ all this effort (of the Śruti) would become meaningful (lit. fruitful), not otherwise. [28]

Or perhaps,⁴ this narrative is introduced for the purpose of laying down an injunction regarding faith and (proper) conduct (of a person) etc.⁵ [29ab]

¹*gārgyaśarīrā śruti* literally means: the Śruti text in the form of (the statement about) Gārgya.

²*nidāna* is taken here for resorting to ignorance which leads to Upāsanās as the *upāya* for *tattvajñāna*.

³That is, in the opinion of the Siddhāntin, viz. Sureśvara's explanation.

⁴Earlier, Sureśvara has clarified the purpose of the narrative in BU 2.1.1ff. and here he states yet another purpose of the same.

⁵'Faith' refers to the proper attitude towards the lore of the Brahman and 'conduct' refers to one's proper method of attaining the same; and *ādi* 'etc.' refers to not resorting to mere reasoning about the Brahman—this last stressing the need of realising the same, cf. *naiṣā tarkeṇa matir āpaneyā* (*Kāthopaniṣad* 1.2.9).

Now follows the exposition of BU 2.1.1 in verses 29-43.

यथोक्तदर्शनाप्तार्थो नान्यदस्तीति भावितः ।

अतोऽतिदृष्टोऽविज्ञातदर्पकारणघस्मरः ॥२९॥

(Gārgya), who (thought, he had) obtained the (true) knowledge (of the Brahman in the three foods) as stated before,¹ came to hold that there (the Brahman) was not other (than himself) and therefore he was very proud and was the destroyer of the cause of the pride which was not known to him. [29c-f]

¹This is in accordance with SP. The meaning is: Prāṇa is known by the names Virāj, Vaiśvānara, Prajāpati, Hiraṇyagarbha and Vijñānātman. This one deity obtains in the other deities

which superintend over the various other organs of the gross body. Therefore, it is the Brahman which is in reality the agent of all actions and the enjoyer of the fruits of the same.

श्रद्धालुं वित्तसंपन्नं श्रेयोऽर्थिनमुपेत्य तु ।
ब्रह्म तेऽहं ब्रवाणीति गार्ग्यः काश्यमभाषत ॥३०॥

Approaching Kāśya,¹ who already² had a faith (in the lore of the Brahman), had obtained the knowledge (of it),³ and was desirous of bliss, Gārgya, said to him, 'Let me tell you (about) the Brahman.' [30]

¹The adjectives of Kāśya are really of one who deserves to impart the instruction about the Brahman.

²This is for *tu*. But SP states: *yogyam adhikāriṇam prati praśnam antareṇāpi prativacanam ucitam iti vaksyamāṇārthasūcanārthas tuśabdah*.

³*vitta* is derived (in this context) from the verb root *vid* 'to know'.

न जातो न भविष्योऽस्ति शत्रुरैकात्म्यदर्शनात् ।
अजातशत्रुः काश्योऽतो गार्ग्यबुद्धिविरुद्धधीः ॥३१॥

Since there was not born, nor would there be (born)¹ and nor is there any enemy (for him), Kāśya, on account of his knowing (lit. seeing) the singleness of the Ātman, was (known as) Ajātaśatru;² therefore, he had an attitude (or faith) which was opposed to (that of) Gārgya. [31]

¹*bhaviṣyaḥ* is for *bhaviṣyan*.

²This is an illustration of the Brāhmaṇical etymology which serves a meaningful purpose.

ब्रह्म यस्मात्परं नास्ति न च वस्त्वन्तरं यतः ।
ब्रवाण्युपास्यं तत्तेऽहं सर्वापध्वस्तिकारणम् ॥३२॥

Since the Brahman is that beyond (or besides) which there is (nothing)¹ and there is no other thing (than that in existence), therefore, let me tell you that which is to be worshipped and that which is the cause of the destruction of all (notions about other things).² [32]

¹This has a basis in the Śruti statement: *yasmāt param nāparam asti kiñcit* (Śvetāśvataropaniṣad 3.9).

²This refers to the result of Brahmajñāna.

नापृष्ट इति नन्वेतद्विरुद्धमकरोदृषिः ।
यद्ब्रह्म ते ब्रवाणीति ह्यपृष्टः काश्यमब्रवीत् ॥३३॥

(One would object:) 'Indeed, the sage did what is opposed to (the instruction of the Smṛti) *nāpṛṣṭaḥ* ...,¹ since he said to Kāśya "Let me tell you about the Brahman," though indeed not asked by him.' [33]

This emphasises the sage's conduct in opposition to the acknowledged religious precept.

¹This has a reference to *Manusmṛti* 2.110:

*nāpṛṣṭaḥ kasyacid brūyān na cānyāyena pṛcchataḥ /
jānann api hi medhāvī jaḍaval loka ācaret //*

दर्पादिदर्शनान्नूनं वेत्त्यकृत्स्नात्मदर्शनम् ।
कृत्स्नत्वार्थमतोऽप्राक्षीत्काश्यं प्रज्ञासमन्वितम् ॥३४॥

(The objection is answered away thus:) 'Indeed, (the sage now) knew himself as having imperfect knowledge of the Ātman (within himself),¹ as has evidence in his pride etc.² Therefore, for securing fullness (of that knowledge), he asked³ Kāśya who was possessed of intellect.'⁴ [34]

¹'Of the Ātman' means 'about the nature of the Ātman'.

²Translation follows SP which states *akṛtsnātmadarśanam svātmānam* (gārgyo vettīti śeṣaḥ)— thus the word *akṛtsnātma-*

darśanam is taken as an adjective of Gārgya. NKL however states *akṛtsnātmadarśanam svam* and that means 'his own incomplete knowledge about the Ātman'—here, *svam* is a qualifier of the noun *akṛtsnātmadarśanam*, a substantive. (This is more likely despite our following SP.)

The word etc. refers to Gārgya's desire to secure full knowledge from Kāśya (i.e. he has *arthitva*) etc. (so SP—does it refer to his affliction on account of his ignorance?); or, better refer to the next verse.

³*aprākṣīt* is a paraphrase of *brāvāṇi* from the verb root *bru* in the sense of 'to ask'—this, in accordance with the well-known acceptance of *dhātūnām anekārthatva*. Read NKL yet: *bravāṇi ity asya prcchāmi ity arthe prayogād (=lakṣaṇayā ?) avirodhaḥ*.

⁴This does not refer to *buddhīndriya*, it refers to his right knowledge.

श्रद्धालरधिकारी यो जिज्ञासविनयान्वितः ।

अपृष्टैनापि वक्तव्या तस्मै विद्या विपरिचिता ॥३५॥

'(A person), who has faith (in some preceptor) and is possessed of modesty, is eligible (to receive instruction).¹ To such a person instruction is to be imparted (lit. told) by a wise person,² even if he is not requested (lit. asked) by another.'³

[35]

This is to justify Gārgya's doing which can be considered as conforming to the teaching of the Smṛti.

¹These adjectives are significant for pointing out how Gārgya is a proper recipient of the lore of the Brahman. Also, they justify the word *ādi* (in *dārpādi* in the preceding verse). Also read in this context SP's quotations from *Manusmṛti* 2.111 and 114 which prove, by the method of *Vyatireka*, the propriety of these adjectives:

adharmena tu yaḥ prāha yaś cādharmena prcchati /

tayor anyataṛaḥ praiti vidveṣaṃ ca nigacchati //

(The text of *Manusmṛti* however reads ... *vidveṣaṃ vādhi-*

gacchati) and

*vidyā brāhmaṇam ety āha śevadhis te 'smi rakṣa mām /
asūyakāya mām mā dās tathā syāṃ vīryavattamā //*

धर्मार्थौ यत्र न स्यातां शुश्रूषा वापि तद्विधा ।
तत्र विद्या न वक्तव्या शुभं बीजमिवोषरे ॥३६॥
धर्मार्थौ यत्र च स्यातां शुश्रूषा वापि तद्विधा ।
वक्तव्या तत्र विद्येति निषेधादेव लिङ्ग्यते ॥३७॥

That kind¹ of instruction should not be imparted² to him in whom there is no (inclination to the pursuit of) Dharma and Artha, or even a desire to receive (lit. to hear) it; even as a good (lit. auspicious)³ seed (should not be sown) in a barren land. [36]

From the prohibition (by the use of the particle *na*) it is indicated that this kind of instruction should be imparted to him in whom there is (inclination to the pursuit of) Dharma and Artha or even a desire to receive (lit. to hear) it. [37]

These two verses justify the contents of verses 34-35 by the statements involving Anvaya and Vyatireka.

¹*tadvidhā* is paraphrased by SP as *deśakālasāmarthyānurodhinī*.

²This is in conformity with the AnSS and NKL editions. However, *Manusmṛti* uses *vaptavyā* in place of *vaktavyā*— and that is warranted by the simile.

³The word 'auspicious' has the power to convey 'bliss' which attends upon a knower of the lore of the Brahman.

नष्टाश्वदग्धरथवनन्यायं चाश्रित्य भूमिपम् ।
प्राह मानुषवित्ताढ्यं दैववित्तसमन्वितम् ॥३८॥

(Gārgya) replied to the king, in the way (of the maxim) of two persons one of whom has lost the horses and the other (having) burnt a chariot,¹ asking him who was possessed of the human wealth together with the divine wealth.² [38]

This is to justify why Gārgya approached the king, a Kṣatriya. This is one more reason for Gārgya's doing.

¹Read the quotation in SP (possibly from the commentary of Bharṭṛprapañca): *yathāhuḥ— yuktaḥ saṃyogo 'dhikārārthena hetunā naṣṭāśvadagdharathavad iti.*

²Refer to BU 1.4.17.

वित्तद्वयेन संपन्नो यतोऽधिक्रियते नरः ।

सर्वकर्मस्वतोऽवादीद्वालाकिः काश्यमन्तिकात् ॥३९॥

Since a person, possessed of the two kinds of wealth (mentioned above), is stated to be eligible (for the performance) of all (kinds of religious) activities, therefore did the scion of Balāka speak in the presence (lit. nearness) of Kāśya.¹ [39]

¹This is justified by a quotation in SP (again from Bharṭṛprapañca, in all probability): *yathāhuḥ— ubhayavittavato 'sya hy adhikāras tasmād adhikārārthena hetunā yuktam upetya vacanam iti.*

This is the meaning of sahasram etasyām ... in BU 2.1.1.

ब्रह्म तुभ्यं ब्रवाणीतिवाङ्मात्रव्यापृतावहम् ।

गोसहस्रं ददाम्यद्य विनाप्यैकात्म्यनिर्णयात् ॥४०॥

Only on (Gārgya's) uttering the words, 'Let me tell you about the Brahman', (Kāśya said,) 'I shall grant you a thousand cows',—this, even without (his, i.e. the former's) decision regarding the singleness of the Ātman. [40]

This is the purport of janako janakah:

गोसहस्रप्रदानस्य निमित्तं श्रुतिरभ्यधात् ।

जनको जनक इति नामाभ्यासोक्तितः स्फुटम् ॥४१॥

शुश्रूषुं जनकं सर्वे जना दित्सन्तमेव च ।
विवक्षवोऽभिधावन्ति तमुद्दिश्य जिघृक्षवः ॥४२॥

The Śruti has stated the reason for the grant of a thousand cows; (this is) clear from the repeated mention of the name (in the words) *janako janakaḥ*. [41]

All the people, who wish to tell (what they have known), rush unto Janaka, who is desirous of hearing them and also wishing to grant them (gifts of cows etc.), with a desire to accept (lit. receive) the same (from him). [42]

मौढीं प्रसिद्धिमुल्लङ्घ्य गार्ग्योऽयं मामुपागतः ।
नूनं दित्सुं च शुश्रूषुं संभावयति मामपि ॥४३॥

This Gārgya has overlooked the (custom) well-known (even) among the non-learned (or, foolish)¹ and approached me who am indeed, he thinks, desirous of giving (gifts) and of receiving (lit. hearing from him what he wishes to instruct).² [43]

¹This alternative follows the reading *maudhīm* in NKL edition. AnSS reads *maugdhīm* which leads to the translation: the (belief) known among the ignorant, of course, with little difference.

²SP brings out the purport of this thus: *tadīyaṃ vānimātram eva nimittīkr̥tya gosahasradānam ucitam iti bhāvaḥ*.

Now follows the exposition of BU 2.1.2.

आदित्यचक्षुर्बुद्धिस्थश्चेतनः सर्वगो ध्रुवः ।
एतमेव सदोपासे ब्रह्मेति रविमध्यगम् ॥४४॥

The sun, residing in the eye (and) intellect, the sentient one, the one invariably (*dhruvaḥ*)¹ existing in all—this one do I ever worship as the Brahman abiding in the sun.² [44]

This verse explains the meaning(s) of *ya evāsau ...* and (SP adds:) *tvam api yathoktam brahmopāsveti śeṣaḥ*.

Sureśvara's mention of *cakṣus* and *buddhi* is prompted by BUB *ya evāsāv āditye cakṣuṣi caiko 'bhimānī cakṣurdvāreṇha hr̥di praviṣṭo 'ham bhoktā kartā cety avasthitaḥ*. Reference to *cakṣus* and *buddhi* is to the sense-organ (*indriya*) which is the bodily (*adhyātma*) support for Āditya.

¹It should be translated literally as 'the ever abiding, or the unchanged (among all)'.

²*ravimadhyaga* is *prādhānyān nirdeśaḥ*, i.e. as the chief among the objects of worship.

तथा ब्रुवाणं तं गार्ग्यं काश्यो मा मेत्यथोचिवान् ।
केवलो मतिसंवादो भवदुक्तेर्ममाभवत् ॥४५॥
न त्वपर्वार्थविज्ञानं प्रतिज्ञातं यथा त्वया ।
मा वोचोऽतो यतो वेद्मि विनापि वचनात्तव ॥४६॥

To Gārgya, who was thus telling,¹ Kāśya said, 'Do not, (indeed) do not (tell me this);² (for), from your speech, there has been for me only a confirmation of my thought [45] and (*tu*) not any not-before-known³ knowledge as you had promised (to bring to me). Therefore, do not tell (that which) I have (already) known even without your telling.'⁴ [46]

¹'Telling' is for 'speaking about'.

²Alternatively, 'Do not tell me', where one *mā* can be taken for *mām*. But it is better to understand the *vīpsā* 'repetition' of the prohibitive particle *mā*; cf. verse 47 below.

³What Gārgya should have told (i.e. declared or imparted as instruction) should have been *ajñātārthajñāpana*.

⁴But it is already known to Kāśya (*jñātapiūrva*). See the next verse.

निषेधाभ्यासो मा मेति ज्ञातब्रह्मप्रवादिनः ।
आबाधितधि(?) भि)याभ्यस्तो गार्ग्यस्यानुवितकारणात् ॥४७॥

The repetition of the prohibition by the particle, viz. *mā mā* (lit. prohibition) by the instructor (of the lore) of the Brahman,

who had already known (it), is owing to his fear that it would become stultified¹ on account of the non-statement (about the Brahman) by Gārgya. [47]

¹Here *ābādhitabhī* is accepted for *ābādhitadhī*; yet *ā* in the sense of *īṣat* which is proposed by SP need not be taken seriously.

सुप्रसिद्धं यदस्माकं त्वच्छासनमृतेऽपि तत् ।
नापेक्षते भवद्वाक्यं सिद्धयर्थं प्राक्प्रसिद्धितः ॥४८॥

'That, which has been well known to me even in the absence of (i.e. without) any instruction by you, does not expect (i.e. depend upon) your statement (i.e. saying about it), for establishing (or, imparting) it, since it is already established (for me, i.e. known to me).' [48]

तदुपासां न वेद्मीति मा च शङ्कां कृथा यतः ।
उपासनं च वेद्म्यस्य गुणं तत्फलमेव च ॥४९॥

'Do not also entertain any doubt that I do not know about the worship of that (viz. the Brahman), since I have (already) known about its worship, its¹ excellence and also the result thereof.'² [49]

¹That is, of that worship.

²SP adds here *atiṣṭhāḥ sarveṣāṃ ityādir avatārayati* as introductory to this verse. Actually, that should properly be the introduction of the following two verses.

अतीत्य सर्वभूतानि प्राधान्येन स्थितो यतः ॥५०॥
अतिष्ठा इति नामास्य तेनादित्यात्मनोऽभवत् ।
चक्षुरुद्दीप्तिमत्वाच्च राजेत्येषोऽभिधीयते ॥५१॥

Since this (Brahman Ātman) has remained principally (i.e. as the principal) among them, having surpassed (or, been superior to) all the elements, [50]

therefore, the name of this one, viz. the Ātman of the nature of Āditya 'sun', has been Atiṣṭhā; and also this one is called Rājan 'the king' owing to the eye's possessing extraordinary (ud-) lustre.¹ [51]

These two verses explain the significance of the name Atiṣṭhā—i.e. (i) excelling the elements and (ii) possessing the highest lustre.

¹Translation follows the reading in AnSS edition. NKL edition reads in the text *cakṣurmuddīptimattvāt* (v.l. in AnSS edition) while NKL properly reads *cakṣurmudī[di]ti*, i.e. it is *cakṣurmut* 'dazzling the eye, (i.e. stealing the power of the eye), *dīptimattvāt* 'on account of its possessing lustre'. (Or, causing delight to the eye, if *-mud* is accepted.)

स य एतं यथोद्दिष्टमुपास्तेऽहर्निशं नरः ।
यथोपासनमेवास्य फलं भवति नान्यथा ॥५२॥

He, who day and night worships this one, as described here, has for himself only that fruit (as described) to be in consonance with (*yathā*) the worship (which he has offered), not otherwise. [52]

This explains the words in the BU sentence *sa ya etam*

Now follows the exposition of BU 2.1.3.

मतिसंवाददोषेण काश्येनोत्सारिते रवौ ।
गाग्यो ब्रह्मान्तरं राज्ञे प्रवक्तुमुपचक्रमे ॥५३॥

After (the notion of the Brahman) in respect of the sun¹ was rejected by Kāśya through (the fault of) its (merely) conforming to his (already known) thought, Gārgya proceeded to tell the king (about) another (form of the) Brahman. [53]

This is the purport of *sa hovāca ... candre puruṣaḥ*

चन्द्रे मनसि बुद्धौ च ब्रह्मोपासेऽहमद्वयम् ।
 भानुमण्डलतो यस्माद्विगुणं चन्द्रमण्डलम् ।
 बृहन्निति ततश्चन्द्रः प्रमाणेनाभिधीयते ॥५४॥

(He said,) 'I worship the Brahman, which does not have duality (in it), in the moon, the *manas*¹ and the intellect; (and) since the orb of the moon is (of a size) double (that) of the orb of the sun; therefore is the moon called Br̥hat,² in accordance with the magnitude³ (of its size). [54]

Sureśvara's mention of *manasi buddhau ca* is prompted by BUB: *ya evāsau candre manasi caikaḥ bhoktā kartā ceti pūrvavad viśeṣaṇam* (cf. under verse 44 above). Here, *manas* and *buddhi* are the insentient support for Candra.

¹The word *manas* is retained in the translation, though usually they translate it as 'mind'. The two words have different imports, the first does not show any trace of sentience associated with it whereas the latter is (certainly) associated with it.

²This is to point out the significance of the address Br̥hat (nominative form *br̥han*) an adjective of the moon-Brahman.

³The reference to this magnitude is known from *Brahmāṇḍa Purāṇa* 1.24.99cd-100 (SP states the text:)

navayojanasāhasro viṣkambhaḥ savituh smṛtaḥ //
dvigūṇas tasya vistāro maṇḍalasya pramāṇataḥ //
dvigūṇaḥ sūryavistārād vistāraḥ śaśinaḥ smṛtaḥ //

अम्भोऽतिपाण्डरं वासो यस्माच्चन्द्राभिमानिनः ।
 तस्मात्पाण्डरवासाः स्यात्सोमः सौम्यत्वकारणात् ॥५५॥
 ज्योत्स्नया राजतेऽत्यर्थं सोमो ब्राह्मणराजतः ।
 सोमो राजेत्यतो वक्ति तदुपासाविधित्सया ॥५६॥

Since the garment of the one who identifies¹ himself with the moon is extremely pellucid (lit. clear-white) water, therefore that one is² described as one clad in white; (also that one is) called Soma for the reason of being (very) mild (gentle).

[55]

Thanks to *jyotsnā* , Soma shines exceedingly and, therefore, on account of silver(-like brightness of a) Brāhmaṇa, (the Śruti) describes it thus: (viz.) Soma (is) the king³—this, with a desire to prescribe the worship of that.⁴

[56]

This explains the words in the BU: *pāṇḍaravāsāḥ somo rājā* which describe the moon-Brahman.

¹This word gives the meaning of the literal expression 'having the awareness of being (the moon)'.

²*syāt* is taken for *asti*, according to the Vedic usage.

³Refer to *somo rājā* ... thus twice in this Brāhmaṇa and cf. BU 6.2.14; CU 5.4.2, 5.10.4; *Kauṣītakyupaniṣad* 4.3; *Jaiminīyopaniṣad* 3.21.2.

⁴The last clause states the result (lit. fruit) of the worship of the moon having the four significant names (i.e. adjectives): *br̥hat*, *pāṇḍaravāsas*, *soma* and *rājan*.

तुल्याभिधानधर्मत्वाल्लता सोमोऽपि गृह्यते ।
उभयोर्देवतैकत्वादुपास्यं तेन तद्द्वयम् ॥५७॥

A creeper (called Soma, i.e. Soma plant) also is taken as Soma (i.e. moon),¹ on account of their having properties² (which are) of the same description and, therefore, since both have (but) one deity (to superintend over them), the two of them are to be worshipped,³ (only as one deity). [57]

This states another meaning of the word Soma, viz. a plant of that name; this is beside the 'moon'.

¹NKL reads thus: *latāsome 'pi hr̥savṛddhyākhyo dharmo 'pi vidyate dvitripatrādirūpeṇa vṛddhēr ity arthaḥ*.

²SP clarifies these as *vṛddhi* 'waxing in size or fattening' and *hr̥sa* 'waning in size or withering away'. NKL points out that, in the case of the creeper-(moon) the appearance of one leaf, a second leaf and a third and so on go to show the *vṛddhi*.

³SP adds: *prāṇātmanaikīkṛtya* 'having identified (each) with

Prāṇa (i.e. the vital force) in the body'.

एषैका देवता विभ्वी प्रत्येकार्थावसायिनी ।
भोक्त्री कर्त्री च सर्वत्र तस्य भोज्यमतोऽपरम् ॥५८॥

This (viz. the moon) is the only one deity, which is (all-)pervading and accomplishes¹ the purpose of each (of the two); so also, it is the enjoyer and the agent everywhere² and everything else is therefore the object of (its) enjoyment. [58]

This verse explains the nature of the deity of Soma in each of its senses.

¹That is, the deity, i.e. the moon, secures the purpose of each (of the orb of the moon and the plant).

²That is, in all the cases relevant upon each sense of Soma.

ब्रह्मैषा सर्वसंव्याप्तेरात्मेत्येतामुपास्महे ।

This (deity)¹ is the Brahman, since it encompasses (or, pervades) all—we worship this one as the Ātman. [59ab]

This points out that Prāṇa (i.e. the vital force) has to be taken as the Ātman—the Brahman which cannot be *bhojya*, viz. that which consists in food.

¹*devatā* is implied by *eṣā*.

Verses 59cd and 60 point to the general meaning of the various alternative notions of Gārgya about the Brahman (in *paryāya* 3 onwards).

व्याख्या तुल्यैव विज्ञेया सर्ववाक्येषु पूर्ववत् ॥५९॥
गुणो यत्र हि यः पुंसो नाम्ना संभाव्यतेऽत्र तु ।
फलं तदेव तस्य स्यात्सर्ववाक्येषु निर्णयः ॥६०॥

In all the (remaining) sentences (i.e. *paryāyas* of Gārgya about

the Brahman), one should know that the explanation (of each) is similar to what is given before (i.e. in respect of the first two *paryāyas*). [59cd]

And (tu) here (i.e. in respect of each) what(ever) property be understood (or, considered as possible) in whichever (of the *paryāyas*) is itself the result (lit. fruit) of that¹—this is² the decision in respect of all the sentences. [60]

¹This refers to the worship meant in respect of the so-called Brahman, possessed of that property.

²*syāt* is to be taken as *asti*.

BU 2.1.4 is now under reference.

This verse explains the significance of the third paryāya, viz. vidyut.

भानुचन्द्रमसोस्तेजो जलदैरभिभयते ।
विद्युत्तत्राप्यतितरां तेजस्वी तेन विद्युति ॥६१॥

The lustre of (each of) the sun and the moon is overpowered (i.e. covered or concealed) by the clouds;¹ but there (i.e. in the clouds) lightning (shines) exceedingly;² therefore, the lustrous (*puruṣa*) in lightning (is to be worshipped).³ [61]

¹This brings out the lustre in the sun and/or the moon (and, for that matter, in fire, viz. Agni, as the editor of NKL points out in his note; also read SP: *agner api kadācid udbhūtam abhibhūtam ca tejo lakṣyate tatrāpi jaladeṣu satsv apīti yāvat*) is less bright than that of lightning.

²Supply *tejasvinī* (about *vidyut*) after *atitarām*.

³*tejasvī* entails the words *dhyeyaḥ puruṣaḥ*.

BU 2.1.5 is under reference.

This verse refers to the fourth paryāya, viz. ākāśa.

खण्डशो न यथा मूर्तं खं पूर्णं चाप्रवर्तनात् ।

अप्रवर्त्यक्रियावत्स्युर्व्योम्नि सर्वाः प्रवृत्तयः ॥६२॥

The sky is, in its parts,¹ *mūrta* 'having a form', whereas it (is) complete (or whole),² for it is non-moving;³ for it cannot be moved (by any one) and therefore there cannot be any activity produced in or by it. Yet all activities are (said to be) of the sky.⁴ [62]

This verse explains how the sky is called *pūrṇa* and *apravarti*.

¹*khaṇḍaśaḥ* implies the various parts imagined of the sky as in *ghaṭākāśa*, *karakākāśa* etc.

²This refers to the real partlessness of the sky.

³Translation takes *apravarti* as *acala*. Yet, it can be taken alternatively as *apravartaka* 'not setting anyone/anything to any activity'.

⁴This is Sureśvara's alternative explanation of the word *apravarti*. No activity can be produced in the sky, nor can it be the support (viz. *adhikaraṇa*) of any activity. Any activity, which is said to be 'in the sky' is only imaginary. (Cf. SP: *vyomni hi sarvāḥ pravṛttayaḥ santi na svayaṁ kriyā tadvad vā tasmād apravartīty arthaḥ*. Yet NKL: *svayaṁ na kriyā[vat] kriyāvatām adhikaraṇam ity apravartīty arthaḥ*.)

Verses 63-65 speak of the fifth paryāya, viz. *Vāyu*.
BU 2.1.6 is under reference.

जिष्णुः स्याज्जयशीलत्वाज्जीयते न परैर्यतः ।
अपराजिष्णुरित्येवं तस्मादेवाभिधीयते ॥६३॥
अन्यतो मातृतो जाता अन्यतस्त्या उदाहृताः ।
अप्यन्यतस्त्यजायी स्यात्सापत्नभ्रातृमर्दनः ॥६४॥

(*Vāyu*) is¹ (described) as the conquerer, since it has the character (or, capacity) of (ever) conquering and since it is not conquered by others (or any enemies/opponents); therefore, it is invincible (lit. not-to-be-conquered)—so is it thus said.

anyatastyas are said to be those who are born of another, i.e. of another mother. And (*api*) one who is born of another would be the killer (or, tormentor) of them who are his brothers, viz. those born of the same (mother). [64]

These verses explain the significance of the three adjectives of Vāyu, viz. *jiṣṇu*, *aparājiṣṇu* and *anyatastyajāyin*. There is then a threefold result for its worshipper which is implied. The editor of NKL subjoins a note: *kramena ekaikaguṇopāśanasya ekaikaṃ phalam bodhyam*.

¹*syāt* is for *asti*.

जिष्णुरिन्द्रगुणोपास्तेवैकुण्ठगुणतः परः ।
सेनापराजितैत्यस्मात्सपत्नानां पराजयः ॥६५॥

(The worshipper becomes) a conquerer by concentrating on (or, worshipping) the qualities of Indra¹ (which he comes to possess); (he becomes) beyond (i.e. invincible to) the enemies owing to the qualities of Vaikuṇṭha (Viṣṇu ?) (which he comes to possess) and the army (of the Maruts)³ since it is (ever) unconquered; therefore, (the worshipper secures) the conquest of enemies.⁴ [65]

¹The name of Indra signifies Parameśvara, i.e. the lord of all.

²*vaikuṇṭha* literally means one who cannot be withstood (*aprasahya*)— whether it refers to Viṣṇu is (though implied, and, therefore, a little) doubtful!

³*senā* stands for the Vedic *marudgaṇa*. In Veda, the Maruts are a development of Vāyu, who is a close associate of Indra or Agni. Yet usually *senā* is associated with Indra (as here in this verse).

⁴This verse justifies the threefold result of the worship of Vāyu.

Verse 66 refers to the sixth paryāya, viz. Agni/Vāc.

BU 2.1.7 is under reference.

अभ्याहितमपि जगत्सहतेऽग्निर्यतस्ततः ।
भस्मसात्करणादुक्तो विषासहिरितीश्वरैः ॥६६॥

Since Agni overpowers the (outside)¹ world which it oversteps,² therefore, (i.e. thereby) rendering (the same, i.e. the world) into ashes, it is called by the learned (lit. the lords)³ *viśāsahi* 'one that can stand the oncoming (world).'⁴ [66]

¹This refers to all *apparent* creation beside the Ātman.

²*sahate* literally means withstands.

³These are the lords of words, the learners and (as such) the knowers of (the meaning of) the Vedas.

⁴This is based on the etymology offered by SP: (*yad dhaviḥ svasmin*) *viśyate kṣipyate tat sodhum śīlam astīti vyutapattiḥ*.

Verses 67 and 68 explain the meaning of the seventh paryāya: *ya evāpsu*

BU 2.1.8 is under reference.

अप्सु रेतसि बुद्धौ च पुरुषं ब्रह्म चेतनम् ।
उपास एतमित्युक्तः काश्यः प्रत्याह पूर्ववत् ॥६७॥

"In waters, in semen and in intellect (do I see) *puruṣa*, the sentient Brahman—I worship this one," (thus) told (by Gārgya), Kāśya said in return as before. [67]

Sureśvara adds *retasi*, following BUB. Also, he adds *buddhau* as he has done under 2.1.2-3 (but this is not in BUB).

प्रतिबिम्बोदयः कार्यं प्रतिरूपं यतस्ततः ।
प्रतिरूप उपास्योऽप्सु फलमप्यस्य तादृशम् ॥६८॥

Since *pratirūpa* 'image' is an effect, viz. the rise (or, appearance) of a reflection; therefore, the reflection (of a

puruṣa 'a man' in the waters etc.) is to be worshipped. The result for this one (viz. the worshipper) in (relation to) waters is also of that kind.¹ [68]

¹ Namely, *bahurūpa* 'multifold in form' as in the case of the preceding *paryāya*— but the stress is on the plentiness of waters conveyed by the plural form *apsu*.

Verse 69 explains the meaning of the eighth paryāya.

अन्वर्थे प्रतिशब्दोऽयं फलस्य पुरुषार्थतः ।
प्रातिलोम्येन तु ज्ञेयो ह्यनर्थः स्यात्तथा सति ॥६९॥

The preposition (lit. word), viz. *prati*, is (used) here in the sense of the preposition *anu* 'following', since the result is (securing or obtainment) of the end of (a human being's) life.¹ (As against this) it can be known in the sense of 'being opposed', but (*tu*), that being so, there would indeed² be an undesirable end.³ [69]

¹ Read SP: *pratiśabdasya nipātatvenānekārthatvasambhavāt prakṛtopāstyanusāreṇānvarthatvam ucitam*. Also *puruṣārthataḥ* is for *puruṣārthavattvataḥ*.

² This is the force of *hi*.

³ Read SP: *tathā sati prātikūlyārthatvābhyupagame satīti yāvat*.

श्रुतिस्मृतिसदाचारान्प्रति यः सततोद्यतः ।
प्रतिश्रुत्यादिरूपत्वात्प्रतिरूपस्ततोऽस्तु सः ॥७०॥

He, who is ever inclined towards (lit. bent on), (the teachings of) the Śruti and the Smṛti and (follows) the conduct of the good,¹ is² then, owing to his following each of the śruti etc.,³ has thence (a son born to him, that is) in accordance with (or, following) the Śruti etc. [70]

This is the meaning of *atho pratirūpo 'smāj jāyate*.

¹Or alternatively, the good conduct in keeping with the teaching of the Śruti etc. This is according to SP.

²*astu* is taken for *asti*.

³The word etc. refers to *smṛti* and *sadācāra*. Also, this refers to his adopting the worships (viz. *Upāsanās*) taught in the *śruti* etc. The son also is likewise a worshipper of the same.

Verses 71-73 explain the meaning of the ninth paryāya.
BU 2.1.9 is under reference.

रोचिष्णुपनिषत्कान्तमादर्शाक्षादिबुद्धिषु ।
उपास इत्यभिहिते काश्यः प्रत्याह पूर्ववत् ॥७१॥

When it was told (him) 'I worship (that Brahman)¹ in the intellect and organs etc. (which are reflected) in the mirror, viz. that which is brilliantly shining (and) delightful (as said) in the Upaniṣads.',² said Kāśya in return (once again) as before.

[71]

This explains *ya evāyam*

¹This is implied by *rociṣṇu* which is paraphrased as *upaniṣatkāntam* (neuter). Or, it is possible to understand the word *puruṣam* (accusative singular, masculine) which is qualified by the Karmadhāraya compound *rociṣṇūpaniṣatkāntam*. Also cf. NKL: *dīpyamānarahasyakāntisahitam ity arthaḥ*; read the note of the editor of NKL: *upaniṣatpadam rahasyārthakam iti bhāvaḥ*.

²Or, following SP, 'delightful though its refulgent lustre remains concealed (*dedīpyamānagopyakāntisahitam*)'.

यत्रोपास्यबहुत्वं स्यात्फलं तत्र प्रजास्वपि ।
शतहृदादर्शाद्यर्था बहवस्ते प्रसिद्धितः ॥७२॥

Wher(ever) there is plurality of the objects of worship, there is abundance (or lit. plurality) of the result in respect of the (forthcoming) offspring also.¹ Indeed many things like (the flashes of) lightning and the mirror etc. are known (to be

of this nature).²

[72]

¹Cf. SP: *svāmīno 'nyatrāpi vācanikam aviruddham iti bhāvaḥ*.

²SP explains this as *kvācītkam upāsyabahutvam eva sphorayati*.

फलं यद्गुणकं यत्र तद्गुणं स्यादुपासनम् ।
फलानुमानतस्तत्र न फलं ह्यनुपासितम् ॥७३॥

Wherever there is a result of whatever quality,¹ there is a worship of that (viz. similar) quality;¹ so is it inferred from the result²—indeed (*hi*) the result is not what is not worshipped for.³ [73]

This is to justify how in some modes of worship (*paryāyas*) the result is manifold.

Also, it explains *ya evāyaṃ yantaṃ*

¹This stands for quantity also.

²SP states the inference thus: *yasmin paryāye yadguṇakam phalaṃ dṛṣṭaṃ tatra tadguṇakam upāsanam phalena tatsāadhanasya ... tadvaicitrye saty upāsanavaicitryasyāvaśyakatvāt*.

³This is to state the inference in the form of Vyatireka.

In verses 74-76, BU 2.1.10 is under reference.

गच्छन्तमन यः शब्दो बहिर्वच्छ्रूयतेऽध्वनि ।
अध्यात्मं दैहिके शब्दे बुद्धौ चेति विनिर्दिशेत् ॥७४॥

In what sound is heard outside as following a walker on some path, and also in that in the intellect with respect to the (walker's) body should one point out (there is the Brahman).

[74]

पुंसोऽभिधावतस्तूर्णं देहदेशैः समाहतः ।
प्राणो वृत्तिविशेषेण बहिर्वत्कुरुते ध्वनिम् ॥७५॥

(For) it is (the wind called) Prāṇa which, struck by various

limbs of the (walker's) body, while (he is) running fast, that produces by its particular function¹ (or, makes) a sound as (belonging to) outside (the body). [75]

In verses 74 and 75 is expressed the view of Gārgya.

¹This is the walker's particular movement. Or, possibly, this refers to some function of the Prāṇa which is other than the usual inhaling.

वृत्तिक्षेपादसुरयमायुषश्च तदाश्रितेः ।
शतायुरेव भवति म्रियते नापमृत्युना ॥७६॥

This is (the deity called) Asu,¹ because there is snapping (or stopping) of the function (of Prāṇa). And because² the life (-span) is dependent on that, a man attains to the age of a hundred (years) and does not come to have (untimely) death (in that). [76]

This is Ajātaśatru's view.

¹This is to say that the sound (mentioned in the two preceding verses) is produced by *śabda-puruṣa*.

²This explains the Upaniṣadic sentence *sa ya etam*

In verses 77 and 78, BU 2.1.11 is under reference.

दिक्षु द्वितीयोऽनपगः सद्वितीयः सदैव सः ।
दुःसंभाव्या हि पूर्वा दिङ्मुक्त्वाशां परिचमां जनैः ॥७७॥

He (that Puruṣa) is the second in the quarters—he is inseparable and is ever the second¹—the eastern quarter (alone) is indeed difficult to be considered (alone),² the western quarter being left aside by men. [77]

This explains the significance of *sadvidyā* and *anapaga* connected with *dikpuruṣa*.

¹There is reference to the ears, corresponding to the quarters,

and the region of the heart. Also, the ears are connected with the Aśvins who are inseparable twins; the heart, covered in the body, refers to the cover of ignorance (about the real nature of the Brahman) on the part of Gārgya.

²This is the significance of *duḥsambhāvyā*; SP comments on this word: *diśāṃ sadvitīyatvaṃ lokaprasiddham iti hisābdah*.

साधुभृत्यपरीवारः सर्वदोषासको भवेत् ।
पुत्रादिगणसंतानस्थैर्यमेव सदा भवेत् ॥७८॥

A worshipper (of this deity) becomes ever accompanied by his retinue (*parivāra*), viz. his good attendants; (also) there will ever result (for him) continuity in respect of sons and other offspring. [78]

This explains the Upaniṣadic sentence *sa ya etām ...* and also the worship of the deity having two qualities mentioned in the preceding verse.

This verse explains BU 2.1.12: sa evāyaṃ chāyāmayah

छायामये तथाज्ञाने बुद्धौ चैकैव देवता ।
मृत्युकालात्पुनः नास्य व्याधिरप्युपसर्पति ॥७९॥

There is only one deity in the shadow-*puruṣa*,¹ viz. that in darkness (or, ignorance) outside and in the intellect (inside of the worshipper) and, before the time of his death, there does not come to him any ailment also.² [79]

¹The shadow-*puruṣa* is described (or, qualified) as Death.

²This is the result of the worship of Death, viz. long life and absence of any disease—this is conveyed by *nainam purā kālāt* 'Even' has the force of conveying the delayed time for death.

Verses 80-84 discuss the import of BU 2.1.13: ya evāyaṃ ātmani

....

विराडात्मनि देहे च बुद्धावित्यादि पूर्ववत् ।
आत्मन्वीति च वश्यात्मा प्रजा चापि शमान्विता ॥८०॥

(In this *paryāya*) Puruṣa refers to Virāj, the Ātman 'individual self,'¹ and the intellect in the body (even) as before (i.e. in the preceding *paryāyas*). The adjective *ātmanvī* points to his being strong in himself (or, mind). Also, the offspring² (of the worshipper) is possessed of tranquillity. [80]

¹This refers to Hiranyagarbha (in making) as understood from the qualifying attribute *ātmanvī*.

²*prajā* is singular form, indicative of the plural sense.

व्यस्तानां पूर्वमद्देशः समस्तानां त्विहोदितः ।
विवक्षावसितिर्गाँगी तथा सत्युपपद्यते ॥८१॥

Earlier,¹ there was enumeration of (each of the) individual deities (to be worshipped), whereas there is here a general (or single) enumeration of them all. That being so, there is a reasonable conclusion of Gārgya's intended thought (lit. speech).² [81]

This is to explain how this *paryāya* is different from the earlier ones and a fitting conclusion of the thought.

¹This refers to the earlier *paryāyas* mentioned in the preceding verses. The intention there was to refer to the worship of each individual deity.

²This is warranted by the earlier modes of worship.

प्रत्याख्यातोपदेशः सन्संवादेन पुनः पुनः ।
ब्रह्मान्यदन्यदवददात्मन्वीत्यन्तमादरात् ॥८२॥
विशेषाणामनन्तत्वात्समस्तं ब्रह्म सोऽवदत् ।
तस्मिन्नपि निषिद्धेऽथ तूष्णीं गार्ग्यो बभूव ह ॥८३॥

By his repeated talk (with Ajātaśatru, Gārgya had) his instruction (regarding the Brahman) repudiated; for, (the former) instructed (lit. mentioned) the Brahman to be different (from that in each of Gārgya's *paryāyas*) with profound respect (for the Brahman having as its qualifying attribute) *ātmanvī*.

[82]

Thus, he (finally) mentioned the Brahman as a whole (*samasta*) on account of the numberlessness of its particular attributes. Then,¹ as that (Brahman, taken severally and jointly by him) was rejected (by Ajātaśatru as the Brahman), Gārgya indeed² came to maintain silence.

[83]

¹*atha* indicates Gārgya's ignorance of the ultimate reality.

²This is for *ha*. An expression of Gārgya's lowering of the head in the assembly of Ajātaśatru.

यत्कृत्स्नं ब्रह्म पूर्वोक्तं तदेवेदमविद्यया ।
एकधानेकधा मूर्धैः कल्प्यते रज्जुसर्पवत् ॥८४॥

All that Brahman, viz. which(ever) was earlier mentioned, is but so stated by ignorant persons in one way or in several ways, owing to their non-knowing (lit. ignorance, about it); it is so imagined in the same way as one imagines a rope to be a serpent.

[84]

The verse seeks to establish that the Brahman is variously, i.e. singly or jointly, understood by persons under the sway of ignorance—this is so indicated by the rejection of all the *paryāyas* by Ajātaśatru. The *paryāyas* had originated in only a partial view of the Brahman as variously delimited; that is to say: it was taken to be what was other than the *mukhya* Brahman, viz. the ultimate reality.

In verses 85-91 follows the explanation of BU 2.1.14 (and allied matter).

अवाकशिरस्कमालोक्य नृपो गार्ग्यमनुत्तरम् ।
एतावदिति तं प्राह शेषाशङ्कानिवृत्तये ॥८५॥

On seeing Gārgya having lowered his head and having no more to say in reply, the king said to him *etāvad* ... '(is it only) this much?'—this was with a view to clearing away whatever remained as doubt (in his mind).¹ [85]

¹This refers to Gārgya's wish to know the ultimate reality.

निगृह्यमाणयोगे च प्लुतिमत्र विनिर्दिशेत् ।
ब्रह्म ब्रवाणीत्यात्थ त्वमेतावद्ब्रह्म तच्च ते ॥८६॥

One should point out the *pluti* 'prolation' here (i.e. in the text) as associated with an individual's being checked (or, held, i.e. stopped):¹ (this is thus expressed in Ajātaśatru's intention, viz.) 'You said to me "Let me tell you about the Brahman", and your (statement of) the Brahman is (just) this much!' [86]

This has a reference to BU using *pluti* in *sa hovācājātaśatruḥ, etāvan nū3 iti*.

¹This is Suresvara's reference to Pāṇinian procedure regarding the use of *pluti* in Pāṇini Sūtra 8.2.94: *nigrhyānuyoge ca*.

अज्ञाते जगदज्ञातं ज्ञाते ज्ञातं च यत्र तत् ।
तदेव ब्रह्म पूर्णत्वान्न त्वदुक्तमकृत्स्नतः ॥८७॥

²That alone is the Brahman, which remaining unknown the entire world (remains) unknown¹ and which being known that (becomes) known—this is owing to its being the all-encompassing (or, whole)—that which you have told (or, declared) is not the Brahman owing to its not being the whole. [87]

The verse does not mean to convey that Gārgya had completely

gone wrong, since each of his *paryāyas* about the Brahman was included in the Brahman which is *mukhya* 'ultimate'. The only shortcoming was that, in each of the *paryāyas*, there was so-called partial expression of the Brahman (*akṛtsnatva*). This is further clarified in the following verse.

अव्यावृत्ताननुगतस्वतःसिद्धात्मवस्तुनि ।
मुख्यार्थो ब्रह्मशब्दः स्यान्न त्वदुक्तेऽतथात्वतः ॥८८॥

(Ajātaśatru meant to say:) 'The word Brahman, in its principal (or, real) sense, can be (i.e. is to be) used in respect of the thing (called) Ātman, which is not (i.e. cannot be) distinguished (from any other thing), which has no resemblance with (lit. has not been followed by any other thing) and which is self-established; not in respect of what you have mentioned, since that is not similar to it.'¹ [88]

¹Namely, it is not *avyāvṛtta* ... *svataḥsiddha*.

यस्मादेवमतो गार्ग्यमेतावद्धीतिवादिनम् ।
नृपो नैतावतेत्याह ब्रह्मत्वासंभवं स्फुटम् ॥८९॥

Since this was so, the king said to Gārgya, who declared the Brahman to be this much¹ 'It is not this much'—thus (declaring) clearly the impossibility of that being the Brahman. [89]

¹It referred only to the so-called expression of the Brahman.

अज्ञातब्रह्मतत्त्वस्य दुःसंभाव्यमिदं वचः ।
नैतावतेति ब्रह्मातः काश्यो वेत्तीति लिङ्ग्यते ॥९०॥

That such an expression (lit. this expression) cannot ever come from one who has not known the real nature of the Brahman is indicated by the expression 'not by this much is (declared/explained the Brahman)' and that therefore, Kāśya

knew (the real nature of) the Brahman.

[90]

This explains the significance of Gārgya's words *upa ivāyāni* 'let me approach you (for instruction)'. This is clarified in the following verse.

गार्ग्योऽनुमाय राज्ञोऽथ प्रावीण्यं ब्रह्मवेदने ।
उपायानीत्युवाचेमं परब्रह्मावबुद्धये ॥९१॥

Having then understood (lit. inferred) the king's ability for instructing about (the nature of) the Brahman, Gārgya said to him, 'Let me approach you (for instruction).' [91]

In verses 92-99 follows the explanation of BU 2.1.15 (and allied matter).

परं ब्रह्म विजिज्ञासुरपेतोऽस्म्यहमादरात् ।
अनुशाधि यथातत्त्वमित्येवंवादिनं नृपः ॥९२॥
क्षत्रियं ब्राह्मणो जात्या यदुपेयादनापदि ।
प्रतिलोममिदं वृत्तं धर्मशास्त्रैर्निषिद्धतः ॥९३॥

(While Gārgya) said, 'Desirous of knowing the highest Brahman,¹ I have approached you respectfully; please teach me what (or, as) it is in reality', the king [92] (said), 'That (you) a Brāhmaṇa by birth should approach (me) a Kṣatriya, (while you are) not in difficulty, this (your) doing (lit. behaviour) is against (or, not in accordance with Dharma), for there is prohibition (or, censure against it) of (lit. by) the Dharma texts.² [93]

¹NKL edition reads *para brahma*; but that makes no difference.

²SP and NKL adduce support for the king's words thus:

*abrāhmaṇād adhyayanam āpatkāle vidhīyate /
anuvrajyā ca śuśrūṣā yāvad adhyayanam guroḥ //
nābrāhmaṇe gurau śiṣyo vāsam ātyantikam vaset /
brāhmaṇe cānamūcāne kāṅkṣan gatim anuttamām //*

(*Manusmṛti* 2.241-242). SP further supports this by a citation from *Gautamadharmasūtra*: *āpatkāle brāhmaṇasyābrāhmaṇād vidyopayogo 'nugamanam śūśrūṣāsamāpteh*.

योगक्षेमफलार्थाय गमनं न निषिध्यते ।
ब्रह्म मे वक्ष्यतीत्यर्थं निषिद्धं नृपसर्पणम् ॥९४॥

“(but) his (i.e. a Brāhmaṇa's) approaching (him, a Kṣatriya) is not prohibited (or, censured), (in case it is) for effecting (or, securing) (*arthāya*) the meaning of life;¹ (thus, your) approaching (me), a king, with the desire (*ity artham*) 'he would tell (declare to) me (the nature of) the Brahman' is (indeed) censured. [94]

¹I have translated *yogakṣema* thus, though against SP which states: *aprāptaprāpanam yogah prāptarakṣanam kṣemah* and supports the explanation by citing a Smṛti:

*vedārthān adhigacchec ca śāstrāṇi vividhāni ca /
upeyād īśvaram caiva yogakṣemārthasiddhaye //*
(*Yājñavalkyasmṛti* 1.99)

This is supported by NKL: *yogakṣemārtham īśvaram adhigacchet* (*Gautamadharmasūtra* 1.9.63).

अतोऽनुपेतमेव त्वां करविन्यस्तबिल्ववत् ।
ब्रह्म विज्ञापयिष्यामि यज्ज्ञाने सर्वविद्भवेत् ॥९५॥

“Therefore, I shall inform you¹—who have, in reality, not formally approached me—about (the nature of) the Brahman even like a *bilva* fruit placed on the palm of a hand, by securing whose knowledge, one would become the knower of all.” [95]

¹SP explains in this context: *varṇato gārgyasyādhikyād upasattyabhāve 'pi vidyāto rājño vaiśiṣṭyāt tatas tadgraho yuktaḥ* and supports 'his by a passage from the *Manusmṛti* 2.154:

*na hāyanair na palitair na vittair na ca bandhubhīḥ /
ṛṣayaś cakrire dharmam yo 'nūcānaḥ sa no mahan //*

इत्युक्त्वा तमथो पाणौ गृहीत्वोत्थितवानृपः ।
आजग्मतुश्च तौ सुप्तं नरं कार्यविवक्षया ॥९६॥

Having thus said to him and taking (lit. holding) him by his hand, the king rose up (i.e. began to walk). (Then) the two came to a man, who was sleeping, with the desire to make (that man) speak what was to be achieved. [96]

गार्ग्योक्तब्रह्माभोक्तृत्वं तथामीषामनात्मताम् ।
बालाकेर्बोधयिष्यामीत्यतः सुप्तमगानृपः ॥९७॥

With the intention to bring home to Bālāki the nature of a non-enjoyer of what was declared by him, i.e. Gārgya, as the Brahman and also the character of non-Ātmans (i.e. non-Brahman) of these,¹ the king went up to the sleeping (man). [97]

This explains *kāryavivakṣā* 'the desire of stating what was to be achieved, viz. to make (that sleeping man) speak'.

¹This should have been 'them', but owing to the force of *amīṣām* 'these' refers to the Sun etc. which Gārgya had earlier mentioned as the Brahman.

देवतानामभिः काश्यो गत्वा सुप्तं यथोदितैः ।
आमन्त्रयां तदा चक्रे बृहन्नित्येवमादिभिः ॥९८॥

Then, having gone up to the sleeping (man), Kāśya called¹ him by (various) names of the deity, as said (in the Upaniṣad), viz. Bṛhat and others.² [98]

This explains the BU sentence *tam etaiḥ*

¹The verb is *āmantrayāṃcakre*, it is separated into its two components *āmantrayāṃ* and *cakre*, for metre's sake. Such tendency of separating the verbs is occasionally noticed in classical Sanskrit writers.

²These names are: Br̥hat, Pāṇḍaravāśas, Soma and Rājan.

संबोध्यमानोऽपि तथा सुप्तो नैवोदबुध्यत ।
यतोऽतो गार्ग्याभिमतो न भोक्तेत्यवगम्यते ॥९९॥

Since that sleeping (man) did not at all become awake, even when so addressed, therefore, it is understood that he was not the enjoyer as understood by Gārgya. [99]

This explains *sa nottasthau* in BU. It brings out the thought that the Prāṇa 'vital Prāṇa in the human body', which was functioning (i.e. active therein), was not *really* the enjoyer, i.e. experiencer (of the various names or words addressed to him).

Verses 100-108 bring out the significance of Ajātaśatru's approaching the sleeping man.

जाग्रत्कालं परित्यज्य सुप्तं किमिति जग्मतुः ।
स्पष्टता सर्वभावानां जाग्रत्काले हि लक्ष्यते ॥१००॥

(A question is asked:) 'Why did the two approach the sleeping (man), avoiding his state (lit. time) of waking (or, wakefulness)?' (The reason for the question is given thus:) Indeed it is only in the state (i.e. time) of waking that clear visibility¹ of all becomings (*bhāvas*) is noticed.² [100]

The implication of the question is: It is not proper (or, useful) to approach a sleeping man—it was proper to go to one who was awake, for it could only be in the case of the latter that the king was in a better position to explain the nature of the Ātman. Yet, see verse 103 below.

¹NKL reads *spaṣṭatvāt* for *spaṣṭatā*! difficult to decide the correct reading.

²SP clarifies the idea thus: *tatra sarvasyāpy ādiṣṭo 'rtho vivicya vaktuṃ śakyate na svāpe sarvavyavahāralopād atas tadgatir anarthikety arthaḥ*. This is clarified in the following verse.

प्राणानां देवतानां च पुरुषस्य च संकरात् ।
बोधे न शक्यते कर्तुं विवेको भोक्तृभोज्ययोः ॥१०१॥

(What is said in the preceding verse is so) because there is in the waking state an intermingling¹ of the *prāṇas*, (various) deities (of the organs) and Puruṣa (viz. the vital Prāṇa); it is not possible to make distinction (or, to distinguish) between the enjoyer (i.e. experiencer) and the objects enjoyed (or experienced). [101]

¹SP and NKL vividly clarify the idea of intermingling by citing the mixture of milk and water.

भोक्तृत्वमेव पुंसोऽस्ति भोज्यत्वं न मनागपि ।
काश्याभिप्रायतोऽनस्य भोज्यतैव न भोक्तृता ॥१०२॥

In the case of a man, there is the character only of an enjoyer (i.e. experiencer) and not at all the nature of what is enjoyed (i.e. experienced). And, in the opinion of Kāśya, the Prāṇa¹ has the nature of being enjoyed (i.e. experienced) alone and not the character of an enjoyer (i.e. experiencer).² [102]

¹*ana* is used for *prāṇa*.

²SP clarifies *bhoktr̥tva* as *sākṣitva* and *bhojyatva* as *sākṣya*.

संकीर्णत्वादशक्यः स्यात्प्रबोधे भोक्तृभोज्ययोः ।
कर्तुं विवेकोऽतो यातः सुप्तं पुरुषमादरात् ॥१०३॥

Owing to the intermingling of the two, viz. the enjoyer and the enjoyed, in the waking state (of an individual),¹ it is not possible to make any distinction between them (and), therefore, (Kāśya) approached the sleeping man respectfully.² [103]

¹This, i.e. *saṁkīrṇatva*, is used for emphasising the *sākṣitā-mātratva* of Prāṇa.

²That is, with proper care for achieving the desired end.

तस्माद्यद्यपि सांनिध्यं प्राणादीनां प्रजागरे ।
संकीर्णत्वान्मिथस्तेषां दुःशकं तद्विवेचनम् ॥१०४॥

Therefore, even though there is presence (lit. nearness, under view) of the *prāṇas* and others¹ in the state of waking, it is quite difficult to distinguish them (from *Prāṇa*) owing to their intermingling. [104]

This verse clarifies the idea of *spaṣṭatā* in verse 100 above and thus justifies Kāśya's approaching the sleeping man.

¹The deities of the various organs are meant.

आत्मनः प्रोषितत्वात्तु भोगोऽस्मै न प्रयुज्यते ।
उदासतेऽखिलाः सुप्ते देवताः करणैः सह ॥१०५॥
जाग्रद्भोगप्रयुक्तस्य कर्मणः प्रक्षयात्तदा ।
शेरते करणान्यस्य सह भोक्त्रात्मनात्मनि ॥१०६॥

And (*tu*) enjoyment (of objects) is not brought to it, since *Prāṇa* is in a state of separation (from the organs etc.); (for), in the state of sleep, all the deities together with their (respective) organs remain (wholly) inactive, [105]
(for), at that time, owing to the cessation (lit. loss) of any activity which is caused (or, employed) for enjoyment in the waking state, all the organs remain inactive;¹ though (they are) together with the enjoyer *Ātman* in (the so-far-unknown) *Ātman*.² [106]

This is said with a view to pointing out how in sleep state it is possible to distinguish between the *Ātman* and the deities, together with their respective organs, even though there is intermingling of them all (105). This is further reasoned out in verse 106.

¹That is, they have withdrawn from all activity.

²That is to say: they have not ceased to exist.

प्राण एकस्तु जागर्ति भोक्ता यो गार्ग्यसंमतः ।
प्राणेन रक्षन्निति च तथोदके प्रवक्ष्यते ॥१०७॥

The one alone (who is) awake is Prāṇa, the one accepted by Gārgya (also); so will this be said even later (in the words) *prāṇena rakṣan*.¹ [107]

¹Cf. *prāṇena rakṣann avaram kulāyam* in BU 4.3.12 which indicates how only Prāṇa remains active even in sleep. This is supported in the next verse by citing two Śrutis.

प्राणाग्नय इति स्पष्टं तथानस्तमितश्रुतेः ।
अश्रान्तः प्राण एवातो जागर्त्यत्र दिवानिशम् ॥१०८॥

(It is) clear in (the Śruti text) *prāṇāgnayaḥ*¹ ... and also from the (other) Śruti *anastamita* 'its not becoming inactive' (regarding Prāṇa) – thus only Prāṇa, who is not (at all) tired, remains here (in this body) awake, day and night. [108]

¹*prāṇāgnaya evaitasmin pure jāgrati* (Praśnopaniṣad 4.3).

²*na vyathate na riṣyati śaiṣānastamitā devatā yad vāyuh* (BU 1.5.22).

Verses 109-132 discuss how the vital force, i.e. Prāṇa, Hiranya-garbha, is non-Ātman.

यथा जाग्रदवस्थायां भोक्ता प्राणः पुराभवत् ।
स्वप्नेऽप्येष तथैवास्ते बोद्धा चेद्बुध्यतामयम् ॥१०९॥

As the enjoyer, Prāṇa has been there in the state of waking earlier, so is it, in the same way, there even in sleep state; (yes), if (as) the knower, then let it be knowing. [109]

This explains what is meant by 'Prāṇa is ever awake'.

प्राणस्येन्दोस्तथा चापां त्र्यन्तात्माविष्कृतौ यतः ।
ऐक्यमुक्तमतः प्राणो बोध्यते चन्द्रनामभिः ॥११०॥

Since, while revealing the nature of the triad of foods,¹ it has been pointed out that Prāṇa, the moon and the waters are (but) one in nature; therefore, is (here) Prāṇa addressed by the attributes (lit. names) of the moon. [110]

This explains why Prāṇa, though sentient, in sleep state is called by the names of another.

¹Here the reference is to BU 1.5.13: *athaitasya prāṇasyāpaḥ śarīraṃ jyotīrūpam asau candraḥ*.

बृहन्नित्येवमादीनि सन्तु चेहोपलक्षणम् ।
अनुक्तदेवतानाम्नां सामर्थ्यात्तद्ग्रहोऽथवा ॥१११॥

Or, let the attributes (lit. names) Br̥hat and others be considered here (i.e. in Kāśya's address) as indicative (of the other attributes/names also)—(that is to say:) Or, let there be the acceptance of the names of even (other) deities whose attributes (lit. names) are not stated; this, on account of the force (of oneness, i.e. *sāmarthya*).¹ [111]

An alternative understanding of the words is also acceptable here.

¹The reason for this is that Prāṇa is one with Sūtra, i.e. Hiranyagarbha.

यदि भोक्ता भवेत्प्राणो जाग्रद्वच्छब्दमागतम् ।
अश्रोष्यत्स न चेद्भोक्ता नाश्रोष्यदुपलादिवत् ॥११२॥

If Prāṇa were the enjoyer (i.e. experiencer), then it would have heard (even in sleep state) the word (i.e. various words of address) spoken unto it as in the state of waking; (as against this), if it were not the enjoyer (i.e. experiencer), it would not have as a stone etc.¹ heard (would not have heard). [112]

¹The word etc. implies a log of wood, a piece of some metal.

ननु सुप्तेऽपि पुंस्यस्मिन्बोधितः सन्स्वनामभिः ।
भोक्तैव भोत्स्यते शब्दं न त्वभोक्ता परो जडः ॥११३॥
नैवातोऽपि विवेकः स्यादुत्थितः कोऽनयोर्द्वयोः ॥११४॥

(A doubt is raised:) But, even if this sleeping man is addressed by his own attributes (lit. names), it is only the enjoyer (i.e. experiencer) who would hear (lit. enjoy or experience) the word and (*tu*) not the non-enjoyer (i.e. non-experiencer), (who is) other than that, i.e. the insentient. [113]

Indeed, for this (reason) also, there could be distinction made (between the Ātman and the non-Ātman); (for the question could be:) 'Which of these two is awakened?' [114]

This is to point out that making distinction between the enjoyer and the enjoyed is impossible even in sleep state, since only the enjoyer (Ātman) can experience the address. NKL puts it succinctly thus: *ātmā śabdopalabdhyā nānātmā ity etāvataṁ vivekāśiddhiḥ*.

This is pointed out in the next verse.

नैवं गार्गीयपक्षस्य विशेषावधृतेः सदा ।
अजातशत्रुवभिप्रेतब्रह्मणः प्राक्प्रमाणतः ॥११५॥

This is not so,¹ because there is ever held (or, determined) a (specific) distinction between what is held in Gārgya's opinion (lit. view, as the Brahman) and what is understood (or, accepted) as the Brahman² by Ajātaśatru, (as established) by the authoritative means (viz. the Śruti passages) already adduced.³ [115]

This is to answer away the doubt raised in verses 113 and 114 above.

¹That is, the doubt cannot be entertained.

²The Brahman in the view of Gārgya can be active only in the state of waking and inactive (or dormant) in sleep state, whereas the Brahman, as understood by Ajātaśatru, is ever active.

³This refers to passages meant in verse 108 above. Yet read SP: *gārgyeṣṭapraṇasya kāśyeṣṭātmanah sakāśād yo viśeṣaḥ sadā vyāpṛtatvaṁ tasya prabodhāt prāg api pramitatvāt prāṇotthāne śabdāśravaṇāyogāt pāṇipeṣānupapatteḥ sa na bhoktety arthaḥ.*

योऽनस्तमित एकोऽत्र वागाद्यस्तमयेऽमृतः ।
इन्द्रोऽसपत्नोऽब्देहश्च नामरूपसमावृतः ॥११६॥

That (Brahman in Ajātaśatru's view) is only that one who has not become inactive and who is active even when *vāc* and others have stopped to be active,¹ active (lit. alive, i.e. not dead), the one who is called Indra, having no enemy² and having a body in the (form of) waters³ and who is wrapped up by name and form.⁴ [116]

This justifies my translation of the preceding verse.

¹The language here is figurative: one who has not set down as against those who have set down.

²Cf. *sa indraḥ sa eṣo 'sapatnaḥ* (BU 1.5.12).

³Cf. *athaitasya prāṇasyāpaḥ śarīram* (BU 1.5.13).

⁴Cf. *nāmarūpābhyāṁ satyābhyāṁ prāṇas channo naivam ātmā satyasya satyam* as cited by SP. However, cf. BU 1.6.3: *nāmarūpe satyam, tābhyāṁ ayam prāṇas channaḥ*. (Also cp. BU 2.3.6) [so cited in the note of the editor of NKL].

अध्यात्माद्यखिलं विश्वं संव्याप्य समवस्थितः ।
ओतं प्रोतं जगद्यस्मिन्नरनाभिनिदर्शनात् ॥११७॥

(That Prāṇa) has remained after having pervaded the entire universe beginning with what rests in the (human) body (and) in this one is the world woven warp and woof (or, is the world pervaded) (as shown) by the illustration of the hub and the spokes (of a wheel).¹ [117]

This has a basis in BU 1.5.21-22 in particular. Also cf. BU 3.8.

¹The illustration is from BU 2.5.15. Cf. verse 137 note 1 below.

कुर्वाणस्तुमुलं शब्दं स्वव्यापारमशेषतः ।
कुर्वाण एव स्वप्नेऽपि प्राण आस्ते प्रबोधवत् ॥११८॥

Prāṇa keeps on producing (lit. making) a loud¹ sound) and also does the whole of its activity,² even in sleep, as in the waking state. [118]

¹SP points out that the word *tumula* 'loud' indicates that it is louder than that in the waking state.

²This is to bring out the peculiar character of Prāṇa, viz. its doing all of its activities; whereas the others (viz. organs and their deities) are inactive.

न च भोक्त्रन्तरं प्राणाद्गार्ग्येणेहाभ्युपेयते ।
तत्काले भिन्नकाले वा प्राणादन्यस्य भोज्यतः ॥११९॥

Again, here (i.e. in the sleep state) Gārgya does not accept any other enjoyer (than Prāṇa), since, at that time or at any other time, there is (i.e. can be) any enjoyable (i.e. worth experiencing) other than Prāṇa. [119]

तस्मादवश्यं बोद्धव्यं बोध्यं साक्षादुपस्थितम् ।
प्राणेन बोद्धरूपत्वाद्वाह्यं दग्धा यथा दहेत् ॥१२०॥

Therefore, it should be necessarily understood (or, known) by one that here (i.e. in sleep state) there is directly perceived in Prāṇa, the form of the perceiver, just like what burns (viz. fire) would burn (or, consume) what is to be burnt.¹ [120]

¹SP adds: *prāpte viṣaye śaktasya kāryakaratve drṣṭāntaḥ*.

न चासौ बोध्यमानोऽपि प्रत्यबुध्यत नाम तत् ।
प्राणोऽभोक्ता ततः सिद्धः स्वनामाप्रतिबोधनात् ॥१२१॥

And that the (sleeping man), even when addressed (by various names), did not become awake, therefore (lit. therefrom) is established the non-enjoyer Prāṇa,¹ on account of its not being awakened by its own attributes (i.e. names). [121]

¹SP carefully points out *abhokteti cchedaḥ* and invites attention to the reading *prāṇo 'bhoktā*.

स्वाख्याविशेषसंबन्धाग्रहणाच्चेन्न बुद्धवान् ।
अग्रहासंभवान्नैवं सर्वज्ञा देवता यतः ॥१२२॥

If it is held that he did not become awake because he did not grasp (its) connection with his own names, that is not so on account of the impossibility; since there the reason is that the deity is all-knowing. [122]

त्वत्पक्षेऽप्यग्रहो दोषस्तुल्यश्चेदिति चोद्यते ।
नैवं कृत्स्नाभिमानित्वादकदेशानहंकृतेः ॥१२३॥

(Also) if it is argued 'In your (i.e. the Siddhāntin's) view also, there is the same fault, viz. non-grasping (of Prāṇa's connection with the names)', that also is not tenable, because he has identified¹ himself with the whole body, viz. there is not (on his part) ego about (only) some one part of the body (which he is said to have assumed).² [123]

¹That is, he has entertained ego for the whole body.

²SP adds: *na tv abhoktrtvāt*.

अङ्गुल्याद्यभिधानोक्तौ न हि तद्वान्प्रबुध्यते ।
कृत्स्नदेहाभिमान्येवं नैकदेहाभिमानभुक् ॥१२४॥

As indeed, by the mention of the (different) name(s) of the

finger(s), a person who is possessed of the same is not awakened, so (also) a person who has identified oneself with the whole body¹ (does not wake up); (for) he does not identify (himself only) with some one part (of the body).² [124]

This is an illustration for supporting the argument in the preceding verse.

¹See note 1 under the preceding verse.

²SP and NKL add: *na tv anātmavāt*.

प्राणस्य तु समाप्तत्वात्समस्तव्यस्तवस्तुषु ।
नात्मवत्स्यादसंबोधस्तस्य सर्वाभिमानतः ॥१२५॥

As for Prāṇa, since it has pervaded the things in the universe jointly and singly, there cannot be on its part, non-waking; for, it has identified itself with all (the things in the universe).¹

[125]

¹SP and NKL point out the similarity of Prāṇa's pervading everything in the universe with 'cowness' pervading all cows.

बोधाबोधौ चित्तेर्न स्तः कटस्थज्ञप्तिमात्रतः ।
परायत्तप्रबोधो नाह्यप्पात्रौत्थाद्रवेरिव ॥१२६॥

Waking up and its absence cannot be (understood or accepted in the case) of sentience, owing merely to its nature of being immutable knowledge (or knowing). (But) a man¹ is indeed dependent on some other (person or thing) for his knowledge² in the same way as the reflection in the water-pot of the orb of the sun.

[126]

¹*nā* is in the sense of *amukhyātman*, i.e. *cidābhāsa* or *anātman*.

²Or, getting to know something which comes through the help of eye and other organs.

स्वसंज्ञयाप्यसंबोधो यथा दृष्टस्तदात्मनः ।

भोक्तृत्वे सत्यपि तथा प्राणेऽप्यप्रतिबोधनम् ॥१२७॥

As there is noticed non-waking of the Ātman, at the time of being called by its own name; so also in the case of Prāṇa, there is no waking (or, knowing) even though it has the nature of an enjoyer (or, experiencer). [127]

This is a reference to the individual self (Jīva) in relation to the organs.

सप्तासुप्तत्वसंभेदविशेषन्यायसंभवात् ।
नैव सुप्तग्रहो युक्तो न त्वसुप्तस्य युज्यते ॥१२८॥

Since there is possibly some reason¹ for distinguishing between the sleeping² and the non-sleeping³ who exist in union (*sambheda*),⁴ therefore the sleeping one does not grasp (the address) and (*tu*) that non-grasping is not reasonable in the case of the non-sleeping. [128]

¹This is for *nyāya*.

²This refers to Prāṇa.

³Reference here is to *prāṇas* and their deities.

⁴Both Prāṇa and the Puruṣa (possessed of a body) co-exist in a human body.

श्रोत्रादेर्गुणभूतत्वात्प्रधानं प्रति सर्वदा ।
तस्मिञ्जाग्रति जागर्ति सुप्ते स्वपिति तद्वशात् ॥१२९॥

Since the ear and others have¹ ever been subordinate to (i.e. dependent on) the principal (one),² they are awake (i.e. active) while that one is awake (active) and they sleep while that is asleep, owing to their dependence on it. [129]

This sets aside the idea that Prāṇa does not hear its own names owing to the inactivity of the organs and not because it is non-enjoyer.

¹Though the word *śrotrādi* is in the singular, I have used the plural to refer to various organs implied by the use of *ādi*.

²The word *pradhāna* here does not refer to the Pradhāna of the Sāṃkhyas, but it refers to the *mukhya* Ātman, only in an embodied state.

नेन्द्रियाणां भवेत्स्वापो यदि प्राणप्रधानता ।
नामात्याः शेरते यस्माद्वाज्ञि स्वामिनि जाग्रति ॥१३०॥

There would not be sleep possible in the case of the organs if they are having Prāṇa as their principal (i.e. governor or controller); this is because the subordinates (or, servants *amātyas*) do not sleep while their master is awake (i.e. is functioning). [130]

The thought here is: Since (or when) Prāṇa (i.e. Jīva) is the enjoyer, the organs cannot have withdrawn their functions while it is not asleep.

अप्रसिद्धार्थसंज्ञाभिरुक्तेष्वेदप्रबोधनम् ।
देवतात्मनिषेधार्थपरत्वात्तद्ग्रहोऽर्थवान् ॥१३१॥

(The opponent argues:) Since there has been the use of not well-known (i.e. unusual) names in that address, there is no wakening (of the sleeping one¹); (only) then the understanding of that (call) would be meaningful by the rejection of the nature of the deities. [131]

The intention of the opponent is to point out that the sleeping one cannot accept the call owing to the names which are unfamiliar/unusual; not because it is non-Ātman.

¹This refers to the non-Ātman, viz. the individual.

Now is explained *kevalasambodhana* ... in BUB 2.1.15 (p.254).

प्राणस्याभोक्तृतासिद्धिः स्वनामाग्रहणादपि ।

देवताप्रतिषेधार्थं बोध्यते चन्द्रनामभिः ॥१३२॥

That Prāṇa is non-enjoyer (or, non-experiencer) is established even by the non-utterance of what are not its attributes (lit. names), (for) it is addressed by the attributes (lit. names) of the moon, prohibiting (or, rejecting) thereby that it is a deity. [132]

NKL comments: *devatānāmabhiḥ iti siddhāntabhāgaṃ vibhajate.*

Verses 133-137 clarify the nature of the organs as non-Ātman.

स्मृतिज्ञानेषणादीनां संधानानुपपत्तिः ।
करणानामभोक्तृत्वं देहांशानामिवेष्यते ॥१३३॥

Since it is not reasonable to posit any relation (or, connection)¹ of memory, grasping and desire etc., it is accepted that the organs are, like (various) parts of a body, non-enjoyers (or, non-experiencers).² [133]

This is to set aside a possible notion that each of the organs could be the Ātman.

¹Namely, continuity of varied experience on their part.

²SP clarifies thus: *smṛtyādīnāṃ yo rūpam adrākṣaṃ sa śabdaṃ śṛṇomītyādipratisaṃdhānasya anupapatteḥ.*

अचैतन्यात्तथोक्तस्य कुतो भोक्तृत्वसंभवः ।
चिदन्यस्य च भोज्यत्वान्नान्यस्यातोऽस्ति भोक्तृता ॥१३४॥

How could there be the nature of the enjoyer (or, experiencer) of them, so described,¹ on account of their being insentient? And since (only) whatever is other than sentience is what is (or, can) be enjoyed, there is not the nature of the enjoyer in what is other (than sentience). [134]

¹This refers to the description of the organs taken singly or

jointly. The argument is well brought out by SP thus: *yathā samudāyaḥ samudāyibhyo bhedaḥbhedaḥbhyām (ayuktas tathā caitanyābhinnaṭvenoktasyācetanasya karaṇavargasya na bhoktrtā jadatvād ghaṭavad ity arthaḥ)*.

दण्डापिकनीत्यैव करणानामभोक्तृता ।
न च प्राणातिरेकेण देवतान्योपपद्यते ॥१३५॥

The nature of (all) the organs as non-enjoyers (i.e. non-experiencers) is (understood) in the manner of (understanding the nature of) the cakes tied on a pole.¹ And one cannot understand (or, accept) any deity other than Prāṇa,² beside it. [135]

¹SP gives this in brief, but clearly, thus: *daṇḍe 'pūpalagne grhyamāṇe balād apūpo 'pi grhyate tayā nityā*

²This refers to the individual self which is of the nature of Sūtra.

ननु तद्व्यतिरेकेण प्रागादित्यादिरीरितः ।
देवताविषयो भेदः स कथं विनिवार्यते ॥१३६॥

But, (it is said), the different deities,¹ viz. Āditya and others, are first (or, earlier) mentioned beside (lit. in addition to) that;² how can that be explained (away)? [136]

This stresses the opposition to Prāṇa (=Sūtra) as marked by the beginning of the story (*ākhyāyikā*).

¹Literally, variety or maniness in respect of deities.

²This refers to the individual self.

नैवं तस्य समस्तस्य प्राण एकत्वहेतुतः ।
अरनाभ्यादिदृष्टान्ताद्वायुप्राधान्यतस्तथा ॥१३७॥

(The answer to the question is:) This cannot be so (said or asked), since Prāṇa is the cause of bringing about the unity

of the many, (as is clear from the illustration of the spokes and the hub) etc.¹ and also from the vital breath's having principal importance.² [137]

¹The word etc. implies *eṣa u hy eva sarve devāḥ* and *katama eko devaḥ* The illustration occurs in BU 2.5.15.

²Cf. CU 4.3.1: *vāyur vāva saṁvargaḥ*.

Now, there is in verses 138-157 argument about the gross body as non-Ātman.

संघात एव भोक्तास्तु तस्य प्रत्यक्षसंगतेः ।
न तु तद्व्यतिरिक्तस्य भोक्तृता मित्यसंभवात् ॥१३८॥

(There is an argument of the opponent:) Let the conglomeration (of the elements)¹ be the enjoyer (i.e. experiencer), for it is in accordance with direct perception.² And, thus, there cannot be the nature of any one/thing beside that as the enjoyer (i.e. experiencer), since there is no means of proving it. [138]

¹SP and NKL point to *bhūtacatuṣṭayasamāhāra* as the gross body (i.e. *saṁghāta* 'conglomeration').

²See, for example, the direct awareness, i.e. experience, of a person as 'I am fair' (SP) or 'I am a human being' (NKL).

नाचेतनस्य भोक्तृत्वं कथंचिदवकल्पते ।
चिदन्यस्य च भोग्यत्वात्कम्बलौदनतोयवत् ॥१३९॥

(The answer to the argument is:) This is not so, because the nature of an enjoyer (i.e. experiencer) cannot somehow¹ be attributed to (lit. posited of) a non-sentient (thing) somehow,¹ since whatever is other than sentience is (merely) of the nature of what is to be enjoyed (i.e. experienced) in the same way as a blanket, cooked rice and water etc. [139]

¹It means: without reason, purely out of imagination. NKL brings out the import of this thus: *cidviśiṣṭaḥ kāyo bhokteti tad-abhyupagamaḥ* (clarified by the editor as *dehātmavādinō 'bhyupagamaḥ*), *tatra mānaṃ ca pratyakṣam eveṣṭam* (clarified by the editor thus: *pratyakṣātiriktapramāṇānānigīkārāt iti bodh-yam*).

न चापि चिद्विशिष्टत्वं प्रत्यक्षेणोपलभ्यते ।

चित्संबन्धोपलब्ध्यर्थं तज्ज्ञाता कः प्रकल्प्यते ॥१४०॥

And, further, the nature (of that conglomeration) as (what is) characterized (lit. qualified) by sentience cannot be grasped (i.e. perceived) directly; as such, who could be (imagined/postulated) as the knower of grasping its relation to sentience?

[140]

The argument is: The opponent holds the gross body characterized by sentience as the experiencer; but it is already pointed out that direct perception of a non-sentient conglomeration is impossible and no other means of perceiving that is available! SP is clearer (than NKL) on this point. Thus it states: *cidviśiṣṭasya meyatve 'pi jñātā deho 'nyo vā nādyā ekasya jñātrjñeyatvāyogān netaro jñātrantarasya te (= ākṣepakasya) ani-ṣṭeḥ*.

नेह चिद्व्यतिरेकेण स्वार्थं किञ्चिदपीष्यते ।

नापि स्वार्थातिरेकेण प्रमाणफलभागभवेत् ॥१४१॥

Here¹ is not accepted anything else than sentience as its (desired) object;¹ nor also does (sentience) come to enjoy the result of any means of knowing which is other than (lit. beside) itself.³

[141]

¹That is 'in this world and in the scriptures' as SP clarifies.

²Or, its own end, i.e. aimed thing.

³This is another meaning of *svārtha*.

न ह्यचित्कं प्रमेयं सच्चिन्मिदं चिदपीक्ष्यते ।
न चानुभूतिः प्रात्यक्ष्यमन्यतोऽपेक्षते जडात् ॥१४२॥

It is not accepted that a non-sentient, being itself an object of knowing, is knower of sentience (or, the sentient).¹ Nor again does any experience (i.e. knowledge)² expect direct perception by some other (who is) non-sentient.³ [142]

¹This argument proceeds from the non-existence of another sentient knower.

²Experience is *jñāna* which is here accepted in the sense of the experiencer (*jñātr*).

³Or alternatively, by someone other than a non-sentient. Cf. SP: *jadād ajadād iti vā chedaḥ*; thus it reads alternatively ... *pekṣate 'jadāt*.

देहात्प्रात्यक्षनिष्पत्तौ न च प्रात्यक्षमिष्यते ।
लिङ्गस्य चाप्रमाणत्वात्कुतः प्रात्यक्षमानिता ॥१४३॥

Also, direct perception¹ is not accepted (lit. desired) in securing the direct perception of it² by³ the body and (*ca*), since *liṅga* 'characteristic (mark)' is not (in this respect) a means of knowing;⁴ how can the body be the direct perceiver? [143]

The argument is based on the opponent's holding *deha-viśiṣṭātman* as Reality.

¹This *pratyakṣa* refers to the means.

²This is *pratyakṣa jñāna*, of sentient, viz. the result, for the opponent holds the body as identical with the Ātman (*dehātmavāda*).

³*dehāt* is *hetau pañcamī*, i.e. *dehadvārā*.

⁴This, i.e. *liṅgasya apramāṇatva*, is owing to the impossibility of any characteristic mark by which the *dehātmavādin* can find any *liṅga* as the means of knowing the *dehātman*.

तथार्थान्तरसंबन्धे प्रत्यक्षे देहनिष्ठिते ।
अनुसंधानसंसिद्धौ न किञ्चिन्मानमिष्यते ॥१४४॥

And, further,¹ in relation to the direct perception of the body, there is not (i.e. cannot be) accepted any means of knowing for ascertaining its connection with (any other object necessary) towards a recollection (*anusandhāna*) of it. [144]

¹In place of *tathārthāntara* ... NKL reads *yathārthāntara* ... the purport of that reading cannot be pointed out significantly.

वागभिव्याहृतिश्चेयं लिङ्गाप्रामाण्यवादिनः ।
अप्रत्यक्षात्परज्ञप्तिसंगतेः स्यादनर्थिका ॥१४५॥

Furthermore, for the advocate of the non-authoritativeness of the characteristic mark, this statement would be meaningless on account of the impossibility of (its) association with any other (thing) owing to the absence of direct perception (of it).¹ [145]

¹Translation accepts NKL reading *apratyakṣāt* instead of AnSS edition *āpratyakṣyāt*.

स्वात्मदृष्ट्यनुरोधेऽपि मौढ्यमेव प्रसज्यते ।
व्युत्पत्तेः साधुलोकस्य न कश्चिदपि दित्सति ॥१४६॥

Even if one's¹ own theory is followed, there would follow foolishness only as contingent. None among the good people would give (to this view any credit) of wisdom (as of any specific information). [146]

¹NKL specifically mentions the name of Cārvāka.

अधर्मादिभयाभावाद्धन्युरेनमशङ्किताः ।
आदद्युश्च बलाद्वित्तमेतद्व्युत्पत्तितः फलम् ॥१४७॥

And this would be the result of (such) knowledge, viz. they¹ (the followers of this view), would kill this one (viz. the wise one)² being free from any fear and since there is no danger of any irreligious behaviour etc., they would perforce snatch away (this one's) wealth. [147]

¹SP points out the over-bearing nature of the follower of Cārvāka: *unmattapakṣe nikṣiptaḥ san* and then remarks that they are worth ignoring (*upeksyaḥ*).

²That is, the one mentioned in the preceding verse.

आपेक्षणे विशेषस्य दृष्टत्वाद्देहसंहतिः ।
न भोक्त्री सुखदुःखादिफलानां स्यात्कदाचन ॥१४८॥

(And) since there is seen a particular person¹ (as related to) the action of shaking (by hand), the conglomeration (of the four elements) in the form of a body would never be the enjoyer (i.e. experiencer) of the results, viz. happiness, sorrow and others.² [148]

This is one more reason for holding the body as non-Ātman.

¹The touch of only one particular body is meant.

²SP explains: *ādipadam tadavāntarabhedasamgrahārtham*, signifying other experiences.

यदि संघातमात्रस्य भोक्तृत्वमिह कल्प्यते ।
संघातस्याविशिष्टत्वान्नातिशीतिर्भवेत्सदा ॥१४९॥

If it is accepted here (i.e. in respect of the object to be enjoyed/experienced) that the nature of an enjoyer/experiencer is only a conglomeration (of four elements); then, that conglomeration being unspecified, there would not ever be a special mention (of any particular body). [149]

These statements are made by way of the Vyatireka form of argument.

ईषत्संपृष्टमात्रस्य बलाच्चापेषणात्तथा ।
 देहादिभिन्नजातीयो भोक्ता यस्य च वादिनः ॥१५०॥
 धर्मादिहेतुसंबन्धबहुत्वात्स्यात्समञ्जसम् ।
 पेषणापेषणकृतवेदनायां भवेद्विदा ॥१५१॥

So also, (there would not be a special mention of any particular body), caused by just a gentle (lit. little of a) touch or vigorous shaking by a hand. But (or, as against this (*ca*)), in the case of one who holds (lit. speaks) that the enjoyer (or, experiencer) is of a nature different from (that of) a body etc.,¹ [150] (the specification arising from different ways of touch) would be understandable (i.e. reasonable) owing to the variety (lit. maniness) of the cause(s) such as merit (*dharma*) etc.,² (for) there would be difference(s) in respect of the feelings³ caused by his being shaken by a hand or non-shaking (thereby). [151]

¹What this 'etc.' means is not clear; but 'SP' states there is *avāntarabheda-saṃgraha*.

²The word etc. here refers to *adharma* and *vāsanā*.

³This is clarified in the following verse.

सुखदुःखादिहेतूनामुत्तमाधममध्यतः ।
 तत्प्रबोधविशेषोऽयं युक्त एव भवेत्तदा ॥१५२॥

Only then would it be reasonable that this particular (type)¹ of the (resulting) waking of that (person)² owing to the (causes of) pleasure, sorrow (i.e. feeling of some trouble) etc.³ which may be of the highest, the lowest and the ordinary⁴ types. [152]

¹This explains *bhidā* in the preceding verse.

²Reference is to the *Jīvātman*, in the view expressed from verse 150b onwards.

³This is related to *dharmādharmādi* in the preceding verse. The word etc. refers to the different articulations or the loud

or gentle calls in the address which accompany the shaking by a hand.

⁴*madhya* is for *madhyama*.

अस्ति चायं विशेषोऽत्र यत्संस्पर्शनमात्रतः ।
अबुध्यमानः संसुप्त आपिष्यापिष्य बोधितः ॥१५३॥

Furthermore, this is the (specific) difference here (i.e. in this view): the sleeping one, who did not become awake by mere (or gentle) touch, was awakened after (Ajātaśatru) had shaken him again and again (by his hand). [153]

अत आपेषणाद्योऽसावुत्थितः करणैः सह ।
राजेव सचिवैः सार्धं स भोक्तेहेति गम्यताम् ॥१५४॥

Therefore that one, who, together with the organs, became awake is to be understood, like a king by his servants, as the enjoyer (or, experiencer) here.¹ [154]

¹That is, in this body (SP).

मृतकल्पमिमं देहं स्वचित्तावेशयन्निव ।
ज्वलन्निव समुत्तस्थौ यः स भोक्तेति गम्यताम् ॥१५५॥

That one, who rose up, like a burning fire flashing forth,¹ putting his own sentience² into the almost dead body,³ as it were, should be understood as the enjoyer (or, experiencer). [155]

This explains *jvallann iva sphurann iva kutaś cid āgata iva* in BUB.

¹*svacittāveśayan* is to be split as *svacittā* (i.e. *cit-tā*)-*aveśayan* Yet read *Vārtikasāra* 2.1.37: ... *svacitaavezayann iva* which is better. translation is in agreement with it.

²Or, the dead-looking body.

³Cf. *na hi jvalanam agner iva cid ātmano 'sti kiṃ tu tathā*

sphuraṇaṃ grhītvā jvalann ivety uktam (SP).

क्रोधहर्षभयोद्वेगज्ञानधर्मैर्विशेषयन् ।

शरीरं यः समुत्तस्थौ स भोक्तेत्यवसीयताम् ॥१५६॥

That one is to be understood as the enjoyer (or, experiencer) who rose up modifying the (dead-looking)¹ body with the properties, viz. anger, joy, fear, dejection and *jñāna*. [156]

This explains *piṇḍaṃ ca pūrvaviparītaṃ bodhaceṣṭākāraviśeṣā-dimattvenāpādayan* in BUB (p.256).

¹Cf. the word *mṛtakalpanam* in the preceding verse.

Now follows in verses 157-62 another explanation as to why *Prāṇa* (viz. the vital force) is non-*Ātman*.

अपि प्राणस्य पारार्थ्यं संहतत्वाद्गृहादिवत् ।

ततश्च भोग्यरूपस्य भोक्तृत्वं नोपपद्यते ॥१५७॥

Also, since, in the case of *Prāṇa* (viz. *Sūtra/Hiraṇyagarbha*), there is subservience to someone else, as is in the case of a house etc., on account of its being a conglomeration (*saṃgraha*) and, being as a result (*tataś ca*), of the nature of what is to be enjoyed (or, experienced), it is not reasonable to hold its being the enjoyer (or, experiencer). [157]

देहस्यान्तर्गतः प्राणः स्थूणावद्देहभृत्सदा ।

संहन्यते शरीरेण यथा वायुस्तथैव सः ॥१५८॥

Prāṇa 'the vital force', being fixed inside a body, just like some pillar (in a house), is ever possessed of a body; it is fixed just like the wind¹ that is bound to a body. [158]

¹SP points out that this wind is the breath or *mukhya Prāṇa*.

यत एवमतः प्राणो गृहादिवदिहेष्यते ।

देहाच्च देहधर्मेभ्यो विधर्मात्मावभुक्ततः ॥१५९॥

Since this is so, therefore, Prāṇa 'the vital force' is understood here (i.e. in the body) like a house (viz. a conglomeration subservient to someone else); therefore, it is, in respect of properties, different from a body and the properties of that body and therefore a non-enjoyer (or, non-experiencer).¹ [159]

¹See SP: *saṁhatatvahalaparāmarśī*.

स्वात्मांशान्सिसजातीयविविक्तफलसद्भवत् ।
 संहतत्वात्तथा प्राणोऽसंहतात्मोपभोगकृत् ॥१६०॥
 स्वजन्मोपचयग्लानिनाशाख्याकृतिजन्मदिग्- ।
 धर्मानपेक्षसंलब्धसत्त्वादस्वार्थरूपकः ॥१६१॥
 तद्गोचरैकसंद्रष्टृविज्ञात्रर्थं समीक्ष्य हि ।
 प्राणस्य तद्गुणानां च तथार्थत्वं प्रतीयताम् ॥१६२॥

So also, being bound (in a body), Prāṇa 'the vital force' is of help to (or, of use for) the (ever) bound Ātman,¹ just like a house which is a result (lit. fruit) distinct from those that are its likes (or similar ones) which are its own parts² or any (other) house(s) having similar parts.³ [160]
 Indeed, on seeing that it⁴ is (useful) only for the seer and the knower (of its objects), the one who comes to manifest itself and to have its own form without depending on the birth, growth, decay, death, name and the form, together with the space (lit. direction) of its rise,⁵ [161-162ab]
 let it be understood that Prāṇa 'the vital force' and its properties have a similar purpose.⁶ [162cd]

We have ignored the NKL edition which reads *svajanma ... nāśākhyākṛti dṛgjanma dharmāna ... rūpaka ... tadgocaraika ... trartham* as one word, since it is metrically faulty. Yet, *janma* which is repeated in the first line of verse 161 offers some difficulty, and which I have somehow solved! Therefore, it appears that the text given does not stop as ... *rūpakah* in 161d.

¹The Ātman is not combined with the body; it is taken as bound to it through ignorance.

²This refers to the pillars and such other parts of that house which, being combined together with it, are subservient/useful to it (*svātmāmśa*).

³Some similar (*sajātīya*) houses made of these (i.e. similar) parts (*aṁśas*).

⁴The idea of the house (*aṁśin*) persists here also.

⁵Literally, the birth and the space of the Ātman. Or does it refer to the properties of the house (*aṁśin*)?

⁶*tathārthatva* is *parārthatva*.

It is to be noted how, by this single word, Sureśvara conveys the similarity of a house etc. with Prāṇa and its accompanying properties (*dharma*s) which is brought out in BUB, in its fullness.

Read NKL: *prāṇataddharmāṇāṁ ca tathātvam anumeyam ity arthaḥ*.

In verses 163-174, there is now a discussion on the nature of the Ātman in respect of which some division (into parts) is (only) imagined.

ननु वेदान्तसिद्धान्ते न वस्त्वन्तरमिष्यते ।

सांख्यराद्धान्तवर्तिकचित्प्रत्यगात्मैकवस्तुनः ॥१६३॥

(An objection is raised:) But, in the Vedānta doctrine, they do not accept (i.e. hold as existing) anything other than only the single inner self, as in the Sāṃkhya doctrine.¹ [163]

The objection proceeds from the basic impossibility of Anvaya and Vyatireka method of inference. For this method, see our book [Vol.1:1982] Introduction.

¹The Sāṃkhyas accept many Puruṣas, i.e. as many inner selves are there as there are bodies and, therefore, Anvaya and Vyatireka method of argument is possible for them.

Incidentally, a fastidious person might point to the word *rāddhānta* as indicative of the rejected view! See Belvalkar's

Note on BSB 2.2.17 (*The Brahma-Sūtras of Bādarāyaṇa with the Comment of Śaṅkarāchārya Chapter II, Quarters I & II* third edition, p.114, Poona: Bilvakuṇja Publishing House, 1938). But this is hardly meant.

ऐकात्म्याविद्यया सर्वं प्रतीचि परिकल्पितम् ।
प्राणाद्यनात्मजातं यद्रूपं नाम च कर्म च ॥१६४॥

(The objector says further:) It is owing to the ignorance about the singleness of the Ātman that all is imagined (to be existing) in the case of the inner self—all, viz. *prāṇas* etc. which is the entire collection of the non-Ātman, viz. what are called a form, a name and (any) activity. [164]

This averts the notion of *prāṇa* and other things as existing beside the Ātman.

कल्पिताकल्पितं सर्वं यदात्मैवाभ्युपेयते ।
अन्वयव्यतिरेकोक्तिस्तदैक्यान्नेह युज्यते ॥१६५॥

Since all, viz. whatever is imagined and whatever, not imagined, is accepted to be just the Ātman; therefore, owing to this singleness of the Ātman, there cannot be (made) any reasonable statement (on the basis) of Anvaya and Vyatireka. [165]

This re-assertion by the objector aims at pointing to the imaginary nature of non-Ātman conceived as existing in the inner self. The thrust of this argument is noticed in the following verse. Also, see verses 171ff. for discussion on this point again.

नान्वयो व्यतिरेको वा कल्पितस्यानृतत्वतः ।
अकल्पितस्य चैकत्वान्नितरां न प्रसिध्यति ॥१६६॥

Since the (thing) imagined is false (or, unreal), therefore, there cannot be (any statement made about it, basing it on) Anvaya and Vyatireka. And,¹ the non-imagined (viz. the real, i.e. the

sthānam.

ऐकात्म्यसिद्धौ दोषः स्यात्तत्सिद्धिश्च न वास्तवी ।
 प्रामाणिकी हि तत्सिद्धिरतो नासौ विरुध्यते ॥१७१॥
 न चापि मानव्यापारव्यपेक्षैकात्म्यनिश्चितौ ।
 तत्फलस्य समाप्तत्वादपेक्षा निष्फला यतः ॥१७२॥

(If it is argued:) 'The singleness of the Ātman being taken as established,¹ there will follow the fault (viz. impossibility of the method of Anvaya and Vyatireka),'² (the answer is:) 'No, (that is not so), its establishing (thereby) is not real; (for) that establishing (of it) is depending on the means of knowing³ and, therefore, it is not opposed. [171]

Furthermore, there is no need whatever of the function of any means of knowing⁴ with respect to deciding the singleness of the Ātman, since any expectancy about it⁵ is useless (lit. unproductive), for its result is already obtained.⁶ [172]

The argument in verse 165 is the basis of the argument here. In these two verses, it is taken that the singleness of the Ātman is known.

¹This refers to *svaprakāśatva* of the Ātman, i.e. its singleness.

²If singleness is already established, there is no usefulness of the method of Anvaya and Vyatireka.

³This refers to understanding the sentences of the Śruti, i.e. their verbal level can be taken as *pramāṇagocara* and, therefore, Avidyā.

⁴The *pramāṇavyavahāra* is understood as *mithyā* 'false'.

⁵This refers to any *pramāṇa*.

⁶That is, self-established.

यावत्त्वागमतः साक्षात् वेत्त्यात्मानमद्वयम् ।
 अन्वयाद्यात्मबोधार्थं तावत्तत्केन वार्यते ॥१७३॥

But, so long as one does not directly know (i.e. learn) from the Śruti (the nature of) the Ātman as without any duality,

who would set aside for that while Anvaya etc. (is available) for getting to know (the nature of) the Ātman? [173]

This verse grants the use of the method of Anvaya and Vyatireka, if, i.e. while, the singleness of the Ātman is not known.

अज्ञानं च तदुत्थं च ह्यात्मैवाज्ञाततत्त्वकः ।
तत्तत्त्वबोधात्तद्बाधः सर्परज्ज्वादिबाधवत् ॥१७४॥

Ignorance and what arises from it are but (i.e. nothing else than) the Ātman alone, its nature remaining (for that while) unknown; therefore, by the knowing the nature of it (viz. the Ātman), there follows the stultification (i.e. removal) of that,¹ just like the stultification of a serpent (etc.) by (knowing the nature of) a rope etc.² [174]

¹This refers to 'Ignorance and what arises from it'.

²The word etc. refers to the other things that are taken wrongly through superimposition on them of the nature of others.

Here also, Sureśvara uses *ādi* only after *rajju*, implying it also after *sarpa*.

क्लृप्तानामपि रज्ज्वादौ कल्पितान्तरसंश्रयात् ।
क्लृप्तान्तरापनुत्तिः स्याद्यथा तद्वदिहात्मनि ॥१७५॥

Further, as there is (lit. would be) removal of the other things which are imagined in the place of a rope etc. among (objects that are) imagined, in the same way, (there is removal of what is imagined) in the Ātman. [175]

The verse proceeds from the argument that all *pramāṇa-vyavahāra* being false, the result, viz. knowing thereby the nature of the Ātman from the Śāstras, is also false.

प्रत्यङ्मानैकमेयोऽतो भोक्ता भोग्यं ततोऽपरम् ।
भोग्यानां व्यभिचारेऽपि भोक्तैकोऽव्यभिचारवान् ॥१७६॥

Therefore, the enjoyer (or, experiencer) alone is the one inferred from the experiencer of the inner self and the enjoyed (or, experienced) is different from (lit. other than) that. (And) even in variation (*vyabhicāra*) of the objects that are enjoyed (or, experienced) is (the Ātman) alone invariably (to be understood). [176]

This concludes the discussion of 'individual self' and others, being perceived (*drśyamāna*), are only false (or imagined).

Now follows in verses 177-182 the explanation of the BU sentence: *tam pāṇināpeṣam bodhayamcakāra*.

बृहन्नित्यादिभिः प्राणो बोध्यमानोऽपि यत्नतः ।
 नैवान्वबुध्यत यदा चक्रे यत्नान्तरं तदा ॥१७७॥
 पाणिनापिष्य बहुशः सुप्तं काश्योऽप्यबोधयत् ।
 आपेषोद्धृतसंक्षोभस्ततोऽसौ प्रत्यबुध्यत ॥१७८॥

When Prāṇa (the vital force in the body of the sleeping man), though addressed again and again (*yatnataḥ*) by (the names/attributes) Brhat and others, did not become awake, then (Kāśya) made another effort. [177]

Having many times shaken the sleeping (man) by his hand, Kāśya (finally) awakened him and then, being disturbed by the shaking, he (also) became awake. [178]

कारणानामिदं वृत्तं यन्निमित्तान्तराश्रयात् ।
 स्वात्मकार्यसमुद्भूतिरम्बरादभ्रभूतिवत् ॥१७९॥

This is the happening in the case of causes that there followed (lit. arose) the effect of their own operation in the same way as there is the rise (or, movement) of clouds in the sky. [179]

The argument is: The sky does not function in any way, yet there is rise or movement of the clouds in the sky, thanks to

the winds blowing in various directions. So also, the shaking of the limbs caused the waking of Prāṇa 'the vital force' in the body—but not the Ātman that is ever awake (and is thus free from any effect of the shaking). This is clarified in the following verse.

आपेषाल्लीनबुद्ध्यादिसमुत्पत्तौ परात्मनः ।
घटाकाशवदुत्पत्तिर्नाञ्जसैव सदा दृशेः ॥१८०॥

The waking of the highest Ātman consequent upon the rise of (i.e. being active/operative of) intellect and others, which had merged (in sleep), by the shaking (by Kāśya's hand), is not acceptable (or, reasonable), even like the origin of sky in a pitcher, because (that highest Ātman) is ever the seer (i.e. always awake). [180]

The argument is: In the creation of a pitcher, there is consequently a supposed (i.e. false) creation of 'sky in a pitcher'. So also, the waking up of intellect and other organs is assumed to be the waking of sentience in the sleeping man.

तस्मादप्रतिबोधेन प्राणोऽभोक्तेति गम्यताम् ।
पुंसस्तु प्रतिबोधेन भोक्तृतैवावसीयते ॥१८१॥

Therefore, from this non-waking, let it be understood that the vital force (within) is the non-enjoyer (or, non-experiencer). Its being the enjoyer (or, experiencer) is concluded by the man's waking. [181]

This explains the BU sentence: *tau ha puruṣaṁ suptam*

The conclusion that the vital force within the earlier sleeping man is the enjoyer (or, experiencer) is reached through the force of only verbal argument. This becomes clear from the following verse.

अदाहवगनां दग्धृत्वं यथा दाहकसंगतेः ।

भोक्तृसंयोगतस्तद्वद्वोक्तृत्वं देवतात्मनः ॥१८२॥

As the nature of a burner (or, what burns) is attributed to a non-burner (also), on account of its association (i.e. being together with) what (really) burns; so also, the nature of an enjoyer (or, experiencer) is attributed to the vital force, which is of the nature of a deity, on account of its association (lit. conjunction) with a (real) enjoyer (or, experiencer). [182]

Now follows in verses 183-207 the explanation of BU 2.1.16 (and allied matter).

देहेन्द्रियमनोधीभ्यो विविच्यात्मानमेकलम् ।
भोक्तारं दर्शयित्वाथ राजा गार्ग्यमपृच्छत ॥१८३॥
आपेषणेन ब्रुबुधे यः प्राणादिविलक्षणः ।
क्वामूदयं पुरा बोधात्कुतश्चागतवान्पुमान् ॥१८४॥

Having thus understood the Ātman, who is single, as different from the body, its organs, *manas* and intellect, and shown it to be the enjoyer (or, experiencer), the king then asked Gārgya: [183]

Where was this one before waking up, (the one) who has a nature different from that of Prāṇa 'individual self' and others and was awakened by (Kāśya's) shaking him by his hand and where has this Puruṣa come from? [184]

अन्तःकरणसंबन्धे विज्ञानमिति कर्तरि ।
प्रत्ययः करणार्थः स्यात्क्रियायां भावसाधनः ॥१८५॥
प्रमेयार्थविवक्षायां शब्दः स्यात्कर्मसाधनः ।
यथोक्तानामसद्भावात्प्रायार्थः प्रत्यगात्मनि ॥१८६॥

In relation to the internal organ, the word *vijñāna* is expressive of the agent;¹ the (same) suffix is expressive of the means (or, instrument)² if it would be expressive of the action (proper), being a conveyer of process,³ [185]
(and) that (same) word is a conveyer of the object (of action),

when the intention would be to convey (the meaning of) the object to be known.⁴ Of these many meanings which are thus stated, the meaning is, according to our intent (or, interpretation), that which is '(mostly) consisting in'⁵ the inner self.

[186]

In these two verses, Sureśvara resorts to grammatical erudition and explains the meaning of *vijñāna*, as he accepts it. He has done this, keeping in view the opinion of Bhartṛprapañca (conveyed in BSB in the word *kecit*, and as annotated by the editor of NKL: *bhartṛprapañcamatanirāsārtham*) that by the word *vijñāna* is meant the inner self as the product of the Brahman—read NKL: *vijñānamayaḥ ity atra vijñānapadena brahmābhīdhānāt tadvikāratvaṃ jīvasyocyate*. Sureśvara's opinion is clarified by both SP and NKL (which almost fully concurs with SP) and, therefore, read SP: *pratīci kūṭasthe yathokta-karṭṛtvādyabhāvād atrāsyā karṭṛvyutpattyāntaḥkaraṇaviṣayatvāt pratīcas tadavikāratvāt prāyārtho mayat ity āha*.

¹ Cf. Pāṇini Sūtra 3.3.113: *kṛtyalyuṭo bahulam*.

² Cf. Pāṇini Sūtra 3.3.117: *karāṇe lyuṭ*.

³ Cf. Pāṇini Sūtra 3.3.115: *bhāve lyuṭ*.

⁴ Cf. Pāṇini Sūtra 3.3.116: *karmaṇi lyuṭ*.

⁵ Cf. Pāṇini Sūtra 5.4.21: *prāyārthe mayat* (according to *Kāśikā*).

स्वाभासवदविद्योत्थबुद्ध्यादिव्याप्तिविभ्रमात् ।

तदात्मत्वाभिमानित्वाद्विज्ञानमयतात्मनः ॥१८७॥

The Ātman is taken to be *vijñānamaya* 'mostly consisting in' the internal organ (viz. intellect) owing to the error of its (supposed) pervasion by intellect which has arisen from ignorance that is (merely) its (viz. the Ātman's) semblance and also because it identifies itself with it.

[187]

This verse explains why the Ātman, the *kṣetrājña*, is *antaḥkaraṇaprāya*.

साक्षित्वेनोपलभ्यत्वात्साक्ष्यबद्ध्यादिसंश्रयात् ।
अकारकफलत्वेन तेन प्रायार्थतेष्यते ॥१८८॥

(Or alternatively/in addition) because it is noticed as of the nature of the witness¹ and has a resort in intellect and others,² which are to be witnessed, and because it is not of the nature of a result of any agent;³ therefore, it is understood as a thing mostly consisting in (intellect). [188]

¹This is because it is not a modification (*vikāra*).

²*manas*, *ahamkāra* and other organs are meant.

³Because it is not a *kriyā* etc. (Is it *prāpti* 'reaching (something)' or *saṃskāra* 'polishing'?)

यतो विज्ञानमानी सन्सर्वं वस्त्ववगच्छति ।
विज्ञानमयता तस्मात्प्रतीचोऽबोधकारणात् ॥१८९॥

Since, identifying itself with intellect, it grasps all things (as existing outside); therefore, the inner self is taken as mostly consisting in intellect, there being absence of the knowledge (of its own true nature) on the part of it. [189]

This is to answer a possible doubt: 'How could the all-knowing be a witness depending upon intellect and others?

विज्ञानेन विशिष्टं वा यस्मान्मेयं प्रपद्यते ।
प्रायार्थत्वं प्रतीचोऽतस्तदभिन्नग्रहाद्वेत् ॥१९०॥

Or, since it comes to know the object of knowing which is specified by *vijñāna* 'intellect', therefore, the inner self becomes a thing 'mostly consisting in' (it), viz. that is taken as non-distinct from (it). [190]

विज्ञानमय इत्युक्त्वा पृथिव्यादिमयोक्ततः ।
षड्विकारनिषेधाच्च प्रायार्थत्वं समञ्जसम् ॥१९१॥

The nature of the inner self as 'mostly consisting in' (intellect) is reasonable (by the Śruti's) having said (that the inner self) is 'mostly consisting in' *vijñāna* 'intellect', and by (first) calling (the same) as 'mostly consisting in' earth etc. and thereafter by rejecting the six (known) modifications (of the same).¹

[191]

¹This is on the basis of SP.

अनात्मनो यतोऽशेषान्कल्पितत्वादकल्पितः ।
पूरयन्पुरुषः प्रत्यक्सर्पादीन्नशना यथा ॥१९२॥

The inner self is (called) *Puruṣa*, since, itself unimagined it (is ever) creating (lit. filling this world with) all the non-Ātmans (which are so called) on account of their being imaginary (even) as a girdle (that is real, creates) a serpent etc.¹ [192]

This is Sureśvara's etymology of the word *Puruṣa* for the inner self, viz. it is from verb root *pṛ* 'to fill'—it is offered in the Brāhmaṇical style.

¹The use of 'etc.' is really unintended; yet see verse 174 above for similar mode of writing.

व्युत्पत्तिरियमेवात्र तात्पर्यस्य समीक्षणात् ।
स वा इति ह्युपक्रम्य नैनेनेत्यादिनिर्णयात् ॥१९३॥

It is reasonable to accept only this derivation in view of the purport (of the BU passage), for it has first begun with (the words) *sa vā* and then finally concluded in (the words) *nainena*¹

[193]

Sureśvara states the reason for offering his own etymology of the word *puruṣa* in preference to BUB's *puri śayanāt* SP states the following in this regard: *pūrṇatvāt puruṣa ity eṣaiva vyutpattir atra grāhyā pratyakpūrṇatve vākyatātparyadrṣṭer ity arthah.*

¹This refers to BU 2.5.18: *sa vā ayam puruṣaḥ sarvāsu pūrṣu puriśayo nainena kiñcanānāvṛtaṃ nainena kiñcanāsamvṛtaṃ*.

It appears that Sureśvara is ignoring here the word *puriśaya* which BSB maintains! (Also cf. BUBV 2.5.120 on BU 2.5.18.)

इयं तावत्पदार्थोक्तिः संबन्धोक्तिरथाधुना ।
प्रश्नस्य क्वैष इत्यादेः किमर्थोऽयमुपक्रमः ॥१९४॥

This then (*tāvat*) is the statement of the meanings of the (different) words;¹ now is a statement (made) about the relation (of them to what follows); as such, there is a question: 'What is the purpose of this introductory, viz. of the question, "where (was) this ...?"'. [194]

¹These are *vijñāna* and *puruṣa*.

In verses 195-201, there follows a statement of Bhartṛprapañca's view on the question and its answer.

चोद्यैकमूलां प्रश्नोक्तिं केचिद्व्याचक्षतेऽपरे ।
याथात्म्यप्रतिपत्त्यर्थमुत्थितस्य प्रचक्षते ॥१९५॥

Some others¹ explain that the question is rooted in some objection: They state that (the question) which has arisen is for understanding (clearly) the true nature (of the Ātman)² — [195]

¹This is a reference to Bhartṛprapañca (NKL).

²The second half of the verse seems to be parenthetical.

पुंसोऽस्य ज्ञस्वभावत्वे करणेष्वपि सत्सु च ।
कादाचित्कोऽवबोधोऽस्य कुत इत्युच्यतां यथा ॥१९६॥

viz. "How is it then that this Puruṣa, being of the nature of a knower, and the (various) organs also are (present), this one can have knowledge belonging to (or, arising at) only

some (particular) time?"; let (this) be told.

[196]

The argument is: The inner self is an ever knowing (agent) and has the help of all the organs. As such, it should ever be knowing, i.e. not ever asleep. See how SP refers to the Bhāṣya of Bhartṛprapañca: *bhoktur jñānasvabhāvatve karaṇeṣu vidyā-māneṣu katham kadācit prabodha iti tadīyabhāṣyārtham āha.*

विहायैतच्छरीरं वा गतो देशान्तरं पुमान् ।
विनष्टो वा कुतो भूयो देहमागादितिर्यताम् ॥१९७॥

'Either this Puruṣa left the body and went to (some) other region (or, place), or being lost (somewhere), whence has he come back to the body (again)?' Let this be told (or, explained).

[197]

SP appears to quote Bhartṛprapañca thus: *uktaṃ hi atha punar vihāyaitad asaṃnihito 'bhūd vinaṣṭo vā kutaḥ pratyāgamanam iti.*

प्रष्टव्यमेतद्गार्गेण शिष्यत्वान्न त्वचूचुदत् ।
नैवोदास्ते तथापीनो बोधाभ्युपगमात्स्वयम् ॥१९८॥

Being a pupil (now), Gārgya should have asked this; and (*tu*) he did not raise any doubt! Even then (*tathāpi*) the king (*ina*) did not remain silent because he himself had accepted to enlighten (him).

[198]

Under this verse also, SP quotes Bhartṛprapañca thus: *yathāhuh— tad etad gārgyeṇa praṣṭavyam āsīt sa hi śiṣyaś codayiteti.* Then again: *uktaṃ ca yadā codayituh śiṣyasya pratipattir na bhavaty ācāryaś ca tam artham vyācikyāsur bhavati tadā svayam eva codyam utthāpya vyācaṣṭa iti.*

अर्थिनेऽर्थं प्रतिज्ञाय नासंपाद्य निवर्तते ।
यथार्थितं सत्पुरुष इति सत्पुरुषव्रतम् ॥१९९॥

A good man, having promised to a suppliant (to give) some particular thing, does not hold himself back if (i.e. till) he has not granted it in accordance with the supplication; this is the vow (i.e. unfailing behaviour) of a good man. [199]

This general statement implies that, being a good man, Kāśya does not withhold himself from imparting to Gārgya the instruction regarding the Brahman, even if he was silent and yet wishing to have it.

कूटस्थोऽस्यावबोधश्चेत्कादाचित्कं कुतो भवेत् ।
मतोऽवबोधोऽनित्यश्चेत्कादाचित्कं तदार्थवत् ॥२००॥

If the waking (i.e. knowledge) of this one is immutable, how could (this waking) be belonging to (or, arising at) only some (particular) time? If again it is held that the waking (i.e. knowledge) is not-always-obtaining; in that case alone, its belonging to (or, arising at) only some (particular) time would have been meaningful (i.e. reasonable). [200]

This is said in view of verse 196 above.

Translation follows SP's second alternative explanation, NKL agreeing with it. SP's first alternative is: If the knowledge on the part of the Ātman is immutable and not belonging to (or, arising at) only some time, it should follow that the Ātman is neither asleep nor gone elsewhere. On this, the objector might say: But this is against the usual experience (expressed in) 'I did not know (or feel) anything.' If alternatively, the Ātman's waking is taken as not-always-obtaining, then one cannot explain away the knowledge that belongs to (or, arises at) only some particular time. This explanation, though not altogether impossible, appears laboured or not naturally occurring.

देहादिष्वभिमानोऽस्य कादाचित्कः सहेतुकः ।
आगमापायिसाक्षित्वं नित्यमेवानिमित्ततः ॥२०१॥

(In answer to the above question, which is clarified further, Bhartṛprapañca answers it away thus:) The identification of itself by this one with the body etc. is occurring only at some particular time and is having some cause(s)¹ for it; (but) its being the witness of what comes into existence and goes out (or dies)² is (certainly) perennial owing to its having no cause(s). [201]

¹These are *dharma*, *adharma* etc. The identification by the Ātman with the body and the organs of itself is the basis of its experiences of the results of *dharma*, *adharma* etc.

²Cf. *Gītā* 2.14:

*mātrāsparśās tu kaunteya śītoṣṇasukhaduḥkhadāḥ /
āgamāpāyino 'nityās tāṃs titikṣasva bhārata //*

इदमेव यतो वृत्तं कारणापेक्षिणां सताम् ।
अभूत्वा भवनं तस्मात्कादाचित्कं न दोषभाक् ॥२०२॥

Since, in the case of the existent objects, which expect some cause(s), this (i.e. such)¹ is the behaviour, viz. coming into existence after it has not been there; therefore, the belonging to (or, arising at) some (particular) time (of them)² does not involve any fault. [202]

It follows from the argument in this verse that the *kādācitka* of *dehādyabhimāna* (mentioned earlier) is only natural.

¹Their character as *āgamāpāyin*.

²*dharma* and *adharma*, together with their results, are meant. Cf. SP: *dharmādeś ca pravāhāvicchede 'pi vyaktivicchedān na sadā sattvaṃ na ca sati hetau kāryaniyamaḥ sāmāgryāṃ tanniyamād ato na susūptyasiddhir iti bhāvaḥ (kādācitkaṃ dehādyabhimānasyeti śeṣaḥ).*

In verses 203-204, there is repudiation of Bhartṛprapañca's view.

प्रतीच्येव यतश्चाभूदागाच्च प्रत्यगात्मनः ।
प्रश्नार्थप्रतिकूलत्वात्प्रत्युक्तेर्नेदृगर्थता ॥२०३॥

Such is not the situation,¹ since 'The individual self was (i.e. had merged) in the inner self and also came (i.e. arose) from (that) inner self.' is an answer opposed to the content of the question (viz. the *codya*), (which you have posited).² [203]

This argument is based on verse 200 above.

¹That is, *paroktārthatā* 'the nature of what another person has said' which is for *īdṛgarthatā*.

²In verse 195 above.

गत्यादिसाधनानां च देह एव स्थितेः कुतः ।
देशान्तरगतिः पुंसो नापि नाशोऽस्य युक्तिमान् ॥२०४॥

"Also, since the means of going (elsewhere)¹ exist only in the body; how can there be the Puruṣa's going to some other region? So also, the being lost (somewhere, of this one) is not reasonable." [204]

This verse keeps in view verse 197 above.

¹These are feet, wish, decision.

²Or, it does not stand to reason, because there would not be waking up (or, coming back) again possible. Read SP: *punarutthānāyogād akṛtābhyāgamādiprasaṅgāc ca*.

Now follows Sureśvara's own explanation of the question and its answer.

साक्षाद्ब्रह्मावबोधस्य प्रतिज्ञातत्वकारणात् ।
भोक्तृभोक्तव्ययोस्तत्त्वं वक्तुं युक्तमतोऽञ्जसा ॥२०५॥

Owing to (the situation that) there is a promise¹ of directly informing (Gārgya) about (the nature of) the Brahman, it is (only) proper to declare (i.e. explain) clearly the (true) nature

of the enjoyer (i.e. experiencer) and the enjoyed (i.e. experienced). [205]

This verse fulfils the suggestions in verses 195-196 and 201.

¹Cf. the sentence *vy eva tvā jñāpayiṣyāmi* in BU 2.1.15.

कर्मादिहेतुजं रूपमतत्त्वं तदनन्वयात् ।
अनिमित्तं स्वतस्तस्य सर्वदाव्यभिचारतः ॥२०६॥
अकारकक्रियाकार्यं रूपं प्राक्प्रतिबोधतः ।
बुबोधयिषितं भोक्तुरस्मद्भोचरवर्तिनः ॥२०७॥

The form,¹ (of the *bhoktavya*) which is produced by action etc.,² is false (lit. not its true nature), since it does not follow (i.e. continue to be, in sleep state) and the nature of it (viz. the *bhoktr*) itself does not invariably have any cause (for its existence), [206]

(and) its form is devoid of any agent(s) of activity, action and what is to be done (i.e. to be effected or achieved by an action); (this) nature of the enjoyer (or, experiencer) was sought to be explained (by Kāśya to Gārgya), that which (existed even) before waking (up of the man) and which is within the experience of (all of) us.³ [207]

¹This stands for name, action.

²It refers to *dharma*, *adharma* etc., i.e. *avidyā* and its effects.

³Read SP in this context: *asmatpratyaayaśabdayor gocaro 'haṁkāras tatra sākṣitvena vartamānasyātmano nirvikāraṁ rūpaṁ svāpe*

यतोऽस्य न पुरा बोधात्कर्मादेः कार्यमण्वपि ।
प्रतीचो गृह्यते मानादतोऽयं तत्स्वभावकः ॥२०८॥

(This is so explained by Kāśya) since, before waking (up of a person from sleep), not even any effect of (some) action etc., is grasped by any means whatever, as done by the inner self; therefore, this one (viz. the inner self) does not have

that as its nature.¹

[208]

¹This is to say *akāraḥakriyākārya*. Cp. *paśyan vai tan na paśyati* (BU 4.3.23).

क्वाभूदेष पुरा बोधात्कृतरचायमुपागतः ।
आचक्ष्वैतद्वयं गार्ग्य स्थितावागमनेऽवधिम् ॥२०९॥

(Therefore,) where was this one before becoming awake? Whence has this one come? Tell (me) these two (things), O Gārgya. What again was the duration of that condition (of sleep, *sthiti*) and the coming (i.e. waking)? [209]

This is the meaning of the question in BU according to BUB.

अभूत्प्रतीचोऽन्यत्रायमन्यस्माच्चचायमागतः ।
यदि चेत्कारकत्वं स्यान्नो चेद्भ्रान्तिरियं भवेत् ॥२१०॥

(Possibly) this one (while sleeping) was elsewhere than in the inner self and this one has come back from another (i.e. not from within the inner self); then (in that case) there would be agency (on the part of the inner self)!¹ If that is not so,² then this is mere error.³ [210]

¹That would mean not accepting *akriyākārya rūpa* of the inner self. One wonders why SP adds: *sthitāṁ āgatau ca svayam evāvadhīr nānyaś cet*, though actually it is not mentioned in this verse. (It is mentioned in the preceding verse.)

²Understand after 'so', 'and that is not so' as parenthesis.

³That is false attribution of the non-existing.

यत्र वा अन्यदित्येवं यत्र त्वस्येति चापरम् ।
अविद्याविद्ययोः कार्यं तथा च श्रुतिरब्रवीत् ॥२११॥

And so has the Śruti declared (about) the result(s) of ignorance and knowledge, viz. in *yatra vā anyat*¹ and also elsewhere

in *yatra tv asya*.²

[211]

¹Cf. BU 4.3.31: *yatra vā anyad iva syāt*

²Cf. BU 2.4.14: *yatra vā asya sarvam ātmaivābhūt*.

वक्तुं प्रष्टुं च बालाकिर्न यतो जज्ञिवांस्ततः ।
प्रश्नयोः स्वयमेवार्थं काश्यो वक्तुं प्रचक्रमे ॥२१२॥

Since Bālāki did not know (what) to speak and/or to ask, therefore, Kāśya himself began to explain the meaning of the two questions. [212]

This explains *tad u ha na mene gārgyaḥ* in BU.

पृष्टेनापि न विज्ञातं भवता तदिदं मया ।
उच्यमानं यथा तत्त्वं सम्यक्त्वं श्रोतुमर्हसि ॥२१३॥

You have not known that, even if you are asked (about it); therefore, this one—the truth (or, essence)—as it is, is being explained by me. Therefore, you should hear (it) alternatively. [213]

Verses 214-262 discuss the meaning of BU 2.1.17 (and allied matter).

यत्रैष एतत्सुप्तोऽभूत्स्वनामामन्त्रणध्वनिम् ।
नाश्रौषीद्यन्निमित्तं ज्ञस्तन्निमित्तमिदं शृणु ॥२१४॥

Why, while this one was asleep here, he did not hear the sound of the call of his own names; (and) why he came to know (lit. became a knower of) that—this, (now) listen. [214]

This explains *yatraiṣa etat supto 'bhūt ...* in BU. It refers to the *upādhi* and *upādhyupasaṃhāra* in relation to the Brahman.

त्रैविध्यं लक्ष्यते यस्माद्बुद्ध्यादिप्राणभूमिषु ।
तदेषामिति षष्ठीयं श्रुत्या तस्मात्प्रयुज्यते ॥२१५॥

Since there is noticed threefold (functioning) of intellect up to *prāṇas*, therefore, there is use of the genitive case in the word *eṣām*¹ in the Śruti. [215]

¹This is *nirdhāraṇe ṣaṣṭhī*, i.e. for specifying 'among them'. It means: *teṣām madhye ye prāṇāḥ*.

The three are mentioned in the next verse thus: The inner self, its semblance and *prāṇas*, i.e. organs in the body.

प्रत्यक्चिदवभासश्च कारणानुगमोऽपरः ।
तथा च करणात्मानो बाह्यगोचररञ्जिताः ॥२१६॥

The inner self and the other, viz. the semblance of sentience, which is understood (or, inferred) from its cause(s)¹ and so also those which are of the nature of the organs that are affected (lit. coloured or tinted) by external objects² (are the three meant in *eṣām*). [216]

¹Or alternatively, which comes to exist, as it were, owing to the cause, viz. ignorance.

²See SP on this: *karaṇātmanāṃ karaṇāmatvaṃ vinā svarūpenābhivyaktyarthāṃ viśinaṣṭi*.

बुद्ध्यादेः कृत्स्नकार्यस्य पुंस्कर्मोद्भूतिहेतुतः ।
बुद्ध्याद्युत्क्षेपसंहारौ तस्मात्कर्मनिबन्धनौ ॥२१७॥

Since the effects in their entirety,¹ viz. intellect etc.¹ are owing to the person's (own) *karman*² operative, the rise as well as the inactivity (lit. withdrawing) of intellect etc. are therefore dependent on *karman*. [217]

¹The word etc. stands for organs.

²This is not any activity on the part of the person, i.e. done

by any of his organs. It is his merit and/or demerit. Cf. SP: *tasyotkṣepasamhārāv utthānābhibhavau karma haiva*.

स्वात्मावभासतो भोक्ता कर्ता त्वज्ञानहेतुतः ।
द्वयाविविक्तो हि परो भोक्ता कर्तेति चोच्यते ॥२१८॥

It (i.e. the Ātman or the inner self) of a person is the enjoyer (i.e. experiencer) owing to its being the semblance of it and is the agent (of activities) because of (its) ignorance (about its own true nature). Indeed, the highest self which is not distinct (or distinguished) from duality (in the state of ignorance) is called both the enjoyer (i.e. experiencer) and the agent (of activities).¹ [218]

¹SP brings out the force in the last part of the verse thus: *bhoktaiva kevalam na karteti nirasitum cakārah*.

जाग्रत्फलप्रयोगस्य यदा कर्म प्रहीयते ।
व्युत्थानहेत्वसद्भावात्तदाकर्ता सुषुप्सति ॥२१९॥

When activity, which is related to the rise of results in the waking state, is missing (lit. lost), then the (real) non-agent¹ (of activities) goes to sleep (lit. wishes to sleep), as there do not exist here any causes of the rise (of the organs to act). [219]

This is to explain the sleep state of an individual. This explanation is occasioned by the continuous existence of the *bhoktr*.

¹SP points out *akarteti cchedaḥ* (in *tadākartā*) and remarks *akartṛtvam abhokṛtvasyāpy upalakṣaṇam*.

भोक्तृप्रयुक्तं कर्तृत्वं कर्त्रा कर्म प्रयुज्यते ।
कर्मप्रयुक्तो भोगश्च ततः संस्कारसंभवः ॥२२०॥

(In sleep state), agency (of activities) is caused by the enjoyer

(i.e. experiencer), the activity is caused by the agent and the enjoyment (i.e. experience) is caused by activity and from that there follows the possibility of impression(s). [220]

This is for explaining that the sleep state is not the state of liberation. NKL points out more clearly: *bhoktrtvāder anyo-nyahetutvād avicchedaḥ* (= *saṃsārāvicchedaḥ*, note by the editor of NKL).

सुखदुःखादिसंस्कारसंस्कृतोऽयं जडः पुमान् ।
रागद्वेषादिनाक्षिप्तस्ततो भूयः प्रवर्तते ॥२२१॥

This ignorant Puruṣa,¹ affected by the impressions such as happiness, misery etc.² (and) therefore overcome by attachment, hatred etc.,³ proceeds to act again. [221]

This explains why there is no liberation in this state.

¹This refers to the transmigratory being, *jada* cannot be insentient, it should mean 'ignorant'.

²The word etc. appears to indicate ignorance.

³The word etc. here indicates hankerings and wish for more of happiness.

अन्योऽन्यं कार्यता चैषां कारणत्वं तथैव च ।
तेनानुच्छिन्नसंस्कार आत्मायं प्राक्प्रबोधतः ॥२२२॥

Furthermore, these (viz. *bhoktrtva*, *kartrtva* and *saṃsāritva*) have (among them) mutual relation of being cause and effect; therefore, the Ātman (i.e. the individual self) is, before its waking (up to its real nature), not devoid of impressions(s).¹

[222]

¹That is, with the impressions on it not removed.

अविद्यानाभिसंबन्धो मिथ्याधीचक्रसंस्थितः ।
आब्रह्मास्थाण्वयं योनीर्बभ्रमीत्यनिशं परः ॥२२३॥

This highest (Ātman), having a relation to the hub (in the form) of ignorance and resting on (*saṁsthita*) the wheel of wrong (or, false) knowledge, continuously (*anīṣam*) keeps on revolving among (numerous) species of life, beginning (*ā*) with the Brahman up to (*ā*) a pillar. [223]

This is a stress on the continuous flow of impressions responsible for transmigration of the life for a person.

जाग्रत्कर्मक्षये सोऽयमादायाशेषभावंनाः ।
 असंबुद्धात्मकोद्भूतमनोबुद्ध्यादिरूपिणा ॥२२४॥
 आधिस्वभावजेनेति कर्तादानस्य भण्यते ।
 प्रत्यक्चिदवभासान्तः कर्ता क्षेत्रज्ञ उच्यते ॥२२५॥

This one is called the agent, after it has taken up (i.e. received) all the impressions (of the waking state) as the activity of the waking state ceases (lit. comes to be lost) and is called the agent of taking up (various objects), being possessed of the form of *manas*, intellect and others¹ which have the nature of what is unawakened and which have the nature of what have been born from the limiting adjuncts² (of the Ātman)—yes, this (real) agent and knower of the field (revealing itself) as the end of the semblance of the sentience which is the inner self. [224-225]

After the explanation of the threefoldness connected with *eṣām* (in verse 216 above) and of *buddhi* etc. (in verse 217 above) are given, there now follows the explanation of their working as expressed in *viññānena viññānam ādāya* in the BU sentence.

The editor of NKL writes a note on *kartāraṁ vivicyāha* (in NKL) thus: *ādānakriyāyāṁ cidavabhāsāntaḥ cidābhāsāśrayaḥ jīvaḥ kartā; buddhyādigataḥ cidābhāsaḥ karaṇam (viññāneneti karaṇe tṛtīyā); vāgādiprāṇānām arthadhīśaktirūpaṁ viññānam karma iti viveko bodhyaḥ.*

¹The word 'others' refers to various organs of activity.

²ādhi is for upādhi.

आदीयमानं विज्ञानं सामर्थ्यं विषयोन्मुखम् ।
वागादीनामिह ग्राह्यं प्राणानां विषयाञ्जनम् ॥२२६॥

viññāna is what is being taken up (i.e. received), the capacity which is ready (or, about) to take up the objects (of desire etc.). In this regard, one has to understand that there is colouring (i.e. tinting) of *prāṇas*, viz. *vāc* and others, by the objects. [226]

This is the explanation of *prāṇānām* ... in BU.
SP points out that *ādānakarmaviññāna* is called *pūrvabhāvanās*.

शक्तयः करणान्यत्र गृह्यन्ते कारणात्मना ।
परमात्मा ग्रहीतात्र स्वाभासाभिन्नविग्रहः ॥२२७॥

Here,¹ the organs, viz. *śaktis* 'capacities'² are taken up (i.e. assumed or used) by that (Jīva) whose nature is the cause;³ (for), here,¹ the one who takes up (i.e. uses, the same) is the highest Ātman⁴ which has a body that is non-distinct from its own semblance. [227]

This is another way of understanding the BU sentence: *prāṇānām viññānena viññāya eṣo 'ntar hṛdaya ākāśaḥ tasmin śete* (in relation to sleep).

¹That is, in the happenings or actions mentioned in verses 224-225 are meant.

²This is another meaning of *viññāna* in the accusative case.

³It stands for the agent of activities (*viññāna*).

⁴Add: who is under the influence of ignorance (*avidyā*).

तथा संवर्गविद्यायां प्राणवाय्वात्मना श्रुतिः ।
वागग्न्याद्युपसंहारं वक्ति नान्येन कारणात् ॥२२८॥

To this effect (*tathā*),¹ the Śruti states in the lore of Saṃvarga²

the merging (*upasaṁhāra*)³ of *vāc*, Agni and others in the form (*ātmanā*) of Prāṇa-Vāyu; and not by any other cause (of their merger).⁴ [228]

¹Or, in this (very) sense.

²Cf. CU 4.3.2.

³Cf. CU 4.3.3.

⁴Cf. SP: *na ca kāryasya kāraṇād anyātmanopasaṁhārah*.

नामाद्याशावसानं च प्राणे सर्वं प्रतिष्ठितम् ।
प्राणबन्धनवाक्याच्च सूक्तमेतद्यथोदितम् ॥२२९॥

The merger of name etc., all (of them) in *āśā* 'hope' is fixed on (or, has rested in) Prāṇa (i.e. the Ātman); (and) this is well said in the statement (of the Śruti) about the fixture in Prāṇa.¹ [229]

This is yet another support for verse 227 from another Śruti.

¹The word *prāṇabandhana* occurs in CU 6.8.2. NKL points to CU 7.15.1: *prāṇo vā āśāyā bhuīyān, yathā vā arā nābhau samarpitāḥ evam asmin prāṇe sarvaṁ samarpitam*. SP merely points to the discussion of *bhūmavidyā*.

आविर्भूतस्वकार्यस्य संसर्गः कारणात्मना ।
वागाद्यादानमत्र स्याद्बुद्बुदानां यथाम्भसा ॥२३०॥

The contact (i.e. identity) of its effect(s) which are manifest, viz. assuming (or, taking up) of *vāc* and others with the Ātman, which is the cause,¹ is like (the oneness) of the bubbles with water. [230]

¹Here the origin is meant. That explains *ādāna*.

सहार्थे वा तृतीयेयं विज्ञानेनेति या श्रुता ।
सह प्रमातृज्ञानेन वागादेरुपसंहतिः ॥२३१॥

Or rather (*vā*), this (use of the) instrumental case which is heard in the word *vijñānena* is in the sense of 'being joint (or, together) with';¹ therefore the cessation (or withdrawing) of *vāc* and others is together with (the arising of) the knowledge of the knower (viz. the Ātman, the inner self).²

[231]

Already, the instrumental form *vijñānena* is explained in the sense of *karaṇa* 'an instrument or a means'; now another explanation is offered.

¹Cf. Pāṇini Sūtra 2.3.19: *sahayukte 'pradhāne*. SP brings out the meaning thus: *mātrā tanniṣṭhajñānena ca saha karaṇānām saṃhṛtiḥ*.

²The idea that the Ātman is the agent of activities also ceases to be.

यदि वास्तु तृतीयेयमित्थंभूतार्थवाचिनी ।
प्रत्यग्ज्ञानस्वभावेन कार्यकारणसंहतिः ॥२३२॥

Or perhaps (*vā*), let this (use of the) instrumental case be expressive of the indicative mark;¹ (accordingly, the meaning would be:) there is cessation (or, withdrawing) of the cause and the effect(s) by the inner self's (assuming) its own nature, viz. knowledge.²

[232]

This is yet another explanation in the light of *itthambhūtārtham*.

¹Cf. Pāṇini Sūtra 2.3.21: *itthambhūtalakṣaṇe* (*trītyā* is taken over from Pāṇini Sūtra 2.3.18).

²Cf. NKL: *sahetoḥ kāryasya caitanyātmanopasaṃhṛtir ity arthaḥ*— this is clear from SP thus: *sve mahimni tiṣṭhaty ātmety arthaḥ*.

अनन्यबोधप्रत्यक्षो य एष इति भण्यते ।
तस्य संप्रतिपत्त्यर्थमन्तर्हृदयकीर्तनम् ॥२३३॥

In the words *ya eṣaḥ* ...¹ is mentioned the one who is directly

known by itself (lit. by none other),² (and) the mention of (its being) inside the heart is for well conveying (only) that.³

[233]

¹This is BU sentence: *ya eṣo 'ntar hr̥daya ākāśaḥ*

²This refers to the self-illuminating Ātman (*svapprakāśa*).

³Namely, the Ātman, which is self-illuminating. The idea is: The inner self rests in the heart and so also does the highest self. This brings out well the identity of the inner self and the highest self.

पराक्प्रमेयभूमिभ्यो व्युत्थाप्य मन आदरात् ।

प्रत्यक्प्रवणया दृष्ट्या पश्यात्मानं त्वमञ्जसा ॥२३४॥

Having therefore respectfully taken away (your) *manas* from the objects which are known as (existing) outside,¹ do you well see the Ātman with the notion (lit. view) inclined towards the (acceptance of) the inner self.²

[234]

¹Or literally, from the (bases of) the objects of knowing that are outside the body.

²Or, adopting the view that the inner self is nothing else than the Ātman, i.e. Brahman.

आत्मबुद्धिरियं पुंसां लक्ष्यतेऽव्यभिचारिणी ।

व्यभिचारिणीष्वनात्मोत्थबुद्धिषु प्रत्यगात्मनि ॥२३५॥

It is noticed that among men the awareness (i.e. knowledge), viz. (I am) Ātman,¹ is never varying (or absent) even while the awarenesses of the non-Ātmans are varying (i.e. are not always present), in relation to the inner self.

[235]

This clarifies the distinction between the Ātman and the non-Ātmans.

¹*ātmabuddhi* is to be understood as *ātmā iti buddhiḥ*.

बुद्धात्मनोऽपि सा बाह्यपदार्थज्ञानविभ्रमात् ।
संकीर्यमाणेवाभाति तमसोपहतात्मनाम् ॥२३६॥

(And) in respect of the Ātman that is awakened¹ also, that appears like varied³ (in nature) to those whose inner selves are affected (i.e. overpowered) by darkness⁴ on account of the error that there is knowledge of outside objects. [2]

¹This refers to the inner self which has come to realise its true nature, viz. its being the Ātman.

²This is *ātmabuddhi* mentioned in the previous verse.

³Literally, mixed, as it were. That is to say: having the distinct things as the knower and the knowable(s).

⁴That is, ignorance or Avidyā.

जग्धे कार्ये च निःशेषे कारणे चात्मविद्यया ।
अपूर्वाद्यात्मनात्मायमात्मन्येवावसीयताम् ॥२३७॥

When the entire (mass of) effect(s) and also the cause¹ are destroyed (lit. eaten up) by the lore of Ātman,² let it be concluded that this Ātman is in one's self (i.e. in the inner self) in the nature of *apūrva* etc.³ [2]

¹This refers to Avidyā (cause) and *tajja*.

²Actually this should mean: by knowing the true nature of the Ātman.

³Cf. BU 2.5.19: *tad etad brahmāpūrvam anaparam anantaram abāhyam ...*; and BU (Mādhyandina) 3.8.8: *apūrvam anaparam ... abāhyam*.

आदायाकाशशब्दाभ्यामैकात्म्यं प्रतिपाद्यते ।
क्षेत्रज्ञेश्वरयोः साक्षाच्छ्रुत्येहाज्ञानहानतः ॥२३८॥

By the words *ādāya* and *ākāśa* is directly established here the singleness of the Ātman,¹ viz. of the knower of the field and the Lord (i.e. the highest self), as (resulting) from the

destruction (lit. loss) of ignorance.

[238]

NKL clarifies: *tvamarthaḥ ādāya ity ucyate, tadarthaḥ ākāśe iti, śete iti tadekatvam* (i.e. *tayor ekatvam*).

¹That is, in *aikyajñāna*.

तात्स्थ्याद्बुद्धयशब्देन बुद्धिरत्राभिधीयते ।

ऐकात्म्यप्रतिपत्त्यर्थं क्षेत्रज्ञपरमात्मनोः ॥२३९॥

By the word *hṛdaya* 'heart' here is expressed *buddhi* 'intellect', because of its staying in that.¹ (This is so done) for conveying the oneness of the knower of the field and the highest Ātman.

[239]

This explains the meaning of *hṛdaya* in *antar hṛdaye*.

¹That is, since the individual self and the Ātman stay together in the *hṛdaya*, their oneness is proved. Also the meaning of *hṛdaya* as (only) a lump of flesh in the body is thus precluded.

घटाकाशो महाकाश इत्युक्तौ खैकधीर्यथा ।

तथेहापि कथं नाम प्रत्यग्धीः स्यादिति र्यते ॥२४०॥

This is said in order to answer the question (*iti*) 'how is the inner self called intellect?'; viz. thus: "As in the statements 'sky in a pot' and 'great sky (that is all pervading)', there arises (the knowledge of) the oneness of sky"; so is it understood here also.

[240]

It is interesting to note how there is to be understood oneness of the knower of the field and the highest Ātman, despite two (apparently) distinct words. The purpose of the illustration is thus clarified by SP thus: *tayor aikyātmyam tādātmyam aikyam vādye bhedo 'pi syād dvitīye padāntaravaiyarthyam ity āśaṅkya tadaikye 'pi vyāvartyabhedaṁ na padāntarānarthakyam iti man-vānaḥ sann āha ghaṭeti*.

बुद्धेरन्तः प्रतीचोऽन्यो नार्थः संभाव्यते यतः ।
तस्मादाकाशशब्देन प्रत्यगात्माभिधीयते ॥२४१॥

Since there cannot possibly exist in the intellect anything else than the inner self, therefore, (it is only) the inner self (that) is expressed by the word *ākāśa*. [241]

This is to answer away an objection that might arise from the linguistic usage of *ākāśa* in the sense of the elemental sky (*bhūtākāśa*).

प्राणादीनां यतो जन्म वक्ष्यते प्रत्यगात्मनः ।
तस्माच्चाकाशशब्देन ब्रह्मैवात्राभिधीयते ॥२४२॥

Since it will be stated that the *prāṇas* and others have their origin in the inner self,¹ therefore also² it is just the Brahman that is expressed by the word *ākāśa*. [242]

This is to clear away a doubt that the *ākāśa* which is said to exist in the *hṛdaya* can be the elemental sky also, for it is all-pervasive.

¹This refers to *evam evāsmād ātmanah sarve prāṇāḥ sarve lokāḥ sarve devāḥ sarvāṇi bhūtāṇi vyuccartanti* (BU 2.1.20).

²*ca* invites reference to *sarvāṇi ha vā imāni bhūtāny ākāśād eva samutpadyante* (CU 1.7.1).

अथाकाशो ह वै नाम सता सोम्येति च श्रुतिः ।
ब्रह्माकाशात्परो नान्य आकाश इह गृह्यते ॥२४३॥

Also, there is a Śruti passage (which says the same thing): *athākāśo ha vai nāma, satā somya*;¹ (thus) here (in this context)² *ākāśa* is not taken as other than *Brahmākāśa*, viz. the Brahman that is *ākāśa*. [243]

Here is cited one more support from the Śruti.

¹This is a reference to two passages, CU 8.141 (without *ha*)

and CU 6.8.1.

²This refers to *ākāśe śete*.

स्वतोऽवगमरूपेऽस्मिन्कूटस्थे कारणात्मना ।
कात्स्न्येनावसितिर्भोक्तुः शेत इत्यभिधीयते ॥२४४॥

Thus is expressed in the word *śete* the merger in this immutable (Ātman) which is of the self-knowing nature of the enjoyer (i.e. experiencer) in its fullness, in the form of the cause(s).¹

[244]

¹This aims to justify repeated/varied experiences due to ignorance.

दृष्टान्तश्च कुमारादि तथा च घटतेऽञ्जसा ।
प्रत्यक्चैतन्यमात्रत्वान्न तु निद्रेह युज्यते ॥२४५॥

And (this is to be understood thus, because) the illustrations of Kumāra and others¹ would also be smooth to understand;² (as against this, the usual) sleep will not be properly understood³ owing to the inner self being only sentience. [245]

This explains why the familiar sense of *śayana*, viz. *nidrā*, is not accepted.

¹Cf. BU 2.1.19.

²That is, be smoothly construed.

³That is, will not be supported by reason.

देहाद्यध्यक्षतां हित्वा यदायं वर्तते तदा ।
स्वात्मन्येवास्त इत्येतत्कुतश्चेत्स्वपितीत्यतः ॥२४६॥

Whence is it understood, 'While this one gives up superintendence over the body etc.¹, it remains in its own form'? (In answer to this, it is said) 'Because (then) it sleeps'. [246]

¹The word etc. refers to the organs, the objects of desires

and so on.

इतश्च प्रत्यगात्मस्थो नान्यत्रागादयं पुमान् ।
सुषुप्ते स्वपितीत्युक्तेस्तदेतदभिधीयते ॥२४७॥

From the statement ¹ 'This one (viz. the individual self) sleeps when that (Ātman) goes to sleep' is understood that this man resting in the inner Ātman has not gone elsewhere. (Also) ² it is said (in other Śruti statements as well). [24

¹SP points out, *itaḥ* is connected with *svapiti*. But NKL refers *itaḥ* to *ca*.

²Also *ca* conveys, according to SP, that CU 6.8.1: *satā somya* is to be understood together with the statement in BU. But NKL refers to CU 8.3.2: *aharahaḥ brahmalokaṃ gacchantyaḥ*.

Now follows in verses 248-254ab Bhartṛprapañca's interpretation of the sentences *tad eṣām ...* and others.

अन्ये व्याचक्षते बुद्धिविज्ञानेनेति विस्मिताः ।
वागादिज्ञानमादाय हृत्खे शेते य उत्थितः ॥२४८॥

Others, ¹ who are stunned by the *buddhivijñāna* (in the case of the inner self) ² explain (*tad eṣām ...*) thus: That, who has (now) become awake, is the one that sleeps in the sky (covered) in the heart, ³ having taken with it the knowledge (that arises from) *vāc* and others. ⁴ [248

¹This is the reference to Bhartṛprapañca.

²Both NKL and SP appear to be here putting the cart before the horse. NKL just remarks: *asmadvyākhyāne vismitāḥ doṣaṃ manvānāḥ*. But SP is more to blame while stating: *asmadvyākhyānaṃ duṣṭaṃ svavyākhyānaṃ cāduṣṭaṃ paśyanto vismayāviṣṭadhiyaḥ*. Are we to hold from statement of thme this that Bhartṛprapañca knew the explanations offered by Sureśvara? Or, for that matter, Śaṅkara? Does it mean that he was not an

earlier commentator of BU? But, since both Śaṅkara in BUB and Sureśvara in BUBV refer to his views in a number of places, would it be reasonable to hold *anye* in the sense of Bhartṛprapañca? It may not be unwarranted, therefore, to hold *anye* in the sense of the followers of Bhartṛprapañca, while Sureśvara used the words *buddhi- vijñānena vismitāḥ* with a double sense, the second being the one proposed by SP and NKL.

³This refers to *bhūtākāśa* in the heart.

⁴These are various organs and their objects.

सुषुप्सुर्मनसैवात्मा मनस्येव समूहति ।
प्राणान्स्वशक्तिभिः साकं मनोऽप्यात्मनि लीयते ॥२४९॥

When wishing to sleep, the Ātman (viz. the inner self) absorbs (lit. collects together) the *prāṇas* 'organs' and with them their powers¹ in the *manas*² also by means of *manas*³ and (at that time) *manas* also merges into the Ātman.⁴ [249]

¹These refer to their various capacities to grasp the different objects outside.

²I have not translated *manas* as mind, since this latter has the element of *cit* 'sentience' associated with it. Here, *manas* is just *antahkaraṇa* 'internal organ'. (The Sāṃkhyas' notion of *trividha antahkaraṇa* has to be remembered; this will explain the occurrence of *buddhibhāvanā* in the following verse.) And it may be noted in passing that the *Yogasūtra* state *yogaś cittavṛttinirodhaḥ* and not *manovṛttinirodhaḥ*, just for this very reason.

³This explains *manas* in the sense of *karaṇa* 'instrument or means' (i.e. *karaṇe tṛtīyā*). It is possible to understand *manasā* alternatively as *manorūpeṇa* (SP and NKL) to mean 'in the form of *manas*'; this can be justified thus: In the dream state (which can occur in sleep state), *manas* performs the various functions of the different organs. This explains the dream state that is mentioned in the following verse.

⁴That is, *manas* also, in its own turn, gets absorbed into the Ātman. That explains the dreamless sleep state.

विशीर्णकरणग्रामो बुद्धिभावनया युतः ।
हृद्याकाशात्प्रसृत्यात्मा नाडीभिः स्वप्नमश्नुते ॥२५०॥
मनोवागादिविज्ञानविग्रहः करणाख्यया ।
विजानातीति कर्तृस्थे परस्मिन्भावसाधनः ॥२५१॥

The Ātman (i.e. the inner self or, the knower of the field) which has the collection (*grāma*) of the organs absorbed (lit. rendered in a power) within ¹ and is bearing (lit. accompanied by) the impressions on the intellect (received in the waking state), ² proceeds from the sky in the heart through (various) veins (*nādīs*) and experiences dream(s); [250]
(and) since it, being possessed of a form made up of various organs (*viññāna*), ³ viz. *manas*, *vāc* and others, experiences (lit. knows), ⁴ by (means of intellect) called *karana* 'organs'; ⁵ therefore, in relation to the highest (Brahman), that is (really) the agent, it (viz. the knower of the field) brings about the various experiences (lit. becomings). ⁶ [251]

This is Bhartṛprapañca's explanation of *tad eṣām prāṇāṇāṃ viññānena viññānam ādāya* in BU.

¹Cf. the preceding verse.

²*buddhi* is to be understood, with the Sāṃkhyas, as one of the three aspects of the *trividha antaḥkaraṇa*.

³Here, *viññāna* specifically refers to the organs.

⁴This points to *viññāna* in the sense of the inner self. It is worthwhile to note what SP quotes, viz. *yathāhuḥ: ubhayatrāpi karaṇasādhana eva viññānaśabda iti* (Probably, Bhartṛprapañca's Bhāṣya itself). Also, read in this context NKL: *parasmin viññānaśabdapravṛttau viññānam iti paraḥ syāt, na cehobhayaṃ yuktam ādāyeti prṥthak karṇnirdeśat*.

⁵It refers to intellect as an organ that helps in dream towards knowing various objects.

⁶This is for distinguishing the real knower (viz. Ātman) from

what has appeared as the knower (viz. *kṣetrajña*).

प्रकाशवृत्तिर्या ज्ञस्य सा हृद्धर्मानुगा सती ।
उद्गच्छति यतस्तस्माद्द्विशेषे लयं विदुः ॥२५२॥

Since (that) which is the (very) being¹ viz. the (self-) illuminating nature, flashes forth (lit. comes up), becoming in accordance with the properties of the heart;² therefore, they have known (its) lying down³ in the particular part of the heart.⁴ [252]

This brings out the purport of *ya eṣa ...* in BU.

¹This is *vṛtti* from verb root *vṛt* 'to be', not in the sense of function (or even, modification).

²These are desires, attraction etc. which belong to a human heart.

³This refers to the sleep state; therefore, the alternative translation could be 'becoming dormant'.

⁴This refers to the elemental sky that is in the heart. Read in this context SP (quoting probably from Bhartṛprapañca's Bhāṣya): *yathoktam tasya hi jñānātmano yā ca svaprakāśavṛttiliṅgā sā hṛdayadvāreṇa vyuccaratīti hṛdayaṃ viśeṣāyatanaṃ iti*.

स्वगोचरोन्मुखं ज्ञानं वागादीनामशेषतः ।
आदाय भावनाबुद्ध्या शेते जो हृदयाम्बरे ॥२५३॥

The knower (i.e. the Ātman) remains (lit. sleeps) in the sky of¹ the heart, with the intellect having on it the impressions (of the waking state), receiving the knowledge of *vāc* and others,² in its entirety,³ that has come to become their own objects (to be known). [253]

This is yet another interpretation of *vijñāna*; cp. verse 248 above. And also the completion of the sentence-sense.

¹Again, this is a reference to the elemental sky existing in the heart.

²That is, organs.

³This refers to the various objects of all the organs.

भावनारूपविज्ञानमभिव्यक्तं यदा हृदि ।
क्षेत्रज्ञस्यार्थवद्भाति शेते हृदीत्यतो वचः ॥२५४॥

When this knowledge in the form of impressions¹ (*viññāna* on the part of the knower of the field) is revealed to the heart,² then the statement 'It sleeps in the heart' appears meaningful in the case of the knower of the field.³ [254]

¹These are gathered in the waking state.

²Because they are really not existent outside; they are only appearances.

³Read SP (quoting probably Bhartṛprapañca himself): *yathāhuh tatra hi bhāvanāvijñānaṃ viśeṣeṇābhividyaktam āste yata evaṃ kṛtvā tasmiṇ śeta ity ucyata iti.*

एवं श्रुतिरियं कैश्चिद्व्याख्यातातिप्रयत्नतः ।

Thus is this Śruti explained by some with a great effort.¹ [255ab]

¹*atiprayatnataḥ* is explained by SP thus: *śrutitātparyam atikramya svakīyotprekṣaya vyākhyānasya pravṛttir iti prayatnaḥ*; This is SP's introductory to verses 255cd-256.

Thus Sureśvara concludes the interpretation by Bhartṛprapañca.

In verses 255cd-256, Sureśvara has made a brief remark on the interpretation by Bhartṛprapañca.

परीक्षयैतद्द्वयं ग्राह्यं स्वयमेव परीक्षकैः ॥२५५॥

Having well examined these two interpretations,¹ let the examiners give their acceptance (to what appears to them faultless). [255cd]

सह भावनया बुद्धेः श्रुतत्वादुपसंहतेः ।
न स्यात्तथोपसंहारस्तेनैयं कल्पना मुधा ॥२५६॥

Since there is heard (in the Śruti) the absorption of (even) intellect, together with the impressions,¹ there would not be absorption (of *vāc* and others) in that way² and, therefore (*tena*), this notion (of Bhartṛprapañca) is purposeless. [256]

Not feeling satisfaction by making a simple remark in 255cd, Sureśvara states why the view of Bhartṛprapañca deserves rejection.

¹These (despite the singular form) are gathered in the waking state. Here, *manas* and *buddhi* are not taken as distinct—this is in the Sāṃkhya manner of treating them as one *antaḥkaraṇa* ‘internal organ’.

²That is, ‘in the way Bhartṛprapañca has stated’. But, NKL edition reads *na syāt tayopasaṃhārah*.

Verses 257-261 are the explanation of the BU sentence *tāni yadā*

स्वगोचरेषूत्सृष्टानि यदा गृह्णात्ययं स्वयम् ।
वागादीनि तदैवैनं स्वपितीति प्रचक्षते ॥२५७॥

When this one (viz. the inner self), of itself, absorbs (within itself)¹ *vāc* and others, among their own objects,² then do they describe (or, call) it by the name (*iti*) Svapiti.³ [257]

This is a brief restatement of Sureśvara’s own interpretation of *tāni*

¹Literally, takes (back):

²Which are unreal, i.e. the products of the same.

³Read SP introducing the next verse thus: *svapitināmanir-deśasya phalam āha*.

समाख्यासंश्रयात्तस्मादभूत्प्राक्प्रत्यगात्मनि ।
व्यभिचारोऽपि चेन्नामिन् ततो युक्तिरपीर्यते ॥२५८॥

If one would say, 'As there has already been given a derivation (of the word *svapiti*),¹ therefore, there has been variance² also as regards the name', then (i.e. in that case) also there is a reason given (lit. stated).³ [258]

¹Cf. CU 6.8.1: *svam apīto bhavati, tasmād evaṃ svapitīty ācakṣate*

²The sentence in the preceding note gives untruth to the remark in the preceding verse. This is to say that a name and the named would show variance (*vyabhicāra*), as, for example, an individual may be named Aśvakarṇa while that person is not a horse's ear (so pointed out by SP).

³This is stated in the following verse.

वागादिप्रकृतौ प्राणशब्दो घ्राणेऽवगम्यते ।
मुख्यस्यानुपसंहारात् तद्वाचक इष्यते ॥२५९॥

(See, for example, in the Śruti itself)¹ when the relevant (topic) is of *vāc* and others, the word *prāṇa* is understood as (i.e. having the meaning of) the sense of smell and there is no (reference to) principal Prāṇa in the absorption (by the inner self); therefore, it (viz. that word *prāṇa*) is not taken as expressive of it (viz. principal Prāṇa). [259]

¹This is: *tadgrhīta eva prāṇo bhavati* in BU 2.1.17 itself. It is pointed out with a view to giving unreasonableness in the objection understood in the preceding verse. Thus the argument regarding *nānni vyabhicāra* does not hold.

वासनामात्रहेतुश्च स्वप्ने कर्मेन्द्रियाश्रयः ।
सर्वेन्द्रियाणां लीनत्वाद्वापारो न प्रबोधवत् ॥२६०॥

Again, in the sleep state, the functions, which are dependent

on the organs of activity, as also of knowing,¹ are caused only by impressions and, further, the activity (in the sleep state) is not like that in the waking state, owing to (the fact that) all the organs have merged (in the inner self). [260]

¹This is by the force of *ca* (SP); *cakāro jñānendriyāśraya-vyāpārasamuccayārthaḥ*.

वागाद्युपाधिसंबन्धे संसारित्वमिवेक्ष्यते ।
ते तूपसंहताः सर्वेऽसंसारित्वमतो दृशेः ॥२६१॥

It is noticed that being transmigratory occurs (in the case of a self) when there is (its) relation to the limiting adjuncts such as *vāc*;¹ but since they have merged (in the inner self in the sleep state) and, therefore, the seer (viz. the Ātman) does not have transmigratory nature. [261]

¹Here are meant, two states, viz. that of waking and of sleep. In the second half of the verse, only the sleep state is meant. *dr̥ṣi* is to be understood, in relation to the first half, as 'appearing to be transmigratory'.

In verses 262-306, there is discussion on the contents of the BU 2.1.18 (and allied matter).

ननु स्वप्नेऽपि जाग्रद्वत्प्रत्यक्षमुपलभ्यते ।
सर्वेन्द्रियवियोगेऽपि सुखिदुःखित्वमात्मनः ॥२६२॥

But (it may be argued now), in dream state¹ also, there is the direct experience, as in the state of waking; for, even in the absence (lit. separation) of all organs, there is (noticed) the condition of the self as happy or miserable. [262]

It is related to the BU sentence *sa yatra*

¹This is in view of verse 264 below.

मैवं मृषात्वात्स्वप्नोत्थसुखदुःखादिलक्षण- ।
संसारस्येत्यतो वक्ति श्रुतिस्तस्य मृषार्थताम् ॥२६३॥

(In answer, it is said: This is) not so, because the transmigratory existence is characterized by happiness and misery which arise in dream state and are unreal (i.e. false) in nature. For this reason, the Śruti states the falseness of that (viz. transmigratory existence then). [263]

नास्य स्वापः प्रबोधो वा कुतः स्वप्नस्य संभवः ।
प्रत्यक्स्वभाव एवास्य जाग्रत्स्वप्नसुषुप्तयः ॥२६४॥

For this one (i.e. the highest Ātman) there is neither sleep nor waking up as well, how could there be the possibility of a dream? It is (in) the nature of the inner self that it has (all the three states of) waking, dream and sleep.¹ [264]

This is clarified in the following verse.

¹SP supports this by a quotation from a Smṛti: *svabhāvas tu pravartate* (Gītā 5.14d).

सुप्तः प्रबुद्ध इत्येवं स्वप्नं पश्यति चेति यः ।
विकल्प एष भूतानामविद्यात्रिशायिनाम् ॥२६५॥

That this one is asleep or awake and also that one sees a dream is an option (i.e. an optionally made statement) about the beings (one has to say: human beings) who sleep (during) the night of ignorance. [265]

मायामात्रमिदं सर्वं जगत्स्थावरजङ्गमम् ।
सर्पादेरिव रज्ज्वादितत्त्वमस्ति परं पदम् ॥२६६॥

All this world, steady and moving, is merely *māyā* (i.e. what is conceived). As in the case of a serpent etc. (there is truth) viz. a rope etc.;¹ so, the truth is the highest (Ātman).² [266]

¹In this verse, Sureśvara is careful in citing an illustration. The word etc. refers to other well-known instances of Adhyāsa.

²The translation of this last sentence follows the reading in NKL edition, viz. *sarpādeḥ ... tattvam asti param padam*. I have adopted that reading for the text in the AnSS edition.

चित्तसंमोहमात्रेऽसिंमल्लोकोऽयं परिखिद्यते ।
दिङ्मोहाकुलविज्ञानो नष्टमार्ग इवाध्वगः ॥२६७॥

In this (happening), which is merely delusion of the mind (*citta*), this people¹ feels troubled (i.e. is sorry), like a traveller (lit. way-farer) who has his knowledge (of the ways) affected by confusion about the directions and lost his way. [267]

¹That is, the people in this world. They cannot see only one thing (viz. the Ātman) as truth; they entertain various notions owing to Avidyā.

अस्मिन्नर्थे जगादेमौ श्लोकौ यदुकुलोद्धहः ।
पुराणः शाश्वतो विष्णुः प्रपन्नाय किरीटिने ॥२६८॥

In this sense, the scion of Yadu family, viz. the ancient and eternal Viṣṇu, has recited two verses to Arjuna,¹ who respectfully resorted to him. [268]

¹This is a reference to Śrī Kṛṣṇa, who is considered to be an incarnation of Viṣṇu. He recited to Arjuna (lit. the wearer of a crown—which has become his proper name) two verses, viz. *Gītā* 7.15 and 7.14—these are quoted below.

न मां दुष्कृतिनो मूढाः प्रपद्यन्ते नराधमाः ।
माययापहतज्ञाना आसुरं भावमाश्रिताः ॥२६९॥

The wrong doers, the foolish ones, viz. the wretched men do not resort to (i.e. take shelter with) me, since they have their correct knowledge destroyed (lit. carried away) by *māyā*

'delusion' and have resorted to the demoniac feeling (or, way of behaviour). [269]

This is *Gītā* 7.15.

दैवी ह्येषा गुणमयी मम माया दुरत्यया ।
मामेव ये प्रपद्यन्ते मायामेतां तरन्ति ते ॥२७०॥

This my *māyā* (i.e. delusion caused by me) is divine, made up of (three) Guṇas, and difficult to get over. (And) those who resort only to me, (do) get over this *māyā*. [270]

This is *Gītā* 7.14.

आत्मैवेदं जगत्सर्वं सत्यापर्वदिलक्षणम् ।
वेत्ति यस्तत्त्वतो वाक्यात्तस्यैवेह कृतार्थता ॥२७१॥

This entire world is (in reality) only the Ātman which has the nature of Truth, unpreceded (i.e. not caused) by anything etc.¹ He who knows (it) in the real nature of it (*tattvataḥ*) from the sentence(s) (of the Śruti) has for himself here the fulfilment of the end (of life).² [271]

¹Cf. BU 5.5.1: *satyam brahma* and BU 2.5.19; see verse 237 note 3.

प्रत्यक्तमोवसाय्येव पराज्ञानमशेषतः ।
प्रत्यगात्मन्यविद्येति त्वविद्यापरिकल्पना ॥२७२॥

The entire knowledge about the outside (objects) is invariably (*eva*) ending in ignorance about (the real nature of) the inner self. And (*tu*) the concept of Avidyā 'ignorance' is (i.e. is rooted in) the non-knowing (*avidyā*) of the inner self.¹ [272]

¹This is to mean: non-knowing in respect of the real nature of it. SP has already pointed out *vastuvṛtṭyā na tatrāvidyeti*

tuśabdah. SP refers also to SV 106ff.

स्वार्थं प्रत्येव विज्ञेयाः सदसत्त्वादिकल्पनाः ।
जाग्रत्स्वप्नावतः सिद्धौ स्वार्थं प्रत्येव न स्वतः ॥२७३॥

The notions of *sat* 'existent' and *asat* 'non-existent' have to be taken as related to the objects for an individual's own self (i.e. known by one as obtaining outside). Therefore, the (two) states of waking and dream are established (i.e. understandable), not in their own right but only in relation to the (outside) objects for an individual. [273]

This is an echo of Gauḍapāda's statement about these objects being unreal on account of the well-known cause, viz. *drśyatva*.

वागादिसाध्यसंदृष्टेः स्वप्नो बोधसमो यदि ।
अवस्थान्त्रितयस्यास्य कुतः सिद्धिरितीर्यताम् ॥२७४॥

(A question is here asked:) If the dream state is (to be taken as) similar to the waking state on account of perceiving (lit. seeing outside)¹ what is grasped (lit. obtained) by *vāc* etc., how can there be established² this triad of the states?;³ let this be explained. [274]

¹See *drśyatva* in the note on the preceding verse.

²Literally, the establishing of the triad.

³This refers to *jāgrat*, *svapna* and *susupti*; SP refers to *trayaḥ svapnāḥ* (*Aitareyopaniṣad* 1.3.12).

आदायेति च क्त्वान्तोक्तेः पूर्वकालैककर्मणः ।
स्वप्न एव तु संसिद्धिरादावन्ते ह्यसंभवात् ॥२७५॥

On account of the use of the verbal form *ādāya*, which has an ending *ktvā* and has therefore an object belonging to some previous (moment(s)) of time, the (existence of the object(s)) is proven to be belonging only to a dream; (this is) for the

reason that their existence before and after is impossible (to accept).¹ [275]

¹Cf. *Gauḍapāḍakārikā* 2.4ab: *ādāv ante ca yan nāsti vartamāne 'pi tat tathā*.

इति भूतार्थसंबोधज्ञानोन्मीलितचक्षुषाम् ।
नास्ति व्याधिर्जरा नास्ति नास्ति देशपरिभ्रमः ॥२७६॥

Thus,¹ in the case of persons, who have their eyes opened by the proper (*sam*) knowledge of the thing, that has been an existential entity, there is no disease, (there is) no old age and (there is) no movement around many regions.² [276]

This verse expresses the result of one's knowing the true nature, viz. falsehood, abiding in the three states discussed above and naturally the consequent, viz. the knowledge of Reality, i.e. the Ātman, in its true nature.

This thought is continued in the following two verses.

¹That is 'by knowing the nature of the three states as caused by ignorance about the Ātman'.

²In other words: transmigration, or movement from place to place; one *yoni* to another and so on.

नास्ति रोगो न संतापो नास्ति कामादिसंप्लुतिः ।
न स्युर्हर्षभयोद्वेगहानोपचयमृत्यवः ॥२७७॥
न शोको नारतिः काचिन्न कर्तृत्वं न कार्यता ।
न ज्ञेयं नापि च ज्ञाता तदभावोऽपि नेष्यते ॥२७८॥

(In that case) there is no disease, no mental affliction, no overpowering by (lit. plunging or drowning in) desire etc.;¹ (also) there would not be joy, fear, dejection, loss, profit and death; [277]

there is no grief, no uneasiness (or rather, restiveness) of any kind, no (real) agency (in any activities), no nature of being an effect/product (of something or some activity or some

person); there would not be any object to know; there would not be any knower (of them) and there would not (ever) be accepted any absence of them. [278]

Translation ignores the extreme brevity of Sanskrit language and expresses itself somewhat freely. Also, the much erudite explanations of SP are not considered.

¹The word etc. should refer to the six well-known enemies of man. SP, however, explains it as the beginning of desire, viz. Avidyā. Hardly probable!

इति क्षरार्थसंबन्धज्ञानेऽस्मिन्नल्लोकचक्षुषा ।
विकल्पहेत्वविद्यायाः प्रत्यग्याथात्म्यनिष्ठितः ।
सम्यग्बोधाग्निना द्रवस्तौ विकल्पो नावशिष्यते ॥२७९॥

Thus, the variety of notions (about objects etc.), which arises from this relation of the perishing objects before the eye¹ of the people, which (has arisen) from ignorance (Avidyā) that is the cause of that variety, which (really) rests in the true nature of the inner self² and does not remain (even a little), when there occurs its destruction by the fire of proper (*saṁ*) knowledge (about the inner self, the Ātman). [279]

Here is the concluding remark about the falsehood of worldly experiences.

¹*cakṣus* indicates other organs.

²Namely, 'in somehow being overpowered by Avidyā'.

विजिज्ञापयिषुर्गार्ग्यमिममर्थमतो नृपः ।
स यत्रेत्यादिकामाह परामुक्तिपरंपराम् ॥२८०॥

Therefore, the king who wished to inform/instruct Gārgya about this matter made unto him the subsequent statements, one after another, viz. *sa yatra* [280]

Now follows in verses 281-285 the explanation of *sa yatra* itat

svapnyayā carati.

स्वप्ने भवत्वात्स्वप्न्येति जाग्रत्स्वापाद्विवेचनम् ।
मिथ्यात्वप्रतिपत्त्यर्थं स्वप्नस्य क्रियते स्फुटम् ॥२८१॥

(The world) *svapnyā*¹ is used, because it occurs in dream state. The distinction of dream from waking and sleep states is made clear for establishing the unreality (of it). [281]

¹This is based on the reading in the Mādhyandina recension of BU: *svapnyayā carati*. *svapnyā* as reported and paraphrased in SP and NKL as *darśanākhyā vṛtti* 'the function called seeing'. However, the printed edition of that recension does not show any difference from the Kāṇva recension.

निशायां संप्रवृत्तायां संहताक्षस्य निद्रया ।
जाग्रत्कर्मण्युपक्षीणे स्वप्नभोग उपस्थिते ॥२८२॥
बोधावस्थां तिरोनीय देहाद्याश्रयलक्षणाम् ।
कर्मोद्भावितसंस्कारस्तत्र स्वप्नरिरंसया ॥२८३॥
अवस्थां प्रययावन्त्यां मायावीवात्ममायया ।
उच्चावचान्बहूनर्थान्सोऽसृजत्सृजतेऽनृतान् ॥२८४॥
अविद्याकामकर्मादिसाधनैः समुपार्जितान् ।
बोधे साधारणा येऽस्य स्वप्ने तेऽनन्यद्रष्टृकाः ॥२८५॥

When, at the advance of night, a person's eyes are overcome by sleep, the activity of the waking state has come to a halt (lit. to be lost) and the experience of a dream is imminent, [282]

(the person, having) the impression, which has been raised (or, produced) by (his) *karman*, after it has suppressed (or, concealed) the waking state, that which is characterized by its resorting to the body etc., has a desire (as it were) to enjoy a dream [283]

(and therefore) has gone to another state and created false (objects), in the way a magician who, by his magic, creates

(lit. lets forth) many things, high and low,¹ [284]
 (the objects) of the dream which are brought forth by means
 of desire and activity² (being produced by) ignorance (Avidyā)
 and which are the same as in the waking state, have really
 no seer other (than the inner self). [285]

¹High and low are meant to qualify the objects of the waking
 and the dream state.

²Singulars in desire and activity imply the plural sense.

In verses 286 to 300, there is clarification of the meaning of
 te hāsyā lokāḥ

लोकाः कर्मफलानीति तेषां मिथ्यात्वमुच्यते ।
 उतेवेत्यादिना स्पष्टमैकात्म्यप्रतिपत्तये ॥२८६॥

The word *lokāḥ* stands for the results of *karman*. Their false
 nature is now described in (the statement) beginning with *uteva*,
 in order that there is a clear understanding of the singleness
 of the Ātman. [286]

ननु बोधे यथा लोकास्तत्कालाव्यभिचारिणः ।
 स्वप्नेऽपि स्वप्नकालस्थास्तद्वत्सन्तिवति भण्यते ॥२८७॥
 ननु जाग्रत्स्थलोकानां मिथ्यात्वं प्राक्प्रपञ्चितम् ।
 अविद्यामात्रहेतुत्वं पाणिपेषप्रबोधनात् ॥२८८॥
 तथा च सति दृष्टान्तो भवतो नोपपद्यते ।
 मिथ्यात्मकत्वात्सर्वस्य नैतदेवं कुतो यतः ॥२८९॥
 विवेकमात्रसिद्धयर्थो भोक्तृभोग्यपदार्थयोः ।
 पाणिपेषादिको ग्रन्थः शुद्धिस्तत्र विवक्ष्यते ॥२९०॥

But, (it is stated by an objector:¹) 'As in the waking state
 the *lokas* do not differ in point of time (of that state), so
 also let them belong to the same time as of the dream.' [287]
 (In answer, the Siddhāntin states:) 'Indeed, the false nature
 of the *lokas* in the waking state is already fully explained,

viz. that they have only ignorance (Avidyā) as their cause, (as this is noticed) from awakening (the sleeping man) by the shaking of the hand, [288]

and, that being so, your illustration² does not become reasonable, (for you will have to tell) why this (viz. what is given in the illustration) is not (false) since all (things, as you have already stated) are false (i.e. unreal). [289]

(And further) the text relating to (lit. beginning with) the shaking him by hand is only for differentiating between the things (known as) the enjoyer and the enjoyed (i.e. the experiencer and the experienced). (Therefore) an explanation in that regard (*tatra*) has to be given.³ [290]

¹This is raised by one who holds that the objects seen or experienced in a dream are real.

²The argument is regarding the illustration of the sleeping man, being awakened by shaking him by his hand. This illustration is faulty in that it is included in false experiences.

³Or, one could alternatively translate: that being the case (*tatra*) (an explanation of) the unaffected nature of the inner self (*śuddhi*) is desired.

तस्मात्कृतकदृष्टान्तमुपादायात्मनोऽञ्जसा ।
आध्यात्मिकादिलेपानां विशुद्धिरिह भण्यते ॥२९१॥

From that, viz. an artificial illustration,¹ here (i.e. in respect of a dream) is clearly stated an explanation of the effects² on the Ātman which appear to have come from the body etc.³ [291]

¹Namely, the use of what is made to appear as illustration.

²Literally, smearing, tints etc. (caused by Avidyā).

³*ātman* in *adhyātman* → *ādhyātmika* refers to body, its organs, their activities and their relation to objects.

किञ्चित्सामान्यमाश्रित्य जामित्वं प्रतिपद्यते ।

न्यायः सर्वोऽपि येनातो नैतत्साधु प्रचोदितम् ॥२९२॥

Relationship (viz. being closely related)¹ is accepted (or, understood) by one after resorting to some kind of common property (or, purport);² this is the general rule everywhere (*sarvo nyāyah*).³ Therefore, this objection is not rightly raised.

[292]

¹It means: the sameness, which amounts to mean repetition (so SP and NKL).

²This refers to volitionally accepted or attributed property; not an actual common property.

³In the case of *dr̥ṣṭāntas*, this is a universally accepted way of understanding; viz. not an actually existing commonness is taken as existing. This is so well-known in *Alaṃkāra Śāstra*. Therefore, SP states it to be only *vācanika* 'at the word level'; cf. *śrauta* in this very sense (NKL). NKL clarifies this specifically thus: *pūrvavākye* (referring to *pāṇipeṣaṇavākya*) ... *ātmanah samvidekarasatvād ārthikam* (i.e. real) *mithyātvam, iha tu lokaśabdena karmaphalamātratvasvīkārāt śrautaṃ tad iti bhedād ity arthaḥ*.

महाराजादयो नास्य स्वप्नानुभवगोचराः ।

आत्मभूता इति ज्ञेयास्तद्वेदेनोपलम्भनात् ॥२९३॥

For this one (who is dreaming), the great king (or, emperor) and others are not the (actual) objects of his experience in the dream state, since they are to be taken only as products (lit. properties) of the *Ātman* (viz. inner self); there is the knowledge (*upalambhana*) about them as distinct (from what are taken as real objects).

[293]

पर्यङ्कशयिताद्राज्ञः प्रत्यक्षादिप्रमाणकात् ।

बहिः समीक्ष्यते राजा स्वप्नदृग्भिर्वनं गतः ॥२९४॥

A king is seen by the dreaming persons to have gone to a

forest outside (his palace, viz. as one different) from that (very) king who is (in reality) sleeping on (his) couch (as noticed by others) by the means of knowing such as direct perception. [294]

स्वानुभूत्यनुरोधेन राज्ञो राजामृषा गृहे ।
स्वप्ने प्रबुद्धस्य सतो मृषा स्याद्वनमाश्रितः ॥२९५॥

For the king (himself), he is truly a king¹ in his (own) home (and) for the person who is (now) awakened (from the dream, that (same king) who had gone to a forest is unreal. [295]

In the preceding verse, there was difference shown between the experiences of the persons who were awake and those who were dreaming. Now, in this verse, the experiences of both of them are shown as not different, the dreaming persons realising the error. The significance of these two verses (viz. 294 and 295) is well brought out in the following verse.

¹SP rightly (and usefully) points to the resolution the Saṃdhi in *rājāmṛṣā* as *rājā amṛṣā*.

जाग्रदृष्टं मृषा स्वप्ने स्वप्ने सज्जागरे मृषा ।
अन्योऽन्यव्यभिचारित्वात्स्वप्नजाग्रत्पदार्थयोः ॥२९६॥

(Thus) on (one's) knowing the king seen in the waking state as false (while one is) in the state of dream and (what was seen as) real in the dream is known as false in the waking state—(this is) on account of mutually differing things seen in a dream and in the waking state. [296]

अहः क्षपायां च कुतः संहताक्षस्य चेक्षणम् ।
मृतानां जीवनं तद्वद्वद्वानां यौवनं कुतः ॥२९७॥

Whence¹ can there be seeing of what is seen by day (as the same) by night?² How¹ can there be seeing by one who has closed his eyes?³ So also, whence can there be living

state of those who are (already) dead and youth (in the case) of those who are (already) old? ⁴ [297]

¹Whence and also how for *kutaḥ* which is connected with both parts of the line.

²This implies that night is not proper time for seeing what are the real objects. It is the time for seeing objects in the dream—naturally not real.

³This refers to the absence of proper means of seeing.

⁴The fourth line refers to things opposed to actual experiences.

न चक्षुरादिदृष्टीनामन्तर्देहसमीक्षणम् ।
हिमवत्प्रभृतीनां च कुतोऽन्तः संभवो हृदि ॥२९८॥

There is no perceiving (lit. seeing) by organs,¹ viz. the eye and others, within the body; how can there be the existence of Mt. Himālaya and others² in the heart? [298]

Verses 298-300 point to the unreality of the objects seen in dreams; this is done with the help of the experiences of the waking state.

¹The word *dr̥ṣṭi* is used in distinction from the eye and, therefore, must be taken to signify the function of the organs, not only that of the eye.

²The organs cannot perceive Mt. Himālaya as existing within a body; whereas they are taken to be there by a dreamer. As such, the false nature of them when seen as objects in a dream.

The word 'others' refers to Mt. Vindhya, Mt. Malaya and so on.

नापि देहाद्विनिष्क्रम्य पर्वतादीन्समीक्षते ।
देहं विना कथमगाङ्गतिसाधनवर्जितः ॥२९९॥

Not also does (a dreamer actually) go out of his body and see mountain(s) and others; for, how could he go (to see them)¹ without having a body and not possessing² any means?

[299]

¹This is because they are actually outside the body.

²Literally, devoid of any means; these are vehicles etc. beside the body.

अन्तरेणापि देहादींस्तत्कार्यं चेत्करोत्ययम् ।
व्यर्थं देहाद्युपादानमस्य प्राप्नोत्यसंशयम् ॥३००॥

If this one (viz. the dreamer), not possessing (or, devoid of) a body etc.¹ does perform the functions² of them; then it certainly follows that his actually having a body etc. is futile.

[300]

Here, Sureśvara points to the contingent futility of the dreamer's body.

¹The word etc. refers to the organs of the body and their functions.

²*kāryam* is singular, yet signifying plurality.

ननु पर्यङ्क आसीनो गच्छन्निबिकया वनम् ।
वेश्मतो बहिरात्मानं द्रक्ष्यतीति न तद्यतः ॥३०१॥
अमात्यादीन्यथादाय स्वात्मभोगप्रसिद्धये ।
नृपः स्वदेशमध्यस्थो यथेष्टं परिवर्तते ॥३०२॥

(And) it is not that ¹ (viz. what one might say:) 'But, indeed (*nanu*) he (viz. the king) is resting on his bed sees himself outside his house, going to the forest in a palanquin. [301]

For, taking (with himself) his attendants,¹ for securing his own pleasures, the king would move at will, within his own territory. [302]

These two verses explain *sa yathā mahārājah*.

¹Namely, the statement that the experience in the dream is real.

²This does not necessarily mean 'ministers'.

स्वदेहराष्ट्रसंस्थोऽयं जाग्रद्भावनिरूपिणः ।
प्राणानात्मा तथादाय स्वप्नान्पश्यति कामतः ॥३०३॥

(In the same way) this Ātman (i.e. the inner self) staying in the territory in the form of its own body and taking with it the *prāṇas* 'organs', sees, at its will, the dreams, viz. those that display (or, assume) the forms (and objects) of the waking state. [303]

This is the explanation of *evam evaiṣaḥ* ... clarifying the illustration in the two preceding verses.

असत्योपाधिभिः सोऽयं कूटस्थासङ्गविग्रहः ।
अविद्यारोपितमलो विद्ययात्मा विशोध्यते ॥३०४॥

(Thus) this Ātman (i.e. the inner self), the immutable and (the one) who does not have any connection with a body, has impurities (or, dirt) superimposed on it by the unreal limiting adjuncts, is purified by knowledge (of its true nature). [304]

The argument in this verse pertains to the unreal nature of all the experiences in the waking and dream state, their being the products of ignorance (Avidyā).

निःसङ्गस्य ससङ्गेन कटस्थस्य विनाशिना ।
आत्मनोऽनात्मना योगौ वास्तवो नोपपद्यते ॥३०५॥

There cannot (ever) be a real union of (i.e. connection between) the Ātman (inner self), which is devoid of any attachment and is immutable, with the non-Ātman that is full of (or, affected by/with) attachment and perishable. [305]

This statement about the never possible union is to clarify more the mention of *avidyāropitamala* on the Ātman, mentioned

in the preceding verse.

कूटस्थादत्तानुज्ञं सत्प्रत्याख्यातं सहान्वयम् ।
कारकाद्यन्यतो मोहान्नात्मानं प्रति द्वैकते ॥३०६॥

The (notions of) *kāraka* etc.,¹ together with what follows them,² being never allowed³ by the immutable, do not drive themselves⁴ unto the Ātman, (even) through infatuation caused by another.⁵ [306]

¹That is, *kārya* 'effect(s)'.

²Namely, desires, hatred, attachment etc. which are caused by them.

³Literally, disallowed, that means 'not tolerated'.

⁴That is, they cannot affect the Ātman. The Ātmepada from *dhaukate* is significantly used. The plural is forced by *sahānvayam*.

⁵Such a thing does not really exist. Yet the statement is made with a proviso 'if at all it did exist'.

Verses 307-390 are a discussion of the BU 2.1.19 (and allied matter).

ननु कामवशादस्य त्वयोक्तं परिवर्तनम् ।
द्रष्टृदृश्यादिभावश्च कथं शुद्धस्तथा सति ॥३०७॥

(A question is raised:) 'But, whatever changes you have mentioned have come to this one (viz. the dreaming inner self) on account of its desire(s), as also the relations such as¹ the seer and what is seen;² that being so, how could there be purity (of the inner self as said by you)?' [307]

¹'Such as' is for 'etc.'; they refer to the listener and what is listened to and other organs and what are perceived (or grasped) by them.

²Literally, what is to be seen.

मैवं स्वतोऽवबुद्धत्वात्कुतोऽज्ञानेन संगतिः ।
अज्ञानसंगतिं मुक्त्वा न स्यात्तज्जेन संगतिः ॥३०८॥

(An answer is given:) 'Do not say so. Since that one is (already) awakened by itself, how could there be its association with ignorance? (Indeed) leaving (aside any) association with ignorance, there could not be its association with what is its outcome (or, product). [308]

एवं यस्मात्स्वतः शुद्धो द्वितीयासंगतेरयम् ।
आत्मा तस्मात्स्वतो मुक्तः कूटस्थज्ञप्तिमात्रतः ॥३०९॥

Since it is thus pure in itself (or, in its own right) on account of (all) non-association with another, therefore, the Ātman (i.e. the inner self), is of itself free (or, liberated), on account of its being merely immutable knowledge.¹ [309]

¹*kūṭastha ... mātrataḥ* is for *kūṭastha ... mātratvataḥ*. Or perhaps, as SP suggests: *kūṭastha ... mātrataḥ* is for *kūṭastha ... mātraḥ* 'for it is merely immutable knowledge'.

न यथा श्रोत्रविज्ञानं रूपेणैति समागमम् ।
संसारेण तथैवात्मा कौटस्थ्यान्नैति संगतिम् ॥३१०॥

As the perception (*viññāna*) by ear(s) does not come to be related to (or, to have any connection/conjunction with) a form, in the same way, the Ātman (i.e. the inner self) does not, owing to its being immutable, come to have (any) relation to transmigratory existence. [310]

इत्यर्थस्यावबोधार्थं परो ग्रन्थोऽवतार्यते ॥३११॥
विशुद्धिं व्यतिरेकं च स्वप्नजाग्रदवस्थयोः ।
उक्त्वात्मनोऽद्वयत्वं च सुषुप्ते चाधुनोच्यते ॥३१२॥

For the explanation of this (very) matter is (now) introduced the subsequent text. [311]

Having (thus) stated the purity and also the absence of the Ātman (i.e. the inner self) in the two states of dream and waking, the Śruti has now stated the non-duality of (or, the absence of duality in) the Ātman in the sleep state also. [312]

This is regarding the introductory to BU sentence *atha yadā suṣupto bhavati*.

Verses 313-318 explain the meaning of the BU clause *yadā na kasya cana veda*.

न वेदेत्यात्मनः श्रुत्या कर्तृत्वं प्रतिषिध्यते ।
पश्यन्नपि यतः प्राज्ञः कौटस्थ्यान् प्रपश्यति ॥३१३॥

In (the words) *na veda* is rejected by the Śruti the agency (of any activity) on the part of the Ātman (i.e. the inner self),¹ since this Prājña² (viz. the inner self), even while it is (i.e. appears to be) seeing, does not really (*pra-*) see, on account of its immutability. [313]

¹It is worthwhile to note how the Śruti is equating the meanings of the verb roots *vid* and *kr*; see for a similar use *brahma veda brahmaiva bhavati* where the verb roots *vid* and *bhū* do not convey two sequential actions, they represent just one action (or what one would call simultaneous actions!).

²This is the (proper) name of the inner self in the sleep state—cf. *Maṇḍūkyaopaniṣad* 5 and *Gauḍapāḍakārikā* 1.11 related to it. Cf. verse 330 below.

अथ यो वेदेति तथा ज्ञातृसाक्षित्वमात्मनः ।
प्रतीचोऽकारकत्वं नः सर्वत्र प्रतिपाद्यते ॥३१४॥

So (also) in the sentence *atha yo veda ...*,¹ the nature of the Ātman (i.e. the inner self) as the knower and the witness and also is the non-agency of the inner self is explained to us everywhere.² [314]

¹This is reference to CU 8.12.4: hereby is explained how the Ātman is *really* the witness and so on.

²Cf. for instance, Śvetāśvataropaniṣad 1.9; 6.11 (SP quotes this); Maitrāyaṇyupaniṣad 2.7; 6.7.

क्वचित्प्रमातृवित्साक्षी क्वचित्प्रत्ययवित्परः ।
क्वचिद्वाह्यार्थविच्चात्मा तत्कर्तृत्वं निषिध्यते ॥३१५॥

At times (or at places or in some situations), the highest self is the knower and the witness of the knower (viz. the experiencer self), the knower of experience (viz. the experiencer's doing) or the knower of external objects (which, in reality, only appear to exist); but ¹ (its) agency is (totally) ¹ denied (or, rejected). [315]

¹This is by implication.

परप्रयुक्तं वेत्तृत्वं यदस्य प्रत्यगात्मनः ।
संबन्धजत्वात्तस्यातः कस्येत्यत्राभिधीयते ॥३१६॥

Since the nature of the knower in the case of this inner self is caused (or, produced/brought to it) by the highest self and also by its relation (to ignorance), therefore, for this reason (*ataḥ*) is used (lit. expressed) here the word *kasya*.¹ [316]

¹In the sentence *na kasya cana veda*, the word *kasya* implies *sambandha* to mean *hetu*; this then means: *na kasyāpi sambandhasya* (viz. *kim api*) *veda*, or, in other words, 'it did not know of any relation (to objects)'. Thus *kasya* is a genitive form expressive of relation (*sambandhe śaṣṭhī*). This is clarified in the following verse.

कर्मोत्थत्वात्प्रमात्रादेस्तत्क्षये क्षयवत्त्वतः ।
षष्ठीयं कर्मणि न्याय्या द्वयाभावविवक्षया ॥३१७॥

Since the knower etc.¹ have arisen from (i.e. produced by) *karman* and have an end (lit. exhaust) when that (viz. *karman*) comes to an end (lit. has exhausted); the genitive expressive of the object (viz. grammatical *karman*) is (to be accepted as being) in conformity with the grammatical practice (*nyāya*).

[317]

Read the introductory of SP on this: *tām (śaṣṭhīm) viśeṣe yojayati*.

¹The word etc. refers to *prameya* and *pramāṇa*.

अप्यर्थे चनशब्दोऽयमभावस्यापि वारकः ।
शेषशेषितरोभावे सुषुप्तिरिह भण्यते ॥३१८॥

The word *cana* in the sense of *api* is (useful in) warding off even *abhāva* 'absence' (of being an object of knowing itself) (and to convey the concealment of the sense of) the relation of *śeṣa* and *śeṣin* (between *abhāva* and *bhāva*) (and) therefore, in (the word) *iha* is conveyed the sleep state in the case of the individual self.¹

[318]

¹Cf. SP: *iheti saptamī puruṣam adhikaroti*.

In verses 319-342, there follows the explanation of *hitā nāma nāḍyaḥ* ...; i.e. to begin with, there is the description of various *nāḍīs* 'veins' and then follows the explanation of the process of sleep coming over a *Puruṣa*.

अथ केन क्रमेणायं सुषुप्तं प्रतिपद्यते ।
इति क्रमविधानार्थं हिता नामेति भण्यते ॥३१९॥

Now, in order to convey the order (of the process) of the sleep state to which this one (i.e. the inner self) comes, the words *hitā nāma* ... are used (i.e. stated).

[319]

आ नाभितस्तथा कण्ठाद्धृदयं मध्यतः स्थितम् ।

सनालं पद्मकोशाभं पञ्चच्छिद्रमधोमुखम् ॥३२०॥

The heart (*hr̥daya* of this *puruṣa*) is situated (in the region) from the navel and (*tathā*) to the throat; it is having a stem, has the colour of the interior of a lotus, has five holes and has an opening (lit. a face) downwards.¹ [320]

¹SP quotes a Śruti: *padmakośapratīkāśaṃ hr̥dyaṃ cāpy adho-mukham* (*Tittirīya Āraṇyaka* 10.11.6).

Also it refers to CU as the source for the word *pañcacchidra*.

स्वप्नाश्रयाणि हृन्मध्ये नीलाद्याभानि देहिनः ।
स्थानानि सुरमर्त्यादिजुष्टान्यस्य भवन्त्युत ॥३२१॥
बिलानि सुषयश्चैता जाग्रद्वत्प्रत्ययोद्भवाः ।
एकोत्तरं नाडिशतं विष्वक्ताभ्यो विनिर्गतम् ॥३२२॥
प्रतीन्द्रियं दश दश निर्गता विषयोन्मुखाः ।
नाड्यः कर्मादिहेतूत्थाः स्वप्नादिफलभुक्तये ॥३२३॥

In the heart of this *Puruṣa* (lit. the embodied one) there are in the dream state the bases, having blue and others as their colours, and they are accepted by gods, mortals and others (for their abodes or supports); [321]

the openings and these holes which have arisen from the experience(s) of the waking state—viz. these are a hundred and one of the veins that have come out (or proceeded forth) from the same,¹ on all sides, [322]
to each organ in groups of ten (of them) they eager (to meet or receive) the objects—these veins, which have arisen (i.e. have been produced) from the causes *karman* and others,² are for the enjoyment of the results, viz. the heaven etc.³ [323]

¹This refers to the experiences.

²The impressions, desires etc. are meant.

³For a full enumeration of the veins etc., refer to SP and NKL—as known from the Śruti—could these be only mythical? Cf. *Kaṭhopaniṣad* 6.16, CU 8.6.6 and *Praśnopaniṣad* 3.6.

वहन्त्यम्भो यथा नद्यो नाड्यः कर्मफलं तथा ।
अनन्तैकोद्वर्गा नाडी तथा गच्छन्विमुच्यते ॥३२४॥

As the rivers carry (or, take) waters in them, so do the veins, the result of *karman* (etc.)¹ (Only) one of the veins has no end, it goes upwards and (the Puruṣa, i.e. Jīva), going by (or, in) that, is liberated.¹ [324]

¹SP quotes the Śruti: *tayordhvam āyann amṛtatvam eti*; *Kaṭhopaniṣad* 6.16 and CU 8.6.6 are referred to in note 3 on the preceding verse.

एकैकस्याः पुनर्नाड्याः सूक्ष्मभेदाः प्रकीर्तिताः ।
द्वासप्ततिसहस्रैस्ते संख्याता योगचिन्तकैः ॥३२५॥

Again, there have been described more subtle varieties of (or, differences among) them in relation to (or, connected with) each vein—they are described as seventy two thousand in number by those who meditate in *yoga*.¹ [325]

¹SP refers to some Śruti (only cryptically) and cites, in support of this. But see *Yājñavalkya Smṛti* 3.108-109ab and 3.101. Also cp. *Skanda Purāṇa* 5.3.159.45.

कदम्बकुसुमोद्भूतकेसरा इव सर्वतः ।
प्रसृता हृदयान्नाड्यो याभिव्याप्तं शरीरकम् ॥३२६॥

The veins have proceeded (lit. spread out) from the heart, on all sides, like pollen produced (or, given out) by a Kadamba flower, and whereby (i.e. thereby) is occupied the whole of this body.¹ [326]

¹In *śarīraka*, the suffix *-ka* is *svārthe*.

हितं फलं प्रयच्छन्ति यस्मात्तस्माद्विताः स्मृताः ।
हृदयात्ता विनिष्क्रान्ता यथार्काद्रश्मयस्तथा ॥३२७॥

Since they yield a fixed¹ result, therefore, they are known (by the name) *Hitā*. They have gone forth from the heart as the rays from the Sun. [327]

¹'Fixed' means determined (by the *karman*, impressions, desires etc.). The meaning 'agreeable' 'pleasure' also cannot be ruled out.

पुरीतदभिधानेन हृद्वेष्टनमिहोच्यते ।
तत्तूपलक्षणं विद्यादेहव्याप्तिविवक्षया ॥३२८॥

In this (happening),¹ the name *Purītat* conveys the sense of what wraps the heart; and (*tu*) one should know it as indicative (of the desire (or, wish)) to convey the pervading (by it) of the whole of the body. [328]

¹This refers to the experience of the three states.

स्वप्नकर्मसमुद्भूता वासना या हृदि स्थिताः ।
नाडीभिस्ता वितत्यात्मा स्वप्नान्पश्यति कामतः ॥३२९॥

The impressions, which have come out from (or, which are produced by) the activity in the dream state (and) which have remained in the heart—they does the *Ātman* (i.e. the inner self) first extend to (*manas*, i.e. scatter over it) and then see dreams (i.e. them in his dreams) according to its desire(s). [329]

स्वाप्नान्भोगानशेषेण भुक्त्वा स्वप्नक्रियाक्षये ।
ताभिरेवोपसंहृत्य प्राज्ञो याति सुषुप्तताम् ॥३३०॥

Having enjoyed all the enjoyables of the dreams (in their entirety), (the inner self) first withdraws them by those very (veins), and, at the end of the activities¹ in the dream, this Prājña² goes to sleep. [330]

¹This plural is implied by 'dreams'.

²Refer to verse 313 above.

जाग्रत्स्वप्नक्रियोद्धूतान्भुक्त्वा भोगानशेषतः ।
इन्द्रियाण्युपसंहृत्य शेते नाडीभिरात्मनि ॥३३१॥

Having (thus) enjoyed the enjoyables in their entirety, viz. those which have arisen from the activities in the waking and the dream states, it (i.e. the inner self) first withdraws by means of the veins (all) the organs within itself (*ātmani*)¹ and enjoys sleep.² [331]

¹This is reflexive pronoun.

²Or alternatively, goes to sleep.

सामान्यप्रज्ञया देहं संव्याप्यान्तर्बहिः श्रमात् ।
श्येनवत्परमं स्थानमात्माभ्येति सुषुप्तताम् ॥३३२॥

As a falcon¹ approaches (i.e. returns to) its nest (lit. resting place) out of fatigue, so does the Ātman (i.e. the inner self), owing to fatigue (caused) both inside and outside² finally³ return to the body, and, pervading it by its common character of knowing (*prajñā*),⁴ it goes to sleep. [332]

¹The example of a falcon (*śyena*) is taken because of its immense power of hovering high and long in space and also because of its large size and great strength.

²This refers to the inner self's activities in and out of the body, i.e. in the dream and the waking states.

³*paramam* is taken alternatively.

⁴It is present in all the states, even in sleep; yet, in this

(last), it does not become related to any object of and for knowing.

धियोऽन्तःकरणस्येह स्थानं हृदयमिष्यते ।
तत्रेन्द्रियाणि सर्वाणि बुद्धितन्त्राणि सर्वदा ॥३३३॥

In this (state), the heart is accepted as the (resting) place for the inner organ, viz. intellect.¹ There (rest in it), all the organs, depend as they do ever on the intellect. [333]

¹Though, by definition, the inner organ comprises the three, viz. *manas*, *ahaṅkāra* and *buddhi*, only the last one is meant; this is clear by the use of the word *dhiyaḥ* in apposition to *antahkaranasya*.

यत एवमतस्तानि नाडीभिः कर्मणो वशात् ॥३३४॥
प्रसारयति धीर्वृत्तीर्मत्स्यजालकवद्वहिः ।
प्रसार्यायतनस्थानि तानि धीरधितिष्ठति ॥३३५॥

Since this is so;¹ therefore, under the influence of *karman*, does intellect spread them and their activities by means of (or, through) the veins outside,² [334]
as (a fisherman spreads) his net, and, (thus) having spread those abodes of them (all),³ intellect superintends over them. [335]

¹That is, as said in the second half of the preceding verse.

²*bahis* refers to the area or locus of the functions or activities of the organs other than intellect; in other words, the world of the external objects of knowing.

³Here, there is reference to the organs as the source of activities.

जाग्रत्काले ततो ज्ञोऽयमभिव्यक्तविशेषधीः ।
व्याप्नोति निष्क्रियः सर्वान्भानुर्दश दिशो यथा ॥३३६॥

Then, this knower (i.e. the inner self), which has, during the time of the waking state, intellect with some special (or, particular) powers revealed in it,¹ though not (at all) active, pervades all (the objects of knowing), just like the sun (which pervades) the ten quarters. [336]

¹This refers to the influence of Avidyā.

ता एवेन्द्रियवृत्तिः स्वाश्चैतन्यखचिता यदा ।
संयच्छति प्रतीच्यात्मा स्वपितीति तदोच्यते ॥३३७॥

When the Ātman (i.e. the inner self) withdraws (or, restricts) within itself those very modifications¹ of (various) organs of itself, which are marked by (lit. studded with) sentience, then it is said that it is a sleep. [337]

¹This is for *vṛttis* identified as *vṛttimats*, viz. the active organs.

बुद्ध्युपाध्यनुरोधेन प्रतीचः प्रभवाप्ययौ ।
विक्षेपलयहीनस्तु स्वतः कुम्भखवत्परः ॥३३८॥

The rise and merger¹ of the inner self are through (i.e. owing to) the limiting adjuncts, viz. intellect (etc.)². However, this one, being (really) the highest self, is devoid of (i.e. not marked by) flashing forth and merger—it is like the sky in a pitcher.³ [338]

¹These are the waking and the sleep states.

²The word etc. in round brackets stands for the other organs which are also active and thus, like intellect, modify the inner self.

³Sureśvara has expressed the simile in very brief: The all-pervading sky which, by its nature, remains outside the pitcher and gets inside it also; in a similar way, the inner self appears active both outside and inside the body, though it is naturally all-pervading.

ताभिः प्रत्यवसृप्यात्मा वृत्तीर्नाडीभिरानयन् ।
तप्तायोवच्छरीरं स्वं व्याप्य शेते स्व आत्मनि ॥३३९॥

(Thus) having crept all around by means of the veins and (finally) withdrawing (them all within) and pervading its own body, the inner self sleeps within itself,¹ like a heated piece of iron.² [339]

This completes the meaning of *tābhiḥ pratyavasṛpya purīṭati śete*.

¹The word itself is for *ātmani* which is a reflexive pronominal form; cf. verse 331 above.

²The simile is somewhat unclear! There is doubt (i) if it is compared with the inner self or its body and also (ii) about the common property, viz. *vyāpti-kriyā* or *śayana*.

स्वहेतुमात्रया स्थानमिन्द्रियाणां न कार्यतः ।
यतोऽतश्चिन्निभेनैव व्याप्तिः स्यात्कारणात्मना ॥३४०॥

The resting (within the body) by (the various) organs is by assuming the nature of their own cause (and) not by (doing their various) activities; for, there is the pervasion (of the body) by the inner self (which is of) the nature of (their) cause; the one that is like (the all-pervading) sentience. [340]

The meaning of the resting of organs within the body is thus explained.

सुषुप्तौ न शरीरेण संगतिः प्रत्यगात्मनः ।
नापि बुद्ध्यादिभिः साक्षात्तत्स्थानासंगतेर्भवेत् ॥३४१॥

In sleep state, there is no (actual) connection (i.e. contact) of the inner self with the body,¹ not also with intellect etc.,² owing to the absence of its association with their resting places (in the body) in a direct way.³ [341]

¹This refers to the contact with the external organs. The sentience within has nevertheless a contact with them, i.e. its presence in them is admitted.

²These are the three internal organs; they have a place inside the body.

³Though the internal organs, especially intellect, would be resting inside the body, there is not any special contact with the same, since the heart, which is described as their resting place (cf. verse 333 above) is wrapped up by the vein called Purītat (in verse 328 above).

तीर्णो हीति तथा चैतदुत्तरत्राभिधास्यते ।
सुषुप्तेऽत्र पिता चेति सर्वसंबन्धवारणम् ॥३४२॥

Also, it will be later said (about the inner self) *tīrṇo hi...*, and in the sleep state, there is a rejection of all relations in the words *atra pitā*¹ [342]

¹Cf. BU 4.3.26: *atra pitāpitā bhavati ... tīrṇo hi kadā sarvān śokān hr̥dayasya bhavati.*

There is now, in verses 343-362, an explanation of the BU passage *sa yathā kumāro vā*

सर्वसंसारदुःखौघव्यतीतेयं परात्मनः ।
अवस्थेत्यत्र दृष्टान्तः स यथेत्यभिधीयते ॥३४३॥

This state¹ of the Ātman (viz. the inner self) is beyond all the influx of misery (caused by) transmigratory existence; in this regard, an illustration is stated in (the words) *sa yathā* [343]

¹This refers to the sleep state.

स्तनंधयो यथा बालो रागद्वेषविवर्जितः ।

तदभावाद्विकुर्वन्ति चेतो न विषयाः सदा ॥३४४॥

As a suckling is free from any attachment and/or hatred, (so) ¹ are the objects of desire (infested by the same) and, owing to their absence (in them, never affect the *manas* (of this one, i.e. the individual). [344]

¹This is for *evam* in the BU passage; the usual correlative *tathā* of *yathā* is not used by Sureśvara. Also, the simile is somewhat unhappily (or, clumsily) expressed!

अप्ररूढेन्द्रियत्वाच्च रागद्वेषाद्यसंप्लुतिः ।
मृदुकण्टकवत्तद्धीर्नालं वेद्धुं स्वगोचरान् ॥३४५॥

In the case of young baby, there is no possibility of being overpowered by attachment, hatred etc., owing to the organs not being (fully) developed, its intellect is not capable of grasping its objects, as the soft thorns ¹ (are not strong enough to pierce them that come its way). [345]

This is yet one more reason for the absence of *rāgādi* on the part of the inner self. There is a deliberate or intentional use of the word *aprarūḍhendriyatvāt* in a double sense; it is related to both a baby and the inner self. It may be said that the simile has become somewhat over-worked!

¹This is to mean that the thorns are not fully developed and, therefore, not sharp.

सर्वत्राव्याहताज्ञश्च विधेयप्रकृतित्वतः ।
राजा वातिसुखी लोके प्ररूढेन्द्रियवानपि ॥३४६॥

And even if the king has his organs fully developed, he is one whose orders are everywhere unchallenged owing to his subjects being under his control and he is therefore very (lit. extremely) happy. (Even so is the inner self very happy). ¹ [346]

This is in contrast with *apradūḍhendriyatva* etc. in the case of the baby in the preceding verse.

¹In this simile, the common property is 'extreme happiness'. One need not seek further point(s) of similitude. Also may be marked the use of *vā* in the sense of *iva* (as sanctioned by *Alaṃkāraśāstra*). See the next verse also for this.

विज्ञाताशेषतत्त्वो वा ब्राह्मणः कृतकृत्यतः ।
आनन्दस्य परां काष्ठामतिघ्नीमेत्य निर्वृतः ॥३४७॥

Or (the inner self is like) a Brāhmaṇa,¹ who has known the entire truth (of transmigratory nature of life), has achieved (the proper end of all) his duties (lit. doings), and having reached the farthest end of happiness,² the highest happiness (or, bliss), has become³ utterly happy (*nirvrta*). [347]

¹The use of *mahābrāhmaṇa* in BU does not relate to the later accepted derogatory sense.

²This is the meaning of *atighnī*; it is later explained in verse 350 below.

³SP refers to the Brāhmaṇa's happy sleep!

बालादित्रयमप्येतदेको दृष्टान्त इष्यते ।
बालमौढ्यमदान्धत्वनिवृत्त्यर्थं तथोच्यते ॥३४८॥

The triad, beginning with a baby is accepted (lit. desired) to be but (*api*)¹ one illustration; (but) it is so² expressed (only) to avert (the notions of) the baby's ignorance (lit. folly) and (the king's) blindness by passion. [348]

¹Read SP: *yad etad bālāditrayaṃ dr̥ṣṭāntatvenoktaṃ tan na tathā kiṃ tv eko mahābrāhmaṇo dr̥ṣṭānta ity arthaḥ apis taddhīr nālam ity ato nañam anukarṣati*. The second line explains the significance of the first line.

²That is, in the form of three illustrations.

बालस्य निर्विवेकत्वात्सविवेकः क्षितीश्वरः ।
तन्मदान्ध्यनिषेधार्थं महाब्राह्मण उच्यते ॥३४९॥

Because a baby has no capacity for differentiating (between things and things) and (in contrast with it) the king (lit. lord of the earth) has a capacity of differentiating (between them); therefore, rejecting his blindness caused by pride, there is mention¹ made of a great Brāhmaṇa. [349]

This explains how the illustration is not 'expressed' in fullness.

¹This is in the sense of 'the use of the illustration'.

अतीत्य दुःखहेतून्या हन्ति दुःखान्यशेषतः ।
आनन्दस्य परा निष्ठा तेनातिघनीति भण्यते ॥३५०॥

That state of happiness which transcends all unhappinesses (or, sorrows) and destroys all the miseries in their entirety is therefore expressed in the word *atighnī* 'the highest happiness (or bliss)'. [350]

This explains the word *atighnī* in verse 347 above.

निर्विकारात्मनां यस्माद्बालादीनां स्व आत्मनि ।
अतीव जायते ह्लादो दृष्टान्तः स विवक्षितः ॥३५१॥

Since, in the case of a baby and others, who are devoid of (i.e. unaffected by) what have the nature of modifications of the original state of mind, there arises (lit. is produced) in one's own self¹ a great joy; therefore that² is intended as an illustration. [351]

¹*ātmani* is used as a reflexive pronoun, and yet the sense of the inner self cannot be neglected.

²The word that refers to all the three sentences which convey different examples to form a *mahāvākya*; i.e. *vākyasamuccaya*,

as the writers on Poetics call it; cf. *Sāhitya Darpaṇa* chapter 1.

परसंबन्धमेत्यात्मा कार्यकारणरूपिभिः ।
ऐकात्म्यलक्षणं साक्षाच्छेत इत्यभिधीयते ॥३५२॥

What is said in the above is: Having come into direct connection with (or, relation to) the highest self, which is characterized by singleness, through (organs) which had assumed the forms of causes and effects, the Ātman (i.e. the inner self) goes to sleep. [352]

This is the proper meaning of *śete* in BU.

अत्यन्तसंनिकृष्टानामपि भिन्नात्मनां मितेः ।
लोचनस्थाञ्जनादीनां न दृष्टिपथतेष्यते ॥३५३॥
किमु प्रध्वस्तनिःशेषभेदहेताविहात्मनि ।
ग्राह्यग्राहकसंबन्धः सर्वभेदापनोदिनि ॥३५४॥

It is accepted that the collirium etc. in the eye, though they are extremely near (to the eye), being (known) as having different natures though, cannot become visible; [353]
what then to say in respect of the relation between what is to be grasped and the one who grasps (it), viz. the Ātman here (i.e. in the stage of sleep, or, in the inner self)¹ who is the cause of the complete (*pra*) destruction of all the differences in their entirety and who removes far away all distinct (objects)?² [354]

This argument is adduced for bringing out that the highest Ātman and the inner self in the sleep state, though very near to each other, are not known as one, owing to the difference in their natures. This is done by *kaimutikanyāya* in verse 354.

¹ Better, however, is to understand the sleep state.

² The word *bheda* seems to have, in this verse, two senses: (i) difference, and (ii) distinct objects.

स्वस्थावस्थैव यैतेषां प्रसिद्धा जगतीक्ष्यते ।
दृष्टान्तत्वेन स्वापस्य सैव साक्षाद्विवक्ष्यते ॥३५५॥

By the use of the illustration of the sleep state, here is intended to speak about that very state by which is known (or, accepted) in (our) worldly life (*jagati*) the most (*pra*) familiar condition of them.¹ [355]

¹This refers to *bāla*, *mahārāja* and *mahābrāhmaṇa* in the 'so-called' one illustration.

दाष्टान्तिकत्वेन यतः सुषुप्तोऽत्र विवक्षितः ।
नापि बालादिस्वापस्य विशेषः कश्चिदीक्ष्यते ॥३५६॥

Since as the *dārṣṭāntika* 'that for explaining which an illustration is given' is accepted here a person in sleep, therefore, there is not any particular nature of the sleep of a baby and others kept in view. [356]

अव्याहतमतिर्बालः सर्वातिशयवर्जिताम् ।
आनन्दस्य परां निष्ठामतिघ्नीं प्रतिपद्यते ॥३५७॥

A baby whose intelligence (or, sense of knowing) is not obstructed (by any outside influence) reaches the farthest end of happiness, the highest happiness (i.e. bliss) which is devoid of all excellences of other (states). [357]

यावद्यावत्प्ररूढत्वं रागादेर्जायते शिशोः ।
तावत्तावत्प्ररूढत्वं दुःखस्याप्यभिजायते ॥३५८॥

In the case of the baby, the more is the development (of its) attachment (to things) etc., the more is the intensity (of its) sorrow also. [358]

यथैव तत्तनुत्वं च यावद्यावदिहात्मनः ।

दुःखस्यापि तनुत्वं स्यात्तावत्तावत्सुखात्मनः ॥३५९॥

(And) as there would be smallness¹ of its sorrow (in proportion to its wants or needs), so also there would be in the case of the Ātman (i.e. the inner self) here (i.e. in worldly life or at the level of worldly existence) smallness in the sorrow, viz. of the one in the state of happiness. [359]

¹What is expressed in the preceding verse is stated in this verse in *vaidharmya* form.

उत्तरोत्तरवृद्ध्यातो दुःखहेतुक्षयाच्छ्रुतौ ।
सहस्रदशभागेन निष्ठानन्दस्य भण्यते ॥३६०॥

Therefore, there is stated in the Śruti a gradual subsequent increase in the limit of the happiness (of the inner self) on account of (the gradual) loss (or, decrease) of sorrow, in relation to the ten thousand measures of them.¹ [360]

¹This is on the basis of *Taittirīyopaniṣad* 2.8 beginning with *sa eko mānuṣa ānandaḥ* up to *sa eko brahmaṇa ānandaḥ*. Read SP for a little more explanation of the increase of the limit of happiness as *sukhabāhulayasiddhi* under reference.

अव्यावृत्ताननुगतप्रत्यङ्मात्रसमाप्तिः ।
भूमन्येव तु परा निष्ठानन्दस्येति श्रुतेर्वचः ॥३६१॥

(Also) there is a Śruti statement¹ that conveys the farthest limit of joy (or happiness) in only *bhūman* 'plenty' arising from obtaining only (the pure, i.e. unaffected, state of) the inner self which is not (i.e. cannot be) distinguished from or similar to (any other object).² [361]

¹This refers to CU 7.23.1.

²This is said, because that does not exist.

आनन्दः स्वयमेवात्मा भेदसंसर्गवर्जितः ।
दुःखहेतुविनिर्मुक्तावतिघ्नीमेत्यतः स्वतः ॥३६२॥

The Ātman (here, the inner self), (then) becoming devoid of any contact with distinct objects, is itself happiness and when there is release from the causes of sorrow (or, miseries), attains, of itself,¹ to the farthest limit (of happiness.) [362]

¹The significance of this word, viz. *svataḥ* 'of itself', is to point to the absence of the final release from transmigration (SP).

Verses 363-366 are for pointing out the relation of the preceding to the subsequent *Kaṇḍikā*: *sa yathorṇanābhīḥ*

गार्ग्यं काश्यो यदप्राक्षीत्क्वाभूदेष तदेति तत् ।
सप्रपञ्चं यथावच्च सर्वमुक्तमशेषतः ॥३६३॥
अनेन च यथोक्तेन पाणिपैषोत्थितस्य हि ।
मोहोत्थाशेषकार्येभ्यो विशुद्धिं श्रुतिरब्रवीत् ॥३६४॥

That Kāśya asked Gārgya, 'Where was this one then?' is explained in its fullness, as was necessary (*yathāvat*). [363]
And by this,¹ viz. this explanation, the Śruti has declared the purification (i.e. distinction) of just² that one, who was awakened by shaking (by Kāśya) with his hand, from all of the effects that had arisen from ignorance. [364]

¹Both SP and NKL point to it as *tvampadārthaśodhana*.

²This is for *hi*; SP remarks: *tathāvidhā śuddhir anyatrāpi prasiddheti hiśabdārthaḥ*.

कुत आगदिति त्वस्य प्रश्नार्थविश्चकीर्षया ।
सुषुप्ताज्जाग्रदापत्तिर्यथा तदधुनोच्यते ॥३६५॥

And (*tu*) now is stated as to how there is awakening (i.e. bringing him to the waking state) from the state of sleep,

with a desire to clarify the thought (lit. thing, raised by) the question, 'Whence has he come?'. [365]

This refers, in substance, to Jīva 'the inner self' that was asleep.

Verses 366-390 discuss a doubt raised about the repetition of the questions (i.e. statements) of Kāśya and the rejection of the same.

नन्वस्थाद्यो हि यत्रेह स तस्मादन्यतो व्रजन् ।
वेश्मतो ग्रामतो वासौ तत एव व्रजेद्ध्रुवम् ॥३६६॥

'But, indeed,' (it may be argued) 'he, who stood at some place (*yatra*), would, going elsewhere,¹ whether from a house or a village, certainly go only from that place itself.' [366]

¹This is the object to which the person goes; cf. SP: *anyata iti gatikarmoktiḥ*.

तस्मात्सामर्थ्यतः सिद्ध उत्तरप्रश्ननिर्णयः ।
तन्निर्णयार्थमारम्भो न कार्यो जामिदोषतः ॥३६७॥

Therefore, the decision regarding (i.e. answer to) the subsequent question is (already) given (lit. determined) through the force (of that); therefore, there should not (now) be made an effort (lit. a beginning) to decide the same, lest there would result the fault of repetition (*jāmi*). [367]

न निमित्ताद्यर्थतापि पञ्चम्या उपपद्यते ।
ऊर्णनाभ्यग्निदृष्टान्ते न निमित्तादि गम्यते ॥३६८॥

Also, it does not stand to reason to hold that the meaning conveyed by the ablative case is expressive of reason (or, cause); (for) in the illustration of the spider and (also that of) Agni¹ there is not understood any reason etc. [368]

¹This is a reference to the illustration *sa yathorṇanābhiḥ* ... to follow.

प्रत्युक्तौ न निमित्तादि यदि साक्षात्समीक्ष्यते ।
अपादानार्थतैवास्तु दोषस्यान्यत्र दर्शनात् ॥३६९॥

Since, in the answer, there is not any reason etc. directly noticed, therefore, let there be the sense of ablation (or, going away from a thing), as there is noticed the fault (of repetition) (in the case) of the other (sense). [369]

नन्वत्रापि समो दोषो वाक्यस्य पुनरुक्तता ।
नैवं यतोऽखिलध्वान्तकार्यध्वंसो विवक्षितः ॥३७०॥

(An objection is raised thus:) 'But, here (i.e. in this case) also, there is the same (*sama*) fault, viz. the repetition of the sentence(-sense).' (There is now an answer to this objection:) 'This is not so; for what is intended to mention is the destruction of the entire effect(-world) of darkness, i.e. ignorance (Avidyā).' [370]

अव्यावृत्ताननुगतं पूर्णं ब्रह्म विवक्षितम् ।
प्रत्यङ्मात्रैकयाथात्म्यं न दोषो जामिता ततः ॥३७१॥

Since it is (here) wished to speak about the Brahman, which is not distinguished from (anything else), nor is it similar to (anything else); full/complete (in itself), and only the true nature of the inner self; therefore there is no fault of repetition. [371]

This is the intended statement latent in the second question of Kāśya.

विषयौ द्वावपन्यस्तौ विद्याविद्यात्मनोरिह ।
आत्मेत्येवेति विद्याया विषयः प्रागुदाहृतः ॥३७२॥

अविद्याविषयस्तावत्संसारानर्थ ईरितः ।

क्रियाकारकभेदेन नामरूपक्रियात्मकः ॥३७३॥

Here are put forth two topics of the dialogue, i.e. the subject matter regarding knowledge and ignorance about (the true nature of) the two Ātmans,¹ (and) already (*prāk*) the subject matter of knowledge is presented just in the words *ātman* [372]

(and), as for the subject matter of ignorance, there is stated the undesirable transmigratory existence which comprises action (or activity) and various factors related to it and which has the nature of name(s), form(s) and action(s).² [373]

¹The highest Ātman and the inner self.

²This refers to the subject matter of first Adhyāya.

तत्राविद्योद्भवं कार्यं यावत्किंचिद्विवक्षितम् ।

तत्प्रत्यपादि निखिलं पूर्वं श्रुत्यैव यत्नतः ॥३७४॥

Of these two,¹ whatever was intended as effect arising from ignorance has been already² explained by the Śruti, in its fullness and with particular care. [374]

¹That is, knowledge (*vidyā*) and ignorance (*avidyā*).

²That is from 1.4.10 onwards up to the end of first Adhyāya.

अविद्याप्रतिपक्षाया विद्याया विषयोऽधुना ।

प्रवक्तव्योऽतस्तद्योग्यौ प्रश्नौ द्वौ समुदाहृतौ ॥३७५॥

(And) now is to be discussed (or explained) the subject matter of knowledge, which is opposed to (lit. is an opponent to) ignorance; therefore, there are introduced two questions which are suitable for the same.¹ [375]

¹SP states *vidyāsūtram na prapañcitam iti*.

हेतुस्वरूपकार्याणि विरोधीनि परस्परम् ।
अविद्याविद्ययोर्यस्मात्तद्योग्यप्रश्नगीरतः ॥३७६॥

Since the causes, natures and effects¹ of ignorance and those of knowledge are mutually opposite, therefore, the statement of the (two) questions is proper.² [376]

This clarifies the mutual opposition of ignorance and knowledge.

¹SP clarifies them thus:

	ignorance	knowledge
cause	informative of non-discrimination, attachment etc.	productive and informative of (proper) discrimination, aversion to pleasures etc.
nature	manifest	unmanifest
effect	bondage	freedom from bondage

²That is, suitable for giving an exposition of knowledge which removes ignorance.

कारकव्यवहारोऽयमविद्याविषयः सदा ।
आधाराधेययोर्भित्तौ तयोः कारकतेष्यते ॥३७७॥

The function of various factors which are instrumental in bringing about an activity is ever the subject matter of ignorance. (And) on the basis of the support and the supported are the two¹ accepted as related to action (expressed by the verb in the sentence (*kārkatā*).¹) [377]

¹Namely, ignorance and the instrument of its activity.

²SP states that this statement pertains to the first question of Kāśya.

तद्वद्गच्छति यो यस्माद्भेदे सत्येव याति सः ।
इत्यविद्याव्यवस्थेयं विद्यायास्तद्विपर्ययः ॥३७८॥

Similarly, he who goes from some (place) does so (i.e. goes) only when there is a difference (between the other place and the goer's earlier place); thus is the order of things (*vyavasthā*) related to ignorance and, in relation to knowledge,¹ the opposite of it (viz. non-difference and the consequent order of things) is (to be understood). [378]

¹SP observes that this is related to the second question of Kāśya. The editor of NKL adds a note to the NKL thus: *apādānakartṛbhāvasya* (as *apādānatvakartṛtvayoḥ*), *tathāṭve* (as *avidyākāryatve*) and *yuktim* (as *bhedasāpekṣatvarūpāṃ yuktim*) *āha*.

क्रियाकारकभेदाद्या लोकतः शेमुषी त्वभूत् ।
यथास्थितात्मयाथात्म्यसम्यग्ज्ञानेन बाध्यते ॥३७९॥

And (*tu*) what notion there was about the difference between an activity and its instruments—as is held by the people (*lokataḥ*)— is stultified by the right knowledge of the real nature of the Ātman that has been existent. [379]

This expresses the effect of knowing clearly the difference between ignorance and knowledge.

नान्योऽयमात्मान्यत्राभन्नान्योऽन्यस्मात्तथैति च ।
इति निःशेषतन्मोहकार्यैध्वंसो विवक्षितः ॥३८०॥

This Ātman (i.e. the inner self) did not become another in another place, nor is it another and does it go elsewhere; thus it is intended to express the complete (or, utter) destruction of the wrong apprehension about it and also (the consequent) effects thereof. [380]

NKL briefly points out the intention thus: *ādhārādheya-bhāvāpādānakartṛtvādinirāso vivakṣita ity arthaḥ*.

अभेदव्यतिरेकाभ्यां वस्त्वन्तरमिहात्मनः ।
श्रुत्या निषिध्यते साक्षाद्वेदहेतोर्निषेधतः ॥३८१॥

Here (in this statement of questions) anything else than the Ātman (i.e. the inner self) is rejected by the Śruti, with the Anvaya and Vyatireka (method of argument) and, directly, by (the consequent) rejection of the cause of (their) being distinct.¹ [381]

¹This refers to ignorance.

ननु प्राणादिभिः सद्भिः कथं निर्भेदतात्मनः ।
नात्मन्येव तदध्यासाच्छ्रुतकारजतादिवत् ॥३८२॥

‘But’ (it is objected): ‘How can there be the non-distinction of the Ātman (i.e. the inner self) (from the *prāṇas* ...) while there are *prāṇas* and others¹?’ (The answer is:) ‘That cannot be so, owing to the superimposition of them on the Ātman (i.e. the inner self) like that of silver etc.² on a shell.’ [382]

¹The word etc. refers to intellect, *manas*, *ahaṁkāra*, *mamātva* and others.

²This ‘etc.’ is yet again Sureśvara’s loose diction, i.e. for *ādi* in *rajatādi* there are not mentioned any counterparts other than a shell. Or, are we to understand the compound *śūktikārajatādivat* as *śūktikādi-rajatādi-vat*, (for such is Sureśvara’s way of expression)?

कथं तदिति दृष्टान्त ऊर्णनाभ्यादिरुच्यते ।
वास्तवं वृत्तमापेक्ष्य न त्वियं सृष्टिरात्मनः ॥३८३॥

(A question is asked:) ‘How is that¹ (to be understood)?’ (In answer) it is pointed out ‘(the illustration of) a spider etc. is given.’ (Again, another question:) ‘(Is not) this with actual happening in view?’³ (An answer to it is given thus:)

'Indeed, this is not the creation of the Ātman (i.e. inner self).'
[383]

¹The questioner asks about the superimposition affirmed in the preceding verse.

²The word etc. refers to the sparks of fire. It has a basis in the clauses *yathorṇanābhiḥ tantunocaret, yathāgneḥ kṣudrā visphulingā vyuccaranti*.

³The *lyabanta* form *āpekṣya* is from a verb root *īkṣ* with *ā-apa* as a compound prefix.

नासतो जन्मना योगः सतः सत्त्वान्न चेष्ट्यते ।
कूटस्थे विक्रिया नास्ति तस्मादज्ञानतो जनिः ॥३८४॥

That which is non-existent is not connected with (any) origination, nor is it accepted as originating from what is existent; because it has (already) the nature of being an existent. In the immutable again, there does not occur any modification. Therefore, (it is settled that the *prāṇas* etc. have) an origin in ignorance.
[384]

This explains the unreality of *prāṇas*.

पुंसप्रबोधप्रसिद्धयर्थं सृष्टिव्याजोऽयमुच्यते ।
कौटस्थ्यात्त्वात्मनः सृष्टिर्न कथं च न युज्यते ॥३८५॥

In order to explain (lit. establish) the waking up of the man,¹ this pretext of (the statement of) the creation is adopted; nevertheless, (any) creation from the Ātman (i.e. the inner self) does not, owing to its immutability, become in any way possible.
[385]

¹NKL reads: *svaprabodhasiddhyartham* in place of *pumspra...*; but that does not seem to be probable.

निःशेषवेदसिद्धान्तविद्वद्विरपि भाषितम् ।

गौडाचार्यैरिदं वस्तु यथास्माभिः प्रपञ्चितम् ॥३८६॥
 मृल्लोहविस्फुल्लिङ्गाद्यैः सृष्टिर्या चोदितान्यथा ।
 उपायः सोऽवताराय नास्ति भेदः कथं चन ॥३८७॥

The revered teacher (*ācārya*) Gauḍapāda, who knew the entire Vedānta doctrine (only too well), also has described at length the thing (viz. the existent thing is really the Ātman alone), in the same way as I have done: [386]

“Whatever creation (was earlier) pointed out (by me), viz. by (citing examples of) clay, iron, sparks of fire and others, was only otherwise (i.e. false or not real); that was only by way of introducing (the real matter, in hand); indeed, there do not exist any discrete objects.”¹ [387]

¹This is a quotation, viz. *Gauḍapādakārikā* 3.15.

सृष्टावन्यपरायां तु न चोद्यस्यास्ति संभवः ।
 कूटस्थात्कथमुत्पत्तिरचित्कं चेतनात्कथम् ॥३८८॥

When creation¹ is pointing towards something else,² there is no possibility of (or, no scope for) any objection;³ (for we ask:) ‘How can there be any origination (of something) from the immutable and how could there be any non-sentient (produced) from the sentient?’ [388]

The argument refers to what are known as *sṛṣṭivākyas* ‘statements about the origination of what forms the mundane world’. Reference was made to these by Gauḍapāda and other Vedāntins; yet with the intention of showing the origination as unreal.

¹That is, the statements about creation or origination of some thing(s).

²This is based on the singleness of the Ātman.

³Namely, the Ātman or the immutable originates other things.

निःसाधनं च कार्याणि कथं कुर्यादनेकधा ।

विश्वरूपसमुत्पत्तिरेकरूपात्कथं भवेत् ॥३८९॥

How can what does not have any means (of activity) produce manifold (i.e. varied) effects? How (again) can there be creation of all forms (*viśva-rūpa*) from what is (only) uniform?

[389]

This argument is based on the prerequisites of creation, viz. (i) there should be the means for creation and that (ii) the cause and the effect must be similar (in form).

इत्येवमादि चोद्यानां पुंस्वभावानुरोधतः ।
परिहारवचः श्रौतं न च वस्त्वनुरोधतः ॥३९०॥

Thus the statements of refutation in the Śruti¹ pertain to the objection (that arises) from men's nature and not from (the real state of) the thing.²

[390]

Here is given finally the purport of the whole of the argument.

This is to explain the need of the Śruti sentences which resemble those in common parlance; cf. BSB 1.1.1 (p.40): *tam etam adhyāsam avidyākhyam ātmānātmanor itaretarādhyāsam puraskṛtya sarve pramāṇaprameyavyavahārā laukikā vaidikāś ca pravṛttāḥ*.

¹The reference in the singular implies the plurality of the sentences. This refers to the illustrative statements in the Śruti which explain the natures of ignorance and knowledge.

²That is, the nature of the Ātman or, the inner self (as the case may be).

Now follows the explanation of the BU 2.1.20 and discussion of allied matters.

ऊर्णनाभिः स्वयं कर्ता प्रयुङ्क्ते कर्म चात्मना ।
तन्तन्स्वतः प्रसिद्धेन करणेन च तन्तना ।
गमिक्रियां साधयति तथैकत्रापि चात्मनः ॥३९१॥

A spider, being itself an agent, employs, on its own, the object, viz. the threads (produced) from itself¹ by means of its (well-)known organ, viz. the thread, and accomplishes the action of going (along/about) it); so is it (to be understood) also (*ca*) in the case of the Ātman (i.e. the inner self), even though it is only single (by itself).² [391]

The word *anekadhā* in the preceding verse is in view.

¹See on this NKL: *svayam eva kartrā karanam ca tyaktvā anekadhā sṛṣṭatvam āha*.

²'So is it ... (by itself)' is in conformity with the explanation of SP and NKL. I believe it to be necessary owing to the incompleteness of the meaning, if *ekatrāpi cātmani* is related to the spider itself. So also, the force of *ca* 'also' would be otherwise lost.

अचेतनो यथा जाल ऊर्णनाभेः सचेतनात् ।
आकाशादिजगत्कार्यमात्मनश्चेतनात्तथा ॥३९२॥

As an insentient cob-web¹ (comes from, i.e. is produced from) a sentient spider, so does the (entire world of) effect(s), beginning with the sky,² (come from) the sentient Ātman (i.e. the inner self). [392]

This answers *acitkam cetanāt katham* in verse 388 above.

¹Sureśvara uses the word *jāla* in the masculine! Perhaps, a fastidious reader, following the dictum of Poetics, would suggest: *acetanam yathā jālam* so that it corresponded to *kāryam* (in neuter) and that could not be objectionable. But this can be in (Sureśvara's) occasional Vedic fashion.

²Cf. *Taittirīyopaniṣad* 2.1.

विस्फुलिङ्गा यथा चाग्नेर्जायन्तेऽग्निस्वभावकाः ।
सुषुप्तादात्मनस्तद्वत्प्राणादीनां समुद्भवः ॥३९३॥

Also as small sparks proceed (i.e. arise) from fire and (further) have the nature of fire (itself), so do the *prāṇas* etc. come (i.e. arise) from the Ātman (i.e. the inner self) which is asleep. [393]

This is to answer (also) *kūṭasthāt katham* in verse 388 above.

सुषुप्तोदाहृतिर्येयं तया समुपलक्ष्यते ।
विश्वाभिव्यक्तितः पूर्वं ब्रह्मैवानामरूपकम् ॥३९४॥

What (again) is the example of the one (viz. the inner self) that is asleep points to (or, indicates) the very Brahman which existed before the world became manifest (and) which did not have any name and form. [394]

This sets aside any notion of *kāryakāraṇa* relation between the (sleeping) inner self and the highest Ātman.

सर्वासूपनिषत्स्वेवं कारणं नान्यदात्मनः ।
श्रूयतेऽतः परात्मैव जगतः कारणं परम् ॥३९५॥

Thus in all of the Upaniṣads is thus heard that there is nothing else¹ as the cause of the inner self; therefore, the highest Ātman alone is the ultimate (*para*) cause. [395]

¹SP points out that this sets aside the theory of the Pradhāna as the cause. This, on the basis of the Upaniṣads.

There is now, in verses 396-413, Sureśvara's discussion about the divergent views of the followers of his some allied schools, viz. possibly of those who accept the authoritativeness of the Śruti. And there is also the refutation of the same in brief.

ब्रह्मण्यस्तमितेऽत्यर्थं जगद्यस्मिन्नशेषतः ।
जगत्प्रसूतौ को हेतुस्तदन्याव्यतिरेकतः ॥३९६॥

(One might say:) 'When (i.e. in the case that) this entire world has finally merged into the Brahman, what can (or, could) be the cause of/for its origination, since there is altogether an absence of anything else than that?' [396]

The argument is based on two aspects of the Brahman: (i) it is immutable and (ii) it is without a second. Therefore, once the world merges into the Brahman, there can never be any creation!

अस्तीशो व्यतिरिक्तश्चेत्सोऽपि केन प्रवर्तितः ।
जगन्निर्मिनुयादेतत्स्वतश्चेत्सर्वदा न किम् ॥३९७॥

If (it is held that) there is a Lord, apart (from the Brahman), (then the question would be,) 'How would he be able to create the world?'¹ (and) impelled by whom? And if he would do so, on his own (*svataḥ*), then why (does or can he) not (create the world) always?² [397]

This argument comes from Tārīkikas 'Logicians' who hold that there is an indifferent (*atastha*) Lord, beside the Brahman.

¹Having doubted the existence of such a Lord (cf. *so 'pi*), Sureśvara puts a question: 'Who would impel that Lord?'

²This is a counterquestion to the Tārīkikas. Here, another alternative, viz. *svataḥ* 'on his own' is refuted.

ऐश्वर्यं पारतन्त्र्यं च नापि संभाव्यते मितेः ।
नापि कार्यं विलीनत्वात्स्वात्मोत्पत्तौ प्रवर्तते ॥३९८॥

And Lordship and dependence both cannot possibly exist (in just one Lord), (for that can be understood) from the modes of arguing.¹ So also, the effect, owing to its having merged (in the Brahman), cannot proceed to produce itself.² [398]

There are two aspects of this verse. One is in continuation of the Tārīkikas' argument and, the other of the Svabhāvavādins

who believe in the nature of things to come into existence on their own. Cf. *Śvetāśvataropaniṣad* 1.2 and 6.1.

¹This has reference to yet another aspect of the Tārīkikas' thought, viz. it is *karman* that impels the Lord to create. But this would mean his dependence and, being a Lord, he should be independent! That would involve self-contradiction.

²It can be argued by the Svabhāvavādins that the world, which is a *kārya*, can come into existence by its own nature. Yet, having had merged into the Brahman, how could it proceed to any activity?

भिन्नं चेत्कारणात्कार्यं कार्यकारणता तयोः ।
पृथक्प्रसिद्धयोः केयं हिमवद्विन्ध्ययोरिव ॥३९९॥

If (again) the effect is different from the cause, what kind of cause and effect relation can there be between them, viz. the cause and the effect, which are quite well-known to be distinct even as Mt. Himālaya and Mt. Vindhya? [399]

The question pertains to the Tārīkikas' position that cause and effect must be similar. Here the Brahman and the world are totally different from each other and, therefore, one could not consider them as the cause and the effect.

अथाभिन्नं तदैकत्वात्कार्यकारणता कुतः ।

Further, if thus the effect is not distinct¹ from the cause; then the two being just one, how could there be (posited) the cause and effect relation of the two? [400ab]

¹By 'distinct' one should be required to understand two different entities; but this is denied by the use of the word *ekatvāt*. Non-distinction in nature is not under discussion here; for, the Tārīkikas have already mentioned that as what is a characteristic of the cause and the effect—this is mentioned in the note on the preceding verse.

नापि निष्क्रियरूपं सत्कारणत्वं समश्नुते ॥४००॥
 तथा चाक्रियमाणं सत्कथं कार्यमिहोच्यते ।
 क्रियाशून्यं च यद्वस्तु तच्चाकारकमिष्यते ॥४०१॥

Also, nothing, being inactive in nature, can be a cause (or, be called a cause).¹ [400cd]

So also, what is not being subjected to some action is described here as the effect!² And, that thing which is devoid of any activity is regarded (lit. accepted) here as what is instrumental (in some activity).³ [401]

¹Actually, this line is read in the printed edition together with verse 400ab and is not separated as is done here. But it begins a discussion of the natures of what are related as the cause and the effect. Here, it is pointed out that what is non-operative/non-active in nature—such is the Brahman—is considered as the cause; this is not logically possible.

²To be an effect something is required to have been subjected to an activity of some cause(s) to produce it. But the argumentator seems to hold that there is some effect, and yet that has no cause(s) for it!

³The word 'instrumental' suggests the nature of what is held as cause—most likely, the agent—and has no relation to any activity whatever.

लयेनैव समाप्तत्वात्कालकर्मादिकारणम् ।
 स्वात्मोत्पत्तावशक्तं तद् व्यक्तं सामर्थ्यभाष्यतः ॥४०२॥

Since what is considered as the cause of creation, viz. the *karman* (or activity of) Kāla,¹ is already included in Merger,² that (viz. Kāla) is not capable of coming into existence itself and it is held to have the capacity to create (only when) it is manifest!³ [402]

Here is controverted a view of those who hold Kāla as the

cause of the creation of the world; cf. reference to this view in *Gauḍapāḍakārikā* 2.24.

¹The basis of this may be BU 1.2.4 (and *Maitrāyanyūpaniṣad* 6.14).

²The Brahman itself is (in every likelihood) called *laya* 'Merger', since all objects in the world merge in it.

³The argument is: To be able to create anything, Kāla must come into existence first.

नित्यशक्तित्वपक्षेऽपि युगपत्प्रभवादिकम् ।
प्राप्नोति सर्वकार्यस्य न च तद्वर्तते तथा ॥४०३॥

If a view is held¹ that the cause of the world² has ever (or, for all time) the power to create, then the origin etc.³ of all effects would be (only) simultaneous; but that does not so happen.⁴ [403]

¹For 'If a ... held', alternatively translate: 'In the view that ...'. But the first alternative appears better.

²That is Kāla, continued from the preceding verse.

³The word etc. refers to *apyaya* 'merger'. Or, one can understand in the place of these two: the usual triad, *utpatti*, *sthiti* and *laya*.

⁴This is how the view under reference cannot be accepted.

शक्त्युत्पत्त्यभ्युपेतौ च कारणं स्यादशक्तितमम् ।
अथ शक्त्यन्तराच्छक्तिरनवस्था प्रसज्यते ॥४०४॥

Or, if it is held that this power to create the world comes to exist in the cause, it would then mean that the cause does not have the power (to create the world);¹ thence it would follow that that power (to create the world) has come from (or, originated in) another power² and thus there would be the contingent *infinite regress*. [404]

This is an alternative view to that in the preceding verse and

is consequently refuted.

¹This would mean a cause is powerless to create the world and is itself created by some cause.

²This power, in its turn, must originate in yet another and so on.

किमपेक्ष्य व्यपेतत्वं कालोऽयं वार्तमानिकः ।
यायादनागतत्वं च तस्यैक्याभागवत्त्वतः ॥४०५॥
नित्यमेकं विभु द्रव्यं यदि कालोऽभ्युपेयते ।
अतीतानागतत्वादिभेदः स्यात्किंनिबन्धनः ॥४०६॥

On what does (Kāla) depend (i) to be (of the nature of being) past and (ii) that this Kāla of the present would be (of the) future—if it has just the nature of being one whole and having no parts? [405]

If Kāla is accepted as eternal, one (i.e. single) and all-pervading substance; then in what is rooted its differentiation into what is past and what is to come? [406]

The argument is: Acceptance of the past, the present and the future as three parts of Kāla would render it unfit to be the origin or cause of this world.

The Vaiśeṣikas (i.e. Tārīkikas) hold Kāla as *nityā-*, *eka-* and *vibhu-* *dravya* 'substance'. This means, being *vibhu* 'all-pervading' like the sky, it cannot have such parts as are mentioned in the above.

आदित्यादिगतिश्चेत्स्यात्कालोऽव्यक्तसमुत्थितौ ।
आदित्यादेर्विलीनत्वान्न तदा तत्क्रियेयते ॥४०७॥

If (it is said that) Kāla is the (varying) movement of Āditya and others,¹ then (it has to be admitted that that movement can occur only) after there has been the rise (or manifestation) of the unmanifest;² but, because Āditya and others¹ have already had merged (in the unmanifest), there would not be any action thought of (or, contemplated, lit. accepted of the

Āditya and others).

[407]

¹It is difficult to explain what is meant by *-ādi* 'others' in *ādityādi* (this is twice used in this verse). One can perhaps say that *-ādi* refers to the limiting adjuncts of the sun, viz. *gati*, capacity to heat, and light—this can be so on the clue suggested by NKL's explanation of *kālah* as *kālopādhir iti yāvat*. NKL's comment on this verse offers some difficulty: It states: *yad vā ādityādikriyaiva kālah ity āśanikya anena vārtikena nirasyate*; but how can this be an alternative? The tenor of the arguments precludes the same.

Or possibly, and better perhaps, to hold that this is based on *Maitrāyanyupaniṣad* 6.15.

²The unmanifest is the Brahman, the so-called source of the world; *nāmarūpābhyām avyākṛta*.

न चावयविनो वृत्तिर्निरंशैकत्वहेतुतः ।

भागेषु निष्कलत्वैक्यनिःसामान्यत्वकारणात् ॥४०८॥

So also what is (said to be) made of parts¹ cannot exist in (its different/discrete) parts (simultaneously) owing to the reason that it is without parts (i.e. a whole) and (just) one thing; and also because it is (really) not made up of parts and (therefore) is not (what can be called as) general property.

[408]

SP clearly brings out the argument thus (this is only briefly indicated here): A piece of cloth, as a whole, cannot rest on all threads which are related to it as its parts—it can be argued that, while 'clothness' can obtain in some threads, it does not obtain on others. Thus the so-called *samavāya* relation cannot obtain in the case of the Ātman and the various individuals. (This is clarified in the following verse. SP points out thus: *vipakṣam anūdya doṣam āha*.)

¹That is, 'it is a whole'.

आधारेषु निरंशेषु यद्याधेयस्तथाविधः ।
भिन्नदेशेषु तेष्वेकस्तथा चावयवी कथम् ॥४०९॥

If (then) that kind of 'what is to be supported' exists in 'what are supports' that are (in reality) not parts, how then the single one, existing in various places (or beings) can be said to be 'having parts'? [409]

This is to say that the single Ātman, though appearing to exist in many bodies, cannot be said to have those bodies as its parts. It cannot be compared with 'being a form' (*rūpatva*) that is common to many forms (*rūpas*).

तस्मान्न देशकालादिभेदो वस्त्वाश्रयो मितेः ।
दिग्भेदकलृप्तिवद्वयोमिन् भेदोऽयं तद्वदात्मनि ॥४१०॥

Therefore, the distinctions¹ such as a region (or part), Kāla 'time' do not have a support in the thing (viz. the origin of the world, i.e. the Brahman), since (we can show) by (or from) inference (*mitēḥ*) that this (world of) distinctions in (alleged to be obtaining) in the Ātman (in this context, the inner self) is like the (differentiation) in (the case of) the sky in (its) divisions (called) quarters. [410]

Actually, there is not any specific argument in respect of region (unless, of course, *ādhāra-ādheya*, *avayava-avayavin* or *bhāgas* (and, therefore, *bhāgin*) are understood in the sense of *deśa*— and this is clear from the illustration of the sky which is (said to be) divided into quarters.

¹This plural is implied by the singular.

जगदुत्पत्तिसंहारास्तद्वदात्मनि कल्पिताः ।
वस्तुवृत्तं समालोक्य कुतः सृष्ट्यादिसंभवः ॥४११॥

In the same way, (then), the origin and the merger of the world in the (highest) Ātman are (only) imagined; (therefore),

after having seen (i.e. carefully examined) the nature of things,¹ how (or, on what ground, or, whence) can (one posit that) there is a possibility of the creation etc.² of the world? [411]

There is here a stress on the imaginary nature (*kalpitatva*) of the world. This is entailed by the earlier statement about the imaginary nature of the world.

¹Things here refer to the discrete objects in the world, their origination and merger as also the ultimate reality.

²The word etc. refers to the mutual relations among the things in the world and their modifications (*vikāras*).

कारकादिर्यथा भ्रान्तिस्तथा पूर्वमवादिषम् ।
सर्वमात्मेति नेतीति तथा सत्युपपद्यते ॥४१२॥

I have already spoken as to how the (distinctions such as) instrument of activity¹ are only imaginary (i.e. products of imagination). Only that being so,² (the Śruti statements) *sarvam ātmā ...*³ and *neti ...*⁴ become⁵ reasonable. [412]

¹This is indicative of the agent, his action and so on.

²This means: since this is so.

³Cf. BU 4.5.7.

⁴Cf. BU 4.4.22; 4.5.15.

⁵That is, they prove to be in conformity with reason (in our arguments above).

उद्भूतिस्थितिनाशाः स्युर्जगतोऽतः प्रतिक्षणम् ।
अविद्यामात्रहेतुत्वान्नामौषां विद्यते क्रमः ॥४१३॥

As a result, therefore, there occur at every moment the origin, the sustenance and the destruction of (the discrete things in) the world. (And) since these have only ignorance (*Avidyā*) as the cause (of their existence), there is no specific order (among them).¹ [413]

¹This is to point to various orders in creation in different Śruti texts; e.g. *Taittirīyopaniṣad* 2.1: *tasmād vā etasmād ātmana ākāśaḥ sambhūtaḥ*; CU 6.2.4: *tat tejo 'srjata*.

Verses 414-425 explain the meaning of sarve prāṇāḥ

प्राणाः श्रोत्रादयोऽत्र स्यर्दश सप्त च ये मता ।
लोकावच्छेदतोऽमीषां भेदोऽध्यात्मादिलक्षणः ॥४१४॥
जरायुजादिसंभेदभिन्ना लोकाः पृथग्विधा ।

They are the *prāṇas*, viz. the ears and others, which are known as ten and seven,¹ because they are the limiting adjuncts of the *loka* 'a body'; these have a further division into what have the nature of *adhyātma* 'pertaining (or related) to the body' and so on. [414]

The *lokas* 'bodies'² are of various types, viz. distinguished into discrete bodies such as *jarāyuja* 'born from a womb'.³ [415ab]

¹These are: five organs of knowing, five organs of activity, five winds, *manas* and intellect. NKL quotes from *Samkṣepa Śārīraka* 3.20: *iha tāvad akṣadaśakam manasā saha buddhitattvam atha vāyugaṇaḥ*.

²This is to explain how *loka* has a special sense here, viz. 'a body'.

³The others are *udbhijja*, *aṇḍaja* and *svedaaja*.

तथाधिदेवतात्मानो देवाः स्युर्बहुभेदकाः ॥४१५॥

So also there are gods, viz. those who have the nature of (superintending)¹ deities and have many distinctions (among them). [415cd]

¹That is, superintending over the *prāṇas*.

तेऽपि साधारणाः प्राणा देहेऽसाधारणास्तु ते ।

भूतानां परिणामोऽयं यथाकर्म यस्माश्रुतम् ॥४१६॥

And those *prāṇas*¹ are so jointly (i.e. generally)² (residing) in the body, yet they are particular ones (also);³ this is (thus) the modification of the (five) elements,⁴ in accordance with the *karman*⁵ and as it is heard. [416]

¹Here the word *prāṇa* is understood in the sense of gods.

²This is while they are mentioned as having godhead, or, the nature of gods in a general way, viz. Āditya and others, as superintending deities (*ādhidaivika*).

³Those very gods are each one of them identified with the eye and other organs severally (*ādhyātmika*).

⁴They are the products of the five elements and therefore capable of effecting various functions of the organs.

⁵This explains why at times they bring happiness and at others sorrow.

प्राणादिजन्मना जज्ञे विस्फुलिङ्गैर्यथा शिखी ।

परमात्मापि जज्ञे खं यथा कुम्भादिजन्मभिः ॥४१७॥

प्राणाद्यद्भूतितो नान्या क्षेत्रज्ञोद्भूतिरिष्यते ।

श्रुतेरेतेभ्य इति हि तथा स्पष्टं वचः श्रुतम् ॥४१८॥

(The inner self) was born by becoming *prāṇas* 'organs' etc., in the same way as fire was produced (i.e. born) in (lit. by or from) small sparks; (and) also the highest self (i.e. Ātman) was born in the same way as the sky came into being (manifold) through becoming a pitcher etc. [417]

The birth of the knower of the field is not accepted as other than the springing up (i.e. coming into existence) from the *prāṇas* 'organs' etc.; for there is (very) clearly heard a statement from the Śruti, viz. *etebhyaḥ* [418]

Verse 417 clarifies the thought in *sarva eta ātmano vyuccaranti* read in the Mādhyandina recension of BU after *sarvāṇi bhūtāni* in the Kāṇva recension as explained by Śaṅkara also. The stress

is on the *viśiṣṭa-cidābhāsa-rūpa-janma-vyavahāra*. NKL adds: The illustration of *kha-janman* (as *ghaṭākāśa*, *karakākāśa* etc.) is for precluding the idea of the *ātmajanman* owing to the acceptance of *aṁśāṁśi* relationship.

The argument in verse 418 is based on (or, related to) a doubt that the Ātman is born of itself and not from anything else), like a pitcher. It is related to the Śruti (this is explained later:) *etebhyo bhūtebhyah samutthāya* (BU 2.4.12). Also, basically, the notion of the birth of the inner self is rooted in ignorance/superimposition on *cit* of the limiting adjuncts.

यस्मादविद्ययैवात्मा प्राणक्षेत्रज्ञरूपभाक् ।
स्वतोऽतः स परं ब्रह्म तस्योपनिषदुच्यते ॥४१९॥
उपासनार्थं यद्गुह्यं नामोपनिषदुच्यते ।
तदस्य परं गुह्यं तेनोपासीत तत्त्वतः ॥४२०॥

Since, it is owing to ignorance (Avidyā) alone that the (highest) Ātman, of itself, comes to have the forms of the *prāṇas* 'organs' and the knower of the field; therefore, it is the highest Brahman. Now is stated the secret doctrine, viz. *upaniṣad*, of that; [419]
whatever is the secret name for purposes of a worship is called *upaniṣad*.¹ This² is the highest secret of this one;³ with that (in mind) should one worship that truly. [420]

These verses preclude the idea of a triad, viz. *prāṇas*, *jīva* (i.e. *kṣetrājña*) and the highest Ātman. The triad could be posited on the basis of verses 417-418 above.

¹I have taken 420ab as parenthetical.

²The word this refers to the Śruti statement: *satyasya satyam*, understood from *tasyopaniṣad* and *upāsanārthaṁ guhyaṁ nāma*.

³The highest Ātman is meant.

ब्रह्मविद्याधिकारेऽस्मिन्यावत्किञ्चिदुपासनम् ।
ब्रह्मविद्योत्थितिफलं तत्सर्वमिति निर्दिशेत् ॥४२१॥

Whatever be the mode of worship in the topic of the lore of the Brahman, viz. the rise of the knowledge of (the true nature of) the Brahman,¹ is, one should affirm, in this (context) also. [421]

¹The word *brahmavidyā* is understood in a double sense: (i) the lore of *brahman* and (ii) the knowledge of the true nature of the Brahman; *vidyā* in (i) has thus a reference to some mode of studying or worshipping and in (ii) the result of it. Here, in the later case, it is *vastutattvapratipatti*.

गोदोहनादिवद्विद्यादेवं सर्वमुपासनम् ।
विद्याधिकारजीवित्वात्र स्वतन्त्रफलं भवेत् ॥४२२॥

Thus all modes of worship are to be considered, like the ritual with Godohana¹ etc.² (as yielding the result of the various modes of worship in the later Brāhmaṇas); since they have dependence on the topic of *vidyā* (i.e. *Brahmavidyā*), it does not have a result of its own. [422]

¹This is an example which Sureśvara takes over from the Pūrva-Mīmāṃsā. The use of the Godohana pot forms a part of the *apām praṇayana* rite, which, in its own turn, forms an ancillary to the Darśapūrṇamāsa rite. Therefore, since the performance of the Darśapūrṇamāsa rite secures for the sacrificer the result, viz. *svargaprāpti* 'attainment of abode in heaven,' the use of the Godohana pot also (depending on *apām praṇayana*) has the same result for the performer. Yet it has its own result also—that is in addition, viz. it brings about the securing of cattle. Sureśvara extends this ritualistic procedure to the mode of worship of the Brahman, mentioned in verse 420. For further details on Godohana, read SP. Read NKL's brief statement: *jñānārthatvena sṛṣṭaprapaṇicopajīvitvāt prapaṇicadvāreṇa jñānam prasādhyaiḥ (upasanā-)phalāntarahetutvāt upāsanam śuddhidvārā (brahma-) dhīsāadhanam ity arthaḥ*. See also BUBV 3.3.51 and note thereon.

²The word etc. refers to similar relation of *strīṇātikriyā* with *vedikarāṇa*.

सत्यस्य सत्यमिति या ब्रह्मोपनिषदुच्यते ।
प्राणा वै सत्यमित्यस्या व्याख्योपनिषदः कृता ॥४२३॥

What is called the Brahmopaniṣad, viz. *satyasya satyam*, itself presents (or, forms) the explanation of this Upaniṣad, viz. *prāṇā vai satyam*. [423]

This is the meaning of *prāṇā vai satyam*.

नामरूपात्मकाः प्राणाः परसत्याभिसंगतेः ।
सत्यमित्यभिधीयन्ते तेषां सत्यं परं पदम् ॥४२४॥

The *prāṇas*, which are of the nature of name and form, are, on account of their close association (*abhi-saṅgati*), with the highest Truth (i.e. Reality) called *satya* 'Truth'; their basis is the highest Truth. [424]

This points to the meaningfulness of the preceding verse.

उक्तोपनिषदर्थस्य सम्यगाविष्कृतुत्तरम् ।
यो ह वै शिशुमित्यादि भविता ब्राह्मणद्वयम् ॥४२५॥

Of this *upaniṣad* 'secret doctrine,' the two subsequent Brāhmaṇas (viz. BU 2.2-3) which begin with *yo ha vai śīśum* ..., will give a clear exposition. [425]

This points to the significance of the two subsequent Brāhmaṇas as bringing to fullness the contents of this one.

Verses 426-432 form an introductory to a question whether the secret doctrine (*satyasya satyam*) relates to the transmigratory being or the Brahman.

कामं ह्युपनिषद्व्याख्या भवत ब्राह्मणद्वयम् ।
संसारिब्रह्मणोः कस्य नामैतदिति भण्यताम् ॥४२६॥

Granted that the two (subsequent) Brāhmaṇas are an exposition of the *upaniṣad* (mentioned above); let this be declared (or lit. said), however, as to whom, between a transmigratory being and the Brahman, it relates. [426]

पाणिपेषप्रबुद्धस्य नाम संसारिणो यदि ।
तदा स एव विज्ञेयस्तज्ज्ञानादेव मुक्तता ॥४२७॥

If it relates to the transmigratory being who is awakened (from sleep) by shaking (him) by the hand, then it is he who should be known (in fullness), for liberation can realise (i.e. be effected) through the knowledge about him. [427]

SP rightly points out a well-known dictum in the field of enquiry, viz. *saṁdigdham saphalam ca vicāryam*. Also, it justifies *tajjñānād eva muktatā* as an answer to the possible doubt: *yajjñānān muktis tasyaiva jñeyatā na jīvasyety āśaṅkyāha*.

ब्रह्मशब्दाभिधेयश्च संसार्येव तदा भवेत् ।
तद्विद्या ब्रह्मविद्येति प्रतिपद्यामहे तदा ॥४२८॥

Then (i.e. in that case), the transmigratory being himself would be what is to be expressed (or, signified) by the word *brahman*. And, as a result of that, we propose that the knowledge about him will be the knowledge of the Brahman. [428]

In this verse also, the doubter has continued his argument.

अथासंसारिणो नाम न्यायतोऽध्यवसीयते ।
संसारिणि यदुक्तं तत्तदा तत्र भविष्यति ॥४२९॥

If, on the other hand (*atha*), it is concluded (lit. determined), on the basis of proper reasoning (*nyāya*),¹ that it (viz. the

upaniṣad) relates to the non-transmigratory (Brahman), then what is said in relation to a transmigratory being could apply (or, be extended) to that (viz. the non-transmigratory Brahman).

[429]

The doubter still persists and points out the result of his own view.

¹Read SP: *yathoktanāmārthasya tasminn eva mukhyatārtham bādhāyogyatvādinyāyaḥ*; or, in brief though, NKL: *sarvakalpanā-dhiṣṭhānatvaṃ nyāyaḥ*.

भिन्नात्मनोस्तयोर्दोषो ब्रह्मत्वप्रतिपादिकाः ।

कुप्येरञ्श्रुतयः सर्वा नान्यदन्यद्ववेद्यतः ॥४३०॥

If the two are held as having different natures, then the Śrutis which propound their oneness would be set aside (lit. would be angry); since one thing cannot be another. [430]

This argument proceeds from holding utter distinction between the transmigratory being and the Brahman.

ब्रह्मणोऽव्यतिरेके च तद्वच्चासति दुःखिनि ।

ब्रह्मविद्योपदेशस्य कैमर्थक्यं प्रसज्यते ॥४३१॥

And also (or similarly (*tadvac ca*)) in case there is (held) non-distinction between them, then there will not be any sorrowful being (i.e. anyone misery-stricken) and the contingent question would be: What is the purpose of the knowledge about (the real nature of) the Brahman? [431]

This is an argument in contrast with that in the preceding verse. The Brahman, by its nature, is free from all misery and therefore even a transmigratory being would be free from it. That would render any effort to acquire the knowledge about the Brahman useless!

इति संदेहे हेतुश्च विचारस्य प्रयोजकः ।
तस्माद्विचारः कर्तव्य उक्तसंदेहहानिकृत् ॥४३२॥

Such is the cause for the doubt and it compels a discussion (on the matter under doubt); therefore is to be undertaken an enquiry (or, to begin a discussion) that would remove (lit. destroy) the doubt. [432]

In verses 433-444ab, there is a statement of the prima facie view (pūrvapakṣa), viz. this upaniṣad is related to a transmigratory being.

नासंसारी परोऽन्योऽस्ति पाणिपेषप्रबोधितात् ।
प्राज्ञावस्थात्मकाद्यस्मादुत्पत्तिः श्रूयते श्रुतौ ॥४३३॥

It is not a non-transmigratory (thing related to the *upaniṣad*), that is other (i.e. different from the highest Brahman which is other) than that who is awakened (from sleep) by shaking him by the hand; the one who is of the nature of one in the state of Prājña¹ from whom there is the rise (or, origin of *prāṇas*) heard in the Śruti. [433]

Cf. Verse 330 above.

ब्रह्म तेऽहं ब्रवाणीति प्रतिज्ञाय ततो नृपः ।
सुप्तं पुरुषमभ्येत्य पाणिना बोधयन्स्वयम् ॥४३४॥

(But,) after making a promise 'Let me declare to you what is the Brahman', the king approached a man who was asleep and himself awakened him, shaking him by the hand. [434]

The thought underlying this verse is identifying the Brahman as a transmigratory being.

तमवस्थान्तरं नीत्वा स्वप्नदर्शनवर्त्मना ।
सुषुप्ताख्यं ततस्तस्मात्प्राणाद्युत्पत्तिमब्रवीत् ॥४३५॥

Having brought him to another state (viz. the waking state), he first offered the explanation of the experience(s) in the dream state¹ and later described him as one in the state called sleep and as having an origination of his *prāṇas*. [435]

¹This refers to *sa yatraitat svapnyayā carati* (BU 2.1.18); also cf. verses 281-285 above.

संसारी प्रक्रमाच्चेह नान्यः संभाव्यते ततः ।
अनूद्य च प्रियात्मानं स द्रष्टव्य इतीर्यते ॥४३६॥

It is clearly the transmigratory being (that is intended) from the introductory (part of Kāśya's talk/doing) here¹ and none other is possible to think of; and (later) having made a reference to that again as a dear one to himself,² he has said—it is argued—'that he should be seen'. [436]

¹This refers to the introductory *tau ha ...* in the beginning of this narrative (*iha*).

²This refers to Yājñavalkya's dialogue with Maitreyī in BU 2.4 where occurs the oft-repeated phrase *ātmanas tu kāmāya sarvam priyam bhavati* and the concluding remark *ātmā vā are draṣṭavyaḥ ...* (this referring to the dear *ātman* 'self' of his own, the enjoyer (that is a transmigratory being)! [Let it be remembered that this is said for argument's sake.]

वेदान्तेषु च सर्वेषु प्रत्यगात्मैव चोद्यते ।
वेद्यत्वेन न तद्विन्नं पश्येदित्यभिधीयते ॥४३७॥

And, in all the Vedānta texts, only the inner self is put forth (or, pointed out) as what is to be known; also it is said that one should not see any other knowable different from that (i.e. the inner self). [437]

Possibly, the argument: *janmādy asya yataḥ* has a reference

to *jīva/kṣetrajñā* from whom are born the *prāṇas*, as said earlier in verse 435 above. Therefore, that one should be known.

अवस्थान्तरसंबन्धादसंसारो भविष्यति ।
संसार्यपि स्वतोऽयं चेन्नेदृग्दृष्टेरसंभवात् ॥४३८॥

If one might argue (here against this, thus:) 'Owing to its having relation to the different states, even a transmigratory being will be non-transmigratory';¹ then (the reply will be: 'That is) not so, since such a sight/seeing is impossible to happen.'² [438]

SP reports this argument as one coming from the *Seśvaravādins'* school which believes in the work of an all-powerful God.

¹Here, there is a reference to the sleep state wherein the *Jīva* has no connection whatsoever with the world of objects.

²The argument is: A change in the state of a being does not bring about any essential change in that being. The argument is thus opposed to common experience.

नान्यजातिविशिष्टोऽर्थः स्वतो जात्यन्तरं ततः ।
कश्चिदेति जगत्यस्मिन्नन्यत्रेश्वरहेतुतः ॥४३९॥

In this world, not a thing, which is characterized by some one genus, can come to belong to another genus, unless where (or, when) it is on account of the Lord's wish (that it does so). [439]

This is the position of the *Seśvaravādins* mentioned in the note on the preceding verse.

स्वभावमपि जह्याच्चेदग्निः शीतो भवेद्ध्रुवम् ।
सर्वप्रमाणकोपश्च सर्वं स्यादधरोत्तरम् ॥४४०॥

If indeed fire would give up its own nature and, for certain, become cool, then it would mean that all the means of right

knowledge¹ have gone totally wrong² and everything would be topsy-turvy.³ [440]

Evidently, the Seśvaravādins persist to hold that the power of the Lord defies all laws of logic. Thereby, they seek to point out that the one related to Brahman is none other than a transmigratory being. Any idea of some Lord which one would be required to posit (as shown in verses 439 and 440 above) would be only to be scoffed at. The reference to the Sāṃkhyas and others in the following verse is for strengthening the argument.

¹This refers to various sets of rules regarding the behaviour of things that form logic.

²That is to say: these rules are not in conformity with what is happening. Literally, the rules would be angry, i.e. they would refuse to be logical.

³*adharottaram* literally means 'the low and the high' and it indicates the reversal in the order of things. The true would become false and the false, true. SP seems to hint at this thus: *yo bhāvo yaddharmako mito nāsau taddharman vyabhicarati (ity atiprasaṅgaḥ)*. One remembers here Śāṅkarava's remark *Abhijñānaśakuntaram: śrutam bhavadbhir adharottaram* pointing to the reversed of truth and falsehood on the part of Śakuntalā and Duṣyanta.

सांख्यादयस्तथेशस्य ह्यभावं बहुयुक्तिभिः ।

आपादयन्ति यत्नेन तेभ्योऽन्यः कोऽधिको धिया ॥४४१॥

The Sāṃkhyas and others¹ propound the character of a negative entity in that (kind of) Lord by means of various reasons² and with great care;³ who else than them is superior in intellect? [441]

¹This is a reference to other Tārīkas 'Logicians'.

²SP points to these: *tasya (īśasya) dehitve 'smadāditulyatvāt; tadabhāve muktavajjagatkartṛtvāyogāj jīvānām evādrṣṭadvārā tat-*

karṣṭvasambhava and, as a result, *tasya (īśasya) akiñcitkaratva*. And NKL thus: *īśvarecchāprayatnādeḥ nityatve sadotpattyāpattiḥ anityatve asmadādisāmya* and so on. A close study of these thinkers' writings would reveal more of their arguments for not accepting such a Lord.

³The word *yatna* is explained by SP as *yuktiṣu doṣa-rāhityopanyāsa* 'careful presentation of reasons which are free from faults'. Therefore, we have translated 'carefully'.

संसारिणोऽप्यसामर्थ्याज्जगज्जन्मादिकर्मसु ।
जगद्धेतुत्वमन्याय्यमिति चेन्न श्रुतेर्बलात् ॥४४२॥
अक्षाद्यगोचरो यद्वच्छास्त्रादध्यवसीयते ।
तद्वत्संसारिकारित्वं जगतो गम्यतां श्रुतेः ॥४४३॥

(One might argue:) 'Yet, since a transmigratory being does not have the (necessary) power for (accomplishing) such acts as the production of the world etc., it is contrary for reason to accept (that transmigratory being as) the cause of the world.' (The answer:) '(This argument is) not (correct), for there is the Śruti's strength (opposing it).' [442]

'As a thing, which does not occur as the object of the eye and/or other (organs), is determined (or, grasped to be such and such) through (or by or from) the Śāstras (i.e. scriptures);¹ so also, should the world be known from the Śruti as what creates a transmigratory being. [443]

The arguer of the preceding verse points to how scriptures can inform one about Dharma etc. Thus, the scriptures would oppose the non-acceptance of a transmigratory being as the cause of the world.

¹Reference is here to matter related to Dharma, Adharma, Adrṣṭa and so on.

एवं तावदयं पक्षो न्यायतः प्रतिपादितः ।

Thus, this view is, so far, presented (or, explained), on the

basis of reasoning.

[444ab]

This marks the end of the arguments of those who follow the authority of the Śruti but reject the idea of the Lord who governs the world.

In verses 444cd-445, the view of the Seśvaravādins is presented.

शास्त्रन्यायादितोऽन्योऽपि पक्षोऽथ प्रतिपाद्यते ॥४४४॥

Now is presented (or, explained), on (the basis of) scriptures and reasoning (i.e. logic), the view, which is other than this.¹

[444cd]

¹The word this refers to the just preceding section.

यः सर्वज्ञः सर्वविद्योऽशनायादिविवर्जितः ।

यः पृथिव्यामिति तथा नेति नेतीति चागमः ॥४४५॥

अस्थूलाद्यक्षरोक्तेश्च तथापूर्वादिवाक्यतः ।

असंसारी परोऽस्तीशो यस्य सर्वमिदं वशे ॥४४६॥

The sentences in the Śruti (describe him thus:) *yaḥ sarvajñah*,¹ *sarvavid yaḥ*,² *aśanāyādivivarjitah*,³ *yaḥ pṛthivyām*⁴ and also *neti neti*⁵ [445]

and also from the statements (about him as) *asthūla*,⁶ *akṣara*⁷ etc.; and again from sentences (about his being) such as *apūrva* etc.;⁸ (it can be concluded that) there is a Lord, non-transmigratory, the highest (or, beyond/above all), in whose control is (or, on whom rests) this world. [446]

¹Cf. *Muṇḍakopaniṣad* 1.1.9; 2.2.7.

²Is it *sarvavidyaḥ*?; cf. *Śvetāśvataropaniṣad* 6.2.22.

³Cp. BU 3.5.1.

⁴BU 3.7.3.

⁵Cf. BU 3.9.26; 4.2.4; 4.4.22; 4.5.15.

⁶Cf. BU 3.8.8.

⁷Cf. BU 3.8.9; Śaunakopaniṣad 1.

⁸Cf. BU 2.5.19; see verse 237 note 3.

स एव च जगत्कारी सत्यज्ञानादिलक्षणः ।
तस्मादित्यात्मनश्चेति सामानाधिकरण्यतः ॥४४७॥

And he alone is the creator of the world, having the nature of *satya*, *jñāna* etc.¹ Therefore, the words *tasmāt* and *ātmanah*² have to be understood as standing in the relation called *sāmānādhikaranyā*. [447]

¹Refer to *Taittirīyopaniṣad* 2.1.

²This also is from *Taittirīyopaniṣad* 2.1 where the words *tasmāt* and *ātmanah* are taken to be *sāmānādhikaranyā*, i.e. not only as occurring in the same grammatical case (*sāmānavibhaktika*) but also as related to the same *substratum*. Therefore, the argument is that the word *ātman* in the *Taittirīyopaniṣad* refers to the inner self also; as a result, it then follows that the inner self is related to the *upaniṣad* 'satyasya satyam' which is in question.

संसारिणो ननुत्पत्तिरेवमेवेति कीर्तिता ।
नैवं महेश्वरस्यैव तत्राकाशत्वसंश्रयात् ॥४४८॥

But (one argues:) 'In the sentence *evam eva* ...,¹ there is stated the origin of the world from a transmigratory being',² (the answer is:) 'No, not so; for, there is in *evam* ... reference to the great Lord since there is (mention made of) him as the sky (in the heart).'³ [448]

¹The reference is here to the phrase *evam evāsmād ātmanah* in the BU passage under discussion.

²The argument is: Thus this BU passage is contradictory to the *Taittirīyopaniṣad* passage.

³The BU sentence *ya eṣo 'ntar hṛdaya ākāśah*, it is argued, has the word *ākāśa* as referring to the highest self as *prakṛta*

‘the subject matter (of the discussion)’. Cf. BS 1.1.22: *ākāśas tallingāt*.

ब्रह्म तेऽहं ब्रवाणीति प्रकृत्य ब्रह्मबोधनम् ।
अब्रह्माप्रकृतं ब्रूयात्कथं राजातिपण्डितः ॥४४९॥

The topic in the passage has begun with (the words) ‘Let me declare to you (the nature of) the Brahman’; (that is to say with the intention of) declaring (the nature of) the Brahman. Therefore, how would the king, himself a great learned man, would declare what is not relevant (here), viz. what is not the Brahman? [449]

The argument is based on a doubt that the word *ākāśa* in the passage under reference does not signify the Brahman. Cf. BSB 1.1.22 (p.198): *tatra saṁśayaḥ— kiṁākāśaśabdena paraṁ brahmābhīdhīyata uta bhūtākāśamiti, kutaḥ saṁśayaḥ; ubhayatra prayogadarśanāt*. Therefore, since *ākāśa* does not it signify the Brahman, and signifies the elemental sky, the Śeṣvaravādin is adopting *prakṛtahāni* and *aprakṛtaprakriyā* on the part of the intelligent king (SP).

श्रुत्यन्तरविरोधश्च संसारी चेदिहोच्यते ।
सता सोम्येति सन्नाम्ना ब्रह्म तत्र विवक्षितम् ॥४५०॥

Again, there would result opposition to another Śruti (passage), if here (i.e. as in your opinion regarding the king’s reply, it is) a transmigratory being that is (talked about, or, relevant). (For), in the sentence *satā somya ...*,¹ it is the Brahman that is intended to be expressed by the name (i.e. word) *brahman*.²

[450]

¹This is CU 6.8.1.

²The same *sat* is used in CU 6.1.1 for the Brahman and the Brahman continues to be discussed in the succeeding sections of CU. As a result, *satā somya* has a meaning *brahmanā somya*

.... Therefore, in view of *sarvavedāntapratyanyāya*, the reference in the passage under discussion to a transmigratory being is unwarranted. Cf. NKL's remark *durbalaparakaraṇena balavacchruticālanam* which means, in deciding the meaning of doubtful Śruti passages, Śruti (even if another) is the stronger decider than *prakaraṇa* 'topic under discussion'.

आकाशो ह वै नामेति ब्रह्मैवानामरूपकम् ।
श्रुत्यन्तरे श्रुतं साक्षादाकाशाह्वानवत्परम् ॥४५१॥

In a passage *ākāśo ha vai nāma* in another Śruti¹ is heard only the Brahman which has not a name and a form; (and) that² is directly³ expressive of the highest Brahman. [451]

This is to point out that another Śruti also intends to use *ākāśa* as a synonym of the word *brahman*.

¹Cp. CU 8.14.1.

²The word or name *ākāśa*.

³The word *sākṣāt* is used expressly to rule out another sense of *ākāśa*.

तथा चाहरहः शास्त्रं पर आत्मनि चेति यत् ।
सुषुप्ते ब्रह्मणोऽन्यस्य नावकाशोऽस्ति दुःखिनः ॥४५२॥

So also, since the Śāstra 'scripture' *aharahaḥ ...*¹ is in respect of the highest Ātman; therefore, in the sleep state, there is no place/scope for anyone who is other than the Brahman and who is affected by misery. [452]

¹This is a reference to CU 8.3.2: *aharahaḥ brahma gacchantya etam brahmalokam na vindanti*. NKL adds to this *Praśnopaniṣad* 6.7: *sa yathā somya vayāṃsi vāsovrkṣaṃ sampratiṣṭhante evaṃ naitat sarvaṃ pare ātmani sampratiṣṭhate* to support the argument that, in reality, the inner self is, in the state of sleep, of the nature of the Brahman.

अतद्विकारतो जन्म प्रलयश्च तथात्मनः ।
भौतिकाकाशविषयो न कथं चन युज्यते ॥४५३॥

It is in no way reasonable to hold that the Ātman (here, the inner self) has its origin and merger as well in (*ākāśa*, viz.) what is not a modification of that (Brahman), and that the word (*ākāśa*) has for it the elemental sky the object of reference. [453]

SP clarifies the argument thus: *ya eṣa ityādau bhūtākāśasya prakṛtatve tasyaivāyam parāmarśaḥ syāt, na ca tasmāt prāṇādi-janmalayau tasya bhūtākāśavikāratvāprasiddheḥ, asmād ity asyātmaśabdasāmānādhikaranyāc ca tasmān nāyam ākāśaśabdo bhūtā- kāśaviṣaya ity arthaḥ.*

जगज्जन्मादिसामर्थ्यं सामग्र्यादि च दुःखिनः ।
संसारिणो न संभाव्यमस्मदादेर्यथा तथा ॥४५४॥

The capacity for (causing) the origin etc.¹ of the world, the means (for creating it etc.) and other things² cannot possibly be thought of (as belonging to) a miserable transmigratory being³ in the same way as (belonging) to us! [454]

¹The word etc. refers to the sustenance and the merger.

²These other things are the knowledge for creating etc. (or, the technical know-how for it).

³Here, the reference can be to *ākāśa*.

न शक्त्याधानकृच्छ्रास्त्रं तस्याभिव्यञ्जकत्वतः ।
मानान्तरविरोधेन न हि मानं प्रवर्तते ॥४५५॥

Śāstra does not place in any one the capacity/ability (for doing some particular thing),¹ since it is merely informative about the same. (Also) a means of knowing would not be (usefully) operative when there is opposition to it of another means

of knowing.²

[455]

The argument in the first half of the verse is to thrash away the view that a transmigratory being can be the creator etc. of the world since scripture has said it. And the second half points to the opposition among the means of knowing being the cause of the futility of one of them.

¹In other words, scriptural text would be only *jñāpaka* 'informative about something' and not its *kāraka* (or *utpādaka*) 'producing (the necessary) capacity or ability for some doing/activity'.

²Here, one would hold Śāstra as an informative means about the activity of originating the world etc. obtaining in a transmigratory being and there can be opposition to it by another means, viz. direct perception showing a human being's capacity for doing so.

Verses 456-460 state a view that there is no non-distinction between the inner self and the Brahman.

परस्परानपेक्षौ चेत्संसारीशौ स्वतः स्थितौ ।
ऐकात्म्यं न तयोर्युक्तं प्रकाशतमसोरिव ॥४५६॥

If, thus,¹ a transmigratory being and the Lord are not mutually dependent, and they have been in existence in their own right (*svataḥ sthitau*); then it is reasonable to hold that they are but one (or, that they have oneness/identity) in the same way as (identity could be posited) of light and darkness. [456]

¹This refers to the arguments in the preceding section.

अहं ब्रह्मेत्यतोऽयुक्तं ब्रह्म प्रत्यक्तयाञ्जसा ।
ग्रहीतुं दुःखिनोऽन्यत्वाद्दोषभावस्यादतोऽन्यथा ॥४५७॥

Therefore, it is unreasonable¹ to accept smoothly that the Brahman is the inner self, (while one is saying) 'I am Brahman';

for, that² misery-stricken being is different (from it).³ From this (or, by this notion) the thing which has (so many) faults/shortcomings (in itself) would consider itself (lit. be) otherwise.⁴ [457]

This verse expresses the outcome of the preceding argument.

¹Both SP and NKL have not pointed out that there is Saṁdhi of ... *tyato* and *ayuktam*.

²This refers to the inner self.

³This refers to the Brahman.

⁴Free from all faults.

सत्कर्मभिस्तु तं देवं जगतः कारणं परम् ।
आराध्य परमोत्कर्षं तत्प्रसादात्समश्नुते ॥४५८॥

As against that (*tu*), (a transmigratory being/inner self) would attain the highest well-being through the favour of that (Lord), after it has pleased by good deeds¹ that Lord, the highest and the cause/origin of the world. [458]

This is the way to attainment of liberation.

¹SP supports this by quoting possibly from Bhartṛprapañca(?): *uktaṁ hi— matkarmakṛṇ matparama ityādi*. Also it cites the view of the Pañcarātrins in:

*parabrahmatvam āyāti matkarmaparamaḥ pumān iti ca and
ye saṁśrayanti taṁ bhaktyā sūkṣmam adhyātmacintakāḥ /
te yānti vai padam viṣṇor jarāmarañavarjitam //*
(Jayākhyā Saṁhitā 1.24) [a Pañcarātra text]

ब्रह्मात्मैकत्वशंसीनि वाक्यान्यपि तथा सति ।
अर्थवादीभविष्यन्ति विरोधः स्यादितोऽन्यथा ॥४५९॥
तर्कशास्त्रैस्तथा लोकन्यायैरप्यविरुद्धता ।
तथा सतीति संप्राप्तावत्र प्रतिविधीयते ॥४६०॥

That being so, the sentences (of the Śruti),¹ which speak about (or express) the oneness (or, identity) of (the inner self with)

the Brahman,² the Ātman would be (fully) meaningful. If (taken) otherwise than this,³ there would be an opposition to them. [459]

(Only) that being so, there would be non-opposition to logical reasonings⁴ and popular acceptances.⁵ When this position⁶ is reached, (now) there follows an argument which sets it aside. [460]

Verse 460 up to 'is reached' concludes the views of the Seśvaravādins.

¹I think, here the round brackets (viz. of the Śruti) should be necessary.

²This indicates the sentences like *tat tvam asi*.

³Namely, if the common man's opinion/view (*lokavāda*) is held.

⁴This is a reference to the Sāmkhyas and others; cf. verses 441-443.

⁵The commonly held beliefs or faiths.

⁶This is reiteration of the view that it is the Lord who, at his will, creates the world etc.

Now there is (a brief) exposition of the Siddhānta view, in verses 461-465, viz. that the upaniṣad, i.e. satyasya satyam, is related to the Brahman which is non-distinct from the inner self.

नैतदेवं यतोऽस्यैव मन्त्रब्राह्मणमानतः ।
प्रवेशः श्रूयते साक्षात्परमेशस्य सर्वतः ॥४६१॥

This is not so, since it is learnt (lit. heard) from this very (authoritative) means of knowing, viz. the Mantra and Brāhmaṇa (texts),¹ that there is the entry of the all-controlling (Brahman) everywhere. [461]

¹This refers to the Saṃhitās and the Brāhmaṇas (which include the Upaniṣads).

पुरश्चक्रे द्विपदः पुरः पुरुष आविशत् ।

रूपं रूपं च सर्वाणि त्वं स्त्री त्वं च पुमानसि ॥४६२॥
 इति मन्त्रसमाम्नायस्तथा च ब्राह्मणान्यपि ।
 इह प्रविष्ट इत्युक्तिः पुरस्ताद्ब्राह्मणोदिता ॥४६३॥
 तत्सृष्ट्वेति तथा वाक्यं तैत्तिरीयश्रुतौ श्रुतम् ।
 सेयमित्यादिकं वाक्यं छान्दोग्योपनिषद्वापि ॥४६४॥

‘He made cities, i.e. bodies, the bipeds ... the highest (i.e. supreme) Puruṣa entered the bodies’,¹ ‘In every form he assumed a similar form’,² ‘You are all, you (are) a woman and you (are) a man.’³ — [462]

this is a collection of Mantras. So also are there the Brāhmaṇa (texts): (Thus) there is a statement ‘In this he entered’, as already recorded in (this) Brāhmaṇa;⁴ [463]

also there is heard in the Śruti of the Taittirīyas a sentence *tat sṛṣṭvā ...*;⁵ so also in CU a sentence which begins with the words *seyam*.⁶ [464]

¹Cf. BU 2.5.18; Śatapatha Brāhmaṇa 14.5.5.18.

²Cf. Rgveda 6.47.17.

³Cf. Atharvaveda 10.8.27.

⁴BU 1.4.7.

⁵Taittirīyopaniṣad 2.6.

⁶CU 6.3.2 and 3.

ब्रह्मात्मशब्दयोस्तद्वदेकाधिकरणश्रुतेः ।
 अहं ब्रह्मेत्यवसितुं युक्तमेव भवेदतः ॥४६५॥

In the same way, on the basis/strength of the Śruti regarding the two words *brahman* and *ātman* referring (only) to one substratum,¹ it will only be proper (i.e. reasonable), therefore, to conclude *aham brahma*,² i.e. the inner self is the Brahman.

[465]

¹Refer to BU 4.5.19.

²This has a reference to the opponent’s view expressed in verse 457 above. The falsity of that view follows from the Śruti,

viz. BU 4.5.19.

Verses 466-467 refer to a view that the oneness (or, identity) of the inner self and the Brahman is faulty.

यदा चैवं स्थितः पक्षस्तदा दोषोऽयमागमत् ।
संसारित्वं परस्येति तदनन्यत्वकारणात् ॥४६६॥

(An objector says:) 'If this is thus established (*sthitah*) as (your) view, then there follows (lit. comes) this difficulty in (lit. blame to) it, viz. the highest (Brahman) would come to have transmigratory character on account of its being non-distinct from that (viz. the inner self).' [466]

अथासंसारितैतस्य कथंचिदुपपद्यते ।
तदोपदेशानर्थक्यं तमृतेऽप्यस्य मुक्ततः ॥४६७॥

'(Also,) if the non-transmigratory character of this one (viz. the highest Brahman) is somehow (shown to be) reasonable, then, in that case, there would be meaninglessness (*ānarthakya*) of the instruction (about it); since, without that also, there is the state of liberation for this one.'¹ [467]

¹*muktataḥ* is for *muktatvataḥ*.

Verses 468-472 present Bhartṛprapañca's answer to the objection above.

एवं प्रचोदिते केचित्परिहारं प्रचक्षते ।
सृष्टेषु न परः साक्षात्प्राविशत्परमेश्वरः ॥४६८॥

When this has been put forth (as an objection), some (scholars)¹ state (the following as) an answer (to clear that away): 'In the (objects) created, the Lord himself, viz. the highest (Ātman) itself (*sākṣāt*), did not enter.' [468]

This is a respectful reference to Bhartṛprapañca.

विकाररूपापन्नः सन्विज्ञानात्मत्वलक्षणः ।
ब्रह्मादिस्थावरान्तेषु भूतेषु प्राविशत्परः ॥४६९॥

‘Coming to have the forms of modifications and being characterized by the nature of *vijñāna* ‘specified knower/knowledge’, the highest (Ātman) entered into the beings/becomings, from the Brahman¹ up to those which are immovable.’ [469]

This explains the second line of the preceding verse.

¹Does this stand for Viriñca?

विज्ञानात्मापि महतः परमात्मस्वभावकात् ।
अन्योऽनन्यश्च विज्ञेयः स्वाभाव्यात्सर्ववस्तुनः ॥४७०॥

‘The one having the nature of an individual self also is different from the great one, viz. the one having the nature of the highest Ātman and further it should be known as non-distinct also on account of the nature of all things (in the world).’

[470]

This is Bhartṛprapañca’s affirmation of his Bhedābheda, viz. the theory of difference in non-difference.

येनान्यस्तेन संसारी कर्माधिकृत इष्यते ।
अनन्यपक्षेऽहं ब्रह्मेत्युक्तेर्ब्रह्म प्रपत्स्यते ॥४७१॥

‘Since it is different (from the highest Ātman), therefore it is accepted/desired that a transmigratory being is enjoined to (ritual) activity and, in the case (*pakṣa*) that it is not different (from it), it comes to be (i.e. attains the status of) the Brahman from the (Śruti) statement, ‘I am Brahman’.’ [471]

This, according to NKL, is the advantage of the Bhedābheda

theory; this will be evident from the following verse.

यथोक्तदोषसंबन्धो नैवं सति भविष्यति ।
इतोऽन्यथा कल्पनायां यतो दोषेण संगतिः ॥४७२॥

'This being so, there will not be any connection with the blame that is pointed out earlier;¹ for, in case a theory other than this is accepted, there is connection with that fault.' [472]

SP summarises the argument thus: *atyantam bhinnatve 'bhinnatve vā kalpyamāne nopadeśārthavattā nāpi brahmaṇo 'saṃsāritā tadbhinnābhinnatā pārīṣeṣyād ity arthaḥ*.

¹Cf. verses 466-467 above.

Verses 473-505 discuss the faults in the view of *Bhartrprapañca* who understands (only) a part of theory correctly (*ekadeśin*).

देहाद्युपाधिसंबन्धं सिद्धं मान्तरसंश्रयात् ।
अनूद्य ब्रह्मता वाक्यान् प्रविष्टाद्यतः श्रुतेः ॥४७३॥

(The refutation of the above is thus:) After the connection (of the individual self) with the limiting adjuncts, viz. a body etc.,¹ which is already known among people by resorting to the other ways of knowing,² there follows (for the *ekadeśin*) its nature as the Brahman from (only) the (Śruti's) statement,³ and not from a Śruti statement regarding (the modifications beginning with) 'he entered.'⁴ [473]

¹SP refers to *upādhidvaya viśiṣṭa jīva*.

²This refers to direct perception (*pratyakṣa*) in particular.

³This refers to the famous *Mahāvākya tat tvam asi* in CU. Both SP and NKL refer to the subsequent result which can be traced to *Taittirīyopaniṣad* 2.7; CU 8.3.4.

⁴These are probably the sentences quoted in verses 462-464 above. The correctness of the translation of *na praviṣṭād yataḥ śrutiḥ* can be subject to question!

विज्ञानात्मन एताः स्युर्गतयो विक्रियां प्रति ।
 नानाद्रव्यसमाहारः पृथिवीवत्परो भवेत् ॥४७४॥
 तस्य सावयवस्य स्यादेकदेशस्य विक्रिया ।
 विज्ञानात्मेति यं प्राहुः परिणामः स आत्मनः ॥४७५॥
 घटादिवत्क्षतेरस्य ह्येकदेशस्य विक्रिया ।
 संस्थानानुपमर्देन यद्वा केशोषरादिवत् ॥४७६॥
 कात्स्न्येन वा परिणमेत्क्षीरद्रव्यादिवत्परः ।
 इयन्त एव पक्षाः स्युर्विकारे परमात्मनः ॥४७७॥

Now, as regards the modification of the individual self, these would be the ways (or, alternative ways): (i) The highest self would be, like the earth, an aggregate of many substances¹

[474]

and the modification of a part (*ekadeśa*) of that which comprise many parts they call the individual self; (thus) that is an effect (or, a modification) of the Ātman,

[475]

like a pitcher etc. (is a modification) of the earth; or (ii) The form of the Ātman remaining unmodified, it (viz. the individual self) would be a modification, like, for instance, hair (on a body) or a piece of barren land (of the earth);

[476]

or (iii) The highest self would fully undergo a modification (and become the individual self) like the substance (called) milk wholly (becoming curds); only these² could be the possibilities of the modifications of the highest self.

[477]

¹Both SP and NKL refer to this aggregate as similar to a heap of sesame (i.e. a homogeneous aggregate) or one made up of dissimilar things (no example is provided!). Yet, in actual argument this fastidious division is unwarranted! (cf. BUB).

²SP's remark: *sambhavati kalpāntare kalpatrayaṃ kurvato bhāṣyakṛto nyunatvam āśaṅkyāha ityanta iti*, is for precluding any other possibility.

भिन्नद्रव्यसमूहस्य मुख्यैकत्वं न युज्यते ।
 एकजात्यभिसंबन्धादेकत्वं गुणतो यतः ॥४७८॥
 तथा च सति सिद्धान्तहानिर्वः संप्रसज्यते ।

In the case that the Ātman is held to be an aggregate of different substances, then it would not be logical to say that there is a certain principal singleness (among many), for singleness consists only in one property in the relation to many of a single. [478]

For, if that be so, there would arise the contingent defeat (lit. loss) of your (i.e. Bhartṛprapañca's) theory. [479ab]

Verse 478 sets aside the first alternative as incorrect. The idea is: One can posit *gotva* as the principal single property in respect of the Brahmatva among the many modifications together, according to the first alternative. Sureśvara's composition is here very terse. BSB in this respect is more lucid. Read: *tatra samānajātīyānekadravyasamūhasya kaścīd dravyaviśeṣo vijñānātmavm pratipadyate yadā tadā samānajātīyatvād ekatvam upacaritam eva na tu paramārthataḥ tathā ca sati siddhāntavirodhaḥ*. And verse 479ab points to the consequence of the above.

नित्यं चायुतसिद्धांशानुगतोऽवयवी यदि ॥४७९॥
 तदवस्थस्य तस्यैकदेशः संसारितामगात् ।
 प्रत्यंशावसितेस्तस्य तदापि परमात्मनः ॥४८०॥
 स्वभागानुगतो दोषो गुणो वास्य प्रसज्यते ।
 संसारिता परस्यैवं दोषः स्याद्दुर्निवारणः ॥४८१॥

If (in the second alternative) the (Ātman is a whole) ever having parts which are inseparably connected with it [479cd] and while (it remains) in that state, a part of it becomes transmigratory (viz. an individual self); then, owing to the highest Ātman (ever) consisting in each of its parts, [480] there would then come contingently to it either a blemish or an excellence that is connected with its part and thus the blemish of being transmigratory in the case of the highest

(Ātman) would be difficult to avoid/avert.

[481]

Obviously, these verses refute the second alternative.

निःशेषपरिणामेऽपि पयोवत्परमात्मनः ।

श्रुतिस्मृत्युक्तिकोपः स्यात्स चानिष्टः प्रसज्यते ॥४८२॥

Also, if (there be accepted) the modification of the highest Ātman as a whole, in the same way as (that) in the case of milk,¹ there would be opposition of Śruti(s) and Smṛti(s);² and that is an undesired contingency. [482]

This is the refutation of the third alternative.

¹*payovat* is either *yathā payasi* or *yathā payasaḥ* according to Pāṇini Sūtra 5.1.116: *tatra tasyeva*.

²These are quoted in the following two verses.

न जायते म्रियते वा इति षड्भावविक्रिया- ।

निषेधकृद्वेदवाक्यं प्रत्यग्विकृतिवारणम् ॥४८३॥

In the verse *na jāyate mriyate vā ...*¹ there is a clear (Śruti) statement which rejects the six modifications of beings/becomings—that is warding away (of the alternative regarding) modification of the inner self. [483]

¹Cf. *Kenopaniṣad* 2.1.8. SP reports this Mantra with a variant *kadācit* in place of *vipaścīt*— NKL reports correctly (with a misprint 1.2.18!). Also, SP cites *avyakto 'yam acintyo 'yam ...* from *Gītā* 2.25.

दिव्यो ह्यमर्तः पुरुषः सबाह्याभ्यन्तरो ह्यजः ।

निष्कलं निष्क्रियं शान्तं विमलं व्योमवत्स्थितम् ॥४८४॥

‘Heavenly, formless is the Puruṣa, being without and within (of things), unborn ...,’¹ ‘without parts, without activity, tranquil,’² ‘free from blemish has it remained like the sky’.³

[484]

This verse cites the Śruti texts to point to their opposition to all the three alternatives discussed before. SP's erudite remarks may be read with profit. NKL cites *Gītā* 2.20 and 25 and a verse:

*avikārāya śuddhāya nityāya paramātmāne /
sadaikarūparūpāya viṣṇave prabhaviṣṇave //*

(This is not traced in *Viṣṇusahasranāma*, however, cf. *Mahābhārata* xiii.713^{*}.1.)

¹*Mundakopaniṣad* 2.1.2.

²*Śvetāśvataropaniṣad* 6.19.

³Not traced.

इत्यादिशतशो वाक्यैः श्रुतिस्मृत्युदितैरमी ।

सर्वे पक्षा विरुध्यन्ते त्याज्यास्तैऽतः प्रयत्नतः ॥४८५॥

By these and other¹ hundreds of sentences, expressed in the Śrutis and Smṛtis, all these alternatives (or, views) are opposed and, therefore, they are to be discarded with insistence (lit. effort). [485]

¹SP refers to *ākāśavat sarvagataś ca nityaḥ*; cf. *śaṅkara's* reference to *kaThopaniṣad* (not traced in that tradition, though *śaṅkara's Bhāṣya* on CU 6.3.3 so mentions it); BU 4.4.24: *sa vā eṣa mahān aja ātmā*; *Gītā* 12.3: *kūṭastham acalam dhruvam*; *Gītā* 2.25: *avikāryo 'yam ucyate* as sentences from Śrutis and Smṛtis.

संसारानुपपत्तिश्च कूटस्थात्मैकदेशतः ।

स्वकर्मफलदेशेषु क्षेत्रज्ञस्य प्रसज्यते ॥४८६॥

On account of being a part of the immutable Ātman, there would contingently follow, in the case of the knower of the field, unreasonableness in respect of its transmigratory existence, in the regions that are earned by its own (ritual) activity.

The individual self would attain to heaven etc. by means of its ritual activities; but this would not happen in case (i.e. when) it is a part of the immutable. NKL rightly remarks: *aṁśino niścalatve aṁśānām calanāyogāt*.

वियुक्तस्यात्मनश्चेत्स्याद्विस्फुलिङ्गादिवद्गतिः ।
तथापि क्षतसंप्राप्तिरव्रणस्य प्रसज्यते ॥४८७॥

If it is said that, in the case of the individual self which has (or, is) separated from the Ātman, there can be movement (i.e. transmigration), like that in small sparks (of fire, from which they have separated), then also, there would be the contingency that the one (viz. the highest Ātman), which is not having (even) a scar, has come to have a wound. [487]

Sureśvara's cryptic verse needs some explanation. It presupposes the individual self to be a part (*aṁśa*) of the highest Ātman (*aṁśin*) like the small sparks are of fire. Therefore, as the sparks can get separated from fire and move in various ways, every individual self also gets separated from the highest Ātman and then transmigrates. Consequently, Sureśvara adduces the argument: the highest Ātman first comes to have a scar by the separation of an individual self and then a wound inasmuch as a part of it, viz. that individual self, is wounded, i.e. it transmigrates. This is undesirable an incident, for the highest Ātman is declared by the Śruti (*Īśopaniṣad* 8) as free from any scar.

वारिणो मत्स्यसंचारे छिद्रसंग्रथने यथा ।
भ्रमत्सु तद्वज्जीवेषु प्राप्नुतः परमात्मनः ॥४८८॥
तथा चाव्रणवाक्येन विरोधोऽपि प्रसज्यते ।
स्वकारणातिरेकेण वृत्तिः कार्यस्य नान्यतः ॥४८९॥

As in the case of water, one thinks (only foolishly) that there

is a hole when the fish have moved in it and a consequent repair in it (viz. water); so also, in the case of the highest Ātman, there (appear to) occur the two (viz. the scar and the wound) when the individual selves are transmigrating. [488] And, in this way, there will also¹ be the contingency of opposition to the Śruti statement (about the highest Ātman's being) without any scar. (Indeed, one should note that) an effect does not have existence/modification beside its own cause, i.e. elsewhere than in it.² [489]

Verse 488 states one more reason for proving the blemish (or, foolishness) in the ideas of Bhartṛprapañca.

¹The word *api* has the force to remind one of the opposition of the Śrutis and Smṛtis cited above in verses 483 and 484.

²This is a general rule regarding the relation between the cause and its effect. Any special modification cannot come to the effect, in case it does not come to the cause. In the present context, since the individual selves are the effects of the highest Ātman, there cannot come to them transmigration unless it comes to the highest Ātman. But such is never the case, for the highest Ātman is immutable.

परमात्मैकवृत्तित्वात्कुतो जीवस्य संसृतिः ।
स्वप्नसंचारवत्तस्माज्जीवसंसार इष्यते ॥४९०॥

(Further) whence can there be transmigratory existence in the case of the individual self, since it exists/abides only in the highest Ātman? As such, the transmigration of an individual self is accepted (or, can be conceded) only to be like one's movement in a dream.¹ [490]

This verse clarifies the general statement in the second line of verse 489 above.

¹That is to say: It is an effect of ignorance (*bhrānti*).

स्थास्नुष्वपि महद्दुःखं कण्टकादिषु देहिनाम् ।

परात्मनो महद्दुःखं जीवसंचरणेऽप्यतः ॥४९१॥

Even though (the individual persons) continue to remain (alive),¹ there is yet, on the part of men, great pain when there are thorns etc.² (pricking them); therefore, in the case of the higher Ātman also, there is great pain when there is transmigration of the inner self.³ [491]

¹*sthāsnūṣu* expects *jīveṣu* to be supplied, though, at the very sight of it (*āpātataḥ*), it appears to qualify *kaṇṭakādiṣu*. However, by pun, one may take it as a qualifier of the same! Yet, there is not any charm or purpose in doing so.

²*kaṇṭakādiṣu* can be taken for the cause of piercing the body and thereby causing pain to an individual. The word etc. refers to other painful things in life.

³*jīvasaṁcarane* is a variant reading noted in AnSS edition, it is preferable to what appears in both AnSS and NKL editions. It is meaningless to argue: 'When the individual selves do not migrate, the highest Ātman also is in pain.' Again, *jīvasaṁcarane* would not well balance with *kaṇṭakādiṣu*.

अदोषो विस्फुलिङ्गादिदृष्टान्तादिति चेन्मतम् ।

नैवं यथास्थितार्थानां शास्त्रस्य ज्ञापकत्वतः ॥४९२॥

If it be held, on (the basis of) the illustrations of small sparks (of fire) etc. that there is no fault (in accepting the highest Ātman and also the individual selves as transmigratory); that cannot be so, the Śāstra (i.e. scripture) is (merely) informative of objects as they are. [492]

The verse aims at rejecting the opponent's view of *aṁśā-ṁśibhāva* between the individual selves and the highest Ātman and also, as a consequence, their transmigratory natures—on the basis of the Śāstra. The reason adduced is that the Śāstra does not go beyond describing the things as they are.

अज्ञातज्ञापकं शास्त्रमेवंस्वाभाव्यतो मितेः ।
पदार्थान्नान्यथा कर्तुं प्रवृत्तं माननिश्चितान् ॥४९३॥

The Śāstra is informative (or, makes one know) about what is not known, for it is known that knowledge (gained from it) has such nature;¹ it has not (ever) proceeded to render things otherwise than what they are determined to be by various means of knowng.² [493]

¹Namely, it is *ajñātajñāpaka*.

²Cp. verse 455 above.

मूर्तामूर्तादयो यद्वत्पदार्था माननिश्चिताः ।
यथादृष्टानुरोधयेव दृष्टान्तैर्वस्तु बोध्यते ॥४९४॥

As the perceptible and imperceptible things are determined by the (various) means of knowng to be such and such; therefore, the (nature of a) thing is made known by an illustration, only in a way conformative of how it is known (lit. seen). [494]

This is to state that Śāstra, or rather the illustrations in it, merely confirm the nature of a thing which it already has.

एवं प्रवृत्तं सर्वत्र शास्त्रं दृष्टान्तपूर्वकम् ।
न प्रमान्तरसंसिद्धविपरीतात्मबोधनम् ॥४९५॥

Thus has proceeded everywhere (any) Śāstra, adducing illustrations; it is never to inform (one) of the nature of a thing which is the opposite of (or, contrary to) that established by other knowledge.¹ [495]

¹Namely, other means of knowledge.

अतिशीतोऽग्निरित्यत्र दृष्टान्तानां शतैरपि ।
प्रमान्तरविरुद्धत्वान्नेन्द्रेणाप्यधिगम्यते ॥४९६॥

(For example, in some information like) 'Fire is very cold,' that would not be accepted (i.e. so understood) by Indra also, even if hundreds of illustrations (go to say so), on account of that being opposed to other knowledge(s).¹ [496]

¹Namely, those acquired through other means of knowing.

मानान्तरविरुद्धं च न च मानं सदिष्यते ।
मानान्तरेणासंव्याप्ते मेये स्यान्मानता यतः ॥४९७॥

Also a means of knowing is not accepted as useful if it is opposed to the other means of knowing, since it has the nature as a means of knowing (only) if the matter to be known by it is not covered (i.e. made known) by any other means of knowing. [497]

तथा पदतदर्थैश्च लिङ्गप्रत्यक्षगोचरान् ।
नानादृत्यगमेनार्थमज्ञातं वेत्ति कश्चन ॥४९८॥

In the same way, one does not (come to) know an unknown object by means of Āgama (i.e. Śruti), having disregarded the words and the objects signified by them and also those that are known from their characteristics and direct perception. [498]

The point which this verse emphasises is: In actual worldly dealings, the Śāstra is not opposed to the accepted means of knowing.

लोकप्रसिद्धन्यायार्थैरंशशित्वादिकल्पना ।
परात्मनः कल्पयितुं नातो युक्ता कथं चन ॥४९९॥

Therefore, it is in no way reasonable to entertain a notion about the highest Ātman that its relation to the individual selves is that of a whole and (its) parts, on the basis (or, strength) of popularly known illustrations (lit. ways of knowing).

[499]

The point is: Since the Śāstra is not opposed to the popularly accepted ways of knowing, it should not be necessarily in conformity with them, in matters that are not worldly. In fact, that alone is the authoritative means.

विस्फुलिङ्गाद्युपन्यासः क्षेत्रज्ञपरमात्मनोः ।
ऐकात्म्यप्रतिपत्त्यर्थस्तस्मादत्र विवक्षितः ॥५००॥

Therefore, here, (in the context of the relation) between the knower of the field and the highest Ātman, it is intended to introduce (the illustration of) small sparks (of fire) as the conveyer of the oneness (or, identity) of them. [500]

उपक्रमोपसंहाराद्यथोक्तोऽर्थो विवक्षितः ।
ब्रह्मादि सर्वमात्मेति प्रतिज्ञाय श्रुतिर्यथा ॥५०१॥
दुन्दुभ्याद्यैश्च दृष्टान्तैर्हेतुभिश्च समर्थ्यते ।
अपूर्वाद्यादिभिर्वाक्यैः प्रतिज्ञार्थोपसंहृतिः ॥५०२॥

(Therefore), from the introduction and the conclusion, the thing that was sought to be expressed is first enunciated as the Śruti text 'All this which begins with the Brahman is the Ātman', [501]

it is then justified by the illustrations of a trumpet etc. and by various reasons;¹ and thereafter is the recapitulation of the matter enunciated by such sentences as begin with the words *apūrvā* etc.² [502]

¹These refer to explanations of various superimpositions caused by ignorance (Avidyā).

²Refer to BU 2.5.19; see verse 237 note 3.

सर्ववेदान्तवाक्येषु ब्रह्मैकत्वं विधीयते ।
इत्यविप्रतिपत्तिर्हि व्याख्यातृणामशेषतः ॥५०३॥

'In all the sentences of the Vedānta, there is declared (lit. stated) the singleness of the Brahman'—there is thus no disagreement (viz. agreement) of all the exponents of them, without exception (*aśeṣataḥ*). [503]

तद्विद्येकोक्तियोगस्य ह्यक्लेशात्संभवे सति ।
सृष्ट्यादिवचसां नैव युक्तार्थान्तरकल्पना ॥५०४॥

(Therefore,) when it is possible to connect with ease the sentences about creation etc. with the sentences which converge on stating the earlier unknown oneness of that (viz. the highest Ātman), it is not reasonable to entertain any other meaning (of those sentences). [504]

SP shows the connection between this and its preceding verse by pointing to an accepted mode of reasoning (*nyāya*) among the discussants. The *nyāya* is: *sambhavaty ekavākyatve vākyabhedo hi neṣyate*.

न च प्रमाणं तत्रास्ति कल्प्यं च स्यात्फलान्तरम् ।
ऐकात्म्यपरतैवातः सृष्ट्यादिवचसां भवेत् ॥५०५॥

There should not be imagined any authoritative means of knowing in respect of that;¹ nor also should one entertain the thought of any other result;² as such, it is only oneness or identity (of the individual selves and the highest Brahman) that is (finally) conveyed by sentences regarding creation etc. [505]

¹ Namely, in respect of the Śruti statements about the creation of the world.

² That is, the reality of the world full of variety of objects. Read in this context SP: *na ca tat kalpayitum śakyam phalavatsaṃnidhāv aphalaṃ tadanigam iti nyāyavirodhāt*; cf. *śaṅkara on &iiizopaniSad 9 and cp. &zaastradiipikaa 4.4.1*.

Now there is in verses 506-523 a discussion on a certain narrative told by Dravidācārya.

आचक्षते तथा चात्र केचिदाख्यायिकां शुभाम् ।
यथाभिलषितार्थोऽयं यया संभाव्यते स्फुटः ॥५०६॥

In connection with this matter, they¹ narrate an auspicious² tale by which³ is clearly honoured (i.e. exposed as possible) the matter (or, view) that is desired (or, accepted by the knowers of the Vedānta). [506]

¹This is a reference to Dravidācārya as reported by Ānandagiri (and, of course, by NKL). Śaṅkara describes him in BUB as *saṃpradāyavid* 'knower of the tradition' in Vedānta. very little is known about him.

²Read SP in this connection: *phalaparyantatayā dr̥ṣṭānta-dār̥ṣṭāntikarūpāyās tasyāḥ śubhatvam* (this consists in the second line of the verse).

³'by which' is for *yayā* —I suggest this emendation in the place of the second *yathā*. The two *yathās* in the verse are meaningless! Further, read the last sentence in SP: *sa yayā niḥsaṃdigdho 'bādhito sambhavati*.

यथा हि कश्चित्प्रागासीच्चक्रवर्तिसुतो युवा ।
व्याधियोगोपघातादेरुन्मत्तः सम्पद्यत ॥५०७॥

It is like this (*yathā hi*):¹ There was in olden days a certain young (prince), the son of a sovereign monarch. Struck as he was by an attack of some disease, he became disordered in mind. [507]

Sureśvara has made quite a few changes in the narrative reported by Śaṅkara. Here, in this verse, SP points to the prince's separation from his parents and also the subjects of the kingdom. Sureśvara omits this detail here.

¹Ordinarily, one finds *tathā hi* for this.

ध्वस्तराजाभिमानः सन्मुग्धो वनमुपेयिवान् ।
व्याधैः परिगृहीतश्च व्याधोऽस्मीत्यभिमन्यते ॥५०८॥

Losing his awareness that he was a king¹ (this is for a king's son), he went to forest. (There) he was received (lit. surrounded) by fowlers and (consequently) he began to feel 'I am a fowler'. [508]

¹This refers to the disorderliness in his mind.

तत्कर्मा तदहंकारः कालेन महताभवत् ।
ध्वस्तराजत्वसंस्कारो वसञ्शबरसद्मनि ॥५०९॥

And, in the course of long time, he, who had lost all (his previous) impressions of royalty and was staying in the dwelling of a forester, did their doings and entertained an awareness of that (viz. belonging to the fowlers' clan). [509]

शुभौषध्युपयोगाच्च स्वस्थधीः समजायत ।
स्वस्वभावानुरोधाच्च व्याधेभ्यो व्युत्थितात्मधीः ॥५१०॥
तच्छीलरूपकर्मभ्यो व्यावृत्तधिषणः स्वतः ।
केवलस्मृत्यभावाच्च न व्याधत्वं जहात्यसौ ॥५११॥

And (as time went on) he became orderly (or well) in his mind by the use of good medicines. Further, owing to his natural instincts, he became aware of himself (as different) from the fowlers. [510]

By himself, he had his mind turned away from their mode of behaviour, of attire and of activity; but (ca), only because there was no memory (of the past), he did not give up his belonging to the fowlers' clan. [511]

कुतश्चिदागमाज्ज्ञात्वा तमुपेत्याप्रतारकः ।
तज्जातिकर्मसंबन्धतत्त्ववित्तिपतः सखा ॥५१२॥
प्रवृत्त्या कर्मणा जात्या चक्रवर्त्युचितैस्तथा ।

लक्षणै राजपुत्रत्वं यथा कश्चित्प्रबोधयेत् ॥५१३॥

(Then later, some) friend of his father (to become),¹ having known (about him) from (somebody's) telling,² (becoming) conversant (lit. a knower) about the truth of his birth, doings (i.e. duties) and other relations,³ (himself) an honest person (lit. non-deceiver), approaching him (i.e. the prince), [512] (acquainted him) with his being a prince on account of (or rather, by the revealing things/factors,) such as his natural inclinations, doings (or, actions),⁴ (the truth of his) birth, and also the characteristic marks (on his person) befitting a sovereign monarch, as someone (who is a knower of some fact) would inform (another person about the same).⁵ [513]

¹This is to say: (*tatpituh sakhā*) *bhaviṣyan*; this last word is to be supplied predicatively.

²This is *āgama* 'talk by one person to another'—not usual sense of traditional knowledge of scriptures.

³This refers to the real situation about the young prince. However, it is possible to understand this also as 'the truth about his belonging to the fowlers' clan, duties and his real relations to them (i.e. the fowlers).

⁴*karman* in verse 512 meant 'duties, as determined by the stay among the fowlers' and in verse 513, doings or actions (for, they were not as yet his royal duties, owing to his utter ignorance about his royal connections).

⁵A simple statement of the simple behaviour of a person who knows some truth about the real state of things is here used, not as a simile; only the resemblance between such a person and the one, who was going to be a friend of the prince's father is meant.

लब्धमात्रस्मृतिः सोऽथ राजास्मीत्यवबोधतः ।

बाधित्वा स्वमसंबोधं हित्वा व्याधत्वमात्मनः ॥५१४॥

राज्याभिषेकमाप्नोति प्राप्य सिंहासनं पितुः ।

अवाप्तराजसूनुत्वात्तत्प्राप्तौ नापि चेष्टते ॥५१५॥

Immediately as he (i.e. the prince) got back his memory, he gave up his own ignorance (that obtained up to now) about himself by the awareness (awakened in him thus) 'I am a king' and also the relation to the fowlers (as one of them),

[514]

he secured (i.e. could secure) coronation of himself, obtaining the father's throne—(this is to say that he could do so) because he was (i.e. got back the memory and also the status of) the king's son; he did not act (or have to make efforts) to get it (viz. the coronation).

[515]

मोहाद्यस्तात्मव्याधत्वान्मोहध्वंसातिरेकतः ।
राजपुत्रत्वसंप्राप्तौ नान्यत्किञ्चिदपेक्षते ॥५१६॥

Since the nature of a fowler was superimposed upon him owing to his ignorance and (later) by the complete (*atireka*) removal (lit. destruction) of that ignorance, there was no need of (his doing) anything else for securing the status of a prince. [516]

In this verse, Dravidācārya (in the words of Sureśvara) mentioned *mohakārya*, *mohadhvaṃsa* and the consequent achievement in the case of the prince. This serves as a suitable illustration for proving the philosophical point of view under reference. This is clear in the following verse.

यथा तथायं ब्रह्मैव ब्रह्मासंबोधमात्रतः ।
बुद्धीन्द्रियशरीरादावात्मत्वं प्रतिपेदिवान् ॥५१७॥

As (the prince obtained his natural status), so does this one (viz. the individual self) obtain (i.e. came to know)¹ the nature of the Ātman, viz. the Brahman, in the place of intellect, organs and the body etc. (which existed for it earlier) owing merely to not knowing (i.e. ignorance about the true nature of) the Brahman.

[517]

¹*pratipedivān* is for *pratipadyate*.

सोऽयं सांसारिकैरर्थैः प्रत्यक्तत्त्वाप्रबोधतः ।
विशिनष्टि स्वमात्मानं प्रतीचीनमनात्मभिः ॥५१८॥

This one (viz. the individual self) characterizes itself, that has turned back (from reality), by means of the properties or objects belonging to the transmigratory world, the non-Ātmans, on account of (its) not knowing the true nature (of the sentience/self) within. [518]

This verse explains how a person gains the knowledge of the Ātman/Brahman.

संसारभूमावासीनं संसार्यस्मीत्यवस्थितम् ।
मुमुक्षुं तत्त्ववित्साक्षात्संसारव्युत्थितैषणम् ॥५१९॥
य आत्मेत्यादिभिर्वाक्यैरन्वयव्यतिरेकतः ।
तत्त्वमस्यादिवाक्येन गुरुः संबोधयेन्नरम् ॥५२०॥

Him (i.e. the man), who has belonged to (lit. occupied) the level of transmigratory world, who has considered himself thus, viz. 'I belong to this world', who is (now or afterwards) seeking to be liberated (from transmigration), who has all his desires for the transmigratory world removed directly by a knower of truth, [519]

(such a man) should the preceptor (first) awaken by (using) sentences such as *ya ātmā*,¹ i.e. by the method of Anvaya and Vyatireka, (and then) by the sentence *tat tvam asi*² etc. [520]

These verses explain the preceptor's role in a person's effort to obtain liberation.

¹Cf. CU 8.8.1.

²Cf. CU 6.8.7ff.

सम्यग्ज्ञानाग्निसंप्लुष्टप्रत्यक्तत्त्वमहातमाः ।
हित्वा मोहोत्थमखिलं ब्रह्मैव ब्रह्म यात्यथ ॥५२१॥

प्रत्यक्तत्त्वतमोऽध्वंसव्यतिरेकेण मुक्तये ।
अपेक्षते यतो नान्यत्किञ्चित्साधनमण्वपि ॥५२२॥

This (individual), who has then his thick (lit. great) ignorance (lit. darkness) about the true nature of the inner self burnt (i.e. destroyed, or removed) by the fire of right knowledge, first gives up (or, abandons) what has arisen from ignorance and thus (knowing) only the Brahman, attains to (the status of) the Brahman immediately,¹ [521]
since, (for obtaining) liberation, he does not need (lit. depends on, or, waits for) any—even a (very) small—means whatever beside (lit. in addition to) the destruction of darkness (i.e. ignorance) about the true nature of the Brahman. [522]

¹Cf. SP states: *kāryāntaravāraṇam athaśabdārthaḥ*. See next verse.

जन्माद्यसंभवात्तस्माद्ब्रह्मबोधातिरेकतः ।
कार्यान्तरं न संभाव्यं व्यर्थं चापि भवेद्वचः ॥५२३॥

Then, on account of the impossibility of birth etc., consequent to it (*tasmāt*), there is not any possibility (or need) of (his doing) any other activity in addition to (his) knowledge of the Brahman (which he has already obtained); (otherwise) the utterance (of the Upaniṣad) would become futile.¹ [523]

¹Cf. *brahma veda brahmaiva bhavati* (Munḍakopaniṣad 3.2.9). NKL, however, points to *Gītā* 3.20: *karmanaiva hi saṃsiddhim āsthitā janakādayaḥ*.

Verses 524-530 state that the passage regarding creation etc. does not intend to point out the relation of a part and a whole between the individual selves and the Brahman.

अंशांशित्वादि चेत्साक्षाद्ब्रह्मज्ञाने विवक्षितम् ।
समुद्रादेरिव तदा नावक्ष्यच्छ्रुतिरादरात् ॥५२४॥

यदनभ्युदितं वाचा मनते मनसा न यत् ।
अपूर्वादि तथा वाक्यमपि सैन्धवखिल्यवत् ॥५२५॥

If it was intended to speak about the relation such as that of a part and a whole, as in the case of the ocean etc.;¹ then, in that case, the Śruti would not have respectfully stated:

[524]

'That which is not expressed by speech',¹ 'that which it does not think with *manas*';² in the same way, the sentence which begins with (the word) *apūrva*,³ and also (the simile) 'like a lump of salt'.⁴

[525]

¹*Kenopaniṣad* 1.5.

²*Ibid.* 1.6.

³BU 2.5.19; see verse 237 note 3.

⁴BU 4.5.13.

नानात्वदृष्टिनिन्दां च मृत्योरिति तथा वचः ।
अंशांशित्वविवक्षायां न प्रायोक्ष्यत्तदेदृशम् ॥५२६॥

So also, it would not have employed such statements as purport to censure the seeing of multiplicity (of objects),¹ or the sentence 'from death ...'² and others,³ having the intention to express the notion of a part and a whole.

[526]

¹BU 4.4.19; *Kenopaniṣad* 4.10 and 11.

²*Ibid.*

³BU 4.4.20; *Kenopaniṣad* 4. 11.

एकैकरूपैकात्म्यार्थधियो दाढर्यप्रसिद्धये ।
सृष्ट्यादिश्रुतयस्तस्मान्न तु तत्प्रत्ययाय ताः ॥५२७॥

The Śruti sentences regarding creation etc. are stated with a view to securing/establishing the strength (of arguments) about the knowledge of the single Ātman as one homogeneous unity; and (*tu*) not for (causing) belief in the same.

[527]

न चात्मनो निरंशस्य तथासंसारिणः स्वतः ।
 अंशिसंसारिभावत्वं न्यायेनाप्युपपद्यते ॥५२८॥
 कल्पितोपाधिहेतुश्चेदंशिसंसारिकल्पना ।
 काममस्तु न तादृक्षु धीराणां सत्यधीर्भवेत् ॥५२९॥

Not also does it stand to reason that the (highest) Ātman, which, by nature, is without any parts and also, in itself, non-transmigratory, can become possessed of parts and be transmigratory, on the basis of any illustrations. [528]

And this notion of being possessed of parts and transmigratory (in the case of the highest Ātman) has a cause in the imaginary limiting adjuncts (of it). Let that be there; the wise ones do not have a belief in these kinds of notions as true. [529]

These two verses point out that the relation of parts and a whole and having transmigratory existence also are purely imaginary, opposed to reason and the Śruti.

विवक्षितं चेदैकात्म्यं सर्वोपनिषदां भवेत् ।
 विज्ञानात्मादिसंभेदस्तद्विरुद्धः किमुच्यते ॥५३०॥

If all the Upaniṣad texts intended to declare the singleness of the Ātman, why then talk about the conglomeration of the individual selves etc.¹ which is opposed to it? [530]

¹The word etc. refers to the body, the organs and the several objects of them.

Verses 531-537 discuss if the discrete knowers of the field etc. are real in order that the Karmakāṇḍa portion of the Veda is to be considered as authoritative.

कर्मकाण्डप्रमाणत्वविरोधवस्तये किल ।
 विज्ञानात्मादिसंभेद इति केचित्प्रचक्षते ॥५३१॥

Some scholars¹ state that the conglomeration of the individual selves etc. is associated with the highest self and is accepted indeed for averting (lit. destroying) the opposition to the author-itativeness of the Karmakāṇḍa. [531]

This is an answer, as it were, to what is stated in the preceding verse as a question.

¹This refers to the dualists.

ऐकात्म्यमात्रे जगति समाप्तपुरुषार्थके ।
चोदनाप्रतिषेधौ वः स्यातां निर्विषयौ तदा ॥५३२॥

(This is a dualist's observation:) If this world were merely of the nature of just a single Ātman and also would have had achieved all the ends of man's life, then, in that case, the injunction(s) and prohibition(s) (in the portions of the Veda) would become for you without any purpose/scope. [532]

This is how the multiplicity of individual selves and the rituals involving worldly objects is justified. This is a direct address to the opponent(s).

स्वत एव विमुक्तत्वाद्धन्धाभावात्स्वतस्तथा ।
वेदान्तानां तथारम्भो निष्फलः संप्रसज्यते ॥५३३॥

Also, because the Ātman is by itself in the state of a liberated being and because there does not exist any bondage for it, in its own right, the activity or the beginning of all the Vedānta texts would become futile! [533]

This argument of the dualist goes to point to the futility of the Vedānta teaching as well.

इत्येवमादिचोद्यानि परिहाराश्च वर्णिताः ।
संबन्ध एव बहुशो विचारेषु च कीर्तिताः ॥५३४॥

This and such other objections and the answers to (lit. refutations of them) have been presented (lit. described) in the *Sambandha(vārtika)* itself and also mentioned (time and again) in different discussions. [534]

SP clarifies the meanings of the different words, viz. *iti*, *evam* and *ādi* but that was really not necessary. The relevant comment is: *prakārāntareṇa parihartum codyotthāpanam ity arthaḥ*. This is to indicate that repetition is avoided by adopting a different mode of refutation.

परस्परविरोधाच्च प्रकाशतमसोरिव ।
कर्मकाण्डोपनिषदोर्निष्प्रामाण्यं द्वयोरपि ॥५३५॥

And there is (in fact) unauthoritativeness of both the Karmakāṇḍa and the Upaniṣads (i.e. Jñānakāṇḍa) owing to their mutual opposition as (that of) light and darkness. [535]

In the first instance, Sureśvara here rejects the authoritativeness of both the Kāṇḍas, for each opposes the other.

सति यस्य प्रमाणत्वे प्रामाण्यं स्याद्द्वयोरपि ।
तस्यैव कर्मकाण्डस्य प्रामाण्यमवसीयताम् ॥५३६॥

Or, let it be decided that there is authoritativeness in the Karmakāṇḍa itself, which being authoritative, there will (automatically) follow the authoritativeness of both Kāṇḍas. [536]

The argument is: For the Karmakāṇḍa, there is need of the relationship of individuals as teachers and the taught. Such a relationship will be necessary in respect of Jñānakāṇḍa also and then it will also be authoritative likewise. Sureśvara takes up here another alternative. This verse takes for granted the authoritativeness of the Karmakāṇḍa and that would compulsorily invite the authoritativeness of Jñānakāṇḍa as well. Therefore,

the idea of only one being authoritative cannot be accepted.

SP, while introducing the following verse, states very succinctly the argument involved thus: *tarhi* (this is in view of verse 536) *karmakāṇḍavaj jñānakāṇḍasyāpi svārthe mānatvaṃ vācyaṃ na ca tadartho dvaitaṃ kāṇḍabhedābhāvaprasaṅgād upakramopasaṃhārādivirodhāc cāto jñānakāṇḍamānatvabalāt kāṇḍāntaraviśaya-dvaitabādhakam advaitaṃ eva punar āgatam iti.*

The purport of this verse is put by NKL very clearly thus: *jñānakāṇḍaprāmāṇyaṃ tvayaivānirākṛtam syāt.*

कर्मकाण्डप्रमाणत्वे प्रामाण्यं चेद्द्वयोरपि ।
सर्वग्रासि तदैकात्म्यमागादिह पुनर्बलात् ॥५३७॥

If there is thus, in accepting the authoritativeness of the Karmakāṇḍa, the (compulsory acceptance of) the authoritativeness of both, then there has followed here (i.e. in our discussion), with (full) force, the all-devouring singleness of the Ātman. [537]

Verses 538 and 539 state, in this context, a prima facie view: the Upaniṣads are then unauthoritative.

यद्येवमप्रमाणत्वमस्तुपनिषदां तदा ।
मानान्तरविरोधाच्च नैतासां मानतेष्यते ॥५३८॥

If this is so,¹ then let there be unauthoritativeness of the Upaniṣad texts; (for,) owing to the opposition of the other means of knowing² as well (*ca*), their authoritativeness is not accepted. [538]

This verse states what BUB states in *evaṃ tarhi* It can be taken to be the opinion of him who accepts that there are many individuals in reality.

¹SP clarifies this thus: *na caivam adhyayanavidhivirodho japārtham tadadhyayanasiddher iti matvā tāsām (=upaniṣadām) amānatvam.*

²These are direct perception (*pratyakṣa*) and inference (*anumāna*) (*upamāna* is included in the latter). Also the Karmakāṇḍa is (implied by *ca*).

अपि स्वार्थविधातं च करोत्युपनिषद्यतः ।

अप्रामाण्यमतस्तस्याः कर्मकाण्डस्य मानता ॥५३९॥

Also, because the Upaniṣad¹ disproves its own meaning as well; therefore, its unauthoritativeness follows and (further there follows only) authoritativeness of the Karmakāṇḍa (also). [539]

The purport of the argument is: The Upaniṣadic acceptance of such distinction as the teacher and the taught is against their own teaching of oneness (*advaita*).

Verses 540-587 establish the Siddhānta: the Upaniṣads are authoritative.

नोक्तोत्तरत्वात्साध्वेतद्भवता परिचोद्यते ।

व्यर्थतान्यार्थते नेह यथा तत्प्राक्प्रपञ्चितम् ॥५४०॥

(The Siddhāntin answers:) It is not that you have raised this objection well, since already it has been answered. Here (in respect of the Upaniṣads) there is neither futility nor subservience (to any system). How this is, is earlier discussed at length. [540]

ब्रह्मास्मीति धियो जन्मसमकाला विमुक्तता ।

यतोऽनुभूयते साक्षान्नानर्थक्यं भवेत्ततः ॥५४१॥

Since the state of liberation is directly experienced as occurring at the same time with the rise of the knowledge (*dhi*)¹ 'I am Brahman'; therefore, there is no meaninglessness (in the Upaniṣads). [541]

¹*dhiyo janmasamakālā* is an instance of Sureśvara's use of

sāpekṣā samāsa.

वस्तुमात्रावसायित्वं संबन्धे प्राक्प्रपञ्चितम् ।
यतोऽतो नोपनिषदामन्यार्थत्वं कथं चन ॥५४२॥

Since it is already discussed fully in the *Sambandha*(*vārtika*) that the final conclusion (of the Upaniṣads is that) there is (in reality) only the thing (viz. the Brahman), therefore, there is not at all any subservience of the Upaniṣads (to any system).

[542]

स्वप्रमेयप्रमोत्पत्त्यनुत्पत्त्येकहेतुके ।
प्रमाणत्वाप्रमाणत्वे नान्यथा ते प्रसिध्यतः ॥५४३॥

Giving rise to the correct knowledge of the object to be known by itself and not giving rise to the same are (really) the bases (of the means of knowing which have) the character of being authoritative and unauthoritative—if they are otherwise,¹ they are not accepted (lit. established as means).

[543]

¹That is, if they do not conform to what is already stated (in the earlier part of the verse).

किं चातो यदि नामैवं प्रकृतार्थोपयोगि यत् ।
शृण्वेकाग्रमनाः सर्वं यदेवं सति वस्तु तत् ॥५४४॥

(A question is asked:) 'If this is thus,¹ what (comes) from this, viz. which is useful in the matter in hand (or, for our purpose)?' (The answer is:) 'Listen, being attentive in mind, to all that which is the thing while this is so.

[544]

¹This refers to the purposeful means of knowing as explained in the preceding verse.

स्वप्रमेये प्रमां साक्षात्करोत्युपनिषद्यदि ।
अप्रामाण्यं कथं तस्याः कुतोऽतो मानतान्यथा ॥५४५॥

If, in respect of what is its object to be known, the Upaniṣad directly produces that (right) knowledge, then how could there be unauthoritativeness of it? where else than this could there be authoritativeness (as a means)? [545]

न चेत्करोत्युपनिषत्प्रमामित्यभिधीयते ।
प्रत्यक्षेण विरुद्धार्थं त्वदीयं वचनं भवेत् ॥५४६॥

If you were to say that the Upaniṣad does not produce right knowledge, then your (such) statement will have a meaning that is opposed to what is directly noticed. [546]

This verse presupposes the objector's view that the Upaniṣad does not produce knowledge.

नाग्निर्दहति काष्ठानि न तापयति भास्करः ।
इति यद्वत्तथोक्तस्ते प्रत्यक्षेण विरुद्ध्यते ॥५४७॥

Your statement is opposed by direct perception in the same way as (are the statements) 'Fire does not burn wood.' and 'The sun does not cause heat.' [547]

अग्निदाहादिवत्साक्षाद्वेदान्तज्ञानजं फलम् ।
संसारानर्थहानारूपं प्रत्यक्षमनुभूयते ॥५४८॥

The result of the knowledge produced by the Vedānta (i.e. Upaniṣad) is directly perceived like burning by fire; (the result) called as the losing of all the undesirable matters of transmigratory existence. [548]

विघ्नन्ति स्वार्थमित्युक्तं यच्च तच्चापि पेलवम् ।
यथा तदुच्यमानं त्वं यथावच्छ्रोतुमर्हसि ॥५४९॥

And what is said, viz. they (i.e. the Upaniṣads) destroy their own subject matter,¹ is also a weak (argument); how (that

is) is (now/hereafter) being told, you should hear that properly (yathāvat). [549]

¹This relates to the acceptance of the relations such as the teacher and the taught; the illustrations, narratives and so on.

स्वप्रमेयावबोधो हि मानानां स्वार्थ उच्यते ।
तं चेत्कुर्वन्ति वेदान्ताः कुतस्तेषाममानता ॥५५०॥

They call that indeed as the *svārtha* 'purpose' of the means of knowing, viz. what is making (one) know about what they present as the matter for knowing. (And) if the Vedāntas do that,¹ how can they be rejected as authoritative means? [550]

¹Namely, fulfil their purpose.

न च वेदान्तवाक्योत्थज्ञानस्येहास्ति बाधकम् ।
बाधकानामपि सतां प्रत्यग्याथात्म्यरूपतः ॥५५१॥

Not also is there here any stultifier of the knowledge arising from the Vedānta sentences; for, even in case there existed any stultifiers,¹ they would have been (in reality) the nature of the inner self. [551]

¹The stultifiers could only be the means of knowing such nature of the Vedānta sentences. But these also would have been nothing but the products of ignorance about the nature of the Ātman, i.e. they would have been falsely produced by the Ātman.

प्रमाणमप्रमाणं च प्रमाभासस्तथैव च ।
कुर्वन्त्येव प्रमां यत्र तदसंभावना कुतः ॥५५२॥

How could there be impossibility (of the existence) of those which cause right knowledge, viz. the authoritative means, the

non-authoritative means and also false knowledge?

[552]

This verse is identical with 1.4.874 and TUBV 2.619.

किमेकविषयत्वेन किंवा विषयभेदतः ।

विरोधः स्यात्प्रमाणानामित्येतदभिधीयताम् ॥५५३॥

Let this be told whether the opposition of the means of knowing (to the Upaniṣads) is on account of (just) the same object (as theirs) or their having different objects. [553]

मानान्तरेण संवादो यदि चेदनुवादिता ।

विरोधो न तु मानानां सदैकार्थसमागमे ॥५५४॥

If there is agreement of the Upaniṣads with the other means of knowing, call it their nature of being repetitive; and (*tu*) that would not be opposition to the other means of knowing, if they come together to convey one and the same object (to be known). [554]

This refers to the notion of mutual opposition between two means of knowing which have the same object to be known!

भिन्नप्रमेयतायां च श्रोत्रादीनां यथा तथा ।

परस्परानपेक्षत्वान्नितरामविरुद्धता ॥५५५॥

In the case that they have different objects to be known, they do not have any opposition (to the other means) in the same as the ears and others (which have different objects to be known) since they are mutually independent. [555]

This points to the acceptance of different means of knowing in relation to different objects to be known.

न चैकमेव सद्वाक्यं करोति न करोति च ।

प्रमां तत्प्रतिषेधं च कुर्वत्क्वचिदिहेष्यते ॥५५६॥

It is nowhere¹ accepted that just one sentence² causes and also does not cause (understanding of a meaning); and also causing right knowledge and its opposite as well. [556]

The argument relates to two opposite functions done by a single means of knowing, i.e. in respect of their operations and of the results as well.

¹This refers to 'no time' or 'no place'.

²Be it a Vedic or a popularly spoken sentence.

अग्निः शीतस्तथोष्णश्चेत्येवमाद्युक्तितो ननु ।
विरुद्धार्थावभासोऽयं जायमानः समीक्ष्यते ॥५५७॥

But (one might say:) 'From such expression as "fire is cool" and so also "it is hot", there is noticeable the conveying¹ of (two) opposite meanings!' [557]

This objection is based on popular experience of such meanings as are conveyed by sentences.

¹This is for *avabhāsa* not in the sense of *avamata* or *avasanna bhāsa*; it is for only *bhāsa*, i.e. *bodha*.

नैकस्मान्नापि च द्वाभ्यां विरुद्धार्थोऽवसीयते ।
अनूद्योक्त्येकदेशेन शीतोऽग्निरिति बोध्यते ॥५५८॥

Mutually contradicting meanings are not understood from (just) one sentence and also from two (different) sentences, for if there are two sentences, (then) by one part (of sentences which has parts of apparently two contradictory meanings) (of the composite utterance) there is repeated (what is conveyed by yet another sentence earlier) and there is conveyed (in another part) the sense 'fire is cool'. [558]

Note SP: *na cānuvādakabodhakabhāgayor virodho 'tulyabalatvād*

ity arthaḥ.

संभवत्येव शीतोऽग्निः प्रमाणान्तरगोचरः ।
मानान्तरविरोधोऽपि तथा च सति नेष्यते ॥५५९॥

Indeed, there does possibly exist cool fire,¹ (but) that is the object of another means of knowing;² and in case that is so, there is not understood thereby any opposition to (or, by) another means of knowing, at the same time.³ [559]

¹This refers to fire in the moon (this is poetically so!), fire in a cloud etc., cf. SP on verse 561 below.

²Here, there is reference to actually experienced hot fire.

³This is for *api*. SP states: *vidyamānārthatāvad ity aper arthaḥ*.

शीतवद्भा भवेच्छीतः शैत्यस्यानपहारतः ।
एवमप्यविरोधः स्यादस्य मानान्तरैरपि ॥५६०॥

Or 'cool fire' can be¹ 'like cool', owing to the non-removal of cool. (But), in thus saying also, there is (really) no opposition to this (sentence) by any other means of knowing. [560]

This verse keeps in view two parts of one sentence: 'fire is cool' and 'fire is hot' and also of the situation that both the meanings conveyed by the two parts are a matter of one direct experience; there is thus a difficulty. The answer relates to such a situation that fire is cool in winter (i.e. not as hot as at other time). Or, perhaps, it can be a simile 'some fire may be *like* cool fire'—in this case, a part of 'cool fire' is not opposed to one's direct experience. For, in similes, they accept *āhārya* 'imaginary' non-opposition.

¹Or, can be understood or purposely stated as.

शैशिरोऽग्निर्भवेच्छीतस्तथोष्णः पार्थिवो भवेत् ।
भिन्नार्थत्वावबोधित्वाद्वाक्ययोर्न विरुद्धता ॥५६१॥

Fire related to cool objects¹ is cool and (the usual) fire on earth is hot. Thus there cannot be opposition between the two sentences, since they convey two different meanings (i.e. states of, or for, a thing, here 'fire'). [561]

This is to clarify further verse 559 above.

¹These are, for example, the moon, the cloud (having lightning in it). Cf. NKL: *vidyuccandrādīdivyāgniḥ śaiśira ucyate*.

ऐकार्थ्ये न विरोधोऽस्ति द्वयर्थत्वेऽपि न माश्रयात् ।
मानान्तराच्च नैवास्ति मान्तराविषयत्वतः ॥५६२॥

If thus a sentence has only one meaning to convey or two meanings also, there is no opposition (to that being so), inasmuch as they resort to (right) knowledge; and, because there is another means of knowing, there is no (question of there being) any other object of right knowledge. [562]

अभ्युपेत्यैतदुदितं न तु वाक्यविदां नयः ।
यदनेकार्थबोधित्वमेकस्य वचसः सतः ॥५६३॥

This¹ is said (only) after granting (the objector's view),² but such is not the way³ of those who know (the science of) sentences),⁴ viz. that there is one sentence and that it has more senses than one. [563]

¹The word *etad* refers to the second part of the first line in the preceding verse.

²Namely, one sentence can have two meanings—this is an acceptance for argument's sake.

³That is, guiding principle.

⁴The Mīmāṃsakas are meant.

अर्थैकत्वादिति तथा वाक्यलक्षणमुच्यते ।
अनेकार्थावबोधित्वे न स्याल्लक्षणवद्वचः ॥५६४॥

That is to say:¹ The definition of a sentence given (by the Mīmāṃsakas) is that it has only one meaning.² In case a sentence conveys more meanings than one, the utterance (of it) does not conform to the definition (of a sentence).³ [564]

¹This is for *tathā*.

²Cf. *Pūrvamīmāṃsāsūtra* 2.1.46: *arthaikatvād ekaṃ vākyaṃ (sākāṅkṣaṃ ced vibhāge syāt)*.

³That is, it would not be one sentence, according to the definition.

एकमेव यदा वाक्यं कृत्स्नो वेदोऽभ्युपेयते ।
वाक्यान्तरासंभवतस्तदा केन विरुद्धता ॥५६५॥

When it is accepted that the entire Veda (is just one sentence), then, there being no possibility of the occurrence of any other sentence, to what (other sentence) the sentence under question would be contradictory? [565]

This verse presupposes the objector's question, 'if the entire Veda is accepted as one sentence—cf. the concept of Mahāvākya (not the Vedāntic; but that in Poetics)—or, it is made of many sentences' and answers the first alternative.

वाक्यद्वयं चेदथवा सिद्धसाध्यार्थभेदतः ।
तदापि न विरोधोऽत्र विभिन्नार्थावबोधिनाः ॥५६६॥

Or, it (i.e. the Veda) can be considered as two sentences owing to the difference (in respect of their meanings, viz.) what is already existent and what is yet to be effected.¹ Even in that case, there is no (mutual) contradiction, since they inform one about two different things (each different from the other).² [566]

¹The existent is *siddha*— it is the Brahman which has been existent even before the other thing, viz. Dharma, which is to

be effected or accomplished (*sādhya*).

²In both these cases, each sentence is *ajñātārthajñāpaka* 'informative of a thing which has not been known before'.

नापि स्वार्थं परार्थं वा विहन्त्युपनिषत्त्वचित् ।
कथं चेदुच्यमानं तच्छृण्वेकाग्रमना यथा ॥५६७॥

Also it is (a fact) that nowhere does an Upaniṣad contradict its own meaning¹ or the meaning of any other (means of knowing). (If you ask) 'How is it so?', listen to what is being told, with an attentive mind. [567]

¹This is either the subject matter or the result accruing from it.

सर्वमात्मेति चेत्कुर्यात्प्रमेयविषयां प्रमाम् ।
विहन्त्युपनिषत्स्वार्थमिति निर्लज्जगीरियम् ॥५६८॥

Since (lit. if) the Upaniṣad causes the right knowledge about the object to be known by it, viz. all is the Ātman, then it is only a shameless talk to say that the Upaniṣad contradicts its own meaning. [568]

निःशेषपुरुषार्थमिति सर्वानर्थात्ययः सदा ।
वेदान्तज्ञानतश्चेत्स्यात्स्वार्थोऽतोऽन्यः क इष्यते ॥५६९॥

If there would ever result from the knowledge conveyed by the Upaniṣad that the securing all the ends of life (or, *puruṣa*) in their entirety and also the awareness of all undesirables (in the transmigratory world); then what other thing than all this is expected to be its meaning? [569]

निषेधति विधत्ते वा न चाप्युपनिषत्क्रियाम् ।
प्रत्यक्तत्त्वैकसंबोधे तद्वाक्योपक्षयत्वतः ॥५७०॥

The Upaniṣad does not either prescribe or prohibit any activity,

since its sentences come to an end¹ only in giving the (rise to the knowledge of the nature of the inner self. [570]

¹Or literally, come to be exhausted.

न चापि कर्मकाण्डोक्तिः स्वार्थे न कुरुते प्रमाम् ।
स्वार्थे च सा प्रमां कुर्वत्यमानं कथमुच्यते ॥५७१॥

It is not also that the sentence in the Karmakāṇḍa does not produce right knowledge about the object of its knowing; how could it be said that it is not an authoritative means of knowing, produce as it does right knowledge about the object of its knowing? [571]

The argument is that the Karmakāṇḍa sentences are also meaningful so far as their own subject matter is concerned. That the Upaniṣadic sentences convey the knowledge of the Brahman should not be taken to mean that the Karmakāṇḍa sentences do not convey their meaning.

प्रात्यक्ष्याच्च प्रमोत्पत्तेर्ज्योतिष्टोमादिवाक्यतः ।
प्रमैवोत्पद्यते नेति वक्तुमेतन्न शक्यते ॥५७२॥

And it is a matter of direct knowledge that there arises from the sentences such as those about the Jyotiṣṭoma sacrifice right knowledge (about them). It is (therefore) not possible to say this, viz. there does not arise (from them any) right knowledge at all. [572]

विषयापहृतेर्नो चेद्वेदान्तोक्त्या प्रमोत्तिथिः ।
न प्रत्यक्षबलीयस्त्वादनुमानप्रबोधतः ॥५७३॥

(If it is said that), since the Vedānta sentences disprove the meaning (of the Karmakāṇḍa sentences), there is no rise of right knowledge (from them, i.e. these latter); it is not so (to be understood) because the direct perceptibility (of the

knowledge from them) is stronger than what is understood (by you) from inference. [573]

यथासिद्धान्युपादाय कामद्वेषवशानुगः ।
 इष्टमेव सदा मे स्यान्मा भूच्चानिष्टमण्वपि ॥५७४॥
 साधनानीष्टलाभार्थमनिष्टार्थापनुत्तये ।
 आचक्षाणा श्रुतिः पुंसो नान्यार्थं वक्ति कंचन ॥५७५॥

“Having taken up (the things that are) already made, (a person) who acts under the sway of desire and hatred (or, dislike), (who thinks to himself) ‘let there always be for me only (what) I have desired and let not there be even a little undesired (or, undesirable thing)’ [574]

(should acquire) the means for securing what is desired and for warding away (every) undesirable”—thus saying, the Śruti¹ does not state for a man any other thing. [575]

¹This is the Karmakāṇḍa portion of the Veda.

यथा काम्याग्निहोत्रादौ साध्यसाधनसंगतिम् ।
 विदधन्नानृतत्वादि कामानां वक्ति कुत्रचित् ॥५७६॥

As, while the Karmakāṇḍa prescribes the connection between what is to be accomplished and what accomplishes (the same) in regard to the *kāmya* ‘desired’ (rituals) and Agnihotra etc., it does not anywhere speak of the truth (i.e. being true) of the desires. [576]

The argument seems to be this. The Karmakāṇḍa merely mentions the *sādhya-sādhana-sambandha* in the case of both the compulsory Agnihotra ritual and the *kāmya* rituals; yet it does not mention them as true (in the same sense as the Brahman is true).

न चापि न प्रवर्तन्ते पुरुषाः काम्यकर्मसु ।
 यतोऽतत्त्वविदां कामो न कदाचिन्निवर्तते ॥५७७॥

It is not that men do not enter upon (the performance of) *kāmya* rituals also,¹ since, in the case of those who are not conversant with (or, aware of) the Truth, desire never satiates.

[577]

¹The word 'also' indicates the performance of compulsory Agnihotra etc.; men do perform these, but they enter on the *kāmya* rituals as well.

अकामतः क्रिया काचिद्दृश्यते नेह कस्यचित् ।
यद्यद्वि कुरुते किञ्चित्तत्तत्कामस्य चेष्टितम् ॥५७८॥

In this world (*iha*) there is nowhere noticed any activity which is (done) without any desire. For, whatever a man does, is all of it the effect (lit. doing) of desire.

[578]

This is identical with BUBV 1.4.1816. We have changed *kasyacit* which is already shown by AnSS edition as a variant reading. Also, cp. BUBV 4.4.223. Cf. *Manusmṛti* 2.4 where the first line ends in *neha karhicit*.

स यथाकाम इत्यादिरेषोऽर्थश्च सविस्तरः ।
वक्ष्यतेऽकामयमानश्च तथाकुर्वन्विमुच्यते ॥५७९॥

This matter will be stated in its (full) length in *sa yathākāmaḥ* ...;¹ and a person, who does not entertain (any) desire,² does not perform³ (any ritual activity) and gets liberated.

[579]

¹Cf. BU 4.4.5.

²Cf. BU 4.4.6: *athākāmayamānaḥ yō 'kāmo niṣkāma āptakāmo na tasya prāṇā utkrāmanti brahmaiva san brahmāpyeti*.

³SP and NKL point to the dissolution of the Saṃdhi *tathā akurvan*.

सर्वाधिकारप्रध्वंसात् कृत्स्नात्मावबोधिनः ।

प्रवृत्तौ वा निवृत्तौ वा गुणभावः सदेष्ट्यते ॥५८०॥

Since in the case of one, who has the knowledge that all is the Ātman, there are all (kinds of) eligibility¹ (for ritual performance) destroyed, there is ever accepted, in regard to inclination and disinclination, the eligibility to act.² [580]

¹*adhikāra* is explained by SP and NKL as *vidhipuruṣa-sambandhādih*.

²This is for *guṇabhāvaḥ* paraphrased in SP and NKL as *karṭṛtva*.

अतो निर्विषयत्वादि ब्रह्मैकत्वाद्यदीरितम् ।
तत्सर्वं परिहृतं ज्ञेयं यथोक्तेनैव वर्त्मना ॥५८१॥

Therefore, (all that was said about the Upaniṣad as) having no object (to state about ritual activity) etc. and (as merely declaring) the singleness etc. of the Brahman is to be known as refuted, in the very way stated. [581]

Read in this context the note of the editor of NKL: *ajñasyāviraktasya karmaṇi pravṛttiḥ. sādhyasādhana-sambandha-bodhakatvena karmakāṇḍaprāmāṇyam. ... na virodhaḥ upaniṣadām ityuktamārgenetyarthah*.

न निवर्तयितुं शक्तं रागाद्याकृष्टचेतसः ।
शास्त्रं विरक्तचित्तान्वा न प्रवर्तयितुं क्षमम् ॥५८२॥

The Śāstra (viz. Karmakāṇḍa) is not useful (lit. not able) to ward away those minds which are attracted by longing etc., nor is it capable of inducing those whose minds are averse (to worldly life). [582]

Read, in this context, the note of the editor of NKL: *ajñasyāviraktasya karmaṇi pravṛttiḥ/ sādhyasādhana-sambandha-bodhakatvena karmakāṇḍaprāmāṇyam/*

karmatatphalādīnāṃ satyatve udāgīnaṃ karmakāṇḍam/ tena na virodhaḥ upaniṣadām ityuktamārgenety arthaḥ/

इष्टानिष्टफलानीति साधनानि प्रकाशयेत् ।
न निवृत्तिं प्रवृत्तिं वा पुंसः शास्त्रं करोति तत् ॥५८३॥

(Therefore) the Śāstra¹ should reveal² the nature of those activities which yield either desired or undesired results. That the Śāstra does not promote man's activity or ward him from activity. [583]

¹This again refers to the Karmakāṇḍa.

²The words 'should reveal' is *really* for 'reveals', cf. verse 585 below.

अपि शास्त्रं समुल्लङ्घ्य रागादिबलवत्तया ।
प्रवर्तमानाः पुरुषा दृश्यन्तेऽद्यापि कामिनः ॥५८४॥

Also, even now are noticed men, having desires, to overlook (lit. go beyond the limits of) the Śāstra, owing to the strong longing etc. [584]

साध्यसाधनसंबन्धानिष्टानिष्टफलोदयान् ।
शास्त्रं त्वादित्यवत्साक्षात्प्रकाशयति तान्सदा ॥५८५॥

(Actually), the Śāstra ever reveals to them about the connections between various objects to be achieved and the means to achieve them and also about the rise of the desired and the undesired results, so directly as the sun (reveals different objects). [585]

तेषु शास्त्रैकदीपेषु साध्यसाधनवर्त्मसु ।
यथार्चि प्रवर्तन्ते पुरुषा न तु शास्त्रतः ॥५८६॥

But men turn to these paths of *sādhyā-sādhana*s which are for them the only lamp in the form of the Śāstra, only at

their liking and not in accord with the Śāstra.

[586]

विधिशास्त्रस्य नैवातो वेदान्ता बाधकाः सदा ।
न च निर्विषयं तत्स्यान्मेयभेदात्त्वगादिवत् ॥५८७॥

As such, the Vedānta (texts) are never the stultifiers of the Śāstra of injunctions. And that¹ should not be considered as having no objects (for them to talk about) only owing to the difference in respect of the objects to be known (from them), like the skin etc. (of a living being).² [587]

¹This should mean: the two Kāṇḍas together.

²The simile is not explained by both SP and NKL. It is somewhat unclear. I suggest: the skin etc. have various kinds of objects—even mutually opposed in nature—to touch etc. They remain the same and yet function in their particular ways. So do the two Kāṇḍas of the Veda.

Verses 588-591 state the view of the Tārkikas 'logicians' who are opposed to the Vedānta.

केचित्तु पण्डितमन्या विरोधीनि परस्परम् ।
संभावयन्ति मानानि सर्वाण्यैकात्म्यवस्तुनि ॥५८८॥

But there are some, who regard themselves as learned men, and look upon all the mutually opposed¹ means of knowing 'as opposed'¹ in respect of (the view that there is) (only) singleness of the Ātman. [588]

¹In this verse, the word *virodhīni* is to be read twice: First as *parasparam viruddhāni* with reference to the means acceptable to the Tārkikas, this is expressed (*vācya*); then as *viruddhāni aikātmavastuni* (locative singular indicating the *adhikaraṇa* 'object' of *viruddhāni*).

श्रोत्रादिभिर्यतो भिन्ना मिथः शब्दादयस्त्वमी ।

मीयन्ते सर्वमात्मेति प्रत्यक्षेण विरुध्यते ॥५८९॥

Since these mutually differing words etc. are known by the ears etc., in a similar way, (the proposition:) 'All is the Ātman.' is opposed by direct perception. [589]

The verse states the mutual opposition among the various means of knowing as an example for showing the opposition of direct perception to the statement regarding *brahmaikya*.

शब्दाद्यर्थोपलब्धारः कर्तारश्च पृथक्पृथक् ।
यस्मादिहानुमीयन्ते तस्माल्लिङ्गविरोधिता ॥५९०॥

Since the agents who know the objects such as a word are inferred here¹ to be different from one another; therefore, there is opposition (in respect of) inferences² (about singleness of the Brahman). [590]

¹The word *iha* refers to the body.

²*linga* means *anumāna*. This opposition of inference to the Vedāntic proposition is stated in BUB thus: *śrotrādibhiḥ śabdādyupalabdhāraḥ kartāraś ca dharmādharmayoḥ pratiśarīraṃ bhinnā anumūyante saṃsāriṇaḥ, tatra brahmaikatvam bruvatām anumānavirodhaḥ*. Also see SP: *svadehasamavetaceṣṭātulyaceṣṭā dehāntareṣu drṣṭā sā yatnavatpūrvā viśiṣṭaceṣṭātvāt sammatavad ity anumānaviruddham aikyaśāstram iti bhāvaḥ*.

तथागमविरोधं च ग्रामकामादिभेदतः ।
उद्भासयन्ति संहृष्टा ब्रह्मैकत्वप्रदूषकाः ॥५९१॥

In the same way, those, who find fault with (the theory of) the singleness of the Brahman, (and feel) very delighted (at heart),¹ highlight (the argument of) the opposition of the Śruti texts on account of their having differences as regards desire for a village etc. [591]

The Śrutis which are adduced by the Tārkikas in support of their opposition to the Vedānta theory are: *grāmakāmo yajeta*, *paśukāmo yajeta*, *svargakāmo yajeta* etc. These presuppose many individuals who are possessed of many desires and are later sacrificers. But the Vedānta theory would not allow such multiplicity of them, recognised by the Śruti texts. This should point to the opposition they mention.

¹The delight is caused by their being able to point out contradictory Śrutis and, in general, every other kind of contradiction.

Verses 592 onwards to the end, i.e. verse 611, present the Vedāntin's refutation of the argument of the Tārkikas.

ब्रह्मैकत्वविरोधो वः कथं भिन्नार्थबुद्धिभिः ।
इति ब्रह्मविदोपेत्य प्रष्टव्या भेदवादिनः ॥५९२॥

The knower of the Brahman(-theory) should approach the dualists and ask them, 'How is (this) your opposition to the singleness of the Brahman (held/explained by you) who hold duality (in the world)?' ¹ [592]

¹This, I think, can be clarified by BUB thus: *śarīrendriyamana-ātmasu pratyekaṃ anumānakauśalapratyākhyāne śarīrendriya-manahsādhana ātmāna vayam ...* (of course, Śaṅkara has used this for scoffing at them!).

किं भोः शब्दादिभेदेन खस्यैकत्वं विरुध्यते ।
न चेद्विरुध्यतेऽथोच्चैर्विरोधः किमितीर्यते ॥५९३॥

Please tell us, O men, if the oneness of the sky is contradicted by difference(s) in words (which are used to signify the same). If it is not (contradicted), then why is it loudly said that there is contradiction (to the Vedānta proposition)? [593]

The argument of the Vedāntin is thus explained by SP: *yathā*

sarvabhūtastham ekam ākāśam ity ukter na śabdādibhēdagrāhi-pratyakṣādivirodho 'bhinnaviṣayatvāt tathā sarvabhūtastham ekam brahma ity ukter api na tatpratyakṣeṇa virodhaḥ.

सत्परिच्छेदकैर्नापि प्रत्यक्षाद्यैर्ग्रहो भवेत् ।
व्यावृत्तेरन्यतोभावमात्रायाः केनचित्क्वचित् ॥५९४॥

The means of knowing, viz. direct perception and others, which have only the existent (objects) as their (objects of knowing), cannot, any one of them and/or anywhere, grasp *vyāvṛtti* 'exclusion' which consists merely in the absence of any other (object). [594]

This argument is based on the Tārkikas' opposition to non-duality of the Brahman. Since non-duality is not an existent object, the Vedāntin contends, the Tārkikas' means of knowing cannot grasp and oppose the same.

द्वैतग्राहि यथा मानं न किञ्चिदपि विद्यते ।
तथोदर्के प्रवक्ष्यामि नातो मानविरोधिता ॥५९५॥

Since there does not (or, cannot) exist a means of knowing which can grasp duality¹—I shall discuss this later² (again)—for this reason also, there is no opposition by every means of knowing (to the Vedāntin's theory of the singleness of the Brahman). [595]

¹This is to state that the notion of duality, entertained by the Tārkikas, is already refuted in SV.

²This refers to BU 5.1 beginning with the Mantra *pūrṇam adah.*

यच्चोक्तमनुमीयन्ते प्रतिदेहं पृथग्विधाः ।
शब्दाद्यर्थोपलब्धारः कर्तारश्चापि कर्मणाम् ॥५९६॥

Now regarding the statement: 'There are inferred to be

different knowers, one in each body, of the objects such as words and also the agents of (various) activities.' [596]

भिन्नाः कैरनुमीयन्त इति पृष्टो वदेद्यदि ।
अस्माभिलिङ्गकुशलैरित्येतच्च न युक्तिमत् ॥५९७॥

If (the Tārkikas is) thus questioned: 'By whom are these different (agents of varied activities) inferred?', and then he replies, 'By us, who are adepts in the act of inferring'; then (we have to say) 'This (answer) is not (supported) with reason.' [597]

This last observation of the Vedāntin, i.e. 'The (answer) ... reason', is explained in the following verse.

अनन्यमानमेयेऽर्थे न भेदः प्रत्यगात्मनि ।
पराङ्मानप्रमेयाश्च नात्मानः स्तम्भकुम्भवत् ॥५९८॥

In the case of the inner self, which is a thing not to be known by any other knower or means of knowing, there is no discrete object (other than that can be pointed out).¹ And the Ātmans (i.e. inner selves) are not, like pillars or pitchers, to be known by the means of knowing that are outside (them).² [598]

¹This argument is put forth with a view to rejecting the inner self's being known as an object, since it is *svaprakāśa* 'self-illuminating'.

²In this part of the verse it is pointed out that the inner self, if taken as what can be perceived like a pillar etc. (i.e. *dr̥śya*), would cease to be the Ātman—it will be only non-Ātman—and thus non-existent (*asiddha*).

अनुमाकुशला ययं क इत्येतद्विभाष्यताम् ॥५९९॥
देहेन्द्रियमनोबुद्धिक्षेत्रज्ञेषु पृथक्पृथक् ।
नानुमाकौशलं तावत्प्रत्येकं तेषु विद्यते ॥६००॥
देहादिसाधनास्तस्माद्वयमात्मान एव हि ।

भूरिसाधनसाध्यत्वात्क्रियाणां नो विभिन्नता ॥६०१॥

Now, let it be explained as to who you are—you, who are adepts in the act of inferring.¹ [599]

To begin with, there does not obtain adeptness in the act of inferring in each of the body, the organ,² *manas*, intellect and the knower of the field, taken severally. [600]

(Then the Tārkikas would say:) 'Therefore, we are the very Ātmans (i.e. the individual selves), possessed of the body and others as the means (of the act of inferring) and there will be difference in our actions (of inferring) on account of their being accompanied by many (*bhūri*) means (of activity).' [601]

¹This is reference to verse 597 above. In verb root *vi-bhāṣ*, the preposition does not modify the meaning of root in any way.

²This is *jātāv ekavacanam*; it means the organs.

भूरिसाधनसाध्यत्वात्क्रियाणामिति चेद्वेत् ।
हेतुस्तवाप्यनेकत्वमेकस्यापि प्रसज्यते ॥६०२॥

If (you state as) the cause of the difference in actions as their being accomplished by many means of activity, then there will be the contingency that even a single inner self in (each one of) you (Tārkikas) will be many (inner selves). [602]

आत्मादीनां क्रियास्तित्वात्प्रत्येकं कारकत्वतः ।
अग्न्यादीनामिव तत आत्मानेकत्वमापतेत् ॥६०३॥

In the case of the Ātman (i.e. the inner self) and others, there will be action (performed by each), since each one of them is a *kāraka* 'instrumentally connected with the verb root, i.e. an agent (here)' (in the activity implied by it); therefore, as in the case of fire and others (there is maniness), there will (inevitably) follow maniness in the case of the Ātman (as well). [603]

This has reference to *avāntaravyāpāras*, i.e. some other functions, which also are conveyed by each of the *kāraṅkas*. This results into multiplicity of effects, viz. the main effect, together with some side-effects.

अनुमापि क्रिया साक्षाद्भवतैवाभ्युपेयते ।
शरीरेन्द्रियबुद्ध्यादेः प्रत्येकं स्यादनेकता ॥६०४॥

Inferring also is an action—so you yourself (*sākṣād bhavatā*) have accepted—therefore, in the case of each of the body, the organ, intellect etc.,¹ there will be maniness. [604]

¹The word etc. refers to *manas* and the *Ātman* (i.e. the inner self).

बहुसाधनसाध्यत्वात्क्रियाणामितिहेतुतः ।
एवंलक्षणहेतूक्तिमौख्यलिङ्गं भवेदतः ॥६०५॥

Therefore, adducing a cause of this kind, viz. owing to the difference in actions on account of their being accompanied by many means (of activity), will (only) be an indication of your foolishness. [605]

गुणक्रियाणां सर्वासां कर्तृमात्रव्यपाश्रयात् ।
अनैकान्तिकता हेतोस्तथा वः संप्रसज्यते ॥६०६॥

Since all of the subordinate actions have only the agent as the support; therefore, the cause (which you have cited) will have a contingency, viz. it will (have a fault called) *anaikāntika* 'leading to more than one conclusion'. [606]

अपक्षधर्मता हेतोर्नामरूपाश्रयत्वतः ।
धर्माभावात्प्रतीचश्च तद्भेदे हेतुता कुतः ॥६०७॥

Also the cause (*hetu* which you have cited) can be a property of the *pakṣa* 'subject under doubt', since it can have a support

(only) in name and form. But (*ca*) the inner self does not have any property and, therefore, how can there be any cause of distinguishing it (from others)? [607]

ऐकात्म्यवन्तो देहाः स्युर्विवादो येषु वर्तते ।
शरीरत्वाविशेषत्वात्प्रतिवादिशरीरवत् ॥६०८॥

(And, therefore,) there will be bodies having only one Ātman (within them)—and you have a difference of opinion about them!—and they will be, like the body of (any of their) opponents, having bodies which cannot be distinguished. [608]

तथेन्द्रियमनोबुद्धिविषयेष्वपि योजयेत् ।
ऐकात्म्यं सर्वभूतेषु प्रात्यक्ष्याच्चात्मनस्तथा ॥६०९॥

One should apply this (reasoning) in respect of the organs, *manas* and intellect as well; then (you would realise) oneness of the Ātman in all beings on account of its being directly experienced (by you). [609]

आत्मप्रत्यय एकात्मा सर्वदेहेषु सर्वदा ।
नानात्मवदनेकत्वं कश्चिदात्मनि वीक्षते ॥६१०॥

In all the bodies (then), there is ever (only) one Ātman; (indeed) no one experiences (lit. sees), in the Ātman, plurality (or maniness) as in the case of non-Ātmans. [610]

अनुमानादनेकत्वमात्मनो ये प्रचक्षते ।
तेषां प्रत्यक्षमानेन बाधो लिङ्गधियो भवेत् ॥६११॥

(Therefore,) for those who postulate, on the basis of inference, plurality (or, maniness) in the case of the Ātman, there would be opposition of the direct means of knowing (viz. experience) to the (or, their) knowledge derived by inference. [611]

BRHADĀRANYAKOPANIṢAD- BHĀṢYA-VĀRTIKA

2.2

Śiśu Brāhmaṇa

Sureśvara begins his discussion in BU 2.2 (basis of BUBV 2.2) with a brief statement regarding its relation to BU 2.1 (basis of BUBV 2.1). Yet that statement is too brief to convey fully (or properly) the import of Śaṅkara's comment on the relevant portion in BUB. Therefore we reproduce here BUB and add to it its English rendering. We hope that it should be useful in understanding Sureśvara's discussion better.

BUB reads (pp.295-297):

ब्रह्म ज्ञपयिष्यामीति प्रस्तुतम् । तत्र यतो जगज्जातं यन्मयं यस्मिंश्च

(In the beginning, i.e. BU 2.1.15) it has been said, "I shall instruct you (as regards) the Brahman." And it has been instructed that "It is that single Brahman from which the world has originated, of what it is made and in what it (finally) merges." What then is the nature of that world (which) originates (from) and (finally) merges (in)? (The answer is:) It has the nature of the five (great) elements. And the elements have names and forms. (Again) it is (already) said (in the Śruti that) name(s) and form(s) are truth. The Brahman is the truth of the truth in the form of the five elements. (A question is asked:) How are the (five) elements truth? (In answer to this question is stated) the Mūrtāmūrta Brāhmaṇa. Owing to having the nature of the *mūrta* and *amūrta*, the (five) elements and the *prāṇas* (organs in a/the body) also (come to) have the nature of causes and their means (and are therefore) truth (*satya*). Now begin the two Brāhmaṇas with a desire to determine the nature of those (five) elements which have the nature of causes and their means—that is the explanation of the Upaniṣad (viz. secret doctrinal teaching). Indeed, by determining the nature of causes and their means is

determined the Brahman which is the truth of truth. In this regard, it is said, '*prāṇas* are truth, this one (i.e. *Prāṇa* 'vital force') is their truth.

There, in that context (arise questions:) What are the *prāṇas*? how many? and which are the Upaniṣads there that have (those) *prāṇas* as the subject matter? (And this Upaniṣad, viz. BU) determines, while discussing the secret doctrine of the Brahman, the nature of (various) organs, the *prāṇas*—this is like fixing the resting places on the path (of one's journey).

This (then) is the result (or gain) of (the statement) *yo ha vai śīśuṃ sādhanam sapratyādhānam sasthūnam sadāmanam veda*. What is that (exactly)? Seven, i.e. seven in number, inimical, i.e. haters, viz. the offspring of brothers—the offspring of brothers are of two types: (actual) haters and non-haters. Among them, those offspring of brothers who hate them (viz.) the haters does [the *śīśu* 'young one (of a cow)' kill (lit. check, or, restrain)]. Those which are the seven *prāṇas* resting in the head, viz. the means (lit. openings) of securing (various) objects—from them are born attachments to (various) objects; these are for them the offspring of brothers (i.e. enemies), owing to their coming into existence together with them. Since they make (the Vital Breath's) eyes (lit. sight) prone towards the objects, therefore they are haters, the offspring of brothers (for them). (This is so) because they have the tendency (or, capacity) to hinder (or, prohibit) the inner self from realising (lit. seeing) the Ātman. In the *Kāthaka (Upaniṣad)*, it is already said, "The self-born has cut away the different (lit. away from itself) organs; therefore, it sees outside [lit. away (from itself)] and not within its (own) self" and so on. In that case (that is to say,) when the existence of the offspring of brothers has been established, the one, who knows (about) the *śīśu* and others, and also determines (i.e. understands clearly) the true nature of them, restrains these offspring of brothers, i.e. overpowers them (and) destroys them.

To that one, who has become eager for (or, inclined to) hearing the result (of the *vidyā* 'knowledge about the Brahman'), the Upaniṣad says this (i.e. the following): "This is indeed the young (calf)." (The question is): 'Who is that?' That one is described as he, who is inside a/the body, the *madhyama* 'innermost' vital breath, that Vital Breath who is the subtle Ātman, the one who has occupied the body in five ways, the one who is great and clad in white robes, Soma, the king, the one in whom cling (various) organs, viz. speech (and) *manas* as the principal ones among them. This is clear from the example of pegs (serving as) fetters (on the feet) of a horse.

Here is stated the connection of 2.2 with the earlier portion of BU.

जगज्जनिस्थितिध्वंसा यस्मात्सिद्ध्यन्ति तत्परम् ।
ब्रह्मेति प्राक्प्रतिज्ञाय यथावदुपदर्शितम् ॥१॥

Having first enunciated 'that it is the highest Brahman from which proceed the origin, sustenance and merger (lit. destruction) of the world', (that) was shown accordingly. [1]

This has, according to SP, reference to BU 2.1.20: *brahma te bravāṇi*. BUB states *brahma jñāpayiṣyāmūti prastutam*. This refers to purport (=essence) of that sentence. The editor of NKL refers to 2.1.425 as indicative of this Brāhmaṇa.

तस्योपनिषदित्युक्तं तद्व्याख्यात्राधुनोच्यते ।
आ मैत्रेय्याः परब्रह्मसत्यस्य प्रतिपत्तये ॥२॥

(Also) it was stated 'This is the secret doctrine of the Upaniṣad'. And now is stated here full explanation of that¹ up to the (end of) Maitreyī (Brāhmaṇa), so that one should understand the truth, viz. the highest Brahman. [2]

This refers to BU 2.1.20; *tasyopaniṣat satyasya satyam iti*

¹*tad* = *pratyagbrahma* (SP). But SP's remark does not appear consistent.

सृष्टिप्रस्ताव एतस्मिन्प्राणादेर्जन्म सूत्रितम् ।
यतोऽतः प्राणसंबन्धात्पूर्वं व्याख्या प्रपञ्च्यते ॥३॥

Since in this introductory statement regarding creation there has been enumerated the origin of *Prāṇa* etc., (therefore) from this ¹ connection of *Prāṇa* (with the origin etc.) is now given in detail (its) explanation. [3]

SP points out that *Śīśu Brāhmaṇa* has the precedence over *Mūrtāmūrta Brāhmaṇa* (viz. 2.3).

¹*ataḥ* = *etasmāt*; it is not an adverb in the sense of 'therefore'.

ततः परेण लोकादेरपि याथात्म्यमुच्यते ।
अध्यात्ममधिदैवं च देवताकरणाश्रयम् ॥४॥

Subsequent to that, there is stated the true nature of the world etc. ¹ in relation to (both) the body and the gods in relation to ² the deities and the organs. [4]

Here is given the reason as to why the *Mūrtāmūrta Brāhmaṇa* follows immediately after the *Śīśu Brāhmaṇa*.

¹This refers to superintending god of the world.

²Or, depending upon.

प्राणादि सर्वमेवेदं पञ्चभूतसतत्त्वकम् ।
न हि भूतातिरेकेण प्रतीचः किञ्चिदिष्यते ॥५॥

Prāṇa etc., that is, all this is of the nature ¹ of the five elements. Indeed nothing else than the elements is accepted to be existent beside the inner self. ² [5]

The second line of the verse emphasises the idea that duality is conceived of only owing to ignorance about the true nature of the inner self.

¹*satattva = svarūpa.*

²The inner self refers to the sentiency within (whereas the individual self is understood as a human being's self).

प्राणा वै सत्यमित्युक्तं के प्राणा इति यत्नतः ।
व्याख्यायन्तेऽथ तै प्राणास्तथोपनिषदश्च याः ॥६॥

It is (earlier) stated: 'Prāṇas are the truth.' Then those Prāṇas are explained with care (lit. purposefully) as an answer to the question 'which are those Prāṇas?' and also the secret doctrines of the same. [6]

प्राणेन मध्यमेनान्नं जग्धं वागादितर्पणम् ।
यथा करोति तद्वाच्यं प्राणोपनिषदश्च याः ॥७॥

Now is to be stated as to how the food eaten by the middle Prāṇa¹ effects pleasures of Vāk etc.; and also there are to be explained the secret doctrines of Prāṇa. [7]

¹Supply: which moves in the mouth and nostrils. This refers to vital breath. SP explains this as *mukhanāsikāsañcārī prāṇaḥ*.

Now follows the discussion of BU 2.1.1.

यो ह वा इति प्रश्नोक्तिस्तस्यायमिति निर्णयः ।
शरीरेऽभ्याहितः प्राणो मूर्ध्नि प्रत्याहितस्तथा ॥८॥

The words *yo ha vai ...*¹ is the statement of the question about the Prāṇa and in the words *tasyāyam ...*² there is the decision (about it); Prāṇa resides³ in the body and also resides specially in the head. [8]

¹This introduces *yo ha vai śiśum ... sasthūṇaṇ* in the beginning of BU 2.2.1.

²It begins with *ayam vā ... sthūṇānnaṇ dāma*.

³It literally means: is placed in

विषयेष्वनभिष्वङ्गाच्छिशुः प्राणोऽभिधीयते ।
वागादेरिव नासङ्गो यतः प्राणस्य विद्यते ॥९॥

Prāṇa is mentioned as young one of the animal because of its non-attachment to (various objects) of pleasure since Prāṇa does not have any attachment to them as Vāk etc. [9]

This verse states with reasons which justify the Śruti 'Prāṇa is Śiśu'. This indirectly reveals the nature of the section of Śiśu Brāhmaṇa.

शीर्षण्यप्राणसंस्था ये शब्दाद्या सङ्गलक्षणाः ।
भ्रातृव्यास्ते सहोत्पत्तेः प्रत्यग्दृष्ट्यपहारतः ॥१०॥

Those which are characterized as attachment to words etc. and are residing in Prāṇa in the head etc. are enemies,¹ since they are born together with Prāṇa—this is on account of the obscuring of knowledge about the individual self. [10]

¹It literally means: born from (or, offspring of) a brother.

शरीरमस्याधानं स्याच्छरीरेऽवस्थितो यतः ।
सामान्यवृत्त्या प्राणोऽयं तस्मादाधानमुच्यते ॥११॥

The body is¹ the abode of this (Prāṇa), since (this one) has stayed in the body, performing² its common function; therefore (the body) is called the abode. [11]

In the *Sāṃkhyakārikā* there is mention of five different functions of the Wind with reference to different places in the body; and Prāṇa is called *sāmānyakaraṇavṛtti*. Cf. BUBV 1.5.

¹syāt for asti.

²Literally, 'owing to the performance of'.

शरीराश्रयिणं प्राणं यतो वागादयः श्रिताः ।

अलं स्वकार्यनिष्पत्तौ न तु प्राणैकसंश्रिताः ॥१२॥

Since tongue¹ etc. has resorted to Prāṇa residing in the body, they are capable of accomplishing their own functions; but not so, if they have resorted to Prāṇa alone.² [12]

This is the statement of another reason for mentioning body as the abode of Prāṇa.

¹Vāk here stands for the functioning organ, viz. tongue.

²This means that Prāṇa has no connection with the body: SP clarifies that in the case of stupor Prāṇa does not have any connection with the body and there is no functioning of organs. NKL refers to the sleep state and not stupor. Only in the waking state, Prāṇa is connected with the various organs which can function—in the v.l. of AnSS edition, the organs are described as *kāryakāraṇāni*. Read NKL: *dehaniṣṭhaprāṇāśritānām tatsāmarthyāt* (i.e. *tattatkāryajananasāmarthyāt*— gloss in NKL edition) *prāṇasyādhānaṃ śarīram ity arthaḥ*.

प्रति प्रत्याहितत्वाच्च प्रत्याधानं शिरो विदुः ।
शिरोदेशविशेषेषु प्रति प्रति स आहितः ॥१३॥

They have known the head as the 'special abode', since (the prefix) *prati* is to indicate *pratyāhitatva* 'special placing (in every part of the body)'. (Indeed) that (*prāṇa*) is placed in each particular part of the head.¹ [13]

¹The particular parts of the head are eyes, ears, nostrils and mouth. Deussen translates 'roof of the abode' for *deśa*.

अन्नपानसमुत्था हि शक्तिः प्राणो बलं तथा ।
बलावष्टम्भ एतस्मिन्प्राणो देहेऽवतिष्ठते ॥१४॥
अबल्यं नीत्वेति तथा प्राणोत्क्रान्तिः प्रवक्ष्यते ।

Indeed, power originates from food and drink; and (therefore) it is Prāṇa and also strength. Prāṇa stays in this body, viz. in this which has strength as its support. [14]

So also, the exit of Prāṇa (from the body) will be stated in the words *abalyaṇi nītvā* ... 'Having rendered it powerless'¹

[15ab]

The words *avaṣṭambha* and *avatiṣṭhate* refer to the word *sthūṇā* in BU. NKL connects this as *prāṇapadārtha* (= *prāṇāḥ sthūṇā ity āha prāṇapadasyārthaḥ*).

¹Sureśvara, following Śaṅkara, is justifying the second line of verse 14 by the support of the Śruti statement *sa yatrāyamātmābalyaṇi nyetya saṁmoham iva nyeti* (BU 4.4.1).

उच्छ्वासादिक्रियं केचिद्वायुं स्थूणां प्रचक्षते ॥१५॥

Some scholars¹ explain *sthūṇā* (the post) as the Wind which performs the activity of going out (of the body). [15cd]

Here Sureśvara, following Śaṅkara, refers to the view of Bhartṛprapañca regarding the strength of the body as the cause of Prāṇa. This shows how Sureśvara and Śaṅkara regardfully derive support from Bhartṛprapañca (possibly because of their agreement with him in respect of their use). SP appears to quote from Bhartṛprapañca thus *uktaṁ hi prāṇa ucchvāsaniḥśvāsakarmā vāyuh śarīrah śarīrapakṣapātī grhyate. etasyāṁ sthūṇāyāṁ śīśuḥ prāṇaḥ karaṇadevatālingapakṣapātī grhyate. sa devaḥ prāṇa etasmin bāhye prāṇe sambaddha iti*.

¹The plural is expressive of Sureśvara's respect for Bhartṛprapañca.

जाठराग्न्यभिसंबन्धाज्जग्धमन्त्रं त्रिधा क्रमात् ।

परिणामं व्रजत्येतत्स्थूलमध्यमसूक्ष्मतः ॥१६॥

स्थूलांशः पृथिवीमेति पुरीषं मूत्रमेव च ।

स्थूलदेहोपचित्यर्थो मध्यमोऽंशः प्रकीर्तितः ॥१७॥

यस्तु सूक्ष्मो रसोऽन्नस्य भागोऽमृतमितीर्यते ।

स हृद्देशं समागम्य नाडीमध्यसमाश्रयः ॥१८॥

हृदयाद्विप्रकीर्णाभिर्नाडीभिर्लिङ्गदेवताः ।

प्रीणयन्नुपचिन्वंश्च दामात्रमिति भण्यते ॥१९॥

On account of its connection with the fire in the stomach, this food which is eaten (by an individual) is transformed in three ways, respectively as of gross and middle size and as subtle in form. [16]

The gross portion becomes (*eti*) earth, faeces and urine; the portion of middle size is said to be effective in the increase of the gross body. [17]

And that which is the subtle (portion) of that food is that sap, called (also) *amṛta*. That (sap) reaches the region of the heart and, finding a place in the veins, [18]

(flowing) through various veins and from the heart, causes pleasure to the deities in subtle (form) and is therefore called the cord, the food (*dāmānna*).¹ [19]

These verses explain BUB *annam dāma hi*, i.e. why food is called *dāman*.

देहं रसादिना बद्ध्वा सूक्ष्मांशेन शिशुं तथा ।
पाशद्वयाभिसंबन्धादन्नं दामेति शब्दयते ॥२०॥

anna is called *dāman* on account of its close connection with two bonds;¹ viz. it has bound the body by the sap and also the young one (viz. *Prāṇa*) by the subtle portion (of the sap) etc.² [20]

This explains how food becomes *dāman* of various sizes.

¹The *pāśadvaya* is for *deha* and *śīśu* (= *Prāṇa*).

²SP explains this as skin, flesh

दाम प्रतनुतां याति यदा कर्मक्षयात्तदा ।
यथास्वं यान्त्यथ प्राणा देहादुच्छिन्नबन्धनाः ॥२१॥

When the cord becomes very thin owing to the decrease (lit. destruction) in (effects of) *karman*, then the *prāṇas*, (organs) which have their bonds cut off, depart from the body in

accordance with the nature of the deities associated with them.

[21]

This verse states the relation between *dāman* and *Prāṇa* by the method of *anvayavyatireka*; the first line by *anvaya* and the second line by *vyatireka* method.

Now follows the discussion on BU 2.2.2.

प्रत्याधानसमूहस्य शिशोस्तस्यैव काश्चन ।
अक्षय्युपनिषदो वाच्यास्तमेता इत्यतः श्रुतिः ॥२२॥

Since some Upaniṣadic statements in relation to the eye (etc.) are to be stated with reference to that young one born as a consequence of its being supported, therefore there is the Śruti statement *tam etāḥ*

[22]

उपासतेऽक्षणि प्राणं रुद्राद्याः सप्त देवताः ।
अक्षीणा इति ता ज्ञात्वा नान्नक्षयमुपाश्नुते ॥२३॥
मूर्ध्नि प्रत्याहितं प्राणमृषयः प्राणसंज्ञकाः ।
रुद्राद्या मध्यमं यस्मात्सततं पर्युपासते ॥२४॥

The seven gods¹ Rudra and others wait on² *Prāṇa* (residing) in the eye (etc.). Having known them as non-decreasing,³ a worshipper does not experience decrease in (lit. destruction of) food,

[23]

(since)⁴ those seers, called *Prāṇa*, the seven gods Rudra and others ever particularly⁵ wait upon that *Prāṇa*⁶ which is supported in the head.

[24]

Those seven gods related to the Śīśu under reference also become known as *prāṇas* and seers. In the case of Rudra and others, we must remember that these are gods connected with seven particular parts of the head—not usual deities. We must also remember here how there is influence of ritualistic idea of differentiating a deity when it is related to one or another

deity or thing. For example, Agni is different from Agni in *agnāviṣṇu*.

¹Those are Rudra, Parjanya, Āditya, Agni, Indra, Pṛthivī and Dyau.

²*upāsate* literally meaning 'offer worship to'.

³Or, imperishable.

⁴NKL edition reads *yasmāt* which is better.

⁵Or, with great care/effort.

⁶This is *madhyama prāṇa*; cf. verse 7 above.

Now follows the discussion of BU 2.2.3.

अक्षणेव यतः पूर्वं व्याख्यातो देवतागणः ।
श्रोत्रादिकरणार्थोऽयं श्लोकस्तस्मादुदाहृतः ॥२५॥

Because the group of gods in the eye (etc.) is enumerated already (i.e. in the second section), therefore this verse is now cited as conveying the meaning of the various (sense-) organs, ears etc.¹ [25]

This has a reference to the verse *arvāgbilah* ... cited in BU with the words *tad eṣa śloko bhavati* (cf. *Śatapatha Brāhmaṇa* 14.5.2.4); cp *Atharvaveda* 10.8.9 (with variants). The verse is called *śloka* 'a non-Vedic metrical verse' though it is actually a Mantra 'Vedic verse'.

¹Referring to the senses of seeing, hearing, smell, taste and touch.

विश्वरूपं यशो ज्ञेयं शब्दाद्यर्थावभासकम् ।
तेजस्तच्चाप्यनेकात्म विभिन्नार्थावभासनात् ॥२६॥

Fame of various kinds¹ is to be known as *tejas* 'light' which illuminates the objects, viz. wind etc. and that also is of various kinds since it reveals various objects. [26]

This explains the word *viśvarūpayāśas* in the Atharvavedic

Mantra. This refers to the deities other than Rudra etc. who are connected with other (sense-)organs. The objects illuminated by *tejas* are different and therefore *tejas* is said to have different kinds.

¹It literally means: having various forms/nature.

तीरे तस्यासते सप्त वायवः करणाश्रयाः ।
ऋषयश्च यशश्चेति प्राणा उक्तेन हेतुना ॥२७॥

On the brink of it (or, in the vicinity of it; this refers to *bila*) (in *arvāg*) sit seven Winds¹ residing in the organs;² (therefore) *prāṇas* are both the seers and the fame,³ for the reason stated.⁴ [27]

This explains the meaning of *tejas* in the Mantra cited.

¹Sureśvara refers to the Wind. Possibly Sureśvara refers to the five sense-organs and *ucchvāsādi* in verse 15 above (read SP's citation: *uktam hi prāṇa ucchvāsaniḥśvāsakarmā vāyuh śārīrah*; cited under verse 15 above).

²Cf. *devatākaraṇāśraya* in verse 4 above.

³SP states the gods are the seers because they act in relation to their objects (*spandātmakatva*) and they are fame because they reveal the nature of word etc. (*śabdādivyākhyānahetutva*).

⁴The explanation given by Śaṅkara of the reason is: because they are of the nature of activity (*spanda*).

वक्तृत्वात्तृत्वभेदेन वाग्विधैकैव भिद्यते ।
सप्तमी चाष्टमी चेति सैवैका प्रोच्यते ततः ॥२८॥

Vāk, which is only one, is described as twofold on account of the difference in its character as the speaker and as the eater and therefore that single one is called the seventh and the eighth (deity). [28]

This explains the Śruti's reference to Vāk in *vāgaṣṭamī brahmaṇā saṁvidānā*.

वर्णनिष्पादनं वाचा तथाद्यरसवेदनम् ।
भवेद्द्विकर्मसंयोगात्सप्तमी चाष्टमी च वाक् ॥२९॥

Revealing the utterance of a sound is accomplished (i.e. done) by Vāk and enjoyment of the sap is also (performed¹ by Vāk); and thus, owing to its connection with two activities, Vāk is the seventh and the eighth.² [29]

This verse further clarifies the thought of verse 28 above.

¹Cf. SP: *rasavedanaṃ carvaṇakriyā*.

²Read NKL: *atṛtvena saptamī vakṛtvena cāṣṭamīty arthaḥ*.

Now follows the discussion of BU 2.2.4.

विशिष्टाह्वानसिद्ध्यर्थमृषीणामुत्तरा श्रुतिः ।
इमावेवेति च तथा फलवत्स्यादुपासनम् ॥३०॥

Now, the subsequent Śruti statement *imāv eva* is for establishing the different, specific names of those seers and (with the intention that) the worship of those deities would be fruitful.¹ [30]

This discusses the passages *imāv eva*

¹That is, for knowing the cause of their names.

सर्वस्येति फलोक्तिः स्यादुक्तोपासनकर्मणः ।
अत्रातृत्वनिषेधार्थं सर्वमस्येति भण्यते ॥३१॥

The word *sarvasya*¹ is for stating the result of the activity (or, activities) of the worship already mentioned and the words *sarvam asya*¹ are stated for the purpose of excluding the idea of the food as the enjoyer.² [31]

Here Sureśvara has in mind the notion in Saptāṇna Brāhmaṇa where *bhoktr* and *bhogyā* interchange their positions.

¹In the BU *sarvasyāttā bhavati sarvam asyānnaṁ bhavati ya evaṁ veda*.

²Read SP: *upāsitur yad bhojyaṁ (or bhogyam) tasya taṁ prati na bhoktrivaṁ kiṁ tu bhogyatvam evety arthaḥ*; NKL has expressed the same idea in other words. This serves to exclude the idea of *sarvam eva* as a repetition of what is stated in *sarvasya*.

इति श्रीबृहदारण्यकोपनिषद्भाष्यवार्तिके द्वितीयाध्यायस्य
द्वितीयं ब्राह्मणम् ॥२॥

BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA

2.3

Mūrtāmūrta Brāhmaṇa

प्राणोपनिषदश्चोक्ताः प्राणाश्चापि समासतः ।
यत्तु तेषां परं सत्यं तदिदानीं निरूप्यते ॥१॥

(Earlier) the worships of (lit. secret doctrines about) Prāṇa are described and also (are described) Prāṇas, (both) in brief.¹ And (tu) what their ultimate truth is is now explained.² [1]

The word *upaniṣad(s)* refers to Upāsanā(s) of Rudra (and others) and the word *prāṇa* to (i) organs, and (ii) deities superintending over them.

¹This is so because a full description would be too long owing to the largeness/infiniteness of the number of *prāṇas* (SP).

²This is the purport of the present Brāhmaṇa.

प्राणाः किमात्मकास्तेषां कथं सत्यत्वमिष्यते ।
इत्येवमादि वक्तव्यमित्यर्थः पर आगमः ॥२॥

There is yet desired to be stated (i.e. needs) as to what the nature of (those) Prāṇas is and as to how the truth of them is understood (lit. accepted)—for stating this and other (related) matter (*ādi*) there follows the subsequent Śruti text.

[2]

SP brings out the purpose of the beginning of this Brāhmaṇa even though it began as *dve vāva*, and not as *athāta ādeśaḥ* (*prāṇānām* ...). also, the purpose of *ity evam* is pointed out to refer to averting the doubt about the sentiency (or insentiency) of *prāṇas*.

पञ्चभूतसत्त्वानां शरीरकरणात्मनाम् ।
स्वरूपनिश्चयार्थाय प्रारब्धं ब्राह्मणं परम् ॥३॥

The subsequent Brāhmaṇa¹ is begun with the intention of the deciding nature of the body and the organs which are of the nature of five elements.² [3]

This verse further clarifies the idea of previous verse.

¹That is, subsequent to Śiśu Brāhmaṇa. Yet SP refers only to the word *dve vāva*; read: *brāhmaṇaśabdas tadekādeśaviṣayaḥ*.

²-*bhūtasatattva* = -*bhūtātman* (SP).

यदुपाधिनिषेधोक्त्या नेतीति ब्रह्मणः स्फुटम् ।
आविश्चकीर्षितं तत्त्वं तदेतदधुनोच्यते ॥४॥

Now is stated (in the following) that true nature of the Brahman which is desired to be clearly revealed in the words *neti* (and) the (various) adjuncts of which are rejected in the words (*neti ...*). [4]

Read NKL: *prakṛtabrahmanirūpaṇe prāṇanirūpaṇasya katham upayogaḥ*, as the reason for stating this verse.

स्वतोऽरूपं परं ब्रह्म तदविद्यादिहेतुतः ।
द्विरूपमिति निर्दिष्टं वियद्वत्कुम्भसंश्रयात् ॥५॥

The highest Brahman is by nature formless and yet, owing to ignorance etc.¹ (about the same), it is mentioned as having two forms—(this is) like (the sky) appearing twofold by its resorting to a pitcher.² [5]

This verse explains why the single Brahman is described to be twofold: *mūrta* and *amūrta* 'having a body and bodiless'.

¹The word etc. refers to 'product of ignorance'.

²Though the sky is just one, it appears as one outside the pitcher and another contained in the pitcher (*ghaṭākāśa* and *bāhyākāśa*).

रूपे वा ब्रह्मणो विद्यान्मूर्तामूर्ते सवासने ।
ब्रह्मैव रूप्यते ताभ्यां ब्रह्मत्वं न हि रूपवत् ॥६॥

One should know that there are two forms of the Brahman: one with a body and one without it, together with their impressions¹—by these two forms, the Brahman¹ is (fully) explained—for in reality the Brahman² does not possess any form. [6]

¹The word *savāsane* qualifies the word *mūrtāmūrte* and excludes the idea of a third form of the Brahman.

²Sureśvara uses the word *brahmatva* as non-different from *brahman*; the suffix *tva* does not modify the sense of the word *brahman*.

अविद्यामात्रोपाध्येतद्ब्रह्म कारणमुच्यते ।
तदेव ज्ञातृतामेति बुद्ध्युपाधिसमाश्रयात् ॥७॥

The Brahman is said to be the cause, when it has the adjuncts,¹ viz. those (resulting from) ignorance alone; and that Brahman becomes the knower by resorting to the adjunct (of ignorance) called Buddhi.² [7]

This explains that the Brahman remains only one, even if it is named in two ways as the cause and the effect. Read NKL: *adhyastam ekaṁ rūpaṁ svarūpaṁ caikam (=cānyat) ityuktam*.

¹These are various organs which have forms (i.e. are *mūrta*). They do not determine another *real* form of the Brahman, originate as they do in ignorance (*avidyā* regarding the Brahman).

²This also is an adjunct resulting from ignorance and having no form (*amūrta*).

तद्वृत्त्युपाधिसंस्थं सत्तज्ज्ञानमिति भण्यते ।
देवतेन्द्रियसंबन्धं तत्तत्तदभिधीयते ॥८॥

And that Brahman, appearing in its¹ functions, (viz. those

resulting from) its limiting adjuncts, is called knowledge. And that is called by the name of (the organ), having relation to that organ and its god. [8]

Construe the second line thus *tad devatendriyasambandham tad(=devatā) abhidhīyate*. Read SP: *tad eva cādhiṣṭheyopādhi tacchabdanirdeśyam ity arthaḥ*.

¹This refers to Buddhi in the preceding verse and implies other organs as well.

तथा देहादिसंबन्धं दुःखजात्यादिमद्वेत् ।
गोधनाद्यभिमान्येवं धनी गोमानितीर्यते ॥९॥

So also, that which has a connection with the body etc.,¹ comes to have misery, some genus etc.² (And) it is also said that one is possessed of the wealth, viz. cows, if (or when) one has the awareness of having the wealth of cows etc.¹

[9]

¹The word etc. refers to different organ, gross and subtle.

²This refers to various shapes, names and so on.

अन्तर्यामी तथा साक्षी सर्वज्ञश्चेत्यविद्यया ।
मिथ्याध्यासैश्च तत्कार्यैरप्रमेयं प्रमीयते ॥१०॥

And that incomprehensible (Brahman) is comprehended as the one within and the witness and the omniscient—this owing to ignorance, false attributions and their¹ various effects. [10]

antaryāmin has reference to existence of the Brahman in a body, *sākṣin* to its being an agent in the action of knowing some objects and *sarvajña* to its knowing all that exists outside—all this is based on duality.

¹SP refers *tat* to ignorance. But it is better to have ignorance and *mithyādhyaśa* as the meaning of that word.

एकं तावदिदं रूपं ब्रह्मणो मोहहेतुजम् ।

प्रत्यङ्मात्रैकधीगम्यं रूपं वास्तवमात्मनः ॥११॥

To begin with, one form of the Brahman is the product of delusion (and) the other form is understood from the knowledge of it, viz. as only that which exists within, (and) that is the true nature of the Ātman. [11]

In the first line, Sureśvara speaks of every object of our knowledge as a form the Brahman caused by false impression or ignorance. In the second line he refers to sentiency within a human body and therefore, it seems, he has used two different words *brahman* and *ātman* in the two different lines. He refers to the *adhyasta* and *vāstava* forms of the Brahman.

अव्यावृत्ताननुगतं द्वितीयासंभवादजम् ।
न वाक्यपदयोरर्थो भेदसामान्यवर्जनात् ॥१२॥

That Brahman is not distinguished from (any other objects) and it is not similar to any of them. It is unborn since there is no possibility of (existence of) a second (object). It is not some meaning to be conveyed by a sentence and/or a word since it precludes (both) difference and similarity. [12]

Hereby Sureśvara emphasises the indescribability of the Brahman.

न प्रमाणान्तरैर्गम्यं पराघेत्वसमन्वयात् ।
अनपेक्षितमात्रादि तदविद्यासमन्वयात् ॥१३॥

It is not to be understood by any of the means of knowing since it is not inseparably associated with the causes (of understanding) which are away from it;¹ it does not depend on² any means of knowing, because they are inseparably associated with ignorance. [13]

Sureśvara emphasises that the usual *pramāṇa-prameya-vyavahāra* is a product of ignorance, i.e. the absence of the knowledge

of reality. SP refers to the SV which has discussed the impossibility of any relation of the Brahman with the various means of knowing; cf. SV 148ff.

¹This refers to *pramāṇa* causing *pramā*.

²It literally means: 'it has no expectancy of'.

आत्मप्रत्ययमैकात्म्यं द्वितीयस्त्वात्मनो भवेत् ।
अनात्मप्रत्ययोऽतोऽहं स्वत एकोऽस्मि केवलः ॥१४॥

The uniqueness of the Ātman is from (i.e. results from) the realisation of one's own self, and any one who is really non-Ātman is other than the Ātman. Therefore, 'I am alone,' by myself (is the real knowledge). [14]

This implies the existence of the world as imaginary (i.e. false) like the serpent seen in a rope. The last part points to the nature of the Ātman as having no extension (*prapañca*) and no dependence on any other thing for its own existence.

Now begins the discussion of BU 2.3.1 up to verse 34.

यन्निषेधमुखेनेदं नेति नेतीति भण्यते ।
अविद्यामवधिं कृत्वा द्वे रूपे ब्रह्मणस्त्वमे ॥१५॥

These are the two forms of the Brahman which are denied in these words, viz. *neti neti*, which purport to negate (all duality), which keep in view ignorance in its full extent. [15]

It purports to say that one can mention the two forms only so long as ignorance persists and, on removal of ignorance, one cannot talk of any form of the Brahman.

अवधारणाय वावेति द्वे एवेति विनिश्चितौ ।
समुच्चिते सजातीयैरुत्तरैस्ते विशेषणैः ॥१६॥

The word *vāva* (in BU) is for emphasis and thus, when (the forms of the Brahman) are restricted as only two, they are

connected¹ with the subsequent qualifiers (i.e. properties) born with them.² [16]

This is to explain the particles *vāva* and *ca*. The two particles *vāva* and (*dve*) *eva* together specify (or, define) the non-existence of any qualifier or attribute of the two, viz. *mūrta* and *amūrta*, forms of the Brahman. This is further clarified in the following verse.

¹NKL paraphrases *samuccite* as *viśiṣṭe*.

²The moment we look upon the single Brahman as twofold, viz. *mūrta* and *amūrta*, the various qualifiers which follow can be postulated. The various adjectives are determined by the notion of duality arising out of the notion that this universe originates from the Ātman.

वावशब्दं चशब्देन प्रत्याहृत्याभिधीयते ।
मूर्तमेव च तद्रूपं ब्रह्मणोऽमूर्तमेव च ॥१७॥

The statement (in BU)¹ is made by putting together² the particle (lit. word) *vāva* with the particle *ca*. (Therefore, it means that the form of the Brahman is 'one having a body' and also 'one not having a body'. [17]

¹Namely, *mūrtam caivāmūrtam ca*.

²This refers to BUB which paraphrases it as *mūrtam caiva tathāmūrtam cāmūrtam eva ca*. This means that Sureśvara explains away a doubt, 'nanv amūrtam eva ceti katham bhāṣyakārasyāmūrtam cety atrāśruteḥ?'

अविद्यावत्परं ब्रह्म मूर्तामूर्तादिलक्षणैः ।
विशिष्यते न धर्माणां मिथः संगतिरिष्यते ॥१८॥

The highest Brahman, (only when) associated with¹ ignorance is specified by the characteristics *mūrta*, *amūrta* etc.² but there is not accepted any connection of properties with one another. [18]

Sureśvara emphasises in this verse the real non-connection of the adjectives with the Brahman; in other words, he points to the *mithyādhyāsa* 'false association' of them with (i.e. superimposition on) the Brahman. Refer to BSB 3.2.6 which refers to the *mūrtāmūrtatva* of the Brahman.

¹That is, overpowered by.

²The word etc. stands for *martya*, *amṛta*, *sthita*, *sat* and *tyat*.

विशेष्यार्थैकतन्त्रत्वाद्धर्माणां न परस्परम् ।

तथानपेक्षतस्तेषां संगतिः स्यात्कदाचन ॥१९॥

Since (any) properties are dependent only on the thing qualified (by them) there can never be their mutual connection; so also (there) cannot be connection among them, since they do not expect one another.¹

[19]

The adjectives *mūrta*, *martya*, *sthita* and *sat* refer to various *dharma*s (= *guṇa*s) of the Brahman (of course, due to *avidyā*) and they do not get connected with one another. SP points out that, as in the *aruṇādhirakaṇa* of *Mīmāṃsāsūtra* 3.1.6.12 which refers to *aruṇa* (= *guṇa*) of 'cow' (a *dravya* that is *guṇin*), these *dharma*s do not necessarily stand in connection (*sangati*). This is implied in the second line of this verse.

¹This is for *anapekṣataḥ* which is *anapekṣatvataḥ*. Cf. verse 13cd above and note thereon.

विज्ञानपुरुषान्तस्य ब्रह्मणः परमात्मनः ।

तमस्विनोऽथ द्वे रूपे तदन्याव्यतिरेकतः ॥२०॥

Thus then there are two forms of the highest Ātman, i.e. the Brahman, which ends in the knowing self¹ (and) which is overpowered by darkness,² there is no separate existence of any one other than that.

[20]

¹This refers to the most minute, yet perceptible, form of the

Brahman, maybe, Hiranyagarbha which appears to create the world—cf. NKL: *śṛṣṭyanantaram praviṣṭasya*.

²This is literal translation of *tamasvin* which means 'possessed of'.

क्लृप्तसर्पादिभिर्यद्वदज्ञातायाः स्रजः सदा ।
वास्तवोऽवास्तवो वा न व्यतिरेको न चान्वयः ॥२१॥
तद्वन्न व्यतिरेकेण ब्रह्मणो द्वे स्वतः सदा ।
नापि चाव्यतिरेकेण ते तु ब्रह्मैव निर्द्वयम् ॥२२॥

As, on account of a serpent etc.¹ which are imagined (in the place) of wreath (etc.),² there is no real or unreal (thing which exists) beside it, or there is no connection (of the same with another), [21]

in the same way, the two (forms) of the Brahman (do) not (exist) as apart from itself or as (connected) with it; the two are just the Brahman which is free from (i.e. devoid of) duality.³ [22]

¹The word etc. implies other examples of misapprehension (*adhyastakalpanā*) such as *śūktikārajata*, (*ekaś*) *candraḥ sadvitīyaḥ*.

²Though only *śrak* is mentioned, the other objects, viz. *śūktikā* and (*eka*) *candra* are implied.

³Read SP: *bhāsamānāyor* [*mūrtānuṛtāyor*] *dvayoḥ kā gatiḥ ity āśaṅkyāha te tv iti*.

अण्वाद्यवयवं मूर्तं पीनं संस्थानवद्दृढम् ।
तद्विरुद्धममूर्तं स्यान्निरंशं देशवन्न च ॥२३॥

'That which has a form' if made up of parts, viz. *aṇu* etc., solid and firm like a composition and (that which is) 'not having a form' is opposed to it (in nature),¹ i.e. partless and undivided into regions. [23]

This refers to the twofold objects, viz. (i) the earth, waters and fire as having parts and regions and (ii) the Wind and

Sky as not having them.

¹Here *tadviruddham* means *apīna* and *adr̥ḍha*.

मर्त्यं मरणधर्मि स्याद्यद्विनश्वरलक्षणम् ।
अमृतं तद्विरुद्धं च ध्रुवं यत्र विपद्यते ॥२४॥

Mortal is what is liable to perishing;¹ it is characterized as not abiding (for ever). Immortal is what is opposed to it;² it is permanent and does not come to destruction. [24]

This explains the meaning of the word *martya*.

¹It literally means: what has the property of decay or death.

²Namely, the mortal.

आश्रितं स्थितमत्र स्याद्गत्वाव्याप्य च तिष्ठति ।
तद्विरुद्धं तथा यत्स्यादेत्येव न तु तिष्ठति ॥२५॥

The word *sthita* here¹ means that which is supported (in some place); and that goes (to some place) and stays on it without having pervaded it and that, which is opposed to that, goes (to some place) but does not stay there. [25]

This explains *sthitam ca*

¹That is, in this BU sentence.

सदिति व्यक्तरूपं यद्गृह्यमाणविशेषणम् ।
प्रत्यक्षं तद्विरुद्धं त्यदप्रत्यक्षं तथोच्यते ॥२६॥

The word *sat* means (having) a manifest form whose qualifiers can be grasped and it is directly perceptible and what is opposed to that is then called *tyat*, it is described as what is not directly perceptible. [26]

This brings out the purport of *sat*.

क्षितिर्जलं तथा वह्निरित्येतन्मूर्तमुच्यते ।
भूतद्वयममूर्तं च वायुश्चाकाशमेव च ॥२७॥

The earth, waters and also fire are this (Brahman) which is said to have a form and the two elements, the Wind and Sky are (the Brahman) which does not have a form. [27]

This refers to the five great elements divided into two groups, *mūrta* and *amūrta*.

मूर्तं मर्त्यं स्थितं सच्च क्षित्यबग्नित्रयं विदुः ।
 अमूर्तामृतयत्यत्तु वाय्वाकाशद्वयं स्मृतम् ॥२८॥
 मूर्तत्वादेव मर्त्यं तन्मर्त्यत्वादेव तत्स्थितम् ।
 स्थितत्वादिन्द्रियग्राह्यं निर्धार्येदंतया पृथक् ॥२९॥
 सोपाख्यत्वान्न तद्व्यापि क्वचिदेकांशवत्स्थितेः ।
 स्थितत्वाच्चापि तन्मर्त्यं मर्त्यत्वान्मूर्तमेव च ॥३०॥
 अमूर्तत्वादमर्त्यं तद्यद्व्यापि त्यदतीन्द्रियम् ।
 अतीन्द्रियत्वात्तद्व्यापि व्यापित्वाच्चामृतं ततः ॥३१॥
 अस्थितत्वादमूर्तं तदाकारव्यक्तिवर्जितं ।
 हेतुतत्फलरूपेण मूर्तादेः संगतिर्मिथः ॥३२॥

They have known the triad of the earth, waters and fire as having a form, mortal, limited and existing (i.e. directly perceptible) as not having a form, and the two, viz. Wind and Sky are known immortal, moving and that (beyond direct perception).¹ [28]

Only since it has a form, it is mortal,² and only since it is mortal, it is said to be steady (i.e. limited for some time). And because it is steady, it can be grasped by the sense-organs after determining it as 'this is distinct from others'. [29]

(And) since that has a name, it is not pervasive; because it stays at some place like a part (of it) and because it has (so) stayed, it is mortal. And because it is mortal, it is possessed of a form. [30]

Since it does not have a form³ it is immortal and that which is pervasive, it is 'that,' i.e. beyond sense-organs. Because it is beyond sense-organs, it is pervasive; and because it is

pervasive it is immortal. [31]

Because it is not steady (i.e. limited for some time), it is without a form and any manifestation of shape—thus the properties *mūrta* etc.⁴ having relations in the form of the cause and the effect stand (i.e. are) mutually connected. [32]

¹Cf. *tyad apratyakṣam* in verse 26 above.

²In these two verses, viz. 29 and 30, Sureśvara explains how the adjectives *mūrta*, *martya* etc. give rise to every subsequent adjective and *vice-versa*.

³This and the next verse state the same adjectives (as described in the two preceding verses) and help to bring out clearly the cause and relation among them.

⁴The word etc. refers to *martya*, *sthita* and *sat*.

अक्षसूत्रवदन्योन्यं सामर्थ्यस्याप्रहाणतः ।

हेतुतद्वत्तया ज्ञेयामूर्तादेरपि संगतिः ॥३३॥

Because there is no loss of the capacity (among those, viz. that having a form etc. to modify one another) as in the case of the beads and the thread (in a rosary); in the same way, it should be known that what has not a form etc.¹ is (to be understood as) connected in the form of the cause and its effect.² [33]

¹The word etc. stands for *amṛta*, *asthita* and *asat*.

²It literally means: that which has that, viz. that cause.

संभवेऽन्यतमस्यापि सर्वेषां संभवो यतः ।

अतोऽवधारणार्थाय तत्रैवग्रहणं कृतम् ॥३४॥

Since all of these come into existence immediately as any one of them comes into existence, therefore, for the sake of emphasis, there is the insertion of the word *eva*.¹ [34]

¹Cf. *eva* in verse 29 above, viz. *mūrtatvād eva* and *amūrtatvād eva*.

Now follows the discussion on BU 2.3.2 up to verse 44.

तयोर्द्विष्टयोर्मर्तं प्रथमं तावदुच्यते ।
अन्यद्वाय्वन्तरिक्षाभ्यां भूतत्रयमिहोच्यते ॥३५॥

To begin with there is first explained, that one of the two thus enumerated which has a form and thus here¹ is explained that triad of elements which is other than the Wind and Sky. [35]

This explains *etan mūrtam*

¹That is, in verses 36-38 which follow.

मर्तं संस्थानवद्वयेतत्तथा मर्त्यं विनाशवत् ।
एतत्स्थितं परिच्छिन्नमेतत्सत्सविशेषणम् ॥३६॥

This one, which has a form, is in the form of construct and also that is mortal, viz. it is perishable; this has stayed (for some time), i.e. is limited (or measured by another object) and this is existent, i.e. it is having attributes. [36]

This explains *etan martyam*

चतुर्विशेषणस्यास्य क्षित्यबग्न्यात्मकस्य हि ।
चतुष्टयरसत्वार्थं पुनरुच्चारणं कृतं ॥३७॥

Indeed of this one, which has these four attributes, viz. of what is of the nature of the earth, waters and fire, is stated once again with a view to conveying that 'the group of the four'¹ are the essence (of them). [37]

This explains *tasyaitasya* This means that the four adjectives qualify (are the effects of—Naiyāyikas terminology) all the three elements. It is not intended to qualify (only) one of them (at one time). Further, the statement of the four, *mūrta* etc., once again—immediately after verse 36—is not to be considered as

repetition—so it is intended. Cf. NKL: *adhikavacanam anyārthaṃ dyotayatīty arthaḥ*.

¹*mūrta, martya, sthita and sat.*

सर्वव्यापी रसो ह्येष शश्वत्तपति यो रविः ।
चतुष्टयान्वयादेष भूतत्रयरसः स्मृतः ॥३८॥

Indeed this sun who ever shines (lit. heats) is the all-pervasive essence; since it is connected with 'the group of the four'.¹ This is known as the essence of the three elements. [38]

This explains the meaning of *sa eṣa tapati*.

¹This is because the sun makes this division visible.

य एष तपतीत्यत्र मण्डलं परिगृह्यते ।
चतुष्टयं हि मूर्तीदि मण्डले गृह्यते यतः ॥३९॥

Here, in the BU sentence *sa eṣa tapati* is understood the orb (of the sun), because 'the group of the four', viz. *mūrta* etc., is grasped while there is the orb shining. [39]

This explains the meaning of *eṣa* as standing for the orb of the sun, not any live being.

चतुर्णामन्वयो हीति हेतुनात्रविभाव्यते ।
सतश्च ग्रहणं विद्याच्चतुर्णामुपलक्षणम् ॥४०॥

By the word *hi* which is (expressive of) the reason in this (statement) is understood the association of 'the group of the four' and (therefore) one should understand (here) the inclusion of *sat* as indicative of² 'the group of the four'. [40]

¹This explains the significance of the word *hi* in *sato hi*.

²Read NKL: (*sato hi iti*) *etat caturṇām madhye anukṭānām mūrtādīnam upalakṣaṇam ity arthaḥ*.

कृष्णसारं यथा स्थानं चक्षुषः करणात्मनः ।

तथा हिरण्यगर्भस्य मण्डलं करणात्मनः ॥४१॥

As in the case of the eye, which has the nature of a sense-organ, the dark pupil is its abode,¹ so is orb the abode of Hiraṇyagarbha that has the nature of sense-organs. [41]

¹The words *sthāna* and *maṇḍalam* are synonymous.

उत्सर्गाद्रूपनिर्माणे प्राधान्यं तेजसो यतः ।
तस्माद्रसत्वनिर्देशः क्रियते मण्डलात्मनि ॥४२॥

Since, in the act of the creation of various forms (in the universe), prominence belongs to *tejas*,¹ there is reference made here to the character of the orb as the essence. [42]

This explains why there is mentioned the orb of the sun instead of *tejas*.

¹Cf. BU 1.2.2: *tejo raso nirvartata*. Also, cf. verse 44 below.

अप्क्विलन्नः पार्थिवो धातुस्तेजसा परिपच्यते ।
अङ्कुराद्यभिनिष्पत्तौ मुख्यतैवं हि तेजसः ॥४३॥

Indeed prominence is given to *tejas* which is thus understood since at the time of (the appearance) of the sprout there appears heating (lit. waking) of the earthly element¹ which is wetted by water. [43]

¹It refers to the softness created in earth or seed by water; cf. SP: *adbhir vikledaṃ mṛdutvam āpāditaḥ śālyādiḥ pṛthivī-svabhāvaḥ....* This justifies the *prādhānya* of *tejas* (in *rūpasarga*).

सारस्त्रयाणां भूतानां रसो मण्डलमुच्यते ।
एतत्साराणि हि त्रीणि भूतान्याहुर्विपश्चितः ॥४४॥

The essence of the three elements (viz. earth, waters and fire) is called the orb; indeed the wise ones have declared that these three elements have this as their essence. [44]

This explains BUB *trayāṇāṃ hi ...* which gives yet one more reason (viz. *vidvatprasiddhi*) as to why the *maṇḍala* is held to be *bhūtatrayasāra*.

Now follows the discussion of BU 2.3.3 up to verse 68c.

मण्डलायतने यत्तु कारणं संश्रितं विभोः ।
विराजो देवदेवस्य तदिदानीमिहोच्यते ॥४५॥

What in the abode of this orb has been accepted (i.e. stated)¹ as the cause pertains to the all-pervasive Virāj,² the lord of the gods—(how) that (is) is 'now explained here (i.e. in what follows). [45]

¹The v.l. in AnSS edition *saṁsthitam* 'has remained' does not appear convincing.

²Virāj is for Hiranyagarbha, Sūtra, *kalīṅga* (in verse 47 below).

आदित्यान्तर्गतः साक्षात्करणात्माभिधीयते ।
वाय्वाकाशरसत्वेन तत्रामूर्तान्वयो यतः ॥४६॥

The one who is inside the sun is called the Ātman of the different organs of perception since therein is the presence of the one which does 'not have a form'¹ as the essence of the Wind and Sky. [46]

¹Read SP: *amūrta-graṇam amṛtāditrayopalakṣaṇam*.

कलिङ्गारम्भसिद्धयर्थं वाय्वाकाशसमुद्भवः ।
ईश्वरात्कारणाद्यस्माल्लिङ्गं तेन रसस्तयोः ॥४७॥

Since the origin of the Wind and Sky is from the cause, viz. the Lord, for effecting the activity of the various organs, viz. *ka*,¹ he is the *liṅga* and essence of the two.² [47]

Here Sureśvara seems to be borrowing the idea of Sāṃkhyas about *liṅga*, inferred sentience in a body.

¹This stands for Sūtrātman or Hiranyagarbha. Here Sureśvara uses an unusual word *ka-liṅga*.

²The Wind and Sky are thus subordinate to *liṅga*, viz. Virāj.

वाय्वाकाशरसो ह्येष इति हेतुः प्रदर्श्यते ।
त्यस्य ह्येष रस इति यथोक्तौ मण्डलात्मनि ॥४८॥

Now is stated the reason as to why this one is (described as) the essence of the Wind and Sky. This is so said in the statement *tyasya hy eṣa rasaḥ* with reference to the Ātman in the orb. [48]

This explains *asya hi*. In verses 45ff. Sureśvara holds Hiranyagarbha (*liṅga*), and the knower of the field (as well) as synonymous with sentient being in the orb of the sun; cf. *ādityāntargataḥ* in verse 46 above.

हिरण्यगर्भक्षेत्रज्ञं रसं केचित्प्रचक्षते ।
कारणं रसशब्देन यस्मादत्राभिधीयते ॥४९॥

Some scholars hold (lit. say) that Hiranyagarbha, the knower of the field, is the essence, since in the cause¹ is expressed by the word *rasa*. [49]

This explanation is offered by Bhartṛprapañca; it is stated in verses 49 to 57ab. Read SP with advantage: *tyasya hūtyādau rasaśabdena bhūtadvayakāraṇam uktam na ca tac cetanād anyan na ca jīvas tathāsāmarthyān nāpi paraḥ kauṭasthyāt tasmāc cetanaḥ sūtrakṣetrājñō 'tra rasa ity arthaḥ*. Both Śaṅkara and Sureśvara mention this with some explanations.

¹This means: the origin.

यस्माद्विरण्यगर्भस्य कर्म वाय्वन्तरिक्षयोः ।
प्रयोक्त्रव्यक्तयोस्तस्माद्रसः क्षेत्रज्ञ उच्यते ॥५०॥

Since the activity of Hiranyagarbha is the impeller in the case of the two 'not directly perceptible'¹ Wind and Sky, the knower

of the field is said to be their essence.

[50]

This clarifies why Hiranyagarbha is the *kāraṇa*.

¹AnSS edition has a v.l. in the second line, viz. *prayoktr-vyaktayoh*, but that being a Dvandva compound, does not properly qualify *vāyvantarikṣayoh*— indeed, an inferior reading.

भूतद्वयरसो ज्ञेयो मण्डले चेतनः पुमान् ।
त्यस्य ह्येष रस इति तत्सिद्धौ कारणाभिधा ॥५१॥

The sentient man in the orb (of the sun) is to be understood as the essence of the two elements¹ and the statement of the reason for effecting this is in the words *tyasya hy eṣa rasah*.

[51]

This is a brief statement of the sentence *tasyaitasyāmūrtasya*; it justifies the argument in the preceding verse.

¹This is a reference to the Wind and Sky.

न्यायोक्तेरेव संसिद्धेः प्रतिज्ञातस्य वस्तुनः ।
क्षेत्रज्ञः कारणं कस्मादित्यत्र न्याय उच्यते ॥५२॥

Since what is enunciated becomes established by the statement of the reason, here¹ is stated the (logical) reason as to why the knower of the field is the cause.

[52]

The statement of the reason (*nyāya*) is for averting a doubt about the uselessness of it which is implied in the Śruti statement (*nyāya*).

¹In the sentence *tyasya hy eṣa rasah*.

एतस्मिन्मण्डले योऽन्तर्विज्ञानात्मत्वमागतः ।
अविद्याभावनाकर्महेतुतो नान्यकारणात् ॥५३॥

He who has become the inner self in this orb of the sun has become so only because of (his) activity which proceeded from ignorance; and not from any other motive.

[53]

SP points out that Sureśvara states the reason for establishing the statement of the Śruti in the common or popular way of *nyāya* 'reasoning'. Further, it seems to quote Bhartṛprapañca's statement: *nyāyam eva darśayan yo hy etasmin maṇḍale vijñātmēti*. Translation of *avidyābhāvanākarma* ... is not certain/correct!

तस्य यत्कर्मरूपं तद्वियद्वायुप्रयोजकम् ।
 खस्थस्य कर्मणस्तस्य मरुत्प्रस्पन्दरूपिणः ॥५४॥
 वायवाकाशप्रनाड्यैवं तेजसः संभवस्ततः ।
 जज्ञाते तेजसो भूते जलं च पृथिवी तथा ॥५५॥

And that which has the nature (lit. form) of his activity is the cause (of the origin) of the Wind and Sky—that is the activity of him who stays in the sky and has the form of the flutter of the wind. [54]

Thus there is then the origin of *tejas* through the channels of the Wind and Sky and from that *tejas* were born the two elements water and earth. [55]

We read the second line of verse 54 as *khashtasya karmaṇas tasya*, following the NKL edition.

On verse 55 refer to verse 42 above. Also read SP: *tat* (=standing for *karmarūpam* in verse 54) *ākāśam utpādya tadrūpeṇa sthitam tasya marut kāryam tena spandātmanā sthitasya dvayadvārā teja evam karmaṇas tayos tejasaś ca janmety arthaḥ*. The meaning of *taijase itare bhūte* is given in *jajñāte*

कर्मणा पौरुषेणैवं रसभूतेन संभवः ।
 वायवन्तरिक्षयोर्यस्माद्रसस्तेन पुमांस्तयोः ॥५६॥

Since thus there is the origin of the Wind and Sky from the activity belonging to the man,¹ which has become the essence, the man (in the orb of the sun) is the essence. [56]

This is the concluding remark in the view of Bhartṛprapañca.

¹This man is Hiraṇyagarbha.

मेधया तपसेत्यादि तथा च प्रागुदाहृतम् ।
न्यायेनानेन पुरुषो रसशब्देन भण्यते ॥५७॥

So has it been stated earlier in the words *medhayā tapasā* ('janayat')¹ and for this reason is that man mentioned by the word *rasa*. [57]

There is cited here an authority from Śruti to support the statement in the preceding verse.

¹BU 1.5.1.

त्यस्य ह्येष इति ह्युक्त्या न्यायः श्रुत्यायमुच्यते ।

In the words *tyasya hy eṣa rasaḥ* is stated by the Śruti the reason.¹ [58ab]

¹Cf. verse 51cd and 52 above.

Now follows, in verses 58cd-68, arguments against the view of *Bhārtrprapañca*.

नैतदेवं भवेन्मूर्तरसेनास्यासमत्वतः ॥५८॥
भूतत्रयस्य मूर्तस्य रसो मण्डलमभ्यधाः ।
धर्मैश्चतुर्भिर्मूर्ताद्यैर्भूतत्रयवदन्वितम् ॥५९॥
अमूर्तयोरपि रसो लिङ्गात्मा गृह्यतां तथा ॥६०॥

This cannot be so, since this will result in the inequality of this essence (of what does not have a form) with the essence of what has a form. [58cd]

You have called the essence of the triad of elements, which has a form, by the name *maṇḍala* and which is connected with (i.e. possessed of) the four properties, *mūrta* etc. in the same way as the three elements. [59]

Therefore, the essence of even the two (elements), which do not have a form, is to be understood as the nature of *liṅga*¹

‘subtle form’.

[60]

In verse 58cd above, argument is made about the inequality which is clarified here: In the view of Bhartṛprapañca, the essence of the three elements which have a form is the orb of the sun (which is gross) and the essence of the Wind and of the Sky is not a subtle body; but it is the knower of the field, a sentient being. Here, Sureśvara addresses the first line of verse 59 directly to Bhartṛprapañca—this is clear from the reading *abhyadhāḥ* in verse 49b, against the v.l. noted in AnSS edition *abhyadhāt*.

¹*linga* is the subtle form (of a living being).

वाक्यप्रवृत्तेस्तुल्यत्वात् युक्तोऽत्रान्यथाग्रहः ।
वैरूप्यलक्षणो दोषः सत्येवं वः प्रसज्यते ॥६१॥

Since the procedure of the Vedic sentence in either case is similar, it is not proper to adopt a different procedure (in the sentence referring to *amūrtarasa*). (For) if this is so, there would necessarily result a fault of accepting dissimilarity (of procedures) in the two sentences. [61]

This verse gives reason for blaming Bhartṛprapañca for his aforesaid view.

In these verses Sureśvara is putting forth the argument of Śaṅkara cryptically. Śaṅkara’s argument is: The three elements which have a form have an essence (or, cause) that has a form, so also the two elements which do not have a form have an essence (or, cause)—cf. verse 63 below—which has a form. So far, this is agreeable, but Bhartṛprapañca holds that, in the first case, the essence (or, cause)—cf. verse 63 below—is non-sentient and, in the other, sentient. This results into dissimilarity. This is objectionable.

अथ मूर्तरसोक्त्यापि चेतनस्यैव चेद्ग्रहः ।
अत्यल्पं भवताभाणि सर्वमात्मैव नो यतः ॥६२॥

If (Bhartṛprapañca might argue) it is held that in the statement

about the essence (or, cause)—cf. verse 63 below—of what has a form is only a sentient being, (then Śaṅkara's answer is:) Oh. You have said just a small (i.e. insignificant, or unnecessary) thing, since we have accepted that all this is but the Ātman. [62]

Śaṅkara thinks all that effort of Bhartṛprapañca is not necessary in view of the accepted doctrine of Vedānta (according to Śaṅkara) that, in the final analysis, every effect is but caused by the Ātman (just through ignorance).

न ह्यात्मव्यतिरेकेण किञ्चित्कारणमिष्यते ।
तेन तेन स्वरूपेण प्रत्यगात्मैव कारणम् ॥६३॥

Indeed there is not accepted any thing other than the Ātman as the cause (for the effects)¹ since it is only the inner self in one form or another which is the cause.² [63]

Read SP (which brings out the purport of this verse):
parasyaivājñātasya kāraṇatāyā vaidikatvād ity arthaḥ.

¹Here, there is reference to the elements and their modifications.

²This sets aside the notion of Kṣetrajña (i.e. a particular Jīva).

मण्डलात्मनि चाधारे लिङ्गात्मैवावसीयताम् ।
करणस्यैव तत्स्थत्वाद्विज्ञानात्मा हि लिङ्गगः ॥६४॥

And let it be understood that there is the subtle Ātman at the basis of what has the nature of an orb, because it is the inner self¹ which exists in the subtle body for the organs rest (i.e. are supported) in the same.² [64]

¹This is for Vijñānātman already referred to in verse 53 above. It is the same as Jīva.

²That is, Kṣetrajña.

अज्ञातः पुरुषो यस्मात्कार्यकारणशब्दभाक् ।

अज्ञातमिथ्याविज्ञानरूपत्वात् तु तत्त्वतः ॥६५॥

(This is so) because Puruṣa is not known as designated by the words cause and effect; it is so (i.e. *kāryakāraṇabhāk*), because of its nature which is not known and has some false notion about it; it is not (indeed) that in reality. [65]

In the argument, there is stress laid on the cause and effect relation. The two must be similar, while Bhartṛprapañca seems to accept this cause and effect relation, whereas Śaṅkara does not accept it.

अचेतनेषु लोकेऽस्मिन् दृष्टा पुरुषाभिधा ।
इति चेन्नैतदेवं स्यादचित्केष्वपि दर्शनात् ॥६६॥
त एतान्सप्त पुरुषानित्यादिश्रुतिवाक्यतः ।
असंवित्केऽपि पक्षादौ दृश्यते पुरुषाभिधा ॥६७॥

(Indeed) there is nowhere noticed in the world the use of the word *puruṣa* in the case of the non-sentient (things). (Yet an objection can be raised:) No, this is not so, since it is noticed in the case of those which are of the nature of the non-sentient. [66]

[Thus it is learnt (i.e. known)] from the Śruti statement *ta etān sapta puruṣān ...*,¹ and also in the case of the parts (of the beings' bodies)² etc.; which do not have any sentience, there is the designation (for them) *Puruṣa*. [67]

Verse 67 explains the thought in verse 66.

¹Read SP and NKL: *te prāṇā na śaktā vibhaktā* (not in NKL) *vyavahāraṃ janayitum* (NKL: *dārśayitum*) *iti kṛtālocanās tvak-cakṣuḥśrotrajihvāghrāṇavānimanorūpān etān puruṣān ekaṃ līṅgātmakaṃ* (NKL: *līṅgaṃ*) *puruṣam akurvan* (untraceable!) and also *sa vā eṣa puruṣo 'nnarasamayah* (*Taittirīyopaniṣad* 2.1).

²Cf. SP: *pakṣādaḥ tadavayavabhākṣu koṣeṣu iti yāvat* and NKL: *pakṣapucchādeḥ samūhe koṣe ity arthaḥ*.

अध्यात्मोक्त्यवधिज्ञप्त्या अधिदैवतकीर्तनम् ।
मूर्तामूर्तविभागोऽयमध्यात्ममधुनोच्यते ॥६८॥

(Now) by informing about the beginning of the discussion on what pertains (or, belongs) to the body,¹ there is (completion of) the statement² of what pertains to the deities (in the body). Now (then) follows the division of *mūrta* and *amūrta* (in the statement of) what pertains to the body.³ [68]

¹This refers to BU statement: *athādhyātman*

²This is translation of *kīrtana*.

³This purports to be the beginning of the discussion of BU 2.3.4ff.

Now follows the discussion of BU 2.3.4-5 (from verse 68d) up to verse 82.

भूतत्रयं पृथिव्यादि देहेऽपि परिगृह्यते ।
मूर्तशब्देन यत्प्राणद्वयोऽन्मनश्चापरं च यत् ॥६९॥

The triad of elements, beginning with earth is grasped even in a body, which is signified by the word *mūrta*, viz. that which is other than *Prāṇa* and the Sky (i.e. space)¹ in the heart. [69]

¹We have ignored the reading of NKL edition *yat* in the place of *hr̥d*.

चक्षुरसस्त्रयाणां स्याद्विशेषेणात्र निष्ठितम् ।
तेजः सर्वशरीरस्य निर्मातृ स्यादसंशयः ॥७०॥

Here,¹ the eye is the essence (or, cause) of the three (elements) wherein abides, without any doubt, fire which is the creator of whole body. [70]

This explains *etasya satah*, (for already *etan martyam* etc. is explained).

SP and NKL cite the passage *ādityaś cakṣur bhūtvākṣiṇī prāviśat* (*Aitareyopaniṣad* 1.2.4) as the basis for this; cf. BU 1.3.3. There is thus *cakṣus* used as a synonym for *tejas*.

प्रथमा संस्कृतिरिति मन्त्रवर्णोऽपि दृश्यते ।
शश्वद्वै रेतस इति तथा च श्रुतिशासनम् ॥७१॥

Also there is noticed the Mantra *prathamā saṃskṛtiḥ*¹ So also there is instruction in the Śruti *śaśvad vai retasaḥ*² [71]

The verse cites a Śruti and a Brāhmaṇa in support of the statement in the preceding verse.

¹Cf. *sā prathamā saṃskṛtir viśvavāra, sa prathamō varuṇo mitro 'gniḥ—Vājasaneyi Saṃhitā* (of Yajurveda) 7.14. In this, there is reference to *prathamasarṣṭā drṣṭi*.

²Cf. *śaśvad vai retasaḥ siktasya cakṣuṣī prathame sambhavataḥ* (untraceable).

There now follows the view of *Bhartṛprapañca* which is to be accepted in this context.

मूर्तामूर्तविभागोऽयं यदि नामेह भण्यते ।
अधिदैवं तथाध्यात्मं तथापीयान्न गृह्यते ॥७२॥

If, indeed, here (in the Śruti and Brāhmaṇa stated) this is stated as the division of what has a form and what does not have a form with reference to sphere of the deities and also to the sphere of the body, even then this is not to be taken to be this much.¹ [72]

SP points out how Sureśvara states in this verse that the view of *Bhartṛprapañca* regarding the division of *mūrta-amūrta* is not against the Śruti statements mentioned above.

¹This division of *mūrta-amūrta* should not be taken as exhausted because it implies many more divisions within. This

invites the argument in the next verse.

कृत्स्नस्य ब्रह्मणो रूपे मूर्तामूर्ते विवक्षिते ।
यतोऽतो नेयता कात्स्न्यं देवताध्यात्मयोर्भवेत् ॥७३॥

Since it is intended to express the two forms of the entire Brahman,¹ viz. what has a form and what does not have a form; therefore, only by this much (description) there is not fullness of the description of the sphere of gods and that of body. [73]

¹This refers to the entire creation caused (as it is supposed) by the Brahman.

आरब्धकार्यभूतानां गृहीतौ न च संभवः ।
यथोक्तलक्षणस्यैह मुख्यवृत्त्योक्तभूमिषु ॥७४॥

There is no possibility of the given description to include, by (the) primary function (of its words) all the elements that have begun to produce their effects, among the various levels (of creation). [74]

This is one more reason that points out the insufficiency of the description.

व्याप्येव लक्षणं युक्तमन्यथा तदलक्षणम् ।
निर्देशस्तुपरिच्छिन्नविषयोऽत्राभिधीयते ॥७५॥

The definition should be all-pervasive;¹ if it is not so, it is not a definition and here the mention is made of what has only a limited sphere. [75]

The argument in this verse is: The division (i.e. definition) of the Brahman as *mūrta* and *amūrta* cannot—in its primary sense—be really applicable to all the five elements (which comprise the Brahman) and yet it should be applied to (all) the five elements. It is answered away in the second line; that

is to say: *mūrta* and *amūrta* are used for only limited number of elements, viz. three and two.

¹That is, it is applicable to all relevant items.

तत्रैवं सति यत्र स्यान्मूर्ताद्युक्तं चतुष्टयम् ।
लक्षणं तत्र संपूर्णमन्त्यकारणकार्ययोः ॥७६॥

This being so, that should be considered as full definition wherein there is stated the group of the four, viz. what has a form etc.¹ which is stated and all that falls between the two finals, viz. effects and their causes.² [76]

¹Namely, *mūrta*, *martya* etc.

²Read SP: *apyayakramaṇāntye kārāṇe catuṣṭayāmūrtāmṛtādi tatrobhayatra lakṣaṇaṁ pūrṇamiti yathāyogaṁ lakṣyavyavahāra-siddhir ity arthaḥ.*

आकाशशब्दवाच्यो यः सर्वकारणकारणः ।
मुख्यवृत्त्या समर्थं स्यात्तत्रैवामूर्तलक्षणम् ॥७७॥

Only with reference to that the one, who is the cause of all causes, is to be expressed by the word *ākāśa*, the definition of what does not have a form will be suitable in its primary sense, only with reference to that. [77]

Verses 77-79 clarify the thought of verse 76 above. For profit, read NKL: *amūrtalakṣaṇaṁ avyākṛtamātraviśayaṁ mūrtalakṣaṇaṁ prthivīmātraviśayaṁ ityarthaḥ.*

पृथिव्यां चापि तन्मुख्यं यदुक्तं मूर्तलक्षणम् ।
उभयोरन्तरालस्था मिथः संकीर्णलक्षणाः ॥७८॥

And what is given as the definition of what has a form is principally signifying the earth and then there are other definitions intermixing with one another, which pertain to the different levels between the two (Sky and Earth). [78]

लक्षणं गौणमेव स्यादन्त्ययोर्मध्यभूमिषु ।
मूर्तामूर्तव्यवहृतिस्तथा तत्रापि दृश्यते ॥७९॥

Definition would be secondary in the case of the levels between the two finals; so also, there is noticed among them the use of the word signifying 'what has a form' and 'what does not have a form'. [79]

मुख्यवृत्तिग्रहायातो व्यापिलक्षणसिद्धये ।
क्षित्यादिवियदन्तं स्यान्मूर्तामूर्तस्य लक्षणम् ॥८०॥

Therefore, for accepting the primary function (of the words) and for achieving an all-pervasive definition, the definition of what has a form and what does not have a form should be what begins with the Earth and ends in the Sky. [80]

This is the end of Bhartṛprapañca's view.

योऽयं दक्षिणेऽक्षत्रिति शास्त्रदृष्टत्वकारणात् ।
दक्षिणेऽक्षणि लिङ्गस्य विशेषः कश्चिदिष्यते ॥८१॥

[Now follows the purport of the specific statement *yo 'yaṃ dakṣiṇe akṣan*]

The Śruti statement 'This one who is noticed in the right eye' is made because it is seen by the scripture. Here is understood (lit. desired) some special aspect of the subtle (form of the Brahman). [81]

वीर्यवद्दक्षिणं लोकेऽप्यङ्गं दृष्टं यतस्ततः ।
दक्षिणेऽक्षत्रिति वचः श्रुतेर्यत्नादिहेष्यते ॥८२॥

Since it is noticed in the world that the right part (of a body) is powerful, therefore, in this (context), the statement of the Śruti *dakṣiṇe 'kṣan ...* is accepted with purpose. [82]

Now follows the discussion of BU 2.3.6.

पिण्डप्राणविभागेन ह्यध्यात्मे चाधिदैवते ।
मूर्तामूर्तात्मनोरुक्तो विभागो ब्रह्मरूपयोः ॥८३॥

(Thus) by the division of the body and Prāṇa in relation to physical sphere and sphere of gods there is given division of the two forms of the Brahman which are having a form and not having a form. [83]

अथाधुना यथोक्तस्य तस्यैव करणात्मनः ।
लिङ्गस्य रूपं वक्ष्यामो वासनामयमात्मनः ॥८४॥

Now we shall state the form of the subtle form of the Ātman within, which is already mentioned and which is of the nature of impressions. [84]

मूर्तामूर्तादिसंबन्धाद्वासना लिङ्गमाश्रिताः ।
स्वाभासभ्रमदोषेण तन्मयः पुरुषो मतः ॥८५॥

Impressions have clung to the subtle form of the Brahman owing to their connection with what has a form and what does not have a form and owing to the fault consisting in the error of (seeing) the sentient being in its own appearance, it is taken to be full of them, i.e. the impression. [85]

अनेकवासनाचित्रं तल्लिङ्गं पटभित्तिवत् ।
मायेन्द्रजालसदृशं व्यामोहास्पदमात्मनः ॥८६॥
एतावन्मात्रमेवेति यत्र भ्रान्ता निरागमाः ।
विज्ञानवादिनो बौद्धास्तथा नैयायिकादयः ॥८७॥
आत्मनो द्रव्यभूतस्य यदेतद्वासनात्मकम् ।
रूपं गुणोऽस्य संसार इति वैशेषिकादयः ॥८८॥

That subtle form of the Ātman is variegated by numerous impressions like a picture-scroll on the wall; it is similar to a magic show and is subjected to delusion, [86]
and with reference to which the Bauddhas of the school of

Vijñānavāda who do not follow Vedas and also the Naiyāyikas, who (i.e. both of whom) are mistaken, hold this one¹ to be only this much² [87]

(and have understood) this Ātman, which is (already) a *dravya* 'matter' as having a form and properties, viz. its transmigratory existence, constituted by what is impression.³ The Vaiśeṣikas (also are similarly mistaken). [88]

¹Namely, the *linga* in verse 84 above.

²That is, *buddhimātram*, *ahanvṛttiviśiṣṭa*, *svarasabhaigura* and *rāgādikaluṣa* and not another that is *sthāyin*. In the case of the Bauddhas, they hold it to be momentary.

³SP: *tadīyabhrāntiṃ prakāṣayati* which NKL clarifies as *tārkikabhrānti*. This connects *vaiśeṣikādayaḥ* with *bhrāntāḥ*.

त्रिगुणं सत्प्रधानस्थं पुरुषार्थेन हेतुना ।
प्रवर्तते स्वतन्त्रं सदिदमित्यपि कापिलाः ॥८९॥

And Sāṃkhyas also¹ have said that this is but the independent existent (being) which proceeds to activity for the achieving of its end, resting on the Pradhāna made up of three *guṇas*. [89]

¹Construe: *kāpilāḥ api*.

Sureśvara cites the view of *Bhartrprapañca* whom he blames as 'not a true knower of Vedānta' in verses 96-104ab.

अप्यौपनिषदमन्याः केचिदत्यन्तनैपुणात् ।
प्रक्रियां रचयित्वाहुर्वेदान्तार्थाविपश्चितः ॥९०॥

And also some thinkers,¹ who have really not known the nature of Vedānta and who have considered themselves as followers of the Upaniṣads,² have developed some kind of system with great skill! [90]

¹This is a mockingly regardful description of, or with reference

to Bhartṛprapañca.

²That is, the words which constitute the so-called theory of Vedānta.

यावान्बाह्यो विकारः स्यात्क्षेत्रज्ञपरिवेष्टनः ।
अध्यात्मं चाधिदैवं वा नामरूपविभागतः ॥९१॥
अव्याकृताद्व्याकृतः स्यादेतावानेव सोऽत्र तु ।
मूर्तो वा यदि वामूर्तः सच्च त्यच्चेति भण्यते ॥९२॥

Whatever be the external modification is ¹ all here, whether having a form or not having a form, is called *sat* and also *tyat* and that one which is wrapped by the self within (lit. the knower of the field) whether in relation to the body or to the sphere of deities, and divided into name and form and which has become as the modified from the unmodified, is here ² only this much. [91-92]

This explains the *prakriyā* mentioned in the preceding verse.

¹*syāt* = *asti*.

²That is, *etāvān* referring to the Ātman described earlier as *mūrta*, *amūrta*, *sat* and *tyat*.

प्राणानामपि सत्यत्वं भूतसत्याभिसंगतेः ।
कथं यतस्त्वमी सर्वे प्राणाः क्षेत्रज्ञलक्षणाः ॥९३॥
अनामरूपकाः सन्तः सत्यसंयोगहेतुतः ।
देहिनः प्राणवत्साक्षात्संवृत्ता नामरूपिणः ॥९४॥
निदेशाय च कल्पन्ते प्राणा वा इति नान्यथा ।
तदत्र निखिलं सत्यं श्रुत्या संशोधितं स्फुटम् ॥९५॥

prāṇas are also described as being the *satya* 'truth', because they are associated with the elements that are the *satya*. (Someone asks:) How? (The answer is:) Since the *prāṇas* are modifications (or adjuncts) of the knower of the field and, having no name and form, they exist on account of their connection with the truth (viz. the organs) as the organs of

the embodied and they become perceptible (and come to) have name and form and become fit for the description that they are now *prāṇas* (and are) not otherwise and all this is the whole truth, clearly presented to us by the Śruti. [93-94-95]

This is Bhartṛprapañca's explanation of *prāṇa vai satyam ... satyāya satyam*. The first *satya* refers to the elements which later on become the second *satya*, viz. *prāṇas* 'organs'. Thus, this is the explanation of what appears as creation and which is different organs of a human body. This is a kind of system that Bhartṛprapañca suggested.

व्याविद्धसत्यराशेः स्याद्विज्ञानात्मन एव तु ।
स्वरूपं यत्तदधुना वक्तव्यमवशिष्यते ॥९६॥

But that nature of the inner self which has thus appeared¹ from the entire mass of truth is now left to be explained now. [96]

Verses 93-95 have described the modifications of Vijñānātman and in what follows in verses 97-99 is the description of Vijñānātman.

¹*vyāviddha* = *vyākṛta* of verse 92 above.

तत्रैतस्यामवस्थायां विभागो विनिवर्तते ।
अयं भोक्ता विज्ञानात्मा तथा दैवतिकास्त्वमी ॥९७॥
विज्ञानात्मान इत्येष भेदहेतुनिवर्तनात् ।
यत आधारगो ह्येष नामरूपादिलक्षणः ॥९८॥
विशेषो न स्वतस्तच्च नामरूपादि शोधितम् ।
संशोध्य तदिदं सर्वं विज्ञानात्मा प्रदर्श्यते ॥९९॥

There, i.e. in this state of Vijñānātman, any division¹ ceases to exist; namely, this one is the enjoyer and this one is the inner self and these are (different) deities. [97]

Since the cause of (any) difference is set aside by the word *vijñānātmanah*, since this specification depends on some basis

which has a form and name and form, it does not exist on its own account, therefore that name; and the form (of any modification) was explained (by the Śruti)—therefore, thus having described all that (only) as Vijñānātman is shown.[98-99]

In verses 93-95 the division meant the enjoyer of the means to enjoyment and also different deities related to them; thus the division does not differ there.

Sureśvara uses *daivatikāḥ* for *devatāḥ*.

¹Namely, different organs, *vibhāga*.

सर्वेषामपि तेनेदं समानं लक्षणं भवेत् ।
क्षेत्रज्ञानां विशेषोऽत्र यतो नैवोपपद्यते ॥१००॥

Therefore, this is the description of all the knowers of the field, for the reason that there does not appear to be any (reasonable) distinction between one and another of them.

[100]

Here, Bhartṛprapañca appears to consider, like the Sāṃkhyas, that there are many Puruṣas that are similar to one another.

एतस्य पुरुषस्येति रूपं निर्दिश्यतेऽधुना ।
पुंसो रूपमुपक्षीणं मूर्तामूर्तसमाश्रयम् ॥१०१॥

And now is described in the words *etasya puruṣasya* the form of the Puruṣa, since all that, which pertains to (lit. depends on) what has a form and what does not have a form is so far fully explained (lit. exhaustively stated).

[101]

This is the explanation of *taṣya haitasya puruṣasya vijñānātmano rūpaṃ nirdiśyate*.

येन त्वस्य विशेषेण विज्ञानात्मत्वमिष्यते ।
विभज्यमानस्य सतः परस्मादात्मनोऽद्वयात् ॥१०२॥
अपाञ्चभौतिकं रूपमिह तन्निर्दिदिक्ष्यते ।
यथेति माहारजनं वासनोपचयात्मकम् ॥१०३॥

तस्य हैतस्य संबन्धमेवं केचित्प्रचक्षते ।

Here is now sought to point out that the form of the Ātman, which is not comprising five elements (and) whereby, i.e. by what specification is understood the nature of it as the inner self, i.e. being distinguished from the highest self which is without (any) duality. In the words *yathā māhārajanam* ... that is (described as) comprised of mass of impressions.¹ [102-103]
Thus do some explain the relation of the statement *tasya haitasya* (with *yathā māhārajanam* ...) [104ab]

¹The earlier parts of these verses (viz. 101ff.) clarify *samānam lakṣaṇam kṣetrajñānām* in the preceding verse (i.e. verse 100). The last quarter of verse 103 refers to the passage in BU which Bhartṛprapañca holds as the proper introduction of the description of Vijñānātman.

In verses 104-111, Sureśvara discusses the wrong in Bhartṛprapañca's view on the connection of tasya ha ... which is mentioned in verse 103.

तदयुक्तं यथान्यायस्तथायमभिधीयते ॥१०४॥

(But) that is not proper, since it is an improper explanation.
(How this is) we shall now say (in the following). [104cd]

This is Sureśvara's remark of the non-acceptance of the view which is stated so far.

पुष्पादिवासनानां हि वस्त्रादिष्वेव संगतिः ।
सजातीयेषु नियता दृश्यते नान्यजातिषु ॥१०५॥

In the case of fragrances (lit. impressions) of flowers etc. they necessarily continue to be resting only in the garment etc. which are similar in kind and they are not seen in those which belong to other (kinds). [105]

This is to state *ātmā na vāsanāśrayaḥ*. In the first line, Sureśvara refers to flowers and similar things (*dravyas*), which means some specific things. These are in contrast with individual selves (not *dravyas*) that are not of the kind of flowers (*sajātīya*) and therefore the argument about the impressions, which is adduced, cannot apply to the subtle inner self. Cf. verses 117-118 below.

द्रव्येऽपि न खलु व्योम्नि वासना काचिदीक्ष्यते ।
अद्रव्ये चासजातीये चैतन्ये वासना कुतः ॥१०६॥

Though sky is a *dravya*,¹ there is not noticed any impression on it; therefore, how can there be impressions on sentience which is not *dravya*, and which is not of the same kind (of a flower etc.)? [106]

The argument in verse 105 is clarified here further even in the case of the sky which is not of the same kind (*vijātīya*) as the flower there is not any impression noticed therefore the second line follows by *kaumutikanyāya*.

¹So in Nyāya terminology.

वासनाकारतां गच्छेच्चैतन्यं चेत्कपालवत् ।
वासनानिष्फलत्वं स्याच्चैतन्यादपृथक्स्थितेः ॥१०७॥

If it is held that sentience (*jīva*) assume the form of impression(s), it would be like a potsherd;¹ therefore, since sentience remains apart from them (viz. various parts of a body), there would not be any result produced by impressions. [107]

This sets aside the notion that impressions (*vāsanās*) are non-distinct from the Ātman.

¹That is, perishable, or, liable to destruction.

न हि श्रोत्रोत्थविज्ञानं रूपवासनयाञ्ज्यते ।
विषयत्वाविशेषेऽपि कुतोऽसङ्गत्वतश्चित्तेः ॥१०८॥

Indeed, knowledge that arises from ears (etc.) cannot be marked¹ by impressions of the form, even if the two² are not distinct, objects of perception that they are; how then can sentience (be by marked impressions) since it has no contact with any organs? [108]

This is for setting aside an alternative notion that impressions are distinct from the Ātman.

¹NKL reads *añcyate* for *añjyate*.

²Namely, knowledge mentioned and impressions.

षड्भावविक्रियाणां च निषेधश्चेतनात्मनः ।
असङ्ग इति चाप्युक्तिरसकृच्छ्रयते श्रुतौ ॥१०९॥

Also, there is denial, in the case of the sentient Ātman, of the six modifications of becomings (objects);¹ for the statement (about the Ātman that) it is not having a contact (with any other thing) is several times heard. [109]

Thus blame is given to Bhartṛprapañca that his theorization is opposed to the Śruti. It states that sentience is immutable (*kūṭastha*) and it cannot be in contact with impressions.

¹These refer to the six modifications stated in *Nirukta* 1.2.

भूतसंयोगतः प्राप्तं न च तत्पाञ्चभौतिकम् ।
इति ब्रुवाणो लोकेऽस्मिन्हस्यते बालकैरपि ॥११०॥

In this world, one who postulates that (a thing) is obtained from conjunction of elements and it is still not made up of those five elements, is scoffed at even by children. [110]

मूर्तामूर्तीविभागेऽस्य विभागो विनिवर्तते ।
इति स्वोक्तमविस्मृत्य वासनाभेदगीः कथम् ॥१११॥

How can there be the statement about the variety of impressions by one who has forgotten his own statement,¹

viz. that there does not remain any division in the case of this one, even if division of it into what has a form and what does not have a form (has been already made by the Śruti)? [111]

This is to blame Bhartṛprapañca for the fault of self-contradiction. This is noticeable from verse 87 above which accepts the *bhokṛ-bhogyā* division. The argument thus pertains to the *bhokṛ-bhogyā* relation consequent upon *mūrta-amūrta* division of the Brahman—here, Jīva is meant.

In verses 112-124, Sureśvara gives an exposition of Bhartṛprapañca's view on the prakriyā mentioned in verse 90 above.

रचयन्ति तथासाध्वीं प्रक्रियां न्यायवर्जिताम् ।
मूर्तामूर्तात्मको राशिरेको बाह्यः किलेष्ट्यते ॥११२॥
उत्तमः परमात्माख्यो राशिरत्राभिधीयते ।
मध्यमोऽयं तृतीयस्तु ताभ्यां राशिः प्रयोजकः ॥११३॥

Thus, (the scholars)¹ develop into a proper system which is devoid of reasoning: They¹ accept that there is one mass consisting in what has a form and what does not have a form; (this is) accepted (as lying) outside (the teaching of Śruti) [112]

and there is then stated (in their theory) a second² mass called the highest Ātman; and this third one apart from them, called Madhyama is proposed by them as causing³ the two (masses). [113]

¹This refers to Bhartṛprapañca in plural, which is out of mock respect.

²This is for *uttama*.

³Cf. NKL: *prayojakah utpādakah mūrtāmūrtarāśeḥ*.

पाणिपेषोत्थितेनायं कर्त्रा भोक्त्रा सहात्मना ।

भावनाज्ञानकर्मादिसमुदायः प्रयोजकः ॥११४॥

मूर्तामूर्तादिराशिस्तु प्रयोज्यः साधनं तथा ।

तार्किकैः सह संधिं च चिकीर्षन्ति यथाबलम् ॥११५॥

This one (viz. the Madhyama) is the cause (lit. producer), together with the agent, the enjoyer, viz. the Ātman who has risen (from sleep) due to the shaking by hand, a mass of impressions, knowledge, activity etc.¹ [114]

The (entire) mass of what has a form and what does not have a form etc.² is to be set to activity (*prayojya*) and also the means of activity; and they³ make an agreement with the logicians according to their capacity (strength of mind). [115]

Cf. SP citing (possibly Bhartṛprapañca's statement): *sa eṣa vidyākarma pūrvaprajñārūpo 'sya karmaṇo bāhyaṃ mūrtāmūrtaṃ sādhanam yad upādāya kāryakaraṇavato bhogasiddhir iti rāśi-trayaṃ kalpayitvā kalpanāntaram api kurvantīti*. For clarification of Sureśvara's cryptic explanation, refer to BUB: *kartrā bhoktrā vijñānamayenājātaśātrupratibodhitena saha vidyākarmapūrvaprajñā-samudāyaḥ prayoktā karmarāśiḥ prayojyaḥ pūrvokto mūrtāmūrta-bhūtarāśiḥ sādhanam ceti*.

¹The word etc. refers to attachment (and other feelings (?)).

²The word etc. refers to *martya*, *amṛta*, *sthita*, *sat* and *tyat*.

³Referring to Bhartṛprapañca.

अयं प्रयोजको राशिलिङ्गमेव किलाश्रितः ।

इत्युक्त्वा सांख्यत्वभयात्कल्पयन्ति ततोऽन्यथा ॥११६॥

This mass, which causes the (i.e. sets to) activity (the other mass, viz.) the *linga* has resorted to the subtle form (of Hiranyagarbha) and thus then they are a little apprehensive of being called as Sāṃkhyas and therefore explain (the idea) in yet another way. [116]

The argument is: The statement *karmarāśir lingāśritaḥ* would

mean acceptance of the Sāṃkhya view. Therefore, the exponent of the view explains his opinion in the following verses, in the way the logicians do.

गन्धः पुष्पाश्रयो यद्वत्पुटमाश्रित्य तिष्ठति ।
कुसुमापागमेऽप्येवं लिङ्गस्था वासनात्मनि ॥११७॥

As fragrance residing in a flower remains after resorting to its wrapper¹ even after the flower has disappeared, in the same way, impression which resides in the subtle form (viz. *liṅga*) stays in the Ātman. [117]

Cf. verse 105 above. Read a note by the editor of the NKL edition: *liṅgāśritā vāsanā ātmānam āśrayate puṣpāśrito gandhaḥ puṣpaviyoge 'pi putatāilam iva. liṅgād āgatena saḡuṇo bhavati paramātmāikadeśaḥ svato nirguṇo 'pi. sa vijñānātmā badhyate mucyate ca iti kalpanayā tārīkasaṃvādam api kurvanti iti samudāyabhāvaḥ. This explains anyathā kalpayanti.*

¹Cf. note 1 on verse 159 below.

वासनाकामकर्माणि लिङ्गस्थान्येव नात्मनि ।
लिङ्गादात्मानमायान्ति गन्धो गन्धपुटं यथा ॥११८॥

Impression, desire and activity are all residing in the subtle form (of the Vijñānātmā) and not in sentience proper; they come to the Ātman from the subtle form in the same way as the fragrance (of the flowers) to what has wrapped the fragrance, i.e. the flower. [118]

This is amplification of verse 117.

निर्गुणोऽपि परैकांशो बहिरभ्यागतेन सः ।
कर्मणा सगुणः साक्षाद्भवतीति प्रचक्षते ॥११९॥
ततश्च कर्ता भोक्ता च बध्यते मुच्यते तथा ।
विज्ञानात्मेति कणभुवि च तमेवं समाश्रिताः ॥१२०॥

Then this portion of the highest self, though it does not have

any properties, seems to be possessed of properties by the external adventitious activity—thus do they explain. [119]

And from that it (viz. the Vijñānātman) becomes the agent (of the activity) and the enjoyer (of the result), it gets bound and becomes released. Thus have they taken recourse to the thought of Kaṇāḍa. [120]

भूतराशेरगाल्लिङ्गं कर्मराशिः सकाशतः ।
 लिङ्गादात्मानमागात्स लिङ्गसंबन्धकारणात् ॥१२१॥
 कृष्णशक्तिरविद्यापि परस्मादेव सोत्थिता ।
 विकृत्य परमात्मांशं विज्ञानात्मनि तिष्ठति ॥१२२॥

The entire mass of activity has come from the mass of elements and then owing to its association¹ with the subtle (of the Vijñānātman) it has proceeded from the subtle form to the Ātman (i.e. sentience). [121]

The power of (Lord) Kṛṣṇa which is but ignorance (i.e. which has in reality) arisen from highest (Ātman) and, modifying the portion of the highest Ātman, it remains there in the individual self. [122]

It appears that Sureśvara is feeling the thought of Vaiṣṇava and seeks to explain it in the same way as the logicians.

¹It literally means nearness, a kind of *tadātmya* as it were.

यथोषरात्मको दोषः पृथिव्या एव जज्ञिवान् ।
 क्षमैकदेशं विकृत्यास्तेऽविद्या तद्वत्परात्मनः ॥१२३॥

As one has known that the barren land which is but a defect of the (entire) earth, has affected only a part of the earth; so also ignorance (affects only a portion) of the highest self.

[123]

This explains how *avidyā* affects only a Jīva which is but a part of the highest Ātman, even if it (viz. *avidyā*) rises from it (i.e. Ātman). The view of the Sāṃkhyas is understood from Bhartṛprapañca's holding *karmarāśi* as *antaḥkaraṇadharmā* and

avidyā as *anātmadharma*.

अनात्मधर्मोऽविद्येति वदन्तश्चोषरादिवत् ।
इत्येवं सांख्यसिद्धान्तमनुवर्तन्ति संभ्रमात् ॥१२४॥

Thus, saying that ignorance is a property of the non-Ātman, like a barren land etc. (of the entire earth), they are really following¹ the doctrine of the Sāṃkhyas, owing to some confusion.² [124]

Sureśvara points out that Bhartṛprapañca, though he follows the way of Naiyāyikas' argument, follows in reality the Sāṃkhyas.

¹*anuvartanti* is in Vedic style for *anuvartante*.

²That he follows the doctrine of the Sāṃkhyas results only from confusion, for it is already stated that Bhartṛprapañca has chosen to follow the logicians.

In verses 125-137, Sureśvara controverts Bhartṛprapañca's notion of the prakriyā running through verses 112-124.

नैवं कल्पयितुं युक्तं वेदसिद्धान्तबाधनात् ।
पुरापि चैतदुदितं यथा वेदान्तबाधनम् ॥१२५॥

It is not proper to think like this, because it involves contradiction with the established doctrine of the Veda; and as to contradiction to the Vedānta, we have said earlier.¹

[125]

¹NKL calls it *vṛddhavicāra* and SP, *bṛhadvicāra*, which is the same as the thought expressed in the SV 181ab-184.

सकलत्वे परस्योक्ताः संसारित्वादिलक्षणाः ।
दोषाः सर्वेऽपि चायान्ति प्रत्यगात्मानमेकलम् ॥१२६॥

By the acceptance of the highest self as comprising the whole (world), there come to be attached to the inner self which is just alone, all the faults characterized as being transmigratory

etc.

[126]

This clarifies the idea in verse 125cd above.

क्षेत्रज्ञस्य च संभितौ परस्मादात्मनः स्वतः ।
एकत्वसंभवोऽत्यन्तं क्षेत्रज्ञपरमात्मनोः ॥१२७॥

If the knower of the field is taken to be different from highest Ātman, then there follows of itself the utter impossibility of the uniqueness of the highest self and of the knower of the field.

[127]

This thus leads to opposition to Śruti; refer to the well-known Mahāvākya *tat tvam asi*.

अथोपचारतो देशो लिङ्गमेवात्मनो मतः ।
न तदा लिङ्गविध्वस्तौ वासनात्मनि युज्यते ॥१२८॥

If (however) one understands by metaphor that the subtle form (of the Vijñānātman) is the part of the Ātman, then there would not remain (any) impression in the Ātman, when the subtle form (of the Vijñānātman) is destroyed.

[128]

This argument proceeds from a possible supposition that the *linga* is a part of the Ātman itself. The supposition can be answered away in the following statement: *lingābhāve 'pi lingasthā vāsanā jīve tiṣṭhati iti svaśāstrāsiddhiḥ*.

न्यायः पुरोदितो योऽत्र वासनासंश्रयं प्रति ।
स सर्वोऽत्रानुसंधेयः पूर्वपक्षापनुत्तये ॥१२९॥

And the reason¹ stated before as regards the (Ātman) being related to impression has to be remembered fully (here) for the refutation of the *prima facie* view.

[129]

This sets aside the notion that *vāsanā* rests in the Ātman.

¹Refer to verses 106 and 117 above.

उत्थानं चाप्यविद्यायाः परस्मादात्मनः स्वतः ।
ऊषरादिवदित्यादिकल्पना नोपपद्यते ॥१३०॥

So also the notion about the rise of ignorance from the highest Ātman itself like the notion of (the earth being affected by) a barren land cannot stand to reason. [130]

अनिर्मोक्षप्रसक्तिः स्याद्यद्यविद्या परात्मनः ।
निरात्मवादसक्तिश्च मोहोच्छेदे भवेदिह ॥१३१॥

Further, there would result absence of liberation, if (it is posited that) ignorance belongs to the highest Ātman and, when infatuation is removed, there would only result the theory that there is no Ātman. [131]

This points to undesirable results which arise from accepting *avidyā* to rest in the highest Ātman.

वास्यदेशातिरेकेण वासनाया न चेष्यते ।
देशान्तरोपगमनं गुणवद्द्रव्यवर्जनात् ॥१३२॥

It is not accepted that an impression shifts from one region to another which is different from where that (impression) existed (earlier) even like a property (moving to another substance) after leaving one substance. [132]

A property of a thing is innate in it; it does not leave that thing and go to another. Similarly an impression does not leave one abode and move to another. This argument was evoked by the illustration of fragrance of a flower stated earlier.¹

¹Cf. verse 118 above.

सामञ्जस्येन गच्छन्ति न च श्रुत्यक्षराण्यपि ।
यथोक्तकल्पनायां हि न युक्ता तेन कल्पना ॥१३३॥

Since (*hi*) by accepting the theory (of Bhartṛprapañca) stated

earlier, the statements¹ in the Śruti also do not get properly understood;² therefore, that theory is not reasonable. [133]

This is one more reason for holding that *vāsanā* cannot have a support in the Ātman. In this and the next two verses, a reference is made to Śaṅkara that was opposed.

¹It literally means: letters.

²That is, 'they do not go well with reason'.

कामः संकल्प इत्याद्या मनसो धर्मिणः श्रिताः ।
धर्मा न त्वात्मनः शास्त्रे ह्यसङ्गो हीति वारणात् ॥१३४॥

Desire, resolution etc. are properties heard in the scriptures as belonging to *manas* which has (those) properties and not of the Ātman, because in the scriptural text *asaṅgo hi ...*¹ there is clear denial (of any property). [134]

Cf. BU 1.5.2 for *kāmasaṅkalpa*.

The words *manas*, *hṛdaya* in the following verse are used for the Ātman. NKL: *uktaśrutigatamanohṛdayādisabdānām ātmavacanatvāt* (note on NKL:) *ātmā ucyate anena iti vyutpattyā ātmabodhanatvād ity arthah*.

¹Cf. BU 4.3.15: *asaṅgo hy ayaṁ puruṣa iti*.

हृदये ह्येव रूपाणि ध्यायतीवेति चापरम् ।
कामा येऽस्य हृदीत्यादि तीर्णो हीति तथा वचः ॥१३५॥

'Only in the heart does he ponder over, as it were, the forms' is another (statement), so also is there the sentence 'He has indeed crossed over those desires which are in his heart'. [135]

श्रुतादर्थान्न चान्योऽर्थो यथोक्तवचसां यतः ।
सम्यक्कल्पयितुं शक्यः कल्पनातो न युज्यते ॥१३६॥

Since it is not possible to consider the meaning of the sentences quoted above as other than what can be the meaning heard from Śruti; therefore, the theory (of Bhartṛprapañca) is not

reasonable.

[136]

प्रत्यग्ब्रह्मत्वसिद्धयर्थं सर्वैवोपनिषत्त्वियम् ।
तावन्मात्रपरत्वेन वेदान्तानामुपक्षयात् ॥१३७॥

And in fact this entire Upaniṣad is for establishing that the inner self is but the Brahman; therefore, all the Vedas do culminate in only that much as the instrument. [137]

In other words, the Vedas do not say any more than the *pratyagbrahmatva*.

There follows now the refutation of three different masses proposed by Bhartṛprapañca.

राशित्रितयपक्षे च नाप्यर्थोऽत्र समञ्जसः ।
क्रियते कल्पना येन सर्वन्यायविरोधिनी ॥१३८॥

And also the meaning (of the Śruti) is not reasonably understood (*samañjasa*), if the theory of three groups (*rāśis*) is accepted, (for) thereby¹ is accepted a notion which is opposed to all reason. [138]

¹That is, in that theory, viz. the word *vāva*.

द्वे एव तु यदा रूपे मूर्तामूर्ते सवासने ।
ब्रह्म रूपि तृतीयं च तदा वावेति युज्यते ॥१३९॥
ब्रह्मैकदेशभूतस्य विज्ञानात्मन एव ते ।
रूपे इति तदा युक्तं कल्पनानुगुणं वचः ॥१४०॥

If it were that there were only two forms, having a form, and not having a form together with the impressions and, therefore, the Brahman were the third, viz. as having the two forms, only then the word *vāva* (in BU) would be reasonable.

[139]

And when it held that the two forms¹ belong to the *Vijñānātman* which has been only included in the Brahman,

only then the statement 'the Brahman has only two forms' would be in conformity with the theory. [140]

¹Cf. verse 126 above.

विज्ञानात्ममुखेनाथ यदि वा परमात्मनः ।
रूपे इति तदावक्ष्यच्छ्रौती चेत्कल्पना भवेत् ॥१४१॥

Or, if the two forms¹ were to be of the highest Ātman through (their being the forms of) Vijñānātman, then one could have said that the theory is enunciated by the Śruti. [141]

Hereby Sureśvara suggests that this is not so stated by Śruti.

¹Namely, *mūrta* and *amūrta*.

द्विवचश्च तथायुक्तं त्रैरूप्यस्येह संभवात् ।
मूर्तामूर्ते च द्वे रूपे तृतीयं वासना यतः ॥१४२॥

And thus statement of the two (forms) would have become unreasonable, since here (in the Śruti) there could be (contingent) the existence of three forms: thus, the two forms, viz. what has a form and what does not have a form, and the third (i.e.) impression. [142]

The argument is: The word *vāva* for specification (*avadhāraṇa*) would then be improper or unreasonable.

मतं मूर्तेतरे रूपे ब्रह्मणोऽभिमते सदा ।
क्षेत्रज्ञस्य तु नैवैते वासनामात्ररूपितः ॥१४३॥
तदापि जीवद्वारेण विक्रियां व्रजतो विभोः ।
वासनाद्यभिसंबन्ध इतीयं गीरनर्थिका ॥१४४॥

It may be held that the two forms *mūrta* and the other (i.e. *amūrta*) are of the Brahman and not of that knower of the field, since it is only of the nature of impression(s).¹ [143]
(But) in that case also, the all-pervasive would be undergoing

modification through the individual self and, therefore, the statement that it is connected with impression would be meaningless. [144]

The argument in verse 143 proceeds from the acceptance of *vāsanā* as the form/nature of Jīva (i.e. *jīvarūpa*). And that in verse 144 proceeds from the contingency of *vāsanās* being related to the Brahman through a Jīva thus disproving *mūrta* and *amūrta* as being two forms of what undergoes modification, viz. Jīva.

¹The word *vāsanāmātrārūpitaḥ* is for *-rūpitvataḥ*.

वासनानामपि यतो न विशेषो मनागपि ।
क्षेत्रज्ञद्वारतायाः स्यादसत्तस्माद्विकल्पितम् ॥१४५॥

This is so because even impressions do not even slightly differ (from *mūrta* and *amūrta*); therefore this notion (about) impressions through their relation to the knower of the field is wrongly conceived. [145]

This adduces the reason for the argument in the preceding verse.

वस्तु वस्त्वन्तरत्वेन न च विक्रियतेऽञ्जसा ।
वृत्त्येह मुख्ययेत्येवं शक्यो वक्तुं जगत्पि ॥१४६॥

And it does not smoothly follow that in this world one thing gets modified through (the modification of) another; it is not possible to state so in the primary meaning of the words. [146]

This argument is against the notion that Jīva is distinct from the highest Brahman.

वस्त्वन्तरं न च मतः क्षेत्रज्ञः परमात्मनः ।
सिद्धान्तहानिरेवं च कल्पनायां ध्रुवं भवेत् ॥१४७॥

And the knower of the field is not accepted as a thing different

from the highest Ātman. Therefore, there is thus in this theory (of Bhartṛprapañca) the discarding of the doctrine of Vedānta.

[147]

This argument is based on the acceptance of Jīva as not different from the Brahman.

आविश्चकीर्षुभिस्तस्माद्वेदान्तार्थं महात्मभिः ।
ईदृशी कल्पनायुक्ता कृतं परहितार्थिभिः ॥१४८॥

Therefore it is unreasonable to hold the theory on the part of those who desire to clarify the meaning of Vedas and thereby achieve the well-being of others.

[148]

This is concluding that Jīva serves as the substratum for *karma* etc. and that there can be postulated three masses.

Now follows the explanation of the word *tat* in *tasya haitasya* which is accepted by Sureśvara.

दक्षिणेऽक्षन्पुमानिति लिङ्गात्मा परिगृह्यते ।
अध्यात्मेऽथाधिदैवे च तस्यैव प्रकृतत्वतः ॥१४९॥

In the words (of the Śruti) *dakṣiṇe akṣan* ... it is the subtle form (of the Ātman), viz. the man, that is understood with reference to the body and also to the sphere of deities, because that itself is under reference.¹

[149]

¹Cf. *ya eṣa* ... in this context.

जीवग्रहोऽत्र नन्वस्तु प्रकृतत्वाविशेषतः ।
तस्यैवैतानि रूपाणि कस्मान्नेत्यभिधीयताम् ॥१५०॥

(One might argue:) Let there be here accepted (a reference to) the individual self, since in the matter of being relevant it is not different;¹ then why could it not be said that these² are but its³ forms?

[150]

¹That is, it is also under reference.

²This refers to impressions.

³That is, of the individual self.

नैवंरूपितया यस्मादिह श्रुत्या विवक्षितः ।
क्षेत्रज्ञः करणात्मैव तस्मादिह विवक्षितः ॥१५१॥

(The answer is:) This is not so, since the knower of the field is not here intended by the Śruti as having this nature;¹ therefore, here is intended only (that knower of the field) who has the nature of the deities. [151]

In verse 150 Jīva refers to the Vijñānātman possessing impressions and in verse 151 Kṣetrajña is understood as not tainted by any impressions, that is to say, it is not different from the Brahman.

¹That is, having *vāsanās* as its nature.

वासनानुगतं लिङ्गं मृद्वन्मृद्विक्रियात्मसु ।
चेत्यते साक्षिणा यस्मान्नातः क्षेत्रज्ञरूपिता ॥१५२॥

Since the subtle form (=Jīva), associated with impressions is revealed by the seer (=Kṣetrajña) just as clay is revealed in what are various modifications of clay, therefore (Jīva) does not have the character of Kṣetrajña. [152]

This explains why the Jīva (which is really not different from the Ātman) does not have the nature of being affected/characterized by *vāsanās*. And it is argued that they belong to what is *citta*, a false 'modification' of the Brahman.

माहारजनमित्यादि रूपं चेत्साक्षिणो भवेत् ।
नेति नेतीत्यथादेशं नाकरिष्यत्तदात्मनः ॥१५३॥

If in the words *māhārajanam* ... there was intended the expression of the form of the seer,¹ Śruti would not have

given the instruction (about the Brahman) in the words *neti neti*. [153]

Here is suggested that opposition of the Śruti to the objector's argument.

¹That is, the Ātman.

अन्यस्यासौ न चादेशः शक्यो वक्तुं प्रमाणतः ।
नेति नेतीति तस्यैव षष्ठान्त उपसंहृते ॥१५४॥

And that instruction *neti neti* could not have been expressed with reference to another¹ in an authoritative way further, in the end of the sixth chapter² since the conclusion there is only in reference to that itself (viz. the seer).³ [154]

¹That is, other than the seer.

²The sixth, the traditional counting of chapters, means the fourth chapter. Refer to BU 4.4.22.

³The word in fourth chapter is the Ātman.

व्येव त्वेति प्रतिज्ञाया अर्थवत्त्वं तथा भवेत् ।
पाणिपेषोत्थितस्यैव यद्यादेशो भवेदयम् ॥१५५॥
पाणिपेषोत्थितोऽन्यश्चेन्नेतीति च ततोऽपरः ।
अन्योऽसाविति मिथ्या धीस्तदा स्यान्मोहकारणात् ॥१५६॥

Only in that way there will be meaningfulness of the enunciation *vy eva tvā*¹ If this instruction were of the one who is awakened by shaking by the hand, [155]
and, as a result, if that one, viz. awakened by shaking by the hand, were not different from that other than that then there would arise false knowledge owing to delusion. [156]

This is to assert that *neti neti* ... is the instruction about the inner self only (verse 155) and the same is asserted again (in verse 156) by way of *vyatireka*.

¹Refer to BU 2.1.15.

न स्यादात्मानमेवावेदहं ब्रह्मेतिमानजा ।
सम्यग्धीर्निखिलध्वान्तघातिनी मुक्तिदायिनी ॥१५७॥

Further (i.e. in that case), there would not arise the right knowledge from an authoritative means (i.e. the Śruti statement *neti neti*), (the awareness:) I have known the Ātman, (and) I am Brahman, which destroys the entire darkness (i.e. ignorance) and effects liberation. [157]

This is to point out yet another fault in Bhartṛprapañca's theory.

करणात्मन एवातस्तस्य हेति ग्रहो भवेत् ।
न तु तत्साक्षिणो युक्तस्तस्य रूपनिषेधतः ॥१५८॥

Therefore, there can be in the words *tasya ha* the mention only of that *kāraṇātman*.¹ And it is not proper to be that of the seer, since there is denial of (any) form² of that. [158]

Cf. verse 151 above.

¹This refers to *citta*, as noted under verse 152 above.

²That is, a body and its organs which come to have some knowledge.

वासना भूरिरूपास्ता लिङ्गस्था लिङ्गसाक्षिणः ।
कुर्वन्ति बहुरूपत्वं मणेरस्तरणं यथा ॥१५९॥

Impressions have many forms and, residing in the subtle form, they effect the multi-formed character of the seer in the subtle form, in the same way as a wrapper¹ (causes the appearance of varied forms) of a jewel. [159]

Here is stated how the appearance (*ābhāsa*) in the Jīva is caused through misapprehension (or, wrong understanding).

¹Cf. NKL: *āstarāṇaṃ raktavastrādikam*.

माहारजनमित्यत्र हारिद्रं रूपमुच्यते ।
इन्द्रगोपोपमानेन कौसुमस्य गतत्वतः ॥१६०॥

In the word *māhārajana*, there is expressed the form of what is painted with turmeric, since, by the (use of) the standard of comparison, viz. Indragopa, the red colour is already conveyed. [160]

Verses 160-170 is Sureśvara's explanation, following Śaṅkara, of the meaning of BU 2.3.6.

SP seems to quote from *Bhartṛprapañca*: *uktam hi syāt kusumbhaṃ vahniśikhaṃ māhārajanam ity api iti*. But NKL cites the same quotation with the concluding remark *iti nāmaśāsanāt*.

पीतं वस्त्रं यथा तद्वल्लिङ्गमाभाति साक्षिणः ।
आस्त्र्यादिविषयोद्धूतवासनावसितं दृशेः ॥१६१॥

As there is yellow garment, so does there appear the subtle form of the seer, tainted (in the colour); it (viz. the seer) is affected by impressions rising from (various) objects (of enjoyment), viz. beginning with a woman etc. [161]

ईषत्पाण्डु यथोर्णादि तद्वल्लिङ्गं प्रकाशते ।
इन्द्रगोपोऽतिरक्तश्च भृशं रक्तं मनस्तथा ॥१६२॥

As a piece of wool etc.¹ appears slightly white, so does the subtle form appear (slightly white); and (as) an Indragopa appears extremely red; so is *manas* very much tainted by impressions. [162]

This explains *yathā pāṇḍvāvīkam*.

¹The word etc. refers to some blanket (*kambala*).

रजसः क्वचिदुद्रेकस्तमसः क्वचिदिष्यते ।
सत्त्वस्यापि तथोत्कर्षः कुतश्चिदुपजायते ॥१६३॥

In some cases, there is accepted (i.e. noticed) excellence of *rajas* and in some (others) of *tamas*; so also, there is excellence of *sattva* for some reason or other. [163]

That is to say (using the Sāṃkhya terminology): Owing to the variety in the known three *guṇas*, there are different tainted characters of impressions.

क्वचिदेकप्रधानत्वं कस्मिंश्चिद्विषये द्वयोः ।
त्रयाणामपि चान्यत्र ज्ञानकर्मादिचित्रतः ॥१६४॥

In some (case), there is prominence of (any) one (of the *guṇas*); in some, of two and elsewhere of all the three—this owing to the variety (of an individual's) knowledge and/or activity etc.¹ [164]

This is for justifying the statement in the preceding verse.
¹The word etc. refers to feeling like attachment.

अग्नेरर्चिर्यथा भाष्वत्सत्त्वोत्कर्षात्तथा मनः ।
पुण्डरीकं यथा शुक्लं सौम्यमाह्लादकृत्तथा ॥१६५॥

As the flame of fire is bright, so is *manas* (bright) owing to the excellence of *sattva* and it is like a lotus, white, gentle and a cause of delight. [165]

This explains *yathāgnyarciḥ*.

सकृद्विद्युद्यथात्यन्तं घनध्वान्तापनोदकृत् ।
अतीव भास्वरास्माकं चक्षुर्मुट्सकृदुद्गता ॥१६६॥

Just as a single flash of lightning is destroyer of pitch darkness in its fullness, so is (knowledge) extremely bright and has arisen (just) once for blinding the eye. [166]

This explains *yathā sakṛd vidyut*

हिरण्यगर्भतत्त्वस्य जायमानस्य केशवात् ।
विद्युद्वत्प्रथते रूपं किल तस्य महात्मनः ॥१६७॥

Then there appears, like lightning, that form of the truth about

Hiraṇyagarbha which is being produced (lit. born) from the great soul Keśava. [167]

Here Sureśvara seems to be under influence of the Vaiṣṇava sect of his times. Cf. verse 122 above. This is stated with a view to praising the Sūtrātman who comes into being after one's death and is characterized by one's last *vāsanā* (desire, or impression).

अतोऽनेनैव रूपेण य उपास्ते दिवानिशम् ।
सर्वान्धकारहन्त्रीव विद्युत्तं श्रीः सदाश्रयेत् ॥१६८॥

Therefore, in him, who meditates day and night on that (Keśava giving rise to Hiraṇyagarbha) in that form, there comes like lightning which destroys all darkness that knowledge, viz. the excellence for him. [168]

नादिर्न मध्यं नैवान्तो नेयत्ता विद्यते यतः ।
अनन्तकल्पोपचयाद्वासनानामुदाहृतिः ॥१६९॥
माहारजनमित्यादिर्न त्वियत्ता विवक्षिता ।
प्रकारदर्शनायैव तेनोदाहृतिरिष्यते ॥१७०॥

Since (in the case of impressions) there is no beginning, no middle, no end and no measure, therefore they are stated (as) example (of the infinite) on account of their increase in mass through numberless *kalpas*. [169]

And in the words *māhārajana* ..., there is not intended any measure (lit. this much of size), therefore, there is stated the example which is indicative of the kind (of numerousness). [170]

A reference to measure is evoked by the six illustrations in BU 2.1.6. Sureśvara intends that one should infer the extent of *vāsanās* (only) from those six impressions.

Now follows the explanation of the instruction *neti neti*.

निःशेषमेवं सत्यस्य रूपं व्याख्याय सांप्रतम् ।
परमार्थसत्ययाथात्म्यनिर्देशाय प्रयत्यते ॥१७१॥

Having thus explained completely the form of the truth,¹ now attempt is made to point out the true nature of the highest truth. [171]

¹That is, from the beginning of Śiśu Brāhmaṇa, viz. *yo ha vai śiśum*, up to *satyasya* which is explained up to verse 170 (on 2.3.6).

यतो व्याख्यातमखिलं मूर्तामूर्तीदिवस्त्वतः ।
आदेशोऽनन्तरं तस्य क्रियतेऽनन्यमानिनः ॥१७२॥

Since all the things that begin with *mūrtāmūrta* have been explained, therefore now instruction is given about that person who does not consider himself other than that, viz. Brahman.¹ [172]

This is to explain the purport of *athātaḥ* ...; which is to explain *yo ha vai* ... ending in nominative case. That refers to all the *mūrtāmūrta* things.

¹The editor of NKL edition paraphrases *ananyamāninaḥ* as *ādeśānyamānarahitasya*.

मूर्तामूर्तस्वभावस्य सत्यस्याविष्कृतेरथ ।
ब्रह्मार्तिरेकतो नान्यद्यतो वस्त्ववशिष्यते ॥१७३॥
आदेशो ब्रह्मणोऽतोऽयं निरादेशस्य भण्यते ।
अतिमानाभिधानस्य प्रत्यङ्मात्राद्व्यात्मनः ॥१७४॥

Now then after¹ the explanation of the truth, which is of the nature of what has a form and what does not have a form, there is nothing else than the Brahman that remains (to be referred to). [173]

Therefore, this is an instruction regarding the Brahman which cannot (really) be instructed about, about which any mention

is beyond the means of knowing and which is merely what exists within a human body and (also) the non-dual Ātman.

[174]

NKL points out why there is no other *vastu* explained after *mūrta* etc. are explained. SP brings out the purpose of the discussion of the Brahman after that on *satyasya satya*.

¹This is the purpose of the ablative form *āviṣkṛteḥ*.

कर्मण्यादेशशब्दोऽयं यदि वा करणे भवेत् ।
आदिष्टिरथवादेशो नेति नेत्यद्वयात्मनः ॥१७५॥

This word *ādeśa* signifies an action or the means of action or the very instruction; therefore, (this) instruction *neti neti* has reference to the non-dual Ātman.

[175]

This explains the meaning of the word *ādeśa*. Cf. SP (NKL follows it): *ādiśyate iti vyutpattyā brahma; ādiśyate 'neneti vyutpattyā śabdo (vā) and ādiṣṭir iti vyutpattyā jñānam (vā ādeśaḥ)*.

नेति नेतीतिशब्दाभ्यां सत्यस्य ब्रह्मणः कथम् ।
प्रमाणगोचरातीतं तत्त्वं स्यान्निर्दिदिक्षितम् ॥१७६॥

(A question is asked:) How can there be a reference to the truth, (viz.) the Brahman by the word *neti neti*, if the truth which is beyond what are objects of knowledge? How is it intended to be instructed about?

[176]

शृणु सर्वं तदज्ञानसमुत्थस्य निषेधतः ।
प्रत्यङ्मात्रैकरूपेण तदबोधनिराकृतेः ॥१७७॥

Listen. (That is intended to be instructed about), viz. all that which, owing to the denial (or rejection) of what has arisen from ignorance, exists in the form only of the inner self by (its) dispelling ignorance about it(self).

[177]

This is in brief the answer to the question above.

अमर्तस्य परा निष्ठा कारणात्मा पुरोदितः ।
मूर्तस्य च तथा पृथ्वी मध्ये संकीर्णता तयोः ॥१७८॥

The last limit of all that has not a form is earlier said to be the Ātman, as the cause¹ and, in a similar way, the earth (is mentioned) as last limit of what has a form; and between the two there is all variety. [178]

¹It is the first *vyākṛta* form of the Brahman.

मानाभिधानयोर्यावान्कश्चिद्विषय इष्यते ।
उक्तयोर्मध्यवर्त्येव कार्यकारणयोरसौ ॥१७९॥

Whatever object is accepted as the objects of the means of knowledge and of (having) name is midway between the two, viz. the cause and the effect. [179]

नामरूपे तथा कर्म प्राणा लोकादयस्तथा ।
कारकं वा क्रियान्यद्वा कारणं कार्यमेव च ॥१८०॥
जातिर्गुणः क्रिया द्रव्यं संबन्धो भाव एव च ।
सदसत्सदसच्चेति समस्तव्यस्तमेव च ॥१८१॥
प्रमाता च प्रमाणं च प्रमेयोऽथ क्रियाफले ।
इत्यादेः प्रतिषेधेन प्रत्यङ्मात्रावलम्बिना ॥१८२॥

Name and form, so also action and similarity, *prāṇas* and regions etc., the means of activity or anything else which is cause and/or effect, [180]

(what is) genus, (what) property, (what) substance and (what) relation and (what) becoming (and) whatever is called existent, non-existent and existent and non-existent, (all that is) collection of things and severality (of things), [181]
the knower and the means of knowing, also the object(s) of knowing, the activity and the result—(all these) by the negation (or denial) of them, depending on merely the inner self (are

but the Brahman).

[182]

These verses point to non-existence of anything other than the three mentioned above, viz. the prime cause (i.e. the *avyākṛta* Brahman), the last effect (viz. *prthivī*) and whatever is midway between them (viz. water etc.)—this is according to the theory of *Bhārtrprapañca*.

उपप्रदर्शकोऽशेषनामादेरितिरिष्यते ।

तस्योपदर्शितस्याथ निषेधः क्रियते नञ् ॥१८३॥

iti is accepted as indicative of all that has begun with name and now there is indicated the denial of what is shown (above) by the particle *na* (i.e. *nañ*). [183]

This is to signify the purpose served by *na* (in *neti neti*).

आकृष्टं रूपिणो रूपं न पृथग्व्यवतिष्ठते ।

जगत्त्यकल्पितमपि किमु मोहादिकल्पितम् ॥१८४॥

That form of what has a form, which can be included among the above, does not stand apart in this world, even if it is not conceived; what to say then if it is imagined owing to delusion etc.? [184]

This sets aside a possible view that *kāma* etc. could belong to something else than Brahman, for it is asserted that it does not belong to the Brahman.

घटे पटो निषिद्धोऽपि घटादन्यत्र तिष्ठति ।

तदन्यत्रापि सद्भावादनषिद्धस्य धर्मिणः ॥१८५॥

(An argument could be made:) A piece of garment, though denied as existent in a pitcher, exists elsewhere than in a pitcher; therefore, whatever has properties can have existence elsewhere than in the existent (viz. Brahman), even if it is

denied.

[185]

This serves as an illustration for the view that is rejected above.

परमार्थान्निषिद्धस्य तन्मोहोत्थस्य वस्तुनः ।
हिक्विस्थितिः कथं तस्य परमार्थात्मनाथवा ॥१८६॥

(The answer to this is:) How can there be the existence of a thing elsewhere than in the highest reality, if it has arisen from ignorance about that and is denied, or it is held to be having the nature of the highest Ātman?

[186]

Read SP: *ātmano niṣiddhasyānātmano 'nyatra bhedenābhedenā vā na sthitī rajatādivat kalpitatvād ity arthaḥ*

निषेधयानामशेषाणामन्योन्यव्यभिचारतः ।
प्रतीचोऽव्यभिचारोऽतस्तत्राद्यस्तं निषिध्यते ॥१८७॥

Since all the objects that are denied are invariably related mutually and there is non-failing existence of the inner self; therefore, whatever is superimposed on it is denied.

[187]

This establishes the *kalpitatva* as leading to unreality.

इतिशब्दोपदिष्टानां निषेधोऽनुभवात्मनि ।
अनन्तेऽन्तवतां यत्र तद्ब्रह्मेत्यवसीयताम् ॥१८८॥

The negation of those, which are indicated by the word *iti*, is in relation to numberless objects that (in reality) exist in the endless Ātman which is the experiencer. Let that be known as the Brahman.

[188]

The argument, viz. one could understand the denial of all the objects mentioned before; but thereby is not established the Brahman, is thus answered here.

सद्भावश्चोपलब्धिश्च स्वार्थप्रत्यक्चिदाश्रयात् ।

मूर्तादीनामनिर्देश्यादितिर्मत्तो निवर्तते ॥१८९॥

The existence of the existent, the experience also (of the same) is owing to the sentience, which is within; and that is thanks to the absence of what could be pointed out as having a form etc.; (this is) thus away from 'myself'.¹ [189]

¹Note in NKL on the word *mattah* 'from me' refers the word to Sureśvara himself but it should be taken to refer to one's *pratyaya* 'awareness' 'I am'.

निषेधति निषेधयार्थं यद्वलान्नञ्चिदात्मनः ।
विज्ञानेनैव हत्वान्यत्पूर्णत्वेनैति चित्स्वतः ॥१९०॥

That sentient Ātman through whose power the negative particle *na* (technically *nañ*) denies all that is to be denied, after having destroyed all other things by the knowledge through intellect¹ attains its fullness, on its own. [190]

¹*viññāna* is here understood as the commonly acquired knowledge.

प्रत्यङ्गात्रदृशि ह्यस्मिञ्जाग्रत्स्वप्नसुषुप्तिषु ।
तदन्यद्यत्तदाभासं तत्रा प्रतिषिध्यते ॥१९१॥

It is only in this seer, which is but the inner self, that, in the states of waking, dream and sleep, everything else just appears to exist; (all) that is denied by the negative particle *na* (technically *nañ*). [191]

Here is the concluding remark about the denial of all duality.

अविचारितसंसिद्धिप्रत्यङ्मोहहतौ सदा ।
विस्फारिताक्षः प्रत्यङ्धीर्मानान्निर्वात्यथात्मनि ॥१९२॥

Ever, when there is destruction of ignorance about the inner self which comes about¹ (even) without thought, there merges

in the Ātman,² the inner self, possessed of knowledge, with the eyes with (or, fully) open. [192]

¹That is, gets established.

²That is, in its own glory.

अपेक्षाज्ञानहेतूत्थं कार्यकारणवस्त्वतः ।
विचार्यमाणं तत्रास्ति व्योम्नि काष्ण्यमिवात्मानि ॥१९३॥

Therefore, the thing that is related as cause and effect and has arisen from the knowledge of what is expected (as objects),¹ does not, it becomes clear on thought, exist in the Ātman, like darkness in the sky.² [193]

¹That is, depending on outside objects.

²It means: as darkness is seen to belong to the sky, even if it really does not.

शब्दप्रवृत्तिहेतूनां प्रत्यगात्मन्यसंभवात् ।
प्रमाणगोचराणां च स्वतः सिद्धेर्न निवृत्तिः ॥१९४॥

Words, activities and causes cannot properly exist in the inner self and are (we notice) as objects of the means of knowledge; they do not get established by themselves. (Therefore,) there is the negation¹ of them. [194]

This explains the *raison d'être* of the negative particle in the instruction *neti neti*.

¹It literally means: concealment.

मानाभिधानविषयो यावन्नात्मानमात्मनि ।
लभते प्रत्यगात्मानं न नञ्तावन्निवर्तते ॥१९५॥

So long as the object of knowledge (by means of knowing) and the name does not find itself as existing in the Ātman and (does not become) the inner self, the *na* (*nañ*) (i.e. the particle of denial) does not discontinue. [195]

There is a difference of reading of this verse in NKL and AnSS editions. We follow the latter, though the v.l. in the latter agrees with NKL; cf. *ātmani* in the next verse.

निरस्ताज्ञानतत्कार्ये लब्ध आत्मन्यथात्मना ।
निषेध्यहेतौ प्रध्वस्ते निषेधोऽपि निवर्तते ॥१९६॥

And that negation also ceases to exist when the cause of what is to be denied is destroyed in the inner self by itself when the entire ignorance and its effects are destroyed. [196]

प्रमातृत्वादिना यावत्किञ्चिदत्र विवक्षितम् ।
तदभावश्च तत्सर्वं नेतीति प्रतिषिध्यते ॥१९७॥

Whatever is here intended to be expressed by the words expressive of the character of an agent etc.¹ and (also is intended) the absence of the same—all that is negated (denied) by the word *neti*. [197]

¹Cf. specifically verse 182 above but reference to verses 180-181 above is useful.

निषेध्यं सर्वमेवैतदनिषेध्यात्मवस्तुगम् ।
अतो नाभावाविष्टः स्यादभावस्यापि निह्वात् ॥१९८॥

All this which is to be negated (finally) culminates into the thing called the Ātman which cannot be negated; therefore, (the negation in *neti neti*) does not end into the absence of anything, because there is the negation of even the absence (of every object negated). [198]

This explains the purport of the repetition of *neti* and how there is not *anavasthā* resulting from the negation of the negator.

नेति नेतीत्यतो वीप्सा जिघृक्षितनिषेधतः ।
बुभुत्सितस्य कृत्स्नस्य वीप्सैवातो निषेधनी ॥१९९॥

Therefore, this repetition in *neti neti* proceeds to negate whatever is sought to be taken up (or, postulated by any objector) and, therefore, this repetition is the negator of all that is *sought* to be known.¹ [199]

¹This means: an object conceived as what is to be known.

ज्ञानक्रियाभ्यां व्याप्योऽयमित्याकाङ्क्षा निवर्तते ।
अप्रमित्सित एकस्मिन्निष्ठां यात्यचिकीर्षिते ॥२००॥

The expectancy of (some thing as) what is to be pervaded (i.e. grasped) by knowledge and activity (then) ceases to be. And the final end (of the intellect)¹ is achieved with respect to that alone which is not sought to be known and/or which is not sought to be effected. [200]

¹Namely, the knowledge of the uniqueness or singleness (*aikya*) of the Ātman.

रज्जुयाथात्म्यविज्ञानात्सर्पवत्कारणात्मनः ।
निषेधो नान्यतः शक्यः कर्तुं वर्षशतैरपि ॥२०१॥

It is not possible, even for hundred years, to effect the negation of anything other than the Ātman which is (held as) the cause (of all existence) in the same way as there cannot be negation (of a serpent on knowing) the true nature of a rope [which is the cause (of the false apprehension)]. [201]

यद्यत्प्राप्तं जगत्सिंस्तत्तत्सर्वं निषिध्यते ।
एवं च सत्यनिर्दिष्टाशङ्कापि विनिवर्तते ॥२०२॥

Whatever is obtained here in this world is all of it negated; (and) thus even a doubt (that can be) expressed regarding the truth ceases to exist (i.e. disappears). [202]

This expresses the effect of the instruction *neti neti*.

न चेद्वीप्सा तदा वाक्यद्वयमेतद्विवक्षितम् ।
 उक्तद्वयनिषेधेन तस्य चोपक्षयाद्वेत् ॥२०३॥
 अनुक्तविषयाशङ्का सर्वस्याप्रतिषेधतः ।
 यदि वाभावविषया न ह्यभावो निषिध्यते ॥२०४॥

If there were no repetition (of the word *neti*), then there could be those two sentences intended by an objector: (i) by the negation of the pair that is already stated (*mūrtāmūrta*) and there could arise after the cessation of that (pair) [203] a doubt about some object that has not been stated there would not be the negation of all; (ii) or, perhaps, this would refer to only the absence of some object(s); and, indeed, an absence is not negated. [204]

साक्षान्मानप्रसिद्धेषु प्रतिषिद्धेतरग्रहः ।
 अप्रसिद्धे प्रसिद्धानां निषेधाच्छून्यताग्रहः ॥२०५॥

(In the objects), that are established by the direct means of knowing, there can be acceptance of things other than those negated and there could be understanding of nothingness from the negation of the known things, with respect to unknown objects (if any). [205]

Sureśvara implies that the negation *neti neti* does not refer to avoid the result of negation* (viz. the knowledge of the Brahman), because the Brahman is already known in the form of 'I am'.

आदेश इत्युपक्रम्य प्रतिषेधोऽयमुच्यते ।
 साक्षादादिश्यते येन तादृगादेश उच्यते ॥२०६॥

Beginning with the word '(this is) instruction' there is stated the negation and thus there is a direct instruction (about the Brahman), since such is the instruction of the Brahman. [206]

Read SP (NKL agreeing with it in substance): *brahmaṇa ādeśa ity uktvā niṣedhokter ayam ādeśo niṣedhākhyā brahmaprati-*

pādanapara evety arthaḥ.

निषेधवर्त्मना तस्मादनिषेध्यात्मसाक्षिणा ।
ज्ञाताज्ञातं निषिध्याथ सदा दृष्टौ प्रतिष्ठति ॥२०७॥

Therefore, having negated by this way of negation, (all that) which has the Ātman as its seer, that cannot be negated, viz. all known and unknown (things), one settles down in the state of a knower (lit. a seer).¹ [207]

¹It literally means: in the state of knowing.

यथा श्रोत्रधिया रूपं रूपहेत्वसमन्वयात् ।
नाग्रहीन्न च गृह्णाति न ग्रहीष्यति शब्दवत् ॥२०८॥
प्रत्यक्तत्त्वे विनिर्ज्ञाते नेति नेतीतिवाक्यतः ।
तद्वत्सकारणोऽनात्मा नाभूदस्ति भविष्यति ॥२०९॥

As, by the knowledge through the sense of hearing, one has (never) grasped, nor does one grasp and will grasp, like a form, (even as one grasps) a wind since (one's action is not related to the cause of form); [208]

in the same way, when truth of the inner self becomes known from the sentence *neti neti*, there has not been, is not and will not be any non-Ātman together with its cause (viz. the ignorance about the nature of the Ātman). [209]

नान्यदज्ञानतोऽस्तित्वं द्वितीयस्यात्मनो यथा ।
निवृत्तिस्तद्वदेवास्य नावगत्यात्मनोऽपरा ॥२१०॥

As there is no existence of what is other than the Ātman except from the ignorance. (about the nature of it), similarly there will be cessation of this (ignorance) which cannot consist in anything else than in the knowledge of the Ātman. [210]

अनन्यायत्तमैकात्म्यं यदा साक्षाद्व्यवस्थितम् ।
व्येव त्वेति प्रतिज्ञेयं तदा स्यात्सफलोदिता ॥२११॥

- When this uniqueness (or singleness) of the Ātman, which has been thus directly obtained, as it does not depend on another, then, therefore, this enunciation, viz. *vy eva tvā*, would be described (i.e. considered) as fruitful. [211]

नेति नेतीत्यतो वीप्सासंभवादुक्तवस्तुनः ।
कृतार्थता तथा च स्यादन्यथा नोपपद्यते ॥२१२॥

Therefore, from the repetition in the statement *neti neti*, there results meaningfulness of the thing¹ that is stated and of that anything otherwise does not reasonably exist. [212]

¹Of *aikātmajñāna*, or better perhaps, of the enunciation *vy eva tvā*.

परागर्थेषु सक्ता धीः प्रत्यगर्थानुरञ्जनात् ।
निषिद्धातः परागर्थात्प्रतीचि लभते स्थितिम् ॥२१३॥

(Therefore) one's intellect, which is fixed on objects outside, is warded off from the objects outside and then, being tainted by the thing within (viz. the inner self), becomes steady in that thing within. [213]

So far, Sureśvara explains the meaning of the sentence neti neti ... ādeśaḥ in agreement with BUB. Now, he explains it as an informative injunction regarding the inner self.

व्यतिरेकस्य सिद्धत्वादादेशोक्तेः पुरैव हि ।
साक्षाद्ब्रह्मत्वसिद्धयर्थमादेशोऽयमथोच्यते ॥२१४॥

Now, this instruction (viz. *neti neti*) is stated here for establishing that the Brahman is patent to oneself, since the meaning of instruction which has been already established through (conveying) the distinction of the Brahman from (the *mūrtāmūrta* things) is already known. [214]

This is the explanation of the instruction *neti neti* given by

Sureśvara.

This argument presupposes the distinction between the Brahman and the *mūrtā* things by the very use of the genitive in the expression *brahmaṇaḥ* (*dve rūpe*). The words *neti neti* only confirm the distinction.

न निषेधो निषेधार्थो लक्षणार्थपरत्वतः ।
ब्रह्मणो मान्तरासिद्धेः शून्यतैव प्रसज्यते ॥२१५॥

The negation (in *neti neti*) does not pertain to what is to be negated, since it is the purport of indicating (the Brahman). Since the Brahman is not established by any other means,¹ therefore there could have followed only void.² [215]

This is to explain why the negation in the instruction *neti neti* does not purport only to negate the *mūrta* etc.

¹This refers to anything else than the statement in the Upaniṣad about the Brahman (*brahmaparavākya*).

²This reaffirms that the negation does not pertain only to what is to be negated, which implies that nothing else than that existed.

षष्ठ्युक्तेरेव संसिद्धा मर्तादेर्ब्रह्मणोऽन्यता ।
ततश्च जामितासक्तिर्नातः स्यात्पारिशेष्यगीः ॥२१६॥

By (lit. from the statement with the use of genitive in *brahmaṇaḥ dve* ...) it gets established that the *mūrta* etc. are different from the Brahman and from that there necessarily (or contingently) follows the relation (of what is negated to the Brahman); therefore from this (sentence *neti neti*) (one is) not (to understand) a statement of the remainder.¹ [216]

¹Namely, of what remains after the *mūrta* and *amūrta* are stated.

शक्यते न निषेद्धं च प्रत्यक्षाद्याश्रितत्वतः ।
निषेधान्न पुमर्थोऽपि कश्चित्सिद्धयेत्समीहितः ॥२१७॥

It is not possible to negate (the mass of *mūrtāmūrta*), since it is dependent on direct perception etc.¹ and also the end of human beings (viz. *mokṣa* or *brahmajñāna*) which is desired (by men) will not result from mere negation. [217]

This is to affirm that the sentence *neti neti* does not purport merely to negate *mūrtāmūrta*; but it conveys the knowledge of the Brahman.

¹This refers to other means of knowing.

निषेधमात्रनिष्ठत्वे न चादेशो भवेत्प्रभोः ।
ब्रह्म मूर्तादि नेत्युक्तौ मूर्तादेर्न निषेधगीः ॥२१८॥

Being merely for negation (of *mūrta* etc.), there would not be the instruction about the lord¹ and by a statement, viz. 'Brahman is not *mūrta*' etc., there cannot be negation of *mūrta* etc. [218]

This is to say: The instruction *neti neti* cannot be merely for rejection of others; nor can the denial of the Brahman to be *mūrta* etc. give rise to the knowledge of it.

¹That is, the all-pervading Brahman.

ततश्च ब्रह्मतासिद्धिर्द्वितीये सति वस्तुनि ।
व्येव त्वेति प्रतिज्ञार्थो नापि चाविष्कृतो भवेत् ॥२१९॥
पारिशेष्यादतोऽसिद्धिः स्याद्विवक्षितवस्तुनः ।
यथा सिद्धिस्तथा व्याख्या कार्येहोक्तेरतोऽब्जसा ॥२२०॥

And from that there would not be the establishing of the Brahman if it were taken as a thing other (than the negated) and also the purport of the enunciation by *eva tvā* would not become revealed. [219]

Therefore, there is no establishing of the thing which is intended to be expressed by the rule of the remainder.¹ Therefore, the explanation of the statement (*neti neti*) should be offered in such a way that there would be established (that

thing only) smoothly.

[220]

In verses 219-220ab there is a refutation of two views regarding the meaning of *neti*: (a) negation of all knowables, (b) establishing Brahman as what remains. And verse 220cd states the purport of *neti neti* as a suitable expression of the existence of the Brahman.

¹That is, the Brahman is what remains after the *mūrta* etc. are already described.

सिद्धो निषेधः प्रागेव सर्वस्यानात्मवस्तुनः ।
प्रत्यग्याथात्म्यविज्ञानादन्योन्यव्यभिचारतः ॥२२१॥

Negation of all non-Ātman things has been already¹ established by the knowledge of the true nature of the inner self and on account of the mutual exclusion of the non-Ātman things.
[221]

¹Refer to verse 216 above.

अन्योन्यव्यभिचारोऽस्य वीक्ष्यतेऽनात्मवस्तुनः ।
स्वरूपव्यभिचारोऽपि सुषुप्तादौ स्वसाक्षिगः ॥२२२॥
यथा मात्रादिसत्तेयं प्रत्यक्संवित्सिद्धिका ।
प्रमात्रादेरभावोऽपि प्रत्यग्बोधाश्रयात्तथा ॥२२३॥
अविचारितसंसिद्धिरात्माविद्यैकरूपतः ।
सिद्धायतेऽखिलोऽनात्मा स्वतःसिद्धात्मसंश्रयात् ॥२२४॥
अतिरोहितसंवित्को व्यपास्ताशेषविक्रियः ।
अनन्यमातृमानादिर्दृष्टिमात्रात्मकत्वतः ॥२२५॥

This mutual exclusion of the non-Ātmans is (already) seen and also the exclusion of their own forms is noticed in the state of sleep etc.; and which is perceived by the inner self.
[222]

As this existence of the means of knowing etc.¹ is established by the knowledge of the self within, so also the absence of

the knower etc.² is similarly established by resorting to the knowledge of the inner self. [223]

The entire (mass of) non-Ātman appears to get established owing to its being of the nature only of ignorance about (the nature of) the Ātman and is thus established without (even a) thought and on account of its dependence on the self-established Ātman, [224]

(Who is thus self-established) because sentience in it does not remain concealed, because it has discarded the entire mass of modifications and because it is of the nature of only the seer (lit. seeing) and has no other knower or means of knowing. [225]

¹The word etc. refers to *meya* and *māna* [beside *mātr* (possibly) the means of knowing].

²The word etc. refers to *prameya* and *pramāṇa* (i.e. the act of knowing and/or the means of knowing).

भावाभावात्मिका सिद्धिर्येयं सर्वाप्यनात्मनः ।
तद्विरुद्धात्मकान्मतो मय्येवासौ प्रसिध्यति ॥२२६॥

Whatever be (pointed out) as the establishing of the presence and the absence of the entire non-Ātman, it is established owing to the awareness of only 'from me' and 'in me'.¹ [226]

¹From the Ātman which is known as I (*aham*) and from me (*mattah*). Cf. verse 189 above and note thereon regarding *mattah*.

Sureśvara often uses pronominal forms like *aham*, *mayi* and *tava* and lends to his writing the form of some direct conversation. There is nevertheless the purport of conveying an individual self.

अनन्यानुभवेनैव भावाभावात्मभूमिषु ।
प्रत्यक्कूटस्थ आत्मानं पश्यन्नास्ते फलात्मना ॥२२७॥

Through the experience of none else does the inner self, the immutable one, see itself in the various levels of the presence

and the absence (of things), and thus sees itself as of the nature of the fruit (viz. right knowledge). [227]

This sets aside the notion of an inner self needing the help of another and so on in infinite regress.

AnSS suggests *-sthan* as a v.l. reading, but both commentaries do not show and support this.

अतो मात्रादिसंभेदो यत्र यत्र निवर्तते ।
तत्र तत्रैकलः प्रत्यक्स्वमहित्रैव सिध्यति ॥२२८॥

Therefore, whatever these distinctions of organs (or means) etc. cease to exist, there does the single inner self remain owing to its own glory¹ (or power) alone. [228]

Refer to verse 223 above.

¹Cf. verse 192 above. Also refer to *yadbalāt* in verse 190 above.

प्रमात्रादेरभावोऽतो यः सिद्धः स्वात्मबोधतः ।
नञ्वृत्तिस्तं सदाबुद्धं लक्षयत्यपृथक्प्रमम् ॥२२९॥

Therefore, the absence of the agent (of knowing) etc. is established as (or, is caused by) the knowledge of the Ātman. The function of the negation-particle (*nañ*) indicates¹ the ever awake Ātman which does not have any distinction from knowledge.² [229]

Refer to note 2 on verse 223 above.

¹This means that *nañ* conveys the meaning of the inner self, i.e. it does not express the same; it only indicates it. The reason for this is stated in the next verse.

²NKL reads in the end *apṛthakprabham*.

वैविकत्यात्र च मानादेरनन्यानुभवात्मनि ।
सहेतुकस्य वृत्तिः स्यान्नित्यबोधावबोधिनि ॥२३०॥

Owing to the distinction of the means of knowing etc. which have some cause (for their existence) there cannot be any functioning of them in the case of (the Ātman) which is of the nature of experience of nothing else than itself and which ever enlightens itself. [230]

This explains why the Ātman is indicated (i.e. not expressed) by the particle of negation, viz. *nañ*.

अविद्याद्यतिरेकेण कारणादिविधर्मकं ।
लब्धमात्मात्मकं वस्तु प्रतीचोऽन्नन्यमानतः ॥२३१॥

This thing which is of the nature of the Ātman is obtained (i.e. known) from the inner self which does not have any other means for (revealing) itself—this thing which is in nature opposed to causes etc. and which is other than ignorance etc.¹ [231]

This is for justifying the word *vaiviktyāt* in the preceding verse.
¹The word etc. refers to *avidyāphala* its effects.

एतद्वस्तु स्वतःसिद्धं प्रमात्राद्यनपेक्षतः ।
सर्वस्यैव ततः सिद्धेः कथं सिध्येत्तदन्यतः ॥२३२॥

This thing (i.e. Ātman) is self-established, being independent of any knower etc.¹ and, since all (the knowables in the world) get established on its account, how can it (i.e. the Ātman) get established by something else? [232]

¹Refer to note 2 on verse 223 above.

उक्ता प्रमेयसंसिद्धिः स्वमहिम्नैव नञ्श्रुतेः ।
तस्य ब्रह्मत्वबोधाय नेति ब्रह्मेतिनोच्यते ॥२३३॥

From this hearing of *nañ* is thus the establishing of what is to be known (viz. the Ātman) owing to its own power (or, glory); for the knowledge of that as the Brahman (the word)

iti in *neti* expresses that.

[233]

This is to point out that *nañ* primarily refers to the object (i.e. *tvam padārtha*), because the Brahman is self-established; *iti* refers to the *mūrta* etc.

आत्मप्रत्ययमामेयो लक्षितो यो नत्राञ्जसा ।
अविद्यादेस्तदात्मत्वादिति ब्रह्मेति बोध्यते ॥२३४॥

It is conveyed (lit. made known) that the Brahman is that (one) which is smoothly indicated by (the negative particle) *nañ* and which is the knowable (i.e. to be known)¹ by the awareness of (one's own) self owing to ignorance etc.² which is its nature.

[234]

The argument is Jīva 'the inner conscience' is subjected to worldly dealings and yet it is the Brahman. So it is indicated by *nañ*.

¹*māmeya* means *meya* 'knowable (or what is to be known)' from *mā* 'knowledge' in the worldly dealings (*pramāṇaprameya-vyavahāra*).

²The word etc. refers to the effect(s) of *avidyā*.

प्रत्यङ्मोहतदुत्थस्य प्रत्यग्याथात्म्यबोधतः ।
बाधितत्वादतौऽवोचदिति ब्रह्मेति मोहनुत् ॥२३५॥

Owing to the rise of the knowledge of the true nature of the inner self from the delusion (about the nature of) the inner self and the product (i.e. ignorance) of it, (the Śruti) states *iti* in order to convey that (the Ātman is) the Brahman, (and it is thus) the remover of delusion.

[235]

Now follows the discussion of the meaning of the sentence *na hy etasmād iti netyantat param asti*.

आदेशं प्रत्यतिमहानथात इति संभ्रमः ।
तेनासदृश आदेशो नन्वयुक्तोऽयमीर्यते ॥२३६॥

(An objection may be raised:) Indeed, this instruction is improperly given, since it is not a proper instruction; for there is very great confusion about (or, misgiving as to the purpose of) the instruction. [236]

युक्त एवायमादेशो न यतो विद्यते परः ।
आदेशोऽतोऽयमेवात्र ब्रह्मण्यादेश इष्यते ॥२३७॥

(The answer is:) Indeed, this instruction is but proper, since there is no other (instruction elsewhere in the Śruti). Therefore, this itself is desired as instruction about the Brahman. [237]

आदिदिक्षितमेतस्य तत्त्वं यद्ब्रह्मणः परम् ।
यावन्तस्तत्र निर्देश्यास्तेऽर्थाः सर्वे निवर्तिताः ॥२३८॥

Since the highest truth about this Brahman is intended to be under instruction, whatever are there the objects to be pointed out (by words etc.) they are all of them set aside (by the words *neti neti*). [238]

This justifies the statement *na yato vidyate paraḥ* in the preceding verse.

निवृत्तिश्च यथोक्तैव तेषामैकात्म्यलक्षणा ।
भिन्नदेशस्थितिस्त्वत्र वास्तवी नोपपद्यते ॥२३९॥

And the cessation (of the duality, viz. *mūrta* etc.) is (effected) just as stated (before), viz. it is of the nature of a single Ātman (in the case) of them.¹ And their actual existence in different places here (i.e. in this world) cannot stand to reason.² [239]

¹This refers to the objects, viz. *mūrta* etc.

²Alternatively, cannot be reasonably accepted (as real).

अव्यावृत्ताननुगतो ब्रह्मशब्दार्थ इष्यते ।
मुख्योऽन्यस्मिन्सति यतो ब्रह्मार्थो नावसीयते ॥२४०॥

शब्दप्रवृत्तिहेतूनामैकात्म्येन समाप्तिः ।

तथा तदभिधेयानामादेशोऽयं मतः परः ॥२४१॥

It is accepted that the object signified by the word Brahman is not distinguished from other (objects) and is not similar to any other(s) because this object, viz. the Brahman, is not understood as the principal meaning of the word (*śabda*) (in *brahmaśabda*) (if there existed any other object). [240]

Since it is (thus) understood (lit. obtained) those which have caused the functions of words, viz. those which are signified by them, are only the Ātman, therefore, this instruction is understood as the highest.¹ [241]

¹That is, the highest conveyer of the truth.

अभिधाभिधेयसंबन्धमङ्गीकृत्य यतोऽक्षरे ।

न कश्चिदपि शब्दोऽत्र साक्षाद्ब्रह्मणि वर्तते ॥२४२॥

(This is so) because not a single word refers to the Brahman itself after accepting the relationship between expression¹ and what is signified by it. [242]

¹It can stand for word or for the primary function of words.

आदेशो नेति नेत्येव तेनेह घटतेऽञ्जसा ।

तदबोधप्रसूतानामाकाङ्क्षाणां निषेधतः ॥२४३॥

Therefore, the instruction in the words *neti neti* gets, smoothly construed (in respect of the truth to be conveyed by the Śruti), owing to its rejection of all the expectancies which arise from ignorance about it (viz. Brahman). [243]

Now follows the exposition of the meaning of *atha nāmadheyam satyasya satyam iti prāṇā vai satyam teṣām eva satyam*.

मूर्तामूर्तं हि सत्याहं प्राणाः सत्यास्तदात्मतः ।

क्षेत्रज्ञस्तदुपाधित्वात्सत्य इत्यभिधीयते ॥२४४॥

Since (the mass of) *mūrtāmūrta* is called *satya*, *prāṇas* (organs etc.) are also (called or described as) *satya*, on account of their having that (viz. *satya*) as their nature, and, therefore, the knower of the field is also called *satya*, for it has them as its limiting adjuncts. [244]

अनिर्देश्यस्य निर्देश्या ये भेदाः कार्यलक्षणाः ।
तेषु लब्धास्पदं नाम परस्मिन्नुपचर्यते ॥२४५॥

The noun which has found scope in those distinct objects, having the nature of effects, and which can be signified (by words), of what cannot be signified (by words) is transferred to the highest (reality, i.e. Brahman). [245]

This is to explain why the Brahman also is signified by the word *satya* even after *satyasya* (in genitive) expresses what can be signified in words.

मूर्तामूर्तात्मकं सत्यं प्राणादेः कार्यरूपिणः ।
तस्याप्येतत्परं सत्यं यन्नेतीत्यवधारितम् ॥२४६॥

What is specified in the word *neti* is this highest truth of the *prāṇas* (viz. the organs) etc. which is of the nature of effects and is (commonly known) as truth and (is known) in the form of *mūrtāmūrta*. [246]

In *satyasya satyam*, the two words occur respectively in genitive and nominative forms. In the earlier verse, the word *satya* (in genitive) has been explained and, now, the word *satya* (in nominative) is explained.

उक्तवस्त्वतिरेकेण नामीषां सत्यता यतः ।
न चाप्यसत्यता तस्मात्तेषां सत्यं परं पदम् ॥२४७॥

Since all these do not have any true nature other than (that of) the said thing (viz. the Ātman), therefore, they do not have (any) untrue nature and their truth is the highest truth

(viz. the Brahman).

[247]

This is to state that the word *satya* can be applicable (in final reality) to the world also.

आत्मवन्तो यथा रज्ज्वा रज्जुसर्पादयस्तथा ।
आत्मवन्तो निरात्मानः प्राणाद्याः प्रत्यगात्मना ॥२४८॥

As a serpent in a rope etc. come to have existence (*ātmavantaḥ*) through only a rope, similarly, *prāṇas* etc. which are non-Ātman come to have existence only through the inner self. [248]

The statement in the preceding verse is clarified by citing an example.

यत एवमतोऽन्वीक्ष्य मूर्तामूर्तादिवर्त्मना ।
सत्यशब्दाभिधेयार्थं तथा द्वारा परं पदम् ॥२४९॥
व्यपदिश्यमानमैकात्म्यं सत्यस्यात्मानमद्वयम् ।
द्रष्टव्यमात्मनैवैनं सत्यं पश्येद्यथोदितम् ॥२५०॥

Since this is so, (therefore) having understood the meaning of what is signified by the word *satya* by way of understanding the *mūrtāmūrta* etc. and in that way (should one see) the highest truth; [249]

the nature of their being but the unique or single Ātman which is thus conveyed by the word (*satya*),¹ viz. the non-dual Ātman, (that is) to be seen—thus should one see this truth which is thus described. [250]

¹NKL edition reads *ucyamānam aikātmīyam*.

अतोऽव्याकृतयाथात्म्यं व्याकृतेनोपदिश्यते ।
सत्यस्य सत्यमिति तन्नान्यथा व्यपदेशभाक् ॥२५१॥

Therefore in the words *satyasya satyam* is conveyed the nature of the unmodified by means of (the statement about) the modified; that cannot be conveyed by any other words. [251]

This sets aside the possible argument that the word *satya* cannot signify the Brahman, since that use of the word cannot be proved useful in the way of continued *anvaya* of it with the same.

व्यपदेशाय नामैतन्न स्वं नामास्य विद्यते ।
ननु ब्रह्माक्षरमिति व्यपदेशोऽत्र नामभिः ॥२५२॥

All this is for conveying (that) it has no name (i.e. noun) of its own. But ¹ indeed this reference, viz. *brahma akṣaram* ..., is but use of names.² [252]

¹This is an objection.

²That is, for signifying it.

कार्यकारणगे तत्त्वे नाम लब्धास्पदं यतः ।
रूपाभिधेयसंबन्धमरूपाशब्दमक्षरम् ॥२५३॥
लक्षयेन्नाञ्जसा वक्ति परं ब्रह्म कथंचन ।
शब्दप्रवृत्तिहेतूनां साक्षाद्ब्रह्मण्यसंभवात् ॥२५४॥

Since the name (i.e. noun) has found relevance on the truth which exists in the causes and effects and it has relation to form and names though it (itself) has no form, no word for its description and it is imperishable— [253]

that name indicates it, since it can never express smoothly the highest Brahman in any way. (This is so) because, in the case of the Brahman, there is no direct relationship with the causes of functions of the words. [254]

In these verses Sureśvara answers the objection and gives his idea of *lakṣaṇā* to be understood in such Upaniṣadic sentences as convey the nature of the Brahman.

TRANSLATION AND ANNOTATION

BUBY 2.4

आत्मेत्येवेति सूत्रस्य व्याख्येयं प्रस्तुता स्फुटा ।

ब्रह्म तेऽहं ब्रवाणीति प्रारभ्याऽऽपूर्णवाक्यतः ॥ १ ॥*

1. Now begins a clear exposition of the aphoristic remark, "Let him meditate (on that Brahman) as the Ātman" (BU 1.4.7) etc., which began with, "I shall tell you the Brahman" (BU 2.1.1) and continued up to the end of last sentence of the previous section (viz. BU 2.3).

NOTES

The aphoristic remark, "Let him meditate (on that Brahman) as the Ātman," etc. which is the so-called *vidyāsūtra*, is enunciated in BU 1.4.7 which is the third chapter of the Madhukāṇḍa. The second chapter of BU (=the fourth chapter of the Madhukāṇḍa) which begins with *brahma te aham bravāṇi* is devoted to an elucidation of the purpose of the *vidyāsūtra*. In this connection BUB (pp. 318-319) remarks: "But in the second chapter, after introducing the individual consciousness which is the object of the knowledge of the Brahman in the passages 'I shall tell you the Brahman,' 'I shall let you know the Brahman,' the Śruti has taught the Brahman, the one reality where there is no duality, without all characteristics, all material qualities, directly indicated by the word *satya* ('truth'), having action, its functionaries and its results as its essential nature, by the negation 'not this, not this.'"

नित्यकर्माद्यनुष्ठानसंशुद्धिषणः पुमान् ।

निःशेषकर्महेतुत्वफलसावद्यधीस्ततः ॥ २ ॥

*The Devanāgarī text is taken from the Ānanda Āshrama edition (ĀnSS 16, 3 vols).

2. A man has his intellect purified by (i.e. through) the performance of the daily action etc.; later he comes to have (i.e. develop) the notion that the result arising from the cause in the form of the entire action is to be blamed.

NOTES

Sureśvara seems to accept the notion of *kramamukti*. I have discussed this point in the Introduction; cf. section 2.

विरक्त आप्रजात्सोऽयं तत्सावद्यसमीक्षणात् ।

संसारदुःखसंस्कारस्मृतिभिः प्रेर्यमाणधीः ॥ ३ ॥

उद्भूततज्जिहासः संस्तद्वाने साधनस्पृहः ।

त्यक्ताशेषेषणः सोऽथ प्रत्यग्याथात्म्यनिश्चयः ॥ ४ ॥

3-4. Having well (*saṁ*) seen that it (viz. the fruit of action) is full of blame, a person turns averse to the result of previously performed actions.¹ His intellect being stirred by impressions and memories of the misery of the transmigratory existence, he has a desire to abandon it (viz. the transmigratory existence) and (also) the wish for acquiring the means for abandoning the same; he gives up all the desires, and has then determined the true nature of the individual consciousness.

NOTES

(1) *āgraja* < *agraja*, i.e. produced by the earlier (performed action)—maybe, it is mostly prosperity like riches in cattle etc. acquired by rituals. Cf. TUBV 2.6 where BOETZELAER translates *āgraja* as “previously gained (possession)”. At some other places, Sureśvara uses this word in the sense, ‘belonging to (or, characteristic of Hiraṇyagarbha, the first born’. (cf. TUBV 2.537). But this meaning is not suitable in the context here.

वस्तुवृत्तात्मसंबोधवस्तुसंसारकारणः ।

व्याविदाशेषसंसारो विमुक्तो ना विमुच्यते ॥ ५ ॥

5. The man, who has destroyed the cause of the transmigratory existence by means of his knowledge of the nature of

reality (viz. the Brahman) and his own self (viz. the individual consciousness), and (thereby) destroyed the entire transmigratory existence, becomes liberated.

यावत्किञ्चिदविद्यायाः कार्यं वैराग्यकारणम् ।

तत्संन्यासो विरक्तत्वात्स्वत एव न शास्त्रतः ॥ ६ ॥

ब्रह्मयाथात्म्यविज्ञानसाधनत्वं विनाऽऽगमात् ।

संन्यासस्य न विज्ञातं तच्छास्त्रेणेह बोध्यते ॥ ७ ॥

6-7. Whatever is the product of ignorance (becomes) the cause of aversion (to the transmigratory existence). The abandoning of the product of ignorance effects of itself, owing to one's being averse to it; (it is) not (effected) by Vedic injunction. That renunciation is the means to ascertaining the true nature of the Brahman is not known (except from the Śruti¹). And this (lit. that) is preached here (i.e. in the Śruti).

NOTES

Śaṅkara remarks: *asyā brahma-vidyāyā aṅgatvena saṁnyāso vidhītsitaḥ*, "The Śruti wishes to enjoin renunciation as subsidiary (i.e. helpful) to (the acquisition of) the knowledge of the Brahman." (BUB, p. 319). But Sureśvara does not admit of any injunction either for urging renunciation or for prescribing renunciation as a means to the knowledge of the Brahman. The scriptural text is therefore merely informative of renunciation.

(1) The word *āgama* here refers to any Śruti which is traditionally handed down.

ब्रह्मविद्यासमुत्थानात्कार्यकारणलक्षणात् ।

व्युत्थाप्य नेति नेतीति परं ब्रह्म प्रदर्शितम् ॥ ८ ॥

8. The Brahman, the highest, has been explained in the words, "(The Brahman is) not this, not this..." (BU 2.3.6), after showing it (to be) apart from what is characterized as the cause and the effect, viz. that which has arisen from ignorance of the Brahman.

NOTES

Commenting on BUB (pp. 318-319): *caturthe tu brahma-vidyā-
viṣayaṁ pratyagātmānaṁ brahma te bravāṇīti brahma jñāpayiṣyāṁ
ca prastutya tad-brahmaikam advayaṁ sarva-viśeṣa-śūnyaṁ kriyākāraka-
phala-svabhāva - satya-śabda - vācyāśeṣa - bhūta-dharma - pratiṣedha-
dvāreṇa neti netiti jñāpitam |*

[Up to the eighth verse, the intention of BU 2.3 is summarized in accordance with BUB (stated in the note on verse 8). Now, while proceeding to 2.4, an objection is raised which runs up to the 17th verse.]

तद्वैतच्छङ्क्यते चोद्यं ब्रह्मत्वासिद्धिदोषकृत् ।

निषिद्धं नेति नेतीति मूर्तामूर्तादि वस्तु यत् ॥ ६ ॥

9. In this regard, an objection is raised, pointing to the fault (which consists in) non-establishing of (viz. not proving) the nature of the Brahman. Whatever thing, concrete or abstract and so on,¹ is denied (to be the Brahman) in the sentence, “(The Brahman is) not this, not this. . . ”.²

NOTES

1. The word *mūrtāmūrtādivastu* means concrete or abstract things, *satya* or *asatya nāmarūpa* etc. which are discussed in the end of BUB 2.3. In short it refers to all that is the non-Ātman.

2. Cf. BU 2.3.6 : *athāta ādeśo neti neti*, also BU 3.9.26, 4.2.4, 4.4.22, 4.5.15: *sa eṣa neti netyātmā*.

किं तद्ब्रह्मानुगं सर्वं किं वा तस्माद्विच्यते ।

यदि ब्रह्मानुगं ब्रह्म स्यादनर्थात्मकं तदा ॥ १० ॥

10. Is all that identical with the Brahman, or distinct from it? (And) if it is identical with the Brahman, then the Brahman would be of the nature of evil.

NOTES

Regarding the relation between things and the Brahman three alternatives are possible :

- (a) All that may be existent and identical with the Brahman,
 (b) all that may be non-existent and identical with the Brahman, and
 (c) all that may be different from the Brahman.
- The discussion of this relation continues up to verse 14. In this verse, the alternative (a) is refuted *anartha* 'evil' consists in the body that originates from ignorance. Hence if (a), the Brahman would be produced from ignorance. On *anartha*, see TUBV 2.125: *avidyāhetavaḥ kāmāḥ kāmamūlāḥ pravṛttayaḥ | dharmādharmau ca tanmūlau deho 'narthāśrayas tataḥ ||*

अभावनिष्ठं तच्चेत्स्यान्मुख्यं ब्रह्म न सिध्यति ।

अभावस्य ततोऽन्यत्वादन्वयव्यतिरेकतः ॥ ११ ॥

11. If that (thing) is non-existent, then the highest¹ Brahman does not become established, for non-existence is different from that (Brahman) as (is clear) from the method of *anvayavyatireka*.²

NOTES

The alternative (b), as pointed out above, is refuted here. While refuting the case (b), the method of *anvayavyatireka* becomes useful. Thus one cannot specifically state what the *abhāva* 'is' and what it 'is not'. Again in the case (b), one would be required to say : 'Since all that (*mūrtāmūrtādi* of verse 8 above) does not exist, the Brahman does not exist.' This would disturb the Advaita doctrine which holds that it is the Brahman alone that exists. And all the efforts of Vedas in search of the Brahman would be useless.

1. The word *mukhya* is literally 'the principal'.

2. The word *anvayavyatireka* means 'the method of *anvayavyatireka*'; on this see the Introduction section 7.

नेतीत्यपि निषेधोक्तिस्तथा सति विरुध्यते ।

वैदिकश्च प्रयासोऽयं सर्वः स्यात्तुषकण्डनम् ॥ १२ ॥

12. In that case (viz. in case it is held that all that is distinct from the Brahman), the statement of rejection in the

Vedic passage: “(The Brahman is) not this, not this . . .”, would also be opposed, and all the (lit. this) effort of the Vedas would be useless like the (effort of) pounding the husk.

NOTES

The alternative (c) is refuted. In case argument (c) is accepted, the negative assertion of the Śruti *neti neti* . . . would be contradicted.

विविच्यते ब्रह्मणश्चेन्मैवं दोषस्तथाऽपि हि ।

ब्रह्मत्वं ब्रह्मणो न स्याद् द्वितीये सति वस्तुनि ॥ १३ ॥

13. If again (you would say that) that thing is definitely taken as different from the Brahman, do not (say so, for) in that case also there would be wrong reasoning: (That is to say), the Brahman would not remain the Brahman (any more), if there existed a second thing (i.e. a thing apart from the Brahman).

अव्यावृत्ताननुगतं वस्तु ब्रह्मत्वमश्नुते ।

एतच्च दुर्लभं तस्य द्वितीये सति लक्षणम् ॥ १४ ॥

14. (Also), the entity which is not differentiated from (all that) and not followed (by all that) is called the Brahman (lit. obtains the nature of the Brahman); and this definition (of the Brahman) would be difficult to assert, if there existed a second entity.

NOTES

The alternative (c) is refuted further: The Śruti defines the Brahman as *ekam evādvitīyam* ‘The Brahman is one where there is no second entity.’ This definition would prove false, if one accepted the existence of thing(s) other than the Brahman.

अथाब्रह्मात्मकं वस्तु जग्ध्वा चेद्ब्रह्म तद्भवेत् ।

प्रतीचो ब्रह्मणाऽत्तत्वान्न मोक्षो नापि संसृतिः ॥ १५ ॥

15. If (one were to say that) all the non-Brahman would become the Brahman after the Brahman contained (lit. ate) it

within itself,¹ there would be neither liberation nor the transmigratory existence for the individual consciousness because it would be contained in (lit. eaten up by) the Brahman.

NOTES

The first line proposes further possibility, viz. the Brahman would include the second entity and then the following alternatives would be assumed: (A) The individual consciousness is included in the Brahman, (B) the individual consciousness is not included in the Brahman. The second line refutes (A).

1. The words *jagdhvā* (<√*jakṣ* 'to swallow') and *atta* (<√*ad* 'to eat up') are used in figurative sense, they show the merger of the entity into the primordial entity. Cf. TU 3.1: *yato vā imāni bhūtāni jāyante | . . .|tad brahmeti |*

संसारिणो न चेदत्ति संसार्येव प्रसज्यते ।

नाऽऽप्नोति ब्रह्मतां साक्षात्सत्सु संसारिवस्तुषु ॥ १६ ॥

16. If (the Brahman does) not eat up (i.e. withdraw within itself) numerous individual consciousnesses, then it would result that the Brahman itself is transmigratory. (If it is held that) there actually exist transmigratory entities, it would not attain the status of the Brahman.

NOTES

(B) is refuted: If (B), again two other alternatives could be assumed, viz. (i) the Brahman is identical (in nature) with the numerous individual consciousnesses, (ii) the Brahman is different (in nature) from them (i.e. numerous individual consciousnesses). If (i), the question of withdrawing the others within itself (by the Brahman) does not arise. If (ii), there is nothing which has the status of the Brahman, as required by the definition.

संसारे चापि जग्धेऽस्मिन्ब्रह्मणा निखिले सति ।

ऋतेऽपि ब्रह्मविज्ञानात्सर्वे स्युर्मुक्तबन्धनाः ॥ १७ ॥

17. And further if the whole of the transmigratory existence was withdrawn (lit. eaten up) by the Brahman, all beings would be released even without having obtained the knowledge of the Brahman.

NOTES

A doubt could be this: 'Even if the transmigratory things and the Brahman are identical in nature, the Brahman cannot be said to be transmigratory, because the Brahman is said to withdraw the transmigratory things within itself and it does not get withdrawn in any other thing.' The answer is stated in the following verses.

अन्वयादिनिषेधाय सर्वमात्मेति वाक्यतः ।

मैत्रेयीत्यादिको ग्रन्थस्तस्मादारभ्यते परः ॥ १८ ॥

18. Therefore, in order to reject (the argument regarding) the method of *anvayavyatireka* by means of (i.e. through the help of) the sentence, "All (this) is the Ātman,"¹ (now) begins the subsequent work starting with the words, "O Maitreyī".

NOTES

Now begins the answer to the objection stated in verses 10-17. That the world is nothing but the individual consciousness is proved by the Śruti "All (this) is the Ātman" which negates the method of *anvayavyatireka*. In connection with this begins the present section.

1. Perhaps the statement, "All (this) is the Ātman" is a brief paraphrase of (*idaṁ*) *sarvaṁ* (*yad ayam*) *ātmā* in BU 2.4.6.

सर्वब्रह्मनिषेधेन तदर्थो वेह निश्चितः ।

तस्य संसिद्धिविषयमैकात्म्यमधुनोच्यते ॥ १९ ॥

19. Or,¹ (since) the entity which is expressed by the word *tat* (viz. the Brahman) is ascertained by rejecting all the non-Brahman entities (in the preceding sections to this, i.e. in BU 2.3.6) now is being declared (lit. stated) the oneness of that

(Brahman with the non-Brahman)² pertaining to the realization³ in its real form.

NOTES

In verse 18 reference is made to the introduction of the section “O Maitreyī . . .” as an answer to the question in verses 10-17, but now is stated another answer. By rejecting the non-Ātman such as a concrete thing etc., the entity expressed by the word *tat*, viz. the Brahman, has been ascertained. Now is to be ascertained the oneness of the Brahman with the entity expressed by the word *tvam*, viz. the individual consciousness.

1. The word *vā* marks first alternative way of introducing comment on “O Maitreyī . . .”. Note the word *vā* in the following verse.
2. Cf. SP: *tasya* (= *tadarthasya*) *tvamarthenaikyam*.
3. The word *samsiddhi* literally means ‘establishing (in real form)’, but here it is the synonym of *mukti* = *avagati*.

नेतीति ब्रह्मणोऽन्यत्र मूर्तामूर्तव्यवस्थितौ ।

प्रसक्ते सांख्यसिद्धान्ते सर्वमात्मेति वोच्यते ॥ २० ॥

20. Or if on the basis of the statement, “(The Brahman is) not this. . .,” (one accepted) the existence of concrete and abstract things (apart from the Brahman), (and) would (thus) be led to the acceptance of the Sāṃkhya doctrine,¹ then, (in order to obviate that difficulty) is stated “All this is the Ātman.”

NOTES

1. According to the Sāṃkhya, both *prakṛti* and *puruṣa* are existent. Hence, the Sāṃkhya is called a realist and dualist. He holds that all the worldly phenomena are real, since they originate from real *prakṛti*. As suggested by ‘if...(one accepted) ...’ in the verse, the Vedāntin would not remain in any way different from the Sāṃkhya. That is, the Advaita Vedāntin would be forced to hold the duality, giving up *kevalādvaita*, ‘absolute-monism’.

सत्यपि ब्रह्मवेदित्वे नासंत्यक्तैषणो यतिः ।

मुक्तिभागिति चेहोक्तः संन्यासेन समुच्चयः ॥ २१ ॥

21. An ascetic, who has not given up the desire, may not attain liberation even if he is a knower of the Brahman.¹ Therefore, the combination (of the knowledge of the Brahman) with renunciation is mentioned here (as a means to attaining liberation).

NOTES

In verses 19-20, the purpose of this section (viz. BUBV 2.4) was introduced, i.e. the oneness of the Brahman and the Ātman, all this is the Ātman. Here another purpose is described: Though it was stated before that renunciation is subsidiary to the knowledge of the Brahman, now is declared the combination of renunciation with the knowledge of liberation.

1. Here we find the suggestion of *vidvat-samnyāsa*. Thus the necessity of renunciation for liberation is introduced as one of the purposes of this section.

निरस्तातिशयज्ञानो याज्ञवल्क्यो यतो गृही ।

कैवल्याश्रममास्थाय प्राप तद्वैष्णवं पदम् ॥ २२ ॥

22. Because Yājñavalkya, a householder, who possessed the knowledge of that which surpassed all excellence, obtained the highest place of Viṣṇu,¹ after attaining the state of renunciation² (hence the combination of knowledge with renunciation is essential for liberation).

NOTES

By taking up the example of Yājñavalkya, the Vārtika confirms what was stated in the preceding verse, i.e. even if one has the knowledge of the Brahman, one cannot attain liberation without renunciation; the combination of knowledge with renunciation is essential for liberation.

1. Sureśvara uses the words *vaiṣṇavam padam* in PKV 62 also in order to convey the sense of the Brahman. And a similar expression *viṣṇoḥ paramam padam* found in SV 219 is first used in KathU 3.9 conveying the same idea. One

could notice the influence of Vaiṣṇavism on Sureśvara's expression for the Brahman. In TUBV also the word *viṣṇu* appears twice, i.e. at 2.374 and 380, conveying the sense of the Brahman. Also cf. Nais 1.1 which uses the word *hari* in a similar context.

2. The word *kaivalya* means *pārivrājya* 'separation from wives etc.' This stresses *saṁtyaktaiṣaṇo yatiḥ* in the preceding verse.

त्याग एव हि सर्वेषां मोक्षसाधनमुत्तमम् ।

त्यजतैव हि तज्ज्ञेयं त्यक्तुः प्रत्यक्परं पदम् ॥ २३ ॥

23. Indeed, renunciation is, for all, the best means to liberation,¹ for it is only by one who has renounced (lit. is renouncing) that the highest state of the individual consciousness can be attained.²

NOTES

This verse is the same as SV 215.

It is proved by inference as well as by the Smṛti that the knowledge combined with renunciation is the cause of liberation.

1. This is based on passages which mention that renunciation is the best means. These are: *tyāgenaike amṛtatvam ānaśuḥ* (KaivU 2, *MahānārāyaṇaU* 10.5); *naiṣkarmya-siddhiṁ paramāṁ saṁnyāsenādhigacchati* (BG 18.49).

2. This is the reply to the possible objection: 'Renunciation is the cause of liberation and not knowledge combined with renunciation (SP).'

मुक्तेश्च बिभ्यतो देवा मोहेनापि दधुर्नरान् ।

ततस्ते कर्मसूद्युक्ताः प्रावर्तन्ताविपश्चितः ॥ २४ ॥

24. The gods, being afraid of (men who would get) liberation, covered them with infatuation¹ (i.e. ignorance). Then they (i.e. men), the ignorant ones, began conducting themselves in action.

NOTES

This verse is almost the same as SV 218. SV 218 uses the word *avicakṣaṇāḥ* instead of *avipaścitaḥ*. The idea of the fear of

the gods is derived from BU 1.4.10. On this see MAHADEVAN's note on SV 218 (*op. cit.*, pp. 111-112).

1. The word *moha* is the synonym of *avidyā* or *ajñāna* 'ignorance'.

मोहमात्रैकहेतूनि तस्मात्कर्माण्यशेषतः ।

संन्यस्तैकात्म्यसंबोधाद्भित्त्वा मोहं विशुद्धधीः ।

ज्ञानमेवाऽऽत्मनाऽऽत्मानमुपासीनोऽमृतो भवेत् ॥ २५ ॥

25. Therefore, having completely abandoned actions which proceed only from infatuation (i.e. ignorance), the one of clear intellect¹ overcomes (lit. breaks or destroys) ignorance by knowing the oneness (of the individual consciousness with the Brahman); he of himself meditates on his own self (i.e. consciousness) as the Ātman which itself is knowledge (itself) and becomes immortal (i.e. liberated).

NOTES

1. Regarding *kramasamnyāsa* and *viśuddhadhiḥ*, see verse 2 and note on the same.

इति प्रमाणमत्रार्थे वचनं भाल्लविश्रुतौ ।

सर्वः संन्यस्तकर्मैव ज्ञानात्कैवल्यमश्नुते ॥ २६ ॥

26. In this respect, there is an authoritative statement in the Bhāllavi-Śruti, viz. Śruti attributed to Bhāllavin¹: "Only he who has given up action attains liberation² through knowledge."

NOTES

1. Bhāllavi-Śruti is the scriptural passage belonging to the school of the Bhāllavins, but a text thereof is not available; cf. SV 220 where Bhāllavin is referred to: *iti bhāllavi-śākhāyām adhiyate/ śarva-karma-nirāśena tasmād ātma-dhiyo janiḥ*||

2. The word *kaivalya* means 'liberation'. Cf. verse 22 note (2) where the word *kaivalya* is used in the sense of *pārivrajya*.

ब्रह्मचर्याद्गृहाच्चैव वनाच्चापि विधीयते ।

निःशेषकर्मसंन्यासो यतोऽतो नर्णबद्धता ॥ २७ ॥

श्रुत्या जाबालशाखायां तथा चानधिकारिणाम् ।

संन्यासस्य विधानान्च कार्योऽतोऽसौ मुमुक्षुभिः ॥ २८ ॥

27-28. Since renunciation of the entire action is prescribed even at (lit. from) the stage of a student, or of a house (holder) and of an anchorite, there remains (for one) no bondage of debt.¹ In the same way, there in the Śruti of Jābāla school renunciation is prescribed for those who are not entitled to perform the prescribed action (i.e. they are not eligible for the same), therefore, renunciation has to be accepted (undertaken) by those who are desirous of liberation.²

NOTES

This is the reply to the possible objection: 'There is impropriety of renunciation owing to the contradiction with the Śruti and the Smṛti which prescribe paying off the three debts.' SP points out to Sureśvara's intention thus: 'It is established in SV that the authoritativeness of the *arthavāda* in the Śruti and the Smṛti is not accepted if it is contradictory to an injunction.' (Cf. SV 540b-541a, 564b-567a) This is why the verse refers to *saṁnyāsaavidhāna*.

1. There is a mention in the Śruti and the Smṛti that a man has to pay back: (i) the debt to the sages, as a student; (ii) the debt to manes, as a householder; and (iii) the debt to gods, as a sacrificer; see the *Manusmṛti* 6.35: *ṛṇāni trīṇy apākṛtya mano mokṣe niveśayet | anapākṛtya mokṣaṁ tu sevamāno vrajaty adhaḥ ||*; the *Taittirīyasaṁhitā* 6.3.10.5: *jāyamāno vai brāhmaṇaḥ tribhir ṛṇāvā jāyate | brahmacaryeṇa ṛṣibhyo yajñena devebhyaḥ prajayā pitr̥bhyaḥ | eṣa vā anṛṇo yaḥ putri yajvā brahmacārīvāsi |* Cf. SV 436b-437a and SP thereon.

2. JābālaU 4: *yadi vetarathā brahmacaryād eva pravrajat gṛhād vā vanād vā | atha punar avrati vā vrati vā snātako vā asnātako votsannāgniko vā yad ahar eva virajet tad ahar eva pravrajat |* Cf. note (1) on verse 23 regarding the Śruti mentioning renunciation.

नरलोकादिकामानां सुतोत्पत्त्यादि साधनम् ।

तेभ्यो व्युत्थितचित्तानां संन्यासस्त्वात्मकामिनाम् ॥ २९ ॥

29. For those who have a desire for the world of men etc.,¹ begetting a son etc. is a means (to fulfilling the same,) but, in the case of those who are desirous of (the knowledge of) the Ātman (and) whose mind has risen above them (i.e. the objects of desire), renunciation is the means.

NOTES

This verse is the reply to the possible objection: 'Even if renunciation does not go against the authoritative Śruti in respect of *ṛṇa*, renunciation cannot be accepted as subsidiary to knowledge leading to liberation. It may be possible that by getting a son (etc.) or by acquiring the knowledge of the Brahman together with that (viz. getting a son etc.), one may get liberation. That is to say, renunciation is not all necessary.' Sureśvara replies that renunciation has to be accepted as subsidiary.

1. See BU 1.5.16 which mentions that *manuṣyaloka*, *pitṛloka* and *devaloka* are attained through a son, rites such as *agnihotra* and knowledge respectively: *atha trayo vāva lokā manuṣyalokaḥ pitṛloko devaloka iti so'yaṁ manuṣyalokaḥ putreṇaiva jayyo nānyena karmanā pitṛloko vidyayā devaloko . . .* |

इममर्थं श्रुतिर्वक्ति सर्वकर्मनिपेक्षिणी ।

प्रजादिना करिष्यामः किं तत्फलवितृष्णतः ॥ ३० ॥

30. The Śruti, indifferent to all action, states this¹ very thought: What should we do with a son etc., or with hankering for the fruit of having that, viz. a son etc.²

NOTES

1. BU 1.5.16: *atha trayo vāva lokā manuṣyalokaḥ pitṛloko devaloka iti so'yaṁ manuṣyalokaḥ putreṇaiva jayyo nānyena karmanā pitṛloko vidyayā devaloko devaloko vai lokānāṁ śreṣṭhaḥ tasmād vidyāṁ praśaṁsanti* |

2. The reading of the printed edition is *phalavitrṣṇataḥ*, but the other reading in the footnote *phalavitrṣṇavaḥ* (*phala-vi-trṣṇu*) 'not longing for fruit' is more suitable to the context. The manuscript of SP also shows this reading. But Sureśvara's

fondness for using ablative cannot be altogether overlooked.
Cf. verses 170, 275 etc.

उत्पत्त्यादिविरुद्धोऽयं लोको येषामकर्मजः ।

मोहमात्रान्तरायत्वाज्ज्ञानमात्रमपेक्षते ॥ ३१ ॥

31. (We hold that in the case of those) for whom this world is not subject to (lit. opposed to) origination etc. and not produced by any action, (it exists) on account of the obstacle only of infatuation (i.e. ignorance) (and therefore their liberation) expects¹ only of knowledge (of the oneness of the Ātman).

NOTES

31a states the reason why there is no hankering for a son etc. This explains *phalavitṛṣṇavaḥ*.

1. The word *apekṣate* requires words *teṣām mokṣaḥ* as its agent. Also *apekṣate* is equal to the word *avalambate* 'depends (on. .)'. Cf. SP: *mokṣaḥ sutādy-anapekṣaḥ cet kim apekṣya bhavati tatrā ha* /

प्रवृत्तिलक्षणो योगो ज्ञानं संन्यासलक्षणम् ।

तस्माज्ज्ञानं पुरस्कृत्य संन्यसेदिह बुद्धिमान् ॥ ३२ ॥

32. Yoga is characterized by activity and knowledge by renunciation. Therefore, having preferred knowledge (to Yoga) the intelligent one should renounce this world.

NOTES

This verse is a quotation from MBh 14.43.24b-25a and is the same as SV 217 as well as BUBV 3.5.4. It is shown on the basis of some Smṛtis that renunciation leads to knowledge.

भावितैः करणेश्चायं बहुसंसारयोनिषु ।

आसादयति शुद्धात्मा मोक्षं वै प्रथमाश्रमे ॥ ३३ ॥

33. Indeed this pure Ātman¹ attains liberation in the (very) first stage (of life) by means of the sense-organs properly brought under control in many transmigratory existences.²

NOTES

This verse is a quotation from MBh 12.313.26.

In verse 32 there is the prescription of renunciation. One would doubt if renunciation comes in following the order of the stages of life (*āśramas*). Sureśvara answers that one could renounce in any stage of life. In verse 34, he states that renunciation which is preceded by knowledge could not be overcome by any desire whatsoever.

1. This refers to one whose mind is purified. On this cf. the Introduction section 2. The word *ātman* refers to the *Jīvātman*. The case is the same with the *Ātman* in verses 37 and 38.

2. Cf. BG 4.5, 7.19 which speak of many births: *bahūni me vyatitāni janmāni tava cārjuna | tāny ahaṁ veda sarvāṇi na tvaṁ vettha paramtapa ||* (4.5), *bahūnām janmanām ante jñānavān mām prapadyate | vāsudevaḥ sarvaṁ iti sa mahātmā sudurlabhaḥ ||* (7.19). In tradition, chapter 18 of BG is called *mokṣasamnyāsayoga*; also cf. 18.2, 5-6, 12, 51-53; 2.47-48 and Ch. 5 which is called *samnyāsayoga*—this latter emphasizes *karmayoga*, 'action with detachment.'

तमासाद्य तु मुक्तस्य दृष्टार्थस्य विपरिचयः ।

त्रिष्वश्रमेषु कोऽन्वर्थो भवेत्परमभीप्सतः ॥ ३४ ॥

34. And in the case of one who has obtained that (liberation) (in the first stage¹), i.e. in the case of the intelligent one who has seen (i.e. experienced) the desirable,² what purpose would be there in the (subsequent) three stages of life?—he is one who is wishing for the highest.

NOTES

This verse is a quotation from MBh 12.313.27.

This is a discussion about one who would feel the necessity of the stage of a householder etc. when he has renounced at the stage of a student (SP). Sureśvara asserts, 'one who has renounced after feeling aversion to momentary fruits would get liberated and later would not feel the necessity of any stage of life.'

1. The statement that three stages of life are redundant implies *tam* (= *saṁnyāsam*) (*brahmacārye eva*) *āsādyā*. SP also supports this view.

2. *artha* = *parārtha* = *mokṣa* 'liberation' as *param abhīpsataḥ* shows. There is a play on the word *artha*. 'purpose'. In *drṣṭārtha* 'one who has acquired (lit. seen) the purpose' the author refers to *mokṣa* as the (highest) desirable object. Naturally, for such a *drṣṭārtha*, there is no *artha* in *gārhasthya* etc.

श्रुतयः स्मृतयश्चैव मस्मिन्नर्थे सहस्रशः ।

प्रत्यक्षा एव विद्यन्ते संन्यासप्रतिपादिकाः ॥ ३५ ॥

35. (Already) there exist thousands of Śrutis and Smṛtis¹ pointing to this thing, i.e. they preach renunciation.

NOTES

1. JābālaU 6: *saṁnyāsend dehatyāgaṁ karoti*; BU 3.5.1: *etaṁ vai tam ātmānaṁ viditvā brāhmaṇāḥ putraiṣaṇyāś ca vittaiṣaṇyāś ca lokaiṣaṇyāś ca vyutthāyātha bhikṣācāryaṁ caranti*; MuU 1.2.12; *parikṣya lokān karmacitān brāhmaṇo nirvedamāyān nāsty akṛtaḥ kṛtena / tadviññānārthaṁ sa gurum evābhigacchet samitpāṇiḥ śrotriyaṁ brahmaṇiṣṭhaṁ //* and the Manusmṛti 6.31: *aparājitaṁ vāsthāya vrajat diśam ajihmagah / ā nipātāc charirasya yukto vāryanilāśanaḥ //* Cf. note (1) on verse 23.

मुख्यार्थता वा प्रागुक्ता ब्रह्मेत्यस्य सदादृशि ।

प्रतीच्यथाऽऽत्मशब्दस्य मुख्यार्थो ब्रह्मणीयते ॥ ३६ ॥

36. Or rather it has been first stated that (the word) *brahman* has indeed as its primary meaning 'ever-seeing individual consciousness' and then is the primary meaning of the word *ātman* stated to be the Brahman.

NOTES

The first line of the verse states in brief the purport of the previous section, i.e. BUBV 2.3. And the second line states in brief the purport of the new section that has begun.

ततस्तदेतदिति च ब्रह्मात्मपदवाच्ययोः ।

मधुकाण्डार्थसर्वस्वं वाक्येन प्रतिपाद्यते ॥ ३७ ॥

37. And, therefore, by the statement, "This is that. . .," (which is to follow¹) is expressed the essential meaning of the Madhukāṇḍa,² (viz. the oneness of meanings expressed) in the two words *brahman* and *ātman*.

NOTES

The aim of BU 1-2 is reconfirmed as showing the oneness of the Ātman and the Brahman.

1. *tad etad brahmāpūrvam anaparam anantaram abāhyam* /
2. The Madhukāṇḍa refers to BU 1-2.

प्रत्यग्याथात्म्यविज्ञानजन्मनेऽतः श्रुतिः स्वयम् ।

विधित्सन्तीह संन्यासं मैत्रेयीति प्रवर्तते ॥ ३८ ॥

38. Therefore, seeking to prescribe renunciation (as a means to liberation), for the emergence of the knowledge¹ of the true nature of the Ātman, the Śruti itself begins with the word, "O Maitreyī".

NOTES

Renunciation is prescribed as subsidiary to the knowledge of the oneness, viz. liberation. This is the reassertion of BUB (p. 320): *pārivrājyaṁ sarvasādhanasamnyāsalakṣaṇam aṅgatvena vidhītsyate* /

1. The term *viññāna* means *brahmajñāna*.

भार्याद्यनुज्ञापूर्वो हि संन्यासो विहितः श्रुतौ ॥

अतोऽनुज्ञार्थमेवाऽऽह मैत्रेयीमृषिरात्मनः ॥ ३९ ॥

39. Indeed, in the Śruti¹, renunciation is prescribed only when it is allowed by a wife etc., therefore, the sage addressed (his wife) Maitreyī for (securing) her consent.

NOTES

1. This refers to the normal *kramasamnyāsa* 'renunciation at the fourth stage of life.' In the case of Yājñavalkya, the Śruti refers to *kramasamnyāsa*. This remark of Sureśvara is an answer to the possible question as to why Yājñavalkya who wanted to renounce sought the consent of his wife. Sureśvara does

not insist on *kramasamnyāsa* nor does he censure it. SP clarifies the idea of the verse thus: *mātaram pitaram bhāryām putrān suhr̥do bandhūn etān anumodayitoā ye ca anyartvijas tām sarvān pūrvavad vṛṇitvā vaiśvānarim iṣṭim kṛtvā sarvasvam dadyād* /—this brings out the purpose of *ādi* in *bhāryādin*.

उद्यास्यन्वा अरे स्थानादस्माद्गार्हस्थ्यलक्षणात् ।
चिकीर्षवे मे संन्यासमनुज्ञां दातुमर्हसि ॥ ४० ॥

40. “I am about to renounce this stage of life which is characterized as of a householder. You should give consent to me who am desirous of renouncing,” (says the sage Yājñavalkya).

NOTES

Commenting on BU 2.4.1, *udyāsyān vā are sthānād asmād . . .*, ‘I am about to give up this stage of life. . . .’

The difference of word-order between BU and BUBV (i.e. *asmāt sthānād* and *sthānād asmād*) is owing to exigencies of metre.

युक्तमाह भवानस्माननुरूपं चिकीर्षति ।
यदेवं सति कर्तव्यं तत्क्षिप्रमनुशाधि माम् ॥ ४१ ॥

41. (The wife said,) “You have told me (lit. us) the proper thing. (Indeed,) you desire to do what is (only) proper; therefore, please tell me quickly what is to be done (by me), when this is the case (i.e. you propose to renounce).”

NOTES

From this verse up to the 45th verse, Sureśvara comments on BU 2.4.1: *hanta te ’nayā kātyāyanyāntam karavāṇiti*, ‘Let me now divide property between you and Kātyāyanī’.

[Verses 42-44 are Yājñavalkya’s talk.]

अनुज्ञातोऽथ तामाह हन्तेत्यादि परं वचः ।
कात्यायन्या सपत्न्या ते विभागं करवाण्यहम् ॥ ४२ ॥

42. Thus allowed by her, he said to her, “Let me now divide my property between you and Kātyāyanī who is your co-wife.

1. The word *vitta* can mean both 'knowledge' and 'wealth' (which one is possessed of). It appears that Maitreyī is playing on the word; cf. the contrast of *dhana* and *jñāna*.

In verses 46-48, Sureśvara is adding some of the possible thoughts that would pass in Maitreyī's mind.

महानुभावसंपर्कः कस्य नोन्नतिकारणम् ।

अशुच्यपि पयः प्राप्य गङ्गां याति पवित्रताम् ॥ ४७ ॥

47. "(Tell me), for whom is not the association with persons of great eminence the cause of prosperity? See, (for instance,) even unholy water, when united with¹ Gaṅgā, becomes holy.

NOTES

SP quotes BG 9.32: . . . *ye 'pi syuḥ pāpayonayah | striyo vaiśyās tathā śūdrās te pi yānti parām gatim ||* and says that since women are sinful by nature (*pāpayoni*), they do not have any right to *·hitasādhana dhana = hitakara dhana* (i.e. *vitta*).

1. The word *prāpya* should be paraphrased as *saṅgamyā* 'having united (with. . .)'.

भगवत्संगतेनन्यः पुरुषार्थोऽमृतत्वतः ।

पृच्छाम्यतोऽमृतत्वस्य साधनं स्यात्कथं धनम् ॥ ४८ ॥

48. "There is no end of human life other (i.e. higher) than immortality which results from the association with you. Therefore do I ask you: How can wealth be the means to immortality (viz. liberation)?

NOTES

This is an explanation of *yan nu me iyaṁ bhagoḥ . . .*, "If now, sir, . . ."

सारेण यदि नामेयं पूर्णं स्याद्वसुना मही ।

तावताऽप्यमृताऽहं स्यां किंवा नेत्युच्यतां यथा ॥ ४९ ॥

49. "If, indeed, this whole earth (*mahi*) were filled with excellent wealth,¹ will it be that I could be immortal with all of that? Or shall I not be that? (Please) tell me.

NOTES

The question of Maitreyī was stated in the previous verse cryptically; it is now elaborated.

1. The words *vasu*, *vitta* (BU 2.4.2) and *dhana*, all mean 'wealth'.

सत्तामात्रोपकारीणि धनानि धनिनां न हि ।

क्रियाद्वारोपकारीणि यतोऽतः पृच्छ्यते क्रिया ॥ ५० ॥

50. "Indeed riches of the wealthy are not useful (beneficial to others) by their mere existence; (rather), they are beneficial (only) through the actions (which become possible therewith). Therefore, I ask you the purpose (served by your wealth)."

NOTES

This is an explanation of BUB (p. 322, line 4): *pr̥thivī pūr̥ṇa-vitta-sādhyena karmaṇā* ('*gnihotrādinā*'), "through the actions which can be performed with (the support of) wealth which is abounding in the earth", which paraphrases *tena* in BU 2.4.2. (p. 322, line 4).

On the question 'whether or not wealth can be a means to liberation,' Śaṅkara says, 'There is remote connection between the ritual which can be performed with the support of wealth and immortality implied in the question, 'Would I be immortal by means of that (wealth)?' Śaṅkara in KeU 1.2 also states: *amṛtā amaraṇa-dharmāṇo bhavanti* / "*na karmaṇā na prajayā dhanena tyāgenaike amṛtatvam ānaśuḥ*" (KaivU 1.2). . . *ityādi-srutibhyaḥ* /

प्रत्याह पृष्टः स्वां जायां नामृतत्वं धनादिति ॥ ५१ ॥

वित्तं चेन्नामृतत्वाय कस्माद् दित्सति तद्भवान् ।

इति पृष्टोऽब्रवीद्वित्तसाधनस्य प्रयोजनम् ॥ ५२ ॥

51-52. Thus asked, he answered his wife, "There is (indeed) no immortality through wealth". (As he was again) asked, "Why do you wish to give (us) wealth, if it does not lead to immortality?", he told her the purpose served by wealth as a means.

NOTES

Verse 51 is an explanation of *neti hovāca yājñavalkyaḥ*, “No, answered Yājñavalkya”. Verse 52 is based on *yathavopakarāṇa-vatāṃ jīvitam tathāiva te jīvitam syād....*, “Your life would be like that which is in the case of those who are with means. . . .”

[Verses 53-54 are Yājñavalkya's talk.]

क्षयिष्णुसाधनाधीनं जीवितं स्याद्यथा नृणाम् ।

तथैव तव वित्तेन जीवितं नामृतात्मता ॥ ५३ ॥

53. “Just as the life of men is dependent on perishable means, in the same way, indeed, is your life (also dependent) on wealth (as perishable means). (There is) no immortality (for you, through that).

अविद्यामात्रविध्वंसाज्ज्ञानादेवामृतं यतः ।

अमृतत्वस्य नाऽशाऽऽपि वित्तसाध्येन कर्मणा ॥ ५४ ॥

54. “Since immortality¹ (results) only from knowledge which is destruction (i.e. removal) of total ignorance alone, there is no hope whatsoever of immortality through action (which) can be performed with (the support of) wealth.”

NOTES

This is an explanation of BU 2.4.2: *amṛtatvasya tu nāśāsti vitteneti*, “However, there is no hope of immortality through wealth.” On this passage of BU, BUB says *amṛtatvasya tu nāśā manasāpy asti vittena vittasādhyena karmaṇeti* / In the second line of the verse, *vittasādhyena karmaṇā* is taken from BUB as it is and *api* means *manasāpi* in BUB. What is meant is this: Even if there is no hope of acquiring immortality through action which can be performed with the support of wealth, hope can be entertained in thought or dream etc. But by the words *manasāpi* (or, *api*) total negation of hope is intended.

1. The word *amṛta* is substituted by *amṛtatva* owing to the exigencies of metre.

कुतोऽमृतत्वसंप्राप्तिज्ञानमात्रं हेतुना ।
न कर्म कारणं मुक्तेर्नाग्निस्तापस्य भेषजम् ॥
कर्मभ्यो जन्म नियतं जन्म चेन्निवृत्तिः कुतः ॥५५॥

55. (One would ask:) Whence (can one say that) one would attain immortality solely by means of knowledge? Why, again, is not the action the means to liberation? (The answer is:) Indeed, fire² is not a remedy against heat. It³ is certain that birth follows from (various) action, and if there is birth, how could there be liberation?⁴

NOTES

1. The first two lines of the verse contain two questions with a view to elaborating the idea that immortality can be obtained through knowledge alone.

2. Fire stands metaphorically for *karman*; it is not a remedy (*bheṣaja*) against heat which stands for the transmigratory existence.

3. The third line of the verse shows that action is a hindrance to obtaining liberation.

4. The word *nirvṛtiḥ* shows the condition of the being (individual consciousness) whose covering is taken away. Cf. *saṁvṛti* which is the opposite of *nirvṛti* in GK : *saṁvṛtyā jāyate* (4.57); *saṁvṛtyā jāyate tu saḥ* (4.74)

स्वभावादेव साधूनां प्रवृत्तिरूपकारिणी ।

अपकारिण्यपि जने किमु भक्तजनं प्रति ॥५६॥

56. The activity of the good is, by its very nature, beneficial even to (i.e. in the case of) harmful people. What to say, then, (about its being so) in the case of the devoted people?

NOTES

Sureśvara's next verse is Maitreyī's question to Yājñavalkya and it implies some unaccounted for unkindness on the part of Yājñavalkya. Therefore, he wants to avert that possible implication and so this general maxim is prescribed.

[Verses 57-63 are Maitreyī's talk.]

62. “(Please) give (me) that wealth which has neither a beginning nor an end nor a middle and which does not perish even when enjoyed.

अनन्तवित्तो हि भवानन्तवद्दीयते कुतः ।

असतः कीदृशं दानं सदेवातः प्रदीयताम् ॥६३॥

63. “Indeed, you possess endless wealth (viz. knowledge¹), why then do you give me that (wealth) which has the end? What kind of a gift is that which is unreal (i.e. perishable)? Give me, therefore, that which is real² (i.e. perennial).”

NOTES

Here concludes the Vārtika on BU 2.4.3.

1. As in verse 60, here also, do we find a pun on the word *vitta* ‘knowledge’ or ‘wealth’.

2. There is an indirect mention of *sat* = *ananta* and *asat* = *antavat*. SP paraphrases *sat* as *jñāna* and *asat* as *ajñāna*.

संसारपुरुषार्थेभ्यो यतो नाव्युत्थितात्मने ।

मुक्त्येकसाधनं ज्ञानं दातुं शक्यमिदं मया ॥६४॥

अमुनुक्षुत्वमाशङ्क्य भवत्ये तत्प्रदित्सितम् ।

संसाराच्चेद्विरक्ताऽसि गृहाणानुत्तमामृतम् ॥६५॥

64-65. (He said to her,) “Since it is not possible to impart knowledge, which is the sole means to liberation, to one who has not risen above¹ (i.e. raised himself above) the ends of human life² in this transmigratory existence and since I doubted whether you have a desire for liberation, I wished to give you that, viz. wealth. Now, if you have turned averse to the transmigratory existence, accept then excellent immortality (viz. knowledge which leads to immortality).

NOTES

This is an explanation of *sa hovāca yājñavalkyaḥ...* (BU 2.4.4), “Then Yājñavalkya answered. . .”.

1. *saṁsārapuruṣārthebhyo. . .avyutthitātmane* constitutes *sāpekṣa-samāsa* ‘a compound whose dissolution expects the help of another word by the side of itself’.

2. The word *puruṣārtha* in this context means *dharma*, *artha* and *kāma*. Here Sureśvara develops his idea of four prerequisites (*sāadhanacatuṣṭaya*), i.e. *nityānitya-vastuviveka* is prescribed for *dharma*, *ihāmutraphala-bhogavirāga* for *artha* and *śamadamādisā-dhanasampat* for *kāma*. And he says that wealth is to be given to those who have not gone beyond these ends of human life, viz. who are *amumukṣu*. To a *mumukṣu*, is to be given the knowledge of the Brahman which is the last of the four prerequisites. Cf. the Introduction section 2 in connection with *sāadhanacatuṣṭaya*.

स्त्रीणां यदुचितं वाक्यं प्रतिलोमं न भाषसे ।

पूर्ववत्त्वनुकूलं त्वमिदानीमपि भाषसे ॥६६॥

66. “You have always spoken to me that which is (quite) natural for ladies to speak and is not disagreeable (to me); and even now you are speaking (to me) only (that which is) agreeable (even) as before.

NOTES

This is an explanation of *priyā batāre naḥ satī priyam bhāṣase*, “Already dear to me as you are, you speak to me that which is agreeable.”

SP points out how the women should speak to their husbands by quoting the *Manusmṛti* 5.152, 154: *viśīlaḥ kāma-vṛtto vā guṇair vā parivarjitaḥ / upacaryaḥ striyā sādhyā satatam devavat patiḥ // pāṇigrāhasya sādhyi stri jivato vā mṛtasya vā / patilokam abhipṣanti nācaret kvacid apriyam //* (but SP quotes *kuśīlaḥ* instead of *viśīlaḥ* and *pūjaniyaḥ* instead of *upacaryaḥ*.)

मोक्षं यान्तं नरं सर्वे मुञ्चन्ति सहजा अपि ।

अतिभक्तितया मां त्वं मोक्षेऽपि न जिहाससि ॥६७॥

67. “All persons, by their own nature, give up (the company of) a person who is seeking for liberation. You, however, do not wish to abandon me even while I am seeking for liberation because of your intense devotion to me.

NOTES

SP states the purpose of this verse thus: Śruti (the *Taittiri-yasamhitā* 6.1.8.5) has a statement, 'A wife is only half of oneself' (*ardho vā eṣa ātmano yat patnī*). Therefore Maitreyī shows agreeable intention towards him in both worldly and non-worldly ways. Yājñavalkya is pleased at the fulfilment of his wish (*svābhiprāyasampattaḥ tuṣṭaḥ*, BUB, p. 323) and intends to share his knowledge of immortality with her.

विभागमसहन्तीव मदतिस्नेहकारणात् ।

मुक्तावनुयियासि त्वं मदंकात्म्यपरीप्सया ॥६८॥

68. "Not tolerating (i.e. unable to endure) separation from me, as it were, owing to your great love for me, you wish to follow¹ me even in liberation with the full desire of being one with me.

NOTES

1. The verb *anuyiyāsi* contains the omission of the letter *sa* from *anu-yi-yā-sa-si*, since the desiderative should have been *-yi-yā-sa-si*. On such an un-Pāṇinian irregular formation, see HIRIYANNA's introduction to Nais (pp. xxxi-xxxii).

अतिस्नेहाऽपकृष्टोमा देहार्धं शूलिनः श्रिता ।

त्वं तु सर्वात्मनाऽऽत्मानं कृत्स्नं मामापनुमिच्छसि ॥६९॥

69. "Carried away by great love, Umā occupied half of Śiva's body. But you, on your part, wish to secure the whole of me, the Ātman, by your whole self.

NOTES

We find in this reference to Śiva whose half body is Umā, the mythological bias of Sureśvara. Cf. the *Raghuvaṃśa* 1.1: *vāgarthāḥ iva sampṛktau vāgarthapratipattaye / jagataḥ pitarau vande pārvatīparamēśvarau ||*

यत एवमतस्तुभ्यं वक्ष्याम्यमृतसाधनम् ॥

निदिध्यासस्व चेतोऽतो व्याचक्षाणस्य तन्मम ॥७०॥

70. “Since this is so, I shall, therefore, explain to you the means to immortality. And,¹ therefore, pay (complete) attention, while I am revealing (i.e. explaining) it to you now.

NOTES

This is an explanation of *ehy āssva vyākhyāsyāmi te vyācakṣāṇasya tu me nididhyāsasveti* (BU 2.4.4).

1. There are two ways of reading *cetaḥ*:

(i) *cetas* ‘mind’ and (ii) *ca itas* ‘and . . . now’. SP accepts (i) and explains the second line thus: ‘And, therefore, desire to profoundly meditate on the meaning of the words having concentrated the mind on my exposition of that (knowledge for liberation)’. But this is not satisfactory. The alternative (ii) seems to be better. The word order of the second line would then be *ataś ca nididhyāsasva itaḥ vyācakṣāṇasya . . .*

आ ब्रह्मणोऽस्मात्संसाराच्छुद्धधीर्न विरज्यते ।

यावत्तावन्न विद्याया अधिकारी भवेन्नरः ॥७१॥

71. “As long as a person of pure intellect¹ does not become averse to this transmigratory existence beginning with the Brahman (i.e. Hiraṇyagarbha, up to the blade of grass²), he is not eligible for the knowledge (of the Brahman).

NOTES

Already in verse 2 above, there is a reference to *vairāgya* which is one of the prerequisites for knowing the Brahman. Sureśvara takes up that point again with a view to explaining the passage in BU 2.4.5: *na vā are patyuh kāmāya patiḥ priyo bhavaty ātmanas tu kāmāya patiḥ priyo bhavati. . . ātmanas tu kāmāya sarvaṁ priyaṁ bhavati*, “Indeed, not for love of the husband is a husband dear, but for love of the Ātman is a husband dear. . . (Indeed, not for love of all is all dear,) but for love of the Ātman is all dear.” This verse shows that he who has not become averse (to this transmigratory existence) is not eligible for acquiring the knowledge of immortality.

1. On the word *śuddhadhiḥ* see verses 2 and 25 above and the Introduction. sections 2 and 10.

2. The phrase *ābrahmaṇaḥ* suggests *ābrahmastambaparyanta*. On this see the Introduction section 10.

[The discussion on aversion (*vairāgya*) continues up to verse 77 and see note on verse 2 above referring to *vairāgya*. The eligibility for knowledge of the Brahman of one who has been averse to this transmigratory existence will be again discussed at verse 93 onwards.]

वैराग्यहेतावप्यस्मिन्नक्तो धर्मादिहेतुतः ।

यतोऽतः कर्मशुद्धात्मा भवादस्माद्विरज्यते ॥७२॥

72. "Since on account of merit etc.¹, a person attaches (himself to this world) even though this (transmigratory existence) is the cause of aversion, therefore, one is purified by (the performance of) action and then turns averse to this world². (viz. transmigratory existence).

NOTES

This is in reply to the possible objection: viz. 'Since a bondage is of very momentary nature, there is the absence of any cause of attachment to that. Therefrom the aversion is established, of itself. Consequently, there is no need of the Śruti speaking about that bondage.' (SP)

1. The link of causation is shown in Nais 1.1, TUBV 2. 125-126 and BSB 1.1.4. Cf. BOETZELAER, *op. cit.*, p. 7.

avidyā-hetavaḥ kāmāḥ kāma-mūlāḥ pravṛttayaḥ |
dharmādharmau ca tan-mūlau deho 'narthāśrayas tataḥ ||
ato vidyā-nirodhe syān nirodho viduṣaḥ sadā |
niḥśeṣa-karma-hetūnām vikārāṇām tadaiva tu ||

(TUBV 2.125-126).

2. *bhava* = *saṁsāra*, from $\sqrt{bhū}$ 'to become'; it refers to *utpattyādi*.

वैराग्यहेतुसंसारे तस्माद्यत्नादियं श्रुतिः ।

न वा अर इति ह्युक्त्या वक्तुं समुपचक्रमे ॥७३॥

73. "Therefore, indeed, it is that this Śruti text (which commences) with the words *na vā* are began specifically to state the cause of aversion to this world.

NOTES

BU asserts here the causes of one's aversion to worldly belongings etc., such as their perishable nature and so on and then proceeds to state the words *na vā are . . .* for one whose mind is purified through the performance of action, since even in that state one may yet desire for some enjoyment. Cf. SP. on the same.

यस्मिन्नेव परा सक्तिस्तस्मिन्नेव निरादरम् ।

कर्म कृत्वा परं यत्नादन्यस्यार्थयते फलम् ॥७४॥

74. "On performing action without any regard whatever to that (viz. the transmigratory existence) towards which one (naturally) has the greatest attachment, one desires the enjoyment (lit. fruit) of another (i.e. knowledge¹).

NOTES

This is in reply to the possible objection: 'If the worthlessness of the transmigratory existence is stated for bringing about one's aversion to the results of action, how does action performed generate purity?' A worldly person has an extreme attachment in respect of heaven etc. On account of performing *kāmyakarman* (or *pratiṣiddhakarman*) he loses the respect for purity. But by means of performing *nityakarman* (or *naimittika-karman*) with no personal interest, he can get his intellect purified, become averse to the results of action, and might expect some unexcelled fruit of knowledge.

Cf. BG 3.19: *tasmād asaktaḥ satataṁ kāryaṁ karma samācara / asakto hy ācāraṁ karma param āpnoti pūruṣaḥ ||*

"Therefore, do always perform action to be done without attachment. For, one who performs action without attachment attains the highest, viz. liberation (through the purification of mind)." The bracket is supplied with the help of BGB.

1. Cf. NKL, p. 830 footnote.

किमिक्षो रसमाप्नोति यत्नान्निष्पीडयन्न ना ॥७५॥

75. "Why ! Does not a man get the juice of sugarcane when he presses it with effort ?

NOTES

This is in reply to the possible objection: 'There is no desire to know the Brahman through purification of mind even by performing *nityakarman* etc. since such a desire is not noticed in the case of persons like us. Just as one obtains the juice of a sugarcane by pressing it in a machine, so does one obtain the fruit of action, viz. the desire to know the Brahman by performing *nityakarman* etc. with the intention to offer its fruit to God, on the basis of the Śruti; (quoted in SP) *yena kenacana* (not traceable yet).

तीव्रदुःखोद्भवो बुद्धौ संस्कारो यावदेव तु ।

तद्विपक्षः सुखं तावदल्पं तत्संक्षये क्षयः ॥७६॥

76. So long as there is an impression in the mind of that great grief (which is entailed in the ritualistic performances which lead to pleasures), there arises slight pleasure which is its opposite. When (however), there is destruction of that (viz. little pleasure), there occurs the destruction (of all misery).

NOTES

This is in reply to the possible objection: 'There is no desire to know (the Brahman) through purification (of the intellect) by means of performing *nityakarman* etc. because there is the experience of pleasure and therefore there is no aversion (also)'. Aversion depends not on purification of the intellect but on the need for that. Acute misery consists in the effort of performing what leads to pleasure. And so long as hankering (or pleasure) which has arisen from that (misery) is there, there is to follow the pleasure of senses and sense-objects which are opposed to that pleasure. And that pleasure is very short-lived and it ceases to be there when misery also ceases because of its invariable association with it. And therefore that pleasure also is not important and therefore one should not have any attachment to pleasure.

शीतमल्पं सुखं ग्रीष्मे तापोऽल्पः शिशिरे सुखम् ।

तदेव दुःखकृद्भूरि तद्धेतवोरनवस्थिते ॥७७॥

77. “In summer, cold (though only) little, is pleasant, (and) in winter, is heat (though only) little, pleasant; but the same would cause great misery when its causes (viz. summer and winter) have remained no more.

NOTES

The verse states the reason for the recognition of pleasure and its cause, in the light of an example in our daily life. It implies that pleasure, be it small or great, is essentially misery. As such, when the causes of pleasure, viz. *dharma* and *adharma*, are overcome, there remains no misery whatever.

शब्दोऽस्ति न प्रियः कश्चिदप्रियो वा स्वतस्तथा ।

रक्तद्विष्टमनो हेतुः शब्दाद्यर्थे प्रियाप्रिये ॥७८॥

78 “Word is not agreeable or disagreeable (to one), by its own nature. In case of a thing such as a word etc. (which is considered as) agreeable or disagreeable, the cause is one’s mind which is attracted (towards it) or abhorrent (of it).

स्वतोऽखिलोऽप्रियोऽनात्मा प्रत्यङ्मोहैकहेतुतः ।

प्रत्यगाह् लादकारित्वादप्रियोऽपि प्रियो मतः ॥७९॥

79. “All the non-Ātman¹ is disagreeable by (its own nature), since it has the ignorance of the individual consciousness² as its sole cause. But (the same), though by nature disagreeable, is taken as agreeable when it causes delight to the individual consciousness.³

NOTES

Verses 78-79 state the agreeableness and disagreeableness of the non-Ātman. The first line points out that agreeableness and disagreeableness of the non-Ātman is not by its own nature. That which makes a thing agreeable is *manas* tinged with *rāga* etc., and preceded by the superimposition of *śobhanāśobhana*. Verse 79 elaborates the second line of verse 78: The superimposition of *śobhanāśobhana* on *manas* as a cause of agreeable or disagreeable feeling is pointed out to be the effect of ignorance of the individual consciousness. A second

cause is added in the second line of verse 79: The non-Ātman, disagreeable as it is by nature, is the object of the function of *dhi* (= *buddhi*) which reveals the joy (*ānanda*), the nature of the individual consciousness. (SP)

1. The word *anātman* refers to *śabdādi* 'a word etc.' explained in the previous verse.

2. Here we can find full support for the fact that the *pratyag* in BUBV always means *pratyagātman*.

3. The second line gives the essence of *ātmanas tu kāmāya sarvaṃ priyaṃ bhavati* where *ātman* is a reflexive pronoun, expressive of the individual consciousness. Cf. E. ROER, *The Twelve Principal Upanishads*, Madras: Theosophical Publishing House, 1931, vol. II, p. 238.

जायादिरप्रियः सर्वः स्वत आद्यन्तदुःखकृत् ।

तद्वेतोरात्मनः प्रीतेर्जायादिः प्रिय उच्यते ॥८०॥

80. "All objects such as a wife etc. are disagreeable by their own nature, because they are the causes of misery both in the beginning and in the end. On that account (only), it is said that a wife etc. are agreeable, when they bring delight to the individual consciousness.

NOTES

Though every object is disagreeable from the philosophical point of view, viz. because it is *ādy-antaṃ-duḥkhaḥkṛt*, it is taken as agreeable on the worldly level because it is *pratyagāhlāda-kāri*, viz. it causes delight in the individual consciousness. Also cf. verses 82, 84 and 85 below.

न कस्यांचिदवस्थायामात्मा लोकेऽप्रियो मतः ।

प्रियोऽप्रियश्च जायादिर्यथाऽनात्मा मूहुर्मूहुः ॥८१॥

81. "In no condition is the Ātman considered to be disagreeable (to anyone) in this world. A wife etc. like any non-Ātman is time and again considered agreeable and disagreeable as well.

NOTES

This is in reply to the possible objection: 'One's own self is unsteady, since a desire to cut oneself, viz. to commit suicide,

can be sometimes seen. Although there is the desire to cut the body, no discrepancy would be concluded as to the love for its own nature. The Ātman is of the nature of pleasure alone.' (SP)

स्वत एवाप्रियोऽनात्मा ह्यात्मप्रीत्यर्थसाधनात् ।

जायादिः स्यात्प्रियो भक्त्या बन्धक्याः कामुको यथा ॥८२॥

82. "Although the non-Ātman such as a wife etc. is not agreeable by its own nature,¹ it is said to be an object of pleasure for the individual consciousness,² (only) secondarily, just as³ a paramour (is considered to be agreeable) to a libertine.

NOTES

This is in reply to the possible objection: 'If the non-Ātman is by nature disagreeable, it cannot be agreeable even though it is meant for the Ātman since it is impossible for one to have the nature of the other. Supposing for instance, a man is not fire by his own nature, he can still be called fire in a secondary sense (*bhaktyā, lakṣaṇayā, upacāreṇa*), because he is of the nature of fire (i.e. cause of fear) and therefore the characteristic of fire is transferred to him. Likewise, the non-Ātman is disagreeable by nature, still it is secondarily agreeable since the Ātman (the individual consciousness) seeks it for pleasure and the nature of pleasure is then transferred to the non-Ātman.

1. This is already stated in the first line of verse 80.

2. *ātma-prīty-artha-sādhana* = *pratyagātmānandārtha-kāraṇāt*.

3. According to SP, *bandhaki* stems from *bandha* and is the synonym of *pumścali, asati, kulaṭā itvari*. (Cf. the *Amara-kośa* 2.6.10). A reading *vardhaki* in place of *bandhaki* is noted by SP, though it is not supported by any manuscript used by the editor. A paramour is not really agreeable to a libertine but he becomes agreeable (i.e. acceptable) only because he gives her the pleasure of money.

निर्हंतुकी स्वतः प्रीतिरात्मन्येव यतस्ततः ।

भाक्तं प्रियं परित्यज्य मुह्यं प्रियमुपाश्रयेत् ॥८३॥

83. "Since the delight of the individual consciousness does not proceed from any cause, therefore one should give up the thing which is agreeable (only) metaphorically and take to the thing which is agreeable (only) primarily.

NOTES

This verse concludes the discussion that the Ātman is by nature agreeable and the non-Ātman is by nature disagreeable.

क्षयान्ता निचयाः सर्वे पतनान्ताः समुच्छ्रयाः ।

संयोगा विप्रयोगान्ता मरणान्तं च जीवितम् ॥८४॥

84. "All collections end in destruction, all rises (or riches) end in decline, all unions end in separation, (so also) all (worldly) life ends in death.

NOTES

This verse is quoted from MBh 13. appendix 15.3967-8 and the *Rāmāyaṇa* 2.105.16. Sureśvara uses this quotation with the intention of seeking the support of Vyāsa, the author of MBh, for pointing out the transitoriness of worldly pleasure and its cause.

Cf. the maxim: *itihāsapurāṇābhyām vedam samupabṛmhayet*; also one cannot overlook the traditional belief that Vyāsa was the compiler of the *Brahmasūtra*.

न तदस्ति सुखं लोके यन्न दुःखकरं भवेत् ।

तदसम्प्राप्तिविच्छेदक्षयेष्वसुखकृद्यतः ॥८५॥

85. "There is no pleasure in this world which does not cause misery, since that (pleasure) causes misery (if and when it is) unobtained, or separated, or (has) a destruction.

NOTES

Cf. verse 77 above.

एवं चेत्साधनोद्भूतं यावत्किञ्चित्सुखं मतम् ।

तन्निःशेषं परित्यज्य सुखमात्यन्तिकं श्रयेत् ॥८६॥

86. "If, for this reason one considers as pleasure whatever is produced by some means, then giving it up entirely, one should be after (lit. take to, i.e. seek) the pleasure which is absolute.

NOTES

It is shown that as long as pleasure is caused by anything it causes misery.

सांसारिकसुखस्यास्य दुःखत्वादुक्तहेतुतः ।

निष्कृष्यातस्ततः प्रीतिं प्रतीच्येव निवेशयेत् ॥८७॥

87. "Since for the reason (thus) stated¹ all this worldly pleasure is misery², therefore,³ one should first turn away (lit. draw out) (the idea of) pleasure from it (i.e. any object in the world) and then find (lit. place) it (viz. pleasure) in the individual consciousness.

NOTES

This is in reply to a possible objection: 'The love for pleasure derived from the sense-objects is considered by people as imperishable—this has been so stated in the Smṛti (as SP states); "Pleasure of those who cannot discriminate one object from another is imperishable". (Quotation untraced) Therefore, one might say one should not give up the enjoyment of the object.'

1. See the verses 80-81 above.

2. Whatever is called pleasure (*sukha*) is nothing but misery (*duḥkha*). Cf. SK 2: *dr̥ṣṭavad ānuśravikaḥ sa hy aviśuddhi-kṣayātisaṃyuktaḥ* which points to the fact that the pleasure promised by *śrutivihitakarman* is also with an end and therefore a cause of sorrow.

3. The word *atas* refers to the earlier ablative, i.e. *duḥkhatvāt*.

स्रजि दण्डादयो यद्वत्स्रगज्ञानैकहेतुकाः ।

पतिजायामुताद्येवं प्रत्यगज्ञानहेतुजम् ॥८८॥

88. "As a stick etc. are (perceived) in the place of a garland solely on account of the non-perception (lit. absence of

proper knowledge) of a garland, so (also the notion that) a husband, a wife, a son, etc. (are a source of pleasure) is caused by ignorance about the individual consciousness.

NOTES

The illustration is given in order to show that the worldly notion of pleasure from a wife or a son etc. results from non-knowing of one's self.

सर्वानर्थनिवृत्तिश्च सर्वाह्लादाप्तिरेव च ।

प्रतीचि ज्ञानमात्राच्चेत्तदन्यत्प्रार्थ्यते कथम् ॥८६॥

89. "If there is, for an individual (consciousness), the removal of all undesirable results and the acquisition of all pleasures merely on account of knowledge, how is it then that a thing other than that (pleasure in the Ātman) is solicited (by one)?"

NOTES

SP explains this verse thus: One should give up the non-Ātman and love the Ātman because no pleasure is possible in the non-Ātman which has arisen from ignorance and because two-fold human aims, viz. *dharma* and *mokṣa* are attained merely by the knowledge of the Ātman.

Sureśvara has in mind the Śruti: *yathā hy évaiṣa etasminn adṛśye 'nātmnye' 'nirukte 'nilayane 'bhayaṁ pratiṣṭhāṁ vindate/ atha so 'bhayaṁ gato bhavati* / "For truly, when one finds fearlessness as support in Him who is invisible, bodiless, undefined, without support, then has he reached fearlessness." (TU 2.7. 1. Trans. S. RADHAKRISHNAN, *The Principal Upaniṣads*, London: George Allen and Unwin Ltd., 1953, p. 549).

यस्य सम्बन्धमाश्रित्य ह्यप्रियोऽपि प्रियायते ।

प्रियोऽप्यप्रियतां याति यस्य सङ्गतिकारणात् ॥८७॥

दृष्ट्वाऽनुभवतस्तत्त्वमात्मानात्मपदार्थयोः ।

उपादित्सा जिहासा च तत्कृतवानुपालयताम् ॥८८॥

90-91. "(Pleasure should be sought in that, viz. the Ātman) depending on contact (with which) even a disagreeable thing

becomes agreeable, (and) on account of whose close association whatever is agreeable becomes disagreeable. Having known the reality of objects denoted by the word *ātman* and *anātman* through experience¹, one should entertain a desire to accept or to abandon what is related to them² (i.e. *ātman* and *anātman*).

NOTES

1. The word *ātmapadārtha* means *asmatpratyayagocara* and the word *anātmāpadārtha*, *yuṣmatpratyayagocara* respectively as shown in BSB 1.1.1.

2. The desire to accept (*upāditsā*) that the Ātman is the highest reality, i.e. *pūmartha* 'the end of human life' and the desire to abandon (*jihāsā*) that the non-Ātman is not the highest reality, i.e. it is 'not the end of human life'.

नानाप्रकार आसङ्गो विषक्तो योऽस्य बाह्यतः ।

यथोक्तकारणात्सर्वं प्रतीच्येव निवेशयेत् ॥६२॥

92. "Whatever attachment of various kinds has clung to it, (viz. the Ātman) from (any) exterior (object) is owing to the reason (already) stated.¹ (Therefore) one should place (viz. find) (attachment) in the individual consciousness.

NOTES

The end of human life can be found only in the Ātman and nowhere else because of the reason stated in verse 90.

1. See verses 90 and 91.

नरकादिव निविण्णो यावन्नाऽऽब्रह्मणो नरः ।

न तावदधिकारोऽस्ति कैवल्यज्ञानवर्त्मनि ॥६३॥

93. "So long as a man is not averse to this whole universe beginning with the Brahman¹ (i.e. Hiraṇyagarbha), as if (averse) to the hell², he has no eligibility (to tread) on the path of knowledge of liberation³.

NOTES

Up to the previous verse the aversion to the non-Ātman has been stated. Here is stated that no eligibility for knowledge

is possible in the case of one who is not so averse to the non-Ātman.

1. See note (2) on verse 71.

2. He seems to express the idea that there exists such unpleasant abode for beings as *naraka* etc. whose descriptions we come across in later Purāṇas but do not have any description of *naraka* etc. in Upaniṣads or Śaṅkara's Bhāṣyas.

3. This term is used in the Sāṅkhya to denote final emancipation resulting from discrimination of *puruṣa* from *prakṛti*. See note (2) on verse 26.

सर्वासङ्गचिन्मिर्मुक्तो मोक्षमात्रप्रयोजनः ।

अतोऽधिक्रियते प्रत्यग्ज्ञानोत्पत्तौ न रागवान् ॥६४॥

94. "Therefore¹, a person is eligible in respect of rise of knowledge of the individual consciousness if he is fully free from all attachment and he has liberation alone as his purpose and not the one who has any attachment."

NOTES

1. The word *atas* means that aversion is conducive to the rise of knowledge and attachment is obstructive to it.

आत्मा प्रत्यक्प्रसिद्धेः स्यात्तत्रैवाऽऽत्मानुभूतितः ।

इति प्रमेयनिर्देशो द्रष्टव्य इति तत्प्रमा ॥६५॥

95. The Ātman¹ is (talked about) on account of (the commonly accepted) knowledge of the individual consciousness, because one experiences it (viz. the Ātman) in that (viz. one's own consciousness). Thus (in the sentence "The Ātman is to be seen, . . ." which will follow) there is the mention of the object of knowing (and the word) *draṣṭavyaḥ* refers to the right knowing of it (viz. the object of knowing).

NOTES

Whatever has preceded explained the portion of the BU beginning with *na vā are patyuh* . . . up to what immediately precedes the sentence *ātmā vā are draṣṭavyaḥ*. Now is to be explained the meaning of the word *ātman*, used in the

sentence *ātmā vā are draṣṭavyaḥ*. (SP) In the first line Sureśvara proves the commonly accepted meaning of the word *pratyag*. In the sentence *ātmā vā are draṣṭavyaḥ* the Ātman is stated as the object of knowing. When the Ātman (viz. the individual consciousness) is the object of knowing, the Vedic sentence is the means of knowing it. The Vedic sentence can give the correct way of knowing the nature of the Ātman. In this sense, the seeing (or knowing, *darśana*) of the Ātman (the individual consciousness) is the object of knowing, there possibly arises the objection as in BSB 1.1.1 (p. 2): *katham punaḥ pratyagātmani aviṣaye 'dhyāso viṣaya-tad-dharmāṇām? sarvo hi puro 'vasthite viṣaye viṣayāntaram adhyasyati | yuṣmat-pratyayāpetasya ca pratyagātmano 'viṣayatvaṁ braviṣi* / For such an objection there is a reply of Śaṅkara: *aparokṣatvāc ca pratyagātma-prasiddheḥ* / 'And because the individual consciousness is established on account of its immediate presentation.'

1. The word *ātman* means the Jīvātman as stated earlier. In the following verses, this meaning is kept in view.

आत्मबुद्धिरियं तावत्सर्वेषां जायते स्वतः ।

अप्राप्ता सर्वमात्मेति सेवातो धीर्बिधीयते ॥६६॥

96. As for the awareness of one's own individual consciousness, it is patent to oneself (i.e. it is cognized through itself, i.e. by its mere being there in one). (But the knowledge) "All this is the Ātman" is not obtained (in the same way.) Therefore, the knowing of that¹ (knowledge) is prescribed (in the injunction, "The Ātman is to be seen,").

NOTES

This verse refers to the view of a *vidhivādin* who holds *ātmā vā are draṣṭavyaḥ* as an injunction: The suffix *tavya* is known to be prescriptive (of some action) and then it prescribes (a) the seeing (viz. knowing) of the Ātman which has been already known to all, or (b) the securing of the knowledge, i.e. the oneness of the Brahman and the Ātman. The *vidhivādin* refutes the alternative (a) in the first line and accepts the alternative (b) in the second line.

1. The words *buddhi* and *dhi* have usually the same meaning 'knowledge', but here the word *dhi* is used to express the sense, 'act of knowing'.

द्रष्टृद्रष्टव्ययोर्भेदे सत्येवं धीविधीयते ।

नियोज्यविषयाभेदे घटते न विधिर्यतः ॥६७॥

97. Such (act of) knowing is prescribed only when there is (grasped, i.e. accepted, by one) the distinction between the knower and the object of knowing; for, (indeed), in case there exists no distinction between the one who is enjoined and the object towards which his action is directed, (the prescription of) an injunction does not stand to reason.

NOTES

To such a *vidhivādin's* view about an injunction in verse 96, Sureśvara says: Such an injunction is possible when (i) the oneness of the Brahman and the Ātman is not known, or (ii) the oneness is known. Not (i); because the object of knowing is absent (the first line). Nor (ii); because of no distinction between one who is enjoined and the object (*niyojya-viṣaya*) which is indispensable to an injunction. Hence the injunction is impossible as to the sentence *ātmā vā are draṣṭavyaḥ*

उत्तरोत्तरभूयांसि नामादीनि यथाक्रमम् ।

उपन्यस्याऽऽत्मयाथात्म्यं तत्तत्त्वं प्राब्रवीच्छ्रुतिः ॥६८॥

98. Having introduced in (order one after another), name etc.¹, each latter of higher importance, the Śruti text declared the real nature of the Ātman (and) that to be the 'Truth'.²

NOTES

After proving that there exists no distinction between *niyojya* and *viṣaya* (for the oneness of the Brahman and the Ātman is known), Sureśvara keeps in mind an objection on the basis of *bhūmā tv eva* . . . (CU 7.23.1) which concludes a series of injunctions as regards various objects of knowing as the Brahman and then answers it: Prescribing the 'Truths' beginning

with *nāma* and ending with *prāṇa* in order, and showing that each latter 'Truth' is greater, he only goes to prove that the real nature of them all is *bhūman* 'infinite', viz. the Ātman, alone through taking support from the Śruti, *bhūmā tv eva vijijñāsitavyaḥ* . . . 'But the infinite is to be known. . .' (CU 7.23.1).

1. CU 7.1.4-7.15.4 declares *nāma*, *vāc*, *manas*, *saṁkalpa*, *citta*, *dhyāna*, *viññāna*, *bala*, *anna*, *ap*, *tejas*, *ākāśa*, *smara*, *āśā* and *prāṇa* in ascending order (of the 'Truths'.) These 'Truths' are enumerated in CU 7.26.1 also. The word 'Truth' (*tattva*) does not really refer to the Brahman, but name etc. which are tentatively taken to be the Brahman in the course of discussion for the sake of understanding.

2. The reading should be *tat tattvaṁ* instead of *tat tatvaṁ*.

भूम्नश्च लक्षणं चक्रे यत्र नान्यदिति स्वयम् ।

अथ यत्रेति चाल्पस्य प्राणान्तस्य च लक्षणम् ॥६६॥

99. Further¹ (the Śruti text²) itself defined the 'infinite' *bhūman*, (i.e. the Brahman) in the words, "Where there is nothing else (that is called *bhūman*)," and defined also 'the finite' (*alpa*, i.e. small one) (whose enumeration begins with that of *nāma* and) ends with (the mention of) *prāṇa* in the words, *atha yatra*. . . .

NOTES

This verse points out how *bhūman* alone is the Brahman and therefore to be known. It points to the definition of *bhūman* in CU 7.24.1: *yatra nānyat paśyati nānyac chṛṇoti nānyad vijānāti sa bhūmā* / *atha yatrānyat paśyaty anyac chṛṇoti anyad vijānāti tad alpam* / Also cf. Nais 2.57 and Cand on the same.

1. There are three *cakāras* in this verse. The first *cakāra* in the first quarter expresses that verse 98 and 99 retain the same idea. The second *cakāra* in the third quarter combines with the first line. The third *cakāra* in the fourth quarter makes an additional argument that *nāma* to *prāṇa* are not the Brahman.

2. This Śruti, viz. CU 7.24.1, comes immediately after CU 7.23.1 which has been dealt with in the note of the previous verse.

the nature of it (viz. the Ātman), (and then) declares to us that all this is the Ātman.

NOTES

Here is an assertion of the correspondence of BU with CU and other Upaniṣads.

1. *sa eṣa neti nety ātmā* (BU 3.9.26, 4.2.4, 4.4.22, 4.5.15); also cf. *adeśo neti neti* (BU 2.3.6).

भावाभावात्मना स्थानं न निषेध्यस्य वस्तुनः ।

यतोऽतः सर्वमात्मैव प्राब्रवीच्छ्रुतिरञ्जसा ॥१०५॥

105. Since a thing which is to be denied¹ cannot have existence as an entity or a non-entity, therefore the Śruti text declares in clear terms that all this is the Ātman.

NOTES

1. The word *niṣedhya-vastu* means any object of our awareness, which is denied by BU 3.9.26 to be the Brahman; cf. note on the preceding verse.

नाव्युत्थितमनाः कश्चित्प्रतीचोऽन्यत्प्रपश्यति ।

व्युत्थितात्माऽपि चाऽऽत्मानं पश्यन्नेवान्यदीक्षते ॥१०६॥

106. A person whose *manas* has not become operative¹ does not perceive anything other than the inner consciousness. Also a person whose Ātman has² become operative perceives things other than the inner consciousness, while it is perceiving the inner consciousness as well.

NOTES

Sureśvara has already pointed out why injunction is not required when the Brahman is both known and unknown. Now he points out another reason for it.

1. The word *avyutthitamānas* is explained thus: *avyutthitamānas* means *manas* which is not operative. In this state, no subject-object relation (viz. duality) is perceived. This state of *manas* is possible in deep sleep and is like *amanibhāva* in GK 3.31: *manodrśyam idaṁ dvaitaṁ yat kiñcit sacarācaram/ manaso hy-*

amanibhāve dvaitam naivopalabhyate/, Mai U 6.34. (*amanastā* in GK 3.32).

2. For *vyutthitātman* cf. verse 104 above.

स्वातन्त्र्यं यत्र कर्तुः स्यात्तत्र कर्ता नियुज्यते ।

अन्वयव्यतिरेकाभ्यामात्मानात्मविवेचने ॥१०७॥

107. An agent is enjoined to do that (thing) in (respect of) which he has a freedom (to choose the course of action). (Therefore, there is the Vedic injunction¹) as regards discrimination between the Ātman and the non-Ātman by the method of *anvayavyatireka*.²

NOTES

'If in respect of the knowledge of the Ātman, whether known or unknown, there cannot be any injunction, what then is enjoined by the word *draṣṭavyaḥ*?' In reply to this objection a statement is made as to when an injunction is laid down.

1. This is supplied on the basis of SP: *viddhir iti śeṣaḥ*.

2. See the Introduction section 7.

वचोर्थप्रतिबोधस्य पदार्थाज्ञानमेव तु ।

यतोऽन्तरायस्तद्वानौ तेन तत्र नियुज्यते ॥१०८॥

108. Since ignorance of that which is signified by the word(s) alone is a hindrance to becoming aware of the sentence-sense; therefore a person is enjoined to determine¹ that which is signified by different words, i.e. to remove ignorance of that which is signified by word(s).

NOTES

One might object: The *vākyārtha* can be understood merely from the sentence; what is then the need of an injunction that one should find out the *padārtha* by the method of *anvayavyatireka*. This verse is in reply to that.

1. The words *taddhānau* and *tatra* mean *padārthājñānadhv-astau padārthasodhane* respectively, according to SP.

एवं ज्ञातपदार्थः सन्यथा पूर्वमवादिषम् ।

ब्रह्म वा इदमित्यत्र न्यायेनैकात्म्ययायिना ॥१०६॥

निस्तन्तरायो वाक्यार्थं वाक्यादेवावगच्छति ।

अव्यावृत्तानुगतप्रत्यक्तत्त्वसमीक्षणात् ॥११०॥

109-110. Thus having known that which is signified by the word(s) (in a sentence), as I have said in consonance with the rule that is related to the oneness (of the Brahman and the Ātman) a person gets to know the sentence-sense in the sentence, "The Brahman is indeed all this", from the sentence itself without any hindrance, on the proper pondering over the true nature of the individual consciousness which is not differentiated from and followed by anything else.

NOTES

Here Sureśvara refers to his comment on BU 1.4.10 and 11 which is to this purport: On hearing the Vedic sentence, one immediately understands (i.e. realizes) its meaning; the method of *anvayavyatireka* helps one to assert the meanings of the words in a sentence. This makes one aware of the real nature of the inner consciousness. This awareness is not produced (i.e. conveyed) by any means like a sentence in common parlance.

नित्यमुक्तत्वविज्ञानं वाक्यादेवाञ्जसा भवेत् ।

वाक्यार्थस्य च विज्ञानं पदार्थस्मृतिपूर्वकम् ॥१११॥

अन्वयव्यतिरेकाभ्यां पदार्थः स्मर्यते ध्रुवम् ।

एवं निर्दुःखमात्मानमक्रियं प्रतिपद्यते ॥११२॥

111-112 The awareness¹ (that the Ātman is) eternally liberated can result straight from the Śruti statement.² And the awareness of the sentence-sense is preceded by the remembrance of that which is signified by the word(s). One firmly recollects (or, recognizes) by the method of *anvayavyatireka*³ that which is signified by the word(s). Thus does one know the Ātman as free from misery and inactive.⁴

NOTES

Verse 111 is almost same as SV 206 whose second quarter is *vākyaḥ bhavati nānyataḥ* and verse 112 is the same as SV 207.

1. The word *viññāna* is loosely used as equivalent to *jñāna*.
2. Sureśvara expresses his agreement with Śaṅkara in that the knowledge of the Brahman is acquired only from Vedānta sentence. Cf. BSB 1.1.4 (p.11) : *tad brahma sarvajñam sarvaśakti jagadutpattisthitikāraṇam vedāntaśāstrād eva avagamyate* |
3. Sureśvara replies to an objection: 'What is the purpose in explaining *padārtha* by the method of *anvayavyatireka* ?'
4. Through the knowledge of Vedic sentence such as *tat tvam asi* there remains (only) the immovable (i.e. consciousness).

प्रत्यङ्मोहोद्भवानात्मप्राधान्येन तमोन्वयात् ।

आत्माऽऽत्मानं पुराज्ञासीद्वाक्यार्थज्ञानजन्मतः ॥११३॥

अनात्मनोऽत आत्मानमन्वयव्यतिरेकतः ।

निष्कृष्याऽऽत्मन्यथाऽऽत्मानं सर्वमात्मेति पश्यति ॥११४॥

113-114. Before the rise of the knowledge of the sentence-sense the Ātman (i.e. the individual consciousness) is in association with ignorance and therefore it knows itself as principally being the non-Ātman (which has but) arisen from ignorance on the part of the individual consciousness. Therefore, one first distinguishes (lit. separates) the Ātman from the non-Ātman by the method of *anvayavyatireka*¹ and then² one knows (lit. sees) the Ātman (viz. the Brahman to be) in the Ātman (viz. individual consciousness) and also that all this is the Ātman.

NOTES

Once again Sureśvara asserts here that the limitation of knowing only the sentence-sense by the method of *anvayavyatireka* is in respect of the words in it.

1. See the Introduction section 7.

2. The word 'then' refers to 'removal of ignorance together with its effects.' Here 'effect' means 'grasping reality otherwise (*anyathāgrahaṇa*)', caused by ignorance, and also, joy etc. derived from *anyathāgrahaṇa*.

अज्ञातज्ञापनं चातो विधिरत्राभिधीयते ।

अप्रवृत्तप्रवृत्तिश्च न्यायाभावात्त युज्यते ॥११५॥

115. And, therefore, the Vedānta sentence is to be considered as an injunction informing one of what is not known (before). But¹ (lit. and) it does not stand to reason to say that the injunction makes one inclined towards an action (which was never undertaken before), for there is no reason² (of such a doing).

NOTES

It is shown that an injunction has been laid down in respect of explaining the **padārtha** which is understood by the method of *anvayavyatireka*. Now it will be shown that it would not be wrong to accept that there is an injunction which makes known what is not already known (*ajñātajñāpana*), viz. the knowledge of the sentence-sense.

There are two implications in respect of an injunction, (i) *ajñātajñāpana* regarding the matter of knowing and (ii) *appravṛttappravṛtti*, 'instigation towards some act which one normally does not take to.' In the context of the knowledge of the Brahman, the injunction is intended to be *ajñātajñāpaka* but not *appravṛttappravṛtti* (*kāraṇa*). Sureśvara clarifies that no action is possible in respect of knowledge—see BSB 1.1.4: *nanu jñānaṁ nāma mānasi kriyā . . .* where Śaṅkara has elaborately discussed that knowledge is not action.

1. The reading in the footnote is *tu* instead of *ca*. The word *tu* seems better because the two lines of the verse state two implications in contrast.

2. Here the word *nyāya* means 'reason'. Verse 168 uses the word in the same sense; cf. GK 2.3: *abhāvaś ca rathādināṁ śrūyate nyāyapūrvakam* for *nyāya* in this very sense; Śaṅkara's comment on it is *yuktitaḥ*.

नित्यं न भवनं यस्य यस्य वा नित्यभूतता ।

न तस्य क्रियमाणत्वं खपुष्पाकाशयोरिव ॥११६॥

116. As in the case of sky-flower or sky, so in the case of that whose being produced is never (possible) or that which is ever being (i.e. whose existence is eternal), there cannot be (an injunction as to its) being produced.

NOTES

This verse (which is identical with TUBV 2.15 and BUBV 4.3. 1596) clarifies why the previous verse uses the word *nyāyābhāva*:

The example of sky-flower or sky points to the general rule as regards the impossibility of producing the knowledge (or awareness of the Ātman which is ever existent). A sky-flower, eternally non-existent, or sky, eternally existent, cannot be ever produced and therefore there cannot be any injunction as to the production of the same. This would point to the futility of any injunction in respect of *ātmajñāna*.

उत्पत्त्यादि स्वतो यस्य चात्यन्तमेव न ।

क्रियानपेक्षसिद्धत्वात्स्वतः सिद्धं तदुच्यते ॥११७॥

117. That is called self-established which exists in its own right, and whose origin etc. (from anything else) cannot (or, is not) asserted; for it is (already) existing independent of (anybody's) activity.

NOTES

There are three kinds of existents: (i) those whose existence depends on origin etc., e.g. a pot, (ii) those whose existence is independent of origin etc., e.g. sky, and (iii) non-existence, e.g. a sky-flower. Though the case (i) needs action for its existence, the cases (ii) and (iii) do not. The Ātman is the case (ii); it already exists and does not come into existence on account of any other thing. This is called *svataḥsiddha* 'self-established'.

उत्पत्त्यादौ तु यच्छक्तं हेतुमात्रमपेक्षते ।

साफल्यं कर्मणस्तत्र तदभिव्यक्तकृद्धि तत् ॥११८॥

118. Whatever is capable of origin etc. expects only a cause. In such a case (somebody's) action becomes fruitful. For, that (i.e. action) causes the manifestation of it (i.e. effect).

NOTES

The first line of this verse is identical with TUBV 2.14 (first line) and BUBV 1.4.814 (first line).

Wherever there is *kārya-kāraṇa* relation there is usefulness of action. For, action makes *kāraṇa* manifest in the form of *kārya*. Only in such a case, i.e. when action is possible, an injunction

can be assumed. To the contrary, there is no *kārya-kāraṇa* relation, i.e. no origin etc. is possible in case of the Ātman; therefore, neither action nor an injunction is possible. Here the idea of *kāryakāraṇa* relation is introduced. Cf. SK 9: *asad-akaraṇād upādāna-grahaṇāt sarva-sambhavābhāvād | śaktasya śakya-karaṇāt kāraṇa-bhāvāc ca satkāryam ||*

कार्यं कारणतन्त्रं स्यात्तत्तत्स्याऽऽत्मलाभतः ।

अन्यकार्यमकार्यं च नान्यत्कारणमीक्ष्यते ॥११६॥

119. An effect depends on a cause, because it (the effect) comes into existence owing to that (the cause). We do not see there any cause of that which is not the effect of another or which is not (of the nature of) an effect.

NOTES

The impossibility of an injunction regarding the Ātman and its knowledge is being mentioned on the basis of the *kārya-kāraṇa* relation.

सर्वमात्मेति या बुद्धिः स प्रमेयबलाद्भवेत् ।

प्रमातृतन्त्रा सा चेत्स्यात्प्राप्ता लोकाग्निबुद्धिवत् ॥१२०॥

120. The knowledge that all (this) is the Ātman arises from the strength of a thing (which is) to be known (i.e. the Ātman itself). If that knowledge depended on a knower (viz. the individual who possesses a body, sense-organs etc., it could be) obtained like (the knowledge of) the worldly fire.

NOTES

A question may be asked: 'What do you want to prove by showing that there is no injunction possible in respect of the Ātman and its knowledge?' In reply Sureśvara says: Since the Ātman is not something to be achieved through action, there is no expectation of an injunction; its knowledge also, though possible on the strength of a means of knowing etc., is not *puruṣatantra*, i.e. it is not to be accompanied by desire or exertion on the part of a person dependent on an injunction in that respect. The second line is in reply

to the objection: 'It is not established that the knowledge of the Ātman does not depend on a person's desire or effort'. On this cf. BSB 1.1.4. (P. 18): *nanu jñānam nāma mānasi kriyā/na/vailakṣaṇyāt/ kriyā hi nāma 'sā yatra vastusvarūpanirapekṣaiva codyate puruṣacittavyāpārādhinā ca / yathā "yasyai devatāyai havir gr̥hitam syāt tām manasā dhyāyed vaṣaṭ kariṣyan" iti "saṁdhyām manasā dhyāyet" iti caivamādiṣu / dhyānam cintanam yady api māna-sam tathāpi pūruṣeṇa kartum akartum anyathā vā kartum śakyam puruṣatantratvāt / jñānam tu pramāṇajanyam / pramāṇam ca yathā-bhūta-vastuviśayam / ato jñānam kartum akartum anyathā vā kartum na śakyam kevalam vastutantram eva tat na codanātantram nāpi puruṣatantram / tasmān mānasatve 'pi jñānasya mahadvailakṣaṇyam / yathā ca "puruṣo vāva gautamāgniḥ" "yoṣā vāva gautamāgniḥ" ity atra yoṣitpuruṣayor agnibuddhir mānasi bhavati / kevalacodanājanyatvāt tu kriyaiva sā puruṣatantrā ca / yā tu prasiddhe 'gnāv agnibuddhiḥ na sā codanātantrā nāpi puruṣatantrā / kiṁ tarhi pratyakṣaviśayavastutantraineti jñānam evaitat na kriyā / evam sarvapramāṇaviśayavastuṣu veditavyam /*

अतोऽपुरुषतन्त्रत्वान्नात्मज्ञाने विधिर्भवेत् ।

अन्वयादिक्रिया त्वस्य तत्तन्त्रत्वाद्विधीयते ॥१२१॥

121. Therefore there is no injunction possible in respect of the knowing of the Ātman,¹ since it (i.e. knowing the Ātman) does not depend on a person (i.e. his desire or effort). However, the process of *anvaya* etc. is prescribed here because it depends on that (viz. a person).

NOTES

The statements in the Śruti such as *dyauḥ agniḥ*, *lokaḥ agniḥ*, *yoṣid agniḥ* etc. lead to one's cognition of fire at least for some while. But the knowledge of the Ātman would not arise from the statement: *idaṁ sarvaṁ yad ayam ātmā*, for if the statement were taken as an injunction, it would point to the limitation on the Ātman like in the case of *loka* etc. With such an objection in view, the author writes the present verse.

1. *ātmajñāne vidhiḥ* = *ātmaviśaye ātmajñānaviśaye ca vidhiḥ*; cf. SP: *ātmani tajjñāne cety arthaḥ*

श्रवणं मननं तद्वत्तथा शमदमादि यत् ।

पुमाञ्शक्नोति तत्कर्तुं तस्मादेतद्विधीयते ॥१२२॥

122. In the same way (are prescribed) hearing about (and) pondering over (the nature of the Ātman). Also whatever (be it, whether) mental control, control of the external senses etc., a person can do it; therefore (all) this is enjoined.

NOTES

The first line explains the idea of *anvayādikriyā* 'the action of *anvayavyatireka*' done by a person and the second clarifies it further. [Verses 123-125 state two reasons why the Ātman is not the object of an injunction.]

विशिष्टेहानुभूतिश्च सर्वमानफलं यतः ।

फलं च न विधेयं स्यादतो नेदं विधीयते ॥१२३॥

123. And since here a peculiar kind of experience is the result of all means of knowing, and because the result is not the object of any injunction,¹ therefore this (viz. the knowing of the Ātman) is not enjoined.

NOTES

Another reason is given why there is impossibility of the Ātman being the object of an injunction. The experience which is the result of all means of knowing and is characterized by *satya*, *ānanda* etc. is the very nature of the Ātman; it cannot be enjoined, like other fruits of action such as attainment of heaven.

1. An injunction is always in respect of some activity which produces some result. The knowledge of the Ātman is not in any way produced by any human activity.

प्रमाणमप्रमाणं च प्रमाभासं च यद्भवेत् ।

चैतन्याकारमेवैतत्प्रथते सर्वमेव तत् ॥१२४॥

124. Whatever be it—a means of knowing, no means of knowing and appearance of right knowledge—all that is (i.e. these things are) nothing but a form of sentiency.

NOTES

Regarding that the knowing of the Ātman is not enjoined, yet another reason is given in this verse: The means of knowing etc., all appear to be imagined in sentiency. Therefore, since the sentient being is the substratum everywhere, it is not to be an object towards which one is enjoined to act.

नानकारानुपादत्ते चेतन्याकारमेव सत् ।

प्रतीच्यव्यभिचार्येकं तदन्ये व्यभिचारिणः ॥१२५॥

125. The existent, which has the form of sentiency, itself assumes manifold forms; it is but one invariable present in the individual consciousness. All other things, viz. the non-Ātman, are variable.

NOTES

The Brahman is partless and of the nature of sentiency; it becomes the support of many particulars having attributes. Therefore, the Brahman, which has no attributes of its own, cannot be enjoined as an object of some action. The second line states a further reason: The nature of the Ātman, sentiency, is homogeneous (*ekarasa*), and it is invariable, while the non-Ātman is always variable.

मात्रादिव्यभिचारेऽपि संविदव्यभिचारिणी ।

मिथः कृत्स्नेऽपि जगति तदन्यद्व्यभिचारि तु ॥१२६॥

126. Although objects of sense or sense-organs etc.¹ are variable, the cognizing principle² is ever invariable. But in the entire world, all things other than that (viz. cognizing principle) are variable in relation to one another.

NOTES

This is a reply to a possible objection: 'Sentiency of the Ātman is also variable in deep sleep.'

1. The word *mātrā* may mean 'object of cognition' or 'means of cognition, sense-organs.' However, in his Bhāṣya on BG 2. 14: *mātrā-sparśās tu...*, Śaṅkara clearly states that the word *mātrā* means 'sense-organs such as the ear'. However,

one might be inclined to interpret *mātrādi* to stand for *mātr*, *māna* and *meva* which give rise to experience in the state of sleep. But the contrast between *saṁvid* and *mātrādi* does not allow one to do so. The word *mātr*, thus understood, is really not different from the word *saṁvid* which stands for 'knower' as well as 'knowing'.

2. The word *saṁvid* means cognizer, i.e. individual consciousness (cf. SP which says *saṁvid* means *cit*) or knowledge itself.

उत्पन्नमपि सज्ज्ञानं प्रमातृत्वाद्युपग्रहात् ।

तदनुत्पन्नवद्भाति तद्ध्युत्पत्तेः पुरा नृणाम् ॥१२७॥

127. The knowledge (about the Ātman) does not appear to have come into existence even though it has already arisen and is in existence (as we say in our common dealings) because it has been grasped as a knower etc., before one has really understood¹ (the nature of the knowing which is not other than the object of knowing).

NOTES

In reply to the objection: 'if the Ātman is of the nature of sentiency, its knowledge is always established, therefore, an injunction such as hearing etc. about the Ātman would be useless.', Sureśvara states: Even though the knowledge is always present in the individual consciousness, it is overpowered by notions about it as a knower etc. and therefore appears as not obtained. For this reason, hearing etc. are prescribed, in the worldly way. Cf. BSB 1.1.1 (p.2): *tam etam avidyākhyam ātmānātmanor itaretarādhyāsam puraskṛtya sarve pramāṇa-prameya-vyavahārā laukikā vaidikāś ca pravṛttāḥ. . . .*

1. This is possible with the help of what looks like an injunction, viz. *śrotavyaḥ* etc.

व्युत्पाद्यते यदा साक्षाद्यथोक्तन्यायवर्त्मना ।

उत्पन्नमेव विज्ञानं तदा प्रागपि मन्यते ॥१२८॥

128. When this awareness is directly brought to one, following the argument¹ (already) stated, the person considers that knowledge² was already in existence even before.

NOTES

The result of one's following the injunction discussed above, is given: Through hearing etc. one gives up the misconception about the Ātman as a knower etc. and knows the meaning (significance) of the word *tvam* as the Ātman without a second. We say: 'This knowledge is attained' though it was there, only covered with illusion.

1. The word *nyāya* means reasoning. Cf. note on verse 115.
2. The word *vijñāna* is nothing but *jñāna*. Cf. note on verse 112.

स्वसाक्षिकं सर्वस्य न वेद्योत्यपि या मतिः ।

किमु वेद्यीति बुद्धिः स्याच्चिदतोऽप्यभिचारिणी ॥१२६॥

129. Whatever be the thought of an individual, be it the thought 'I do not know', also be it the thought 'I do know', it has only the individual consciousness as the cognizer;¹ the cognizing principle (viz. sentiency) is not different (lit. variable) in every cognition.

NOTES

One might object that knowledge is variable because of non-observation of particular kind of knowledge before enlightenment and because one feels that one has obtained enlightenment. In reply Sureśvara states that the Ātman is invariable. *cit* 'sentiency' is *sākṣin* of *jñāna* and *ajñāna*, which has the form of cognition: 'I do know' and 'I do not know'. That is, both *jñāna* and *ajñāna* rest on sentiency.

1. The word *cit* means *saṁvid*. See note on verse 126.

आत्मेति मेयनिर्देशो वेशब्दस्तत्स्मृताविह ।

प्रमातृक्रियया व्याप्तिर्द्रष्टव्य इति भण्यते ॥१३०॥

शब्दानुरोधतस्तावदीदृगत्रोपजायते ।

भूतेरनुभवः साक्षाद्यथावस्तु न वेति वा ॥१३१॥

विचार्यमाणोऽनुभवो रूप्यशक्त्यनुभूतिवत् ।

प्रमाणमप्रमाणं वा मेयसंगत्यसंगतेः ॥१३२॥

130-132. Here (i.e. in the Vedic sentence, *ātmā vā are draṣṭavyaḥ*) (the word) *ātman* refers to (or, denotes) the object of knowing and the word *vai* states the remembrance of it as the ascertained (decided) object.¹ By (the word) *draṣṭavyaḥ* is stated the acquisition (i.e. attaining proper understanding of the object of knowing) by the activity (viz. effort) of a knower. In this respect (i.e. in respect of the knowing the Ātman) such (knowledge) arises when one follows (the meaning of) the word. (As compared to the knowledge obtained) from the Śruti, experience may or may not be in conformity with the object (to be known).² The experience which is subject to reasoning³ is like the experience of (a piece of) silver or conch-shell; it is valid or invalid knowledge because of its agreement or disagreement (with the nature) of the object of knowing.⁴

NOTES

In earlier portion, it has been refuted that the sentence, *ātmā vā are draṣṭavyaḥ* was intended to be an injunction. Now follows the refutation of the meanings obtained from the words severally.

1. The word *vai* means *niścitam* as noticed in Brāhmaṇa literature several times.

2. I.e. it is not as certain (right).

3. The words *vicāryamāṇo 'nubhavaḥ* are explained by SP as *brahmātmani mātrādibhedadhiḥ*. The words *mātr+ādi* used by SP can be understood in three ways: (i) *mātrādi* 'a knower etc.', (ii) *mātrā+ādi* where *mātrā* is 'cognitive mechanism such as senses' or alternative (iii) *mātrā+ādi* 'object of knowing'. Even though the use of (ii) is seen in verse 126, it does not hold good in this case. In the case of (i) *mātrādibhedadhiḥ* means 'cognition of distinction such as a knower in respect of the Ātman, but this leaves some vagueness. But, on second thought (when we take into consideration the next verse, *pramāṭrmeyabhedo. . . .*) this appears intended by Sureśvara. In the case of (iii): *mātrādibhedadhiḥ* means *vividhaviśayabhedagrahaṇa*, 'cognition of various objects', for that is subjected to reasoning, compared as it is with *rūpyaśuktyanubhava* 'experience of (a piece of) silver or conch-shell'.

4. The word *rūpyaśukti* can be better taken as *vaikalpika dvandva*, i.e. *rūpyam vā śuktir vā*. This seems to be justified by *meyasaṁgatyaṁgateḥ*. The experiences of silver in silver and of conch-shell in conch-shell are cases of *meyasaṁgati*, but the experiences of silver in conch-shell and of conch-shell in silver are cases of *meyāsaṁgati*. Thus is explained the word *meyasaṁgatyaṁgati*.

प्रमातृमेयभेदोऽत्र न तावद्गम्यते मितेः ।

प्रत्यग्धीमात्रगम्योऽर्थो यस्मादात्मेति निश्चितः ॥१३३॥

133. To begin with, there do not arise from (what is taken as) accurate knowledge in this respect (i.e. in respect of the Ātman), discrete notions such as (this is) a knower (and this is) an object of knowing etc. since the object to be understood only from the (correct) knowledge of the individual consciousness is determined to be (none other than) the Ātman itself.

NOTES

Here Sureśvara states the reason for explaining the ideas of the preceding verses. The general rule which has been given in the second line of the preceding verse does not hold in the case of the knowledge of the Brahman, because there are no discrete notions of a knower and an object of knowing and he supports this by stating the Vedāntic conclusion that the Ātman is self-luminous.

प्रत्यग्धीगोचरो नो चेदनात्माऽसौ घटादिवत् ।

ब्रह्मादिमध्यपातित्वं ततश्चास्य प्रसज्यते ॥१३४॥

134. If the Ātman were not grasped as identical with (lit. within the sphere of) the individual consciousness, it would be the non-Ātman like a pot etc. and thence would (necessarily) follow that the Ātman is included among the (range of) objects beginning with the Brahman¹ (i.e. Hiraṇyagarbha) (up to the blade of grass).

NOTES

This verse is for refuting the doubt: 'It is not established that the Ātman is self-luminous', which arises on hearing the

argument of the preceding verse. The word *pratyagdhigocara* is to be understood as *pratyagdhimātragamyā* in the previous verse. The argument is: As a pot which is the object of knowing for an individual is distinct from the consciousness within him (i.e. the pot is the non-Ātman), so, would the Ātman (mentioned in the preceding verse as the object of knowing) be the non-Ātman.

1. Cf. the phrase *ā brahmastambaparyanta*; see note (2) on verse 71.

विभिन्नद्रष्टृदृष्ट्याप्तिर्घटादेरिव नाऽऽत्मनः ।

न चाभेदेऽस्ति संख्याप्तिरेकात्म्यादेव कारणात् ॥१३५॥

135. In the case of the Ātman, the acquisition of a certain understanding by a knower (who is distinct from the object) is not possible as it is in the case of a pot etc. And (when a knower and an object of his knowing are) not distinct, there is no (possibility of) acquisition (of any kind) just for the reason of the oneness (i.e. uniqueness) of the Ātman.

NOTES

In verse 134 is stated that the Ātman cannot be an object. Now in the first line of this verse Suresvara states that the Ātman does not enter on 'the activity of knowing'. The first half of the second line states that there is absence of *saṃvṛtyāpti* (= *saṃāpti* as SP states) of the Ātman. The second half refers to *aikātmayajñāna* as the cause for its being so.

न च द्रष्टाऽऽत्मनोऽन्योऽस्ति द्रष्टृन्तरनिषेधनात् ।

न च द्रष्ट्रोद्वयोलोके द्रष्टृदृश्यत्वसंगतिः ॥१३६॥

136. There is no seer (of the Ātman) other than the Ātman itself, for there is a denial (in the Śruti) of another seer¹ and it is nowhere seen in the world that the character of a seer and an object of seeing can be spoken of two seers.

NOTES

The possible argument 'somebody else than the Ātman is its knower', is refuted: The first line takes support from the

Śruti: *nānyo'to 'sti draṣṭānānyo 'to 'sti śrotā*. . . (BU 3.7.23). The refutation in the second line is clarified by SP thus: When we accept two seers, we should consider (a) two seers are equal, or (b) they are not equal. If (a), it is impossible to suppose a subject and an object like in the case of a lamp which needs no other lamp for its illumination. If (b), there is no means to prove inferior and superior nature between two sentient (beings). Thus, it is impossible to establish the knower of the Ātman. SP points out the outcome of this discussion: The Ātman is not understood by the discrete knowledge.

1. Cf. BU 2.4.14: *viññātāram are kena vijāniyāt*; BU 3.8.11: *nānyad ato 'sti draṣṭr*.

क्रियाविरोधः प्राप्नोति द्रष्टुः स्वात्मसमीक्षणे ।

तद्दृष्टेर्नित्यसंप्राप्तेर्विध्यानर्थक्यसंगतिः ॥१३७॥

137. If (we accept the notion that) a seer can see himself, (there would follow) impossibility of that activity.¹ And since (in that case) he² (the seer) would always possess the knowledge (of himself), it would be only reasonable to understand the injunction as useless.

NOTES

The view of a possible opponent is given—it pertains to another defect in the view that the Ātman is the seer of itself.

1. SP explains *kriyāvirodha* thus: There is one act of seeing, i.e. knowing. And if it is held that the Ātman is both the seer (i.e. the agent) and the seen (i.e. the object), then it would mean that only one entity, the Ātman, has prime importance as the subject (i.e. agent) and secondly as the object—herein lies the difficulty: One and the same word is related to the verb twice.

2. Since the Ātman can see with its own will there is no need of an injunction. Or, the Ātman's action does not depend upon an impulse from a Śruti passage.

[The previous verse has dispensed with the need of an injunction for an individual whose act of seeing the Ātman (i.e.

the individual's own consciousness) depends on his own will. Yet an objector would persist in stressing the need of such an injunction. His objection is as regards the nature (qualification—*adhikāra*) of the Ātman who may be (i) transmigratory, or (ii) non-transmigratory; this objection is refuted in the following verses, i.e. 138-142.]

संसार्यात्मनि दृष्टेऽपि न च किञ्चित्प्रयोजनम् ।

अयमेव च नोऽनर्थो यत्संसार्यात्मदर्शनम् ॥१३८॥

138. It serves no purpose to get to know (lit. see) that the Ātman is subject to the transmigratory existence, for it is indeed undesirable for us to get to know that the Ātman is transmigratory.

तदन्यस्याप्रसिद्धेश्च कथं स्यात्तत्समीक्षणम् ।

अथ प्रसिद्धोऽसावात्मा तद्दृष्टिः किं विधीयते ॥१३९॥

139. If the other (i.e. the non-transmigratory, is supposed to become known), (we say) it is not established (i.e. known as such). 'How then will it be possible to see it?' If, on the contrary, (it is held) that the Ātman is established,¹ (we ask) 'where is the need to enjoin that one should see the Ātman?'

NOTES

1. The argument on *prasiddhatva* or *aprasiddhatva* of the Brahman is found in BSB 1.1.1: *tat punar brahma prasiddham aprasiddham vā syāt. . .*, where Śaṅkara says that the Brahman is generally known, still not known in detail, for the detailed knowledge sake, *jijñāsā* is necessary.

द्रष्टृदर्शनदृश्यानां प्रात्यक्ष्यान्नाऽगमेक्षणम् ।

द्रष्टुरात्मा पृथक्चेत्स्यात्पृथगात्मेति दुर्वचः ॥१४०॥

140. (If it is thus held that) a seer, (his) act of seeing and the (object he has) seen are within the purview of direct perception, there is no need of the injunction of the Śruti¹ for seeing (the Ātman). Also, if the Ātman is (held to be) different from the seer, (we reply) it is wrong to say that the Ātman is different (from the seer).²

NOTES

Verse 140 states yet another reason for that the seeing of the transmigratory Ātman cannot be the purpose of any injunction.

1. Because a thing which is directly perceived in the world does not expect any Vedic injunction for seeing it. The very idea of a Vedic injunction involves the laying down of what is not known otherwise, i.e. from any means other than the Vedic injunction.

2. The reason for this has already been accounted for in verse 134 above.

न चाऽऽत्मन्यप्रसिद्धे स्यात्संसारस्य प्रसिद्धता ।

न ह्यप्रसिद्धसम्बन्धी सम्बन्धः क्वचिदिष्यते ॥१४१॥

141. And if the Ātman is not established, the transmigratory existence (of it also) could not be established, because nowhere is such a relation¹ observed (lit. desired, or accepted) as existent of which the constituents are not established.

NOTES

Verse 141 continues the discussion of the second line of verse 140: Suppose we accept that the Ātman exists apart from the seer, i.e. as the object of his action of seeing. Even then a Vedic injunction regarding the seeing of it by one is necessary, for the Ātman is not like other objects of experience; its properties such as being above hunger etc. are not known except from the Vedic text. Next the verse raises some important and pertinent questions: How can one assert that the Ātman, which is accepted as the object of seeing, is subject to the transmigratory existence, for such an assertion is based on grasping the relation of the Ātman and other objects of the transmigratory existence? To say that the Ātman is not known as other existential entities and also that it is related to other known things is only unwise.

1. SP paraphrases the word *sambandha* as *samsāra*.

न चेदात्माभिसम्बन्धः संसारोऽयं समीक्ष्यते ।

तन्मुमुक्षत्वमायातं कुतो हेतोरितोर्यताम् ॥१४२॥

142. If (it is held that) this transmigratory existence is not related to the Ātman, then it should be pointed out as to how the desire of liberation has arisen (on the part of the Ātman).

NOTES

One might take a stand on what the Sāṃkhya says, viz. that transmigratory existence is related to the *antaḥkaraṇa* but not the Ātman. To this Sureśvara answers: Since now the Ātman is not related to the transmigratory existence *mumukṣutva* cannot be asserted on it, because *mumukṣutva* is possible only on the transmigratory.

अनृतन्त्रे विधिर्नेष्टो बन्ध्यापुत्रोद्भवे यथा ।

मातृतन्त्रे तथैवायं न विधिः प्रत्यगीक्षणे ॥१४३॥

143. An injunction¹ is impossible if it (i.e. the activity involved in it) does not depend on (the activity or desire of) a person as the birth of a son of a barren woman (which does not depend on any person). So also an injunction regarding seeing (viz. thinking of the individual consciousness) is not (possible) since (that seeing) depends on the cognizing principle² itself (viz. the individual consciousness).

NOTES

1. It has been established that the seeing of the Ātman, whether transmigratory or non-transmigratory, cannot be the object of an injunction. This is proved through an illustration. It is stated that the Ātman cannot be the object of one's seeing because it does not depend for its existence on anyone else.

2. On the word *mātr*, see note (3) on verse 130. It means here only 'cognizer'.

नानाद्रव्यसमायोगे वियोगे च घटात्मनः ।

वियत्संपूर्णता नित्या वियत्सक्तेरवर्जनात् ॥१४४॥

शब्दादिबाह्यसम्बन्धे विभागे च तथा धियः ।

प्रत्यक्चतन्यसम्बन्धो नित्यो नित्यात्मसाक्षिकः ॥१४५॥

यतोऽतः पाक्षिकी प्राप्तिर्नेहास्त्यंलात्म्यदर्शने ।

नियमः परिसंख्या वा न तेनेहोपपद्यते ॥१४६॥

144-146. A thing which is called (i.e. possesses the nature of) a pot is eternally possessed of ether, while it is and it is not in contact with other diverse objects, because its close association with ether is never given up (in any case). In the same way, knowledge is eternally in contact with the individual consciousness within while it stands in relation to the external things such as sound, etc. and it is in separation from the same because it (viz. that contact) has the eternal Ātman as the witness. Since (it is clear) from this that there is no optional acquisition of the knowledge of the oneness of the Ātman, therefore *niyamavidhi* or *parisaṁkhyāvidhi* is impossible in this respect.

NOTES

An injunction is normally *apūrvavidhi*, that is to say, it makes known what is not known (*ajñātajñāpaka*). It is already shown in this work that such an injunction is not possible (i.e. cannot be thought of) in the case of 'seeing of the Ātman' (*ātmadarśana*) etc. One might then point out: 'If that is so, why not think that there is *niyamavidhi* or *parisaṁkhyāvidhi*?' To this Sureśvara answers: The knowledge of the Ātman is for one ever-attained (*nityaprāpta*), therefore, neither *niyamavidhi* nor *parisaṁkhyāvidhi* is possible, *niyamavidhi* is an injunction which enjoins a thing which is established in alternatives (*pakṣe aprāpta*). But the knowledge of the Ātman is ever-attained (*nityaprāpta*), i.e. ever-known (*jñāta*), and not alternatively non-attained (*pakṣe aprāpta*), i.e. a sort of *ajñāta* 'non-known'. Therefore, no *niyamavidhi* is applicable in respect of the knowledge of the Ātman. *parisaṁkhyāvidhi* is an injunction which excludes one of the two alternatives which become simultaneously available (*tatra cānyatra ca prāptā sā*), where choice or restriction is undertaken for what has been attained (*prāpta*). But no such restriction etc. is possible in respect of the Ātman.

कर्मकाण्डे यथा मानं तथैवोपनिषत्स्वपि ।

विधिरेवानपेक्षत्वात्सापेक्ष्यान्नाभिधाश्रुतिः ॥१४७॥

147. (Objection:) Just as in respect of the ritual-section, so in the Upaniṣads also, is the injunction the means of knowing, because it expects no other means of knowing. (Here the means of knowing) is not a simple affirmation,¹ because it expects (i.e. depends on) other means of knowing.

NOTES

One might object: In the ritual-section (*karma-kāṇḍa*) an injunction is independently authoritative and non-injunctive statements are useful as its subsidiaries. In the same way, in the knowledge-section (*jñāna-kāṇḍa*) also, an injunction must be an authoritative means of knowing. But a simple affirmation (*abhidhāśruti*), which informs about (the nature of) the Ātman but does not enjoin one to act, cannot be a means of knowing, because the Ātman which is conveyed by the simple affirmation is already known by (i.e. it depends on) another means of knowing.

1. The simple affirmation (*abhidhāśruti*) is the Śruti passage which contains a mere utterance in contradistinction to an injunction which enjoins one to act. The four *mahāvākyas*, i.e. *ītat tvam asi* (CU 6.8.7), *aham brahmāsmi* (BU 1.4.10), *ayam ātmā brahma* (BU 2.5.19), *sarvaṁ khalu idaṁ brahma* (CU 3.14.1), are simple affirmations. Here, in the course of discussion of the Vedic sentence *ātmā vā are draṣṭavyaḥ*, Suresvara asserts that this sentence is not an injunction but a simple affirmation.

मेवं मानान्तराप्राप्तसम्यगैकात्म्यबोधतः ।

अभिधाश्रुतेः प्रमाणत्वं सुप्तोत्थापकवाक्यवत् ॥१४८॥

148. (Reply:) It is not so. As an address which wakes up a sleeping man, so is the simple affirmation the means of knowing because of the perfect (lit. right) cognition of the oneness of the Ātman which does not arise from any means of knowing (other than the Śruti).

NOTES

A reply is given to the objection stated in verse 147: 'The sentence *ātmā vā are draṣṭavyaḥ* is an injunction and, therefore,

an authoritative means of knowing.' The sentence *ātmā vā are draṣṭavyaḥ* is not an injunction but a simple affirmation. And this simple affirmation can be authoritative (and therefore useful) in respect of the knowledge of the oneness of the Ātman and the Brahman like an address which wakes up a sleeping man.

अकारकं कात्म्यमात्रं मेयं वस्तिवर्ष्यते यतः ।

तदन्यस्य यतो मानाद्व्यतिरेको न लभ्यते ॥१४६॥

149. Since it is understood (lit. desired) that a thing to be known is only of the nature of the oneness and not productive, therefore,¹ one cannot obtain the distinction from it of anything other than itself.

NOTES

Again a doubt is raised about a simple affirmation being considered as the means of knowing: 'The oneness of the Ātman and the Brahman cannot be the object of knowing by a simple affirmation, because the object of knowing is known by a knower; the distinction of a knower and an object of knowing is presupposed. Then there would be the contradiction between oneness and distinction'. To this doubt Sureśvara replies: As long as the distinction between a knower and an object of knowing persists in the worldly dealing, the doubt would be right. But in the stage of the knowledge there is no distinction of a knower or an object of knowing.

1. The word *yataḥ* means *ataḥ* 'therefore', as SP points out.

मुक्त्वेकात्म्यस्य चाज्ञानं नान्तरायान्तरं यतः ।

विधितन्त्रस्य कार्यत्वान्नाज्ञाने प्रभविष्णुता ॥१५०॥

150. Since apart from ignorance about the oneness there is no other hindrance (to the knowledge of the Brahman), (no procedure is therefore laid down by an injunction,) (for) being of the nature of an action to be performed, it (i.e. injunction) is not authoritative in respect of (the removal of) ignorance.

NOTES

Yet another possibility is pursued about the usefulness of an injunction in Vedānta: 'Even if no injunction is possible regarding the means of knowing in Vedānta, the injunction is required since knowledge which is laid down in the Śruti (*vihitajñāna*) is expected for the purpose of removing the hindrance between the Brahman and the Ātman.' In reply to this Sureśvara assumes the alternative regarding what the hindrance is: The hindrance is (i) something other than ignorance, or (ii) ignorance. If (i), the injunction would be prescribed for the sake of removing it and not for acquiring knowledge (which removes ignorance). If (ii), knowledge dependent on an injunction would not be a right means of knowing, and, therefore, it would not have the capacity to remove ignorance.

यथास्थितात्मवस्तुतज्ज्ञानं मुक्त्वा तमोहनुतौ ।

नान्यो हेतुर्यतस्तस्मान्न त्रय्यन्ते विधिः प्रमा ॥१५१॥

151. Since for the removal of darkness (i.e. ignorance) there is no means other than knowledge that arises out of the existential entity (viz. the Ātman) as it is, one, therefore, cannot envisage that there is an injunction in the Vedānta texts,¹ conducive to the right knowledge.

NOTES

1. The word *trayyanta* 'end of three (Vedas)' means Vedānta; cf. verse 418, SV 12 and the word *vedāvasāna* in Nais 1.8 meaning the same.

नियोज्यस्य च नैश्वर्यं धीसम्यक्त्वं प्रतीष्यते ।

तस्य मेयंकहेतुत्वान्नैव स्यान्मातृतन्त्रता ॥१५२॥

152. It is not accepted that one on whom the injunction is enjoined has no freedom (liberty, capacity, power) insofar as rightness of knowledge is concerned. Since it (right knowledge) originates only from the (so-called) object of knowledge, therefore it does not depend on the knower (i.e. his activity, effort to acquire it).

NOTES

An objection is raised to the previous verse : 'It is not reasonable to hold that whatever depends on an injunction does not lead to the right knowledge, because it does not remove ignorance and because regarding knowledge, which is laid down in the Śruti, the authoritative means of knowing is effected by a person with intellect.' To this Sureśvara answers in the first line. And in the second line he confirms that the knowledge of the oneness of the Brahman and the Ātman is not *puruṣatantra* but *vastutantra*, so then an injunction which involves a *puruṣatantra* has no scope in acquiring knowledge of the oneness of the Brahman and the Ātman.

विद्येरिवानपेक्षत्वं वेदान्तेष्वभिधाश्रुतेः ।

अनृतन्त्रत्वसामान्यात्तथाऽतीन्द्रियबोधतः ॥१५३॥

153. In the knowledge-section the simple affirmation does not depend on any other means of knowing (as the injunction in the ritual-section), on account of similarity in respect of not being dependent on (the activity or desire of) a person¹ and because it leads to cognition which is beyond sense-perception.²

NOTES

The first line is a reply to a possible objection: 'The simple affirmation refers to the thing already known, is dependent (i.e. expects another means of knowing) and, therefore, is not an authoritative means of knowing.'

1. Both a simple affirmation and an injunction are *anṛ-* (= *apuruṣa-*) *tantra*.

2. Both a simple affirmation and an injunction are *atindriyabodha*, i.e. they lead to the knowledge of what is beyond the capacity of sense-organs.

अक्षाद्यविषयं प्रत्यक्स्वतः सिद्धेरसाधनम् ।

अभिधा बोधयन्तीयं नान्यत्किञ्चिदपेक्षते ॥१५४॥

154. A simple affirmation regarding the individual consciousness¹ which is not the object of direct perception etc.² and

does not need any means of knowing, since it is self-established does not need any other (support).

NOTES

The reply is given to an objection: 'Because like earth etc. the Ātman can be known by other means of knowing, how do you say that it is beyond sense-perception?' The Ātman is a well-known entity and still it is not like the earth etc. because the Ātman is devoid of a form etc. (*rūpādiḥina*); it is self-luminous (*svaprakāśa*, like a lamp); it needs no means of knowing (*sādhanaṇapekṣa*); and it is not known by direct perception etc. (*pratyakṣādyayogya*). (Cf. direct perception is *indriyārthasam-nikarṣajñāna*). Therefore, the simple affirmation referring to the Ātman does not need the help of an injunction. Cf. BSB 2.1.6. which declares that the Brahman is not established by direct perception or inference: *rūpādyabhāvād dhi nāyam arthaḥ pratyakṣa-gocaraḥ / liṅgābhāvāc ca nānumānādinām /*

1. Meaning the Brahman as SP points out.

2. The word *akṣādi* means *pratyakṣa*, *anumāna* and *upamāna*.

तस्माद्विधेः प्रमाणत्वं साध्यसाधनबोधने ।

अतीन्द्रिये तदन्येन ज्ञातुं शक्यं न तद्यतः ॥१५५॥

155. Therefore, (it follows that) an injunction is an (authoritative) means of knowing the end and the means in respect of things beyond sense-perception, because it is impossible to know the same (lit. it) by any other (means than the injunction).

NOTES

In respect of the well-known entity one does not expect an injunction. An injunction is relevant in respect of a command (*niyoga*), therefore in respect of the Brahman it is naturally set aside. My translation above differs from SP which appears to divide this verse into two different sentences.

साध्यसाधनसम्बन्धो न शक्योऽभिधया यथा ।

प्रतिपत्तुं स्वतः सिद्धोऽशक्यो विधिगिरा तथा ॥१५६॥

156. Just as the relation between the means and the end is impossible to understand by simple affirmation (about it), so it

is impossible (to understand) by the words of an injunction that (relation) which is self-established.

NOTES

According to SP, the intention of the verse is: A simple affirmation leads to the inferential knowledge which is opposed to knowledge about the Brahman that is unstultified, unobtained and undoubted.

ऐकात्म्यस्य स्वतः सिद्धेन क्रियास्पेक्ष्यते यतः ।

ततश्च भावनाभावो भावनायाः क्रियाश्रयात् ॥१५७॥

विरहे भावनायाश्च न विधेस्तत्र मानता ।

स्वतःसिद्धार्थबोधित्वादभिधायास्तु मानता ॥१५८॥

157-158. Because the oneness (of the Brahman and the Ātman) is self-established on account of the fact that it does not expect any act, therefore there is the absence of the injunctive force,¹ for the injunctive force (ever) rests on an act. And in case there is no injunctive force (operating), an injunction cannot be the means of knowing. But the simple affirmation is an authoritative means of knowing, since it only informs one of a certain thing which is self-established.

NOTES

This is another reason why an injunction is not a means of knowing in respect of the well-known entity, viz. the Ātman.

1. The word *bhāvanā* is a technical term of the Mīmāṃsakas; it means 'productive force, imperative power etc.' *bhāvanā* is of two kinds, (i) *ārthi bhāvanā* and (ii) *śābdi bhāvanā*, and is closely related to an injunction; it is both *ajñātajñāpaka* and *apraṇṇāpaka*. An *ajñātajñāpaka* informs one of the unknown three-fold *ārthi bhāvanā* in this way—one's action has *sādhya*, *sādhana* and *itikartavyatā* while an *apraṇṇāpaka* informs one of threefold performances which one has not performed. Thus, *bhāvanā* operates in order to enjoin one to some act, so then it constitutes the necessary function in an injunction.

सापेक्षत्वादमानं चेदभिधा लोकवर्त्मना ।

अभिधा तत्त्वमस्यादि सरित्तीरफलोक्तिवत् ॥१५६॥

159. Since a simple affirmation is not (accepted as) a means of knowing because it has an expectation (of some other proof); then following the worldly way, (one can say that) the simple affirmation 'Thou art that' etc. (would also not be authoritative) (just) like the statement, 'There are fruits on the bank of a river.'¹

NOTES

An objection is raised on the strength of an illustration of *sarittiraphala* which is nothing but an affirmative statement.

1. This illustration is found in the *Śābarabhāṣya* 1.1.2 (p. 13): *nanv atathābhūtam apy artham brūyāc codanā yathā yat kimcana laukikam vacanam nadyās tire phalāni santiti* / This is used as a worldly illustration of a simple affirmation. But it is not so. On this Sureśvara's discussion follows in verses 162 ff. Cf. BOETZELAER's note on TUBV 2.611 (p. 155), Nais 3.47 etc.

संहत्यनुपपत्तिरच पदानामभिधाश्रुतो ।

आख्यातपदहेतुत्वात्सर्वत्र पदसंहतेः ॥१६०॥

160. (Objection:) In a simple affirmation, the proper construe is wholly impossible, since everywhere a word gets properly construed (with other(s) in the statement) only because of a verbal form.

NOTES

An objection is raised: An injunction is required not only for the sake of authoritativeness in Vedāntas but also for the sake of effecting proper construe of words. This objection is noted in Sureśvara's concept of an injunction which is essentially ever-connected with some action as against a simple affirmation of the Vedānta which is not connected with any action. A question, therefore, arises: What is the purpose of the verb in the simple affirmation? Cf. in this context: *kṛtiḥ ākhyātārthaḥ yathā caitras taṇḍulam pacatityādau tinārthaḥ sarvatra ākhyātārtho bhāvaneti mimāṃsakāḥ* / (the *Nyāyakośa*, p. 103)

The word *ca* in the first line combines the objection in verse 159 with the objection in this verse. The objection stated in this verse is refuted in the next verse, and the objection in verse 159 later, in verses 162-164 below.

नाऽऽख्यातपदसद्भावात्स्यादेव पदसंहतिः ।

अस्यस्म्याद्याख्यातपदमस्त्येवेहामिधाश्रुतौ ॥१६१॥

161. (Reply:) No. Construing of the words would be possible on account of the existence of the verb; here in the simple affirmation (of the Vedāntas) are indeed used the verbs such as *asi*, *asmi* etc.¹

NOTES

The objection in the preceding verse, viz. an injunction is required for establishing a proper construe of words, is refuted.

1. The word *ādi* refers to the verbs *veda*, *bhavati* etc. The verb *asmi* is in the sentence *aham brahma asmi*, the verb *asi* is in *tat tvam asi*. In *ayam ātmā brahma*, *sarvam khalu idam brahma*, the word *bhavati* is intended, also see the sentence *brahma veda brahmaiva bhavati*.

The second line is an answer to the other objection: 'It was stated that the verbal form exists in the simple affirmation. This would result in the necessity of an injunction because the verbal form is nothing but a word expressive of action.' If the Vedāntin also takes this position, he is in full agreement with the Mimāṃsaka who holds: *āmnāyasya kriyārthatvāt*... Sureśvara wishes to set aside this possible argument.

सरित्तीरे फलानीति युक्ताऽपेक्षाऽभिधाश्रुतेः ।

प्रत्यक्षमानप्राप्तत्वात्फलतीरार्थसंगतेः ॥१६२॥

162. In the case of the simple affirmation, 'There are fruits on the bank of a river,' it is reasonable to say that there is some expectation of help from elsewhere because the connection between things, viz. fruits and the bank, is grasped by means of knowing, viz. direct perception (of them).

NOTES

As regards the illustration of *sarittiraphala* stated in the verse 159, there is a condition (*upādhi*) that it is the object of

another means of knowing. Yet the simple affirmation like 'This is the Ātman' does not depend on any such outside help.

प्रत्यक्षग्राह्य एषोऽर्थो न तदन्यप्रमाणकः ।

यतोऽतो नाऽऽगमादेव तादृशेऽर्थे विनिश्चितिः ॥१६३॥

163. This thing is grasped by direct perception and not by any other means of knowing. Since (the oneness of the Brahman and the Ātman) is not grasped by this (viz. direct perception) therefore any definite idea about it (lit. a thing of that nature) is formed only from (i.e. with the help of) the Śruti statement.¹

NOTES

Impossibility of direct perception of the oneness of the Brahman and the Ātman is denied clearly. A thing called the connection between fruits and the bank of a river is directly known by a speaker who states 'There are fruits on the bank of a river' only after he went to the bank of a river and saw fruits. So, the sentence is merely a repetition of what he has seen. Thus in respect of *sarittiraphala*, there is no authoritativeness in simple affirmation about it since it needs another means of knowing, viz. direct perception.

1. See note on verses 6-7.

अपूर्वादिवचोऽर्थे तु न प्रत्यक्षाद्यपेक्षते ।

प्रत्यक्षाद्यप्रमेयत्वादेकात्म्याख्यस्य वस्तुनः ॥१६४॥

164. In respect of the thing about which there is a statement '(It is) without preceding¹ . . .' there is no expectation (i.e. necessity) of direct perception etc., for the reason that the thing called the oneness of the Ātman is not the object of knowing by direct perception etc.

NOTES

SP begins with *sādhnavyāptim pratyāha*: 'The author answers (the objection in respect of) the dependent character of the means (which is here simple affirmation).' This needs some clarification. The objector's view of *sādhnavyāpti* appears to be this: As regards the illustration of *sarittiraphala* for the

simple affirmation, *sādhānavyāpti* is possible thus, *yatra yatra abhidhā tatra tatra sāpekṣatvaṁ yatra yatra sāpekṣatvaṁ tatra tatra amānatvam*. Though *sarittiraphala* has been introduced as the illustration for the simple affirmation, it is *sāpekṣa*, i.e. it can be apprehended by direct perception. As such, one might say, it is not the simple affirmation but direct perception that is authoritative in apprehending *sarittiraphala*. This leads to the conclusion that simple affirmation cannot be authoritative. Sureśvara's verse is against this view of *sādhānavyāpti* in respect of simple affirmation. He means: In the case of a sentence like 'That Brahman is without preceding. . .', there is no dependence on any other means (cf. *nāyam pratyakṣagocaro 'rthaḥ*) though there is simple affirmation about the Brahman because the *sādhānavyāpti* in respect of simple affirmation about the Brahman cannot be established.

1. *tad etad brahmāpūrvam anapāram anantaram abāhyam* (BU 2.5.19), "That Brahman is without preceding or succeeding, without internal or external."

अपौरुषेयवाक्यत्वं समानमभिधाश्रुतेः ।

अतीन्द्रियार्थबोधित्वं समानं चोदनोक्तिभिः ॥१६५॥

165. Simple affirmation (in Vedānta texts) shares (with an injunction) a common (characteristic), viz. it does not have a human agency (or authorship). (And) with an imperative injunction it shares (another) common (characteristic), viz. it has the capacity to inform one of a thing which is beyond sense-perception.

NOTES

In this verse, Sureśvara shows the similarity of simple affirmation in Vedāntas with both *anuvāda* and *codanokti*. Simple affirmation is the same as *anuvāda* in the Śruti in one respect, viz. it is an *apauruṣeyavākya*, but it is different from it, since *anuvāda* is supported by direct perception while simple affirmation is not. For instance, *agniḥ himasya bheṣajam* (the *Vājasaneyisaṁhitā* 13.10) is a simple affirmation, supported by direct perception. Simple affirmation (in Vedānta) is the same as an injunction in two respects; (i) it is an *apauruṣe-*

yavākya, and (ii) *nirapekṣā*, but it is different from the latter since it does not lead us to undertake some activity.

सिद्धसाध्यप्रमेयत्वभेदो यदि परं तयोः ।

प्रामाण्ये त्वतिशीतिस्तु न काचिदपि दृश्यते ॥१६६॥

166. If at all there is a difference between simple affirmation and injunction¹ in having the object to be known², what is established and what is to be accomplished, no difference³ is noticed insofar as an authoritativeness is concerned.

NOTES

The defect *sāpekṣatva* in inference consists in 'dependence on another means of knowing.' The object of knowing by simple affirmation is *siddha*, viz. the Brahman and that by injunction is *sādhya* 'that which is to be accomplished, like heaven etc.' Thus, both are different in respect of the object of knowing (*prameya*), but identical in that both are authoritative. Cf. BSB 1.1.1 (P. 4) on *prameyabheda*: . . . *phalajijñāsyabhedāc ca / abhyudayaphalam dharmajñānam tac cānuṣṭhānāpekṣam / niḥśreyasaphalam tu brahmajñānam na cānuṣṭhānāntarāpekṣam* |

1. The word *tayoḥ* means *abhidhāsruti* and *codanokti* stated in the previous verse. SP says that *tayoḥ* means *karmajñānakāṇḍayoḥ*. The intended meaning is the same, still SP has loose expression and is not exact.

2. The reading *prameyatva* should be *prameyatvāt* as the footnote points out.

3. The word *atīṣiti* means *atīṣaya* or *bheda*; this is an instance of Sureśvara's deriving help from Śaṅkara.

प्रमोपजायते तावदहं ब्रह्मेत्यलौकिकी ।

तत्त्वमस्यादिवाक्येभ्यः श्रवणात्समनन्तरम् ॥१६७॥

167. An uncommon (lit. non-worldly) right knowledge, viz. 'I am Brahman' arises immediately after hearing passages like 'Thou art that' etc.

NOTES

A possible objection may be: 'It has not been established that Śruti sentences give rise to the right knowledge. Then,

how can you say that the Śruti is a means of knowing? To this objection is the reply: In the case of a proper (eligible) person the right knowledge resulting from (hearing/understanding) the Śruti cannot be repudiated (that is to say, we have to accept that the Śruti enlightens an eligible person). Cf. *brahma veda brahmaiva bhavati* or other passages whose hearing is immediately followed by the knowledge of the Brahman.

एवं चेदप्रमाणत्वं किमिवेहाभिधाश्रुतेः ।

विधेरपीह मानत्वं नोक्तन्यायातिरेकतः ॥१६८॥

168. If one were to declare the unauthoritativeness of this type, what indeed is achieved by simple affirmation? An¹ injunction is also not held authoritative in supercession of any reason.²

NOTES

1. On the contrary, an injunction is also to be taken as unauthoritative if an opposite is proved. This is given in the second line.

2. It must be possible to point out the opposite of an injunction as otherwise proved. Cf. note (2) on verse 115 above.

स्वशक्तिः सर्वमानानां यथा वस्त्ववबोधने ।

अभिधायाश्च सास्त्येव किमिति स्यादमानता ॥१६९॥

169. Just as all the means of knowing have each one of them a capacity in informing about something, simple affirmation also has that power. How then do you consider that simple affirmation is not a means of knowing?

NOTES

The Śrutis are also the means of knowing what is meant by them, just like the other means of knowing like direct perception etc.

नाप्यर्थेऽतीन्द्रिये सिद्धे मानं लिङ्गाद्यपेक्षते ।

योगिप्रत्यक्षमानं वा तयोरविषयत्वतः ॥१७०॥

170. Moreover, in respect of an entity which is (already) established as one beyond sense-perception one cannot expect

any characteristic mark etc. as the means of knowing it;¹ nor² also direct perception of the ascetics.³ (This is so) because the two are devoid of any object⁴.

NOTES

1. It may be objected: 'True. The Brahman is not known by direct perception, but it would be possible to know the same by means of inference etc. and, therefore, the Vedānta are not a means of knowing the Brahman.' The first line answers the objection thus: Inference holds good in respect of a thing with characteristics (*liṅgavat*) but not, in respect of a thing which is without any characteristics, i.e. the Brahman. One could yet further argue: 'Though the Brahman is not the object of our direct perception etc. it could be grasped by direct perception (at least) of the ascetics who are distinguished from us, ordinary folks.' To this, the second line gives an answer.

2. The word *vā* indicates the continued use of the word *na* together with the verb *apekṣate*.

3. There is the description of *yogipratyakṣa* in the *Tattvakaumudī* on SK 5: *viṣayāḥ pṛthivyādayaḥ sukhādayaś ca asmadādinām aviṣayāḥ tanmātralakṣaṇāḥ, yoginām ūrdhvasrotasām ca viṣayāḥ* | Direct perception by the ascetic(s) can be authoritative in respect of the subtle object (*sūkṣma*) but not, an object beyond sense-perception.

4. Like Śaṅkara, Sureśvara also holds that the Brahman is *pratyakṣādyagocarārtha*, i.e. it does not have any characteristics. Naturally, therefore, it cannot be the object in any inference from some characteristics. Direct perception, even *yogipratyakṣa*, is already ruled out automatically.

Sureśvara thus rules out the possibility of the Brahman being the object of *yogipratyakṣa* and *laukikānumāna*. This is elaborated in the following two verses.

नेतीत्यस्थूलमित्यादिवाक्याद्योऽर्थोऽवगम्यते ।

योगिप्रत्यक्षगम्योऽयं न तत्प्रत्यक्त्वहेतुतः ॥१७१॥

171. A thing which is understood from words like '(The Brahman) is not this¹', '(The Brahman) is non-gross. . .²' etc. is not obtained by direct perception of the ascetics,³ because it (viz. that thing) is already within themselves.⁴

NOTES

The reason is stated for the argument in the last quarter of the preceding verse.

1. BU 2.3.6 etc., see note on verse 104.
2. BU 3.8.8.
3. But this argument: 'Since the ascetics also cannot observe any characteristic, how can ordinary people notice any?' —to be inferred.
4. The characteristics of what is within one cannot be 'directly perceived' by one, even by Yogins.

प्रत्यक्षानवताराच्च नानुमानेन मीयते ।

धर्मधर्म्यभिसम्बन्धे नागृहीतेऽनुमा यतः ॥१७२॥

172. And¹ therefore the knowledge of the Ātman cannot be comprehended through inference, since direct perception also cannot acquire it, viz. its characteristic, because knowledge² by inference is not possible when the close³ relationship between *dharma* and *dharmin* is not apprehended.

NOTES

1. Another reason why the Brahman cannot be known by inference is given in the first line.

2. A question arises: 'Even if the Brahman is not known by two kinds of direct perception (i.e. common and ascetic's), how is it not possible to assume that the Brahman is not known by inference?' To this question Sureśvara gives an answer in the second line.

3. The word *abhisambandha* is the loose expression for *vyāpti*. In the sentence *parvato vahnimān dhūmāt*, *dhūma* is *dharma* and *vahni* is *dharmin*, because the *vyāpti* '*yatra yatra dhūmaḥ tatra tatra vahniḥ*' is possible. Cf. BSB 2.1.6 as a support for this which has been referred to in verse 154.

[Verse 173 introduces the rule regarding the excellence of an object and verses 174-75 discuss the excellence of a means of knowing. Both these verses occur in Kumārila's *Śloka-vārtika: codanāsūtra* 113-114.]

यज्जातीयैः प्रमाणैस्तु यज्जातीयार्थदर्शनम् ।

भवेदिदानीं लोकस्य तथा कालान्तरेऽप्यभूत् ॥१७३॥

173. (Indeed) whatever kind of objects are now known to people and by whatever means of knowing, they had become known to people of some other (i.e. earlier) time also by the same (means of knowing) and as of the same kind.

NOTES

An objection could be: 'Even if the Brahman is not known by direct perception in this time, it could have been in another time by some excellence in it (direct perception).' The answer is that direct perception of today also depends on the sense-organs as in earlier times. Means of knowing have not changed in the course of time. Cf. *adyatvavad eva kālāntare' pi pramāṇasvabhāvo nānyādṛśa iti* (the *Nyāyaratnākara* on the *Śloka-vārtika* 113, p. 60).

यत्राप्यतिशयो दृष्टः स स्वार्थनितिलङ्घनात् ।

दूरसूक्ष्मादिदृष्टौ स्यान्न रूपे श्रोत्रवृत्तिता ॥१७४॥

174. Where¹ again one sees a certain excellence, that results from seeing it from after and/or with closer attention, but (certainly) not going beyond the object of its own. Never indeed can any form be the object of the sense of hearing.

NOTES

One might say that since there is no excellence in our sense-organs now, the Brahman would not be their object. On this Sureśvara argues on the basis of the idea that whatever is devoid of excellence is not known by sense-organs. (SP) If sense-organs would at some time proceed towards objects beyond perception such as *dharma*, the Brahman etc., then it would be possible that ears would proceed also towards a form which is grasped only by the eyes.

1. There are two possibilities in the word *yatra*; (i) *yatra viṣaye* (ii) *yatra pramāṇe*. In this verse (i) is applicable and (ii) in the next verse—this verse refers to the excellence of the object and the next to the excellence of the means of knowing.

योगिप्रत्यक्षमानादेन चेदंकात्म्यमेयता ।

तत्प्राप्तमपि किं कुर्यात्स्वात्मायोग्यासु भूमिषु ॥१७५॥

175. If the oneness (of the Brahman and the Ātman) cannot become the object of the means of knowing, viz. direct perception of the ascetics etc.¹ of what use will they be, even if one possessed them, in matters which cannot properly be their own objects ?

NOTES

Where direct perception of the ascetics does not operate, inference might be useful, but it must be remembered that it could be so only in the case of objects other than the Brahman.

1. Cf. *māna* = *pramāṇa* in verse 170 above. Here 'etc.' refers to *anumāna* 'inference'. SP points out the purpose of the mention of *yogipratyakṣa* as it is more prominent than any other means, as seen from the preceding two verses.

अक्षादिमेयासारूप्यादेकात्म्यं स्यान्न तत्प्रमम् ।

यथा विधेयासारूप्यान्नैकात्म्यं स्याद्विधेस्तथा ॥१७६॥

176. The oneness is not correctly learnt from that (viz. any injunction) owing to the fact that it does not possess the form as an object to be enjoined; (this is) in the same way as that (oneness) is not known by direct perception etc.¹, for it does not possess the form as an object of knowing it (i.e. direct perception etc.).

NOTES

This verse is a reply to the possible objection: 'Even if the oneness of the Brahman and the Ātman is not made known by direct perception etc. because of the rule stated above, how can the Śruti be a means of knowing without depending on any other means of knowing when the oneness is understood by the injunction?'

1. Cf. note (2) on verse 154 above.

संभाव्यते चेदक्षादि ह्यैकात्म्यार्थे फलादिवत् ।

न तद्वारयितुं शक्यं लोके विधिशतैरपि ॥१७७॥

नासमीक्ष्य स्वसामर्थ्यं पुमान्विधिशतैरपि ।

प्रवर्ततेऽनपेक्षत्वं कुतो विधिवचः स्वतः ॥१७८॥

177-178. If direct perception etc. could prove effective, (i.e. it could grasp, or it could be the means of knowing the object) in the case of the object, viz. the oneness, as (it would be) in the case of a fruit etc.¹, then it would be impossible to ward it off (i.e. to deny it to be so) even by hundreds of injunctions,² (i.e. by any Śruti). Without having well-considered one's own capacity, one does not enter on any act even (though impelled) by hundreds of injunctions; how then is it possible to say that injunctive statements of the Śruti are themselves independent of (anything else) ?

NOTES

After stating that the Vedāntas are authoritative means of knowing the oneness, without expecting help from any other means of knowing, Sureśvara further goes to say that even an injunction stands expectant of some other means of accomplishing an act to be accomplished.

1. Cf. note on verse 159 above.

2. Verse 177 echoes Śaṅkara's idea regarding a hypothetical contradiction between direct perception and the Śruti; cf. BGB 18.67 (p. 535): *na hi śrutiśatam api śīto 'gnir aprakāśo veti bruvaṭ prāmāṇyam upaiti* |

अपाक्येषु नियुक्तोऽपि कृष्णलाञ्छपयेदिति ।

न तच्छक्तिं विना कश्चित्पुमांस्तत्र चिकीर्षति ॥१७६॥

179. No one desires to do anything without having the capacity for (doing) it, even if he is enjoined (to cook) the uncookable (as in the statement), 'Let him cook black berries.'¹

NOTES

Here is an illustration which supports that an injunction depends on one's capacity to perform the act enjoined; it consists in the eligibility or capacity of a person (*adhikārigata-pravṛttiśaktisāpekṣa*, *puruṣaśaktyapekṣa*).

1. Sureśvara has stated this illustration in TUBV 2.626 also. "The maxim refers to a thief (who engaged himself) as a cook. His inability to perform the duties, however, lead to

his discovery and arrest. This is intended to teach the folly of undertaking to do some thing quite beyond one's power." (BOETZELAER's note, p. 159).

एवं चेदनपेक्षत्वं विधेः किमिति भण्यते ।

न भावनानपेक्षोऽसौ विधिर्यस्मात्प्रवर्तते ॥१८०॥

180. If this is so, why is it said that injunction (in the Śruti) depends on nothing else, (indeed) because an injunction does not operate when independent of any injunctive force ?¹

NOTES

This is a reply to the possible objection: 'Injunction expects only the capacity of one who is enjoined to act.' Sureśvara again stresses that injunction is not authoritative independently, because it certainly depends on the injunctive force of the words.

1. On the word *bhāvanā* see note (1) on verses 157-158 above.

न भावनान्तरमियं न च मानान्तरं तथा ।

अपेक्ष्याभिधयंकात्म्यमवबोधयति श्रुतिः ॥१८१॥

181. This Śruti text, by (mere) simple affirmation, informs one of the oneness of the Ātman, without expectancy of any other injunctive force,¹ or of any other means of knowing.

NOTES

An objection could be raised thus: 'In the case of a simple affirmation such as *tat tvam asi* also, there is similarly an expectancy as regards the said capacity on account of the acceptance that Veda gives rise to the right knowledge only if there is an eligible person.' To this, the answer is given in the first quarter.

SP is elaborate and useful: In both Vedānta and Veda, there is equal expectancy for the capacity of a person. As regards the capacity of one for activity and the *bhāvanā*, the discrepancy of expectancy arises only in the case of injunctions. Yet one might object: 'Since injunctions are authoritative independently, they do not therefore expect any other

means of knowing for their support.' To such an objection Sureśvara replies: A command (*niyoga*) is insentient, so there is the necessity of another means of knowing, for otherwise the capacity in an injunction would not be grasped at all. But in the case of the Ātman the position is different; the Ātman is not the object of any means of knowing because it is self-luminous. The understanding of the meaning (*śaktigraha*) stands to reason. Therefore the Śruti, enlightening the oneness of the Ātman by mere affirmation which is devoid of an injunction does not expect any other means of knowing or the capacity for activity, except one's concentration (*niṣṭhā*) on the Brahman. The Śruti only by its own greatness enlightens the eligible person as regards the oneness of the Ātman.

1. This refers to simple affirmation in Vedānta texts.

अतोऽनपेक्षता युक्ता सर्वदेवाभिधाश्रुतेः ।

अभिधानाभिधेयार्थज्ञानमेव व्यपेक्षते ॥१८२॥

182. Therefore, it is reasonable to accept that simple affirmation in the Śruti is at all times expectant of nothing. It depends only on understanding the thing which is to be conveyed by means of direct expression.

NOTES

This verse concludes that simple affirmations in Vedāntas are different from injunctions.

One may now say: 'If one always holds non-expectancy of simple affirmations in the Vedāntas, there would follow the absence of expectancy as regards the understanding of the meaning of such affirmations also. And in that case even one who knows nothing would desire the cognition of the oneness only on hearing the sentences *tat tvam asi* etc.' The second line of the verse answers this.

The word *anapekṣatva* of simple affirmation in Vedāntas means the *anapekṣatva* of the direct expression (*abhidhāna*) whichever consists in the use of words that are rooted in the accepted convention (*saṁketa*) in respect of their meanings.

ज्ञानक्रिया प्रमातृस्था न यथावस्तुबोधकृत् ।
प्रमेयकर्तृकं वासौ यथावस्तुबोधिनी ॥१८३॥

183. The act of knowing, which enlightens one about a thing as it is, does not belong to the knower; that (viz. act of knowing), which enlightens one about a thing as it is, is caused by the object of knowing.¹

NOTES

It has been established through logical reasoning that Vedāntas are independently authoritative even without that injunction. Now it is proved that knowledge enjoined serves no purpose. See verse 120 above. Also cf. BSB 1.1.4 (P. 18) which questions if knowledge is a *kriyā* : *nanu jñānam nāma mānasī kriyā / na/vailakṣanyāt / . . .*, see note on verse 120.

1. Although SP says that the word *prameyakartṛkā* means *mānameyādhina*, no justification is possible.

न चान्यदीयव्यापारे ह्यन्योऽशक्तेनियुज्यते ।
न ह्यग्निसाध्ये शोषादौ नियोगो घटतेऽम्भसः ॥१८४॥

184. And¹ no one can be employed to do any activity that can be accomplished by anyone else on account of one's incapacity for it.² Indeed, it does not stand to reason that a pitcher of water is employed for the act of drying up (something) etc. which is accomplished by fire.³

NOTES

One may ask: 'Even if such a knowledge, viz. *vastutantra-jñāna* may result from mere hearing a sentence like *tat tvam asi*, why not enjoin a person to get to know it?' Here is a reply to the question.

1. The printed edition reads: *na cānyadiya . . .*, but the edition of NKL reads: *na hy anyadiya . . .*

2. SP states: Although it is possible to enjoin the son in respect of an activity of his father, the injunction is of no use when the son has no independence. This is stressed by the word *hi* used here.

3. The illustration in the second line points out that because of the incapability of one, there is no command given to one.

[One may argue thus: 'In order that the knowledge related to an injunction has a fruit, an injunction is required for getting to know (*pratipattividhi*). This may imply four possibilities: (i) Its fruit is the destruction of difference, (ii) it is the cessation of ignorance, (iii) it is the attainment of the Brahman by the Jīvātman, (iv) something else. The answer is made in verses 185-189.]

ब्रह्मणोऽविद्यया योऽपि स्यादवच्छेद आत्मनः ।

तदवच्छेदविध्वस्तौ न साधनमपेक्षते ॥१८५॥

185. Whatever differentiation is (grasped) between the Brahman and the Ātman owing to ignorance, no injunction¹ is expected for the removal of that (differentiation).

NOTES

Regarding (i) there can be two alternatives: (a) The differentiation in question results from ignorance, or (b) it is natural. If (a), there is no need of an injunction, for knowledge of the oneness gives rise to the destruction of any differentiation.

1. *sādhana* = *vidhi*. (SP)

अनवच्छिन्नयाथात्म्यब्रह्मकात्म्यादविद्यया ।

अवच्छिन्नवदाभाति क्षेत्रज्ञो रज्जुसर्पवत् ॥१८६॥

186. On account of the oneness of the Brahman whose real nature is not differentiated (from the individual consciousness), the consciousness within an individual¹ only appears to be differentiated by ignorance, like a serpent (appears) in a rope.

NOTES

The alternative (b) under (i) is refuted in this verse.

1. *kṣetrājña* 'one who knows the body', i.e. 'consciousness within an individual'.

न चाविद्यानिरास्यत्र प्रत्यग्याथात्म्यबोधतः ।

साधनं किञ्चिदापेक्ष्यं स्वर्गे यागादिवत्क्वचित् ॥१८७॥

187. (Apart from) knowing the real nature of the Ātman, nothing else is expected in this matter (as the means) for the removal of ignorance on the part of this (Ātman¹) just as a sacrifice and the like (are sometimes² expected) for attaining the heaven.

NOTES

This is an answer to alternative (ii) which is like this: 'Even if one holds that the destruction of the body is produced by the removal of ignorance there is need of knowledge for purposes of removing ignorance. Therefore, in this respect at least an injunction is required.' For refuting this second alternative this reply is given.

1. Cf. *atra pratici yāvat* in SP.

2. SP holds : *kvacid deśe kāle vā*; but *kāle* alone would convey better sense after understanding *atra* as *pratici*. . , for *pratyak* implies some *deśa* invariably.

न चापि मुख्यया वृत्त्या साध्येऽसति जगत्त्यपि ।

किञ्चित्साधनमित्येवं भण्यते लोकवेदयोः ॥१८८॥

188. 'And indeed even in (this) world there is no means which (can accomplish) by its primary operation an object which does not exist (as the end of it)'.———so it is said among the people and in the Veda.

NOTES

Now an answer to the alternative (iii): 'It is proved that the attainment of the Brahman by the Jīvātman can be achieved by the knowledge enjoined. So an injunction is required in order that one acquires knowledge.' For refuting this alternative is given this verse. Even if the Brahmanhood is attained by knowledge, it does not mean that it is attained by the primary sense of a word. The Brahman is ever-attained in a primary sense, so the Brahman is never attained by any means such as an injunction. It is generally accepted that when *sādhya* in a primary sense does not exist, *sādhana* too does not exist in any worldly dealing. And, therefore, no injunction is possible. (SP) SP clarifies how the general

principle in this verse is applicable even in the knowledge of the Brahman.

साध्यं च लोकेतः सिद्धमुत्पत्त्यादिचतुष्टयम् ।

प्रमाणस्य न तन्न्याय्यं सिद्धार्थव्यञ्जकत्वतः ॥१८६॥

189. And an object which is to be accomplished in any worldly dealing and is accepted to be four-fold,¹ i.e. it has origin etc., has been already established; but it is not proper to say that an object can be accomplished by a means of knowing since it (the latter) is merely capable of revealing an already existential entity.

NOTES

This is the refutation of alternative (iv) : Any fruit other than that stated in (i)-(iii) would be possible. Origin (*utpatti*), attainment (*āpti*), change (*vikṛti*) and purification (*saṃskṛti*) are attained by an injunction. And a means of knowing can prove a thing which has already come into existence. Therefore no injunction is possible.

1. The four fruits of act are origin, attainment, change and purification. Cf. BUBV 3.3.26, TUBV 2.13, Nais 1.53, BSB 1.1.4 etc.

नाऽत्मलाभातिरेकेण व्यञ्जकस्य मनागपि ।

सम्भाव्यतेऽपरं रूपमज्ञातत्वापनोदकृत् ॥१८७॥

190. It is again impossible to think of even a slightly different form of any means of knowledge that exists apart from its being merely a manifestor (or an already existent thing) so that it can be said to remove the condition of being not known.

NOTES

One might postulate: 'After the validity of an injunction in respect of the knowledge resulting from the Śruti (*śābdajñāna*) is refuted, one might urge that the injunction is required for the constant meditation on that knowledge since that would destroy ignorance.' The answer is: Such an injunction is not necessary, since when knowledge arises ignorance gets immediately destroyed.

आत्मासामान्यरूपोत्थं न चाभूत्वोपजायते ।

घटादिज्ञानवज्ज्ञानं भिन्नहेत्वनपेक्षतः ॥१६१॥

191. Without coming into existence, the knowledge which was (already) existing owing to (lit. born of) the peculiar nature of the Ātman, does not arise like the knowledge of a pot etc., because it does not expect any cause (for its coming into existence).

NOTES

It has been stated that an injunction is not required for the sake of knowing, or for constant meditation on it. Yet one may require it for the purpose of knowing the nature of the Brahman. One is then given the following reply.

Knowledge of the Brahman arises from the Ātman itself, it does not depend on anything else. That is to say, knowledge of the Brahman is not an effect; it is not the object of any injunction. Cf. verse 187.

स्थास्वनुभवमात्रत्वात्कार्यकारणवस्तुनः ।

अभूतभूतिर्नैवातो युज्यतेऽनुभवात्मनि ॥१६२॥

192. Since the thing which is both the cause and the effect¹ (viz. the Brahman) is merely of the nature of permanent experience, it is not proper to hold in the case of what is of the nature of the experience that there comes into existence one that did not exist.

NOTES

The knowledge is *sthāṇvanubhavātmaka*, the injunction is *abhūtabhūtyātmaka* (*sādhya*). It is stated that an injunction is useful for a thing to be attained but useless for an ever-attained thing (viz. *jñāna*). Knowledge does not expect any cause apart from itself.

1. Here the Brahman is described as *kāryakāraṇavastu* only in the empirical sense, not in absolute sense. Cf. verse 422 below where the Brahman, i.e. the Ātman, is described as *ākāryakāraṇa*.

प्रत्यगज्ञानहेतुत्वा भावनेयं न तु स्वतः ।

प्रत्यग्याथात्म्यजिज्ञासोः कथं सा विषयो भवेत् ॥१९३॥

193. The injunctive force¹ arises from the cause, viz. ignorance about the Ātman and not of its own. How then can it be an object (to be achieved) for a person who is desirous of knowing the real nature of the individual consciousness.

NOTES

An injunction may be meant either (i) for one who is desirous of knowing the Brahman, or (ii) for one who knows it. In the case of (i), the injunction is prescribed either (a) regarding the means of knowing the Ātman, or (b) for any other purpose. This verse refutes (b); (a) being acceptable.

1. See note (1) on verse 157 above.

क्रियाकारकभेदोऽयमज्ञातैकात्म्यवस्तुनः ।

तज्ज्ञानेऽसावसम्भाव्यस्तद्वेतुच्छित्तिकारणात् ॥१९४॥

194. This distinction between action and that which helps action¹ (arises) out of a thing which has only the oneness (i.e. the Ātman²) and has not been known (as such). When it (viz. the Ātman) is known that (viz. distinction) is not possible (to think of) because of the eradication of its cause.³

NOTES

The alternative (ii) stated in the note on the previous verse is refuted: Injunction is possible when ignorance persists and causes distinction and the enjoining force. But on the part of one who knows the Brahman, ignorance is already removed, therefore, no injunction is possible.

1. It means *kartr* 'agent (of an action)' or *karana* 'a means (of achieving the action)'.

2. The Ātman here refers to the Jīvātman, i.e. the individual consciousness (*pratyagātman*) which is really not different from the Brahman.

3. See next verse referring to ignorance as the cause of distinction.

न चाविद्यासमुच्छित्तिर्शनोत्पत्त्यतिरेकतः ।

संसारनाशोऽविद्याया नाशान्न व्यतिरिच्यते ॥१६५॥

195. And eradication of ignorance is not possible by anything else than the rise of knowledge (of the oneness of the Brahman and the Ātman). The disappearance of the transmigratory existence is not different from that of ignorance.

NOTES

This is a reply to a possible objection: 'There is no eradication of ignorance, i.e. cause of differentiation. Because if ignorance has not been created, how can the remover thereof be possible in the absence thereof? If ignorance has been created, it would be not opposed to the transmigratory existence. As the removal of darkness consists in the light of a lamp, there is no sequence between the rise of knowledge and eradication of ignorance.'

One could argue: 'Although destruction of ignorance invariably follows the rise of knowledge, the injunction is yet required for the constant meditation on the oneness of the Brahman and the Ātman for the sake of destruction of products of that ignorance.' This is answered in the second line.

न चाप्यविद्यानाशोऽत्र संसर्गः कारणात्मनि ।

तद्धवस्तेवंस्तुवृत्तत्वान्मृदि लोष्टादिनाशवत् ॥१६६॥

196. Destruction of ignorance is not its merger into the (material) cause (viz. the Ātman), since that merger (of ignorance) consists in the *vastuvṛtta*. '(mere) existence of reality'; it is like merger (lit. destruction) of a lump of clay etc. into clay (which is its material cause).

NOTES

There are two kinds of merger, i.e. *sānvayanāśa* and *niranvayanāśa*. In the case of the former, a product merges into its material cause as a lump of clay merges into clay, its material cause. Hence, merger (destruction) of a lump of clay precedes the appearance of clay, i.e. the remainder. In the case of the latter (viz. *niranvayanāśa*), there remains nothing behind

after merger (destruction). This is the case with the merger of ignorance. Because ignorance is not the effect (product) of the Brahman which could be stated as the material cause.

आदाय वास्तव्यं वृत्तं ज्ञानमज्ञाननाशकृत् ।

वस्तुयाथात्म्यवृत्तेन तमोऽपह्नूयते सदा ॥१६७॥

197. Only on understanding (lit. taking into consideration) the real nature of the thing (viz. the Ātman), (one may hold that) knowledge is the destroyer of ignorance, since then darkness (viz. ignorance) is for ever removed by the (very) nature of the thing as it is.

NOTES

Here is explained how the destruction of ignorance is nothing else than the rise of knowledge of the Ātman.

अज्ञातज्ञापनं तस्माद्विधिरत्रोपपद्यते ।

अकृतस्य क्रिया त्वत्र विधिनैवोपपद्यते ॥१६८॥

198. Therefore, it stands to reason that here (in this Śruti statement) there is an injunction that informs one of what is not known; but it cannot be held reasonable (to say that here there is) an injunction regarding doing what is not (previously) done.

NOTES

Cf. verse 115 above.

द्वैविध्यं चाप्यविद्याया न च युक्त्याऽवसीयते ।

ऐकात्म्यमात्रवस्तुत्वादविद्यैकैव युज्यते ॥१६९॥

199. Now as regards the two-fold nature of ignorance, it cannot be concluded (i.e. determined) even by reasoning. Ignorance can reasonably be accepted as unifold, since it pertains (only) to the oneness of the Brahman and the Ātman.

NOTES

'Ignorance can be understood as two-fold; (i) non-grasping of reality (*agraha*) and (ii) grasping the thing (i.e. reality)

as otherwise (*anyathāgraha*). The *agraha-ajñāna* is destroyed by the very rise of knowledge and the *anyathāgraha-ajñāna* is destroyed by the knowledge laid down in the Śruti.' This view of some is refuted by the first line. One could determine the nature of ignorance if it really existed apart from the Brahman. If one could discern two distinct objects as a man and a tree then alone one could say that objects are two-fold. Hence it is impossible to speak of two-fold character of ignorance.

The second line refutes the objection: 'Unifold ignorance is impossible because of the absence of reasoning etc.' Because there is complete absence of any other substratum for ignorance, there cannot be any other kind of ignorance. This is supported by the following verse.

प्रमेयभेदभिन्नत्वं ज्ञानानामिव भेदकम् ।

नाविद्याया यतोऽस्तीह द्वैविध्यं तेन दुर्घटम् ॥२००॥

200. Since in the case of ignorance there is no variety of objects to be known as in the case of other 'knowledges (form and knowledge) which would here be the cause of differentiation, therefore it is difficult to accept the diverse nature of ignorance (in respect of the individual consciousness).

प्रत्यगज्ञानमेवेह तदन्यद्वस्तुकारणम् ।

तदन्यकारणासत्त्वाद्वैविध्यं तमसः कुतः ॥२०१॥

201. Here (i.e. in our worldly dealing) ignorance about (the nature of) the individual consciousness is the cause of (awareness of) a thing other than itself. Since there is no cause other than ignorance (about the nature of the individual consciousness), how could there be the two-fold nature of darkness (i.e. ignorance)?

NOTES

The first line repeats the idea of Śaṅkara, i.e. *tam imam adhyāsam avidyākhyam puraskṛtya sarve pramāṇaprameyavyavahārā laukikāvaidikāś ca pravṛttāḥ* (BSB 1.1.1, p. 2). That is to say, we hold other things as existent only because we do not know the real nature of the Ātman.

With the help of the Śruti, *indro māyābhiḥ pururūpa iyate* (the *Rgveda* 6.47.18), 'Indra moves in various forms due to his miraculous powers', it is held that ignorance of the individual consciousness is the cause of the non-Ātman world. And the argument against bringing two things at one time by just one thing, i.e. ignorance (primarily), conceals the Ātman and secondly causes the world also; this is justified by the *kulyāpraṇayananyāya* according to which a thing made for some one purpose subserves another purpose also. Cf. *yathā śālyartham kulyāḥ praṇiyante tābhya eva pāniyam ca piyate tadvat* 'Canals are dug for purposes of bringing water to the paddy field (for the growth of paddy), but their waters are used for drinking purposes also.', quoted from G. A. Jacob, *A Third Handful of Popular Maxims*, Bombay: 1910, p.36).

न चाभ्यासाद्यपेक्षाऽपि स्वतोमुक्तत्वकारणात् ।

न घटादेर्घटत्वादि घटाद्यभ्याससंशयम् ॥२०२॥

202. There is again no expectation of constant meditation etc.¹ (on the part of an individual, i.e. individual consciousness) because of its (already) being liberated by itself. (Take, for instance,) ² the potness of a pot etc. that does not depend on the constant meditation on a pot etc.

NOTES

One may yet argue: 'An injunction is required for constant meditation on knowledge because the liberated nature of the Ātman results from the constant meditation of knowledge.' This possible objection is answered in this verse.

1. The word *ādi* means *yoga* 'physical practices such as *prāṇāyāma*' 'controlling breath'.

2. This illustration is given in order to stress that an ever-liberated being does not expect constant meditation.

न चाविषयविज्ञानमनाकारं च भाव्यते ।

भावकप्रत्यगात्मत्वादाकृतेश्च निषेधतः ॥२०३॥

203. And that which is not an object of (common) knowledge¹ and does not have any form (indeed) cannot be known,

because one who meditates² is the individual consciousness itself and because³ there is a (clear-cut) denial of its having a form.

NOTES

The knowledge with its object and a form such as an eagle is constantly meditated, but knowledge of the Ātman is otherwise; the Ātman knows itself, there is no subject-object relation in this respect. Therefore, no constant meditation for the knowledge of the Ātman is necessary. No injunction is, therefore, required regarding the same.

1. The word *viññāna* here means *savikalpakajñāna*, 'knowledge of object outside the subject' which is to be distinct from the knowledge of the oneness. On *viññāna* and *jñāna*, see note on verse 112 and the Introduction section 6.

2. The word *bhāvaka* refers to one who repeatedly meditates on the nature of the Ātman.

3. The Śruti to that effect is *aśabdam asparśam arūpam*—(KāthU 3.15).

नेन्द्रियेण ग्रहोऽस्यास्ति शब्दाद्यर्थानुपातिना ।

दुःखादिवच्च नैवाऽऽत्मा चित्तेः स्वार्थैकरूपतः ॥२०४॥

204. The Ātman is not grasped by the (external) sense-organs, which follow (lit. run after) the objects, sound etc. The Ātman is not grasped, like misery etc. also since knowledge¹ is of the same nature as that of its object.

NOTES

Here is denied any possibility that the knowledge of the Ātman is grasped (i) by the external sense-organs, or (ii) by *manas*.

1. *citi* = *cit*. Knowledge consists in the one who knows; here there is no distinction between object and subject.

भावनोपचितं चेतो न च कैवल्यकारणम् ।

तस्यैव समुच्छेदात्तद्वैतज्ञानहानतः ॥२०५॥

205. And indeed *manas*¹ which is nourished by constant meditation² is not accepted as the cause of (bringing about) the

state of the absolute (Ātman), since there is complete negation of itself in the state³ of the absolute (Ātman) (which proceeds) from abandoning ignorance which causes it (viz. *manas* etc.).

NOTES

But some say that *manas* with repeated meditation laid down in the Śruti is the cause of liberation and so they want an injunction as regards constant meditation on the nature of the Ātman. To them, Sureśvara replies in the first line.

That cause of liberation may be either (i) *upādānakāraṇa* or (ii) *nimittakāraṇa*. The alternative (i) is refuted in the second line of the verse.

1. The word *cetas* is used for *manas*.

2. The word *bhāvanā* has to be understood as *abhyāsa*, i.e. constant thinking about it; cf. the use of the causative of $\sqrt{bhū}$ in verse 203 above; also in Śaṅkara's *Mohamudgaraḥ*: *artham anartham bhāvaya nityam nāsti tataḥ sukhaleśaḥ satyam* /

3. The word *iha* is used for *jñānasattvāvasthā*.

स्वकार्यार्थानुगामित्वं भावनाज्ञानकर्मणाम् ।

अकार्यकारणात्मत्वात्कैवल्येऽनुगतिः कुतः ॥२०६॥

206. Constant meditation, knowledge (and) activity follow (i.e. are) in consonance with their own objects (to be known and) to be accomplished. (But) because (the Ātman) is not of the nature of a cause or an effect, how can there be such following on the part of its state of the absolute (Ātman)?

NOTES

Here is refuted the alternative (ii) mentioned in the note on the previous verse.

साक्षादात्मप्रसिद्धौ च नाभ्यासस्तत्फलस्थितेः ।

ज्ञानाभावादसिद्धौ च क्व न्वभ्यासव्यपेक्षणम् ॥२०७॥

207. Since the Ātman is already known directly, there is no need of constant meditation; there (already) exists its fruit; and while (the Ātman is) not known, where could there be any support for constant meditation.

NOTES

An injunction for constant meditation could be reasonable (i) when the Ātman is already directly known (*prasiddha*) or (ii) when the Ātman is not known (*aprasiddha*). Both these alternatives are refuted by the first and the second lines respectively.

आत्मासामान्यरूपोत्थं ज्ञानमज्ञानमात्मनि ।

सकृज्जातं न चेद्ब्रून्ति ज्ञानमेव न तद्भवेत् ॥२०८॥

208. If knowledge which arises from the unique nature of the Ātman is once obtained and it does not remove ignorance on its own part, it would not at all be knowledge.

NOTES

‘The knowledge which has been once obtained does not remove ignorance. Therefore an injunction is required for constant meditation.’ To such a doubt is given this answer. Because the mutual contradiction between knowledge and ignorance has been established, both cannot co-exist.

सम्यग्ज्ञानं यदाश्रित्य तन्मोहोऽपि तदाश्रयः ।

अबाधितं तमोऽत्रास्त इत्युक्तिर्जडवक्तृका ॥२०९॥

209. Ignorance of that resorting to which there arises right knowledge also resorts to that. The statement that darkness (i.e. ignorance) remains unsublated here (i.e. in the Ātman) is made (only) by a stupid person.

NOTES

An objector may say : ‘Ignorance may not necessarily be removed merely by the rise of knowledge but it would be definitely removed by the constant meditation on the knowledge.’ To this Sureśvara replies with an illustration. It is never found that darkness (i.e. ignorance) also remains where there is illumination (knowledge).

इत्येवमादि यच्चोक्तं पूर्वमेवातिविस्तरात् ।

तत्कृत्स्नमनुसन्धेयं सर्वविकारहानिकृत् ॥ २१० ॥

210. Thus, whatever has been said before in great detail is all to be borne in mind as that which removes all objections (in respect of an injunction).

NOTES

SP refers *pūrvam uktam* to the earlier refutation of the idea that the Vedāntas have prescribed any injunction in respect of the knowledge of the Brahman at several places in SV.

सर्वमात्मेत्यतः पश्येदात्मानात्मविभागवित् ।

आत्मा द्रष्टव्य इत्युक्त्या ह्येषोऽर्थोऽत्राभिधीयते ॥२११॥

211. Therefore, knowing the distinction between the Ātman and the non-Ātman, one should see that all (this) is the Ātman; this is the only¹ thing conveyed by the statement, 'The Ātman is to be seen.'

NOTES

This asserts the final position that the sentence *ātmā vā are draṣṭavyaḥ* does not prescribe any action for one but expresses the proposition: 'All this is the Ātman'. The long discussion beginning with verse 95 is concluded here.

1. Cf. SP : *prāg uktam arthāntarāsambhavam hetum kartum hi śabdaḥ*.

सर्वमानप्रसक्तौ च सर्वमानफलाश्रयात् ।

श्रोतव्य इत्यतः प्राह वेदान्तावरुत्सया ॥२१२॥

212. (Now) since it becomes necessary to hold the Ātman as the cause of all means of knowing on account of its being the very basis of the results of all means of knowing, (the seer of the Upaniṣad) declared, '(The Ātman has) to be heard about with a desire to declare the Vedānta texts (as the only means of knowing it).

NOTES

The suffix *avya* in the sentence *ātmā vā are draṣṭavyaḥ* does not intend to 'enjoin' but to 'express' the Ātman as 'worthy of seeing'. Therefore, the meaning of the sentence is that the

Ātman deserves to be seen. This has been already proved. Now the sentence (*ātmā vā are*) *draṣṭavyaḥ* is being explained.

दर्शनस्याविधेयत्वात्तदुपायो विधीयते ।

वेदान्तश्रवणं यत्नादुपायस्तर्क एव च ॥२१३॥

213. Since seeing¹ is not what can be enjoined, hearing of Vedānta texts is specifically prescribed as a means of knowledge. And the means is only reasoning².

NOTES

Sureśvara introduces here the sense of *śrotavyaḥ* in the sentence *ātmā vā are draṣṭavyaḥ śrotavyaḥ . . .*

1. The word *darśana* means 'seeing' as 'knowledge'. Cf. BOETZELAER (*op. cit.*, p. 51) on *adarśana*.

2. "According to Sureśvara and Madhusūdana Sarasvatī, hearing of the *mahāvākya* is the principal means of Brahman-realization, but such 'hearing' has to be aided (*sahita*) by *manana* and *nididhyāsana*. Madhusūdana says that 'pondering over the Upaniṣad *vākyas*' (*vedānta-vicāra*) is nothing but *śravaṇa* aided by *manana* and *nididhyāsana*; and such a *śravaṇa* is of the nature of *anvaya-vyatireka-tarka*" (K. SATCHIDANANDA MURTY, *Revelation and Reason in Advaita Vedānta*, Motilal Banarsidass, 1974, p. 152). For our purpose, reference could be made only to Sureśvara. Here then the second *upāya* means 'ancillary help'. Perhaps then *śravaṇa* and *manana* are *avinābhūta*.

श्रुतिलिङ्गादिको न्यायः शब्दशक्तिविवेककृत् ।

आगमार्थविनिश्चित्यं मन्तव्य इति भण्यते ॥२१४॥

214. The rules, viz. *śruti*, *liṅga* etc.¹, which differentiate various powers of words for the sake of determining the meaning of the tradition², are mentioned (here) by the word *mantavyaḥ*.

NOTES

The purposes of hearing (*śravaṇa*) and meditation (*manana*) are stated in the first and the second lines respectively. The

word *śravaṇa* means the clarification of the ultimate exposition of the meaning of Vedāntas in respect of the oneness of the Brahman and the Ātman with the help of the rules which determine the meaning of words and the meaning of a sentence; these are *śruti*, *liṅga* etc. The word *manana* conveys the sense of reasoning which establishes the falsity of duality, thereby determining of the Truth known by *śruti* etc. which help the removal of defects in one's wrong understanding of the Śruti texts.

1. *śruti*, *liṅga*, *vākya*, *prakaraṇa*, *sthāna* and *samākhyā*, which are powers of words determining the meaning of the Śruti. Cf. the *Jaimini Sūtra* 3.3.14.

2. The words *śruti* and Śruti are to be distinguished; the former is specific statement in the scripture which is a means of determining the meaning and the latter is the sacred or revealed texts.

वस्तुतत्त्वविवक्षेह मन्तव्य इति शासनात् ।

योषिदग्न्यादिदृष्टौ हि नैव मन्तव्यताविधिः ॥२१५॥

215. From the instruction in (the word) '(is) to be pondered over' we learn the desire on the part of (Yājñavalkya who is) explaining the nature of reality. Indeed there is never an injunction (such as) '(is) to be pondered over'¹ in the case of tentatively looking on a woman as fire² etc.

NOTES

The first line once again asserts that Vedāntas aim at expressing or explaining the reality, viz. the Brahman, but not at prescribing any *upāsana* while the second line points out that the meaning of the reality is ascertained through *manana*.

1. *manana* is the speculation by *tarka* (= *tarkānusaṁdhāna*) and *tarka* is based on direct perception. Hence *manana* is impossible in respect of such a subjective reality.

2. Where only *upāsana* is desired and not the knowledge of reality, there is no injunction in the Śruti such as 'to be meditated on' etc. In the illustration, 'a woman is fire', the identification of a woman with fire is imaginary, i.e. it is

subjective reality and not the objective reality. Cf. *yoṣā vā agnir gautama* (BU 6.2.13), *yoṣā vāva gautamāgniḥ* (CU 5.8.1).

वेदशब्दानुरोध्यत्र तर्कोऽपि विनियुज्यते ।

वाच्यवाचकसम्बन्धनियमे तस्य हेतुता ॥२१६॥

216. Here (viz. in determining the meaning of the Śruti), is employed reasoning which is in keeping with the words of the Śruti. (Indeed) it is a cause of determining (lit. limiting down) the relation between a word and its expressed sense.

NOTES

One may argue that the use of *tarka*, mentioned here as *manana* also, would contradict the Śruti statement *naiṣā tarkaṇa matir āpaneyā* '(O dearest one,) that (knowledge) is not to be obtained through reasoning.' Therefore, Sureśvara answers that objection in the first line: The *tarka* in the statement *naiṣā* . . . refers to that *tarka* which is not in keeping with Veda (*avaidikatarka*); whereas the *tarka* intended here in this statement is not contradictory to Veda (*vedānusāritarka*, *vedā-virodhitarka*). Cf. Śaṅkara's argument on the use of *tarka*: *śrutyanugrhita eva hy atra tarko'nubhavāṅgatvenāśriyate* / (BSB 2.1.6, pp. 188-189).

'If the Vedic statement is sufficient to give the decisive meaning, what is the use of *tarka*?' To this question the second line is the answer: *tarka* fixes the relation of *vācya* and *vācaka* in respect of things expressed by the words *tvam* and *tat*. Although the Śruti is the unfailing means of knowing reality, *tarka* known as *manana* is also used as a mode to be adopted (*itikartavyatvena*) for it removes the impossibility (*asambhāvanā*) etc. (this etc. may refer *viparyaya*, *saṁśaya*).

अपरायत्तबोधोऽत्र निदिध्यासनमुच्यते ।

पूर्वयोरवधित्वेन तदुपन्यास इष्यते ॥२१७॥

217. Here (in this text, the word) *nididhyāsana* is used for understanding which depends on other(s) and its statement is expected by Śruti as the limit of the previous two.

NOTES

The nature and the effect of *nididhyāsana* are stated in the first and the second lines respectively. The word *nididhyāsana* means 'the understanding of the meaning of the Śruti on the basis of *vācyavācakasambandha* without any difficulties in the case of a person who has overcome the hindrance to the knowledge of the meaning of the sentence, having resorted to *śravaṇa* and *manana* and associated (himself) with *śama* etc.' Another meaning may also be assumed: In the passage *ātmā vā are draṣṭavyaḥ* has been declared the knowledge which is accidental and causes thought. This repetition is for purposes of laying down the pursuit of the same knowledge as the means.

श्रवणादिक्रिया तावत्कर्तव्येह प्रयत्नतः ।

यावद्यथोक्तं विज्ञानमाविर्भवति भास्वरम् ॥२१८॥

218. The activity of hearing about etc. is to be carried on zealously¹ here (i.e. towards the Ātman²) till the blazing knowledge³ as (already) stated manifests (itself).

NOTES

nididhyāsana as being the support for the culmination of *śravaṇa* etc. associated with *śama* etc. is clarified.

1. *prayatna* = *śamādisāhityam tatrāvṛttiṃ sūcayati*. (SP)
2. *iha* = *ātmani*. (SP)
3. *bhāsvaratva* = *phalaśiraskatva* = *svaprakāśatva*. The use of the word *viññāna* here is in the sense of *ātmajñāna* owing to its adjective *bhāsvara*. On *jñāna* and *viññāna* see note on verse 112.

आगमाद्दर्शनं पूर्वमागमाच्चायतो मतिः ।

त्रयाणामपि सङ्गानाच्छास्त्राचार्यात्मनां स्थिरम् ॥२१९॥

219. First, knowledge (i.e. information, is secured) from the Śruti. From the Śruti and the preceptor comes thought (i.e. understanding). (And) the permanent (knowledge, i.e. the knowledge of the Ātman, is secured) from the mention (i.e.

following) of the three, viz. the Śruti, preceptor and oneself together.

NOTES

Sureśvara refers to *darśana* etc. in keeping with the order in the text, viz. *draṣṭavyaḥ*, *śrotavyaḥ* and *mantavyaḥ*. The study of the Śruti together with its ancillary texts gives rise to the knowledge which instigates thought. After that there is *śravaṇa* from the Śruti and from preceptor. Then, by means of the praise and the practice of *manana* which is nothing but *manana* and instigated by *śravaṇa* in keeping with the Śruti etc. as the cause of knowledge of the Ātman, there arises knowledge of the Brahman called *nididhyāsana* which is stable and void of *asambhāvanā*, *viparyaya*, *saṁśaya*. Cf. note (1) on verse 213.

1. BUB (p. 325) states this in a reverse way thus: *śrotavyaḥ pūrvam ācāryata āgamāc ca* / 'To be heard firstly from preceptor and then from the Śruti.'

2. *mati* = *manana*.

प्रतिपत्तिः पुरा शाब्दी यावन्न मनुते श्रुतम् ।

श्रुत्वा मत्वाऽथ तं साक्षादात्मानं प्रतिपद्यते ॥२२०॥

220. One's understanding is merely verbal so long as one does not meditate on what is heard. One directly understands (what is the Ātman only) after¹ one meditates on what one has already heard.

NOTES

This order of *śravaṇa* etc. is not merely one in the Śruti but in logical process also.

1. *atha* is *ānantaryavacana* 'expressive of later occurrence'. Therefore *śravaṇa* has to be first qualified by *manana* and *nididhyāsana*, then alone it leads to liberation. (SP)

अनन्यायत्तबिज्ञाने श्रवणादेरुपायतः ।

जाते नापेक्षते किञ्चित्प्रतीचोऽनुभवात्परम् ॥२२१॥

221. When by such means as hearing etc. there arises

knowledge¹ which does not depend on anything else (the knower²) does not expect anything else than the awareness of the individual consciousness.

NOTES

This verse reasserts that 'the moment one has 'understood' the meaning of *tat tvam asi*, one does not have to expect anything else———one is immediately liberated———'understanding' follows grasping of the verbal meaning as stated in the preceding verse.

1. On *viññāna* see note on verse 218.

2. The word *vidvān* (= *brahmavid*) is supplied in view of (na) *apekṣate*.

[When knowledge arises, (i) liberation is dependent, or (ii) knowledge is dependent. Both the alternatives are refuted in the following two verses.]

साध्यसाधनसम्बन्धे शास्त्रापेक्षैव नापरा ।

लिङ्गापेक्षाऽनुमेयेऽर्थे नरापेक्षा नरोचिते ॥२२२॥

222. In respect of determining¹ the end and the means, there is expectation only of the Śruti and of nothing else. (So also), in respect of a thing which is to be inferred, there is expected (the knowledge of a) characteristic and a person is expected (in respect of a thing²) fit (to be achieved by) a person.³

NOTES

The alternative (i) is refuted. SP says on this thus : The rule is : Whichever is the proper means to the desired object is alone to be expected; so, knowledge which is the only means to liberation is alone to be expected. But this goes one step further from the original verse.

1. *sādhyaśādhanasambandha*(*jñāna*) implies *jñātrjñeyaikātmyāvagama* 'understanding of the oneness of a knower (*sādhana*) and an object of knowing (*sādhya*).'

2. The word *arthe* is to be supplied.

3. *narocita* = *narayogya* = *narapratyakṣagamya*.

भिन्नमात्रादिविज्ञाने सापेक्षं विनिश्चितिः ।

एकमात्रादिके त्वस्मिन्कः किं कस्मादपेक्षते ॥२२३॥

223. In respect of the knowledge of various (things, viz.) knower etc.¹, ascertainment (of their nature) is dependent (on them all).² On the contrary³, in respect of this (Ātman) which alone is the knower etc. who can (be said to) expect what (and) from whom ?

NOTES

The alternative (ii) is refuted. Cf. BU 2.4.14 : *yatra hi dvaitam iva bhavati . . . tad itara itaram paśyati . . . yatra vā asya sarvam ātmaivābhūt . . . tat kena kaṁ paśyet . . .*, and also BSB 1.1.1. (p. 2) : *tam etam avidyākhyam ātmānātmanor itaretarādhyāsam puraskṛtya sarve pramāṇaprameyavyavahārā laukikā vaidikāś ca pravṛttāḥ* /

1. Knower, object of knowing, means of knowing——all these are *anātman*.

2. I. e. 'the ascertainment . . .' corresponds to all these three.

3. The word *tu* is *pūrvapakṣāvachchedaka*.

प्रमाणरूपावष्टम्भात्प्रमा पूर्वं प्रजायते ।

पश्चात्प्रमेयनिष्ठं प्रमेयार्थानुरोधेन ॥२२४॥

आत्माऽऽत्मानं विजानाति यत्र वाक्यादिमानतः ।

तत्र मात्रादिसम्भेदो न मनागपि लभ्यते ॥२२५॥

224-225. By resorting to the means of knowing and the form is produced right knowledge; (and) afterwards there remains one's awareness of the object to be known, which follows the object to be known. When¹ the Ātman knows itself after² knowing the authoritative sentence (i.e. the Śruti) etc. there then remains no distinction, viz. a knower etc., even slightly.

NOTES

There are two modes of rise of knowledge : (i) It arises from awareness of a knower etc., i.e. the object of knowing

is the non-Ātman, (on this; cf. verse 223), or there is *bhedabuddhi*; and (ii) it arises when there is no awareness of a knower etc., i.e. the object of knowing is the Ātman, or there is *abhedabuddhi*. Case (i) is mentioned in verse 224 and (ii) in verse 225 respectively.

1. By the word *yatra* in the first line, the condition of purity of the intellect is stated and by the word *tatra* the condition of its fruit is stated. (SP)

2. 'After' or 'through' for *-mānataḥ* where *-tasi* is expressive of the cause of knowledge.

पदार्थविषयस्तर्कस्तथैवानुमितिर्भवेत् ।

वाक्यार्थप्रतिपत्तिस्तु वाक्यादेवाभिजायते ॥२२६॥

226. Logical reasoning refers to the object (or what is signified by word(s), inference¹ will also be likewise in accordance with that (viz. the signified)². Understanding of the sentence-sense however arises only from (hearing) the Śruti (statement).

NOTES

In this verse Sureśvara wants to avert such a wrong notion as 'the word *vākyādimānataḥ* might lead one to believe that knowledge of the Ātman could arise from anybody's speech (lit. sentence / words)'

1. The word *tarka* 'logical reasoning' may not be based on the Śruti, or may sometimes be *vedāntavirodhi* 'opposed to the Śruti', *anumiti* 'inference' also may be similar, i.e. *vedāntavirodhi*.

(2) *tathaiveti padārthaviṣayatvoktiḥ* (SP)

(3) *tarka* has for its *viṣaya* (only/even) *tanmātras* (i.e. the non-Ātman) for the knowledge of the Ātman however only Vedāntas is useful.

आत्मानात्मत्वमात्रं हि लिङ्गाद्वस्तुषु गम्यते ।

सर्वमानातिवर्त्यात्मा वाक्यादेवावगम्यते ॥२२७॥

227. From the characteristics one comes to know only the nature of objects, viz. this is Ātman and/or this non-Ātman. As against this, (one comes to know that) the Ātman is (ever)

beyond the (useful) means of knowing only from the Śruti (statements).

NOTES

Sureśvara states here the reason why logical reasoning (*tarka*) etc. can be said to refer to the meaning of the words but not to the sentence-sense (*vākyārtha*) in respect of a *mahāvākya* like *tat tvam asi*; there the *vākyārtha* is really *avākyārtha*. Cf. the Introduction: discussion on the method of *anvayavyatireka*. Among objects whose characteristics are not specifically known, some may be the non-Ātman; these are the worldly things. *tarka* conveys only relative knowledge, not the nature of the Ātman; the Śruti alone can give it, independent of any other means.

नन्वकृत्स्नं भवेज्ज्ञानं यद्यात्मैव समीक्ष्यते ।

केवलोऽनात्मनोऽदृष्टेः प्रतीचोऽन्यस्य वस्तुनः ॥२२८॥

228. (Objection:) Indeed knowledge (that thus arises) would not be complete, if the Ātman alone is understood (from the Śruti). (Reply:) (This is not so) because the non-Ātman which is a thing other than the Ātman is not seen.¹

NOTES

Agreeing that the Śruti alone is the source of the knowledge of the Ātman, one may yet say that the Śruti may bring both the Ātman and the non-Ātman within the range of knowledge. Thus when the Ātman and the non-Ātman are both known by the Śruti, the Ātman should be taken as distinguished from the non-Ātman by some characteristics. This would lead to the acceptance that the Ātman is possessed of characteristics (*saviśeṣa*). It is this argument which is refuted here.

1. 'Seen' indicates 'proved to exist'.

नायमन्योऽथवाऽनन्यः प्रत्यगज्ञानजत्वतः ।

दण्डसर्पादिवद्रज्ज्वां स्वतोऽपूर्वादिमान्यतः ॥२२९॥

229. One cannot say that this individual consciousness is different from or the same as the other (thing (s)), (because such a knowledge) is produced from ignorance of the individual

consciousness¹; (this is) as in the case of (the indefinite apprehension of) a stick, a snake in (the place of) a rope. (This is so, i.e. cause / origin²).

NOTES

Sureśvara declares *anirvacaniyakhyāti* in respect of the individual consciousness.

Ignorance of the Ātman alone leads to the awareness of the non-Ātman as existent, because the Ātman is not produced by anything, nor has it any subsequent product; the knowledge of duality is caused by ignorance.

1. Cf. BU 2.4.14: *yatra' hi dvaitam iva bhavati . . . tad itara itaram paśyati . . .*

2. Cf. BU 2.5.19 : *tad etad brahmāpūrvam anaparam anantaram abāhyam.*

यतोऽतो दृष्ट एतस्मिन्प्रत्यगात्मनि केवले ।

नास्ति ज्ञानमनुत्पन्नं नाप्यध्वस्तं तथा तमः ॥२३०॥

प्रत्यङ्मात्रेकयाथात्म्यात्कार्यकारणवस्तुनः ।

तज्ज्ञानात्किं तमोऽध्वस्तं त्किंवाज्ञानं वदाऽऽत्मनः ॥२३१॥

230-231. Since when this individual Ātman is thus¹ known as alone², it is not that knowledge has not (already) arisen and not also³ that darkness (i.e. ignorance) has not been removed. Since the thing which is itself the cause and the effect is really of the nature of the individual consciousness, tell me⁴, therefore, what darkness (i.e. ignorance) would remain undestroyed, because of knowledge of it? or what ignorance (would remain) on the part of the Ātman?

NOTES

The reason expressed by the word *yataḥ* in verse 230 is clarified in the first line of verse 231 and that by *ataḥ*, in the second line.

1. I.e. as told in previous verse, or *śrutivākyāt*. This is the meaning of *ataḥ*. The Śruti which Sureśvara has in mind is *ekam evādvitīyam* (CU 6.2.1).

2. I.e. one without a second.

3. *tathā* = *api ca*.

4. For *vadātmanah* in the text, the footnote thereon shows the other reading, i.e. *tadātmanah* which indicates two possible readings, i.e. *tad ātmanah* and *tadā ātmanah*. My translation follows the text, i.e. *vada ātmanah*.

अनुवादे यथोक्तानां प्रक्रान्ते दर्शनादिषु ।

विज्ञानेनेत्यथ कथं निदिध्यासनमुच्यते ॥२३२॥

ध्यानाशङ्कानिवृत्त्यर्थं विज्ञानेनेति भण्यते ।

निदिध्यासनशब्देन ध्यानमाशङ्क्यते यतः ॥२३३॥

232-233. (Objection :) Although there is restatement of what was (already) stated in (the words) *darśana* etc., how is it that *nididhyāsana* is expressed by (the word) *viññāna*? (Reply:) (The word) *viññāna* is used (lit. uttered) in order to avert the doubt if meditation is referred to, for they would understand (lit. suspect) by the word *nididhyāsana* 'meditation'.

NOTES

Cf. the last sentence of BU 2.4.5: *ātmā vā are draṣṭavyaḥ śrotavyaḥ mantavyo nididhyāsitaḥ maitreyy ātmano vā are darśanena śravaṇena matyā viññānenedam sarvaṁ viditam* / In this, the word *viññāna* paraphrases the word *nididhyāsana*—this is unlike other words, viz. *darśana* for *draṣṭavyaḥ*, *śravaṇa* for *śrotavyaḥ* and *mati* for *mantavyaḥ*. In normal linguistic usage, the word *nididhyāsana* means 'meditation'. Therefore, one might doubt that the word *nididhyāsana* means *dhyāna*. This is understood from the second line of verse 233. The Śruti, therefore, replaces the word *nididhyāsana* by the word *viññāna* and sets aside the possible doubt. SP points to the known dictum of Mīmāṃsā : *sandig-dhasya vākyaśeṣān nirṇayaḥ*; e. g. the sentence *aktāḥ śarkarā upadadhāti* implies *ghṛtenāktāḥ* in view of the *vākyaśeṣa* 'tejo vai ghṛtam'; cf. the *Jaiminiyanyāyamālāvistaraḥ*, Benares : Kashi Sanskrit Series 126, 1937, p. 13.

विज्ञानोत्पत्तिहेतुत्वं ध्यानादेः प्रागवादिषम् ।

स्वार्थमेव तु विज्ञानं मुक्तिमात्रफलं स्मृतम् ॥२३४॥

234. I have already mentioned¹ that meditation etc. is the origin of knowledge. But it is held that knowledge is for its own sake; it results only in liberation as its fruit.

NOTES

Since it is now pointed out that *nididhyāsana* means *viññāna*, one may hold that *nididhyāsana* thus refers only to grasping fast the meaning of the Śruti statement and would say that the Śruti does not refer to the means to liberation. This doubt is answered in the first line. Yet further doubt may be: When an injunction is absent, *dhyāna* cannot be a means, because the Śruti : *tasmād evaṁvic chānto dānta uparatas titikṣuḥ samāhito bhūtvātmany ātmānam paśyati* (BU 4.4.23) says that discipline is necessary for the knowledge and because the word *nididhyāsanaḥ* conveys the knowledge of the meaning of the sentence resulting from *śravaṇa* etc., associated with *dhyāna* (see notes on verses 217 and 218). Then, if *dhyāna* is accepted as a means, a question could be asked; 'Why does not the Śruti mention it directly?' The answer is : 'The subsequent part of the Śruti is opposed to it.' It is stated in the second line: 'Knowledge which has liberation for its fruit and expects nothing is nothing but *nididhyāsana*.'

1. From SV onwards at various places in BUBV.(SP) Refer to SV for that *dhyāna* leads us to *viññāna*.

एकात्म्याज्ञानविष्टवंसर्व्यतिरेकेण नेष्यते ।

एकात्म्यविज्ञानफलं प्राप्तमेव हि तत्स्वतः ॥२३५॥

235. They do not accept that the fruit of knowledge of the oneness¹ (of the Ātman) is different from the destruction of ignorance regarding the oneness (of the Ātman), since² that (fruit) is (already) by its very nature existent (lit. attained.)

NOTES

If it is said that knowledge has liberation as the fruit then liberation is non-eternal, being dependent on a means. This is to say : *sādhanaena sādhyam ataḥ anityam*. The first three quarters answer this doubt.

1. Sureśvara holds *aikātmya*, *kaivalya* and *nityaprāpta* as *paryāyas* 'synonyms.'

2. Liberation is the fruit of knowledge. That is to say : Knowledge is a means to uncovering of itself by the removal of ignorance — such is its *sāadhanatva* and *sādhya**tva*. This is merely a figurative expression; liberation is always existent and not at all created. Therefore, knowledge, i.e. liberation is eternal or *nityaprāpta*.

यतोऽनवयदेनैव रज्जुसर्पादिवत्तथा ।

आत्माऽयं सङ्गतिं याति तन्मोहाध्यस्तरूपिणा ॥२३६॥

236. The Ātman goes together¹ with the non-Ātman which has a form superimposed on itself through infatuation (i.e. ignorance) (of it) and (which is) not its part, exactly in the same way as the serpent goes together with the rope.

NOTES

If cessation of ignorance together with its effect is accepted as different from the Ātman, there would result duality. And in that condition before liberation, it is to be taken as identical with the Ātman and thus the Ātman has to be taken as dependent on a means. To this objection, is given a reply in this verse. In the example of *rajjusarpa*, the true rope and the false serpent are noticed in just one and the same thing. So also then the Ātman and the non-Ātman (which is the effect of the ignorance about the nature of the Ātman) are noticeable in just one and the same Ātman. Thus the Ātman is to be taken as co-existent with the means of its liberation. In both, the example and the object of comparison, viz. the Ātman, the serpent and the non-Ātman are not parts of the rope and the Ātman respectively; these are, however, superimposed on them through ignorance and cannot really be taken apart from them. Such is the *anirvacanīyakhyāti* above referred to.

1. *saṅgatiṁ √yā* is a metaphorical expression.

आत्मा तत्त्वं विभक्तस्य प्रमात्रादेरनात्मनः ।

स्वतः सिद्धस्तदज्ञानसमुत्थस्य मृषात्मनः ॥२३७॥

237. Self-established is the Ātman, which is the essence of the non-Ātman consisting of a knower etc. (that is taken as) different (from the Ātman), which is of the nature¹ of falsity arising from the ignorance about it (i.e. the Ātman).

NOTES

It was said in the previous verse that the Ātman goes together with the non-Ātman. This verse explains how. And also how the Ātman is said to be the essence of the non-Ātman that is imagined. The notion of the non-Ātman is produced from ignorance about the Ātman and is therefore the nature of falsity, consisting in a knower etc. Therefore the Ātman is figuratively said to take the form of the non-Ātman; really speaking, the Ātman is merely the substratum of all 'imagination'.

1. *mṛṣātman* = *mṛṣāsvarūpa*.

आत्मज्ञानप्रमेयाच्च नान्यस्तज्ज्ञानकृद्यतः ।

अनन्यमातृमानोऽतः प्रत्यगात्मा तमोपनुत् ॥२३८॥

238. Since that which causes the knowledge of what is not different from the object of knowledge of the Ātman, therefore, one whose knower and means of knowing are not different (from oneself) is the individual consciousness which is the remover of darkness (i.e. ignorance).

NOTES

Even in the absence of duality, caused by the destruction of ignorance along with its effects, (i) the knower may be different from the Ātman, or (ii) identical with it. If (i), the Ātman would not be non-dual. If (ii), there would arise a different condition for immutability of the Ātman. For, it would then be concluded that a knower is neither different from nor identical with the Ātman. Therefore the first line of this verse gives an answer : There is neither abandoning of non-duality nor would arise there the difficult condition of immutability, because the nature of the Ātman as 'a knower' exists only in the condition of ignorance.

Then, yet another objection may be raised : 'The knowledge, however, can be (i) different from the Ātman, or (ii) identical with the Ātman.' Not (i), because there would be the abandoning of non-duality. Nor (ii), because of existence of ignorance, there would always be the destruction of ignorance. This is given in the second line. The individual consciousness, non-dual and obtaining the position of being the fruit of knowledge produced from the sentence, burns away the ignorance about itself along with its effects. Therefore, the defect as stated would not result.

अज्ञानोत्थमनूद्यातो मिथ्याक्लृप्तमशेषतः ।

इदं ब्रह्मेति वचसा सर्वमात्मेति नोऽवदत् ॥२३६॥

239. Having repeated whatever arises from ignorance, i.e. whatever false is imagined in the statement 'This is the Brahman', the Śruti text declared to us that all this is the Ātman.

[The preceding verse pointed out the purpose of the paraphrase under reference from verse 232. Now Sureśvara commences the discussion on *brahma tam parādād yo'nyatrātmano brahma veda kṣātram tam. . . sarvaṁ veda* (BU 2.4.6), up to verse 260.]

आत्मधीमात्रगम्यार्थास्तदन्योऽवभासते ।

तद्दर्शननिषेधार्थं ब्रह्मेत्याह परा श्रुतिः ॥२४०॥

240. In order to prohibit the vision of whatever appears to be different from an object to be understood only from the knowledge of the Ātman, the subsequent Śruti passages declared; 'The Brahman . . .'.

NOTES

To begin with, the aim of this statement is stated thus : It seeks to prohibit the vision of whatever object appears to be different from the self-luminous Ātman.

समस्तव्यस्तता तस्मान्नवेह श्रुतिमानतः ।

अनात्मबुद्धिविषयं यतो यत्नान्निषेधति ॥२४१॥

241. Since the Śruti specifically rejects any object of cognition that is the non-Ātman, therefore, here in this particular matter¹, there is no separation of different parts of what is whole², on the authority of the Śruti.

NOTES

1. The word *yatna* refers to 'repeated negation'. Cf. verses 73 and 213.

2. As to the word *samastavyastatā*, Cf. verse 464 below and Nais 1.73. And TUBV uses the word *samaṣṭivyaṣṭitā* in 2.162 and 174.

कार्यत्मा कारणात्मा च द्वावात्मानौ परात्मनः ।

प्रत्यग्याथात्म्यमोहोत्थौ तन्नाशे नश्यतस्ततः ॥२४२॥

242. The highest Ātman is said to have two parts : One is the Ātman which has the nature of an effect and the other is the Ātman having the nature of a cause———this notion arises from infatuation (i.e. ignorance) of the true nature of the individual consciousness, (and therefore) these two parts (the awareness of them) cease to exist (lit. perish) when that (ignorance) gets destroyed (lit. perishes).

NOTES

This verse answers an argument that could be made thus : 'The highest Ātman consists in the two Ātmans, viz. *kāryarūpa* and *kāraṇarūpa*. Therefore, if one is negated, the other is automatically negated. Where is then the need for repeated negation?'

अपूर्वानपरोक्षेहि कार्यकारणताऽऽत्मनः ।

कुतः प्रमाणात्सम्भाव्या कार्यकारणघस्मरे ॥२४३॥

243. Indeed, on account of the statement in respect of the Ātman (which is) devourer of the cause and effect (relation) that it does not have anything preceding and subsequent to it,¹ on what authority could there be the nature of a cause and of an effect ascribed to the Ātman.

NOTES

One could argue : 'It is not proved that the notion about the Ātman that it is a cause and also an effect has originated from ignorance.' To this argument, is this verse a reply. The means of knowing does not put forth an object which is contradictory to the means of knowing, because the nature of being the means of knowing (*pramāpakatva*, *jñāpakatva*) expects non-contradiction——this is stressed in the second line by the word *hi*.

1. Cf. BU 2.5.19 already cited under verse 229 above.

नैतस्माज्जायते किञ्चिन्नायं जातः कुतश्चन ।

आत्मेत्येवं श्रुतिर्वक्ति कारणादिनिषेधकृत् ॥२४४॥

244. Nothing (else) is born from this (Ātman), nor is this born from anything (else). Thus (lit. this) does the Śruti declare, (thereby) rejecting the cause etc.¹

NOTES

The Śruti, 'The Ātman has nothing preceding . . .' (BU 2.5.19), does not establish the uniqueness of the Brahman, at the most it may point to its being unrelated to anything else. Therefore there is reference to *na jāyate mriyate vā kadācin nāyam bhūtvā bhavitā vā na bhūyaḥ* ((Kath U 2.18), which is the authoritative Śruti (Also cf. BG 2.20).

1. Meaning *kāraṇa*, *kārya* and *kartr*.

ज्ञेयं यत्तत्प्रवक्ष्यामि यज्ज्ञात्वाऽमृतमश्नुते ।

अनादिमत्परं ब्रह्म न सत्तन्नासदुच्यते ॥२४५॥

यस्मात्क्षरमतीतोऽहमक्षरादपि चोत्तमः ।

अतोऽस्मि लोके वेदे च प्रथितः पुरुषोत्तमः ॥२४६॥

यो मामेवमसम्भूदो जानाति पुरुषोत्तमम् ।

स सर्वविद्भूजति मां सर्वभावेन भारत ॥२४७॥

245-247. I am going to declare that which is the object of the knowledge (and) by knowing which one attains (lit. enjoys)

immortality. It is said (i.e. declared in the Śruti) that the highest Brahman is beginningless, and neither existent nor non-existent. Because I am beyond the destructible and beyond also the indestructible, therefore I am widely (*pra*)¹ known as the best of men, both in the world and in the Śruti² as well. He who, unperplexed, knows me as the best of men, is a knower of everything and resorts to me in all objects (viz. with all sincerity), O son of Bharata !

NOTES

In this regard, SP points out that Sureśvara takes the support of the Smṛti. It is citations from BG 13. 12, 15. 18-19.

1. Or 'ever'.
2. CU 8. 12. 13 : *sa uttamah . . . puruṣaḥ* and cf. BG 8. 1. 10. 15, 11. 3 referring to *puruṣottama*.

इति वेदात्मनः साक्षाद्वचनं श्रुतिसम्मतम् ।

सर्वान्तर्यामिणः शौरेर्नोपेक्ष्यं तद्भुवादृशः ॥२४८॥

248. Thus is the direct speech of Śauri¹ who himself is Veda and resides² within all, it is supported by the Śrutis; therefore, it should not be ignored by those³ who are like you.

NOTES

The Smṛti passages cited are stated by the lord who is *sarvajña* and *yathārthavaktā* (viz. *āptavacana*); therefore, they are authoritative.

1. The descendent of Śūra clan; this is Śri Kṛṣṇa of MBh, the lord of the song, called BG.

2. Cf. BG 18.61 : *iśvaraḥ sarvabhūtānāṃ hṛddeṣe 'rjuna tiṣṭhati*; and also the *Māhānārāyaṇa U* 17.5.

3. The followers (i.e. knowers) of the Veda—, Maitreyī was conversant with Vedic lore.

तत्रैवं सति यो मूढः कार्यकारणदर्शनः ।

पराङ्मुखं निदध्यात्तमात्माकृत्स्नत्वदर्शनम् ॥२४९॥

249. This being the case, the Ātman would turn him away

whosoever ignorant sees (the Ātman as consisting in) the cause and the effect, and (therefore) does not see the wholeness¹ (of the Ātman).

NOTES

After stating the general meaning (purport) of *brahma tam parādādyo'nyatrātmano brahma veda kṣatram tam sarvam veda*. (BU 2.4.6) the literal meaning is briefly stated. Though the Ātman is free from duality, a non-discriminative person sees it as the cause and himself as an effect. The notions of a brahmin, a kṣatriya etc. are falsely seen; they take the person who sees such differences away from the human goal.

1. It refers to 'partlessness'. That is to say: The Ātman cannot be divided into *kārya* and *kāraṇa*. Cf. the Śruti passages to the same effect: *virajam brahma niṣkalam* (Mu U 2.2.9), *tad etat pūrṇam apravartī* (CU 3.12.9).

ब्रह्मेति जातिनिर्देशः क्षत्रसन्निधिकारणात् ।

ब्रह्मजातिः परादध्यादसम्यग्दर्शिनं नरम् ॥२५०॥

250. (In the word) *brahman*, there is the mention of the (brāhmin) caste owing to its usage in the vicinity of (the word) *kṣatra*. The (notion of the) brahmin caste would put him away from reality, the one who does not see correctly !

NOTES

This verse reiterates the purport of the previous verse; here Sureśvara supplies the reason to Śāṅkara's commentary, *brahma brāhmaṇajātīḥ*.

यदस्ति तन्न जानाति यन्नेहास्ति तदीक्षते ।

इत्येवमपराधोत्थकोपाविष्टेव बालिशम् ॥२५१॥

कैवल्यात्तं पराकुर्याद्विप्रजातिः पराङ्मुखम् ।

अजातिब्रह्मतत्त्वं मां योज्यं जात्यात्मनेक्षते ॥२५२॥

251-252. The¹ (notion of the) brahmin caste would turn him away from reality², who is ignorant³ that he does not know what⁴ exists and sees what does not exist as if full of anger

which has arisen out of this fault (of his), (with this thought:) this one is indeed looking upon me as of the nature of caste (etc., even if) I am the truth, viz. the Brahman, and one not having a caste.⁵

NOTES

The word *asamyagdṛṣṭi* 'seeing incorrectly' is further explained.

1. The word *viprajāti* means *brahmajāti*. Cf.

*janmanā brāhmaṇo jñeyaḥ saṃskārair dvija ucyate/
vidyayā yāti vipratvaṃ tribhiḥ śrotriya-lakṣaṇam||*

(the *Padmapurāṇa*, *śṛṣṭikhaṇḍa* 43. 134, *Ānss* 131, vol. 3, 1894).

2. The counter-entity of *parākarāṇa* 'taking away', viz. *kaivalya*, is stated.

3. The word *bālīṣa* means 'childish person' or 'one who is not good at discrimination.' (SP) Cf. GK 4.83.

4. 'What exists' refers to *ātman* and 'what does not exist', *anātman*.

5. Context wants the idea of caste; though, by pun, one could understand 'not-born (at all)'.

किं तेन न कृतं पापं चोरेणाऽऽत्मापहरिणा ।

योऽन्यथा सन्तमात्मानमन्यथा प्रतिपद्यते ॥२५३॥

253. What sin is not committed by the thief, who is concealing (the real nature of) the Ātman and looks upon the Ātman as different from what it is?

NOTES

Verse 253 is a quotation from MBh 1.68.26, with the difference that the lines of the original verse have been reproduced here in the reverse order. The second line of the verse explains the concept of the 'theft' involved with respect to the Ātman.

यो न वेदाऽऽत्मयाथात्म्यं वेद जात्यादिमत्तया ।

स यद्यतोऽतो जातिस्तं परादध्याज्जडं नरम् ॥२५४॥

254. If he, who does not know the real nature of the Ātman (in the expression *brahman*), knows the Ātman as having the sense of a caste etc. (and takes it) apart from this *brahman*), then the (notion of) caste would keep him, the foolish, away (from reality).

सर्वदाऽव्यभिचार्येकं व्यभिचार्यर्थबुद्धिषु ।

यत्तत्त्वं गम्यते प्रत्यक्तदेवानात्मवस्तुनः ॥२५५॥

255. That is the individual consciousness which is understood¹ as essence (i.e. basic reality), the ever invariable, the one in all cognition of variable objects of consciousness, (apart) from the non-Ātman.

NOTES

An objection may be: 'If the brahmin caste etc. is understood as different from the Ātman, there would result non-acceptance of monism. If it is taken as identical with the Ātman, it would be what, in your opinion, is the non-Ātman.' Sureśvara gives a reply to this.

1. The word *gamyate* is the same as *pratiyate* or *anubhūyate*.

अन्तर्मेयबलाज्ज्ञानं प्रत्यङ्मोहजसंश्रयम् ।

बाधतेऽव्यभिचारिस्त्वाद् व्यभिचारि तमोन्वयम् ॥२५६॥

प्रत्यक्तमोजयाथात्म्यमात्राभिजनहेतुतः ।

कालादौ तदभावोऽतो न ज्ञानस्यापवादकृत् ॥२५७॥

256-257. The knowledge wards away (i.e. sets away or destroys) (ever-) variable cognition associated with (i.e. marked by) darkness (i.e. ignorance) arising from (i.e. related to) infatuation (i.e. ignorance) regarding the (nature of the) individual consciousness, owing to the strength of the object of knowing within oneself (viz. the Ātman), (and) because it is (ever-) invariable. (Now,) in time etc.¹ there is absence of it² on account of the origin of their nature (as such and such) only in ignorance about the individual consciousness; therefore, (time etc.) is not the remover (i.e. destroyer) of knowledge³

NOTES

If the Ātman (*tat*) is the essence of all, how then is this every other thing (*itara*) set aside as false by knowledge (about the Ātman) arising from the Śruti? Why is the essence (*tat*) itself not set aside by the well-known time etc., since there is no difference between *tat* and *itara*? To such a doubt a reply is given in 257 (after the doubt above.) The discussion from the previous verse is on *bādhaka-bādhya* relation between knowledge, and time etc. Knowledge, which is invariable, is *bādhaka* owing to *antarmeyabala*. On the other hand, time etc., which is variable, cannot be *bādhaka*. It is *bādhya*, although it is knowledge, since it has arisen from ignorance about the Ātman, the unique real.

1. According to some thinkers, time etc. is 'eternal'. These are notions different from the Ātman—they are false since they originate from ignorance about the Ātman. As to time etc., cf. GK 1.6-9 where nine thinkers regarding the origin of creation are enumerated; they regard the origin as *praṇava*, *puruṣa*, *vibhūti*, *svapnamāyā*, *icchā*, *kāla*, *bhoga*, *kriḍa* and *svabhāva*.

2. I.e. *antarmeyabala* mentioned in verse 256; thus it refers to the absence of the Ātman in these others postulated by other thinkers apart from it.

3. This is the same as the Ātman.

न बाह्यजव्यपेक्षं हि ज्ञानं बाधकमिष्यते ।

तयोमिथो विरोधित्वात्सम्यग्ज्ञानं तमोपनुत् ॥२५८॥

258. They do not consider that cognition as the remover of ignorance which is itself dependent on (some other cognition) produced from an object (whose reality is) disproved. Right knowledge is (accepted as) remover of darkness (i.e. ignorance), as the two¹ are mutually opposed.

NOTES

When knowledge (common knowledge) and time etc. are similar in that both have arisen from ignorance, this difference, viz. one is *bādhaka* and the other *bādhya*, is not proper. However, right knowledge is *bādhaka* because it has not arisen from

ignorance and also because it is *antarmeyabala*. For instance, knowledge about silver as silver is *antarmeyabala*, therefore this is right knowledge. But knowledge about conch-shell as silver is not *antarmeyabala* but produced from ignorance, therefore this knowledge is removed (*bādhya*) by right knowledge, viz. *bādhaka*.

1. (a) Right knowledge, viz. that the Ātman is one and only real, and (b) knowledge produced from (i.e. based on) ignorance about the real nature of the Ātman.

[A doubt has arisen accidentally regarding the Ātman as the essence of all.]

आत्मानं यो यथा वेत्ति सम्यग्वा यदि वाऽन्यथा ।

यथादर्शनमेवासौ फलमाप्नोति मानवः ॥२५६॥

इति ब्रह्म तमित्यादेः संक्षेपार्थः समीरितः ।

संसरत्यन्यथाज्ञानात्सम्यग्ज्ञानाद्विमुच्यते ॥२६०॥

259-260. The man who knows the Ātman in a manner which is either right or wrong (lit. otherwise), obtains a fruit according to his perception (of the Ātman). Thus is declared in brief the meaning of the passage *brahma tam*. . . Due to false knowledge, men undergo the transmigratory existence; but due to the right knowledge is one freed.

NOTES

Here concludes Sureśvara's commentary on *brahma tam parādād yo...*

[In the following two verses, Sureśvara comments on the Śruti passage *idam brahmedaṁ kṣetram ime lokā... idam sarvaṁ yad ayam ātmā*.]

अपोदितत्वाद्ब्रह्मादिदर्शनस्येति किं पुनः ।

द्रष्टव्यमित्यतो वक्ति त्वदं ब्रह्मेति नः श्रुतिः ॥२६१॥

261. (One may ask:) "Now that the vision of the brahmin caste etc.¹ is (already) blamed², what again is recommended to be perceived?" Therefore (in order to answer the question) the Śruti text declares to us, '(All) this is the Brahman.'

NOTES

Beginning with a question in the first line, the verse affirms the purport of the Vedānta.

There are three *itis* in this verse (which are marked by (a), (b) and (c) in my translation.) The first *iti* indicates that 'if the vision . . . is thus blamed.' The second *iti* indicates that 'this is the purpose'. And the third *iti* indicates a quotation in my translation.

1. The word 'etc.' indicates *kṣātra*, *lokas*, *devas*, *bhūtas* which are described in BU 2.4.6.

2. Cf. verses 250-254 above.

प्रत्यक्त्वेन य आभाति प्रत्यग्बुद्धिप्रमाणकः ।

तावन्मात्रैकयाथात्म्यं ब्रह्मेत्युक्तं प्रतीयताम् ॥२६२॥

262. "The Brahman is the true nature of only that one who appears (in a body) as the individual consciousness and is the perceiver of the individual's awareness¹ 'I am this'."

NOTES

This is reiteration of the affirmation in the Śruti sentence, in a clearer form.

1. The word *buddhi* is translated here as awareness so as to indicate that there may not be reference to any object outside.

एवं श्रोतव्य आत्माऽयं समाप्तः श्रवणे विधिः ।

अथ मन्तव्य इत्यस्य प्रपञ्चः पर उच्यते ॥२६३॥

263. In this way is this Ātman to be heard. Thus is complete (our discussion of) the injunction in respect of hearing (about the Ātman.) Now hereafter is stated an elaborate explanation¹ of the injunction, viz. '(The Ātman) is to be meditated on'.

NOTES

Verses 263-266 are the introductory part of the discussion on BU 2.4.7. In earlier portion, there was merely a statement or report about the purport of the Śruti passage. Hereafter,

there is reasoning about the same in a manner following the Śruti (*śrutyanusāri tarka*).

1. By elaborate explanation Sureśvara means a detailed examination of the illustration in the passages to follow.

नामरूपादिसम्भिन्नं जगदेतत्कथं पुनः ।

आत्मैव सर्वमित्येवं द्रष्टुं शक्यमिहाञ्जसा ॥२६४॥

264. (Objection :) How could it be logical¹ thus² to look upon (i.e. accept) this entire world, marked by (i.e. made up of) name, form etc., as the Ātman ?

NOTES

The objector means : “The Śruti ‘All this is the Ātman’ is contradictory to the direct perception etc.”

1. Cf. verse 266 below for the word *añjasā* ‘logically’ or ‘clearly’.

2. In the manner shown in the preceding portion which has brought out the purport of the Śruti; cf. *iheti nāmayavahārabhūmir uktā*. (SP)

अव्यावृत्तिसंवादिप्रत्यग्धीव्याप्तिकारणात् ।

एतद्विरुद्धबुद्धीनामेवमेव हि शक्यते ॥२६५॥

265. (Reply :) (This is so possible) because the individual intelligence, (in reality, the individual consciousness itself) which is not variable and not contradictory pervades (all that is namable etc.) Only this¹ (awareness) is possible in the case of those whose intellect is opposed to (the cognition of) this (world mentioned in the previous verse).

NOTES

The first line is a reply to the objection raised in the previous verse. The second line justifies how the first line is a suitable reply. SP holds that this is the reply to the possible objection that the cognition, namely “all this world is only sentiency” does not arise in the case of persons like us. Thus, the verse brings out the contrast between those who are ignorant of reality and those who are the perceivers of it.

1. SP regards that the word *etat* refers to *nāmarūpasambhinna jagaddvaita* and constitutes compound with *viruddha*, meaning 'opposed to this world which is divided into name, form etc.' But it appears that *etat* indicates that which has preceded, viz. *avyāvṛttavisamvādi pratyak*, and so here it refers to *vyāvṛttavisamvādi pratyagdhiḥ*.

व्यभिचारिषु बोधेषु बोधोऽव्यभिचारवान् ।

तत्प्रमाणापितो मेयो ग्रहीतुं शक्यतेऽञ्जसा ॥२६६॥

266. It is possible to understand (lit. grasp) the object of knowing clearly (i.e. logically) when it is grasped on the authority of that cognition which (though) among many that are variable, does not vary.

NOTES

The verse aims to point out that it is possible for persons like us also to understand the uniqueness of the Ātman and sentiency of the world, not only for the wise.

[There is now a discussion on generality and particularity and it will continue up to verse 274.]

यथा दुन्दुभिशब्दत्वसामान्यादुत्थितान्पृथक् ।

नाऽऽवातुं शक्नुयात्कश्चिद्विशेषानसिकोशवत् ॥२६७॥

तद्वद्वात्मातिरेकेण नाऽऽत्मीयार्थो मनागपि ।

यतः समीक्षितुं शक्यस्तेनासौ रज्जुसर्पवत् ॥२६८॥

267-268. Just as nobody would be able to grasp (lit. take up) particular notes which have arisen (from a drum) separately (only) from sound in general, like a sword (which is covered) in a sheath; in the same way, (it is not possible)¹ for the Ātman to grasp even a single object (*manāk*)² apart from the Ātman itself; since (this is so) it is possible to see it (viz. the Ātman) just as (one sees), the rope-serpent.³

NOTES

The words 'when a drum is being beaten' indicate the nature of sound (*śabdatva*) and particular external sounds

which have arisen from the drum are different from it (viz. sound).

1. This is the repetition of *nādātum śakyah*
2. The word *manāk* literally means 'even a little'.
3. The well-known example of *anirvacaniyakhyāti*; cf. verses 236 and 245 above.

विशेषैरन्वयो नापि सामान्यान्वयवत्कचिद् ।

सामान्यस्याविशेषत्वान्नातः सामान्यधीग्रहः ॥२६६॥

विशेषैरन्वयो नो चेदिभाष्यव्यक्तिवन्मिथः ।

खण्डवत्स्याद्विशेषादौ यत्सामान्यमितीरितम् ॥२७०॥

269-270. Nor also (is it possible for the Ātman) to be associated with a number of particularities, like generality, for generality has no particularities. Therefore, there is no understanding (the Ātman) as generality. If there is distinction between generality and particularity as between an elephant and a rat, then what is called generality will be like parts of different particularities.

NOTES

One could argue : 'The generality-particularity relation is found in the illustration, so the same relation should be found in the illustrated; because the illustration is based on equality of both.' In order to refute this, one may assume that (i) generality is identical with particularity, or (ii) generality is different from particularity. But here, (i) is not possible. Like the identity of particularities with generality, identity of particularity with generality cannot be found anywhere in respect of the Ātman, as the Ātman who is the basis of all imaginations is not associated with all particularities which are imagined.

द्विष्टत्वादन्वयस्यापि व्याप्यव्यापकयोर्मिथः ।

व्यतिरेकमतो मुक्त्वा मिथो व्याप्तिर्न सिध्यति ॥२७१॥

271. Since (what we call) association is related to (two) different particulars, the relationship of concomitance between

two particulars cannot be obtained if we leave out the notion of mutual difference (between the pervaded and the pervasive).

NOTES

After refuting in verses 269-270, the assumption that generality and particularity are identical or different, Sureśvara anticipates another possible argument which pertains to *vyāpti* 'concomitance' between the two and proceeds to refute the same. The particular is *vyāpya* (*vyāpta*) 'less pervasive'. But unless there is difference between them, there can be no *vyāpti*. The relation in the form of *vyāpti* has the nature of staying on the two, and it expects the difference. Therefore, there is no *vyāpti* in the absence of any difference between the two, which has been already shown. Nor is there any other relation between the two, the generality-particularity relation is purely imaginary.

प्रत्यग्बोधानिरस्तोऽर्थः प्रत्यग्वन्न हि सिध्यति ।

न चाभावमुखोऽनात्मा नान्वयेनाप्यतो दृशि ॥२७२॥

272. A thing which is not denied by the knowledge of the individual consciousness cannot indeed (be proved to) exist like the individual consciousness. Therefore, there does not exist the non-Ātman whether of the nature of non-existence or as related to the Ātman by *anvaya*.

प्रत्यङ्मात्रैकरूपत्वादात्मा नानात्मतां स्वतः ।

सहते नापि चानात्मा स्वार्थादन्यत्र सिध्यति ॥२७३॥

273. Since the Ātman is merely of the nature of individual consciousness, it does not allow any notion of the non-Ātman of itself. And the non-Ātman also does not get established except in itself.

NOTES

One may raise a doubt that even if the method of *anvayavyatireka* cannot properly be conceived in respect of the Ātman and the non-Ātman, *anvayavyatireka* of the Ātman

with the non-Ātman is possible because of the vicinity of the latter. Sureśvara answers this possible objection in this verse.

अनात्मवस्तुनः प्रत्यक्प्रत्यक्त्वान्नातिरिच्यते ।

पराङ् नान्वेति चाऽऽत्मानं व्यतिरेकात्मकत्वतः ॥२७४॥

274. The individual consciousness cannot exist outside the non-Ātman, because it is always its (i.e. of then non-Ātman) individuality. The non-Ātman (also) cannot co-exist with the Ātman owing to its nature consisting in its difference from the Ātman.

NOTES

This verse shows how the Ātman and the non-Ātman appear to be different and yet co-exist. In reality, one cannot make the Ātman from the non-Ātman. And yet the non-Ātman cannot be shown to be related to the Ātman by the method of *anvayavyatireka*.

दुन्दुभ्यन्वितशब्दस्य सर्वत्राव्यभिचारतः ।

पुंस्प्रयत्नादिलब्धात्मव्यभिचारिरिवात्मसु ॥२७५॥

275. Owing to the invariable occurrence of the sound connected with a drum, (one grasps the common character¹ of the sound) in the notes of varying nature that have come into being thanks to the effort of some man etc.

NOTES

Sureśvara introduces the reason for grasping the common nature of the sound (*śabdatva*); cf. verse 267 above.

1. Cf. *prakṛte vākye sāmānyopādānam iti śeṣaḥ* (SP)

उच्चनीचादिभेदेषु मिथः स व्यभिचारिषु ।

दुन्दुभिध्वनिरेवैकः सर्वत्राव्यभिचारवान् ॥२७६॥

276. The sound of a drum alone is unvarying among all the mutually varying differences such as high, low etc.

NOTES

Sureśvara aims to stress that generality resides among variable different particulars.

दुन्दुभिध्वनिसामान्यव्यतिरेकेण तेन ते ।

निरात्मका न शक्यन्ते तद्विशेषाः समीक्षितुम् ॥२७७॥

277. Therefore, particularities of the notes of a drum are not possible to think of (lit. see) as having their own character (which is) different from the common character, viz. (they are) the sound produced from the drum.

NOTES

Here concludes the comment on *sa yathā dundubher hanyamānasya na bāhyāñ śabdāñ śaknuyād grahaṇāya*.

दुन्दुभिध्वनिरित्येतत्कुतो लब्धं विशेषणम् ।

दुन्दुभेर्ग्रहणेनेति लब्धमेतद्विशेषणम् ॥२७८॥

278. (Objection:) Whence is the distinguishing attribute¹, viz. the sound of a drum, obtained? (Reply:) This distinguishing attribute is obtained from the use of (the word) 'of the drum.'

NOTES

An objector might say : 'In the words, 'when a drum is being beaten . . .', there is mention only of a drum, the distinguishing attribute of the drum, viz. the sound, is not mentioned. What leads you to use it then?' To this Sureśvara replies : It is possible to understand the distinguishing attribute from the remainder of the sentence (*vākyaśeṣa*). Indeed there is no understanding of any particular sound possible when only the stick is mentioned, i.e. the *dundubhi* is uttered; and a sound in general is indicated (*lakṣita*) by the word *dundubhi*, and the distinguishing attribute, i.e. the sound (in general) is to be obtained from the (other) word *hanyamānasya* 'being beaten.'

1. On language level, the word *viśeṣaṇa* means 'adjective' but here it means 'distinguishing attribute'.

दुन्दुभेस्तु रवा एत इत्येवं ग्रहणे सति ।

गृहीतास्तद्विशेषाः स्युस्तेषां तादात्म्यकारणात् ॥२७६॥

279. When there is the grasping (of the sense) that 'these are the notes of the drum', then their particularities are also understood on account of the fact (lit. reason) that they are of the same nature.

भेर्याघातग्रहाद्वाऽपि तद्विशेषग्रहो भवेत् ।

वीरादिरससंयुक्तो दुन्दुभ्याघात उच्यते ॥२८०॥

280. Or,¹ by grasping (or, stopping) the beating of a drum, one can grasp (or, stop) the particularities. The² beating of a drum is always said to be associated with *rasas*³ beginning with *vira*, (viz. the heroic).

NOTES

This is the comment on the sentence, *dundubhyāghātasya vā śabdo grhitah*.

1. Or, by grasping intermediate generality in the form of the common nature of the sound, there is grasping of its particularities. This is an alternative to what is stated in the preceding verse.

2. This is the explanation of 'the beating of a drum'. This sound of a war-drum etc. which is a symbol of one of nine *rasas* 'emotional contents' and is heard in the battle etc. is known as the beating of a drum. When the sound is heard, its particularity, viz. the *rasa*, is also understood because both are of the same nature.

3. The nine *rasas* are *śṛṅgāra*, *hāsyā*, *karuṇā*, *raudra*, *vira*, *bhayānaka*, *bibhatsā*, *adbhuta* and *śānta*; cf. the *Nāṭyaśāstra* 6.15: *śṛṅgārahāsyakaruṇaraudravirabhayānakāḥ | bibhatsādbhutasamjñau cety aṣṭau nāṭye rasāḥ smṛtāḥ ||*

And later the ninth *rasa*, i.e. *śānta*, is added in the *Kāvyaśāstra* 4.4 : *bibhatsādbhutaśāntāś ca nava nāṭye rasāḥ smṛtāḥ ||*

उपलब्धोऽस्ति सन्कुम्भो लम्बोष्ठो देशकालवान् ।

पूर्वपूर्वातिरेकेण नोत्तरोऽर्थोऽनुभूयते ॥२८१॥

एवं चिदन्वयात्सर्वस्तदध्यस्तः समीक्ष्यते ।

सामान्यं वा विशेषो वा चिदसम्बोधहेतुतः ॥२८२॥

281-282. The existing jug (pitcher) with its protruding brim (lit. lip) is always grasped as related to time and place, but a thing of each later (moment and place) is not experienced as apart from it of each previous moment. In the same way, all that on which is superimposed sentiency, whether common character or particular, may be seen on account of its co-existence with sentiency and (also) due to the non-knowing of sentiency.

NOTES

After introducing the illustration, viz. *dundubhes tu grahaṇena dundubhyāghātasya vā śabdo grhītaḥ* (verses 279 and 280), Sureśvara clarifies the illustrated (*dārṣṭāntika*) as he has already done so in verses 267 and 268 above.

The objection may be : 'If that which has to be enlivened (*cetya*) does not exist, apart from sentiency (*cit*), how can one think of *vyatireka* relation between them?' To such an objection does Sureśvara reply in verse 282: In reality there is no difference between *cetya* and *cit*; however, generality etc. are superimposed on *cit* owing to ignorance; and there appears *cetya*.

प्रत्यग्रूपस्य संसिद्धौ प्रतीचोऽन्यत्र कारणम् ।

अनात्मवत्तदप्यात्मविशेषणतया भवेत् ॥२८३॥

283. There¹ is no reason other than the individual consciousness for proving the existence of the individual consciousness and, like² all the non-Ātman, that³ (viz. the cause, the individual consciousness) also would be (established) as the distinguishing attribute of the Ātman.

NOTES

1. A doubt may arise : 'If the non-Ātman appears as the sentient Ātman, that Ātman also would appear as something else like a lamp. Then there would result infinite regress.' To this doubt is there an answer in the first line of this verse.

2. In proving the non-Ātman, there is a certain proof for its existence in the form of a knower.

3. A possible objection is : 'Since you accept something else (viz. a knower etc.) to prove the existence of the non-Ātman, it means that you give up the theory that the Ātman proves all, viz. a knower etc. exist apart from the Ātman.' The reply is that, what proves the non-Ātman, in the form of a knower, can be said to prove the Ātman only as subsidiary, for the Ātman alone has assumed the nature of it. Therefore, there is no abandoning of the theory.

कर्तृत्वकञ्चुको यद्वदात्माऽनात्मानमीक्षते ।

कूटस्थदृष्टिमात्रत्वान्न तथाऽऽत्मानमीक्षते ॥२८४॥

284. As the Ātman which has put on (viz. assumed) a robe¹ of the character of an agent sees any non-Ātman in the same way, it does not see itself, since the Ātman is of the nature of immutable seeing power alone.

NOTES

Sureśvara has the following passage in mind : *yatra hi dvaitam iva bhavati tad itara itaram jighrati . . .* (BU 2.4: 14)

1. On the word *kañcuka*, cf. TUBV 2.314; Nais 3.60; this is a technical term in the Kashmir Śaivism.

संहतो गम्यतेऽनात्मा प्रत्यक्षेण यथा सदा ।

गम्यतेऽसंहतस्तद्वदात्मा प्रत्यग्धियाऽऽत्मना ॥२८५॥

285. As one knows by direct perception that the non-Ātman is ever made up of parts¹, so does one know by the knowing principle within² that the Ātman is not made up of parts.

NOTES

An objection may arise: 'Since it is possible to assume that the Ātman is a knower etc., it may be said that the Ātman cannot be accepted as ever immutable seeing power.' To this is a reply given : As the non-Ātman, which is gross and accompanied by other objects, is known by direct perception, so

is the Ātman, which is subtle and free from action, known by sentiency itself but not by anything outside itself, for that thing does not exist.

1. The word *saṁhata* means 'that which is of the nature of a collection' and is a synonym of the word *saṁghāta*. On this see SK 17: *saṁghātaparārthatvāt triguṇādiviparyayād adhiṣṭhānāt / puruṣo'sti bhokṛbhāvāt kaivalyārtham pravṛtteś ca //* Here Sureśvara refers to the Sāṁkhya notions of *saṁghāta*, *sthūla* and *sūkṣma* which are the basis of the notion of *saṁghāta*. He rejects these notions perhaps on the support of GK 3.10: *saṁghātaḥ svapnavat sarva ātmamāyāvisarjitaḥ /*

2. *pratyagdhi* is the same as *pratyagātman*.

[Verses 286-289 correspond to BUB 2.4.9 : *anekaḍṛṣṭāntopādānam iha sāmānyabahutvakhyāpanārtham / aneke hi vilakṣaṇās cetanācetanarūpāḥ sāmānyaviśeṣāḥ / teṣāṁ pāramparyagatyā yathaikasmin mahāsāmānye' ntarbhāvaḥ prajñānāghane katham nāma pradarśayitavya iti / dundubhiśaṅkhaviṇāśabdasāmānyaviśeṣāṇāṁ yathāśabdatve 'ntarbhāvaḥ / evaṁ sthitikāle tāvat sāmānyaviśeṣavyatirekād brahmaikatvaṁ śakyam avagantum /* Śaṅkara restricts his statement to the reason why many illustrations are given. But Sureśvara goes further, viz. he mentions why it is necessary to state the reason.]

दाष्टान्तिकार्थसम्भित्तेरेकेनैव कृतार्थतः ।

दृष्टान्तेन बहूनां तु किमर्थोक्तिरित्युच्यते ॥२८६॥

286. One might object : 'Since there is no variety in the illustrated, one illustration is sufficient to prove the point; why is it then that the point is stated by means of many illustrations?' —therefore, it is (now) said (in reply) :

NOTES

An objection is raised : 'Though there are many illustrations mentioned such as *dundubhi*, *śaṅkha* and *viṇā* (BU 2.4.7, 8 and 9), the illustrated is one, viz. the Ātman alone exists everywhere. Therefore, merely by one illustration can be proved the illustrated; it is useless to state many illustrations !'

महासामान्य एकस्मिन्विशेषाणामशेषतः ।

विलयः स्यात्कथं नाम व्यावृत्तान्वयरूपिणाम् ॥२८७॥

287. How can there be a merger in one great generality of all the distinguishing attributes which are of the forms mutually distinguished and related ?

NOTES

The reply to the question in verse 286 continues up to verse 289. The seer of the Upaniṣads has employed three different illustrations in order to state the merger, in order, of many distinguishing attributes, generality and both of them into the unique Brahman, which occupies the place of the great generality.

महासामान्यदृष्टान्तो दौन्दुभो रव उच्यते ।

सामान्येतररूपस्य दुन्दुभ्याघात इष्यते ॥२८८॥

288. The sound of a drum is called the illustration for the great generality (and) the beating of a drum is called (lit. desired to be, the illustration) of the form other than generality.

NOTES

Now Sureśvara further clarifies the significance of the three illustrations. By the mention of the drum, the seer points to generality which consists in 'sound' and persists in every particular note that arises from the beating of a drum. It can therefore be the illustration for 'great generality', viz. the Brahman which persists in every particular thing of which it is also the origin. And when the seer refers to the beating of a drum, i.e. to some particular note produced from it, he has in mind some particular note that corresponds to any particular (so-called) product of the Brahman. The *kārya-kāraṇa* relation, 'the relation between the origin and its product(s)' is in both the illustration and the illustrated only the product of imagination, i.e. unreal.

बाह्यानिति तथाचोक्तिविशेषाणां तु केवलम् ।

इत्युक्तार्थप्रसिद्ध्यर्थमित्युदाहरणत्रयम् ॥२८९॥

289. And the expression, '(to) the external (notes) (in the objective case)' refers only to the particular notes. The three

illustrations (are related), therefore, only for establishing the matter (already) stated.

NOTES

In keeping with three illustrations there are three, i.e. particular (*viśeṣa*), species (*sāmānya*, *sāmānyetara*, *avāntarasāmānya*) and genus (*mahāsāmānya*). Particular is some particular note of a drum, species is the sound of a drum (*duṇḍubhiśabdatva*) and genus is sound (*śabdatva*). Hence, as all particular notes of a drum are first understood as 'the sound of a drum' and then (later) as 'sound', so all things are related first to individual consciousness and then to the Brahman.

अन्वयव्यतिरेकाभ्यामभाववपुषाऽथवा ।

सद्ब्रह्म्याद्विरुद्धस्तु न मानेनावसीयते ॥२६०॥

290. Neither by the method of *anvayavyatireka*, nor by (a means in) the form of non-existence is the existent within ascertained. Indeed, (it is understood) only by experience that it exists.

षष्ठ्यर्थसम्भ्रमोऽतः स्याद्द्वितीयासम्भवात्सतः ।

यथा सति तथा विद्यात्प्रतीक्ष्यनन्यमानके ॥२६१॥

291. In the case of the individual consciousness, for (understanding) which there is no means other (than itself), one should get to know in the same way as in the case of an existent thing. (One understands that) there is the impossibility of the meaning conveyed by the genitive¹ owing to the absence of the second existential entity.

NOTES

This is an answer to the following argument which is possible. If particularity and generality are identical, what follows? When there do not exist many individuals, particularity and generality cannot be related. So, the nature of generality and particularity cannot be proved in the case of the Brahman.

1. It is impossible to think of any relation between the Brahman and any other thing, since in grammar the genitive case becomes helpful to express two things existent. In the case of the Brahman the use of genitive case or suffix is very naturally precluded.

सामान्यभेदरूपाणां विशेषाणामशेषतः ।

महासामान्य एकत्र भूयसां स्याद्यथा तथा ॥२६२॥

मिथोभिन्नपदार्थानां नामरूपक्रियात्मभिः ।

स्थूलाद्यनभिसम्बन्धे कार्यकारणरूपिणाम् ॥२६३॥

292-293. As each and every of many particularities which are of the nature of the various generality finally exists together in one great generality, so the different things which are distinct in the nature of name, form and function (and) which are also of the nature of the cause and the effect, (exist finally in the Brahman) which has no connection with the gross etc.

NOTES

The discussion on the illustration is concluded.

सूक्ष्मताभ्यापिते ज्ञेये भूम्यादेरुत्तरोत्तरम् ।

प्रत्यगात्मावसानेषु पूर्वपूर्वप्रहाणतः ॥२६४॥

नामादीनि च तत्त्वानि प्राणान्तानि तथाऽऽत्मनि ।

पूर्वपूर्वप्रहाणेन यान्त्यस्तं केवलावृये ॥२६५॥

294-295. Of (the elements,) earth etc., each preceding one gives up its own nature and is merged into each succeeding one and finally ends in the individual consciousness (which is) the object of knowing and (which is) marked by subtlety. The Truths beginning with name and ending with *prāṇa* get merged into the absolute non-duality, each preceding one giving up (its own nature and merging into the more and more subtle).

NOTES

Sureśvara takes the support of Śaṅkara's view, viz. all modifications merge into the individual consciousness in order

among *prthivi*, *ap*, *tejas*, *vāyu*, *ākāśa*, *ātman*—each succeeding one is more subtle than its preceding one. Sureśvara takes the support of CU. 7.25.1ff., cf. verse 98 above.

दृष्टान्तत्रितयं तावत्स्थितिकाल उदाहृतम् ।

महासामान्यवत्प्रत्यक्सर्वानात्माप्ययः स्वतः ॥२६६॥

[Now follows an explanation of the illustrations in BU 2.4. 10 : *sa yathārdraidhāgner abhyāhitāt prthag dhūmā viniścaranti*, it continues up to verse 303.]

296. As for the three aspects of illustration¹, they are mentioned with reference to the time of sustenance (of other existent objects), since the individual consciousness is itself, like the great generality, the (place of) merger of all the non-Ātman.²

NOTES

1. *dr̥ṣṭāntatritaya* should not be three illustrations but possibly the three aspects of the illustration (viz. *mahāsāmānya*, *sāmānya* (*itara=avāntara*) and *viśeṣa*). On this see note on verse 289.

2. This is a statement of the purport of the three aspects of the illustrations : As the existential particularities, viz. the non-Ātman, culminate into but one existence, the individual consciousness, nothing else remains after the merger into it.

स्थितिकाले यथैकात्म्यं शक्यते ज्ञातुमञ्जसा ।

यथोक्तन्यायतस्तद्वबुत्पन्नावपि शक्यते ॥२६७॥

297. As it is possible to know the real nature of the Ātman (only) clearly at the time of sustenance (of other existent objects), so is it possible to know it at the time of its origin, with the help of the manner (already) stated.

NOTES

Now, Sureśvara states in brief the purport of BU 2.4.10.

धूमार्चिर्विस्फुलिङ्गादि यथापूर्वं विभागतः ।

अग्निरेव न धूमादिभेदः कश्चन लक्ष्यते ॥२६८॥

प्राणलोकाविरप्येवमनात्मा प्राग्विभागतः ।

अपूर्वनिपरानन्तप्रत्यगात्मैव केवलः ॥२९६॥

298-299. Smoke,¹ flame, sparks etc. are, before separation², nothing but fire (and) no distinction like smoke etc. can be observed, in the same way,³ the non-Ātman, like *prāṇa*, world etc. is (before separation) nothing but the individual consciousness which is only one and does not have any preceding, any succeeding and an end.

NOTES

1. This is the literal meaning of the illustration stated in BU 2.4.10.

2. This refers to the origin (*janma*).

3. The illustrated is stated.

एकजातौ हि भिन्नानां शब्दानां शब्द एव तु ।

दृष्टमैक्यं न भिन्नानां भिन्नजातौ तथेति चेत् ॥३००॥

धूमादिभेदभिन्नानां यथैकत्वं विभावसौ ।

नामरूपादिभिन्नानामैकात्म्यं तद्वदात्मनि ॥३०१॥

300-301. If one were to object, 'one notices (i.e. grasps) the identity of different words with word when all of them belong to the same category; whereas, if they belong to the different categories, the case is not the same'; (we reply), 'as particulars like smoke etc. which are distinct from one another on account of distinction (among them) have (but) oneness in (i.e. with) fire, so is there identity of different things like name, form etc. with the Ātman.'

NOTES

In order to prove the other purport of BU 2.4.10 than that stated in verse 297 the objection is raised : "The identity of its distinguishing attributes with the sound can be seen not like the case of things belonging to different categories such as a pot etc. in the fragrant herb etc. Therefore the identity of the world made up of different things such as name etc.

with the Ātman, for they belong to different categories.' The reply refers to both the illustration and the illustrated.

बोधाविशेषादथवा भेद एव न विद्यते ।

कार्यकारणयोस्तत्त्वमुभयोरविलक्षणम् ॥३०२॥

302. Or, perhaps, on account of the non-distinction in realization, the difference (between objects) does not exist. The nature of the two, i.e. the cause and the effect, is not varied in characteristics¹.

NOTES

The mention of 'different things' in the preceding verse implies acceptance of various reality. This is explained away here in the verse. Sureśvara asserts that the different things are nothing but sentiency and, as such, there is no mutual exclusion among them. Indeed, we mention them as causes and their effects; however, they are but one, viz. the individual consciousness.

1. Meaning 'does not have different characteristics'.

स्वार्थसाधनयत्नादीननपेक्ष्योत्सृजेद्यथा ।

धूमादीन्हुतभुक्तद्वत्प्राणादीन्प्रत्यगीश्वरः ॥३०३॥

303. As the fire would give out smoke etc. without any regard for the effort for the means of its own existence, so does the lord¹, the individual consciousness, would give rise to *prāṇa* etc.

NOTES

This verse is in answer to a possible objection which can be stated thus : 'If the individual consciousness is assumed to be a cause, there must be an effect, because one, who acts after having thought about the action, does not undertake any activity that does not bear any effect. Also one cannot do without any means, or the procedure, for attaining the effect. It should therefore follow that the individual consciousness abandons its nature of being one whose desire is fulfilled (*āptakāma*). Indeed, thinking about some effect to follow and

āptakāmatva are mutually contradictory.' Cf. GK 1.9 : *devasyaiṣa svabhāvo 'yam āptakāmasya kā sprhā*.

1. *pratyagiśvara* = *pratyagātman*, since the individual consciousness completely controls the creation around itself.

श्रोतव्यः श्रुतिवाक्येभ्य इत्यत्राऽऽशङ्क्यते यतः ।

प्रयत्नानन्तरः शब्दोऽनित्यः कुम्भादिवद्भवेत् ॥३०४॥

इत्यस्य परिहारार्थं निःश्वासोदाहृतिस्त्वयम् ।

अप्रयत्नोत्थितो वेदो नित्यः स्याद्व्योमवत्स्वतः ॥३०५॥

304-305. Since a doubt may be entertained as regards the Śruti sentences, '(The Ātman) is to be known (lit. heard) from the Śruti passages,' viz. that a word follows the effort (of a speaker) and therefore it would be non-eternal, like any pitcher etc.¹; therefore, in order to answer it away, there is this statement in the Śruti of the *niḥśvāsa* ('breath' of the great being)². Indeed, the Veda has arisen without any effort (of anyone) and is therefore by its own nature (*svataḥ*) eternal, like the sky.

NOTES

The argument proceeds from the notion that the Veda was made by the lord and must, therefore, be non-eternal like the statement of persons (like the Buddha—SP) as it would be dependent on some one's efforts.

1. The axiom is : Whatever is produced is perishable (non-eternal).

2. The refutation is clarified further : The Veda is not non-eternal because the Veda is manifested from the highest without any effort, just as the sky which only seems to be produced as the sky in a pot. In reality, it has ever been existent; there is nothing produced. The Veda is, by nature, eternal.

[The discussion on *niḥśvasita* continues up to verse 312.]

अबुद्धिपूर्वकत्वाच्च यथावत्स्वनुरोध्यापि ।

बुद्धिवन्नाप्रमाणत्वं वेदस्येहोपपद्यते ॥३०६॥

306. Since the Veda is not preceded by any deliberate thinking it cannot be considered as unauthoritative, like human intellect in our world (*iha*), even though it follows (the nature of) the thing as it is¹.

NOTES

This is an answer to the objection regarding *kṛtakatva* of the Veda that leads to its *anityatva*. The adjective of the Veda *yathāvastvanurodhi* would invite further difficulty. It is held that any worldly knowledge is true if and only if it conforms to its object as it is : The truth of this knowledge depends upon the proper grasping (*niścaya*) of the nature of the objects by the intellect (*buddhi*). As such, the information about the Brahman which the Veda gives, must be grasped only by intellect—this constitutes some efforts of someone before the Veda was created. That is to say : We must accept the Veda as non-eternal. Sureśvara firmly asserts that this objection cannot arise, simply because the Veda is the breathing out of the great being—it is not preceded by any thought. Nor is it like any human being's speech. As such, the Veda must be accepted as eternal.

1. I.e. the existent Brahman.

सर्वथा यदनेनोक्तं तच्छ्रद्धेयं बुभूषता ।

भानुप्रकाशवच्छब्दो नित्योऽयं न तु कृत्रिमः ॥३०७॥

307. Certainly whatever is stated by the Veda must be believed by one who wants to know¹; like the light of the sun,² this word (viz. Veda) is eternal and not at all a product.

NOTES

1. SP clarifies *bubhūṣatā* as *bhavitum icchatā*, i.e. by one who seeks for liberation.

2. The second line answers an implied doubt, viz. 'that even though the Veda proceeds like breath, it is still not eternal because it is artificial (*kṛtaka*).' The Veda is just the very nature of the lord, like the rays of the sun. (SP mentions that the Veda is the *vivarta* of the lord.)

पर एवाऽऽत्मनाऽऽत्मानं प्रतिपाद्य नरं श्रुतिः ।
कार्यकारणवत्पीत्वा स्वात्मनेवावतिष्ठते ॥३०८॥

308. (Since) it has been established that the consciousness¹ in a human being is the Ātman², the Śruti is the highest (Ātman itself). (Then having) negated (lit. swallowed/drunken off) this (mundane existence) made up of *kāraṇa* 'cause(s)' and *kārya* 'effect(s)' it stands (firmly established as eternal) on its own (support).

NOTES

One could say : 'If the eternity of the Veda is derived from the manifestation as shown in the previous verse, other things are also eternal because they are the manifestations of the lord, too. A distinct note of the Veda is useless.' Therefore, it is stated as to why the Veda alone can be said to be eternal. Purifying the objective things misconceived by a man by stating that they are identical with the non-dual Brahman and thereby sublating the world by means of knowledge, the Śruti remains as the Brahman. The excellence of the Śruti lies in that it removes the ignorance.

1. Just 'consciousness' (sentiency in a human being).
2. The consciousness (= *paramātmān*).

वेदामात्वप्रसक्तौ वा सर्वमात्मेतिवाक्यतः ।
वेदामात्वापनुत्त्यर्थं स यथेत्यागमः परः ॥३०९॥

309. Indeed if one were forced to consider the Veda as non-authoritative means to knowledge, then after making the statement, 'All (this) is the Ātman' with a view to removing the idea of the Veda as non-authoritative means to knowledge, the latter (part of the) Śruti¹ proceeds in words *sa yathā*.

NOTES

Three different explanations of the purport about the sentence *sa yathārdraidhāgner* have been given in verses 297-308. Now, yet another purport thereof follows.

One might argue that from the sentence, 'All this is the Ātman', it may be concluded that the Veda is not authorita-

tive. Without accepting falsity of all this world, one does not understand it as the Ātman. And when all is false, the Veda also, being included in all, is false and therefore not a means of knowing, like the appearance of smoke certainly leading to knowing of fire. In order to refute this argument, Sureśvara points to the Śruti, *sa yathā* . . .

1. On the word *āgama*, cf. note on the verses 6-7.

तदयुक्तं पुमर्थस्य तदुक्त्येव समाप्ततः ।

सर्वोपायोऽनुपायः स्यादुपेयावसितौ यतः ॥३१०॥

स्वोपेयार्थप्रसिद्धौ च नोपायानामुपायता ।

न चोत्सर्गापवादोऽपि साक्षाद्वेदग्रहभवात् ॥३११॥

310-311. It is not proper (to say that the Veda is not the authoritative means to knowledge), because it has been declared by the Veda itself that the end of human life is obtained (only) by the (knowledge of the) Vedic statement. When the purpose of a means (viz. Veda) is served, it does not (any more) remain a means. And the means do not have the nature of the means when the thing to be obtained by them is well-known. And there is not an exception to the general rule, (in the case of the Veda also), on account of the direct hearing (i.e. understanding) of the Veda.

NOTES

A means (*upāya*) is possible when one still has something to accomplish (*upeya*). Then once *upeya* is accomplished, a means (*upāya*) cannot remain a means any more. On verbal level, Veda is a means (*upāya*) and liberation is *upeya*. Once one is aware of the oneness of the Brahman and the Ātman, Veda cannot remain a means any more. One might object : 'If all is the Ātman, Veda which is included in all is also the Ātman. How can the Veda be a means ?' A reply is : All is the Ātman is the thought which occurs later. As long as one does not become aware of the oneness, all is not the Ātman and Veda is a means.

बालोन्मत्तोक्तिवच्चाहं वक्तुं दूषणमादरात् ।

जिह्मेमि बहुशोऽत्रोक्तौ तस्मादेवोपरम्यते ॥३१२॥

312. On account of my great regard (for the Vedānta) I feel reluctant in stating the faults (that are) in many ways (or, at many times) attached to the word of the Veda (by others), in the manner of the speech of a child (ignorant one) or of a mad man. Therefore, I stop talking further.

NOTES

On account of my having made statement several times in this regard I stop talking.

[Sūreśvara now proceeds to comment on BU 2.4.10 : *yad ṛgvedo yajurvedaḥ sāmavedo 'tharvāṅgīrasa itihāsaḥ purāṇam vidyā upaniṣadaḥ ślokaḥ sūtrāṇy anuvyākhyānāni vyākhyānāny asyaivaitāni niḥśvasitāni*. The comment runs up to verse 326.]

ऋग्वेदादिगिरोच्यन्ते ऋग्यजुःसामलक्षणाः ।

अथर्वाङ्गिरसस्तद्वन्मन्त्राः स्युर्ब्राह्मणोद्धृताः ॥३१३॥

313. By the words *ṛgveda* etc. should be understood *mantras* which are characterized (by names) R̥g, Yajur, Sāma and Atharvāṅgīras¹ as well (and) which are quoted in the Brāhmaṇa texts.

NOTES

1. *atharvāṅgīras* denotes 'the two elements which make up the Atharvaveda'; see A. A. MACDONELL and A. B. KEITH, *Vedic Index*, Delhi : Motilal Banarsidass, 1958, vol. 1, p. 18, also BLOOMFIELD, *Hymns of the Atharvaveda*, pp. xviii ff.

इतिहासादिसम्भेदभिन्नं ब्राह्मणमेव तु ।

ग्राह्यमत्र प्रसिद्धस्तु नेतिहासादिरिष्यते ॥३१४॥

314. But, in this respect¹, by the words (i.e. prose compositions) marked as variety of Itihāsa (narratives) etc.² only Brāhmaṇa is to be understood. Indeed, it is not intended to refer to the well-known *itihāsas*³.

NOTES

1. The word *atra* refers to the sentence under discussion, viz. BU 2.4.10

2. Itihāsa etc. refers to narratives in the Brāhmaṇa texts such as *ākhyāna*, *nārāśaṃsi* etc. that are related to the *mantras* of Ṛg etc. Refer to the eight-fold Brāhmaṇa as understood in BUB (pp. 330-331), i.e. *itihāsa*, *purāṇa*, *vidyā*, *upaniṣad*, *śloka*, *sūtra*, *anuvyākhyāna* and *vyākhyāna*.

3. MBh, which is called *itihāsottama*, and the *Rāmāyaṇa* are meant here.

अभिधेयार्थजन्मापि ह्यभिधासम्भवोक्तिः ।

द्रष्टव्यं नाभिधानं स्यादभिधेयमृते क्वचित् ॥३१५॥

315. One should understand (lit. see) that the thing to be signified originates indeed from a statement which originates from (the function called) expression. Never could there be any expression without (there being) what is to be expressed.

NOTES

The idea is perhaps to explain *yasya niḥśvasitam*. ...That is to say : If there did not exist the Great Being, there could be no (power of) expression, no expression and there could not be any such things as Ṛg etc. The Brahman is *sarvaśaktimat* and *cit*, so it is capable of utterance. Therefore, there is the rise of words and the signification, i.e. the signified.

मन्त्रब्राह्मणयोर्वेदनामधेयत्वकारणात् ।

ऋग्वेदादिगिरा तस्मान्मन्त्रब्राह्मणयोर्ग्रहः ॥३१६॥

यथासिद्धमितिहासपुराणाद्यपि गृह्यते ।

लोकप्रसिद्धिमुल्लङ्घ्य यतोऽन्यायोऽन्यथाग्रहः ॥३१७॥

316-317. Since the *mantra* and the Brāhmaṇa have the name *veda*, therefore, one grasps (i.e. understands) by the word *ṛgveda* etc. the *mantras* and the Brāhmaṇa (texts). Also Itihāsa, Purāṇa etc., as they exist¹, are also understood here, even going beyond the popular usage (of the word); understanding them in some other way is improper².

NOTES

1. That is already declared by the Śruti as the breathing out of the Great Being, i.e. they are already existent.

2. *anyāyyo'nyathāgrahaḥ* is Sureśvara's objection to Śaṅkara's explanation of the words *itihāsa* etc., i.e. he considers it as *durukta*.

इतिहासपुराणाभ्यां वेदं समुपबृंहयेत् ।

इत्यादिमनुनाऽप्युक्तं कथं तत्त्यागमर्हति ॥३१८॥

318. Even¹ Manu says, "One should amplify (i.e. support/explain) the Veda by means of Itihāsa and Purāṇa."² How does it deserve to be given up ?

NOTES

1. The word *api* is used to indicate that Atri has said the same thing. (SP)

2. *itihāsapurāṇābhāyāṁ vedam samupabṛṁhayet/
bibhety alpaśrutād vedo mām ayaṁ prahariṣyati* //

This verse cannot be found in the *Manusmṛti*, but one finds it in MBh, i.e. 1.1.204. However, Sureśvara ascribes it to Manu. This means tradition held this as an opinion of Manu, the time-honoured authority on Vedic learning. Cf. *yan manur avadat tad bheṣajam bheṣajatāyāḥ*.

इतिहासपुराणादेर्वेदमूलत्वकारणात् ।

प्रामाण्यं नान्यथा तस्य प्रामाण्यमुपपद्यते ॥३१९॥

319. Since Itihāsa and Purāṇa etc. have their source (lit. roots) in the Veda they are authoritative; otherwise their authoritativeness would not stand to reason.

NOTES

If the meaning of the Veda is clarified by Itihāsa etc., it would bring about an undesirable result, viz. that the Veda is not independently authoritative. Such an argument cannot be entertained. The verse gives reason for the same. The Veda is the basis or cause of Itihāsa etc. That is to say; if one ascertains the meaning of the Veda from words of some

expounder, it would not mean that the Veda gives up its independent authoritativeness.

From significance, meaning is ascertained. Itihāsa etc. are taken by the learned to be based on the Vedic tradition (*vedamūlatva*) and therefore, if one entertains a doubt about a Vedic passage it should not mean that the Vedic passage is unauthoritative. One should interpret Vedic passages in the light of interpretation supplied by Itihāsa etc. SP refers to *na hi vyākhyānato viśeṣapratipattiḥ*; on this see the *Paribhāṣendu-śekhara of Nāgojibhaṭṭa*, Poona: BORI, 1962, p. 1.

प्रत्यक्षवेदवचनविरुद्धं तेषु यद्वचः ।

बुद्धवाक्यादिवत्तादृक्त्याज्यं श्रुतिविरोधतः ॥३२०॥

320. Whatever statement in them would be noticed as directly opposed to the Vedic statement, like the statements of (Gautama) Buddha, it is to be given up on account of its contradiction to the Śruti statement.

NOTES

Here is a reason given for accepting the Itihāsa etc. as authoritative even like the Veda; these are not opposed to the Śruti statements. Sureśvara affirms his opinion that anything opposed to the Veda cannot be authoritative and whatever follows the Śruti is, on the other hand, authoritative.

न चेश्वरातिरेकेण कश्चित्त्रष्टाऽभ्युपेयते ।

इतिहासपुराणादेस्तदन्यस्येह कार्यतः ॥३२१॥

321. Further, (in the case) of Itihāsa and Purāṇa no creator other than the Īśvara¹ is accepted in our view on the ground that they are some effect.

NOTES

1. Īśvara = the Lord.

कारणत्वं प्रमाणेन यस्य साक्षाद्विनिश्चितम् ।

अपि तत्कार्यकर्तृत्वे तदेवाभ्युपगम्यते ॥३२२॥

322. That whose nature as the cause is ascertained directly by some means of knowing is itself accepted as the creator of the effect (i.e. its own effect) also.

NOTES

The idea is that Vyāsa is the author of MBh, Purāṇa etc. but the Brahman is the creator of Vyāsa. Therefore finally, the Brahman is the creator of MBh.

As to SP's quotation from MBh (appendix 2.2 pr. appendix 3. 2 pr.), in the critical edition of MBh this verse is given in an appendix which records passages that are left out by the editor, on the ground that they are later additions. At least in Ānandagiri's age, these passages were there in MBh.

बीजमेवाङ्कुरादीनां यथा कारणमिष्यते ।

अङ्कुराद्यात्मना तद्वद्बीजमेव तु कारणम् ॥३२३॥

323. As a seed is held to be the cause of a sprout etc., so is that seed itself understood as the cause of the nature of the sprout etc.

NOTES

This is not a strictly logical argument; that which seed produces, viz. sprout (1), in its turn produces seed (2).

आद्यन्तयोर्यतो बीजं प्रत्यक्षेणावसीयते ।

तस्मात्तन्मध्यकार्येषु बीजमेवास्तु कारणम् ॥३२४॥

324. As a seed is noticed by direct perception, both in the beginning and in the end, therefore, in the middle stage of the effects also let the seed be (understood as) the cause.

NOTES

The illustration of the seed-sprout relation depending on the deciding factor is elaborated; cf. GK. 2.6 : *ādāv ante ca yan nāsti vartamāne 'pi tat tathā* /

न च वेदोक्तितो वेदः श्रद्धेयार्थ इहेष्यते ।

कित्वमानं त्वहेतूनां वेदवाक्येष्वसम्भवात् ॥३२५॥

325. It is not intended here to state that the Veda has to be believed in, (only) on (the basis of) the statement in the Veda, but (it is intended to state) that there is no possibility of (stating) any reasons to determine the unauthoritativeness of the sentences of the Veda.

NOTES

The purport of this verse is to point out that the Śruti is authoritative owing to the fact that it is not and cannot be opposed by any other means of knowing.

प्रामाण्यं वेदवाक्यानां न च मानान्तराश्रयात् ।

अक्षादेरपि मानत्वं यथोक्तादेव कारणात् ॥३२६॥

326. That the sentences of the Veda are authoritative does not follow from one's resorting to other means of knowing. Direct perception etc.¹ are also accepted as authoritative means of knowing just for the reason mentioned before.

NOTES

yathoktakāraṇa may refer to *amānatvāhetūnām asaṁbhavāt*. Then, ordinarily, means of knowing are considered authoritative, since there is no opposition to them by any other means. Therefore, let one not suppose that the words of Veda are unauthoritative because they use the same word as in common parlance. In reality, the Veda signifies that which cannot be understood by any other means though the words of Veda may be the same as those of the daily speech.

1. For the word *akṣādi*, cf. note (2) on verse 154 above.

प्रज्ञानव्यतिरेकेण यथैव स्थितिसर्गयोः ।

वस्त्वन्तरं न संभाव्यं प्रलयेऽपि तथोच्यते ॥३२७॥

327. As it is impossible to conceive of (i.e. accept) any other thing over and above (i.e. beside) knowledge (i.e. Brahman), which is supposed to be existing at the time) of the creation and sustenance (of the world), so it is said to be there at the time of the merger also.

NOTES

This is a comment on *kiṁ cānyan na kevalam sthityutpattikālayor eva prajñāna-vyatirekeṇābhāvāj jagato brahmatvaṁ pralaya-kāle ca* (BUB, p. 332), which explains the introductory part of BU 2.4.11 : *sa yathā sarvāsām apām. . .*

[Now follows a comment on *sa yathā sarvāsām apām samudra ekāyanam evaṁ sarveṣām gandhānām nāsike ekāyanam evaṁ sarveṣām rasānām jihvaikāyanam evaṁ sarveṣām rūpānām cakṣur ekāyanam evaṁ sarveṣām śabdānām śrotram ekāyanam evaṁ sarveṣām saṁkalpānām mana ekāyanam evaṁ sarveṣām vidyānām hṛdayam ekāyanam* (BU 2.4.11) ; it continues up to verse 377 below.]

विभिन्ननामरूपाणां सरितां सागरो यथा ।

अभिन्ननामरूपैकः प्रलयोऽयनमेकता ॥३२८॥

स्पर्शादिज्ञानभेदानां त्वगाद्येकायनं यथा ।

स्वान्ते त्वगादयस्तद्वद्बुद्धौ च मनसस्तथा ॥३२९॥

कर्मक्षयात्तथा बुद्धिः कारणत्वेन तिष्ठति ।

एष साधारणस्तावत्प्रलयोऽबुद्धिपूर्वकः ॥३३०॥

328-330. As the ocean having but one (and the same) name and form is the merger¹ (i.e. the meeting-point) of rivers which have different names and forms———(and) merger means oneness———so is the skin etc. the one meeting point of different knowledge such as touch etc. And the skin etc. also (get merged) into their own end² (viz. *manas*) and so also is (the merger of) *manas* into the intellect. In the same way, intellect (also) remains in the form of cause,³ when action gets destroyed. This is the common⁴ (nature of) merger (everywhere) and it is not preceded by any deliberate thinking.

NOTES

1. The word *pralaya* has two senses, (i) 'the act of merger' and (ii) 'the point of merger' (the place where the merger takes place). In order to set aside the sense (i) the word *ayana* meaning (ii) is used. And the word *ekatā* 'oneness' is used in order to obviate the idea of void—oneness means becoming 'one'.

2. The word *svānte* means 'in their own . . .', viz. *manas*.
3. *kāraṇatvena=kāraṇātmanā* (SP), it takes the form of *prakṛti*.
4. Referring to two types of *pralaya* : *sādhāraṇa* and *asādhāraṇa*. This verse refers to the first variety of *pralaya*.

प्रत्यग्याथात्म्यविज्ञानाद्वस्तुवृत्तानुरोधतः ।

प्रलयोऽज्ञानविध्वंसाद्यस्त्वसौ बुद्धिपूर्वकः ॥३३१॥

331. But that merger, which (results from) the destruction of ignorance, the knowledge of the real nature of the individual consciousness and is owing to following (i.e. accepting) the real nature of the thing (viz. the Brahman), is preceded by some deliberate thinking.

NOTES

This verse refers to the second type of merger, viz. the uncommon merger (*asādhāraṇa* and *buddhipūrvaka*).

Cf. *evam eva khalu soṃyemāḥ sarvāḥ prajāḥ sati saṃpadya na viduḥ sati saṃpadyāmaha iti / ta iha vyāghro vā simho vā vṛko vā varāho vā kiṭo vā pataṅgo vā daṃśo vā maśako vā yad yad bhavanti tad ābhavanti* / (CU 6.9.2-3), which intends that all beings get merged into the highest and again come into existence at the time of creation. Also cf. CUB on the same and BSB 2.1.9.

अग्निरेकायनं यद्वत्सर्वासां सरितां तथा ।

त्वग्गोचराणां स्पर्शानां त्वगेवैकायनं परम् ॥३३२॥

332. As the ocean is the one meeting-place of all the rivers, so is the skin the one meeting-place of all the touches which are the objects of the skin.

स्पर्शशब्देन विषयस्त्वग्ग्राह्योऽत्राभिधीयते ।

तथा गन्धादिशब्देन घ्राणादिविषयो मतः ॥३३३॥

333. The word *sparśa* (here) expresses (only) the object grasped by the skin. Similarly, by the words *gandha* etc. are to be understood the objects of the nostrils etc.

गन्धादिसंहतिः पृथ्वी रसान्तानां तथा जलम् ।

तेजस्त्रयाणां वायुस्तु द्वयोरेकात्मकं नमः ॥३३४॥

334. Earth is the collection of (five objects such as) the smell etc., water (is likewise the collection of four objects) ending with the taste. Fire is (the collection) of three. As for wind, it is of two and ether (is) of the nature of one.

NOTES

Here is introduced the merger of the elements.

Element (<i>bhūta</i>) : Property (<i>guṇa</i>)	
<i>prthivī</i>	: <i>śabda, sparśa, rūpa, rasa, gandha</i>
<i>ap</i>	: <i>śabda, sparśa, rūpa, rasa</i>
<i>agni</i>	: <i>śabda, sparśa, rūpa</i>
<i>vāyu</i>	: <i>śabda, sparśa</i>
<i>ākāśa</i>	: <i>śabda</i>

एवं लक्षणतः पञ्च भूतान्येतानि निर्दिशेत् ।

मूर्तामूर्ताविष्करणं गुणाविष्कृतिरिष्यते ॥३३५॥

335. From this explanation, one should understand (the nature of) these (five) elements. (And) their manifestation of concrete and abstract¹ are understood as the manifestation of their *guṇas* 'properties'.

NOTES

The five elements are collection of five *guṇas* 'properties' beginning with the smell and ending with the sound which

increase and decrease as shown in the previous verse. The rise of the five elements from their own causes is nothing but the manifestation of the smell etc. from the primordial cause, in ascending order. And the merger of the element into a subtler element is not else than the merger of *guṇas*.

1. Among the five elements, ether is *amūrta* and the rest are *mūrta*.

संहतोक्तविशेषाणां भूतानां कारणात्मता ।

तत्र स्पर्शग्रहेणैव वायोरंशोऽत्र गृह्यते ॥३३६॥

तेजसस्तु तृतीयांशश्चतुर्थोऽपि तथा भुवः ।

पञ्चमस्तद्गुणैर्भेदस्तथा स्पर्शं समीक्ष्यताम् ॥३३७॥

गन्धादिषु तथा योज्यो भेदोऽयं गुणभेदतः ।

पृथिव्यंशस्य बाहुल्यात्कर्कशः स्पर्श उच्यते ॥३३८॥

शीतश्च पिच्छिलश्चापि बाहुल्यात्स्पर्श इष्यते ।

भूयस्त्वात्तेजसश्चोष्णः सुकुमारस्तथा मरुत् ॥३३९॥

बाहुल्यादिति विज्ञेयो यथोक्तगणसंश्रयात् ।

ध्वस्ताशेषविकारस्य ब्रह्मणोऽविद्ययाऽऽत्मनः ॥३४०॥

स एष परिणामः स्यात्तेजोवन्नाद्युपक्रमः ।

स्पर्शनाद्यात्मनाऽप्यन्तं परं काठिन्यमागतः ॥३४१॥

336-341. The¹ objects (lit. elements), which possess these (already) mentioned distinct properties collected together, have the nature² of the cause. Among these (elements) is understood the element of wind by the mere mention of touch. And the third is that of the fire; the fourth, of water and the fifth, of earth. Again distinction (of five elements) in touch may be noticed by means of (the distinction of) their *guṇas* : So also, this distinction (of the five elements) as regards the smell etc. has to be associated with the difference of *guṇas*, thus³ : The touch is stated to be rough owing to the abundance of the earth (element in an object). (Again), touch is taken to be cool and

slippery when there is abundance of the water (element in an object). The wind (also) is taken to be hot or pleasant when there is abundance of fire (element in an object). Thus this mention of the transformation having its beginning in (the mention of) fire, water, food etc. should be (treated as) of the Brahman⁴, whose entire modification is denied (lit. destroyed), (as possibly existing), owing to its basis on the *guṇas* already stated (and) the ignorance (about the real nature) of the Ātman (Jīvātman) — (this modification) has attained to (lit. has come to) extreme grossness (etc.)⁵, owing to its (having) *guṇas* touch etc.

NOTES

1. Here in SP the reference is to *guṇa* which occurs in the previous verse. It is that which would give rise to the doubt. The doubt expresses a possible interpretation of verse 335 (last line) according to the Vaiśeṣika theory. The first line of the verse 336 is the answer to it.

2. The theory of causation which Sureśvara accepts (for the sake of argument, not in reality) resembles that of the Sāṅkhya. Therefore all these *guṇas*, together in a substance assume the forms of the cause and the effect. Thus, Sureśvara rejects the *asatkāryavāda* of the Vaiśeṣika. In other words, the elements can exist in both the forms, the cause and the effect — this explains their *jani* and *laya*.

3. One could entertain a doubt: 'Since there is a mention in the Śruti (only) of *guṇas*, viz. touch etc., it intends to refer to the merger of the elements which have not been mentioned.' This doubt is answered in the next two sentences. The mention of *guṇa* is indicative of *guṇin*. This is done only after accepting the difference of *guṇa* and *guṇin* in normally spoken language of every day life. It is not real.

4. This sentence is an answer to the doubt: 'There is the transformation of the highest in the form of the earth etc. which is of the nature of the touch etc.' Sureśvara thinks that without ignorance about the nature of the Brahman and / or of the Ātman (= Jīvātman) which is inner and immutable, such a talk of transformation is impossible — the world is 'caused' by ignorance of the Brahman.

5. Cf. SP's mention of the two types of hardness (etc.) — One is *sthūla* (gross) and the other *sūkṣma* (subtle). (Etc.) is necessary in view of *sparsādi*, 'touch etc.' *kāṭhinya* is literally 'hardness'; however, it is translated as grossness in view of Sureśvara's use of the adjectives *kāṭhina* and *svaccha* as pair in verse 344 below.

उद्भूतस्पर्शविज्ञानस्त्वचा तस्य समागमात् ।

स्पर्शभेदपरिज्ञानं ततोऽभिव्यज्यते दृशेः ॥३४२॥

342. (This transformation wherein) that knowledge of the touch has arisen is owing to its (i.e. of the Ātman)¹ association with the skin, (for) the complete knowledge of distinct touches² is said to be of the seer (= the Ātman³) from (i.e. by means of) that (i.e. the skin).

NOTES

How is the transformation of the touch etc. proved? When one has got a knowledge in the form 'This is a touch' etc., that cognition results from the association of the Ātman with the skin etc. SP's explanation of the compound *udbhūtasparśa-vijñānaḥ* is not satisfactory. One can take the compound as an adjective of the *pariṇāma* (mentioned in earlier verse) and *tasya* as *ātmanaḥ*.

1. The Ātman in verse 340—this association is rooted in ignorance. See for that verse 344 below.

2. Cf. *sparsādibhedavijñānam* in the next verse as further support.

3. Alternatively translated as; 'the complete knowledge of distinct touches is manifested to the seer.'

स्पर्शादिभेदविज्ञानं स्यादचेतनमेव तु ।

स्पर्शादिवत्परार्थत्वात्स्वार्थं तन्न तु साक्षिवत् ॥३४३॥

343. Indeed¹, the knowledge of distinct (objects), touch etc., is insentient², because it is for the sake of another³, as (is) the touch etc. (for another), it is not for its own sake, accompanied (as it is) by the witness (Ātman)⁴.

NOTES

This is the refutation of some opponent's view that even if this is not inferred, it is known by a witness, because it is self-luminous.

1. The word *tu* is used for emphasis.
2. Sureśvara follows the Sāṃkhya theory of cognition.
3. Cf. SK 17 which has been already quoted in the note on verse 285 above.
4. The construction is thus: *sākṣivat (sat) tat (= sparśā-dibhedavijñānam) na svārtham*.

अतीव कठिनं ज्ञानं त्वचातोऽस्य समागमात् ।

मनसा तस्य संयोगे ततः स्वच्छैव धीर्भवेत् ॥३४४॥

344. The very gross¹ (of the Ātman), (arises) on account of its association with the skin (etc.). (And) when it comes into contact with *manas*, there arises only subtle knowledge.

NOTES

The idea of *laya*, as mentioned in notes on 336-341, is explained here further. One takes *jani* and *laya* according as one's knowledge is gross or subtle.

1. the word *kāṭhina* means *sthūla* or 'gross' and the word *svaccha*, *sūkṣma* or 'subtle'; (as noted earlier in the note on verse 341 above.)

ततोऽपि सूक्ष्मं विज्ञानं बुद्धिसंयोगजं भवेत् ।

यावद्बुधिरसंव्याप्तिः शरीरे तावदेव तु ॥३४५॥

बुद्धेः सामान्यवृत्त्येह व्याप्तिरादेहसंक्षयात् ।

चैतन्याभासवत्प्राणस्तां वृत्तिं व्याप्य तिष्ठति ॥३४६॥

345-346. Yet¹ subtler knowledge would occur (to the Ātman) owing to its association (only) with the intellect. The intellect wholly pervades a body by its common function so long as there is pervasion by blood all through the body until the fall of it. (And) the *prāṇa*,² which has the appearance of sentiency, exists (in the body), pervading the (common) function (of the intellect).

NOTES

1. The same knowledge would be subtler because the intellect is subtler than *manas*.

2. *prāṇa* is one of the winds in the body. It resembles sentiency in the body because of their *avinābhāva*. One should remember here the common function of the three-fold inner-organs, *prāṇādīdhāraṇa*. Cf. SK 29 referring to the common function of the three inner-organs: *sāmānyakaraṇavṛttiḥ prāṇādyā vāyavaḥ pañca*.

अकार्यकारणस्त्वात्मा तमपह्नुत्य तिष्ठति ।

कण्टकादिसमायोगे शरीरे विक्रिया यदा ॥३४७॥

तदाऽधर्मादितो दुःखं विक्रियातोऽभिजायते ।

देहैकदेशगं दुःखं विशिनष्टि स्वदेशगाम् ॥३४८॥

धियं तद्देशदुःखित्वाद्दुःखित्वं जायते धियः ।

तस्यावच्छिन्नये वृत्तिर्दुःखभूत्यैव जायते ॥३४९॥

347-349. As for the Ātman, which is neither a cause nor an effect, it remains after covering that *prāṇa* which is mentioned just in the previous verse. If there is a change in a body when there is a contact of it with a thorn etc., then there is pain (on the part of the Ātman) due to the (so-called) demerit etc.¹ consequent to the change (in the body). The pain² in one part of the body qualifies the intellect belonging to that part, (for) the condition of the misery of the intellect arises from the pain of that part (of the body). (And) for the eradication of (the condition of) that (misery), the function (activity of the intellect) results only from the abundance (i.e. intensity) of the misery.

NOTES

1. A pun on the word *adharma*. It means (i) demerit (as commonly understood) and (ii) (in reality) not its property—this latter points to unreal pain.

2. This sentence is an answer to the possible doubt : 'When misery has arisen in one part of the body, how can one say that misery rests on the intellect?' The reply is: Since the intellect

pervades the entire body, therefore, misery in any part of the body stays on the intellect also.

भोक्तृभोग्याभिसंबन्धस्तन्निमित्तोऽयमात्मनः ।

बुद्धेः सेयमहंवृत्तिर्दुःखावच्छेदिनी सती ॥३५०॥

परिच्छिनत्ति बोद्धारं बोद्धाऽप्याभासमात्मनः ।

न बहिविक्रियां मुक्त्वा देहेऽहंवृत्तिसंभवः ॥३५१॥

350-351. This (commonly known) relation of the enjoyer and the enjoyable (for) the Ātman is caused by that intellect.¹ This (commonly known) function of Ego which belongs to the intellect, being the encompasser of misery, encompasses the knower and the object of knowing also (encompasses) its own semblance.² There³ does not arise the function of Ego in a body without there being any external change.

NOTES

Again, Sureśvara talks in terms of the Sāṃkhya theory of cognition, nevertheless, showing that there is an important difference.

1. Sureśvara does not accept that the Ātman is the natural enjoyer.

2. It is *ahamkāra* 'Ego' (inseparable from *buddhi*) that is responsible for experience — it is (by mistake) understood for the Ātman and *vice-versa* and therefore these are statements like 'I know' etc.

3. This sentence points out how the function of Ego and a change in the body (*not in the Ātman* in anyway) are simultaneous and also how there is an error of identifying the Ego and the Ātman as one. This is amplified in the following verses.

स्वस्थेन्द्रियमनोबुद्धेर्नैवाहमिति वीक्ष्यते ।

पुत्राभिमानजे त्वस्मिन्न देहांशविशिष्टता ॥३५२॥

352. When (a person's) sense-organs, *manas* (and) the intellect are (in fact) in their own form,¹ there is not seen the Ego (functioning). However, when this (i.e. the Ego) is noticed

(to function) by attachment to a son (etc.), it (i.e. Ego) is then qualified as being the part of some particular body².

NOTES

1. That is, they are not affected by any external object of misery or joy — e.g. by a prick of a thorn or some soft touch.

2. This is in contrast with the first line. The Ego can persist even without an external object, since it may retain some attachment to a son etc.

तत्तद्वस्तु समुद्दिश्य दुःखित्वं तत्र मानिनः ।

अज्ञानादभिमानोऽयं बुद्ध्यादौ विषयावधौ ॥३५३॥

353. Referring¹ to different objects a person is stricken by misery when he regards them as his. (And)² the notion, (this is) mine (i.e. Ego³) is due to ignorance in respect of the intellect and insofar as the (external) objects (exist).

NOTES

1. One who possesses *abhimāna*, viz. the notion 'this is my son etc.' with reference to a wide range of objects, has misery. Further, it is then indirectly superimposed on the witnessing consciousness within.

2. This explains that misery arises from the misconception such as 'this is mine', which really the witnessing consciousness does not entertain.

3. *abhimāna* = *ahamkāra*. Cf. SK 24: *abhimāno 'hamkāraḥ*

न तु निःसङ्गकूटस्थप्रतीचः स्यादहंमतिः ।

न कार्यप्रलयो दृष्टो यस्मादन्यत्र कारणात् ॥३५४॥

त्वगारम्भकसामान्यं त्वगिराऽतोऽत्र गृह्यते ।

कार्यत्वान्नेन्द्रियेष्वेव विषयप्रलयो भवेत् ॥३५५॥

354-355. The thought 'I am (this or that)' could not be on the part of the individual consciousness which is free from all attachment and immutable,¹ since merger of an effect is not seen elsewhere than in the cause.² Therefore, the word skin³

(etc.) is understood here, in the sense of the common origin of the skin (etc.), for⁴ the merger of the objects would not be in the sense-organs inasmuch as they (themselves) are of the nature of an effect.

NOTES

1. This is a reply to the doubt that the misconception of Ego and that of 'mine' are on par, then how can you say the misconception of 'mine' really exists ?

2. According to SP, Sureśvara refers to this as the refutation of the view of Bhartṛprapañca (*bhedābhedavādin*) —though SP did not say so on verses 328-330. Sureśvara obviously follows his master Śaṅkara who cites this view of Bhartṛprapañca in BUB 5.1.1 (see the Introduction section 9).

3. Cf. next verse which mentions *tvagādi*.

4. SP states : The sense-organs are the effects of the objects and, therefore, not their origin.

न मृदोऽन्यत्र कुम्भादेः शरावे प्रलयो यतः ।

तस्मात्त्वगादयः शब्दास्त्वगाद्यारम्भकामिधाः ॥३५६॥

सर्वत्र प्रतिपत्तव्या नान्यत्र प्रलयो यतः ।

गन्धशब्देन कृत्स्नाऽपि पृथिवी परिगृह्यते ॥३५७॥

356-357. Since the merger of a pitcher etc. is not elsewhere than in clay, i.e. in a plate¹, therefore the words *tvac* etc. (here in this discussion) are (properly) to be understood everywhere as expressive of that which originates skin etc. Since their merger is not found anywhere else, therefore, by the word *gandha* is to be understood the whole earth².

NOTES

1. A possible objection is : 'Would it be wrong to hold that the objects merge into the sense-organs ?' This is answered here : If the effect gets merged into something else than a cause, then a pitcher etc. would also get merged into a plate. Therefore, the merger of objects into the sense-organs cannot be established.

2. Here concludes the explanation of the Śruti 'of all touches . . .' Now follows the explanation of the word *gandha* in the Śruti, 'Of all smells The word *gandha* indicates the gross earth in the form of collection of five *guṇas* such as the sound etc.

यदि वा परिभागोऽस्या गन्धस्यानेकभेदतः ।

गन्धो गुरुः क्षितिप्रायो ह्लादो शीतोऽप्रधानतः ॥३५८॥

तेजोभूयस्तया तीक्ष्णो लघुर्वायुप्रधानतः ।

शान्तोऽथ विशदो व्यापी स्याद्द्युयोम्नोऽथ प्रधानतः ॥३५९॥

358-359. Or, perhaps, (by the word *gandha* is understood) the minute part of this (earth), on account of the variety of smell : (Thus) the smell¹ is intense (strongly fragrant) when it is abounding in (the element of) earth. It² is pleasant (and) cool when it is abounding in the (element of) water. It is sharp when it is abounding in the (element of) fire (lit. lustre). It is gentle when it is abounding in the (element of) wind. And it is mild, pleasant and (all-) pervading owing to the abundance of the element of ether.

NOTES

1. The meaning of the word *gandha* is the most minute part of the earth, because smell appears (is felt) in manifold forms.

2. This explains the different kinds of smell.

पार्थिवाप्यांशयोस्तेजः परिक्लेदात्तथाऽधमः ।

दुर्गन्धो जायते गन्धः पापकर्मप्रबोधतः ॥३६०॥

360. On account of the overpowering of the element of the earth and the water by (the element of) fire, there arises the worst (lit. lowest) smell. On account of the rise of (some) evil act,¹ the smell becomes bad smell.

NOTES

Sureśvara makes a reply to the doubt : 'How can there be the knowledge of difference of good or bad smell, even if

there is difference of the smell in accordance with the element?' First, he speaks of the seen cause and then the unseen (*adr̥ṣṭa*) cause.

1. See Nais 1. 1 on *adharma* as the cause of misery (*duḥkha*).

समांशपरिणामे तु सुरभिर्जायते शुभः ।

पुण्यकर्मप्रयुक्तः सञ्जन्तो रासङ्गकृत्या ॥३६१॥

361. But there arises an auspicious (i.e. fragrant¹) smell when there (exists) combination (lit. effect) in equal proportion (of the elements²). So also, being effected by holy activity (the combination of merit and demerit in equal proportion) creates attachment to (various external objects) in (an individual that is) born.³

NOTES

1. *śubhatva* = *sukhakaratva*. (SP)
2. 'When the equal proportion of the earth etc. are heated by fire'. (SP)
3. This explanation is forced by the words *pāpakarma-bodhataḥ* (in the preceding verses) and *śubha* with *double entendre*.

रसरूपरवेण्वेवं यथोक्तं प्रतिपादयेत् ।

प्रधानगुणभावेन गुणानां भूरिरूपता ॥३६२॥

362. In respect of the taste, the form and the sound (of five objects, the touch and the smell) also should one state (or, explain) as (stated) before. Variety (of objects and individual) arises from the relation of the principal and the subordinate among the various properties.

NOTES

The manifoldness of the touch and the smell stated above is extended to the taste etc. in the passage 'Of all tastes . . .' The *guṇas* are manifold due to the increase and the decrease of the elements. The case is the same with individuals—this is implied by two preceding verses.

असाधारणगन्धादिग्राहकत्वानुमानतः ।

ग्राह्यभूतप्रधानत्वं घ्राणादिष्वपि निर्दिशेत् ॥३६३॥

363. On the basis of inference¹ of a capacity to grasp the uncommon (*guṇas* like) smell etc. one should attribute to the sense of smell etc.² what are grasped as the principal elements among those entities.

NOTES

This verse answers the possible objection : 'When the said difference in respect of the smell etc. is established in the Śruti, how is it said in the passage 'that common origin of the touch . . .' (verse 355) that the smell etc. are the origin of the smell etc.?'

1. SP refers *anumāna* to *liṅga*.

2. SP understands *api* 'etc.' in the sense of *yathā* or *iva* as implying a simile.

स्वग्राह्यार्थसजातीयमिन्द्रियं स्यात्प्रदीपवत् ।

रूपस्यैवावभासित्वान्न चेत्स्याच्छ्रोत्ररूपवत् ॥३६४॥

364. As the light (is not different from the object which is illuminated by it, so) does a sense-organ belong to the same category as the object which is grasped by it, because (it)¹ illuminates that which is a form. If (this was) not (so)², then it would be (related to the form) in the same way as the ear and the form.

NOTES

1. This 'it' means *pradipa*.

2. If the lamp is not of the same nature of the form which is to be understood, the form is not grasped even by the lamp as it is not grasped by the ear. This evidence proves the point by an instance of contradiction. The eye is very easily understood from the instance of the lamp, for the lamp and the eye share the same *guṇa*, viz. they are both *taijasa* and, therefore, illuminators.

न चेदर्थसजातीयं सर्वार्थग्रहणं भवेत् ।

एकैकस्येन्द्रियस्येह मनोबुद्ध्योर्यथा तथा ॥३६५॥

सर्वभूतात्मकत्वात् सर्वार्थग्रहणं तयोः ।

मनोबुद्धयोरिति ज्ञेयमन्यथा तदसम्भवात् ॥३६६॥

365-366. If a sense-organ would not belong to the same category (as its object), then there would be the grasping of all the objects; as each of the sense-organs would here (in our worldly dealings) grasp all objects so do *manas* and the intellect (grasp all of them). It should be remembered (i.e. known) that as for *manas* and the intellect, they grasp all objects since they are of the nature of all the elements (together), for, otherwise, it would be impossible (for them to grasp them all).

त्वगादिज्ञानशक्तीनां बुद्धिः सामान्यमुच्यते ।

प्राण एव क्रियाशक्तिसामान्यं तद्वदुच्यते ॥३६७॥

367. The intellect is said to be the generality¹ of the powers of knowing, viz. the skin etc., likewise is the vital force said to be the generality of the powers of action.

NOTES

1. The word *sāmānya* means the common quality of them all.

शब्दादिभोगसिद्ध्यर्थं श्रोत्राद्या ज्ञानशक्तयः ।

तद्वत्कर्मोपभोगार्थं वागाद्याः कर्मशक्तयः ॥३६८॥

368. (As) there are the powers of knowing, viz. the ear etc., in order to achieve (lit. to secure) the enjoyment of the sound etc., likewise there are the powers of action, viz. speaking etc.¹ for (the securing of) the enjoyment of action.

NOTES

The reasons why the organs of knowing and those of action are stated in this context are indicated in the first and the second lines respectively.

1. SP quotes SK 21 where the functions of powers

of action are described, i.e. *vacana* 'speaking' by *vāc*, *ādāna* 'taking' by *hastau*, *viharāṇa* 'moving' by *pādau*, *utsarga* 'excretion' by *pāyu* and *ānanda* 'joy' by *upastha*.

यथोक्तशक्तिविक्षेपो मनोबुद्धिपुरःसरः ।

संकल्पाध्यवसायाभ्यां तयोर्भेदोऽपि च द्विधा ॥३६६॥

369. The application (i.e. the appearance) of the powers (already) stated proceeds (only) from (the inner-organs, i.e.) *manas* and the intellect.¹ The distinction between them is (also) divided into two categories, viz. imagination and ascertainment.

NOTES

This verse states how the different sense-organs act.

1. According to PKV 33, 34, the inner-organs are four-fold, i.e. *manas*, *buddhi*, *ahamkāra* and *citta*. And their functions are *saṁkalpa* 'imagination', *niścaya* or *adhyavasāya* 'ascertainment', *abhimāna* 'misconception' and *anusaṁdhāna* 'investigation' respectively. But here Sureśvara seems to follow the Sāṁkhya view of three-fold inner-organs. This could lead one to hold that PKV is not the work of Sureśvara Cf. SK 23, 24 and 27, where three-fold inner-organs (*manas*, *buddhi* and *ahamkāra*) and their functions are described.

योग्येन्द्रियस्य या यस्य ततोऽन्यत्रापि लक्षिता ।

वृत्तिस्तस्यैव सा ज्ञेया न स्वभावविपर्ययः ॥३७०॥

370. Whatever modification (i.e. function) of some sense-organ is noticed on the part of another sense-organ it should be taken to belong, in reality, to that particular sense-organ alone; there (has) not (been) change (as regards the modification).

एवं ज्ञानक्रियाशक्तिविक्षेपाज्जगदात्मनः ।

करणायतनत्वाय बेहाविर्भूतिरात्मनः ॥३७१॥

371. In this way, on account of the application (i.e. appearance) of the powers of knowing and action (on the part) of the soul of the world, there is the manifestation in a body of the Ātman (Jīvātman merely) for serving (as) the support of the sense-organs.

NOTES

SP clarifies Sureśvara's idea thus: The old authorities say that the Ātman becomes, i.e. appears as transmigratory due to the two-fold functions of the sense-organs as stated before. The creation of a body is the necessary basis for the functions of sense-organs which are impossible without its support. Moreover, the body also is made up of the five elements, because the five-fold objects, viz. sound etc., are found in the body (of a being).

एवं च सति यद्यस्मात्कार्यमाविरभूत्पुरा ।

तत्तु तत्रैव विलयं कार्यमेति स्वकारणे ॥३७२॥

372. Such being the case, whatever effect has first manifested from whichever cause properly gets merged into its own cause.

NOTES

Sureśvara thus reiterates how the various sense-organs get merged into the five elements which are their 'cause'.

मूलकारण एवेषां सर्वेषां विलयो भवेत् ।

तत्कारणत्वात्कार्याणां न तु कार्यान्तरे लयः ॥३७३॥

373. All these (entities) would get merged into their root-cause, (being) the products of that cause.¹ Indeed, they do not get merged into other effects.²

NOTES

1. This is to remove the doubt that the sense-organs would then merge into the five elements, something else than the Brahman. Sureśvara asserts that the idea of a merger (*laya*) is associated with the effects merging into the 'root-cause'.

2. The sense-organs as well as the elements being effects, it is improper to say that the sense-organs which are some of the effects (of the root-cause) get merged into the five elements which are some other effects.

पिण्डादिष्वेव प्रात्यक्ष्याद्ब्रह्मादीनां लयादियम् ।

भ्रान्तिः पूर्वेषु कार्येषु लयोऽयमिति मोहतः ॥३७४॥

374. It (lit. this) is misapprehension (to say): "On account of directly perceiving the merger of a pot etc. into a lump (of clay)¹ etc., it is possible to hold that every effect merges into every another preceding effect"; (and this is) owing to infatuation (i.e. ignorance).

NOTES

SP points out a possible doubt which is the basis for this verse—; the argument could be: 'All effects do not merge into the Brahman, because (i) we notice that the pitchers etc. merge into clay etc.; and (ii) all the sense-organs, which are effects, merge into the five elements; according to the Vedāntin himself.' The answer is: This argument originates in ignorance. On *sāmānya* and *mahāsāmānya* see note on verse 289.

1. The foot-note on *piṇḍādiṣv eva* reads a variant *mṛdādiṣv eva*: It seems a better reading. The translation follows the text of the edition.

एवं त्वगादिवाच्यासु स्पर्शादीनां यथायथम् ।
स्पर्शादिमात्रासु लयस्तासामपि लयस्तथा ॥३७५॥

मनोविषयसामान्ये तस्यापि प्रलयो धियः ।
स्वगोचरैकसामान्ये सरितां सागरे यथा ॥३७६॥

बुद्धेर्विषयविज्ञानसामान्यमपि चाऽऽत्मनि ।
परस्मिन्नल्लयविक्षेपरहितेऽपरिणामिनि ॥३७७॥

375-377. Thus, there is (the merger of the effects such as) the touch etc. into the sense-organs expressed by the words *tvac* etc¹.; similarly, there is (the merger) of them also into their generality, viz. the objective *manas*; further, that also has its merger in the one (greater) generality, viz. the intellect— (this is) just the same way as there is the merger of rivers into the ocean. Also, the (great) generality of objective knowledge merges into the Ātman (which is) above (itself and is) without any (further) merger and which does not undergo any modification.

NOTES

Having thus explained the merger of the elements and their products into the root-cause (the Brahman), the author points to the meaning of the statements in BUB on 'thus of all touches...'

1. The word *yathāyatham* informs us that the merger of particular objects such as touch into the particular sense-organ, viz. the sense of touch, is denoted by the word *tvac*, and so on.

वदनादिस्वसामान्यविषयेषु तथा लयः ।

कर्मन्द्रियाणां सर्वेषां तत्सामान्येषु पञ्चसु ॥३७८॥

378. In the same way, there is the merger of all actions, viz. speaking etc., into their own generality and further that of all the organs of action into their own generality.

NOTES

Now is shown the purport of the passage: *evam sarveṣāṃ karmaṇāṃ hastāv ekāyanam evam sarveṣāṃ ānandānāṃ upastha ekāyanam . . . sarveṣāṃ vedānāṃ vāg ekāyanam* (BU 2.4.11).

परिस्पन्दः प्रकाशश्च ज्ञानशक्तिषु विद्यते ।

केवलस्तु परिस्पन्दः कर्मशक्तिषु निष्प्रभः ॥३७९॥

379. Movement and lustre are found in the powers of knowing; however, movement alone, i. e. devoid of lustre, is found in the powers of action.

NOTES

This verse states the purport of the passage in BUB: *prāṇas ca prajñānamātram eva* (p. 334, line 8)

सर्वोऽप्येष परिस्पन्दो बुद्धीन्द्रियसमाश्रयः ।

प्राणात्मक इति ज्ञेयो हन्तास्येवेति च श्रुतेः ॥३८०॥

380. It is to be known that all movement which rests on the organs of knowing, is of the nature of the vital force, for there is the Śruti statement, *hantāsyaiiva*.¹

374. It (lit. this) is misapprehension (to say): “On account of directly perceiving the merger of a pot etc. into a lump (of clay)¹ etc., it is possible to hold that every effect merges into every another preceding effect”; (and this is) owing to infatuation (i.e. ignorance).

NOTES

SP points out a possible doubt which is the basis for this verse—; the argument could be: ‘All effects do not merge into the Brahman, because (i) we notice that the pitchers etc. merge into clay etc.; and (ii) all the sense-organs, which are effects, merge into the five elements; according to the Vedāntin himself.’ The answer is: This argument originates in ignorance. On *sāmānya* and *mahāsāmānya* see note on verse 289.

1. The foot-note on *piṇḍādiṣv eva* reads a variant *mṛdādiṣv eva*: It seems a better reading. The translation follows the text of the edition.

एवं त्वगादिवाच्यासु स्पर्शादीनां यथायथम् ।

स्पर्शादिमात्रासु लयस्तासामपि लयस्तथा ॥३७५॥

मनोविषयसामान्ये तस्यापि प्रलयो धियः ।

स्वगोचरैकसामान्ये सरितां सागरे यथा ॥३७६॥

बुद्धेर्विषयविज्ञानसामान्यमपि चाऽऽत्मनि ।

परस्मिन्नल्लेखविक्षेपरहितेऽपरिणामिनि ॥३७७॥

375-377. Thus, there is (the merger of the effects such as) the touch etc. into the sense-organs expressed by the words *tvac* etc¹.; similarly, there is (the merger) of them also into their generality, viz. the objective *manas*; further, that also has its merger in the one (greater) generality, viz. the intellect— (this is) just the same way as there is the merger of rivers into the ocean. Also, the (great) generality of objective knowledge merges into the Ātman (which is) above (itself and is) without any (further) merger and which does not undergo any modification.

NOTES

Having thus explained the merger of the elements and their products into the root-cause (the Brahman), the author points to the meaning of the statements in BUB on 'thus of all touches...'

1. The word *yathāyatham* informs us that the merger of particular objects such as touch into the particular sense-organ, viz. the sense of touch, is denoted by the word *tvac*, and so on.

बदनादिस्वसामान्यविषयेषु तथा लयः ।

कर्मेन्द्रियाणां सर्वेषां तत्सामान्येषु पञ्चसु ॥३७८॥

378. In the same way, there is the merger of all actions, viz. speaking etc., into their own generality and further that of all the organs of action into their own generality.

NOTES

Now is shown the purport of the passage: *evam sarveṣāṃ karmaṇāṃ hastāu ekāyanam evam sarveṣāṃ ānandānām upastha ekāyanam . . . sarveṣāṃ vedānām vāg ekāyanam* (BU 2.4.11).

परिस्पन्दः प्रकाशश्च ज्ञानशक्तिषु विद्यते ।

केवलस्तु परिस्पन्दः कर्मशक्तिषु निष्प्रभः ॥३७९॥

379. Movement and lustre are found in the powers of knowing; however, movement alone, i. e. devoid of lustre, is found in the powers of action.

NOTES

This verse states the purport of the passage in BUB: *prāṇaś ca prajñānamātram eva* (p. 334, line 8)

सर्वोऽप्येष परिस्पन्दो बुद्धीन्द्रियसमाश्रयः ।

प्राणात्मक इति ज्ञेयो हन्तास्येवेति च श्रुतेः ॥३८०॥

380. It is to be known that all movement which rests on the organs of knowing, is of the nature of the vital force, for there is the Śruti statement, *hantāsyaiiva*.¹

NOTES

This is the purport of BUB (p. 334, line 8). Because the movement is of the nature of the vital force and because manifold sense-organs are of the nature of movement, therefore, organs of action are vital force. This is based on the Śruti *yo vai prāṇaḥ sā prajñā* (KausU 3.3), which is quoted in BUB (p. 334, line 8). And because the vital force and the knowledge (*buddhi, prajñā*) are considered as identical, organs of knowing are, therefore, the vital force. Thus, the two-fold sense-organs are proved to be the vital force (*kāryakāraṇayor abhedah, ādhārādheyayor abhedah*).

1. The source of this quotation is not traceable.

पङ्क्तीशशङ्कुदृष्टान्तात्प्राणस्यैव तु शक्तयः ।

कर्मेन्द्रियाणि सर्वाणि तथा बुद्धीन्द्रियाण्यपि ॥३८१॥

381. The power of all the organs of action as well as those of knowing belong only to the vital force as seen from the illustration¹ of the nails which are driven into the foot (of a horse).

NOTES

In addition to the Śruti, *hantāsyaiiva*, the author quotes yet another Śruti to prove that two-fold organs (i.e. sense-organs and the organs of action) are of the nature of the Ātman, i.e. the vital force.

Just as an excellent (i.e. strong) horse uproots simultaneously all the four spikes which are on its hoofs, in the same way the vital force overcomes (i.e. pervades) speech etc. Therefore, the sense-organs stated in the Śruti are dependent on the vital force.

1. Cf. CU 5.1.12 : *yathā suhayaḥ paḍviśa-śaṅkūn sam-khidet* ; also BU 6.1.13 : *yathā mahāsuhayaḥ saindhavaḥ paḍviśa-śaṅkūn samvṛhet* /

आर्पातकरणग्रामे पुंसि स्वात्मन्यवस्थिते ।

तथा प्राणाग्नयः शुद्धा जाग्रतीति श्रुतेर्वचः ॥३८२॥

382. There is a statement in the Śruti : “(When the Man i.e. the Ātman, has concentrated on himself and all of his

sense-organs have been merged (lit. drunk) within himself, then the fires of *prāṇa* remain (alone) in the waking state.”

NOTES

This seems to be a paraphrase of the ideas in PU 4.1.2-3 :
*tasmai sa hovāca | yathā gārgya maricayo'rkasyāstaṁ gacchataḥ sarvā
 etasmimś tejomaṇḍala ekibhavanti | tāḥ punaḥ punar udayataḥ
 pracaranti | evaṁ ha vai tat sarvaṁ pare deve manasyekibhavati |
 tena tarhyeṣa puruṣo na śṛṇoti | na paśyati | na jighrati | na rasayate |
 na spṛśate | nābhivadate | nādatte | nānandayate | na visṛjate |
 neyāyate | svapitity ācakṣate || prāṇāgnaya evaitasmin pure jāgrati |
 gārhapatyō ha va eṣo' pānaḥ | vyāno'nvāhāryapacanaḥ | yad gārhapat-
 yāt praṇiyate praṇayanād | āhavanīyaḥ prāṇaḥ ||* Thus the words
iti śruter vacaḥ should not be taken to conclude a quotation of
 the Śruti.

सहैव कर्मशक्त्यास्तौ ज्ञानशक्तिर्विलीयते ।

प्राणात्मनि श्रुतिश्चाऽऽह कस्मिन्निति च सादरा ॥३८३॥

383. Therefore, along with the powers of action do the powers of knowing get merged into the Ātman, the vital force, and¹ the respectful Śruti says in this connection, *kasmin . . .*²

NOTES

The result of the merger of the two-fold sense-organs in the vital force is mentioned ; and consequently, it points out that the vital force is the highest and the cause.

1. The first *ca* refers to the experience of the vital force, as stated in the Śruti; the other *ca* indicates another Śruti, *sa prāṇam asṛjata* (PU 6.4)

2. PU 6.3 : *kasminnvaham utkrānto bhaviṣyāmi*, ‘As a result of whose (departure) shall I rise up?’

साधारणोऽयं विलयः समानान्तोऽभिधीयते ।

स्वहेतुमात्रसंसर्गाश्रयात्म्यान्तिको लयः ॥३८४॥

384. It is stated that this merger which has one common end is the common (merger), and (the effect) being united with its own cause alone, there does not follow the absolute merger.¹

NOTES

The natural (i.e. commonly known / perceived) merger which is common to all beings is spoken of at the end of BU 2.5, i.e. 2.5.18, also — all beings (i.e. their bodies) end in the cause known by one common word.

The second line of this verse gives the reason why this merger at 2.4 and that at 2.5 are similar.

1. Meaning 'destruction'.

ज्ञानशक्तिक्रियाशक्तिविभृत्वात्परमक्षरम् ।

व्युह्याऽऽत्मानं जगत्स्वेन स्वात्मन्येव समूहति ॥३८५॥

385. The highest indestructible having first expanded itself in the form of the world through its powers of knowing and action and pervasive nature, withdraws (lit. collects) it all into itself again.

NOTES

This verse explains why the common merger is mentioned once again at BU 2.5.18. The Brahman is nothing but the Ātman because of its omnipotence; it spreads itself as the world gathers it back in itself but it remains in its own.

निरुह्येति तथा श्रुत्या कारणात्माऽभिधीयते ।

अत्यक्रामदिति त्वस्य निर्बोजावस्थतोच्यते ॥३८६॥

386. The Śruti¹ mentions the Ātman as the cause (of all this) in the words, 'Having completed....,' but the words 'it went beyond....' is the statement of its condition, viz. not being the cause (of all this).

NOTES

Here Sureśvara explains how that Śruti statement includes the word referring to the cause also, for the effects, viz. *prāṇa* etc. are specifically mentioned. The first line refers to the cause, viz. the Ātman, which spreads out the world as well as enters into itself and finally remains (alone). One should not understand that the Ātman together with these its

effects (viz. the world) is the ultimate reality—this is understood from the second line.

1. Cf. BU 3.9.26 *sa yas tām puruṣān niruhya pratyuhya atyākramat tam tvā aupaniṣadam puruṣam prcchāmi* / “I ask you of that being who is to be known only from the Upaniṣads, who definitely projects those beings and withdraws them into itself.”

यत् एवमतोऽशेषज्ञानशक्तिलयात्परम् ।

सर्वकार्योपसंहारी प्राण एकोऽवतिष्ठते ॥३८७॥

387. Since this is so, there remains only the vital force after the merger of the entire (group of) powers of knowing etc., it is the withdrawer (i.e. the collector) of all effects.

NOTES

Since the Śruti, *niruhya...*, mentions the root-cause of this world, therefore the Śruti : *kasmin nu tvam cātmā ca pratiṣṭhitau stha iti prāṇa iti...* / “On what do the body and the heart (you and yourself) rest? On vital force.” (BU 2.9.26) mentions the merger-sequence. And, as such, one may ask ‘why is not there (i.e. in the latter passage) the statement of the absolute merger?’ This verse is an answer to this doubt : ‘Vital force alone remains.’

प्राणोऽपाने तथाऽपानो व्यानात्मनि विलीयते ।

व्यानोऽप्युदानमप्येति ह्युदानोऽपि समानगः ॥३८८॥

388. The *prāṇa*¹ merges² into the *apāna*, likewise the *apāna* into the *vyāna*, the *vyāna* into the *udāna* and the *udāna* into the *samāna*

NOTES

The word *prāṇa* indicates the specific function, viz. ‘breathing’, because it is impossible to accept the merger of *prāṇa* in the principal sense ‘vital force’; cf. the Śruti, ... *prāṇa iti* / *kasmin nu prāṇāḥ pratiṣṭhita iti apāna iti* / “On *prāṇa* On what does *prāṇa* rest? On *apāna*” (BU 2.9.26).

1. The five kinds of *prāṇa* are described in BU 1.5.3, 3.9.26; TU 1.7.1; Mai U 2.6 etc. cf. verse 299 above.

2. The word *apy-eti* is used in the sense ‘to get merged’; cf. Nais 1.52.

कारणात्मैव जगतः समानोक्त्याऽभिधीयते ।

सर्वसाधारणः सोऽयं प्राकृतः प्रलयो मतः ॥३८६॥

389. The Ātman which is the cause of the world is mentioned in the word *samāna*. This merger which is common to all is accepted as the natural (i.e. common) merger.

NOTES

The word *samāna* is used not in the sense of the specific function, 'downward movement of the wind' but like the word *prāṇa* in the sense of *kāraṇātman* 'the prime-cause Ātman'. This is explained in brief as the natural merger.

प्रज्ञानघनताऽप्यस्य न बुद्धिप्रज्ञयोच्यते ।

प्रत्यक्प्रज्ञोत्थिताभाससंबन्धात्प्राज्ञ उच्यते ॥३८७॥

390. (Take for instance:) This (vital force) is said to be a mass of knowledge not because of the knowledge through the intellect; it is called *Prājña* because of its connection with the apparent rise of the knowledge on the part of the individual consciousness.

NOTES

Since Upaniṣadic time, the *Prājña*, which stands for the individual consciousness in sleep, is very clearly declared to be the *ābhāsa* of the Brahman. It means that terms *prājña*, *aijasa* and *vaiśvānara* known from GK are also related to some sort of ignorance about the true nature of the Ātman. The true condition of the Ātman is knowledge par excellence. SP refers to GK 1.7 and 11 on the word *prājña*. For the word *prajñāna-ghana*, cf. MāU 5 and 7; BU 4.5.13.

यन्निमित्तं प्रमाणानि प्रामाण्यमिह बिभ्रति ।

तदविज्ञातयाथात्म्यमेतत्कारणमुच्यते ॥३८९॥

391. That on account of which these means of knowing have an authoritativeness and whose real nature is not known is the origin of this (world).

NOTES

An objection could be raised thus : 'When the root-cause of the world is knowledge because of its connection with the appearance of the knowledge on the part of the Ātman, the view that the root-cause *prajñānaghana* would not stand to reason. Since there is accepted in that view a difference between what is cause and what the Ātman.' To this is given the reply : The direct perception etc. are authoritative on the plane of the worldly existence by making the then unknown Ātman as its object. And this Ātman is shown in the Smṛti and the Śruti as the cause of the world. There is thus no duality at all.

यस्मिञ्ज्ञाते भवेज्ज्ञातं जगदेतच्चराचरम् ।

अज्ञाते च तथाऽज्ञातमेतदेव तदुच्यते ॥३६२॥

392. Here is a statement about that which being known, this entire world, movable, becomes known, and which not being known, this world is not known.'

NOTES

That the Ātman is the cause so long as ignorance persists is supported by the Śruti informing that all worldly knowledge is derived from the knowledge of that alone. Cf. CU 6.1.3 :

... *yena avijñātaṁ vijñātaṁ (bhavati)* 'By which being known (all becomes) known.' Further it is declared to be the cause of all this (world). This is to say that the *upādeyā* 'worldly knowledge' does not exist without its *upādāna*, the prime-cause Ātman, i.e. knowledge itself.

नन्विह प्रलयः श्रुत्या विषयस्यैव भण्यते ।

करणस्य तु नैवोक्तस्तत्कस्मादिति भण्यते ॥३६३॥

स्वगोचरसजातीयं करणं मन्यते श्रुतिः ।

विषयस्य लयोक्त्याऽन्तःकरणप्रलयोक्तता ॥३६४॥

393-394. (Objection:) It is pointed out that the Śruti mentions the merger of the objects alone, and not that of the cause;

why then do you say this ? (Reply:) The Śruti holds that the cause belongs to the same category as its own object. (Therefore) by the statement of the merger of the object is to be considered the statement of the merger of the inner-organs (also).

NOTES

The objection is based on the acceptance of the Śruti as the authoritative means of knowing these matters : “Even if the merger of the intellect etc. is proved to be the natural merger, it is not declared by the Śruti anywhere—therefore, that argument of the author is unauthoritative.” On verse 394, cf. verse 395 which states that the sense-organs belong to the same category as their respective objects. As such the objection that there is no authoritative Śruti does not hold.

[Verses 395-398 constitute the commentary on the introductory part of BUB 2.4.12.]

एवं मन्तव्य आत्माऽयं तर्कतः प्राग्यथोदितः ।

दुन्वुभ्याद्युक्तदृष्टान्तन्यायमार्गेण यत्नतः ॥३९५॥

आत्मसामान्यसंभूतिलयहेतुसमाश्रयात् ।

आत्मैव सर्वमित्येष प्रतिज्ञार्थः समर्थितः ॥३९६॥

395-396. Thus, the Ātman is to be considered (i.e. understood) as already mentioned, through reasoning with effort, in the light (lit. in the way) of the illustrations that are cited, viz. the drum etc. That all this (world) is the Ātman is justified by taking recourse to the reasoning, viz. the rise and the merger coming commonly from the same source which is similar to the Ātman (the source of the world).

NOTES

Here SP remarks : ‘The elaborate discussion on *mananavidhi* is now concluded.’ But I believe that the word *mantavyaḥ* in verse 395 does not refer to *mananavidhi* as SP would have it, the word *mantavyaḥ* should be paraphrased as *jñeyaḥ*. There is no *mananavidhi* at all.

स्वाभाविकोऽयं प्रलय इति पौराणिका जगुः ।

बुद्धिपूर्वस्तु विलयः सम्यग्ज्ञानैकपूर्वकः ॥३९७॥

397. The Paurāṇikas have declared that this merger is the natural (merger). As against that, the merger preceded by the proper reasoning (about the nature of the worldly existence) is preceded by the right knowledge (of the world etc.)

NOTES

This is a comment on BUB 2.4.12 (p. 335, line 6): *svābhāviko 'yam pralaya iti paurāṇikā vadanti*. There is agreement of the Paurāṇikas with the Upaniṣadic thinkers in respect of this said merger which forms the remaining part of the text. Cf. the *Vāyupurāṇa*, 4.100.135ff.; the *Agniṣpurāṇa*, 368.2 ff; the *Padmapurāṇa*, 13.1.19. Cf. BG 9.7 : *sarvabhūtāni kaunteya prakṛtiṃ yānti māmikāṃ | kalpakṣaye...||*

शक्तिमात्रात्मना स्थानं कार्याणां यत्स्दकारणे ।

इत्यनात्यन्तिकलयो भूयोजन्मकृतक्षणः ॥३६८॥

398. The non-absolute merger consists in that the effects reside in their own cause in the form¹ of efficiency alone and with the fixed condition that they would be produced again.

NOTES

It is stated that the natural merger is different from the merger preceded by knowledge. In the case of the natural merger, the effects get merged into and stay in the cause in the form of its efficiency to produce those effects; but it never steps further, it is non-absolute.

1. Cf. SK 9 : '*śaktasya śakyakaraṇāt...sat kāryam*/'

अतीतानागतेहत्यजन्मनाशादिहेतुनुत् ।

यस्तु धीपूर्वको ध्वंसस्तदर्थेयं परा श्रुतिः ॥३६९॥

399. This (subsequent) part of the Śruti intends to speak the destruction (of the transmigratory existence), which removes the causes of the origin, the destruction etc. of the worldly existence in the past and in the future and which is preceded by proper reasoning (about the real nature of the Ātman).

NOTES

This is a comment on *avidyānirodhadvāreṇa yo bhavati tayārtho 'yam viśeṣārambhaḥ* (BUB 2.4.12, p. 335, line 8).

The destruction of ignorance, which is the cause of the births in three times, is preceded by knowledge.

The Śruti BU 2.4.12 clarifies that knowledge is the means of the destruction.

यथोक्तवस्तुसिद्ध्यर्थं दृष्टान्तोऽयमिहोच्यते ।

यथा सैन्धवखिल्योऽस्तः स्वयोनावुदधाविह ॥४००॥

कठिनोदकविलयमनु खिल्यो विलीयते ।

विलीनस्याद्भ्य उद्धृत्य ग्रहणाय न कश्चन ॥४०१॥

निपुणोऽपि नरः शक्तः खिल्यरूपेण पूर्ववत् ।

सामुद्ररूपान्नान्येन ग्रहीतुं कश्चन क्षमः ॥४०२॥

400-402. In order to prove the matter (already) mentioned is here (i.e. now) stated an illustration¹: As when a lump of salt is thrown into its own cause (viz. the ocean), the lump melts after² gross (i.e. solidified) water has merged (into liquid water). When it (the lump of salt) has melted (in water), even a skilful person is not capable of picking it out of water in the earlier form of a lump. No one is capable of picking it up in a form other than that of sea (i.e. sea-salt).

NOTES

This is an explanation of *sa yathā saindhava-khilya udake prāsta udakam evānuviliyeta na hāsyodgrahṇāyeva syāt . . .* (BU 2.4.12).

1. It was earlier stated in general terms that the world merges into its cause, the Brahman, when there arises knowledge of reality. Now, in order to prove this, the Śruti adduces an illustration.

2. Cf. SP : *kaṭhinodakavilayānantaram liyata iti yojanā*.

[Now follows a paraphrase of *yato yatas tv ādadito lavaṇam eva . . .*, up to verse 409.]

आददीत समुद्राम्भस्तं जिघृक्षुर्यतो यतः ।

ततस्तवस्तल्लवणं वेत्ति खिल्यं न कुत्रचित् ॥४०३॥

403. He may take water from whatever part of the ocean, as he is desirous of taking that lump. But he notices that it is everywhere the salty water, but not anywhere the lump (of salt).

सामुद्रमम्भः खिल्यत्वं याति भानुविपाकतः ।

सिन्धोरायातः स यतस्तस्मात्सैन्धव उच्यते ॥४०४॥

404. Owing to the heating by the sun, the water of the ocean gets the nature of a lump. (And) since it has come from the ocean (*sindhu*), it is called *saindhava* 'originating from *sindhu*'.

NOTES

The second line follows BUB (p.335, lines 9-10) : *sindhor vikārah saindhavaḥ sindhuśabdenodakam abhidhiyate syandanāt sindhuḥ udakam tadvikāras tatra bhavo vā saindhavaḥ*.

असंभिन्नस्वावयवः खिल्यः सोऽथ निगद्यते ।

सोऽयं सैन्धवखिल्योऽस्तौ यथैवेह महोदधौ ॥४०५॥

405. Then it is called a lump, in that no part of it is distinguished (or, separated) from any other; it is this lump of salt that is (said to be) thrown (here) into the big ocean.

NOTES

In the first line is given the meaning of the word *khilya*; cf. BUB (p. 335, line 11) mentions *khila eva khilyaḥ svārthe yat-pratyaya . . .*, "*khila* itself is called *khilya* —in this word the suffix *yat* is used (with the intention of restraining) the original sense". The meaning of the word 'that whose part is not separated' is the grossness due to the parts being mutually combined. The word *atha* means 'in the condition before it was thrown into water, its cause'. After the meaning of the words *saindhava* and *khilya* has been stated, there follows in the second line the meaning of the sentence. The lump of

salt gives up the heat through which it obtained the nature of the lump contradictory to that of water. See the next verse for this. This explanation of Ānandagiri is based on the contents of the following verse.

तेजो विरोधिनीं प्राप्य प्रकृतिं विजहात्यथ ।

तेजोवियोगात्काठिन्यं ध्वस्ती भवति तद्घनम् ॥४०६॥

406. Having entered into its original form (viz. water) which is of the opposite nature, it (the lump) gives up the heat stored within it¹. (Then) owing to the loss of the heat, that (earlier acquired) grossness gets destroyed.

NOTES

This verse states that after the loss of the heat, one should not hold that there would have remained the condition of a lump; it gets destroyed.

1. See the note on the preceding verse.

काठिन्यकारणध्वस्तौ खिल्यस्येह महोदधौ ।

कठिनोदकविध्वंसमनु खिल्यो विलीयते ॥४०७॥

यदेवाकृत्रिमं रूपं तदेवास्यावशिष्यते ।

तेजोवयवसंबन्धसमुत्थं विनिवर्तते ॥४०८॥

407-408. When, in respect of a lump, there is the destruction of the cause of its grossness in the big ocean, the lump (also) melts just in the manner the gross water gets destroyed. There (thus) remains the unacquired form (viz. water of the lump); but that form which had arisen due to its contract with the part of (i.e. some heat) disappears (i.e. gets destroyed).

NOTES

These two verses amplify the briefly stated thought of the preceding verse.

तेजआद्यभिसंबन्धः कारणं खिल्यरूपिणः ।

तद्भावभावतस्तस्य तद्ध्वस्ती ध्वंसतस्तथा ॥४०९॥

409. The connection (of that) with heat etc. is of the cause of (the existence of) the one in the form of a lump. Its existence is owing to the existence of the heat (which is the cause), and likewise its destruction follows the destruction of that (cause).

NOTES

One should not doubt that mere contact with heat is the cause of the existence of the lump of salt, for the earth etc. would also help its formation. This is stated in the first line. But the second line states why the earth etc. are also specifically mentioned as the cause, just like heat. The cause is understood from the method of *anvayavayatireka*.

[Now begins the explanation of *evam vā ara idam mahadbhūtam anantam apāram vijñānaghana eva* (BU 2.4.12); it continues up to verse 416.]

एवं वा अर इत्यस्य कार्यकारणरूपतः ।

प्रतीचो वास्तवं वृत्तं विरुद्धमभिधीयते ॥४१०॥

410. In the statement, *evam vā ara* is stated the real nature of that individual consciousness which is contradictory to its being in the form of the cause and the effect.

NOTES

The verse brings out in full the purport of the illustration (which has been earlier stated in brief). The word *idam* in the passage quoted refers to the natural condition of the individual consciousness which contradicts the cause etc.

अव्यावृत्ताननुगतब्रह्मत्वप्रतिपत्तये ।

महदित्यभिधानं स्यात्कौटस्थ्यार्थं च भूतगीः ॥४११॥

411. For the purpose of understanding the nature of the Brahman which is not differentiated from and followed by anything else, there is the expression (viz. the word) *mahat* and the expression *bhūta* (occurs) for indicating its immutability.

NOTES

The significance of the words *mahat* and *bhūta* is thus clarified.

वास्तवं वृत्तमाश्रित्य प्रतीचः प्राक्प्रबोधतः ।

स्वतःसिद्धस्य विज्ञप्त्यै महदित्यादि भण्यते ॥४१२॥

412. Having kept in view (lit. depending on) the actual state of things, has the Śruti stated (the word) *mahat* etc., for the purpose of making known the individual consciousness which is self-established, (but) before it is realized.

NOTES

This is to avert the doubt that the nature of *mahat* etc. is possible only in the state of liberation.

कारणस्य निषेधोक्तिरनन्तमिति यद्वचः ।

अपारमिति कार्यस्य पारः कार्यस्य कारणम् ॥४१३॥

413. (The use of) the word *anantam* is expressive of the denial of the cause, (and the word) *apāram* is (the denial) of the effect, (since)¹ (the word) *pāra* means the cause of the effect.

NOTES

Now are stated the meanings of the words *ananta* and *apāra*.

1. This answers the objection : 'How is it negated by the word *apāra* that the highest is an effect ?' Sureśvara means to say that as by the word *apūrvā* one negates that the highest has some cause, so does one negate by the word *apāra* that the highest is the effect. Cf. *anaparam* which is also used along with *apūrvam* in BU 2.5.19 : *apūrvam anaparam anantaram abāhyam* . . ., or GK 1.26 : *apūrvō 'nantaro' bāhyō'naparah*.

कारणस्य तथा कार्यमन्तोऽनादेः प्रसिद्धितः ।

जात्यन्तरनिषेधाय विज्ञानघनगीरपि ॥४१४॥

414. In the same way, (we¹ know that) every effect is the end of some cause, (this) from the well-known information about the beginninglessness of the (ultimate) cause (viz. the Brahman). So also,² the word *vijñānaghana* (is used) for 'warding off any other effect being produced.

NOTES

1. One seeks to know how it is possible to negate that the highest (Brahman) is the cause (of this world) by the use of the word *ananta*. And the reply is : A cause should have no beginning, for otherwise it would involve absence of *anvaya* and infinite regress, and have the nature of an effect. And an effect is the end of a cause, because there is an endness in an effect. Clay etc. having got the nature of a pot cannot give rise to a plate, that is to say : The potness is the end of clay and plateness cannot result from it. Then, the word *anapara* is capable of negating that the highest is a cause because of the denial of any effect proceeding from it.

2. This is the meaning of the word *vijñānaghana*. It is clear that an effect being produced is different from knowing (the nature of reality).

क्षेत्रज्ञाकाशयोरेवं कार्यकारणसंगतिः ।

अग्निस्थानीयमैकात्म्यं प्राप्योक्तेर्विनिवर्तते ॥४१५॥

415. Thus is the relationship as the cause and the effect between the individual consciousness and the Ākāśa (viz. Brahman). Obtaining (i.e. understanding) the oneness (of the Ātman and the Brahman) which is comparable to the ocean the awareness of the world outside the Jivātman goes away.

NOTES

The meaning of the word *eva* is stated in this verse.

The oneness of the Jivātman and Īśvara is known from the sentence, 'Thou art that'. Thereby is removed the world which is made up of cause and its effects. Such being the case, the homogeneousness of the Jivātman and the Brahman is ascertained.

कार्यकारणविध्वस्तौ ब्राह्मणैकात्म्यप्रबोधतः ।

न विशेषात्मलाभोऽस्ति खिल्यस्येव महोदधौ ॥४१६॥

416. When (the notion of the individual consciousness and the Brahman as) the cause and the effect is (completely) lost

owing to the realization of the oneness of the Brahman, it (viz. the Ātman) never comes into existence as any particular individual (i.e. Jīvātman) as the lump (of salt thrown) into the big ocean (does not regain any of its property).

NOTES

One might argue that even if the nature of the Jīvātman is lost through knowledge leading to the destruction of the cause and effect relationship, it, i.e. the Jīvātman, may be born again. That would mean there is no final liberation as such. To this is given the following reply : No. The Jīvātman is not reborn because of the absence of the cause. Like the lump thrown into the big ocean Jīvātman which has been once and for all destroyed does not again arise.

[This is an explanation of *etebhyaḥ bhūtebhyah*; it continues up to verse 422.]

तेजःसंबन्धमासाद्य यथाऽम्भः खिल्यतामगात् ।

तथैवाज्ञानभूतेभ्यः परः क्षेत्रज्ञतां ययौ ॥४१७॥

417. As the water has attained the state of a lump after having come into contact with the heat, so also has the highest one come to the state of an individual consciousness though above (i.e. different from) the elements and ignorance.

NOTES

Sureśvara points out that the destruction of the nature of the Jīvātman has come about on the occasion of the destruction of ignorance because the entire non-Ātman is produced from ignorance — this he does in answer to the possible objection that there is the destruction of ignorance owing to knowledge, but not that of the nature of the Jīvātman and of the relation between the Brahman and the Jīvātman being a cause and an effect.

कार्यात्माऽपचयं गच्छन्त्यत्र निष्ठां निगच्छति ।

तानि भूतान्यविद्येति प्राहुस्त्रय्यन्तनिष्ठिताः ॥४१८॥

418. The persons who take their stand on the texts of the Vedāntas have declared as ignorance (*avidyā*). The elements

(*bhūtam*) where the origin (lit. nature) of effects, reducing itself (in qualities), goes down to some other things.

NOTES

An objection could be thus stated: 'Since the word *bhūta* is associated with the elements, how is it said that the highest, the individual consciousness arises from the elements which are of the nature of ignorance?' Sureśvara says in reply to this: That which all effects get merged is the root cause. That is expressed by the word *avidyā* and also by *bhūta*. Cf. Vācaspati's remark : *nāmarūpabijaśaktibhūtamavyākṛtaṁ bhūtasūkṣmam*, as stated by SP; it does not stand to reason that the elements can give rise to the individual consciousness.

परः कारणकार्येभ्य आत्मा पूर्णत्वकारणात् ।

एतेभ्योऽविद्याभूतेभ्यः कार्यकारणतामगात् ॥४१६॥

419. The Ātman is beyond causes and effects on account of its fullness. It becomes the cause of all effects on account of these elements which are (products of) ignorance.

NOTES

One may say that those which give rise to the individual consciousness are causes and effects as well are the elements. To this, this verse is an answer. The Ātman, which is different from the limited (*paricchinna*) cause because of its fullness, is taken as the cause producing all effects owing to the element of ignorance. Cf. the preceding verse which explains *avidyā* as *bhūta*. SP points out that the Ātman is said to have produced effects on account of *mūlāvidyā* 'basic, or natural, ignorance' about the Brahman and also that the word *bhūta* in *avidyābhūtebhyaḥ* means *kārya* in *avidyākārya*.

यतोऽविद्यैव तद्धेतुस्तदुच्छित्तावतो न सन् ।

कार्यकारणभेवोऽयं ब्रह्मास्मीतिप्रबोधतः ॥४२०॥

420. Since it is ignorance that is the cause of it,¹ therefore, when this ignorance is eradicated, the distinction such as the

cause and the effects does not remain (any more) — (this proceeds) from the knowledge 'I am Brahman'

NOTES

1. This is all worldly existence.

तस्मिन्वस्तेऽथ संबोधात्केवलंकात्म्यशेषतः ।

विशेषसंज्ञा नास्त्यस्य पूर्णप्रज्ञप्तिमात्रतः ॥४२१॥

421. When that¹ is destroyed by the knowledge² (arising) from the remainder, viz. the oneness of the Ātman alone, there is no particular awareness for it,³ only on account of the knowledge⁴ that it (viz. the Ātman) is full.

NOTES

Some might say : 'The result of the cessation of difference is voidness.' This verse seeks to refute this.

1. 'Distinction such as the cause and the effect.'

2. Cf. *brahmāsmiṭiprabodhataḥ* in the previous verse

3. See the last remark in SP on verse 420. The word *saṃjñā* means 'awareness'; see verses 437, 444, 448 and 449 below.

4. *prajñāpti* = *prajñāna* = *jñāna*

[Now begins the explanation of the word *samutthāya* (BU 2.4.13), it continues up to verse 429.]

प्रविचारितसिद्धीनि यान्यविद्येत्यवादिषम् ।

एतेभ्यो हेतुभूतेभ्यो भूतेभ्योऽकार्यकारणः ॥४२२॥

कार्यकारणवद्रूपं समुत्थायेति शब्द्यते ।

अविद्यासंगतेरस्य जायतेऽनेकरूपवान् ॥४२३॥

422-423. (That Ātman which is) neither a cause nor an effect, (arising) from these very elements which have become the causes (of the transmigratory existence) and which I have (earlier) mentioned as ignorance and the existence of which cannot be subjected to any examination — becomes described (in the words); having arisen from (the *bhūtas*) in the form of

causes and effects and, owing to its (so-called) association, with ignorance, it becomes possessed of many forms.

चेतनाचेतनाभास आत्मानस्मित्वलक्षणः ।

कार्यकारणरूपेण मिथोपेक्षाश्रयं तमः ॥४२४॥

424. The appearance of sentiency and insentiency has the nature of the Ātman and the non-Ātman, (standing) in the form of causes and effects, (and) thus mutually dependent — this is darkness (i.e. ignorance).

NOTES

Desiring to explain the appearance of the Ātman in manifold forms, Sureśvara points out to the characteristic appearance of sentiency.

कार्यकारणतां यात आत्माऽप्येवं तमोवशात् ।

स्वाभासैर्बहुतामेति मनोबुद्ध्याद्युपाधिभिः ॥४२५॥

425. Having thus reached the nature of causes and effects, due to darkness (i.e. ignorance), even that Ātman attains manifoldness by its limiting adjuncts, viz. *manas* and the intellect etc., (which are) its own appearances.

NOTES

Here, Sureśvara states what follows from the individual consciousness assuming manifold forms due to ignorance. Not only does the Ātman get the nature of causes and effects due to ignorance, but also it comes to possess the nature of a knower etc.

तमोहेतु समुत्थानं न वेद्यीत्यग्रहात्मकम् ।

मिथ्याज्ञानं तमः कुर्वन्दीदृगेव करोति तत् ॥४२६॥

426. Any¹ activity (of the Ātman) originates from darkness (i.e. ignorance). Ignorance produces false knowledge of the nature of non-grasping (of reality, which is expressed in the words) 'I do not know' and that (false knowledge) produces such (further ignorance).

NOTES

All activity of the Ātman is born of ignorance which first causes false knowledge of the form of non-grasping (*agrah-ātmaka*) expressed in words 'I am ignorant, I do not know' and at the same time it causes yet further false knowledge which is similar to it, viz. grasping reality otherwise (*anyathāgraha*).

1. Activity of the Ātman = rise of the Jīvātman.

अविद्याकार्यबुद्धिस्थप्रत्यगाभासरूपवत् ।

बोद्धेत्यादिसमुत्थानं भण्यते परमात्मनः ॥४२७॥

427. What is described as the activity of the highest Ātman, viz. the knower etc.,¹ has the appearance of the individual consciousness residing in the intellect which is the effect of ignorance.

NOTES

1. The word *ādi* refers to the condition of the Jīvātman as the *bhoktr* 'enjoyer', the *kartr* 'agent'. This will be clear from the following verses.

श्रोता स्प्रष्टेतिरूपः स्यात्तथैवेन्द्रियवृत्तिभिः ।

दुःखी गौरो द्विजश्चेति शरीरोत्थानतः परः ॥४२८॥

428. Likewise, he (the highest Ātman) would be having the form of one who listens, one who touches etc., thanks to the (different) organs and their functions. Also, he¹ who is above (i.e. aloof from) the activity of the body, (appears as) miserable, fair and twice-born.

NOTES

1. Cf. BSB 1.1.1 (p. 3):.... *tathā dehadharmān sthūlo'ham kṛśo'ham gauro'ham tiṣṭhāmi gacchāmi laṅghayāmi ceti | tathendriyadharmānmūkaḥ kāṇaḥ klībaḥ badhiraḥ andho'ham iti |*

धनी गोमान्दरिद्रो वा धनाद्यर्थस्मिसंगतेः ।

अतद्वानपि संमोहाद्यथोक्तात्मकतामगात् ॥४२९॥

429. (The highest Ātman) is (described as) wealthy, or possessed of cows or poor owing to his¹ association with objects such as wealth etc. Even, though he does not have that (character) (he has) become known as such due to infatuation.

NOTES

1. 'His' stands for 'that of his body; cf *ātmaśabdo deha-viṣayaḥ* . (SP)

प्रत्यग्यायात्म्यमोहोत्था विरिञ्चोपक्रमा मृषा ।

क्षेत्रक्षेत्रज्ञभेदेन ह्या स्थाणोरुत्थितिर्दृशेः ॥४३०॥

430. The activity of the 'seer' consisting in the distinction as the body and the individual consciousness beginning with the (appearance as a) creator and up to (that of) a pillar is false, as¹ it arises from ignorance about the real nature of the individual consciousness.

NOTES

[This is the explanation of *tāny evānuvinaśyati*; it continues up to verse 436, in 8/9th lines.]

1. The word *hi* emphasises that the cause of falsity is 'ignorance'.

यथावस्तु यदा बोधो वेदान्तोक्तिश्रुतेर्भवेत् ।

तदा नश्यन्ति भूतानि येभ्यः क्षेत्रज्ञतां गतः ॥४३१॥

431. When there results knowledge of the thing (viz. the Brahman) as it is, on hearing the statements of the Vedāntas, then get destroyed the elements¹ (as distinct from the individual consciousness) on account of which the Ātman has got the status of the individual consciousness.

NOTES

1. I.e. the awareness of them as distinct from the Ātman.

स्वरूपलाभमात्रेण सम्यग्बोधोऽखिलं तमः ।

यतो हन्ति ततो नासावभ्यासं प्रति वीक्षते ॥४३२॥

432. Because right knowledge (about the nature of the Ātman) removes total darkness (i.e. ignorance), merely by its rise (lit. acquiring its natural form), it does not look to (i.e. expect) any more repetition (of knowledge-acquiring practice).

NOTES

The verse seeks to set aside the view that the right knowledge depends on repeated practice (of meditation) in order that it destroys ignorance and its effects. Cf. the *Brahmasūtra* 4.1.1 : *āvṛttir asakṛt upadeśāt*.

व्यङ्ग्येत्वर्थेषु नाऽऽवृत्त्या व्यञ्जको हन्ति तत्तमः ।

व्यञ्जकस्य स्वभावोऽयं न प्रयोगमपेक्षते ॥४३३॥

433. The manifestor (viz. the individual consciousness) does not destroy darkness (i.e. ignorance) in respect of things which are to be manifested¹ by repetition (of meditation etc.) Such (indeed) is the nature of the manifestor that it does not have to apply itself to (lit. expect) repeated practice of meditation.

NOTES

There is a suggested illustration of the lamp that illuminates objects once for all, it does not have to repeat the act of illuminating. The Ātman is like the lamp.

1. What are these *vyāṅgyārthas*? Perhaps, there is Śleṣa and *vyāṅgyārthas* refer to (i) the objects in the world (as false) and (ii) the objects of the world to be brought to light by the lamp.

2. For the word *prayoga* see NKL (p. 902) : *prayogam abhyāsakriyām iti yāvat*.

मोहतत्कार्यनीडो यस्तस्याज्ञानसमन्वयात् ।

प्रत्यगात्माऽपि तद्ब्रह्म परोक्षमभवन्मुखा ॥४३४॥

तद्ब्रह्मयतस्त्वोऽपि तदसम्बोधहेतुतः ।

आत्मा संसारितां यातो यथा काष्ण्यं वियत्तथा ॥४३५॥

434-435. Even for the individual consciousness, who is the abode of infatuation (i.e. ignorance) and its outcome owing to the inherent relation to ignorance, the Brahman becomes falsely beyond perception. In the same way, that Ātman becomes possessed of the transmigratory existence on account of not knowing its nature, although there is no other Truth beside itself (this happens) as the sky (becomes) dark¹.

NOTES

The verse 434 anticipates the objection : If ignorance is abandoned due to the rise of knowledge of the oneness of the Ātman, then because of the ever non-existence of this oneness : (i) How can one say that the Brahman is beyond perception, since the Brahman is held as identical with the individual consciousness which is directly perceptible. (ii) Also, how can one say that the Ātman is transmigratory, though the Ātman is identical with the Brahman which is non-transmigratory. And this is the reply : (i) is not fault, for it is ignorance that makes one feel the Brahman as not directly perceptible. Cf. the Śruti : *yat sākṣād aparokṣād brahma* (BU 3.4.1, 3.5.1); "The Brahman that is immediate and direct." Verse 435 refutes (ii) as stated in the note on the previous verse. The illustration of the sky becoming dark, i.e. getting to possess the quality of darkness is owing to the onlooker's misconception. Cf. BSB 1.1.1 (p. 2): *apratyakṣe 'py ākāṣe bālās talamalinatāyāmadhyasyanti*.

आत्मनो ब्रह्मता यस्माद्ब्रह्मणोऽप्यात्मता स्वतः ।

तमोमात्रान्तरायत्वात्तद्व्यस्तावेव साऽऽप्यते ॥४३६॥

436. Since the Ātman has the nature of the Brahman and the Brahman, of the Ātman in its own right, therefore, on account of eradication of the obstruction, viz. merely darkness (i.e. ignorance) (of the true nature of the Ātman), is attained that (oneness of the two).

NOTES

The purport of the passage *tāny evānuvinaśyati* is concluded in this verse. When knowledge of the true nature of the

Ātman arises, ignorance is eradicated. And the Brahman shines in its own form.

[This is the meaning of *na pretya samjñāstity are bravimīti hovāca yājñavalkyaḥ* (BU 2.4.13); it continues up to verse 444.]

सर्वमात्मेतिसम्यग्धीजन्मनंवाखिलं तमः ।

ध्वंसमेति ततः संज्ञा नाविद्योत्थाज्ज्वलिष्यते ॥४३७॥

437. The total darkness (i.e. ignorance) is destroyed merely by the rise of the right knowledge (in the form), 'all (this) is the Ātman'. And then, there does not remain any awareness (etc.¹ for the Ātman) arising from ignorance.

NOTES

1. This is most probably in the form, 'I am this; I have this name,' etc.

सदोत्पन्नाऽऽत्मनि मितिरुत्पाद्याऽकारणादिधीः ।

कारणादिधियः पूर्वं प्रतीचि ब्रह्मधीस्ततः ॥४३८॥

438. The knowledge¹ is ever-existent in the Ātman. The knowledge that (the Ātman) is not the cause etc. is to be effected (lit. produced). The (various) knowledge of the cause etc. on the part of the individual consciousness (occurs) first (lit. before, i.e. in the beginning) and the knowledge that it is only the Brahman (occurs) later.

NOTES

The objector might ask: 'When the knowledge of the Ātman arises, how is it that there remains no awareness (of name etc.) The reply is: The awareness such as 'I am the agent of this action' etc. on the part of the Ātman is accepted by everyone as a general rule, but the knowledge that 'the Ātman is non-agent' is created by the statement of the Śruti. Moreover, by the knowledge of the oneness of the Ātman, from the statement of the Śruti, the awareness of the agentship is destroyed at first and then the awareness in the individual consciousness, viz. it is the Brahman, is destroyed—just as the fire burns out when it is without any fuel.

l. *mati* = *jñāna*.

अपास्ताशेषभेदस्य यद्रूपं भेदवद्गतम् ।

तज्ज्ञानेनैव तज्ज्ञातं तदन्यानवशेषतः ॥४३६॥

439. Only by the (proper) knowledge of that which is known as the form consisting in variety of that (consciousness) whose all variety has been set aside (i.e. thrown away as unreal) becomes known that (viz. consciousness, since there does not remain anything else than itself.

NOTES

A question arises: 'How does one grasp that there does not remain anything else than the Ātman that is wholly devoid of variety? For, it is heard that *ākāśa* etc. exist apart from the Ātman.' The reply is: True, that nature of the homogeneous individual consciousness possessing difference like ether (*ākāśa*) etc. is known only by the knowledge of the individual consciousness and that is the effect of ignorance alone. So, when the notions about the Ātman regarding his agentship etc. are removed, all so-called difference such as ether etc. is also destroyed. And there remains consciousness alone.

अहेतुफलरूपेण प्रतीचा तद्विलक्षणम् ।

कार्यकारणवज्जगध्वा द्रष्टवैकोऽवशिष्यते ॥४४०॥

440. Having become one with (lit. eaten) is which consists in causes and effects and which is in characters different from the individual consciousness that has the nature neither of cause nor of effect, the seer (i.e. the Ātman) remains alone.

प्रत्यङ्मात्रेक्षणादात्ममोहतज्जनिराकृतेः ।

असंभवाद्वितीयस्य स्यामपूर्वादिमानहम् ॥४४१॥

441. Since, on thinking of (lit. seeing) the individual consciousness alone, there is removal of infatuation (i.e. ignorance) about the Ātman and its (i.e. of the ignorance) products and therefore there is no possibility of a second

existence, (there remains the thought;) may I be one without any beginning etc.

NOTES

One might think that since the individual consciousness is declared to be one thing, it can have the nature of cause as well as effect; this is totally averted.

व्यपेततमसस्तत्त्वमागमापायसाक्षिणः ।

ज्ञानेन गम्यते साक्षात्तावन्मात्रानुरोधिना ॥४४२॥

442. The Truth of the Ātman from whom has (all) darkness (i.e. ignorance) withdrawn and who is the witness of the appearance and the disappearance (of the worldly objects) is known by the knowledge which is in keeping with that (Ātman) alone.

NOTES

This verse conveys that it is not possible to remove ignorance of the Jīvātman by means of knowing of a pot etc. that cannot be the witness (*sākṣin*).

दृष्टिमात्रात्मयाथात्म्यात्कार्यकारणवस्तुनः ।

नाज्ञातं किञ्चिदप्यस्ति नानपास्तं तमोऽप्यतः ॥४४३॥

443. There is nothing unknown (that is other) than the real nature of the Ātman which consists only in seeing itself, and which (in reality) is (the thing at the basis of) causes and effects. And darkness (i.e. ignorance) also does not remain unremoved by this (i.e. the knowledge of the individual consciousness).¹

NOTES

Here is shown the difference between the knowledge of the individual consciousness and that of a pot etc.

1. Cf. *ataḥśabdena pratyagjñānoktiḥ*. (SP)

क्षेत्रज्ञेश्वरभेदेन संज्ञा नैवेह विद्यते ।

तद्वेतौ तमसि ध्वस्ते कुतः संज्ञाऽनिमित्ततः ॥४४४॥

444. There does not exist here (i.e. in the state of knowledge)¹ any awareness of the distinction as the individual consciousness² and Īśvara (the Brahman). (For) when the cause of that, i.e. darkness (i.e. the ignorance), is destroyed where could there be (such) awareness which has no cause (to effect it)?

NOTES

1. Cf. *iheti vidyāvasthoktiḥ*. (SP)
2. *kṣetra = pratyag, Īśvarā = brahman*.

संज्ञा प्रेत्याऽऽत्मनो नास्तीत्येतच्छ्रुत्वा त्वचूचुदत् ।

शङ्कुमानाऽऽत्मनो नाशं मंत्रेयी पतिमादरात् ॥४४५॥

445. On listening, “After departure, there is no awareness of one (‘I am such and such etc.’),” Maitreyī feared the destruction of her own self and through reverence (or, with a little fear) implored (lit. goaded) him (with a question).

विज्ञानैकघनोक्त्या च निःसंज्ञवचसा तथा ।

उक्त्योर्मिथोविरुद्धत्वादात्मा मोमुह्यते मम ॥४४६॥

446. By the statement that the Ātman is a mass only of consciousness and also by the statement that there is no (more) consciousness (after death) which are mutually opposed, my mind (lit. Ātman) is in (great) infatuation (i.e. feels great apprehension).

NOTES

This explains *mā bhagavān amūmuhan na pretya samjñāstīti* (BUB 2.4.13).

[Now follows up to verse 452 the explanation of *sa hovāca vā are 'ham moham bravimi* (BUB 2.4.13).]

अविरुद्धं सुविस्पष्टं मया तुभ्यं प्रभाषितम् ।

स्वापराधात्तु मद्वाक्यं विरुद्धार्थं त्वमीक्षसे ॥४४७॥

447. (Yājñavalkya answered) “I have told you (what is) non-contradictory and clear. But you understand (lit. see) my say as involving contradictions on account of your own fault.

विज्ञानंकघनोक्त्याऽहं कृत्स्नैकात्म्यं तवावदम् ।

संज्ञानाशेन चाविद्याहेतुत्थापह्नुति तथा ॥४४८॥

448. "In the statement 'the Ātman is a mass only of consciousness,' I have declared to you the complete oneness (of the Jīvātman) with the Ātman and by (the statement of) the absence of awareness (of name, form etc., I have declared) likewise the overpowering (lit. covering), (of reality) arising from ignorance."

विशेषसंज्ञा याऽस्याभूद्विज्ञानात्मादिलक्षणा ।

सम्यग्धीध्वस्तमोहस्य सा कृत्स्ना विनिवर्तते ॥४४९॥

449. Whatever special awareness there was spoken of the Ātman as characterized by some definite knowledge etc.¹, all that (awareness) disappears (from it) whose infatuation (i.e. ignorance) is destroyed by the right knowledge.

NOTES

This is reiteration of the idea in the latter half of the previous verse.

1. *jñātrtva* of the Ātman in relation to *jñeya* 'knowable (object) beside it; cf. verses 427 and 435 above—this refers to the Ātman's discrimination between one object and another.

यत्त्वपारमनन्तं च वास्तवं ज्ञानमात्मनः ।

कूटस्थं तत्स्वतःसिद्धेस्तत्कस्माद्विनिवर्तते ॥४५०॥

450. The knowledge on the part of the Ātman which does not produce any (later) existent effect¹ endless and immutable, since it is self-established, how can it (ever) disappear ?²

NOTES

1. Cf. verse 413 and note thereon.
2. I.e. get removed by any cause.

इतीममर्थं भार्यायै याज्ञवल्क्योऽभ्यभाषत ॥४५१॥

कार्यकारणनाशोऽपि स्वतःसिद्धमनन्यगम् ।

यद्वस्तु तद्वत् स्वात्मसंवित्त्यै निरपेक्षतः ॥४५२॥

451-452. Such a thing did Yājñavalkya speak unto his wife. That thing which is self-established and which is without anything else¹ is, even when there occurs the destruction of (the notion regarding) the cause and effect (relation), capable of making itself understood independently (of anything else).

NOTES

This is an explanation of *alam vā ara idam vijñāya* (BU 2.4.13).

1. The text reads *ananyamam*, qualifying *tad vastu*. It is difficult to make out its sense. Possibly the correct word could be *ananyagam* 'which does not follow any other', that is to say 'which is one without a second' . . . cf. the *Bṛhadāraṇyakavārti-kaśāra* 2.4.163 (p. 1523).

[This is the significance of *yatra hi dvaitam iva bhavati* (BU 2.4.14); it runs up to verse 464.]

यत्राज्ञातात्मतत्त्वात्माऽविद्यासंवीतशेषुषिः ।

तत्र मिथ्याग्रहग्रस्तो द्रष्टृदृश्यादिभेदधीः ॥४५३॥

453. Whoever is one that has not known the Truth of the Ātman and has the intellect overpowered (lit. wrapped) by ignorance; is overwhelmed by wrong knowledge and has the notions of distinction such as the seer, the object of the seeing etc.

यत्राज्ञातात्मयाथात्म्यस्तत्तमोपिहितेक्षणः ।

तत्राविद्योत्थबुद्ध्यादिगुणभूतात्मविघ्नरः ॥४५४॥

454. The person, who has not known the real nature of the Ātman, has eyes covered by darkness (i.e. ignorance) about that, understands the Ātman as being possessed of properties such as the intellect etc. which have arisen from ignorance.

अविद्यामात्रशेषत्वं जगतः प्रागवादिषम्

नर्तेऽविद्यां कार्यमिदं हीति हेतावतः पदम् ॥४५५॥

455. I have already declared that the world is the product of ignorance alone; there would not be this effect, (viz. the world) without ignorance. The word *hi* is used for indicating the reason.

NOTES

The purport of the passage from the BU is already stated; now, the meaning of the word *hi* is explained. Cf. BUB (p. 340, line 9) : *hi yasmāt*.

सतोऽभिव्यञ्जकं मानं स्वभावोऽयं मितेर्भवेत् ।

अविद्यायाः स्वभावोऽयं यदसत्करणं मृषा ॥४५६॥

456. The means is that which manifests the existent——— such is the nature of the (right) knowledge. But the nature of ignorance is such that it falsely creates that which is non-existent.

NOTES

The world is (i) existent, or (ii) non-existent. If (i), there would be no use of ignorance. If (ii), how is it possible to see the non-existent through ignorance—this doubt is removed by means of illustration.

The nature of knowledge and that of ignorance are clarified in contrast. Knowledge is that which manifests what is existent. Ignorance gives rise to what is non-existent.

उक्तहेत्वर्थदीप्येतद्वीति तस्य निपाततः ।

द्वीतं द्विधेतमेकं सत्तद्भावो द्वैतमुच्यते ॥४५७॥

उपमार्थं इवेत्येतद्भवतीति क्रियापदम् ।

तत्रैव विद्यावस्थायां संज्ञेयं युज्यते मृषा ॥४५८॥

457-458. This¹ word *hi* is to clarify the thing which has been already stated on account of its being an adverb. (The² word) *dvitam* is explained as *dvidhā itam* 'that which, being one has proceeded in two ways'—the nature of that is *dvaita*. The word *iva* is for conveying the sense of comparison. (The word) *bhavati* is a verbal form. In that, viz. in the condition of ignorance, is this name falsely used.

NOTES

1. The question, 'How can one say that the word *hi* clarifies its reason ?' is answered thus : Since the world is caused by the nature of being the seen etc., it is nothing but the product of ignorance like a serpent in a rope.

2. The second line of verse 457 and verse 458 explain *yatra hi dvaitam iva bhavati* (BU 2.4.14).

ननु द्वैतमिवेत्येतदुपमानं कथं भवेत् ।

द्वैतं वस्तु न चेदस्ति सर्वस्यैकात्म्यमात्रतः ॥४५६॥

459. One might object : How can (the words) *dvaitam iva* serve as the standard of comparison, for all this is but one Ātman and therefore there is no duality (or, lit. nothing else beside one reality) ?

NOTES

The *upamāna-upameya* relation is impossible in case there exists but one thing.

नैष दोषो यतो दृष्ट एकस्मिन्नपि वस्तुनि ।

उपमेयोपमाभावो दिग्धीरिव विहायसि ॥४६०॥

रामरावणयोर्युद्धं रामरावणयोरिव ।

यथा प्रसिद्धो जगति तथैवेहापि गम्यताम् ॥४६१॥

460-461. (The answer is :) This is not a fault, because the relation of the standard of comparison and the object of comparison is noticed even in the case of only one thing—thus, for example, it is there in the case of the sky where there is the notion of different quarters. As there is the example known in the world, viz. the fight between Rāma and Rāvaṇa was like that between Rāma and Rāvaṇa, so also may be understood (the relation of comparison and the object of comparison) in this case as well.

NOTES

Even in the absence of a thing different from the Ātman, the word *iva* can be used for the sake of comparison. The

notion of different quarters which is known about just one and unique sky is an example. It should be borne in mind that *sādharmya* can be spoken of only two different things—cf. *sādharmyam upamābhede* (the *Kāvyaprakāśa* 10.1). Likewise, even if there is no duality in respect of the Ātman, it is possible to say that the Ātman appears to be manifold. Cf. *ekam sat viprā bahudhā vadanti* (the *Rgveda* 1.164.46).

Another illustration is given to prove the same in verse 461. One should remember that there is the idea of similarity volitionally conceived of—the purport is to point out the incomparableness of the thing (*ananvaya*). Cf the *Kāvyaprakāśa* 10.5 *vr̥tti* : *upamānāntarasambandhābhavo'nanvayaḥ*. The basic idea in *ananvaya* is *anyasadr̥śavyavaccheda*.

अद्वैतात्परमार्थाद्वा मायाद्वैतमपीष्यते ।
तेनोपमार्थसंसिद्धेर्यथा स्वप्नेन्द्रजालयोः ॥४६२॥

462. Or, from the non-duality which is the highest reality is understood the false duality also, for thereby is established the idea of comparison as in the case of sleep and the show by a magician.

NOTES

Sureśvara points out that the duality spoken of is not really existent, it is imagined to be so. Thereby, he wants to establish the propriety of the comparison used by the Śruti as in BU 4.3.10; MaiU 4.2, 7.10; GK 3.29 ff. etc. The use of similes based on experiences in the dream and in the magic show only help to point out the unreality of the non-Ātman. Read SP : *kalpitadvaitenopamāsiddhiṃ sphuṭayati*.

मिथ्येव भाति सत्योऽपीत्यापि लोकेऽभिधीयते ।
मिथ्याभावो न नास्तीति वक्तुं कश्चिदपि क्षमः ॥४६३॥

463. It¹ is said in the world that even² a real thing appears to be false; (and³) no one can ever say that there is no unreality.

NOTES

1. This verse is an answer to the doubt : 'How can the

false duality of sleep etc. be the illustration of the real Ātman ?'

2. The word *api* implies that the false thing also appears to be real. According to SP, the second *api* is used for giving the two arguments in the Śruti.

3. This part of the verse seeks to obviate the possible question : 'Because of invariable concomitance in the form that whatever is visible is unreal, how can one say that a false (unreal) thing does not exist ?' The answer is : They often establish the contradiction and sublation of falsity by Truth.

समस्तव्यस्ततारूपं यो वक्षतीहाऽऽत्मनः श्रुतेः ।

तत्पक्षस्य निषेधोऽयं यत्र हीत्यादिनोच्यते ॥४६४॥

464. This statement, *yatra hi* ... (BU 2.4.14), is the refutation of the view of one who propounds, on the basis of the Śruti¹, that the Ātman has a condition (consisting) in whole and its parts.

NOTES

This is the purport of *yatra hi* ... , that is to say : Seeing duality is possible only in the condition of ignorance, not otherwise. It is only through ignorance that one would talk of creation of the universe from the Brahman (= Ātman). Or, in other words, one would consider the Brahman (= Ātman) as a whole and the various objects its parts.

1. Cf. PU 4.9 : *eṣa hi draṣṭā spraṣṭā śrotā* ... "And this one is the seer, the feeler, the hearer ...", also BU 2.4.6 : *idaṁ sarvaṁ yad ayam ātmā* "All this is what is this Ātman."

[This is the meaning of *tad itara itaraṁ jighrati* ... *tad itara itaraṁ vijānāti*; it continues up to verse 468.]

तस्यामविद्यावस्थायां स्वप्नावस्थां गतो यथा ।

घ्रातेतरः सन्नितरं गन्धं घ्राणेन जिघ्रति ॥४६५॥

465. In that condition of ignorance, a person like the one who is in the dream-state, smells a thing by the sense of smell, being different from that which is smelt.

घ्रातृघ्रेयाभिसंबन्धाद्घ्राणाद्याहृतिरिष्यते ।

जिघ्र तीत्यपि निर्देशः क्रियातत्फलयोर्भवेत् ॥४६६॥

466. It is on account of the connection of one who smells and that which is smelt one that one understands the statement about the act of smell etc.¹ Also, the expression *jighrati* can become the mention of both the action and its result.

NOTES

One might doubt that the expression *ghrāṇena* is not proper, because we hear words which have the meaning of the agent, the object of action and the action. The first line of the verse states the purport of BUB (p. 341, line 6): *itara itaram iti kārakapradarśanārtham . . .*, "The words *itara itaram* are used to show the functionaries." Yet, one might ask 'what is the fruit?', for it is not intended here there is no word denoting that.

1. The word *ādi* conveys to us the idea of all that causes contact with objects in respect of *ghrāṇa*.

उत्तरेष्वपि वाक्येषु योजनेयं यथोदिता ।

प्रत्यगज्ञानमात्रोत्थं ग्राहकाद्यत्र भण्यते ॥४६७॥

467. In the subsequent sentence also is applicable what is here, thus stated. (Indeed) the statement about cognizer etc. is made as it does arise merely from ignorance about the individual consciousness.

NOTES

The first line states that the subsequent passages *tad itara itaram paśyati . . .* should also be explained in the same manner as the statement *tad itara itaram jighrati* is explained. In the second line concludes the meaning of the passage *yatra hi dvaitam iva bhavati tad itara itaram jighrati . . .*

क्रियाकारकसंज्ञाया विषयोऽयं समीरितः ।

अतोऽविद्यासमुच्छित्तावियं संज्ञा निवर्तते ॥४६८॥

468. (All) this matter is discussed in respect of the name,

viz. action and that which helps action. Therefore, this name vanishes when there is the eradication of ignorance.

[Now begins the explanation of *yatra vā asya sarvam ātmaivābhūt tat kena kaṁ jighrati—tat kena kaṁ vijāniyāt* (BU 3.4.14); it continues up to verse 478.]

विज्ञानघन इत्युक्तेविषयोऽयमथोच्यते ।

यत्र वा इति वाक्येन ध्वस्ताविद्ये विपश्चिति ॥४६६॥

469. Then is discussed the matter mentioned in the words *vijñānaghana*, in the sentence *yatra vā*, in respect of the wise (knower) whose ignorance has been destroyed.

यत्र त्वस्याऽऽत्मनोऽज्ञस्य शास्त्राचार्यप्रसादतः ॥४७०॥

प्रत्यग्याथात्म्यविज्ञानभास्वद्भास्करदीधिति-

संप्लुष्टनिखिलाविद्ये तत्र कः केन किं वद ।

जिघ्रैदेकात्म्यमात्रेण सर्वस्यास्याऽऽत्ममात्रतः ॥४७१॥

470-471. But where, that is to say, in the case of one who is ignorant about the Ātman and whose entire ignorance is destroyed by the rays of the bright sun in the form of the knowledge of the true nature of the individual consciousness through the favour of the exponent (lit. preceptor) of the Śruti, tell me, who could smell what and with what? (I ask this,) because to him all this is the Ātman alone on account of (i.e. through the fact that there is) oneness (of reality).

NOTES

Sureśvara refers to the other reading *yatra tv asya* in place of *yatra vā asya* (*sarvam ātmaivābhūt*) of BU 2.4.14. This *yatra tv asya* is noted in BUB (p. 342, footnote no. 1).

षष्ठगोचरवत्सर्वं कार्यकारणवज्जगत् ।

ध्वस्तात्मान्ध्यस्य विदुषः सम्यग्ज्ञानोदये भवेत् ॥४७२॥

472. All (this) world (which is) made up of causes and effects, would become like the world which falls within the range of the sixth sense-organ, viz. *manas*,¹ when there arises the right knowledge on the part of one whose blindness as regards the true nature of the individual consciousness is destroyed.

NOTES

Doubting that, when all the agents are the Ātman and nothing else, the nature of the existent is only like that, he concludes the purport of *sarvam ātmaivābhūt*.

1. The word *ṣaṣthagocara* is used in Nais 1.30, 2.114 and Cand explains it as the *pramāṇa* called *abhāva* in 1.30, otherwise as *asat* in 2.114, cf. further HIRIYANNA's note on Nais (p. 220), HACKER, *op. cit.*, p. 39 footnote. It is nevertheless uncertain if this could be correct, inasmuch as, in Śaṅkara's time, *abhāva* (*anupalabdhi*) was not considered as a *pramāṇa*—Śaṅkara accepted only three *pramāṇas*, i.e. *śabda*, *anumāna* and *pratyakṣa*. In fact, BSB 2.1.2 (p. 436) reads *ṣaṣṭhasyaivendriyārthasya na smṛtir avakalpate* which shows *ṣaṣṭha* to refer to *manas*. And, as such *ṣaṣthagocara* may better be paraphrased as *manogocara*. It is, therefore, doubtful that Sureśvara, a direct disciple of Śaṅkara, accepted *abhāva* as a *pramāṇa*.

अव्यावृत्ताननुगतमतिहेतु सदैकलम् ।

विज्ञानधनमानन्दमैकात्म्यं व्यवतिष्ठते ॥४७३॥

473. There remains only the oneness which is not differentiated and followed by anything else, beyond cause, ever alone, a mass of consciousness, and bliss.

NOTES

One might say that, like duality, non-duality could also be insignificant. Therefore, Sureśvara asserts that there remains just the oneness which has neither particularity nor generality and which is self-luminous. In other words, duality ends into what is not void.

ग्राहकादिविभागोऽत्र नास्ति तद्वैतसम्भवात् ।

चिन्मात्रस्य स्वतः सिद्धेर्विज्ञानधनगीरतः ॥४७४॥

474. Distinction (lit. division) (of reality) such as a knower etc. does not exist here¹ owing to the impossibility of there being any cause of that (ignorance). Since consciousness, one (without a second), is self-established, there is the word (of the Śruti) *viññānaghana* (about it).

NOTES

Sureśvara asserts here that the Ātman is self-luminous and therefore does not fall within the purview of the usual knowing mechanism such as the knower, the means of knowing etc.

1. This refers to the state of pure knowledge on the part of the individual consciousness; *atreti vidyāvasthoktā* . (SP)

आत्माविद्यामनाश्रित्य कारकत्वं न लभ्यते ।

कारकं चानपाश्रित्य न क्रियेह प्रसिध्यति ॥४७५॥

475. Here (i.e. in the worldly dealings) the character of an agent (on the part of the individual consciousness) is not noticed (lit. found) by one who has not resorted to ignorance about the Ātman. And there is no activity established without resorting to (the character of) agent.

NOTES

It is possible to translate the first line of this verse in two alternative ways which depend upon two translations of the word *kāraakatva*: (i) the character of an agent and (ii) the character of a means. The translation above is in keeping with the alternative (i); the other translation of the first line in keeping with the alternative (ii) is thus: In the worldly dealings the character of a means of knowing is not noticed by one in what has not depended on ignorance about the Ātman. Cf. SP: *kriyākāraakavyavahārah saptamyarthaḥ*, where *saptami* means *adhikaraṇārthaḥ*.

अन्तरेण क्रियां तद्वत्फलं नैव प्रसिध्यति ।

कारकाद्यात्मना सेयमविद्यैव प्रकाशते ॥४७६॥

476. Similarly, no result is ever secured without some activity. Thus, in the form of the different *kāraakas* this ignorance itself manifests (to one).

NOTES

One might argue that a result could be obtained only through activity which involves the thought of *kāraakas*, i.e. of duality. But Sureśvara argues that the notion of different *kāraakas*

proceeds only from ignorance about the true nature of the Ātman.

यत एवमतोऽविद्यासमुच्छित्ताविदं जगत् ।

व्याकृताव्याकृतं कृत्स्नमात्मतामेति बोधतः ॥४७७॥

477. Because this is so, there being complete eradication of ignorance, the entire world, manifest and/or unmanifest, becomes one with the Ātman, through knowledge (of the real nature of it).

NOTES

Once again, Sureśvara asserts the absence of any division of this world into the agent, activity etc.

भूयोऽपि लभते संज्ञां लीनं सत्कारणात्मनि ।

जगदेतद्यथा तद्वन्नाविद्याविलये भवेत् ॥४७८॥

478. As this world which has (earlier) merged into its existential cause once again gets the awareness (that it exists etc.), so does it not get that awareness in case there is the disappearance of ignorance.

NOTES

One might argue that, as at the end of the dream state, a person may become aware of duality. Sureśvara does not tolerate this idea of similarity between dream state and the experience of reality. Once ignorance is destroyed, there is no return of worldly existents.

[This is the clarification of *yenedam sarvam vijānāti tam kena vijāniyāt*; it continues up to verse 482.]

ज्ञानोत्पत्तौ न संज्ञाऽस्तीत्यास्तां तावदिहाऽऽत्मनः ।

अपि सत्यामविद्यायां न संज्ञाऽस्त्यात्मनीदृशी ॥४७९॥

479. If one says, there cannot be any awareness on the part of the Ātman (viz. I am this etc.) when there arises the knowledge; our answer is: Let that be so, for even when there is ignorance, on the part of the Ātman, there¹ does not exist any

awareness on its part which is like this (viz. dependent on division such as the agent, the activity etc.).

NOTES

The word *idr̥ṣi* means 'that which cognizes the difference such as a cognizer etc.'

ग्राहकादि जगत्सर्वं येन कूटस्थसाक्षिणा ।

लोकः सर्वो विजानाति जानीयात्केन तं वद ॥४८०॥

480. Tell me by what means one should know that one, the immutable witness through whose help people know this whole world, the perceiver¹ etc.

NOTES

Sureśvara puts a rhetorical question only with the intention of asserting that the witness of all is in every condition but the Ātman. Cf. Ānandagiri on BUB (p. 343) : . . . *taṁ sākṣiṇaṁ kena karaṇena ko . . . jāniyād . . .* /

1. *grāhaka-* = *indriyeṇa grāhaka-*

अचेतने जगत्त्यस्मिन्साक्ष्येवैकोऽत्र चेतनः ।

ग्राहकादिर्न तत्रापि साक्षिसिद्धावपेक्ष्यते ॥४८१॥

481. In this insentient world, the sentient one alone is the witness. But even that being so, the division such as the knower etc. is not expected for proving (the existence of) the witness.

NOTES

The first line affirms that even in this world of ignorance, a witness is only a sentient being that is unchanging. And the second line points out that, though there is sentient being alone that grasps the oneness of the Ātman, it is independent of any means etc. unlike the sentient being in the world of ignorance.

संज्ञेयं किमु विध्वस्तसंसारानर्थकारणे ।

उदितैकात्म्ययाथात्म्यसम्यग्ज्ञानदिवाकरे ॥४८२॥

482. How could be there this awareness when the Sun (lit. the maker of day) of the right knowledge of the true nature of the Ātman, viz. of its oneness, has arisen and which is the cause of destruction of evil, viz. the transmigratory existence?

NOTES

This clarifies the sentence *yenedam sarvaṃ*—which was earlier indicated by the word *api* in *tatra api* of the previous verse. Since there does not exist any other witness than the Ātman, there is no notion of difference such as the perceiver etc.

बोद्धारमपि चापेक्ष्य न संज्ञा प्रत्यगात्मनि ।

बोद्धृतज्ज्ञानविषयैर्न बोद्धा गृह्यते यतः ॥४८३॥

483. Referring to the knower also, there is not an awareness (viz. I am this etc.) in respect of the individual consciousness, because the knower is not (i.e. cannot be) understood by the usual relation of the knower, the object of knowing.

[This explains *vijñātāram are kena vijāniyāt* in 11th line.]

अविचारितसंक्षिप्तिः प्रमात्रादिस्वलक्षणा ।

संज्ञेयं प्रथते मोहान्तत्वसौ वस्तुनिश्चितौ ॥४८४॥

484. This awareness, which has its own characteristics consisting in the knower etc. and (whose proof is) established (even) without any thought, (is) well-known on account of infatuation (i.e. ignorance). But (certainly) it does not get established when there is an ascertainment of reality (i.e. Ātman).

यत एवमतः सिद्धं दर्शनं प्रत्यगात्मनः ।

श्रुत्यादिसाधनं साक्षात्सर्वमात्मेत्युदीरितम् ॥४८५॥

485. Since this is so, therefore, the understanding (lit. seeing) of (the true nature of) the individual consciousness is established. And there (in the Śruti) is there a proof mentioned (in the words), 'All this is the Ātman'.

NOTES

Thus is concluded the purport of the section. It has been ascertained that the dealings proceed from difference which can be found only in the condition of ignorance. Also, it is established that what has been stated to be the direct perception of the individual consciousness dependent on hearing etc. is the means to liberation along with renunciation.

BRHADĀRANYAKOPANIṢAD- BHĀṢYA-VĀRTIKA

(BUBV 2.5)

मधुब्राह्मणम्

BUBV 2.5 is the concluding *brāhmaṇa* 'section' of the Madhukāṇḍa (BU chh. 1-2). Here Sureśvara confirms and assures that the Madhukāṇḍa constitutes the essence of ŚatBr. The Kāṇva-recension of ŚatBr consists of 17 *kāṇḍas* 'books'. The first two *adhyāyas* of the 17th book of it are called BĀ and then following six *adhyāyas* thereof, viz. BĀ chh. 3-8, are called BU. The first two chapters of BU, viz. BĀ 3-4, are called the Madhukāṇḍa. [To be precise, tradition calls BU chh. 3-4 (BĀ chh. 5-6) the Yājñavalkyakāṇḍa (or Munikāṇḍa) and BU chh. 5-6 (BĀ chh. 7-8) the Khilakāṇḍa.¹]

नमोऽसाधारणज्ञातृज्ञानज्ञेयात्मबोधने ।

जग्धाशेषमहाविद्यातज्ज्ञानार्थाय विष्णवे ॥१॥

[Sureśvara begins this last section of the Madhukāṇḍa (viz. BU 2.5), with a *maṅgalaśloka*.² SP points out the alternative purposes of this *maṅgala*: (i) In keeping with the tradition which Patāñjali has noted in his *Mahābhāṣya* regarding the *maṅgalācaraṇa*, viz. *maṅgala* should be observed even in the middle of a Śāstric text, as in the beginning and at the end of it; or (ii) the earlier two sections have clarified the meanings of the different words in the Śruti and now begins an exposition of the purport of the 'sentence' in the same. This necessitates the *maṅgalācaraṇa*; or (iii) *maṅgala* marks the conclusion of the Madhukāṇḍa.]

1. BUB p. 369, lines 1-2; p. 697, line 7; ABUB p. 369, lines 1-3; p. 697, lines 8-9; BUBV 3.1.1-2 and 4-5; 5.1.1-2.

2. Actually BU 2.6 which follows this section is described as the ending section of the Madhukāṇḍa, but it consists of only six verses and states nothing significant; see Appendix.

Salutation to Viṣṇu¹ who is possessed of the uncommon nature of (the triad, viz.) knower, knowing and object of knowing,² who knows his own nature, (and) who destroyed (lit. devoured) the extensive Ignorance³ and the evil resulting therefrom in their entirety. [1]

¹Though this is the name of a god, it can be understood in the sense of the individual consciousness, this sense being derived from root *viṣ* 'to pervade' (the entire body).

²Cf. BG 18.18: *jñānam jñeyam parijñātā trividhā karma-codanā/ karaṇam karma karteti trividhaḥ karma-saṁgrahaḥ*||

³There are two types of *avidyās*, viz. *mūlāvidyā* and *tūlāvidyā*. The former is the force overpowering the Brahman, viz. *māyā*, which has been ever there, i.e. beginningless. It is termed simply as *avidyā* also. The latter is the effect of the former; it is an error on the part of an individual. The two *avidyās* are sometimes identified with *tattvāgrahaṇa* and *tattvānyathāgrahaṇa* respectively. Also cf. the *Vedāntakalpataru* p. 3, lines 16-17.

प्रत्यग्वान्तसमुच्छेदि ज्ञानमैकात्म्यनिष्ठितम् ।
संन्याससाधनं प्रोक्तममृतत्वंकसाधनम् ॥२॥

[Thus Sureśvara summarises the contents of BU 2.4 in order to point out the connection between BU 2.4 and BU 2.5.]

It is declared (in the preceding section) that Knowledge is the destroyer of darkness (viz. Ignorance) in its fullness (*saṁ*) in respect of the (nature of) individual consciousness, (firmly) based on the uniqueness of the Ātman, and the (potent) means to renunciation (of all attachment to body) which is the sole means to immortality.¹ [2]

¹BUBV 2.4.23: *tyāga eva hi sarveṣāṁ mokṣa-sādhanaṁ uttamam/ tyajataiva hi taj jñeyam tyaktuḥ pratyak param padam*|| On this see Hino (1982), p. 87.

हेतवोऽपि च तत्सिद्धौ श्रवणादिपुरःसराः ।
उक्ता यथावत्तत्रैव श्रोतव्यः श्रुतिवाक्यतः ॥३॥

मन्तव्यो हेतुभिः सूक्ष्मैरुक्तदृष्टान्तबोधितैः ।

चित्सामान्यचिदुत्पत्तिचिदेकप्रलयात्मभिः ॥४॥

[These verses show that not only is renunciation necessary for acquiring the Knowledge (i.e. causing the rise of Knowledge) (as stated above) but *śravaṇa* etc. also are the means to the same.]

And in order to acquire that (knowledge), the means, viz. those beginning with 'hearing',¹ are also declared there: from the Śruti passages,² ' (the Ātman is) to be heard' [3]

' (the Ātman is) to be thought of' with the help of subtle reasons which are conveyed by the already stated examples,³ which have the purport that this has Sentiency (alone) as its generality, originates from Sentiency (alone) and which merges (also) into Sentiency alone.⁴ [4]

¹Cf. BU 2.4.5: *ātmā vā are draṣṭavyaḥ śrotavyo mantavyo nididhyāsitavyaḥ*.

²The word *śruti-vākyaṭaḥ* may mean either 'from the passages from the Śruti texts' or 'from the Śrutis and the instruction of teachers'. The latter interpretation is supported by *śrotavyaḥ pūrvam āgamataś ca* (BUBV 2.4.5), *āgama-darśanam pūrvam āgamācāryato matiḥ* (BUBV 2.4.218) and *tatra śrotavyaḥ ācāryāgamābhyām* (BUB 2.5.1).

³These are stated in BU 2.4.7-12: 'A drum, a conch and a Vīṇā and their sounds' (7-9); 'smoke and fire as its origin' (10); 'waters and ocean as their merging place' (11); 'water and salt which is poured into it and remains there invisibly and pervading all of it' (12).

⁴Here only *śravaṇa* and *manana* are a little clarified, *nididhyāsana* is not spoken of.

आशङ्क्य हेत्वसिद्धत्वं मधुब्राह्मणमुच्यते ।

कुतोऽसिद्धत्वमिति चेच्छृणु तद्गदतो मम ॥५॥

[Here begins the discussion of BU 2.5.]

Keeping in view (the possibility) that the (earlier sta-

ted) reasons can be (taken by some¹) as not justified, exposition is now given on the section on Madhu. If (one would ask), 'Owing to what (is this) unjustified character of the reasons?', (I have to say,) 'Hear while I explain the same.'

[5]

¹This refers to the Sāṃkhyas and others, also possibly the Naiyāyikās who hold similar (views); see the next verse.

निःसामान्यविशेषत्वाच्चित्सामान्यं कथं भवेत् ।
चिदुत्पत्तिलयासिद्धिः सांख्यादीन्प्रति वादिनः ॥६॥

How can Sentiency be the generic characteristic, because it is devoid of generality or particularity?¹ (The view of the Vedāntin, viz.) the origination (of this world) is from Sentiency and its merger (also) is into Sentiency, is not justified (with reason only) for the contenders, the Sāṃkhya and others.²

[6]

¹Notions of *viśeṣa* and *sāmānya* cannot be associated with the Ātman, for the Ātman is *nitya*, *eka* and *anekānugata*. On this, cf. BUBV 1.4.656-657. The Ātman (or Sentiency) is ever described in the Śrutis as *avyāvṛtta*, *ananugata*; cf. BUBV 1.4.529; 4.4.569; Hino (1982), p. 299.

²Śaṅkara has pointed out the views of all these thus: *na yathokta-viśeṣaṇasya jagato yathokta-viśeṣaṇam īśvaram muktvānyataḥ pradhānād acetanād aṇubhyo 'bhāvāt saṃsāriṇo vā utpattyādi sambhāvayitum śakyam* (BSB 1.1.2, p, 88, lines 2-3).

ऐकात्म्यवस्तुतात्पर्यं हेत्वादिच्छद्मनोच्यते ।
वेदे यतो न हेत्वादि लोकवत्स्याद्विवक्षितम् ॥७॥

(This is so) because, in the Veda, is stated its purport, viz. the uniqueness of the Reality, under the garb of (its being) the origin etc.¹ (of this world),² (there) it is not intended to state the origin etc. (of this world) in the worldly way.³

[7]

¹This is *janman* 'origin', *sthiti* 'sustenance' and *pralaya* 'merger'.

²This is a reference to the *sr̥ṣṭi-vākyas* in particular.

³This may refer to the use of logic in all worldly discussion, though SP and NKL make a reference to the Vaiśeṣika view of the *ārambhavāda* and the Sāṃkhya view.

चित्तत्वं सदविद्यावत्कारणत्वं निगच्छति ।

चित्सामान्याद्यतः सिद्धं प्रागप्येतत्प्रसाधितम् ॥८॥

(The Śruti-) conclusion establishes that Sentiency, the (only) existent principle, is the cause of what is made of ignorance, for the reason that it has Sentiency as its generic characteristic. I have already shown this earlier.¹ [8]

¹BUBV 2.4.282: *evam cid-anvayāt sarvas tad-adhyastah samīkṣyate/ sāmānyam vā viśeṣo vā cidasambodha-hetutah*|| On this, see Hino (1982), p. 208. Also compare BU 1.4.7: *tad dheham...etc.*

अभ्युपेत्याप्यसिद्धत्वं तत्सिद्धत्वाभिधित्सया ।

मधुब्राह्मणमारब्धमियमित्याद्यथोत्तरम् ॥९॥

[This verse speaks of the purpose of the Madhubrāhmaṇa (MB) 'section on Madhu' which begins with the words, *iyam (pr̥thivi)*..., for one would consider it purposeless if the Siddhāntin argued that there was already a proof given of Sentiency being the generic characteristic of the world.]

Yet, even granting that (the earlier statement about Sentiency) is not justified with reason, this later section on Madhu is now begun (by the seer) with the desire to re-affirm the same with the words, *iyam (pr̥thivi)*... [9]

प्रतिदेहं लयोत्पत्तिश्रुतेर्ह्यात्मनि शङ्क्यते ।

भेदोऽतस्तन्निवृत्त्यर्थं मधुत्वेनैकतोच्यते ॥१०॥

Since there is a (statement of the) Śruti that each and every body merges in and originates from (the Ātman),¹ it may be suspected that there is numerousness of the Ātman

(=Jīvātman associated with every different body). Hence, in order to obviate that doubt, the uniqueness of the Ātman is declared (by stating it) to be Madhu. [10]

¹Cf. for example BU 4.3.8: *sa vā ayam puruṣo jāyamānaḥ śariram abhisampadyamānaḥ pāpmabhiḥ saṁsrjyate* which would forcefully lead to the idea of differentiation of the numerous Ātmans.

उपकार्योपकारित्वभिन्नं यज्जगदीक्ष्यते ।

उपकार्योपकारित्वात्तत्स्यादेकात्मतत्त्वकम् ॥११॥

Since it is noticed that the world is characterised as the benefitted and the benefactor (which are its components)¹, therefore, on account of its being comprised of the components, (viz.) the benefitted and the benefactor, it should be held as (the product of one cause) of one uniform nature (viz. the individual consciousness).² [11]

¹The relation of *upakārya-upakārin* is possible only if the notion of duality is held. Śaṅkara discusses this relation in BUB 2.5.1 (p. 344, line 9 to p. 345, line 1) and BSB 2.3.43.

²That which is the product is similar to its cause. Therefore the world of duality must have a cause, viz. it is marked by duality. Such is the individual consciousness, wrapped as it is by *avidyā*. SP points out *svapna-dvaita* for clarifying this cause and effect relation. On this, cf. GK 2.4; 3.29^a; 4.62^a.

प्रतिज्ञायाथवैकात्म्यं हेतूनुक्तवोक्तसिद्धय ।

निगमायोत्तरो ग्रन्थः प्रतिज्ञाया विवक्षितः ॥१२॥

प्रतिज्ञातार्थसिद्धयर्थं हेतूनुक्त्वा पृथग्विधान् ।

हेतोर्निगमनं पश्चात्क्रियतेऽथोत्तरोक्तिभिः ॥१३॥

[These verses present another way of explaining the relationship between BU 2.4 and BU 2.5: BU 2.5 is intended to serve as the restatement of the *pratijñā* 'enunciation' in respect of the uniqueness of the Ātman after the *hetu* 'reason' was proved.]

Or rather (we may say), it is intended (by the seer) to begin the subsequent part (of the work) after having first enunciated the uniqueness of the Ātman (or, that all this is but the Ātman) and then stated the reasons for proving what was stated (therein), in order that it should serve as the conclusion.¹ [12]

(Such is the practice that) after having stated various reasons for proving what is enunciated, one states the conclusion (in the form of a restatement) in subsequent statement.¹ [13]

¹This refers to the practice of the commonly used *pañcāvayava-vākya* 'five-membered syllogism'. Read BUB 2.5.1: *tathā hi naiyāyikair uktam hetvapadeśāt pratijñāyāḥ punar-vacanam nigamanam iti*

निदिध्यासनसिद्धयर्थं केचिद्व्याचक्षते परम् ।
मधुब्राह्मणमेतत्तु न युक्तं प्रतिभाति नः ॥१४॥
श्रुत आगमतो योऽर्थस्तर्केणापि समर्थितः ।
स एवार्थस्तु निष्णातो निदिध्यासनमुच्यते ॥१५॥
शास्त्राचार्यानुभवनैर्हेतुभिश्च समर्थितः ।
ईदृगैकात्म्यसंबोधो निदिध्यासनमुच्यते ॥१६॥
निदिध्यासनसिद्धयर्थो यत्नोऽतोऽयमनर्थकः ।
प्रत्यग्याथात्म्यसंबोधमात्रत्वादेव हेतुतः ॥१७॥

[Ānandagiri reports here as also in ABUB that there now follows a discussion on the view of Bhartr̥.]

Some say¹ that this subsequent section, viz. the section on Madhu, is begun for clarifying the notion of *nididhyāsana*. But this does not appear to us reasonable. [14]

Nididhyāsana is so called when a matter, which is (first) learned from tradition, (later) supported by logic, and then subjected to a deep study.² [15]

Nididhyāsana is so called when, instruction about the uniqueness of the Ātman is justified by (proper) reasons, viz. the Śruti, (instruction of) teachers and (one's own) experience (of the same.)³ [16]

Therefore, this effort (of this section of the Upaniṣad) for showing that (it is intended) to establish *nididhyāsana* (declared by Bharṭṛ) as unnecessary, since the cause of one's (acquisition of) the knowledge of the true nature of the individual consciousness consists only in informing (one about it).⁴ [17]

¹The use of the plural shows the author's respect for Bharṭṛ who holds that verses BU 2.4.1-6 are meant to clarify *śravaṇa*, BU 2.4.7-14, *manana* and BU 2.5, *nididhyāsana*.

²NKL reads *evārthaḥ suniṣṇātaḥ* for *evārthas tu niṣṇātaḥ*. *tu* is understood here in the sense of *ca*. According to NKL, *nididhyāsana* consists in knowing the meaning of the Śruti sentence which results from hearing it and thinking over it and not in meditating on it.

³SP points out that BU 2.4 has explained how *nididhyāsana* consists in the acquisition of *vāk्यārthajñāna*. NKL states that verse 16 explains the purport of *sunīṣṇāta*.

⁴Cf. NKL which informs that *nididhyāsana* is *vāk्यārtha-jñāna* coming from *śravaṇa-manana-phala*.

क्रियाफलोपभोगार्थं सर्वैरेव स्वकर्मभिः ।

जन्तुभिः पृथिवी सृष्टा मधु तेषां ततो मही ॥१८॥

पृथिव्याप्यात्मभोगार्थं सृष्टाः सर्वेऽपि जन्तवः ।

पृथिव्या अपि कार्यत्वान्मधु तेऽपि भवन्त्यतः ॥१९॥

पार्थिवानि शरीराणि सर्वेषां देहिनां यतः ।

पृथिव्या तानि सृष्टानि पृथिव्यन्वयदर्शनात् ॥२०॥

भूतानां च पृथिव्याश्च मिथः कार्यत्वहेतुतः ।

भोग्यभोक्तृत्वसंबन्धस्तस्मात्सिद्धः परस्परम् ॥२१॥

भोग्यता प्रथमान्तेन पृथिव्यादेरिहोच्यते ।

कर्तृता भोक्तृता चैषां षष्ठ्यन्तेनाभिधीयते ॥२२॥

अचेतनांशप्राधान्यात्कार्यकारणतोच्यते ।

भोक्तृभोग्याभिसंबन्धश्चेतनाचेतनात्मनोः ॥२३॥

सर्वेषामपि भूतानां कार्यकारणसंगतेः ।

सर्वभूतात्मकत्वं स्याद्यथा सर्वात्मनस्तथा ॥२४॥

[These verses explain the nature of Madhu as *paraspara-upakārya-upakāraka-bhāva*.]

All beings have created the earth by their own doings¹ for the enjoyment of the fruits of their various activity. Hence the earth is for them Madhu. [18]

The earth also² has created all of the beings for its own enjoyment. Thus, being the product of the earth, they also are Madhu. [19]

Since, the bodies of embodied beings are made of (the stuff of) the earth, therefore, they are (to be taken as) created by the earth;³ we see in them the continued existence of the earth.⁴ [20]

Thus, owing to the reason that the earth and the beings⁵ have a mutual relationship of (cause and) effect, therefore, there is established a mutual relationship of the enjoyer and the enjoyable.⁶ [21]

Here (in the statement, *iyam pṛthivi...*) the character of the enjoyable (and also of the effect)⁷ of *pṛthivi* etc. is expressed with the use (of the noun) with the nominative ending and the character of the cause (or agent) and of the enjoyer of these is expressed (by the noun) with the genitive ending.⁸ [22]

(It is) owing to the predominance of the insentient part that there is the statement of the cause and effect relation and (it is intended to convey that there exists) the relation of the enjoyer and the enjoyable between those that are (of the nature of) the sentient and the insentient.⁹ [23]

(As we can) thus (affirm) on account of the relation of cause and effect which obtains among all beings, they are of the nature of all (beings), in the same way, (we can affirm that) the Ātman (which exists) in all (beings) is (of the nature of them all).¹⁰ [24]

¹*svakarman* refers to the *upakārya-upakāraka* relation which is mentioned earlier.

²SP explains the purpose served by the word *api* which occurs in the verse four times. The first (= the third and the fourth)

api is *upamāvacaka* 'expressive of a simile'. The second *api* stresses that each and every being is included.

³This is parallel to what is stated before; viz. the earth is produced by the beings.

⁴One may remember here: *kāraṇa-dravyam kārye 'vatiṣṭhate*.

⁵*bhūtāni* refers to the existent beings, not the elements.

⁶Sureśvara uses here *bhoktr-bhogyā* in the place of *upakārya-upakāraka*.

⁷*karṭṛtā* in the second line implies *kāryatā* beside *bhogyatā*.

⁸The verse clarifies the mutual relation implied in *bhoktr-bhogyatā* and *karṭṛ-kāryatā*. Such relationships are to be understood in the following verses also.

⁹This verse explains the significance of the two pairs of words that explain the mutual relation between the earth and the beings. This cause and effect relation can obtain between two non-sentients, whereas the enjoyer-enjoyable relation implies the necessity of sentience. Read SP: *pṛthivyāder acetanāmśa-prādhānyāt kāryatvādi-trayam cetanāmśa-prādhānyāc ca bhokṭṛtā*.

¹⁰This is *nigamana* 'conclusion'. The nature of the primordial cause is the nature of all that are effects. The Ātman is the cause of all. Hence, the Ātman is all, i.e. all is nothing else than the Ātman.

संहृत्य स्थूलमाधारं भूतानां च क्षितेस्तथा ।

तदाधेयोपसंहृत्यै यश्चायमिति शब्दयते ॥२५॥

अस्यां पृथिव्यां यश्चासौ भास्वद्विज्ञानविग्रहः ।

अमृतो नित्य एवातो न नाशी स्थूलदेहवत् ॥२६॥

स चापि मधु सर्वेषां भूतानां तानि तस्य च ।

मधु सर्वाणि भूतानि यथा पूर्वमवादिषम् ॥२७॥

सहाध्यात्माधिदैवं हि साधिभूतमिदं जगत् ।

एकैकस्यात्मनः कृत्स्नं भोग्यत्वेनावतिष्ठते ॥२८॥

सर्वः सर्वस्य कार्यं स्यात्सर्वः सर्वस्य भोजकः ।

एवं सति भवेत्सिद्धं यथा पूर्वं प्रपञ्चितम् ॥२९॥

After having thus stated (about) the gross support of beings and also of the earth, (now) is stated (the sen-

tence), *yaś cāyam...* for bringing in (the information about) what is supported in them. [25]

(The one) who is in this earth, possessed of the body (in the form) of lustrous knowledge,¹ is indeed immortal (and) eternal;² therefore, that one is not (at all) perishable like a gross body. [26]

He also is Madhu³ of all beings and all those beings are likewise his Madhu, in the same way as I have already stated.⁴ [27]

Indeed, this whole world, together with the *adhyātma* 'embodied', the *adhidaiva* 'divine' and also the *adhibhūta* 'elemental',⁵ exists for every Ātman (Jīvātman) as its enjoyable.⁶ [28]

All would be the effect of all; all, the enjoyer of all.⁷ This being the case, what is stated herebefore would become justified. [29]

¹*vijñāna* is 'knowledge' associated with the notion of duality. This is so because the individual consciousness (which is, in final analysis, not distinct from the Ātman) is associated with the body and external objects and there thus exists knower-knowable relationship.

²This is to contrast the individual consciousness with the gross body.

³NKL refers this to the notions of *karṭṛ*, *kārya*, *bhokṭṛ* and *bhogyā*.

⁴Stated earlier in verse 22 above.

⁵*adhyātma* is what is associated with the individual consciousness, that is each of the various beings; *adhidaiva*, with each of the divine beings; *adhibhūta*, what is related to each of the elements, i.e. the things.

⁶The idea of the beginningless transmigration of beings in relation to the divine and the elemental world around is the basis of this verse. Consequently, there is reference to many Ātmans, i.e. Jīvātmans. This is similar to the *puruṣabahutva* 'plurality of *puruṣas*' of the Sāṃkhya theory. The concept of the threefold world is held by the Sāṃkhyas: cf. SK 1 and the *Sāṃkhyatattva-kaumudī* and the *Gauḍapādabhāṣya* on the same.

⁷All refers to the transmigratory existence which is in reality the product of ignorance. This has been explained in the earlier

section of this Upaniṣad: cf. *idaṁ sarvaṁ yād ayam ātmā* (BU 2.4.6) as NKL points out.

अध्यात्मं यश्च शारीरः पार्थिवांशसमाश्रयः ।
स चापि मधु सर्वेषां सर्वभूतानि तस्य च ॥३०॥

The embodied one, who is described with reference to (any) embodied (being), and has resorted to the earthly portion, is (likewise) Madhu of all things around him. All (those) things also (are Madhu) of him.¹ [30]

¹This speaks of the Jīvātman and the things around as *upakārya* and *upakārin*, i.e. mutually dependent.

कार्यकारणरूपेण भोज्यभोक्तृतयोदितम् ।
चतुष्टयं पृथिव्यादि तस्य तत्त्वमथोच्यते ॥३१॥
चतुष्टयविभागेन स्वार्थोऽप्यात्मा विभज्यते ।
अविभागोऽपि तादर्थ्याद्भोक्तातः सोऽत्र गृह्यते ॥३२॥

Now is being explained the true nature of the group of the four,¹ beginning with the earth which has been already described (as that which stands) related as mutual cause(s) and the effect(s) and also as being the enjoyer(s) and the enjoyable(s). [31]

In the way of the division of the group of the four, the Ātman also, is being divided, even though it exists for itself. Undivided though he is (as comprising the group of the four),² he is the enjoyer since (the group of the four) exists (solely) for his sake. For this reason, he is understood here (as divided).³ [32]

¹The group of the four comprises of *prthivī*, *ap*, *tejas* and *vāyu*.

²*avibhakto 'pi* implies *vibhaktaḥ*; supply *prthivyādicatuṣṭayarūpeṇa*.

³That is to say: as the *bhoktr* among the four, viz. *karṭr*, *kārya*, *bhoktr* and *bhogya*.

प्रत्यक्तया यः प्रथते चतुष्टयविलक्षणः ।
प्रात्यक्ष्यात्सोऽयमित्येवं प्रत्यक्साक्ष्यभिधीयते ॥३३॥

अयमेव स इत्युक्त्वा सामानाधिकरण्यतः ।

प्रत्यङ्मात्रैकयाथात्म्यं चतुर्थोक्तस्य बोध्यते ॥३४॥

पृथिव्यादिषु यः पूर्वं व्याख्यातोऽन्तरबाह्यतः ।

आत्मैव स इति ज्ञेयः तदबोधप्रसूतितः ॥३५॥

अयमित्यस्य शेषः स्याद्योऽयमित्यादिकः परः ।

एवेत्यवधृतावेतत्संसर्गप्रतिषेधकृत् ॥३६॥

तत्त्वं चतुष्टयस्यास्य प्रत्यगात्मैव केवलः ।

अव्यावृत्ताननुगतध्वस्ताविद्यातदुद्भवः ॥३७॥

[Verses 33-37 are *udbhāṣya vyākhyāna*; i.e. they state what is *anukta* in the *bhāṣya* of Śaṅkara, viz. the meaning of *ayam eva saḥ* in BUB; this has a reference to the group of the four *bhoktr* etc.]

He, who is distinct from the group of the four, stands pre-
eminent on account of his being inside (all); (and) on
account of his being directly perceptible, he is described
as the 'inner witness' in the sentence, '*ayam...*' [33]

The Śruti has first made the statement *ayam eva saḥ*; and
now it declares the true nature, viz. the uniqueness of the
individual consciousness even if it is stated as divided into
four¹ by using (the two words *saḥ* and *ayam*) in the same
case. [34]

He who was earlier declared to be the being within and
outside of the (four) beginning with the earth² is (to be
known) as identical with the Ātman; (but he is so descri-
bed there) because of the rise (of the notions) out of ig-
norance about the same (viz. the Ātman).³ [35]

The subsequent (statement) beginning with *yo 'yam*
should be (taken as) a complement of this statement '*ayam*
... (i.e. the statement, *ayam eva saḥ*)'; this word *eva* is for
emphatically asserting and it negates the idea of a contact
(of these, viz. the Ātman⁴ and the group of four.) [36]

The true nature of this group of the four is but (his being)
the unique individual consciousness, which is neither
differentiated (from anything else), nor (lit.) followed by
(i.e. similar to) (anything else) and which has destroyed
ignorance and what has originated from it.⁵ [37]

¹See note 3 on verse 32 above. Alternatively, the individual consciousness can be understood with reference to the embodied beings and divinities and then each of these two kinds of beings can be understood to present the relation of the support and the supported—that makes the division of the individual consciousness into four.

²This description entails the acceptance of duality in that the Ātman is said either to need some support in the body or to be related to it from outside.

³This explains away the contingency of accepting duality.

⁴This explanation is necessitated by a possible doubt that the Ātman and the group of the four are connected like a lotus and its blue (in the statement 'the blue lotus') where 'blue' and 'lotus' are used in the same case (i.e. they have *sāmānādhikaraṇya*).

⁵The four elements, which form a group, are unlike the Ātman, *vyāvṛtta* and *anugata*. Further, they themselves originate from ignorance (about the nature of the individual consciousness); cf. note 3 above.

प्रकृतात्माभिधानं वा स इत्येतत्पदं भवेत् ।
 अयमित्युच्यते साक्षात्संनिकर्षाच्चतुष्टयम् ॥३८॥
 स एवायमिति ज्ञेयो यो द्रष्टव्यतयोदितः ।
 यच्चामृतं स्वभार्यायै याज्ञवल्क्येन भाषितम् ॥३९॥
 ब्रह्मेति ध्वस्तसंभेदं यन्नेतीति पुरोदितम् ।
 सर्वं समभवत्कृत्स्नं यद्याथात्म्यावबोधतः ॥४०॥
 पृथिवीं पार्थिवं चांशं शरीरं साधिदैवतम् ।
 जानीयात्सर्वमात्मेति नेति नेत्युपलक्षणम् ॥४१॥

[This introduces the *ukta* portion of BUB]

Or, the word *saḥ* could be the word that expresses the Ātman (which is) taken up (for discussion).¹ So also the word *ayam* is used for expressing the group of the four on account of its direct contact (with the sense-organs). [38]
 (In the statement) beginning with *sa evāyam* is mentioned the one who is described as one that should be seen and

also whatever is declared by Yājñavalkya to his wife as the immortal.²

[39]

(This group of the four is described) as the Brahman,³ in which (all) difference is destroyed; the one which has been earlier stated (in the sentence) as 'not this, (not this also)'.⁴ All (i.e. this group of the four) has become one whole is a (correct) decision arising from the knowledge of the true nature of the Ātman.⁵

[40]

One should know all⁶ (of) the earth, the earthly portion (in the body) and also the body (of a being) together with their presiding deities, as the Ātman. The words *neti neti* are (but) an indication (of this).⁷

[41]

¹The Ātman has been the subject of discussion from BU 2.4, i.e. the Maitreyī-brāhmaṇa (MaiB); cf. the next verse.

²See *idam amṛtam* (BU 2.5.1); cf. Yājñavalkya's instruction on the doctrine of immortality (of the Ātman) to Maitreyī in BU 2.4.5 ff. And also cf. *etāvad are khalv amṛtatvam* (BU 4.5.15) as NKL points out. The sentences *sa evāyam* here and *ātmā vā are draṣṭavyaḥ* in BU 2.4.5 differ only in words, but they are identical in sense. That is to say: The Ātman is immortal is the *vākyārtha* 'sentence-sense'. Also, 'the group of the four is immortal' can be understood because the four arise from *citsāmānya*.

³Refer to *idam brahma*.

⁴Cf. BU 2.3.6.

⁵Refer to *idam sarvam*; but *tasmāt tat sarvam abhavat* (BU 1.4.10) as NKL points out.

⁶SP points out that all refers to the *adhyātma* and the *adhi-daiva* each of which is twofold, viz. *sthūladvaya* and *sūkṣmadvaya*.

⁷This concludes the explanation of the statements, viz. *idam amṛtam*, *idam brahma* and *idam sarvam*.

उत्तरेष्वपि वाक्येषु योक्तेनैव वर्त्मना ।

इममेव तु वाक्यार्थं व्याचक्षीताविचारयन् ॥४२॥

In respect of the subsequent sentences also should one explain, without entertaining (even a bit of) hesitation (and) in this very manner, that only this is their meaning.¹

[42]

¹BU 2.5.2-10 will describe *ap*, *agni*, *vāyu*, *āditya*, all *diś*, *candra*, *vidyut*, *stanayitnu*, *ākāśa*; these are like the *prthivi* in BU 2.5.1 and therefore, the explanation of 2.5.1 is to be *atidiṣṭa* 'extended' to them.

पृथिव्यादीनि भूतानि तदंशाश्च समीरिताः ।
 हिरण्यगर्भलिङ्गांशास्तथा पूर्वोक्तमूर्तयः ॥४३॥
 यथोक्ता येन सर्वेऽपि प्रयुक्ताः स्वात्मकर्मभिः ।
 उपकुर्वन्ति नः सर्वान्स धर्म इति संज्ञितः ॥४४॥
 तस्य कार्यं द्विधेहोक्तं सामान्यात्मविशेषतः ।
 पृथिव्यादीह सामान्यं विशेषः पिण्डमात्रकम् ॥४५॥
 तत्कार्यस्येह प्रात्यक्ष्यात्तदभेदोपचारतः ।
 प्रत्यक्षवदयं धर्मस्तस्मादेवाभिधीयते ॥४६॥
 साधारणः पृथिव्यादिकारी धर्मोऽभिधीयते ।
 यश्चायमिति वाक्येन तथासाधारणाभिधा ॥४७॥
 यश्चायमध्यात्ममिति योऽयं मद्देहकृन्मतः ।
 साधारणविशेषात्मा यदपूर्वं तदुच्यते ॥४८॥
 प्राजापत्यमपूर्वं यत् सर्वभूतप्रयोजकम् ।
 अध्यात्मं पिण्डकृद्यच्च सोऽयं धर्माभिधोदितः ॥४९॥

(In the same way)¹ the elements earth etc. and their portions, and also the portions of Hiranyagarbha² are declared as the various forms of (the Brahman) already stated. [43]

That has the name *dharma* on account of which (all those fragments of Hiranyagarbha) that are stated before (become) employed (in their respective activities) and become useful to us all on account of their actions.³ [44]

⁴The effect of that (*viz. dharma*) (in the case of each individual being) is, on account of their common characteristic (effect) and the peculiar characteristic (effect) of each,⁵ stated here⁶ to be twofold; thus, here (in respect of *dharma*)⁷ the common (effect) is the earth etc., whereas the peculiar (effect) is just a form (of the earth etc.) [45]

Since the effect of that (*dharma*) is here (i.e. in all dealings) directly perceptible, therefore, just for that (reason), (the phrase) *ayam dharmaḥ* 'this (directly perceptible) *dharma*' is uttered by considering that (*dharma*) in a secondary sense.⁸ [46]

In the statement *yaś cāyam...*, is stated the common property (*dharma*), (viz. that) which produces (the effect, viz.) the earth etc. So also is there a statement of the particular property⁹ [47]

in the words *yaś cāyam adhyātmam....* Thus, the Ātman which is considered as the common and the uncommon property, is the maker of (the notion of) 'my body'. What is *apūrva* is (now) explained. [48]

The activity of Prajāpati (the sacrificer) has no cause (for it) which is the inciter of all beings, and which is, with reference to a (being's) body, the producer of a form. It is this property which is mentioned by the word *dharma*. [49]

¹This understands 'as in verse 42 above'.

²These are the bases or support for the elements; *bhūta-śarīrādhāraḥ* (SP).

³Each portion of Hiraṇyagarbha has its own *karman* 'duty to perform'; *svātmakarman* is *svarūpasadṛśakarman* 'action (prescribed) as particular to one's own nature'. From this verse onwards, the word *dharma* is used in more than one sense. Here, it means duty prescribed for one by the scriptures, and also indicative of its result (something like *punya* or *adṛṣṭa*); cf. BU 1.4.14.

⁴Verse 45 answers a possible objection, viz. *dharma* is imperceptible and known only from the Śāstra, that is to say: It is not directly perceptible; as such, the reference to it as *ayam* 'this one' is unreasonable.

⁵The common characteristic activity is their act of offering support to the 'being' within and the peculiar characteristic activity is that which distinguishes itself from that of any other among them. See verses 47-49 below.

⁶I.e. in the Śāstra.

⁷The second *iha* refers to *vyavahāra* 'actual activities' associated with the elements.

⁸*dharma* and *kārya* are described metaphorically as identical and therefore *dharma* is perceptible.

⁹*asādhāraṇa* is the same as *viśeṣa* above; *dharma* here refers to *kriyā* 'activity'.

तथैवाचाररूपेण प्रत्यक्षेण यदीक्ष्यते ।

स एव धर्मः सत्यं स्याद्यद्व्यवस्थाप्रयोजकम् ॥५०॥

साधारणविशेषाभ्यां धर्मवत्तदपि द्विधा ।

साधारणविशेषार्थव्यवस्थाकारणत्वतः ॥५१॥

In the same way, only that, which is directly perceived in the form of some conduct, is *dharma*,¹ the eternal existent, which would cause the regulated order² (of the universe or of beings).

[50]

That (viz. regulator conduct) also is, like *dharma*, twofold, viz. the common and the particular, because of its being the cause of the arrangement of various objects, both common and particular.³

[51]

¹*dharma* is the cosmic Truth which causes/regulates the course of the worldly things.

²*vyavasthā* is *varṇāśramavyavasthā* (SP).

³Cf. *yaś cāyam asmin satye* with reference to the common object and *yaś cāyam adhyātman satyaḥ* the particular.

धर्मसत्यप्रयुक्तोऽयं लिङ्गपिण्डस्वलक्षणः ।

विराड्द्विरण्यगर्भश्च सर्वजातिसमन्वितः ॥५२॥

मनुष्यजातेर्ग्रहणं सर्वजात्युपलक्षणम् ।

इदं मानुषमित्येवं व्याख्या तस्यास्तु पूर्ववत् ॥५३॥

This Immanent Hiranyagarbha,¹ comprising of all (human) species, is (but) effected by *dharma*, the eternal existent, and has its subtle form as its own characteristic.

[52]

In the statement *idam mānuṣam* there is the mention of 'the entire human race' (and it is indicative of all species (in the same)). And² the explanation of that (viz. all species) is like the one given before.³

[53]

¹Cf. note 2 under verses 55-57 below.

²The word *tu* here means *ca*.

³Viz. (in the explanation of) *dharma*. On the previous verse the word *dharmavat* is related to the common characteristic of a certain group of (and also of the particular characteristic of) an individual who is a member of that group and in these verses the word is expressive of the entire group known after its common quality —this last thus refers to *dharmīn* instead of *dharma*.

पृथिवी शरीर इत्येवं खण्डशो यः पुरोदितः ।
विराड्द्विरण्यगर्भश्चेत्ययमात्मेति तद्वचः ॥५४॥

[In verse 54, Sureśvara states the general purport of 'BU 2.5.1-13 and its relation to BU 2.5.14.]

That statement *ayam ātmā* is the description of the One who is already described in one section after another, viz. as the earth, the embodied one etc. (and) the Immanent Hiranyagarbha.¹ [54]

¹This is the explanation of the statement *ayam ātmā*. Of course, in earlier text, the sentences *iyam pṛthivī...* referred to various parts of this whole, i.e. Hiranyagarbha (*avayavin*); cf note under verse 42.

हिरण्यगर्भभेदानां भूतानां च पृथक्पृथक् ।
उक्तं मधुत्वं येनातस्तत्सामस्त्यमथोच्यते ॥५५॥
अयमात्मेति निर्देशो विराजः प्रथमो मतः ।
सप्तम्यन्तेन तत्प्रत्यङ्गलिङ्गात्मास्तोऽभिधीयते ॥५६॥
कार्यात्मा कारणात्मा च यदर्थो भवतः सदा ।
यश्चायमात्मेत्यत्रोक्तो विज्ञानात्मेति यं विदुः ॥५७॥
यस्मिन्नात्मनि विध्वस्तव्याकृताव्याकृतात्मके ।
खिल्यदृष्टान्तवचसा विज्ञानात्मा प्रवेशितः ॥५८॥

Since up to now is stated the character of Madhu in various fragments of Hiranyagarbha and also of elements (in different sub-sections),¹ now is being stated the wholeness of all of them.² [55]

It is held that the first mention³ of the Immanent (Ātman) occurs in the words *āyam ātmā* and, therefore, in the word *ātmani*, which ends with the locative (suffix), is then mentioned the subtle Ātman (residing) in each individual,⁴ [56] and whose meanings are ever the Ātman in the form of the cause and that in the form of the effect, who is mentioned in the words *yaś cāyam ātmā* and (yet) whom they know as an individual knowing Ātman. [57]

⁵In the words conveying the illustration of a lump (of salt), is introduced the individual knowing Ātman (viz. Jīvātman)⁶ as that Ātman (lit. it is made to enter the same), who has the nature of one that is beyond (lit. has destroyed) the manifest and the unmanifest. [58]

¹This refers to *prthivī*, *ap*, *tejas* etc. as the fragments of the Virāj and *śarira*, *caitanya*, *vāṇmaya* etc. of the elements.

²This verse thus introduces the description of the Hiranyagarbha as a whole. He is the first and the subtlest manifestation of the Brahman, when it is somehow and inexplicably affected by Māyā. He is considered to be the first sacrificer, so to say.

³It is doubtful if the word *prathamah* does not stand for *prathamāntah* = *prathamāntam padam* in view of *saptamyantena* which follows.

⁴SP clarifies that this is so because it is later described as *tejomaya* 'full of lustre' etc.

⁵Verse 58 reaffirms that the Immanent Ātman is the Jīvātman.

⁶*Vijñānātman* is Jīva whose knowledge can be described as arising out of subject-object relationship. The word *praveśita* should be understood in the sense of 'made known as identical with'; cf. BU 2.4.12: *sa yathā saindhavakhilya udake prāsta udakam evānuvilīyeta, na hāsyodgrahaṇāyeva syāt...*

ब्रह्मविद्याहतध्वान्ते तस्मिन्ब्रह्मणि निष्ठिते ।

तथाऽधिपतिशब्देन स्वातन्त्र्यमभिधीयते ।

स्वार्थः प्रत्यक्तदर्थत्वात्सहेतोर्जगदात्मनः ॥६४॥

[Verses 59-64 describe the nature of the Jīvātman and its relation to the Brahman.]

Since there would be utter impossibility (of the existence) of ignorance and its effects, when that (Jīvātman) which has destroyed the darkness (of ignorance) by the knowledge of the Brahman (and has thus) settled in the Brahman. [59]

Now (i.e. when the love of Madhu is obtained), owing to Knowledge, this one, who had formerly become, owing to ignorance, an embodied transmigratory being, as it were, himself is (but) the highest Brahman. [60]

This one whose ignorance and what has arisen from it are destroyed is of the nature of mere sentience (or knowledge),¹ the endless and boundless Ātman existing in his own greatness.² [61]

³The (part of the) work, beginning with *sa vā* is explained together with an illustration in order that one comes to know the true nature of the individual consciousness which does not have any preceding (i.e. origin), any succeeding (i.e. end), and a middle.⁴ [62]

The word *rājā* (is used in the passage) owing to his (newly acquired) shining (i.e. glow), his knowledge (about the Ātman) which is never lost and on account of his complete awareness 'I am Brahman', i.e. because of its having destroyed the darkness (of ignorance). [63]

So also, the word *adhipati* expresses independence (of the Ātman). The individual consciousness (exists) for its own purpose, for the Ātman of the universe (the creator of it), and of its cause (viz. ignorance), exists for it.⁵ [64]

¹The word *satattvaka* literally means 'accompanied by the truth (viz. its nature)' where *satattva* means *svarūpa* ' (its) own nature'.

²Thus is stated that the Jīvātman is but the Ātman, viz. the Brahman, owing to the acquisition of the knowledge of the true nature of the same.

³SP points out that verse 62 refers to the support from a statement in the Śruti for what was described in verse 62, viz. the *vidyāphalabhūta* Ātman, as the sum and substance of verses 58-60.

⁴*apūrvānaparāmadhya* shows the ever-abiding uniform nature of the Ātman. See *tad etad brahmāpūrvam anaparam anantaram abāhyam ayam ātmā brahma* (BU 2.5.19).

⁵Hereby is explained away the possible idea of the fault of *punarukti* 'repetition'. In common parlance, the words *rājan* and *adhipati* are understood as synonyms, but the Upaniṣad uses them with a specific purpose as Śaṅkara points out in BUB 2.5.15 *rājatvaviśeṣaṇam adhipatir iti bhavati kaścīd rājocita-vṛttim āśritya rājā, na tv adhipatiḥ, ato viśinaṣṭy adhipatir iti* (p. 354, lines 4-5). This means that the word *rājan* can be associated with the nature of a human being for offering protection to others, being good to them etc., whereas the word *adhipati* expresses his independence. An *adhipati* is a master of himself and does not depend on others while he enters upon any activity. Thus verses 62-63 bring to the fore two aspects of the Ātman, viz. the supreme lustre and absolute independence.

प्रत्यग्विज्ञप्तिमात्रेण समाप्तिं जगदात्मनः ।

आविश्चिकीर्षुः साक्षान्नस्तद्यथेति परा श्रुतिः ॥६५॥

चक्रनाभौ यथा प्रोताश्चक्रनेमौ च बाह्यतः ।

अराः प्राणादयस्तद्वदोताः प्रोताः परात्मनि ॥६६॥

[This is Sureśvara's introductory remark on the illustration.]

The subsequent passage of the Śruti beginning with *tad yathā*, seeks to reveal to us directly the accomplishing of (i.e. becoming one with) the Ātman of the universe by merely giving information about the individual consciousness.¹ [65]

Just as the spokes (of a wheel) are fixed in the hub and also on the (outside) rim, so also are *prāṇa* etc. woven lengthwise and crosswise in the highest Ātman.² [66]

¹This is the purport of the words *tad yathā*...in the Śruti passage.

²This is the paraphrase of the Śruti statement *tad yathā rathanābhu*...

व्याचक्षतेऽन्यथैवेमं दृष्टान्तं केचिदात्मनः ।
 समस्तादिप्रतिज्ञार्थसिद्धये ब्रह्मवादिनः ॥६७॥

 प्रत्येकं प्राणिनां ह्येतद्ब्रह्मचक्रमवस्थितम् ।
 असंबोधात्तु तैः सर्वैः प्राणिभिर्नानुभूयते ॥७३॥

[Suresvara's discussion of Bhartr's view (introduced in verses 65-66) with the illustration occurs in verses 67-89. Verses 67-73 represent Bhartr's interpretation of the illustration in the preceding verse.]

But some knowers¹ of the Brahman explain this illustration (in respect) of the Ātman² in quite another way, viz. for establishing the meaning of the enunciation beginning with *samasta*.³

[67]

Having fixed one's own self on the imperishable highest Ātman, and having considered the self (in relation to the universe) as the hub of a wheel,

[68]

the body as the rim of the wheel and this universe beginning with the deity as its spokes, the wise one should ever meditate (on the nature of the self) with his intellect fixed on the thought about (its) mode.

[69]

For one who is ever meditating (on the nature of the self) in this way of meditation,⁴ there results oneness (with the highest Ātman) which is similar to one (whole) ball of hot iron and which is difficult (to occur) in transmigration.⁵ [70]

(The wise) one who has attained this state ceases to have the status of a meditator (and), (being one with the Brahman) becomes the object of meditation for those who are blinded by the darkness of ignorance. [71]

He who has (thus) ascertained (for himself the nature of) this unthinkable (Ātman reaches the highest abode of the Yogins), having attained which they do not return (to the transmigratory existence,⁶ (for they) have attained final liberation (lit. extinction of duality).⁷ [72]

Indeed in each of the beings rests (i.e. is present) this wheel of the Brahman (*brahmacakra*), but it (viz. that this is so) is not experienced by all those beings, owing to (their) not knowing of the same.⁸ [73]

¹The reference to Bharṭṛ in the plural shows Sureśvara's (as also Śaṅkara's) respect for him. This interpretation by Bharṭṛ is not found in BUB. Hence it may be said that it is the *anukta* portion in Śaṅkara's comment.

²SP: *dr̥ṣṭānta-grahaṇam dār̥ṣṭāntkopalakṣaṇam* 'The illustrated should be (taken as) implied by the illustration.'

³Upaniṣadic enunciations meant by Bharṭṛ are *idaṁ sarvaṁ yad ayam ātmā* 'All this is what is (called) Ātman', *saprapaṇco 'yam ātmā* 'This Ātman is accompanied by the whole of the universe.'

⁴The use of 'meditation' (*nididhyāsana*, *dhyāna* according to Bharṭṛ) is introduced: Meditation effects oneness of the individual consciousness with the highest Brahman, i.e. it effects the destruction of one's bondage after knowing the true nature of the self.

⁵*āvṛtti-durlabha* is *āvṛttau durlabha*. This means that oneness of the Jīvātman and the Ātman is not experienced by one so long as one is subjected to transmigration.

⁶It appears that there are echos of the thought expressed in BG. See BG 15.6^b: *yad gatvā na na nivartante tad dhāma paramam mama*||

⁷The meditator (*dhyātr*, *yogin*) does meditation (*dhyāna*, *nidī-dhyāṣana*) on *dhyeya* the highest Ātman and having determined the true nature of his own self as identical with the *dhyeya*, attains the highest abode, viz. *para nilaya*, i.e. *parama nirvāṇa*. Thereafter, he no more remains in the condition of a *dhyātr*. He never returns to the status of a *dhyātr*.

⁸This verse offers Bhartr̥'s alternative explanation of the illustration. Further cf. BG 18.61^a: *īśvaraḥ sarva-bhūtānām hṛd-deśe 'rjuna tiṣṭhati*

वैश्वानरवरात्केचिदेवं व्याचक्षते स्फुटम् ।

अक्षरानन्वयात्त्याज्या व्याख्येयं साध्वपीदृशी ॥७४॥

Thus have some very clearly explained (illustration) thanks to the boon of Vaiśvānara.¹ Yet, this (explanation), quite good though it is, has to be rejected,² for want of its proper construe (with the Śruti). [74]

¹We notice that time and again Sureśvara refers to the favour of Agni on Bhartr̥: cf. BUBV 1.4.490; 1.4.1779; 3.2.41; 4.3.1187. Sureśvara seems to suggest that Bhartr̥ derived his knowledge from Agni's favour—it was thus dependent on a deity.

²Sureśvara clearly states his rejection of Bhartr̥'s view.

[Hereafter follows Sureśvara's refutation of Bhartr̥'s view up to verse 89 and in the 90th verse is reaffirmed the view of the Śruti acceptable to him]

सामर्थ्यादपि संप्राप्तो न चेदक्षरपूर्वकः ।

तादृङ्नोपास्य एवेति प्राहुरागमवेदिनः ॥७५॥

प्रमाणवन्त्यदृष्टानि कल्प्यानि सुबहून्यपि ।

 दृश्यते त्वग्र्यया बुद्ध्या मनसैवेति यद्वचः ।
 तदात्मविद्याविध्यर्थं नोपासनविधायकम् ॥८५॥

Those who have known the (Vedāntic) tradition have declared that (a doctrinal thought)¹, though entertained (lit. obtained) on the basis of the force of the sense (in the illustration² in a passage from the Śruti), should not at all be accepted, if it is not expressed by the Śruti. [75]

One can imagine (that there exist) quite good many things which, though not known (lit. perceptible), have authoritative proof for establishing their existence. However, not even a hundredth part or fraction of some unknown (lit. unseen thing) should be entertained (lit. imagined), if it has no (such) authoritative proof.³ [76]

The (introduction of the) idea of the cycle (of the Brahman by Bharṭṛ) is not heard as enunciated first by the Śruti.⁴ So also not (a word) is heard about meditation⁵ in the whole of this section (of the Upaniṣad, i.e. BU 2.5). [77]

The two distinct places, viz. the hub and the rim, are accepted (by the Śruti merely) as an illustration; however, in the place of the illustrated is here heard only the (unique) Ātman.⁶ [78]

The merger of *prāṇa* etc.⁷ in the individual consciousness is (directly) heard (in the Śruti). How can one accept

the merger of the deity etc. in the elements, (which is) not heard in the Śruti?⁸ [79]

Such division as the exterior and the interior, and also the nature of being (related as) the cause and the effect is just here set aside (viz. rejected) with reference to this individual consciousness in the sentence *tade tat*.⁹ [80]

And also on account of the rejection of the notion of the existence of discrete objects, in the Śruti sentence *atha yo 'nyām*,¹⁰ I think that (accepting) an injunction regarding meditation¹¹ on an object of meditation is not proper.¹² [81]

Further, beside (acquiring) the knowledge of the Brahman,¹³ there is no other activity (to be undertaken) for attaining the Brahman, since there is only one obstacle, viz. that of ignorance, to the acquisition of the fruit, viz. the unity (or uniqueness) of the Brahman.¹⁴ [82]

Know (you) this: That, which is not expressed by speech and which one does not ponder over with *manas*, is the Brahman, but not this which they meditate on.¹⁵ [83]

The definition of what is not the Brahman is (that) it is obtained (lit. limited or covered) by an act of meditation. Hence how can that which (one thinks as) similar to that¹⁶ (viz. *abrahman* 'the non-Brahman') be meditated on as the Brahman? [84]

The statement (in the Śruti) *drśyate tv agryayā buddhyā manasaiva*¹⁷ is for laying down the knowing of the Ātman, but not injunctive of any meditation. [85]

¹*artha* is explained in SP as *drṣṭānta-sāmarthyāt tvadiṣṭo 'rthaḥ*; so also in NKL.

²*sāmarthya*: The determinant of the meaning is the force of the illustration in the passage, as can be interpreted by someone. That is to say: The interpretation of an illustration should be in keeping with what is expressly stated in the Śruti; it should not arise from one's imagination.

³Sureśvara suggests that it is only the play of imagination that works while Bharṭṛ posited his views on the *drṣṭānta* under discussion and no authoritative proof of the Śruti has led him to do so. For Sureśvara (and also for others), the Śruti is the

ultimate decisive proof. Also cf. NKL: *evenividhasyārthasya śrutatvāt na kalpakāpekṣā*.

⁴That is to say: It is not supported by the Śruti.

⁵There is not a single word expressive of *nididhyāsana* as understood by Bharṭṛ.

⁶See Introduction pp. xvii-xx on the illustration of *rathanābhi*, *rathanemi* and *rathacakra*.

⁷These are *prāṇādayaḥ* mentioned in BU 1.4; or the sense-organs as mentioned in the Upaniṣad pertaining to what happened at the time of death. See CU 6.8.6 and 6.15.2.

⁸Sureśvara has already explained Bharṭṛ's idea of the *brahmacakra* in verses 68-69. Now he raises here objection to the idea contained in verse 69. True, Bharṭṛ has explained the illustration logically, but he does not have any Śruti for support! He imagines those things which are not mentioned in the Śruti.

⁹The Śruti *tad etat* is *tad etad brahmāpūrvam anaparam anantaram abāhyam ayam ātmā brahma sarvānubhūḥ*; cf. NKL-footnote. The reference in Bharṭṛ's explanation to the exterior and the interior is not supported by the Śruti.

¹⁰BU 1.4.10: *atha yo 'nyām devatām upāste...*

¹¹According to Bharṭṛ, the root *upās-* in BU 1.4.10 has the sense of the root *dhyai* (from which come *dhyāna* and *nididhyāsana*) and, therefore, there is an injunction regarding meditation.

¹²Refer to SP: *na hi bhedaṁ vinopāsyādi-prakārasambhavaḥ prakṛte ca bheda-drṣṭir apodyate tan nātropāsti-vidhir ity arthaḥ*. Any meditation presupposes duality, viz. the subject and the object of meditation. Since the Upaniṣad under discussion clearly sets aside the notion of duality, any meditation is altogether impossible.

¹³This is in reality no activity, for it means only the removal of ignorance.

¹⁴Knowledge of the Brahman is, though the result, not the fruit of any activity. NKL reads *brahmātmaikya* for *brahmaikātmya* and that would mean 'oneness of the Brahman and Jīva'.

¹⁵Time and again Sureśvara refers to different Śrutis in order to lend support for his view. Here, the first *pāda* 'quarter' of the verse is identical with KenaU 1.5 (its first *pāda*), the second *pāda* compares with KenaU 1.6 (the first *pāda*), viz. *yan manasā na manute*, and the third and the fourth *pādas* (i.e. the second

line) are similar to KenaU 1.5-9 (the second line of each), viz. *tad eva brahma tvam viddhi nedam yad idam upāsate*. This precludes the idea of any *upāsana* (or *nididhyāsana*—cf. note 5 above).

¹⁶'That' in 'similar to that' means what is obtained (lit. limited or covered) by an act of meditation.

¹⁷This is similar to KaṭhU 3.12 (the second line): *drśyate tv agryayā buddhyā sūkṣmayā sūkṣma-darsibhiḥ*.

रजस्तमोनुविद्धेन यतो न ब्रह्म गम्यते ।

शुद्धचेतस्तया तस्माद्विद्याद्ब्रह्मान्तरात्मनि ॥८६॥

यद्वानात्माभिसंबन्धात्पूर्वमैकात्म्यनिष्ठता ।

सर्वप्राणभृतां बुद्धिरित्यर्थो वचसो भवेत् ॥८७॥

[This as well as the following verse are meant for the interpretation of the Śruti quoted in the preceding verse]

Since the Brahman is not understood by one who is overcome by *rajas* and *tamas*; therefore, one should know the Brahman within one's (*own*) consciousness, being possessed of purified intellect.¹ [86]

Or rather, the meaning of the Śruti (passage) could be that before there occurred their association with the non-Ātman, the intellect of all human beings² rested in the uniqueness (of the Ātman).³ [87]

¹The word *śuddha-cetas* means *śuddha-citta*. This *citta* does not belong to *buddhi* part but it belongs to the individual consciousness which is held to be participating in any knowledge situation. And this *citta*, individual consciousness, is identical with the body itself and brings about a favourable situation for the knowing mechanism.

²The word *prāṇa-bhṛt* signifies literally one who bears, i.e. possessed of, *prāṇa*, i.e. a living being. Yet because of the reference to *buddhi* 'intellect', it is proper to translate it as a human being.

³cf. *brahmaikātmya* in verse 82 above; NKL explains *aikātmya* as *cidākāratā*.

एषोऽर्थो वचसस्तस्य न तूपासाविधिर्भवेत् ।
प्रध्वस्तभेद ऐकात्म्ये नोपासनविधिर्यतः ॥८८॥

This is the meaning of that statement; it could not indeed be any injunction for meditation,¹ since there would not be any injunction for meditation in the case of the uniqueness of the Ātman, wherein the existence of discrete objects is completely destroyed. [88]

¹This refers to *yadvānātmābhisambandhāt* (*upāsāvidhiḥ*) in the preceding verse. The purpose of this verse is to preclude the possibility of assuming that there is scope for an injunction with regard to meditation.

चक्रवृत्तिरतोऽसाध्वी श्रुत्यादिमितिबाह्यतः ।
तदेतदिति वाक्यार्थो ग्राह्योऽतः संभवान्मितेः ॥८९॥

[Here is concluded Sureśvara's refutation of Bhartr's interpretation of the illustration.]

Hence the notion of the cycle (of the Brahman) is not reasonable for the reason that it is outside (the ways of right) knowing, viz. *śruti* etc.¹ The meaning of the sentence *tad etat...*² should therefore be acceptable owing to the possibility of right knowing. [89]

¹Read BUBV 2.4.214: *śruti-liṅgādiko nyāyaḥ śabdaśakti-vivekakṛt/ āgamārtha-viniścityai mantavya iti bhanyate*|| On this, see Hino (1982), pp. 177-178. Also cf. *Arthasaṁgraha* (p. 12): *etasya vidheḥ sahakāri-bhūtāni ṣaṭ pramāṇāni śrutiliṅga-vākya-prakarāṇa-sthāna-samākhyā-rūpāṇi*.

²BU 2.5.19: *tad etad brahma apūrvam anāparam anantaram abhāhyam...*

तदाहुरिति वाक्येन ब्रह्मविद्याप्रयोजनम् ।
साक्षेपं प्रागुपन्यस्तं तस्यायं निर्णयः कृतः ॥९०॥

In the passage beginning with *tad āhur*, 'Now, they

declare',¹ there is first stated the purpose of the knowledge of the Brahman, together with the objection to it, and this is the decision given in respect of that (viz. the sentence of the Śruti). [90]

¹BU 1.4.9: *tad āhur yad brahma-vidyayā sarvaṃ bhaviṣyanto manyasyā manyante kim u tad brahmāved yasmāt tat sarvaṃ abhavad iti*

आत्मेत्येवेति सूत्रस्य व्याख्येयं सम्यगात्मनः ।

पञ्चभिर्ब्राह्मणैः श्रुत्याकारि कृत्स्नात्मबुद्धये ॥६१॥

समाप्ता ब्रह्मविद्येयं कैवल्यावाप्तयेऽखिला ।

यामवोचत्स्वभार्यायै याज्ञवल्क्योऽतिविस्तरात् ॥६२॥

Thus has the Śruti offered, in its five sections,¹ the explanation² of (or exposition on) the fundamental proposition 'only as the Ātman'³ for the complete knowledge of the Ātman. [91]

Thus is completed (the instruction on) the lore of the Brahman,⁴ for attaining the state of the Absolute, (the one) which Yājñavalkya imparted to his wife, at (sufficient) length. [92]

¹I.e. BU 2.1-5.

²Here the word *vyākhyā* does not mean 'definition'; it means 'exposition'.

³The so called (*vidyā*)*sūtra* 'fundamental proposition' is *ātmety evopāsita* (BU 1.4.7).

⁴The purpose of this verse is to state that the complete exposition of the fundamental proposition given so far is also the exposition of the lore of the Brahman. The two are in no way different.

यथोक्तब्रह्मविद्याया इत आरभ्य भण्यते ।

आख्यायिकेयं स्तुत्यर्था प्रवृत्त्यङ्गतया परा ॥६३॥

आख्यायिकार्थं मन्त्राभ्यां व्याचष्टे श्रुतिरादरात् ।

श्रुतिमन्त्रस्तुतो ह्यर्थ आदेयत्वं निगच्छति ॥६४॥

[These verses are the link between the discussion so far on the knowledge of the Brahman and BU 2.5.16 and 17: They say that two *mantras* quoted in BU 2.5.16 and 17 have the same purpose, viz. imparting instruction about the knowledge of the Brahman.]

(Now) from this (ensuing) passage begins the narrative in praise of the lore of the Brahman (which is) thus discussed (above), as subservient to (securing one's) inclination (to proceed to the study of the lore).¹ [93]

The Śruti has with great care (lit. respectfully) explained the meaning of the narrative in two *mantras*,² because a meaning (i.e. doctrine) which is presented (lit. praised) by the *mantras* of the Śruti possesses (lit. comes to have) acceptability. [94]

¹That is to say: The narrative in BU 2.5.16-17 is purposeful like an Arthavāda.

²The word *mantra* means 'verse from a Vedic Saṁhitā, (such as the *R̥gvedasaṁhitā*, the *Yajurvedasaṁhitā* etc.) The *mantras*, the prose of the Brāhmaṇa and the Upaniṣadic passages are all called Śruti. Yet, *mantra* is supposed to be the greatest authority.

[Now follows a discussion on Madhuvidyā in the light of the narrative of the Aśvins' securing the knowledge of Madhuvidyā and also of two other Vedic verses.]

अवाप्तपुरुषार्थोऽपि यामरक्षच्छचीपतिः ।
 प्रत्यग्विद्यैव तेन स्यादुदारफलसाधनम् ॥६५॥
 महता च यतोऽश्विभ्यामायासेनार्जिता पुरा ।
 ब्रह्मविद्या ततो नास्या मुक्तौ स्यात्साधनं परम् ॥६६॥
 निःशेषपुरुषार्थानां कैवल्योत्तमता यथा ।
 साधनानामपि तथा तद्विद्योत्तमसाधनम् ॥६७॥
 अश्व्याथर्वणयोर्वृत्तं ब्रह्मविद्याप्तिकारणात् ।
 यत्प्रागाविष्कृतिस्तस्य मन्त्राभ्यां क्रियतेऽञ्जसा ॥६८॥

[These verses give the meaning of the two *mantras* quoted in BU 2.5.16 and 17.]

The knowledge of (the nature of) the individual consciousness, which the lord of Śacī (viz. Indra) guarded (i.e. kept from others), even though he had obtained his end of life (viz. god-head in heaven)¹; hence, it would be a means to the acquisition of (the most) profuse fruit (viz. liberation). [95]

And since that knowledge of the Brahman was formerly (i.e. in the ancient times) obtained by the two Aśvins with great efforts,² therefore, there could not be any greater means to liberation (than that knowledge). [96]

As the greatest excellence abides in liberation amongst all the ends of human life, among all the means (to liberation), the best means is the (acquisition of the) knowledge of the Brahman. [97]

Whatever transpired between the Aśvins and Ātharvaṇa in respect of (the Aśvins') obtaining the knowledge of the Brahman is first made known by two *mantras* (of Rv) in a clear way. [98]

¹Sureśvara bases his verse on the Purāṇic notion that attaining the status of Indra was the highest fruit of sacrificial activity and the highest goal of human life. Even then, he did not part with Madhuvidyā. This shows how much (more) precious is the knowledge of the Brahman.

²This has a reference to ŚatBr 14.1.1-2 where the ritual of Pravargya is discussed. The Aśvins are said to have obtained knowledge of that ritual which made the imperfect sacrifice perfect. Thereby they attained a share of Soma at that ritual. This refers to the *tvāṣṭra madhu* mentioned in verse 114 below.

अश्विभ्यां प्रार्थितोऽथर्वा मधुविद्यामिमां किल ।
तावथर्वाब्रवीदिन्द्रश्छिन्द्यान्मे ब्रुवतः शिरः ॥६६॥
अतो भयादिमां विद्यां युवाभ्यां न ब्रवीम्यहम् ।
तमूचतुः पुरैवावामिन्द्रच्छेदनतः शिरः ॥१००॥

छित्त्वा तवाश्व्यं सन्धाय शिरः श्रोष्यावहे ततः ।
 ब्रूह्यतोऽश्व्येन शिरसा मधुविद्यां विमुक्तये ॥१०१॥
 एवमस्त्वित्यनुज्ञाते छित्त्वा तस्याथ तच्छिरः ।
 समधत्तां शिरोऽश्वस्य तेन विद्यामुवाच सः ॥१०२॥
 पुनश्छिन्नेऽथ शिरसि तेनेन्द्रेणाश्विनावपि ।
 समधत्तां शिरस्तस्य विद्यां स्वशिरसाथ सः ॥१०३॥
 शेषामवोचदश्विभ्यामृतायन्नात्मनो वचः ।
 यत एवमतस्तस्मात्सत्यं रक्ष्यं प्रयत्नतः ॥१०४॥

[The narrative of the Aśvins and Ātharvaṇa is given here in brief.]

It is said that Atharvan (i.e. Ātharvaṇa) was requested by the Aśvins (to impart to them) this knowledge of Madhu. To them he said, "Indra would cut off my head if (lit. while) I talked. [99]

"Hence, out of fear (for him), I do not disclose (lit. declare) this lore to you two." The two (Aśvins then) said to him, "Even before your head is cut off by Indra, [100]

we shall have cut your head and fixed (on your shoulders) a horse-head; then shall we hear (the knowledge of Madhu) from that (head). Disclose (lit. declare) the lore of Madhu with that horse-head, so that (we can attain) liberation." [101]

When he consented (in the words), "Be it so", they cut off his head and fixed a horse-head (on his body). By that (horse-head) he then declared (to them) the lore (of Madhu). [102]

Then, after that (horse)-head was cut off by Indra, the two Aśvins also restored his own head (to his body). Then, with his own head, he — [103]

declared to the Aśvins the remaining part (of the lore of Madhu), (thus) wishing to follow *rta* (i.e. fulfilling his agreement).¹ Since this is so, therefore should one maintain (lit. protect) Truth with all (of one's) efforts. [104]

¹*ṛtāyat* (Vedic adj.) wishing to acquire, i.e. follow, *rta*

‘the eternal order (of things)’ which comprises the ever obtaining Truth. This justifies the words *satyaṃ rakṣyam prayatnataḥ. ṛta* of Vedic times paved away to the concept of *satya* ‘verifiable truth’.

इदं वै तन्मधु प्रोक्तं यत्तत्प्रकरणान्तरे ।
 दध्यङ् ह वा आभ्यामिति श्रूयते ब्राह्मणोक्तिः ॥१०५॥
 मधुब्राह्मणमेतत्तद्यत्प्रागुक्तमभूत्स्फुटम् ।
 दध्यङ्ङाथर्वणोऽश्विभ्यां यदुवाचात्मबोधनम् ॥१०६॥
 अश्व्याथर्वणयोरेतत्कर्म पश्यन्नृचाब्रवीत् ।
 ऋषिरार्षेयदृष्टचैव तदेतदभिधीयते ॥१०७॥

This is indeed that Madhu, which was declared in another context (i.e. the book of this text),¹ for it is heard from the Brāhmaṇa (i.e. in a statement in it),² “Indeed, to these two Dadhyañc Ātharvaṇa...” [105]

This is that (known) section on Madhu which was earlier fully (or clearly) explained, (the one) which Dadhyañc the son of Atharvaṇa, declared to the Aśvins, revealing (as it does, the nature of) the Ātman. [106]

Seeing with a seer’s eye this doing of the Aśvins and Ātharvaṇa, the seer spoke (about it) in a *ṛk*. It is declared (thus) here. [107]

¹In the context of the Pravargya rite, in the earlier section of ŚatBr. *prokta* is paraphrased by NKL as *sūcita*. This indicates the unity of thought in ŚatBr 14.1.1-2 and BU 2.5.16.

²The quotation *dadhyañ ha vā ābhyām* is from ŚatBr 14.1.1; it is earlier referred to in Rv 1.116.12.

आविष्करोमि तत्कर्म युवयोरद्य हे नरौ ।
 लाभाय सनये क्रूरं चक्रथुर्यद्रहस्यगौ ॥१०८॥
 वृष्टेरागमनं यद्वत्स्तनयित्नुः प्रबोधयेत् ।
 रहस्यं युवयोः कर्म तद्वदाविष्करोम्यहम् ॥१०९॥
 अश्वस्य शिरसा वां यदवोचन्मध्वसावृषिः ।
 दधीचोऽश्व्यं शिरश्छित्त्वा निकृत्यास्य शिरोऽश्विनौ ॥११०॥

संधत्तां सोऽश्वशिरसा युवाभ्यां मध्वथाब्रवीत् ।

ऋतायन्सत्यमात्मानं कर्तुमिच्छन्नसावृषिः ॥१११॥

प्राणसंशयमापन्नस्तस्माच्चैवावसीयते ।

आत्मनो मरणेनापि सत्यं रक्ष्यं प्रयत्नतः ॥११२॥

[In the preceding verses, Sureśvara gave a summary of the contents of the *mantras* in Rv 1.116.12 (accents are not shown here): *tad vām narā sanaye daṁsa ugram āviṣkṛṇomi tanyatur na vṛṣṭim| dadhyañ ha yan madhv ātharvaṇo vām aśvasya śirṣṇā pra yad im uvāca|| atharvaṇāyāśvinā dadhice 'śvyamṁ praty airayatam*. Now he gives a philosophical exposition of the same]

That mighty deed of you two, which you did for a gain, do I proclaim (lit. reveal) today, O heroes, O knowers of (the) secret. [108]

As the cloud would make known (i.e. proclaim) the coming of showers, so do I reveal (that) secret¹ deed of yours, [109]

viz. that the seer declared to you, the (lore of) Madhu; that you had cut the horse-head of Dadhyañc after you had (earlier) cut off his own head, and O Aśvins, [110]

you had fixed a horse-head on him, and then, that seer revealed (lit. declared) to you that (lore of) Madhu, seeking the *ṛta*² i.e. wishing to prove himself truthful; [111]

and thus he had fallen in danger of life.³ And from that itself is it decided (lit. concluded) that truth should be maintained (lit. protected) by one with all efforts, even at the cost of one's life. [112]

¹Meaning 'not to be known to common people'.

²*ṛta* (in Veda) means the established truth and *satya*, the verifiable truth. See Velankār, "Ṛta and satya in the Ṛgveda" pp. 3-6.

³Sureśvara's exposition well compares with a narrative composition.

⁴The use of the word *ātman* in the sense of 'life' is to be noted.

आदित्यविषयं त्वाष्ट्रं मध्वोचदथर्वणः ।

हे दस्रावपि कक्ष्यं यत्प्रत्यग्याथात्म्यदर्शनम् ॥११३॥

उपक्षयकरौ व्याधेर्दस्रौ स्यातामतोऽश्विनौ ।

न केवलं त्वाष्ट्रमेव कक्ष्यमप्यब्रवीन्मधु ॥११४॥

[Here is given an explanation of the words *tvāṣṭra* and *dasra* in the R̥gvedic verses.]

¹Atharvaṇa (i.e. Ātharvaṇa) declared the Madhu of Tvaṣṭṛ, having the Sun (viz. Āditya) as its object, “O wondrous,² (it revealed) even the secret (lore),³ the knowledge of the true nature of the individual consciousness.⁴

[113]

Hence are the Aśvins declared *dasrau*, viz. those who cause destruction (of malady). (As such, it is no wonder that) not only did (Ātharvaṇa) declare (the) Madhu of Tvaṣṭṛ but also that which was to be kept hidden under the armpit.⁵

[114]

¹This is the explanation of Rv 1.117.22: ...*tvāṣṭram yad dasrau apikakṣyam vām*.

²*dasrā* = *dasrau* (Vedic dual) is the most usual epithet of the Aśvins who are known for their performance of wonderful deeds.

³The word *kakṣya* means ‘secret’; literally ‘kept hidden under one’s armpit’—this follows the reading in Rv. It is apparent that Sureśvara reads *api* as a separate word. This is against the Vedic tradition! He takes *kakṣya* as secret and *api* as *ca*. See next verse also.

⁴*pratyagātman* is light itself.

⁵The first line explains the significance of the epithet *dasrau* and the second line, of the word *api*. Thus, BU has made a change in the R̥gvedic idea wherein *madhu* is understood to be twofold: That which is related to Tvaṣṭṛ and that which is to be kept as secret—one in ritual contexts, the other in philosophical.

प्रवर्ग्याध्याययोरेवं त्वाष्ट्रज्ञानोपसंहृतम् ।

मन्त्रद्वयेन कृत्वाथ कक्ष्यज्ञानोपसंहृतिः ॥११५॥

क्रियतेऽध्याययोरेवं मधुकाण्डं समाप्यते ।

श्रुतिमन्त्रोपदिष्टोऽर्थो यस्मादाद्रियते ततः ॥११६॥

[Concluding remark on the Aśvin-legend]

Thus, having put in two *mantras* the knowledge about (the secret of) Tvaṣṭṛ (which was earlier) imparted in the two chapters on Pravargya¹ is now concluded (i.e. brought out) the secret knowledge (lit. that which is to be kept hidden under the armpit) in these two chapters. [115]

And thus² is concluded the Madhukāṇḍa, because the thought which was given by the *mantras* in the Śruti is to be respected. [116]

¹Cf. ŚatBr 14.1.1-2

²*tvāṣṭra-jñāna* leads to *kakṣya-jñāna*; there is now a shift from ritual to philosophy.

पुरश्चक्रे शरीराणि द्विपदः पक्षिमानुषान् ।

चतुष्पदोऽथ पशवः पुरश्चक्रे स्वमायया ॥११७॥

पुरो भुक्तशरीरात्स पक्षी लिङ्गमिहोच्यते ।

पुरो नवशरीराणि प्राविशज्जलचन्द्रवत् ॥११८॥

[These verses explain BU 2.5.18: *puraś cakre dvipadaḥ puraś cakre catuṣpadaḥ/ puraḥ sa pakṣi bhūtvā paraḥ puruṣa āviśat/*]

First he made cities, i.e. bodies, the bipeds, viz. the birds and the human beings, then he made the four-footed animals, by his own powers. [117]

From the city, i.e. the body which was enjoyed (by him earlier); the bird is (the one which is) an indication;¹ (thus is it stated here.) He entered into new bodies, like the moon, into watery places.² [118]

¹The bird flies from one perch to another, likewise the Ātman moves from one body to another; this is transmigration of the Ātman during the continuance of ignorance. And entering into

the body requires 'subtleness' which is also indicated by the 'bird'.

²While introducing this verse, BU has stated that it has the same significance as the Aśvin-legend. That is to say: Madhu is the all-pervasive character of the Ātman.

कस्मात्पुरुष इति चेत्पुरुषार्थं श्रुतिः स्वयम् ।
स वा इत्यादिनाचष्टे सर्वैकात्म्यावबुद्धये ॥११६॥
पुरुषोऽयं भवेदात्मा यतः शेते स पुरुषु ।
सर्वासु तेन लोकेऽस्मिन्पुरुषोऽयमितीर्यते ॥१२०॥

[Here is an incidental explanation of the word *puruṣa* in BU 2.5.18.]

If one were to ask 'why is that one called Puruṣa?', the Śruti itself declared the meaning of the Puruṣa in the passage beginning with *sa vā* so that there arises the understanding that all is but the uniqueness of the Ātman. [119]
The Ātman is Puruṣa because he resides in all (the bodies).
Hence, he is described in this world, (as) 'This is Puruṣa.'¹ [120]

¹This is an etymological meaning of the word *puruṣa*. It is a characteristic method of Brāhmaṇas for explaining various names of the rites. See BU 2.5.18: *sa vā ayam puruṣaḥ sarvāsu pūrṣu puriṣayaḥ.*

परिच्छेदप्रसङ्गश्चेन्मैवं यस्मादिदं जगत् ।
नैनैनानावृतं किञ्चिन्नाव्याप्तं ह्योततन्तुवत् ॥१२१॥
नासंवृतं तथा किञ्चित्प्रोततन्तुवदात्मना ।
पूर्णत्वात्पुरुषः सोऽयं ब्रह्मैकं पुरुषस्ततः ॥१२२॥

If (one were to say) that this (definition of Puruṣa) involves the contingency of (accepting) limitation (on the Puruṣa in respect of uniqueness)¹ (then our reply is): do not say so, since it is not that, not even a little of this universe is not covered by this one and also not pervaded (by this one) like a lengthwise woven thread.² [121]

So also there is not anything that is not wrapped by this Ātman like a breadthwise woven thread. He is the Puruṣa because of his fullness and, therefore, this Puruṣa is the unique Brahman.³

[122]

¹Because of *puri śete* one can postulate the idea of duality.

²Read BU 2.5.18: *nainena kimcanānāvṛtam nainena kimcanāsamvṛtam*.

³See verse 66 above; two similes in these two verses refer to the *otaprotatva* of the universe effected by the Brahman in BU.

यस्मात्परं नापरमस्ति किञ्चि-

द्यस्मान्नाणीयो न ज्यायोऽस्ति कश्चित् ।

वृक्ष इव स्तब्धो दिवि तिष्ठत्येक-

स्तेनेदं पूर्णं पुरुषेण सर्वम् ॥१२३॥

आवृतं ज्ञप्तिमात्रेण सर्वमात्मीकृतं जगत् ।

संवृतं प्रतिषिद्धं तद्यदनात्मेव लक्ष्यते ॥१२४॥

तन्नास्ति कारणं कार्यं यन्नानेनात्मसात्कृतम् ।

तन्नास्ति कारणं कार्यं यन्नानेनात्मना ह्नुतम् ॥१२५॥

[These verses re-affirm that the Puruṣa is the same as the Ātman.]

All this is pervaded (lit. filled) by that Puruṣa in comparison with whom there is nothing higher or lower, than whom not any other¹ is smaller or greater, and who stands alone like a huge tree steady in the sky.²

[123]

(This) whole universe which is ascertained as the Ātman is pervaded by Knowledge alone. All that is wrapped (i.e. limited or covered by ignorance) is rejected (i.e. not understood as the Ātman); (it is) what is characterized like some non-Ātman.³

[124]

There is not a cause or an effect which is not included in itself by the Ātman. (And also) there is no such cause or effect as is not covered by the Ātman.⁴

[125]

¹This description of the Puruṣa is thus that of the Brahman. This leaves no scope for any notion of duality.

²Sureśvara cites this verse from the *Śvetāśvataropaniṣad* viz. 3.9.

³The first line explains what is meant in verse 121 and the second, verse 122. The words *āvṛta* 'covered' and *saṁvṛta* 'limited' frequently occur in GK.

⁴The verse expresses the thought of the preceding verse, but by the *vyatireka* method; cf. Hino (1982), p. 47 ff. on *anvayavyatireka* method.

रूपं रूपं प्रति ह्येष प्रतिरूपो बभूव ह ।
 देहं देहं प्रविष्टः संस्तद्देहाकारतामगात् ॥१२६॥
 मायाभिः प्रत्यगज्ञानैर्यदि वानृतबुद्धिभिः ।
 गम्यते पुरुरूपोऽज्ञैरेकोऽपि जलसूर्यवत् ॥१२७॥
 प्रत्यग्याथात्म्यबोधार्थं रूपं मायामयं विभोः ।
 शास्त्राचार्यादिना नर्ते ज्ञातुं वस्त्वह शक्यते ॥१२८॥
 कुतोऽस्य बहुरूपत्वमिति हेतुरिहोच्यते ।
 युक्ता ह्यस्येति वचसा मिथ्याज्ञानैकहेतुतः ॥१२९॥
 स्रजस्तत्त्वापरिज्ञानाद्युक्ता दण्डादयो यथा ।
 प्रत्यक्तत्त्वापरिज्ञानादात्मनो हरयस्तथा ॥१३०॥
 इन्द्रियाण्येव हरयो हरणाद्विषयान्प्रति ।
 दश तानि सहस्राणि शतानि प्राणिभेदतः ॥१३१॥

[These verses explain BU 2.5.19 which is originally an exposition on Rv 6.47.18: *rūpaṁ rūpaṁ pratirūpo babhūva tad asya rūpaṁ praticakṣaṇāya/ indro māyābhiḥ pururūpa iryate yuktā hy asya harayaḥ śatā daśa*]]

Indeed¹ did he become a counter-form for each and every form. Having entered into each body, he is reported to have¹ attained the shape of that body.² [126]

On account of his powers, i.e. various types of ignorance about the true nature of the individual consciousness (or owing to false knowledge), is this one, though unique (i.e. one without a second) is understood as being possessed of many forms like the sun (which seems to be many) in watery places.³ [127]

It is not possible in this universe⁴ to know Reality, viz. the form of the all-pervading (Ātman) which is possessed of many powers,⁵ without (the help of) the Śruti and teachers etc., in order that one can understand the true nature of the individual consciousness.⁶ [128]

If one asked the question, 'How can this one have many forms?', the reason (for saying so) is stated here⁷ by the statement, *yuktā hy asya...*, to say (that 'this is so) on account of its originating from false knowledge alone.' [129]

As (the apprehension of) a stick etc. is, on account of non-grasping the truth about the wreath (etc.),⁸ considered as right knowledge, so also are the sense-organs⁹ supposed to be related to the Ātman because of the non-knowing about the true nature of the individual consciousness. [130]

On account of their carrying away (the Ātman) to the objects (of worldly experience) the sense-organs are called horses;¹⁰ they are ten, a thousand, a hundred, according as they are grasped¹¹ as discrete beings.¹² [131]

¹This is owing to the use of *ha* in the verse. The two particles *hi* and *ha* emphasise the popular experience of duality.

²This is the meaning of *rūpaṁ rūpaṁ pratirūpo babhūva tad asya rūpaṁ praticakṣaṇāya*.

³This sets aside the possible notion that the manifold forms of the Ātman have a material or an efficient cause.

⁴*iha* refers to transmigratory existence.

⁵It should be observed that this verse also is taken by BU to convey the idea of Madhu as the all-pervading character of the Ātman that is noticed in the Aśvin-legend.

⁶These two verses interpret the second line: *indro māyābhiḥ pururūpa iyate*. Sureśvara interprets the word Indra in the Śruti to mean the Brahman and Indra's powers (*māyās*) as *upādhis*: cf. Śaṅkara on this at BU 2.5.19.

⁷This verse explains the significance of the line *yuktā hy asya*.

⁸This is an elaboration of verse 129, in the form of an illustration with its explanation.

⁹*harayaḥ* are horses, here standing for the sense-organs; cf. KaṭhU 1.3.4: *indriyāṇi hayān āhur.....*

¹⁰According to Sureśvara, *daśa* in the Śruti has to be understood as the sense-organs apart from *manas*. On this, see BU 3.9.4: *daśeme puruṣe prāṇā ātmaikādaśaḥ*; and also BSB 2.4.6 (p. 635) wherein BU 3.9.4 is referred to and explained.

¹¹This is owing to ignorance.

¹²This is the explanation of *prāṇibheda* 'notion of discreteness of beings' in the last quarter *harayaḥ śatā daśa*.

नान्यो हेतुरविज्ञानादिन्द्रियादेरिहात्मनि ।
यतोऽयमेव हरयो यावत्संख्या तदाश्रया ॥१३२॥
अयमेवेन्द्रियत्वेन देहत्वेन च कल्पितः ।
तथा शतसहस्रादिसंख्याभेदेन चाप्ययम् ॥१३३॥
नामरूपक्रियाभेदैर्यथा पूर्वमवादिषम् ।
अयमेव तथारूपः कल्पितोऽविद्ययाद्वयः ॥१३४॥
तदेतत्कल्पितं सर्वं सहेतु फलवज्जगत् ।
प्रत्यगात्मात्मकं भास्वत्प्रज्ञानघनतत्त्वकम् ॥१३५॥

[These verses explain BU 2.5.19: *ayam vai harayaḥ ayam vai daśa ca sahasrāṇi bahūni cānantāni ca* in relation to *yuktā hy asya...*]

There is no other cause than ignorance about the sense-organs etc. (that makes one feel their being supported) in the Ātman, since this one itself is the horses (i.e. sense-organs), (therefore) whatever (be) the number (of them), they are dependent on it. [132]

The same Ātman is conceived as being the organs and the body, so also (is) this one (known) by the various numbers, a hundred, a thousand etc. [133]

The same Ātman, (who is) formless (and) one without a second, is conceived by discrete names, forms and actions on account of ignorance, as I have discussed (lit. stated) earlier. [134]

All this universe is then conceived as having a cause and (also) as having an effect; (nevertheless) being of the nature of the individual consciousness and a shining mass of consciousness in its (true) nature.¹ [135]

¹The world, a product of ignorance, is conceived to be consisting of causes and effects, though it is in reality of the nature of the Ātman.

निःशेषोपनिषत्सारस्तदेतदिति सांप्रतम् ।

उक्त्याविष्क्रियते साक्षात्करविन्यस्तबिल्ववत् ॥१३६॥

[Sureśvara states how the previous discussion on the *ṛks* to the Aśvins have lead one to understand the general purport of the Upaniṣads. It is specifically re-affirmed in the statement *tad etat...*]

The statement *tad etat* is now the essence of all Upaniṣads without exception. The Śruti reveals it directly (just) like a Bilva fruit put on a hand. [136]

अज्ञातं संशयज्ञातं मिथ्याज्ञातमिदं जगत् ।

तदेतदित्यनूद्यैतत्तत्त्वमवबोध्यते ॥१३७॥

Having reiterated in the statement *tad etat* that this universe is (really) not known, known with doubt (about its true nature) and known falsely, (the Śruti) informs (us) of its true nature. [137]

ब्रह्मेति वास्तवं वृत्तं तावदस्यावबोध्यते ।

ज्ञानात्पुरापि ब्रह्मैव नातो ज्ञानफलं भवेत् ॥१३८॥

To begin with, the real nature of this (world) is stated in the word *brahman*, viz. this (world) is the Brahman itself,¹ even before the knowledge of the true (is acquired by one). Hence, this cannot be the result of knowledge.² [138]

¹This explains the meaning of the word *brahman*.

²This sets aside the popular notion that knowledge occurs to one as the result of some activity. Cf. Śaṅkara's refutation of this notion in BSB 1.1.4 (pp. 125-128)

अपूर्वमिति कार्यत्वनिषेधायाभिधीयते ।

कारणत्वनिषेधाय तथानपरगीरियम् ॥१३६॥

The word *apūrva* is uttered for declining the notion that it is of the nature of an effect; so also the word *anapara* is (uttered) for rejecting the notion that it is of the nature of a cause.¹

[139]

¹This brings out the significance of the words *apūrva* and *anaparam*.

अनन्तरमिति तयो रन्ध्रस्य प्रतिषेधनम् ।

कार्यकारणयोर्बाह्यमबाह्यमिति वार्यते ॥१४०॥

The word *anantara* is for setting aside the notion of any distinction of (the Brahman) from the two. So also, by the word *abāhya* is warded off the notion that the Brahman is kept outside i.e. away from any cause and its effect.

[140]

सत्ता वानन्तरगिरा ब्रह्मणः प्रतिषिध्यते ।

विशेषोऽबाह्यशब्देन ततो वाक्यार्थरूपकम् ॥१४१॥

Or, by the word *anantara* is denied the existence of the Brahman (as a discrete object); so also, by the word *abāhya* (is denied that it is) the distinctive feature (of the discrete objects)—from that (comes to the fore) the explanation of the sentence-sense (viz. the uniqueness of the Ātman).

[141]

नात्मनोऽन्यत्र संभाव्यमपूर्वादि यदीरितम् ।

ब्रह्मात्मैवेत्यतो वक्ति श्रुतिरैकात्म्यसिद्धये ॥१४२॥

पारोक्ष्यप्रतिषेधार्थं ब्रह्मात्मैवेति भण्यते ।

ब्रह्मैवात्मेति च तथा संसारित्वनिवृत्तये ॥१४३॥

भिन्नं ब्रह्मापरिज्ञानात्संसारित्वं तथात्मनः ।

तत्त्वज्ञानात्तमोऽध्वस्तौ नेतीत्यात्मावशिष्यते ॥१४४॥

[These verses explain *ayam ātmā brahma*]

Whatever was stated with the word *apūrva* in the beginning cannot be possible in respect of anything else than the Ātman. Hence, the Śruti asserts that the Brahman is but the Ātman so that the uniqueness of the Ātman is established.¹ [142]

The statement, 'The Brahman is but the Ātman' is made, for rejecting the non-immediateness (of the Brahman). So also, the statement, 'The Brahman alone is the Ātman' is made in order to reject the idea of transmigratoriness (of the Brahman). [143]

Owing to the non-knowing (of it), the Brahman is taken as distinct (from other objects); in the same way, transmigratoriness (is stated) of the Ātman. When there occurs the destruction of darkness (viz. ignorance) at (the rise of) the knowledge of the true nature of the Ātman, there remains (only the awareness that) the Ātman is (to be described as) 'Not this, not this'. [144]

¹This sums up the explanation of the words, viz *apūrva*, *anapara*, *anantara* and *abāhya* and conveys that the Brahman is *avyāvṛtta*, *ananugata*, *niḥsāmānyaviśeṣa* as said earlier in verse 6.

सर्वोऽनुभव एवायमतः सर्वानुभूः परः ।

कात्स्न्यत्सर्वो भवेदेष चिन्मात्रत्वात्तथाऽनुभूः ॥१४५॥

All this (universe) is but the (object of) experience, beyond this is the experiencer of all, because of its fullness, it is all. So also, because of its nature of (being) Sentiency alone, it is the experiencer.¹ [145]

¹This is an explanation of the word *sarvānubhūḥ* in the end of BU 2.5.19.

इतीत्युक्तपरामर्शो वेदाज्ञा चानुशासनम् ।

कर्तव्यमेतद्विज्ञानमिति वेदानुशासनम् ॥१४६॥

The word *iti* is the reference to what is (already) stated;

the Vedic teaching is the instruction. The words *kartavyam etad vijñānam* are the instruction.¹ [146]

¹This is the explanation of *ity anusāsanam*.

अस्यातिलङ्घने दोषः संसारानर्थसंगतिः ।

कुर्वतश्च महाँलाभ आत्मनः कृतकृत्यता ॥१४७॥

In transgressing this (instruction regarding acquiring Knowledge), there occurs the fault, viz. the association with, (the) undesirable object, viz. transmigratory existence. There will be great benefit accruing to one who is doing it (viz. the instruction of the Śruti).¹ The Ātman will have done what has to be done (viz. one will be liberated). [147]

¹Following the instruction mentioned in the preceding verse.

इति द्वितीयाध्यायस्य पञ्चमं मधुब्राह्मणं समाप्तम्

APPENDIX

BUBV 2.6

वंशब्राह्मणम्

स्तुत्यर्थं ब्रह्मविद्याया ब्रह्मविद्वंश उच्यते ।
जपोऽयं ब्रह्मविज्ञानजन्मने चोद्यते श्रुतौ ॥

Now is stated the line of the knowers of the Brahman so that the lore of the Brahman is praised; for, this recitation¹ (viz. that of the line) is enjoined in the Śruti as conducive to the knowledge of the Brahman.² [1]

¹Śaṅkara writes *mantraś cāyam svādhyāyārtho japārthaś ca*; Sureśvara holds *svādhyāya* and *japa* as Duty enjoined on one by the Śruti: *svādhyāyo 'dhyetavyaḥ* (*Taittirīyāranyaka* 2.15).

²Note the contrast between *brahmavidyā* and *brahmapijñāna*.

पुंमत्यूहोत्थिताशङ्कानिवृत्त्यर्थं यथोदितम् ॥
ब्रह्मज्ञानस्य वा वंशो यत्नाच्चक्षुत्यायमुच्यते ॥

(This sixth Brāhmaṇa follows the Madhubrāhmaṇa) as stated (in Vedic tradition) so as to effect the removal of a doubt that (the teaching of the Madhukāṇḍa) has arisen from human intellect and ratiocination. Or rather, this line (of teachers) of the knowledge of the Brahman is stated by the Śruti time and again.¹ [2]

¹This is the meaning of the word *yatnāt*; cf. SP: *yatno bahuśo vacanam*; it does not have a technical meaning of ritual texts.

यस्यानुशासनं तस्य स्वयंभोः प्रतिपत्तये ॥
पौतिमाष्यादिको ग्रन्थः श्रुत्याथ प्रतिपाद्यते ॥

Now is stated the work beginning with the word *pautimāṣya* so that there arises (in one) the knowledge of that Self-born whose instruction (it is).¹ [3]

BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA

3.1

Aśvala Brāhmaṇam

समाप्तो मधुकाण्डार्थो याज्ञवल्कीयकाण्डगः ।

अतः परं प्रयत्नेन श्रुत्या व्याख्यायते स्फुटम् ॥१॥

(The discussion of) the matter in the Madhukāṇḍa¹ is completed. Now hereafter will be clearly explained carefully the matter in the Yājñavalkyakāṇḍa. [1]

¹This is the traditional name for the first and second chapters of the BU. Yājñavalkyakāṇḍa or Munikāṇḍa, which follows, is the name for the third and fourth chapters.

याज्ञवल्कीयमेतस्मान्मधुकाण्डादनन्तरम् ।

काण्डं विचारभूयिष्ठमधुनारभ्यते परम् ॥२॥

The Yājñavalkyakāṇḍa (which comes) after this¹ Madhukāṇḍa (and which is) mostly discursive² is now begun thereafter.

[2]

¹That is, which is discussed just herebefore.

²This is to invite attention to its contrast with the Madhukāṇḍa which is *āgamapradhāna*, i.e. it enunciates the instruction handed down in tradition. (See note 2 under verse 5.) Read NKL: *āgamapradhānam madhukāṇḍam, pramāṇānugrāhakatarkapradhānam munikāṇḍam iti tadānantaryam.*

ननु पूर्वं य उक्तोऽर्थः स एवेहापि भण्यते ।

पुनरुक्तं न च न्याय्यमेकप्रवचनस्थयोः ॥३॥

(One might ask:) 'But there is being discussed here the same matter (as was) discussed earlier! And repetition (of matter) is not reasonable in (two sections) occurring in one (text of) exposition'.¹ [3]

¹SP points out that repetition cannot be tolerated on the ground that it would oppose the Vedāntic manner of discussion which is adopted in the topic of *sarvavedāntapratyaya* (BS 3.3.1). Also it observes that repetition does not produce any new argument. Yet read NKL: *evam punaruktiparihāre 'pi tadajñānāt* (read the editor's note: 'suggested by *vicārabhūyiṣṭham* in verse 2 above').

एकार्थत्वेऽपि च सति नैवास्य पुनरुक्तता ।
याज्ञवल्कीयकाण्डस्य ह्युपपत्तिप्रधानतः ॥४॥

(The Siddhāntin answers:) '(But) there is not repetition of (matter in) this, even though there is the sameness of (its) meaning (with that of the earlier portion) for the reason that the Yājñavalkyakāṇḍa is based on the prominence of reasoning'.¹ [4]

¹SP points out: they do not consider such writing as repetition as is in support of what has been the principal matter of discussion.

आगमोक्तिप्रधानत्वं मधुकाण्डस्य वर्णितम् ।
आगमार्थविशुद्ध्यर्थं युक्तीरत्र प्रवक्ष्यति ॥५॥

It is (already) pointed out¹ that (the matter in) the Madhukāṇḍa attaches prominence to what has come from tradition.² (Now, this Kāṇḍa) here will state (various) reasons for clarifying the matter (which has come) from tradition.³ [5]

¹Literally, described; cf verse 7 below.

²We shall use hereafter in this section, only 'tradition' for instruction handed down in tradition.

³The word 'tradition' here refers to traditionally handed down doctrines or thoughts of the Śruti.

न चागमस्य स्वातन्त्र्यं युक्त्युक्तेरपनुद्यते ।
अर्थान्तरत्वाद्युक्तीनां प्रमाणेभ्यो यतस्ततः ॥६॥

Further (ca), the independence¹ of tradition is not denied (or set aside) by stating reasons (for proving its authoritativeness) since the reasons convey other matters² which cannot be considered as (properly supported by) the means of knowing. [6]

¹Its character as self-established or as its not having the need of any proof.

²That is to say; they are not wholly similar to what is conveyed by proper reason. Cf. NKL: *apramāṇatvād iti* (or, *pramāṇabhinnatvāt* as noted by the editor of NKL).

सर्वप्रमाणशेषत्वं युक्तीनामुपवर्णितम् ।
शास्त्रान्तरेष्वपि तथा नातः स्वातन्त्र्यखण्डनम् ॥७॥

(Again) it is pointed out that, in respect of other Śāstras also, all reasoning is (but) ancillary to that of all (other) means of knowing. As such, there is no denial¹ of the independence (of tradition) from this (adducing of reasoning).² [7]

¹Literally, destruction, i.e. setting aside.

²SP points out the definition of reasoning (*tarka*) as given in *Nyāyasūtra* 1.1.40: *pramāṇāni tarkaviviktam arthaṃ yathābhūtam adhigamayanti* and others follow it. It quotes, further, the views of the commentators and sub-commentators of *Nyāyasūtra* also.

पदार्थविषया चेयं युक्तिस्तर्कोऽभिधीयते ।

वाक्यार्थस्त्वागमादेव निरपेक्षमतो वचः ॥८॥

And this reasoning, pertaining to matters conveyed by the (various) words (used in the discussion), is called reasoning (*tarka*). As against this (*tu*), the meaning conveyed by the (Śruti) statement¹ is understood only from tradition. Therefore, the statement (of the matter in this Kāṇḍa) is (in reality) independent (of any reasoning etc.). [8]

¹That is, the matter stated in the Śruti. Cf. NKL: *viṣayabhedāc ca na sāpekṣatā* and the editor's note: *tvampadārthaśodhanam yuktisāpekṣam aikyārūpavākyārthajñānam vākyamānādhīnam ity arthaḥ*.

पौरुषेयवचःस्वेव युक्तेः प्राधान्यमिष्यते ।
अनरोक्तौ तु तात्पर्यं युक्तेरर्थो न युक्तिततः ॥९॥

Prominence of reasoning is desired (i.e. accepted) only in respect of the speech of human beings. As against this (*tu*), reasoning has to be having for its purport¹ (what occurs in) the statements which are not of human beings,² the meaning (of them, i.e. of these latter) does not (occur to the listeners) on (the basis of) reasoning. [9]

¹Cf. Śaṅkara in BSB: *tasmād brahmajñānāsopanyāsamukhena vedāntavākyamāmanṣā tadavirodhitarkopakaraṇā niḥśreyasaprayojanā prastūyate* (p.83) and *śrutir api śrotavyo mantavyaḥ' iti śravaṇavyatirekeṇa mananam vidadhatī tarkam apy atrā-dartavyam darśayati* (p.411). Also NKL: *anāptasambandhasandehanirāsāya puṁspranīte tarkāpekṣā, vedasya punar apauruṣasya tātparyanirṇaye tarkāpekṣā (yā) na svārthapramitāḥ ity arthaḥ*.

²Literally, utterances of non-human (beings)—i.e. *apauruṣeya* Śruti.

प्रत्यक्षाद्यतिवर्तित्वाद्युक्त्यपेक्षा न विद्यते ।

आगमार्थे यथैवं स्याद्युक्त्यर्थे नागमेक्षणम् ॥१०॥

As, in respect of the meaning conveyed by tradition, there is not any need of¹ reasoning, owing to its being beyond (the means of knowing, viz.) *pratyakṣa* 'direct perception' etc.,² in the same way, there is no need of seeing (or observation in) tradition³ in respect of the meaning of a (worldly) statement. [10]

¹That is, dependence on.

²The word 'etc.' refers to inference and analogy.

³This refers to the independence of experience in worldly life. Cf. Śaṅkara in *Gītābhāṣya* 18.80: *na hy agnir anuṣṇa iti vadantī śrutih*

पुंस्वभावानुरोधेन युक्तिर्वेदेऽभिधीयते ।
आगमस्य प्रवृत्तिस्तु मेयवृत्तव्यपेक्षया ॥११॥

In respect of the Veda,¹ reasoning is adopted (lit. stated) in a way natural to human mind; but the (Vedic) tradition² follows (a thing) in accordance with the characteristic of what is to be known.³ [11]

¹This refers to the discussion in the Vedic texts including Vedānta (i.e. the Upaniṣads).

²That is, makes its statement about things as they are.

³This refers to the Brahman, ritual etc. to be known only from the Vedic texts.

ननूक्ता मधुकाण्डेऽपि दुन्दुभ्याद्युपपत्तयः ।
आगमैकप्रधानत्वं कथं तस्येति भण्यते ॥१२॥

But, (one might ask:) 'In the Madhukāṇḍa also, there are stated illustrations¹ of a drum etc.; how could it be said then that they are dependent only on tradition?' [12]

¹Cf BUBV 2.4.275-282, 395. The word 'illustrations' stands for reasoning on the basis of analogies.

नैष दोषो यतस्तत्र युक्तीनामप्रधानता ।
 प्राधान्यं याज्ञवल्कीये युक्तीनामभिधीयते ॥१३॥
 युक्त्यागमौ हि संभूय करस्थामलकादिवत् ।
 सुसूक्ष्ममपि सद्वस्तु शक्तौ ज्ञापयितुं यतः ॥१४॥

(The Siddhāntin answers:) 'This is not a fault, since all reasoning (based on illustrations) is (there) merely subordinate/ancillary (to the matter to be enunciated). In the Yājñavalkyakāṇḍa, (however,) it is held (lit. stated) that all (such) reasoning is principally accepted [13] because reasoning and tradition, coming together,¹ become capable of informing (one) about (even) an extremely subtle existent matter (as clearly) as a berry (placed) on the palm of a hand'. [14]

¹That is, functioning together.

युक्तयोऽतोऽभिधीयन्ते पूर्वपक्षादिसंश्रयाः ।
 याज्ञवल्कीय एतस्मिन्काण्डे जल्पोक्तिवर्त्मना ॥१५॥

As such, here, in this Kāṇḍa of Yājñavalkya, are stated reasons, pertaining to the *prima facie* view and others, in the manner/way of talk in common.¹ [15]

¹The word *jalpa* may not be taken as a technical term in Nyāya. This is well brought out by the editor of NKL thus: *vijigīṣukathā jalpaḥ, tattvabubhutsukathā vādaḥ*.

उद्गीथप्रमुखा येऽर्था मधुकाण्डे पुरोदिताः ।
 तेषामेव विशुद्ध्यर्थं विचारः क्रियतेऽधुना ॥१६॥

An enquiry is now undertaken for the clarification of (i.e. for deciding or ascertaining) such matters as the Udgītha etc.

which were discussed in the Madhukāṇḍa before. [16]

This clarifies the relation between the Aśvala Brāhmaṇa and the Madhukāṇḍa.

दर्शनस्यास्य तेनात एकवाक्यत्वमिष्यते ।
तथैवान्यपदार्थेषु तद्द्वयोरपि काण्डयोः ॥१७॥

Therefore, here is accepted (lit. desired) the unity of purport in respect of this philosophical treatise; so also is it accepted in respect of the meanings/matters conveyed by the two Kāṇḍas. [17]

Read NKL: *ādyabrāhmaṇoktopāsanāśeṣatvam atra lingam ... dvitīyabrāhmaṇaprabhṛtyabhihitayuktinām madhukāṇḍoktatattvam-ādīpadārthanirṇāyakatvād ity arthaḥ.* and, for clarification, read further the editor's note 3 thereon.

Now follows the discussion of BU 3.1.3.

यदिदं कर्मणोऽशेषसाधनं मृत्युनाप्लुतम् ।
स्वामिमन्त्रर्विगग्न्यादि त्वभिपन्नं वशीकृतम् ॥१८॥

All this, i.e. whatever the means of ritual activity (viz.) the owner (of these means), the Mantras, the priests, the fires etc., is overpowered, swayed (i.e. mastered) and possessed by death. [18]

Here follows the explanation of the words in the BU sentence: *yad idaṃ sarvaṃ mṛtyunāptaṃ sarvaṃ ... atimucyate.*

परिच्छेदकृदज्ञानं सासङ्गं मृत्युसंज्ञितम् ।
केनायं यजमानोऽतो मृत्योराप्तेर्विमुच्यते ॥१९॥

Ignorance is the cause (i.e. bringer) of limitations on them; it is associated with attachment (to momentary pleasures and

pain) and (is consequently) called death.¹ Then what is that by which is the sacrificer freed from meeting (lit. attaining) death?² [19]

¹This refers to ritual activities.

²Cf. NKL: *rāgayuktam ajñānam brahmakṣatrādibhedabhrānti-janakam mṛtyuḥ*.

यन्मर्त्यसाधनं साध्यं मर्त्यं तदपि जायते ।
साधनानुमितं साध्यं मुक्तिः केनात उच्यते ॥२०॥

(Also) whatever that can be the means for a mortal¹ is also mortal² and is born (i.e. produced). The goal is inferred from the means of reaching it—also there is stated in the words *kena* ... 'by which (liberation from it) is possible?' is then obtained. [20]

¹It refers to activities connected with ritual.

²This refers to what is perishable.

होत्रर्तिवजाग्निना वाचा मृत्योराप्तेर्विमुच्यते ।
इति प्रश्नप्रतिवचो याज्ञवल्क्योऽप्युवाच तम् ॥२१॥

'By the Hotṛ priest, viz. fire, i.e. by speech, is one released (i.e. kept from) meeting death'—this answer to the question did Yājñavalkya make (lit. utter) to him.¹ [21]

¹The word 'him' refers to the sage Aśvala; see the next verse.

प्रवक्ता याज्ञवल्क्योऽत्र तं पृच्छन्त्यश्वलादयः ।
सराजके समाजेऽयं विचारः क्रियते महान् ॥२२॥

Here,¹ Yājñavalkya is the exponent and him do Aśvala and others ask (their questions). (Thus), in the assembly with the king in it, there is carried on (lit.made) a profound discussion.²

[22]

¹It means: In this talk; cf verse 15 above.

²SP refers to *jalpakathā* as explained in *Nyāyasūtra* 4.2.50 and its commentaries. Cf. the definition of *jalpa* quoted under verse 15 above.

यजमानस्य येयं वाग्घोता चैतद्द्वयं यदा ।
अधिदैवात्मना वेत्ति स होतैर्वविधो भवेत् ॥२३॥

That Hotṛ would become like this¹ if he knows these two, viz. the *vāc* of the sacrificer and the Hotṛ priest,² to be possessed of the nature of what rests on the divine (fire).³

[23]

This explains *vāg vai yajñasya* ... (BU 3.1.3).

¹Literally, of this sort, i.e. of one who has overcome death.

²SP points out that *vāc* is *adhyātma* 'in a body', i.e. 'in the body of the sacrificer' and that, the Hotṛ priest, i.e. in the body of the Hotṛ who invokes the gods in a sacrifice, is *adhiyajña*. Cf. *yajño vai yajamānaḥ* (not traced).

³*adhidaiva*: what rests on the divine, i.e. Agni. This indicates that the sacrificial activity is in reality the worship of Agni. Cf. *sa cāgnir hotāgnir vai hotā* (not traced).

अनन्तविग्रहः सोऽग्निर्होता मृत्योर्यथोदितात् ।
यजमानस्य मुक्तिः स्यादतिमुक्तिस्तथैव च ॥२४॥

That Agni who is possessed of innumerable forms/bodies is the Hotṛ (beyond)¹ death, as said (earlier); he is the (cause of) liberation² for a sacrificer and so also the liberation³ *par excellence*.

[24]

This describes seeing of the real nature of Agni and the achieving of liberation. It explains *sa muktiḥ* ... in BU.

¹That is, beyond the clutches of death.

²Śaṅkara describes it as 'seeing the (real) nature of Agni'.

³This is described also as renunciation or a means to liberation.

आसुरात्साधनाद्वैवप्राप्तिर्मुक्तिरिहोच्यते ।
साध्यादप्यासुराद्वैवसाध्याप्तिरितिमुक्तिता ॥२५॥

Here liberation is described as the attainment of the divine (nature)¹ by such means as are demoniac (viz. performances rooted in ignorance about the nature of the inner self)² and liberation *par excellence* means obtaining what is to be achieved by the divine (result), (which in itself is) what is to be finally achieved.³ [25]

This states the intended meanings of the words *mukti* and *atimukti*. Read in this context NKL: *jñānahīnam (atra upāsanam jñānam abhipretam) puṇyakarmāsurasādhanam, daivam hiraṇyagarbhādyupāsanam ... daivasādhanaphalāptiḥ (sūtrāder āptiḥ) atimuktiḥ*.

¹This refers to becoming Agni which is the deity of *vāc*.

²This is sacrificial performance which is considered to be impure, i.e. demoniac sin (*āśura pāpman*) mentioned in BU 1.3, be it accompanied by knowledge or otherwise. Cf. *dr̥ṣṭavad ānuśravikaḥ* in *Sāṃkhyakārikā* 2.

³Becoming one with the deity of *vāc* is only a step towards further achievement, viz oneness with Prāṇa. Thus, this is a movement/progress from one *sādhyā* to yet another.

यथोक्तोपासनादेव कैवल्यं चेद्विवक्ष्यते ।
ब्रह्मविद्या किमर्थेयं नान्यन्मुक्तेः फलं ततः ॥२६॥

(One would ask:) 'If it is intended to speak of mere differentiating¹ (of the sentience/self from the body) by means of the worship (that is) thus prescribed, what is the purpose of the lore of the Brahman, since there is no other result (thereof) than (mere) separation?'² [26]

¹This refers to *kaivalya* of the Sāṃkhyas by means of

vyaktāvyaktajñāvivēka 'discrimination between the gross body and the subtle knower, i.e. sentience or *Puruṣa*'.

²This separation (or, differentiation as said earlier) being the final end, what other thing is there to be achieved? or considered as liberation? Hence, the lore of the Brahman is unnecessary.

Now follows the discussion of BU 3.1.4.

आसुरात्कर्मणो मृत्योरतिमुक्तिरिहोदिता ।
कालात्कर्मातिरेकेण मृत्योर्मुक्तिरिहोच्यते ॥२७॥

Here (i.e. in this context), liberation *par excellence* is stated to be that (viz. freedom) from the demoniac¹ (ritual) activity and liberation is stated to be freedom/escape from (i.e. overcoming of) death, by transcending Time (or Death) by means of giving up (lit. going beyond) activity (in ritual). [27]

This is to emphasise the idea that mere overcoming of the demoniac inclination does not mean liberation; for, there is the need of overcoming death also.

¹It signifies 'which really (or, in the final analysis) involves sin'.

प्रयोगसमवाय्येव द्रव्यकर्त्रादिसाधनम् ।
तत्प्रयोगावसाने च सर्वं तदपवृज्यते ॥२८॥

The means (of a sacrificial performance, viz.) the material, the agent etc.¹ are only intimately/inseparably associated with² the performance (of a ritual) and (consequently)³ all that is separated (from it)⁴ on the completion of the performance of that. [28]

¹The word 'etc.' refers to the deity.

²That is, inherent in.

³This is the force of the word *ca*.

⁴This refers to the basic notion of (or the accepted

differentiation of) what really cannot be differentiated.

प्रयोगावसितेस्तुर्ध्वं कालः प्राक्च प्रयोगतः ।
क्षपयन्वर्ततेऽजस्रं सर्वं तत्कर्मसाधनम् ॥२९॥

(The above is stated) because time¹ keeps on continuously affecting² all that is accessory of the performance (even) after the completion of the (ritual) performance and (also) before that performance. [29]

¹Or, by pun, Death.

²Literally, reducing it continuously, bit by bit.

तस्मात्कर्मातिरेकेण कालो मृत्युः प्रतीयताम् ।
ततोऽपि मुक्तिर्वक्तव्येत्यत आरभ्यते परः ॥३०॥

Therefore may Death be understood as Time by its extension beyond (the period of) the (ritual) performance. (And) since it is to be stated that liberation *par excellence* is achieved (in reality) after that; therefore, the subsequent (portion of the Śruti) is (now) begun. [30]

कालश्च द्विविधः प्रोक्त एकोऽहोरात्रलक्षणः ।
तिथ्यादिलक्षणश्चान्यस्ताभ्यां मुक्तिरिहोच्यते ॥३१॥

Time is described in two ways: one characterized by day and night and the other by *tithi*¹ etc. Here (in what follows) is stated (about) freedom/liberation² from the two. [31]

This is stated for the purpose of making the subject-matter of BU 3.1.4-5 distinct from the earlier section. Read NKL (note): *kanḍikādvayātmakasamudāyasya kālāt muktinirūpaṇe tātparyam*.

¹In relation to the phases of the sun and the moon—the latter in particular.

²That is, overcoming such differences as constitute liberation.

उपस्थापयतः कर्म तथा क्षपयतो यतः ।
अहोरात्रे ततो मृत्युस्ताभ्यां मुक्तिः कुतो भवेत् ॥३२॥

‘But’, (one would ask), ‘since day and night (are for one), who begins/undertakes (some ritual) performance as also for one who completes (the same), therefore, there is (certainly) death (for that one); how could there be liberation (then)?’.

[32]

Read NKL (note): *kālamuktiviṣayapraśnayoḥ prathamah yad idam sarvam ... atimucyate iti praśnah tasya.*

अध्यात्मं चक्षुरध्वर्युरधियज्ञं द्वयं रविः ।
साक्षादनन्तदेहोऽयमिति ध्यायन्विमुच्यते ॥३३॥

(The Siddhāntin answers:) ‘The eye¹ in the body and the Adhvaryu priest at the sacrifice are both the sun of innumerable forms—considering/thinking (to himself) thus (i.e. this truth), the performer (of ritual) is liberated’.

[33]

Yājñavalkya’s reply *adhvaryuṇartvijā ... sātīmuktiḥ* is under reference.

¹This is for two eyes.

आत्मावयव एवायं सूर्यश्चक्षुर्ममांशुमान् ।
अध्वर्युरहमेवेति साक्षात्कृत्वा विमुच्यते ॥३४॥

‘He is released, thinking (to himself thus:) ‘This sun is but an aspect (lit. a limb) of the Ātman (and) my eye is the sun and I am the Adhvaryu priest (at this sacrifice)’.’

[34]

This explains *cakṣur vai yajñasya ... ātmaśabdena yajamānaḥ* (BU 3.1.4).

Now follows the discussion of BU 3.1.5.

कलावृद्धिक्षयाभ्यां तु पक्षयोरुभयोस्तथा ।
चन्द्रः कर्तेह तत्प्राप्त्या पक्षाभ्यां विप्रमुच्यते ॥३५॥

'Similarly (*tathā*) is released he (who thinks to himself thus:) "I am the moon having in both these halves (of the months) the waxing and the waning of the digits, I am the agent, i.e. performer (of the ritual)", attaining thereby (the nature of) the two halves.' [35]

This is the answer to the question in *yad idaṃ sarvaṃ pūrvapakṣāparapakṣābhyām* ... (BU 3.1.5), according to the reading in the Mādhyandina recension of the text.

हासवृद्धयोर्यतः कर्ता वायुश्चन्द्रमसस्ततः ।
वायुनैवोपसंहारः प्राणोद्गात्रोरयं कृतः ॥३६॥

Since the wind and the moon are (each) the agent respectively of waxing and waning; therefore, the conculsion (of the discussion) is stated as (the meditation on the nature) of the wind and the Udgātr.¹ [36]

¹SP points out that this verse follows the text of the Kāṇva recension of the BU.

मनोऽध्यात्मं यदस्याभद्ब्रह्मा चैवाधियज्ञगः ।
तस्याधिदेवता चन्द्र इति माध्यंदिनश्रुतिः ॥३७॥

The Śruti statement of the Mādhyandina recension is: 'Since *manas* in the body of this performer became the Brahman priest in the sacrifice; therefore, the moon is its superintending deity ...'. [37]

Read NKL: *uditānuditavat śākhābhedenā vyavasthitatvāt katham viruddham dhyānam ucyate iti na śaṅkanīyam*.

Now follows the discussion of 3.1.6.

कर्मतः कालतो मृत्योर्मुक्तोऽयं स्वर्गमेष्यति ।
तं प्रयास्यति केनायमाक्रमेणेति पृच्छयते ॥३८॥

This (i.e. the performer) is liberated from (the clutches of) Time (and) of Death (and therefore) attains to heaven. 'By what support (i.e. step) will he go there?'—this is the question asked (now). [38]

This explains *yad idam antarikṣam ...* (BU 3.1.6).

स्वर्गलोकगतावत्र साधनं पृच्छयते यतः ।
अन्तरिक्षमनाधारं गतौ हेतुनिषेधनम् ॥३९॥

(The answer is:) The question here is asked regarding the means to attaining to (i.e. reaching) heaven, since the sky is supportless and therefore prohibiting any means of going. [39]

This justifies how the question in the preceding verse has a propriety (referring to *gatisādhana* view). This can be the view of Bhartṛprapañca as is noticed from the introductory remark in SP on the next verse. Also read NKL: *anārambaṇam iti hetuḥ niṣedhanam yataḥ ity arthaḥ*.

न तु देहग्रहे प्रश्नः सति गन्तरि पृच्छयते ।
अग्न्यादिदृष्टिभिश्चास्य देहः प्राक्प्रतिपादितः ॥४०॥

And there cannot be asked (such) a question about a goer when there is (reference to) having a body. Already it is asserted that this (performer) has a body on account of his considering (himself and his own limbs, viz. *vāc* etc.) as Agni and others.¹ [40]

This refutes Bhartṛprapañca's justification of the question, as noted in the preceding verse.

¹This has a reference to *so 'gnir abhavat ...* (BU 1.3.12-13).

मनोऽधियज्ञं ब्रह्मैव ब्रह्मा चन्द्रोऽधिदैवतम् ।
चन्द्रेण मनसा लोकमवष्टम्भेन यास्यति ॥४१॥

manas (of the sacrificer) is, in the context of sacrificial performance, the Brahman and the Brāhmaṇa¹ priest is the moon among the deities; (therefore) by *manas*, by the moon, (which is) the support (for the sacrificer), he reaches (lit. will reach) the world (of the Brahman).² [41]

This is a part of the answer to Bhartṛprapañca. Read NKL: *brahmaṇā ityādiparihārārtham āha*.

¹The form *brahmā* in the masculine as opposed to *brahma* in the neuter.

²Possibly this refers to the god Brahmadeva.

अध्यात्मं प्राण एव स्यादुद्गाता योऽधियज्ञगः ।
स वायुरिति पाठे स्याद्व्याख्या माध्यन्दिने त्वयम् ॥४२॥

Prāṇa¹ in the body (of the sacrificer) is the Udgātr priest in (the performance of) the sacrifice. And (*tu*) this should be the explanation when the reading in the Mādhyandina recension is (accepted, viz.) *sa vāyuh*² [42]

Now follows the explanation of the passage which occurs in the Mādhyandina recension of BU.

¹This is sentience in the body, Jīva.

²Cf. BU 3.1.5.

यजमानश्रुतेरत्र पूर्वोद्गीथैकवाक्यतः ।
यजमानो जपस्तत्र ज्ञानं नेत्यवसीयताम् ॥४३॥

Owing to the unity of purport of this (Aśvala) Brāhmaṇa and the Udgītha (Brāhmaṇa), the recitation (of Abhyāroha) is caused by, or for the purport of, the sacrificer;¹ the knowledge

(does) not (belong to him)²—let this be concluded thus. [43]

¹The word *yajamāno japah* should be understood as *yājāmāno japah*; cf. SP: *yajamānasvāmikah*; and *yajamānagam* in the next verse.

²It is knowledge about Prāṇa as the deity of the *sāmagāna*.

संभाव्यते न यत्तत्र यजमानस्य मानतः ।
अस्तु कामं तदुद्गातुर्न तु तद्यजमानगम् ॥४४॥

In the various worships (in the Udgāna), it¹ cannot be thought of as belonging to the sacrificer—this (is so) on account of the (proper) means of knowing. Well may it belong to the Udgātr but not to the sacrificer. [44]

¹This is knowledge mentioned in the preceding verse. This refers to the *viññānas* which are *ṛtviksvāmikāni*, i.e. *tatkarṭṛkāni*.

इतीत्युक्तपरामर्शो ह्यतिदेशार्थ उच्यते ।
इतोऽन्यत्रातिमोक्षा ये तेऽप्येवमिति वीक्ष्यताम् ॥४५॥

(The word) *iti*¹ refers to what is (already) stated—it is (used in the) expression for extending (the idea of *atimokṣa* 'liberation *par excellence*'); whatever be (the references to) *atimokṣa* (made) elsewhere should also be (understood) in this very way²—let this be noted. [45]

¹This is *ity atimokṣah* in BU 3.1.6; it is the same as *atimukti*.

²They are also *atideśārtha*. That is to say: the procedure in respect of *vāc* is to be extended to the sense of touch etc.

अधिदैवात्मना तेषां दृष्टयः साधनात्मनाम् ।
अतिमोक्षाः स्युः सर्वत्र यथोक्तादेव लक्षणात् ॥४६॥

Seeing them¹ with the notions of being possessed of the nature of those among deities,² (though they are) of the nature of

the means (of sacrifice), they would everywhere³ be (i.e. result into) liberation *par excellence*, on the ground (viz. by the indications)⁴ stated (earlier). [46]

¹This refers to the *prāṇas*.

²These are the superintending deities or gods, viz. Agni and others.

³That is, in all sacrificial performances.

⁴This refers to *devatātmadarśana*. Read NKL (note): *lakṣaṇāt kāraṇād iti yāvat*.

फलवत्कर्मणां क्वापि किञ्चित्सामान्यसंश्रयात् ।
संपत्तिमर्हतां संपदल्पीयःकर्मसूच्यते ॥४७॥

Now is discussed meditation based on resemblance¹ in (even) smaller (i.e. less significant) ritual(s);² this, at places, consists in that the rituals which bear fruit, become similar to the great (i.e. more significant) ritual(s),³ on the strength (lit. support) of (even) little similarity. [47]

After completing the discussion on *udgīthopāsana* in its entirety, there is now discussion on *atha sampad* Also read: *agni-hotrādikarmaṇā aśvamedhādi mayā kriyate iti dhyānam ity arthaḥ* (NKL).

¹For example, the performer of a small rite like Agnihotra considers that he is performing the Aśvamedha ritual (SP).

²These refer to the minor rites which are subordinate to the Udgātr's performance.

³They refer to the Udgāna, Aśvamedha etc. which deserve richer results (*sampad*, *sampatti*).

यदि वा तत्फलस्यैव किञ्चित्सामान्यवर्त्मना ।
संपादनं भवेत्संपदग्निहोत्रादिकर्मणि ॥४८॥

Or, (it could be understood thus:) Obtaining the result of that (smaller ritual) itself becomes in the ritual of Agnihotra

etc. the acquiring of (greater) result, on the strength of some similarity. [48]

This explains *phalasyaiva vā* in BUB 3.1.6 (p.379).

संपदा चेत्फलप्राप्तिरश्वमेधादिकर्मणाम् ।
त्रयाणामपि वर्णानां तत्पाठः फलवान्भवेत् ॥४९॥

If by such meditation¹ in respect of the rituals such as Aśvamedha and others there is obtained the result, then the persons of all the three Varnas would have their recitation of (the texts pertaining to) them as yielding some result! [49]

NKL comments: *sampadām aphalatvāt tallakṣaṇam (na) kartavyam ity atrāhaḥ*

¹This stands for 'meditation based on resemblance'; cf. verse 47 above. This extends to other cases in this section where *sampad* is referred to.

नातिभारोऽस्ति नो बुद्धेः शास्त्रं चेत्तत्परं भवेत् ।
विदुषां श्रेयसेऽतोऽध्वा न क्वचित्प्रतिहन्यते ॥५०॥

If (the study of) the scriptures would be having that (viz. such result as the) purport, then that (viz. the study of them) is not for our intellect any great burden. And (*vā*) the path for the knowers to well-being is nowhere obstructed. [50]

Now is discussed BU 3.1.7, viz. on the nature of *sampad*.

तिसृभिरिति संख्यार्थप्रश्ननिर्णयमब्रवीत् ।
पुरोनुवाक्याद्युक्त्या तु संख्येयार्थविनिर्णयम् ॥५१॥

By the word *tisṛbhiḥ*¹ the Śruti has declared the decision in respect of matters signified by the number (of the *ṛcs* to be recited); and (*tu*) by the statement about *puronuvākyas* 'verses for the fore-offerings'² (is declared) the matter (viz.

the *ṛcs*) to be known (i.e. as to be recited).

[51]

This verse seeks to avert the idea of repetition in respect of the words *tisṛbhiḥ* and *tisraḥ*.

¹For the explanation of the three read the editor's note in NKL edition: *puronuvākyaṁ yājyaṁ ca śasyaiva tṛtīyā*.

²*puronuvākyas* are introductory or invitational verses (*ṛcs*) in the Prayāja offerings.

त्रैलोक्यसंख्यासामान्यात्स्यात्सर्वप्राणभृज्जयः ।

सर्वप्राणभृतां यस्मात् त्रिष्वेवैतेषु संभवः ॥५२॥

Because of the similarity (of the number of these *puronuvākyas*) with the number of the worlds, there would result (for the reciter) the conquest of all living beings;¹ (this is possible) because the birth of all those living beings would be in these very three worlds.

[52]

This has reference to the Prayāja offerings offered with the recitation of prayers.

¹Read the note on *prāṇabhṛt* by the editor of NKL: *sarvam prāṇijātam ity arthaḥ*.

Now follows the discussion of BU 3.1.8-10.

उज्ज्वलत्वादिसामान्याद्देवलोकदिसंपदः ।

फलसंपद एवैता नात्र कर्म विवक्ष्यते ॥५३॥

Because of their similarity (with the divine world) in respect of resplendence, there can be meditations on the result; in respect of this (matter), it is not intended to state any ritual.

[53]

This refers to the *karmaphalasampads* of the *devaloka*, referred to in BU 3.1.8, i.e. *devalokam* ..., for clarification read the note of the editor of NKL.

दीप्तिर्नादोऽधःशयनमाज्यमांसपयोऽम्भसाम् ।
देवलोकदिसंपत्स्याद्दीप्तिमत्त्वादिसंभवात् ॥५४॥

Brightness, (loud) sound and lying down (i.e. sleeping on the ground)¹ of clarified butter, flesh and streaming waters (respectively) would have the meditations of (becoming/being) the divine world etc. because of their being possessed of brightness etc. [54]

This refers to the offerings which have the potency of producing those results that are bright like the *devaloka*.

¹It means: flowing down along on the sacrificial altar.

वृत्त्यानन्त्यान्मनोऽनन्तं शब्दादीनामनन्ततः ।
विश्वेदेवान्मनोवृत्तीः संपाद्यानन्त्यसाम्यतः ॥५५॥
अनन्तमेव तेनासौ सम्यग्ज्ञानेन विन्दति ।
लोकं यथोक्तदृष्टिः सन्यजमानः फलं स्वयम् ॥५६॥

manas is infinite because of the innumerable functions it performs,¹ thanks to the vast numerousness of words etc. Having rendered these functions of *manas* into all gods² on account of the similarity in respect of vast numerousness, [55] he, the meditator thereby, i.e. with the (herebefore) stated meditations, secures (for himself) endless world, yea, by right knowledge, himself being the sacrificer. [56]

Now there is reference to *anantaṃ vai manaḥ* ... in BU 3.1.9.

¹Or alternatively, modifications which it undergoes.

²Or alternatively, *Viśve-devas*.

तिस्रः पुरोनुवाक्याद्या ऋचः पूर्वमुदीरिताः ।
यास्ता एवात्र विज्ञेयाः स्तोत्रिया अपि नापराः ॥५७॥

Those three *puronuvākya* *ṛcs* etc., which are mentioned before, are themselves to be understood here as *śtotriyas*,¹ not any

others.

[57]

The word *tisraḥ* refers to *stotriyāḥ stoṣyanti*.

¹It means: verses in praise of gods.

गीतयस्त्वधियज्ञं ता अध्यात्मं कास्तु ता इति ।
प्राणापानव्यानरूपा अध्यात्मं ताः प्रचक्षते ॥५८॥

‘What are the songs in the sacrifice? and (tu) what (again) are those having reference to the body (of a sacrificer)?’—(on this) they declare them to be in the body (and) having the nature of (the three winds) Prāṇa, Apāna and Vyāna.¹ [58]

¹The second line explains *prāṇa eva*.

जयो भूरादिलोकानां संख्यादित्वादिसाम्यतः ।
अश्वलौऽप्युपरेमेऽथ स्वोक्तप्रश्नविनिर्णयात् ॥५९॥

Conquest of the (three) worlds, beginning with (this) earth, is (spoken of) on account of the similarity in respect of number. Thereafter Aśvala stopped (asking questions), because of the decision (given to him by Yājñavalkya in respect of his question). [59]

This explains *pr̥thivī lokam eva purovākyayā jayati*.

इति श्रीबृहदारण्यकोपनिषद्भाष्यवार्तिके तृतीयाध्यायस्य
प्रथमं ब्राह्मणम् ॥१॥

**BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA**

3.2

Ārtabhāga Brāhmaṇam

Verses 1-8 bring out the connection between BU 3.1 and 3.2.

मृत्योर्मुक्त्यतिमुक्ती द्वे पूर्वस्मिन्ब्राह्मणे गते ।
मृत्युरूपावधृतये परं ब्राह्मणमुच्यते ॥१॥

In the preceding Brāhmaṇa are discussed the two, viz. *mukti* and *atimukti* from *Mṛtyu* (and now) the subsequent Brāhmaṇa is introduced for ascertaining the nature of *Mṛtyu*. [1]

Yet read SP: *mṛtyor iti brahmakṣatrāḍiparicchedaheṭoḥ rāgādisahitāt mithyājñānāt karma tasmāt ... kālāt ... mṛtyor muktiṁ vyākurvātā tvamarthaśuddhir vihitety arthaḥ*.

किंलक्षणेन ग्रस्तोऽयं मृत्युनेति प्रचोदिते ।
ग्रहातिग्रहरूपेण ग्रस्तोऽयमिति कथ्यते ॥२॥

As (the thinker of Upaniṣad) is incited by the question, "By what nature of *Mṛtyu* is this one¹ grasped, i.e. overpowered?",² it is told that this one is overpowered by (*Mṛtyu*) of the nature of *Graha* and *Atigraha* 'the organs and the objects acquired by them'.³ [2]

See the next verse. Also NKL states *mṛtyurūpaṁ* as *indriyaviṣayātmaka*. See note of the editor of NKL: *grahāḥ indriyāṇi, atigrahāḥ indriyaviṣayāḥ*.

¹This refers to *Hiraṇyagarbha* which a worldly sacrificer became by the worships earlier explained.

²Cf. verse 10 below.

³These are explained in verse 10 below.

अधिभूताधियज्ञादिपरिच्छेदफलात्मकः ।
मोहासङ्गास्पदो मृत्युर्ग्रहातिग्रहलक्षणः ॥३॥

Mrtyu is of the nature of Graha(s) and Atigraha(s), i.e. of the nature of the result(s) accruing from limitations (on the inner self) which pertain to the elements and the sacrifices etc.¹ and which is the abode of delusion and attachment. [3]

¹This refers to *kriyā* 'activity', *kāraka* 'instrument' and *phala* 'result' etc.

इतो मुक्तस्य रूपाणि त्वग्न्यादीनि पुराब्रवम् ।
उद्गीथब्राह्मणे पूर्वमश्वलब्राह्मणे तथा ॥४॥

I have already stated in the Udgītha Brāhmaṇa and also in the Aśvala Brāhmaṇa that Agni and others are the forms of one (who is) liberated from this (i.e. worldly life). [4]

Agni is identified with Āditya and the other deities, viz. those which superintend over different parts of the human body.

फलं च ज्ञानयुक्तानां कर्मणामेतदिष्यते ।
उत्पत्त्याद्यन्वयात्तस्मादनित्यं स्याद्घटादिवत् ॥५॥

And also this is desired as the result of the activities of those who are possessed of the knowledge (of the actions and what is associated with actions) (and) therefore, owing to their connection with origination etc.¹ the (result) would be perishable like a pot of clay etc. [5]

This indicates that *becoming* Sūtra is not liberation.

¹The word 'etc.' refers to five other *bhāvavikāras*.

अतो यथोक्तादेतस्मात्साध्यसाधनलक्षणात् ।
संसाराद्धन्धनान्मोक्षः कर्तव्यो ज्ञानहेतुतः ॥६॥

Therefore by (causing the rise of) knowledge (*jñānahetutaḥ*) one should effect liberation from the worldly existence which comprises the ends and means¹ that are already stated, viz. the bondage. [6]

¹This refers to the ritual activity which is a means to bring about the result, viz. heaven etc., cf. *kriyā*, *kāraka* and *phala* noted above under verse 3 above.

ज्ञानकर्मफलं दिव्यं यदि नाम पुरोदितम् ।
ग्रहातिग्रहबन्धेन तथापि सितमेव तत् ॥७॥

Yes, even though the result of knowledge and action (combined together)¹ was earlier pointed out as divine, that is still bound² by the ties of Graha and Atigraha. [7]

¹This is becoming Sūtra.

²This is from the root *so* 'to bind' (not 'to cut').

वाङ्मनःप्राणरूपाणां त्र्यन्नात्मन्यपि संभवात् ।
ग्रहातिग्रहरूपाणां नातो मुक्तः प्रजापतिः ॥८॥

The forms of Graha and Atigraha do exist even in the one of the nature of three foods (viz. Hiraṇyagarbha or Sūtra) as the forms of Vāc, *manas* and Prāṇa and therefore Prajāpati is not (entirely) free (from them, i.e. liberated).¹ [8]

¹Read SP: *saviṣayāṇām teṣām prajāpatau sattvam evātaḥ-śabdārthaḥ*.

BU 3.2.1 is under reference.

वागादयो ग्रहा ज्ञाताश्चतुष्ट्वं चाविवक्षितम् ।
अतिमोक्षातिदेशोक्तेस्तद्विशेषोऽथ भण्यते ॥९॥

The Grahas, viz. Vāc and others are already known and (yet) their being four (in number) is not (specifically) intended.¹ Now then is stated here the specific (points of) distinction among them in view of (or, on account of) the extension of (the notion of) *atimokṣa*. [9]

This has reference to earlier discussion of the four, *vāk*, *cakṣuṣ*, *ghrāṇa*, and *manas*

¹Read SP: ... *atimokṣā iti vāgādāv uktanyāyasya tvagādāv atideśād grahaikavad avivakṣitaṁ catuṣṭvam* ... (and further elaborate comment which is not imperatively necessary!)

BU 3.2.2-9 is under reference.

ग्रहा घ्राणादयो ज्ञेया गन्धाद्यास्तदतिग्रहाः ।
ग्रहैर्गन्धादयो ग्रस्ता ग्रहाश्चात्मा च गोचरैः ॥१०॥

By Grahas are to be understood *ghrāṇa* and others¹ (and) Atigrahas are smell and others (viz. their objects). Smell etc. are grasped by Grahas. Thus Grahas 'organs' and also the Ātman 'inner self' are grasped by the different objects. [10]

¹This refers to the different organs. *ghrāṇa* is for *prāṇa* in BU, this by context.

अपानेनाहतो गन्धो घ्राणस्यैति वशं यथा ।
चक्षुरादिग्रहास्तद्वत्प्राणादिसचिवैरिह ॥११॥

As the smell which is brought by exhaling (*apāna*) becomes grasped by the nose, so (also) the organs, viz. the eye etc. are similarly (become grasped) by those (objects) that are subordinate to nose etc. (*prāṇa*). [11]

The word *prāṇādisacivaiḥ* conveys that the Atigrahas, viz. *rūpa* etc. must be connected with the inner self who grasps them. Thus, there is the relation of being bound mutually.

गन्धादिविषया धीस्थाः कर्मसंबोधिता यतः ।
प्रयुञ्जते हि घ्राणादींस्ततस्ते स्युरतिग्रहाः ॥१२॥

Since objects, viz. smell and others, which are abiding in intellect are revealed (*sambodhita*) by actions (of the organs) and then indeed (*hi*) do they put the nose etc. to action, therefore the objects are called Atigraha(s). [12]

This verse implies the idea of the inner self. SP adds: *viṣayāṇām indriyaprarakatvam anubhavasiddham iti hisabdārthaḥ*.

BU 3.2.10 is under reference.

योऽयं मृत्युरिह प्रोक्तो मृत्युस्तस्यापि चापरः ।
अस्ति नास्तीति वा ब्रूहि याज्ञवल्क्य यथातथम् ॥१३॥

(A question is asked to Yājñavalkya:) Tell me clearly, O Yājñavalkya, if there really is or is not another Mr̥tyu for that Mr̥tyu which you have described here (i.e. in BU 3.1). [13]

अस्ति चेदनवस्था स्यादनिर्मोक्षो न चेद्वेत् ।
इति प्रतिवचः कष्टं मत्वेनं पर्यपृच्छत ॥१४॥

If there is one, there would be *infinite regress*; if there is none, there would be the absence of liberation. This, (Ārtabhāga) asked, having thought to himself that an answer to his question was difficult. [14]

न कश्चिन्नियतो भावो मृत्युरित्युपदिश्यते ।
विनाशको यतो मृत्युर्विनाशयान्प्रति भण्यते ॥१५॥

There is not any definite *bhāva* 'positive entity' which is described as Mr̥tyu; since Mr̥tyu is called the destroyer of them which can be destroyed by it. [15]

This verse aims to set aside the popularly accepted notion of Mr̥tyu as Vaivasvata (Yama).

मृत्योरपि सतो मृत्युरस्त्येवेति मयोच्यते ।
न चानवस्थेहाप्नोति सर्वमृत्युत्वकारणात् ॥१६॥

(Indeed) I have said that there is certainly Mr̥tyu even while Mr̥tyu continues to exist and this does not involve any *infinite regress* for the reason that all (objects etc.) are subject to Mr̥tyu. [16]

This explains *asti tāvan mr̥tyor mr̥tyuh* in BU.

सर्वात्रभक्षणादग्निर्मृत्युस्तावदसावपि ।
अपामन्नं भवन्दृष्टो बह्वीनां तनुविग्रहः ॥१७॥

Since he eats all the foods, therefore is Agni Mr̥tyu of them. And even he is known to become the food for waters that are in plenty, himself being smaller in form. [17]

अग्निर्हिरण्यगर्भो वा ह्यापस्तत्कारणं मताः ।
कार्याणां मारणान्मृत्युः कारणं प्रथितं भुवि ॥१८॥

Agni or (even) Hiranyagarbha has waters as the origin¹ and it is well known in the world that the cause is the Mr̥tyu of its effects as it destroys them. [18]

¹Cf. *apa eva sasarjādau tāsu bījam avāsrjat ...* (Manusmṛti)

प्रत्यग्याथात्म्यविज्ञानं मृत्युरज्ञानरूपिणः ।
संसारहेतोर्मृत्योः स्यान्नापीहास्त्यनवस्थितिः ॥१९॥

The knowledge of the real nature of the inner self is Mr̥tyu for what has the form of ignorance, viz. what is the cause of transmigratory existence, and thus there is not (at all) any

infinite regress involved here (i.e. in respect of what is under discussion). [19]

This has the basic acceptance of the inner self as not having any cause for its existence. (It is *really avyākṛta*.)

निरुणद्धि यथा जन्म तत्राशमपि तत्तथा ।
प्रत्यग्याथात्म्यविज्ञानं नानवस्थाप्यतो भवेत् ॥२०॥

As the knowledge of the real nature of the inner self does not hinder the origin (of things etc.) and similarly (it does not cause) the destruction of them as well, so, there is no *infinite regress* in this way also. [20]

अन्येऽतो मृत्यवो गौणास्तैर्मृतौ स्यात्पुनर्जनिः ।
प्राक्तनान्यपि जन्मानि सम्यग्ज्ञानं तु हन्ति नः ॥२१॥

Mṛtyus other than this one are (really) secondary and (in that case) there is a birth for an individual after he is dead. As against this (*tu*), right knowledge¹ destroys all our births of the past as well.² [21]

¹That is, *ekātmajñāna*.

²This is used only for conveying the idea about the births of all the three periods of time.

यथोक्त एव व्याख्याने युक्तेयं स्यात्फलश्रुतिः ।
न तु निःशेषसंसारविध्वंसिन्यात्मबोधने ॥२२॥

And this statement about (the accruing of) the result¹ will be reasonable only if the explanation which is stated (is accepted),² but this is not so accepted in case one is informed about the proper nature of the Ātman which destroys the entire transmigratory existence. [22]

¹This refers to *apa punar mṛtyam jayati* in BU 3.2.10.

²This refers to the explanation of Mr̥tyu and its cause.

Now BU 3.2.11 is under reference. In the case of the knower of the true nature of the Ātman, there is no movement upwards etc., after that person's (commonly known) death.

समस्तमृत्योस्तमसः सम्यगात्मावबोधनम् ।
मृत्युस्तत्फलविज्ञप्त्यै परो ग्रन्थोऽवतार्यते ॥२३॥

Informing an individual about the proper (nature of) the Ātman is Mr̥tyu, for the darkness is (in fact) the Mr̥tyu of all (the transmigratory beings). Now the subsequent portion (of this Upaniṣad) is introduced for informing an individual of the result of that.¹ [23]

This explains *yatrāyam puruṣo mriyate ...* in BU 3.2.11.

¹Namely, *ātmāvabodha*.

सम्यग्ज्ञातात्मयाथात्म्यो यदायं म्रियते पुमान् ।
किमुत्क्रामन्त्यतः प्राणा उताहो नेति भण्यताम् ॥२४॥

(One asks:) 'When this person, who has properly known the true nature of the Ātman, dies,¹ do his *prāṇas* move upwards or not?'—may this be told. [24]

utkrānti gati 'upward movement' at the final end of the journey for a man of transmigratory world is already discussed earlier. Therefore, this Brāhmaṇa, it is pointed out, pertains to the life-breath of a person who has known the nature of that.

¹SP states that the time referred to is marked by the exhaustion of the *karman* which has already begun to produce its result.

उत्क्रान्तौ स्यादनिर्मोक्षो जन्मार्थं मरणं यतः ।
अमृतिश्चाप्यनुत्क्रान्तौ सत्सु प्राणेषु का मृतिः ॥२५॥

'If it is accepted that there is an upward movement of (*prāṇas*),

then there does follow the absence of liberation, (just) because Mṛtyu is always to precede the ensuing birth.¹ If again there is absence of any upward movements (of the *prāṇas*), there is then the absence of death; for while *prāṇas* do exist (in a body) how could there be death?' [25]

This explains the purpose of the questioner in the previous verse.

¹This refers to *Gītā* 2.27ab: *jātasya hi dhruvo mṛtyur dhruvaṃ janma mṛtasya ca*.

दुःशकोत्तरमित्येवं प्रश्नं मत्वान्वपृच्छत् ।
आर्तभागो मुनिर्विद्वान्स च नेति तमब्रवीत् ॥२६॥

Having thought that such a question as he has put is very difficult to answer, Ārtabhāga asked that, and the knower (of the knowledge of the Ātman), the sage on his part, answered him in the words 'No' [26]

अकर्त्रात्मपरिज्ञानाद्धवस्ताविद्यस्य सर्वतः ।
देहान्तरग्रहाभावात्प्राणोत्क्रान्तेरसंभवः ॥२७॥

'There is impossibility of any upward movement of *prāṇas* because there cannot be resorting to another body by an individual who has his ignorance destroyed in every way (*sarvataḥ*) by means of the full (*pari*) knowledge of the Ātman as the non-agent (of any actions). [27]

यदैव सम्यग्विज्ञानं जातमस्यागमोक्तितः ।
प्राणाः सहेतवः सर्वे तदैवास्ता निरन्वयाः ॥२८॥

Just at the very time when the proper knowledge about the Ātman has occurred to this person by (hearing of) the statement of the Veda, all of his *prāṇas*, together with their causes,¹ have been abandoned, leaving no trace of themselves behind.² [28]

This seems to state that *prāṇas* of the knower of the Ātman do not function with any purpose as in the case of ordinary persons.

¹These are desires and activities etc. (i.e. *vāsanās*).

²This refers to ignorance (*mūlakāraṇam avidyā*) which is the material (*upādāna*) cause of transmigration.

नान्वयं सहते प्रत्यङ्गं चापि व्यतिरेकताम् ।
कौटस्थैकत्वहेतुभ्यां प्रत्यग्याथात्म्यवस्तुनः ॥२९॥

(Now) the inner self does not tolerate any continued connection (of itself with something else); nor does it tolerate the possibility of a relation to the absence of any others.¹ (This is so) because the thing, viz. the true nature of the inner self has for its cause immutability and singleness. [29]

This argument sets aside the notions of the Ātman being non-distinct from the discrete worldly objects etc. and also not having a character distinct from that of any other object(s).

¹Sureśvara uses *vyatirekatā*, while *vyatireka* is expected in contrast with *anvaya*.

ध्वस्तध्वान्तस्य विज्ञानादतो हेतुफलात्मनाम् ।
दृशौ स्यात्समवनयः सर्पादीनां यथा स्रजि ॥३०॥

Therefore, in the case of a person who has destroyed his ignorance by this knowledge (of the Ātman) there would be the merger (*samavanaya*) of what have the nature of causes and effects in the seer, as in the case of a serpent and others while there (really) exists a wreath (etc.).¹ [30]

This explains *atraiva samavanīyante* in BU 3.2.11.

¹This is one more instance of Sureśvara's loose phraseology—*sarpādi* would expect its counterpart *sragādi*.

न स्वकारणसंसर्गस्तस्य ज्ञानादपहनुतेः ।
निष्फलं च भवेज्ज्ञानं यदि कारणसंगतिः ॥३१॥

There is no contact (of the inner self of a person) with its own cause (i.e. ignorance), owing to (this person's) having acquired that knowledge (which is) the very concealment (i.e. removal, of ignorance); (and) if there remains any association (of it) with the cause, then his knowledge would become useless (lit. fruitless).¹ [31]

¹Read SP: *sati jñāne kāryāṇāṃ kāraṇasaṃsargaśe cet tadvināpi tatsambhavāḥ jñānavaiyarthyam.*

उत्क्रामन्ति न चेत्प्राणा नायं तर्हि मृतो भवेत् ।
देहस्यैव मृतेनैवं जीवो न म्रियते सदा ॥३२॥

(One would ask:) 'If the *prāṇas* (of this person) do not move upwards, this one would not be considered as dead.' (The answer is:) 'This is so, only where there is the death of the body (and) never does the inner self die.' [32]

Sureśvara takes *prāṇas* 'sense-organs' as belonging to the body and therefore the upward movement does not belong to the inner self. The upward movement of *prāṇas* implied their merger into their causes, viz. elements etc. This is his primary position and he confirms it in the following verses. In other words, it is only the body that dies, i.e. becomes subject to decay.

जीवापेतमिति ह्युक्तेर्जन्मादेश्च निषेधतः ।
यत्संबन्धादचित्कोऽपि जीवतीत्यभिधीयते ॥३३॥
देहस्तस्य कथं मृत्युर्जीवस्येहोपपद्यते ।
यतोऽतो देहमरणं प्रात्यक्ष्यादुपपद्यते ॥३४॥

[That it is the body which dies, i.e. decays, is supported by *anubhava*, i.e. *pratyakṣa-darśana*.]

'(This is so) indeed¹ on the basis of (lit. because of the Śruti)

statement *jīvāpetam* ... 'what is devoid of Jīva ...'² and also there is rejection of the origination etc. (of Jīva)³ on account of the connection with which even a non-sentient thing is said to be living [33]

the body of that (moves) upwards etc. How can the death of the inner self be reasonable: For the death (viz. destruction) of the body alone stands to reason, it being directly perceived. [34]

¹Cf. BS 2.3.17 which explains the use of *hi* 'indeed'.

²CU 6.11.3 which refers to the self; here is meant the inner self which is identical with the self.

³*Kāthopaiṣad* 2.1.18; cp *Gītā* 2.20.

BU 3.2.12 is under reference. There follows in verses 35-40 an exposition of *kim enaṃ na jahātīti nāmeti*— i.e. the name, viz. description 'he is liberated' remains after a person leaves the worldly body.

प्राणा एव विलीयन्ते किं वान्यदपि कृत्स्नतः ।
प्रयोजकादि निःशेषं म्रियमाणाद्विपरिचतः ॥३५॥

(One asks:) 'In the case of a dying person, who knows (about the nature of the Ātman), is it only the *prāṇas* that merge (into their causes)? or, is there anything else (that so merges) in its entirety? or that which affects (the activities of the sense-organs) etc.,¹ without (leaving) any remainder?' [35]

¹*prayojaka* refers to desires which cause activity and *ādi* to the world of the objects of desires.

प्राणमात्रविनाशे स्याद्भूयो जन्म प्रयोजकात् ।
सप्रयोजकतन्नाशे मुक्तिरस्योपपद्यते ॥३६॥

(The answer is given:) '(If it is held) that there is death (i.e. merger) of only *prāṇas*, then there would certainly be a birth

(for the dying knower) again, since there has remained that which causes activity.¹ And if you accept that there is a destruction (of those *prāṇas*) together with those which cause activity in them, then there does reasonably follow liberation (of the dying knower).’ [36]

For the dying knower of the Brahman there is not any more any connection with the sense-organs and also their objects; this duality does not exist in him. It is this thought which underlies this verse.

¹This implies what we have mentioned in the note on the preceding verse.

किमेनं न जहातीति पृष्ठो नामेत्यथाब्रवीत् ।
न किञ्चिन्न जहातीति प्रसिद्धेरिदमुच्यते ॥३७॥

(Then the Siddhāntin when) asked: ‘What does not leave him (i.e. this dying knower)?’ answers, ‘(It is only) name.’ This is in the same way as it is a commonly accepted notion that a (dying) person does not leave anything—nothing is left (behind) him. [37]

This explains the commonly accepted notion which forms the basis of the preceding verse.

नाममात्रावशेषं तदित्युक्तौ गम्यते यतः ।
न किञ्चिदवशिष्टं स्यादिति यद्वत्तथेह तत् ॥३८॥

As it becomes known from (lit. in) the (popular) speech, viz. ‘That has remained only in name’, that there is nothing left (of a thing); so that is here (in the answer). [38]

This explains the commonly accepted notion (*prasiddhi*) mentioned in the preceding verse.

शब्दार्थश्चाकृतिर्यस्मान्नातो नाम विनश्यति ।

आनन्त्यं नित्यतैवास्य नाम्नो न व्यक्तभूरिता ॥३९॥

Since the meaning of a word is but a form (i.e. some manifest form)¹, therefore, name does not (ever) perish and this name has infiniteness and perenniality, though it does not assume many manifestations. [3

This verse explains *anantaṃ vai nāma*.

What remains is the name but not the differently named individuals; for instance, in the statements like 'Śuka obtained liberation', 'Vāmadeva obtained liberation' and such other statements about different individuals, those individuals have died, but their names which are used in worldly dealings ever continued to remain.

Read SP: *vyaktibhedasya prasiddhatvān na tadvaktavyam brahmadevāḥ svadr̥ṣṭyā nāmāpi na śīsyate pra(=loka)dr̥ṣṭyā tadavaśeṣoktiḥ ... ato nāmanityatvaṃ vyāvahārikam*.

¹Cf. the discussion in BU 1.4 on *nāmarūpābhyām vyākṛta*, as SP has pointed out: *ākṛteḥ śabdārthatvaṃ tṛtīye* (i.e. BU chapter 1) *vyutpāditam*.

There is now in brief the statement of the purport of BU 3.1.3.

मृत्योः प्रयोजकं यत्स्याद्ग्रहातिग्रहस्पिणः ।
तत्स्वरूपावधृतये प्रारब्धैषोत्तरा श्रुतिः ॥४०॥

Now in order to ascertain the notion of what causes Mr̥tyu which is of the forms of Graha and Atigraha, the subsequent Śruti has begun. [40

This refers to *yatrāsyā puruṣasya mṛtasya*

Verses 41-44 state the view of Bhartṛprapañca about the meaning of kim enaṃ na jahāti (which is already explained in BU 3.2.12).

वैश्वानरवरादत्र केचिदाहुर्महाधियः ।

देहद्वयविमोकेऽपि नैव मुक्तः पुमानिति ॥४१॥

Some (persons) of great intellect¹ have, owing to the favour of Vaiśvānara (viz. Agni), said in this connection 'Even if there is separation from both the bodies,² the person³ is still not at all liberated'. [41]

The second line refers to Bhartṛprapañca's theory of two *samuccayas* in relation to liberation. This is mentioned in the next verse.

¹Sureśvara thus expresses his mock regard for Bhartṛprapañca.

²This refers to both the *sthūla* and the *sūkṣma* bodies.

³That is, the person with the inner self.

नाममात्रावशेषोऽसावन्तरालेऽवतिष्ठते ।

परात्मनः परिच्छिन्नोऽविद्ययोषरूपया ॥४२॥

That (person) remains just midway between (the state of liberation and the existence on the earth), having only the name as his remainder, kept apart (lit. cut away) from the highest Ātman (as he is) by ignorance¹ which has the nature (similar to that) of a barren land. [42]

¹Read NKL: *brahmāprāpya saṃsārāc ca muktaḥ antarāle avidyāmātravyavadhānas tiṣṭhati*.

उच्छिन्नकामकर्मासौ कृत्स्नतत्फलभोगतः ।

उच्छिन्नाशेषबुद्ध्यादिस्तत्कारणपरिक्षयात् ॥४३॥

That person has his desires and (ritual) activity cut away by the enjoyments of all the fruits (i.e. results) of the same. And also he has his entire notion of them destroyed by the destruction (lit. decrease) of their cause. [43]

The second line points to how the *antarāle* 'vasthāna' (mentioned in the preceding verse) finally comes to an end.

अद्वैतदर्शनेनास्य द्वैतदृष्ट्यपनुत्तये ।
पर आरभ्यते ग्रन्थो ब्रह्मविद्यावबुद्धये ॥४४॥

Now, the subsequent portion of this Adhyāya is begun in order that the seeing of duality on the part (of that person) is removed by the sight of non-duality and that there is the acquisition of the lore of the Brahman by him. [44]

Verses 45-121 give blame to the view of Bhartṛprapañca in its various aspects (these are shown as subsections below).

अत्र यत्प्रतिवक्तव्यं तदुक्तमसकृत्पुरा ।
जिहेम्यत्र पुनर्वक्तुं पुनरुक्तगिरा भृशम् ॥४५॥

Whatever is to be stated as the refutation in this respect has been already stated by me time and again (lit. not once); therefore, I feel embarrassed to repeat what is said as the restatement of the same at length (*bhr̥śam*). [45]

This refers to BUBV 1.4.1692ff. in relation to BU 1.4.15.

भाष्योपात्तमतो ब्रमो नानुपात्तं कथं चन ।
पिष्टपेषणवत्सर्वं पूर्वपक्षौक्तिदूषणम् ॥४६॥

Therefore, I shall state (only) that which is gathered from the comments in the Bhāṣya and not at all (*katham cana*) what is not stated by him, since pointing out the entire (mass of) faults in his view (lit. *prima facie* view) is like grinding what is already ground. [46]

The word *bhāṣyopātta* has to be understood in relation to the writing of Bhartṛprapañca and not to Śaṅkara's writing. Again the word *anupātta* stresses how various shades of thought which arise from Bhartṛprapañca's comment (without his own knowing!) are in this place avoided—Sureśvara has not done so earlier.

Read SP (followed by NKL): *bhāṣyoktaṃ dūṣaṇaṃ katham
api na brūmaḥ, kiṃ tu tenānuktaṃ bhartṛprapañcabhāṣyoktaṃ
taiḥ svadoṣatvenājñātaṃ taddūṣaṇaṃ apūrvam varṇayāmaḥ.*

द्वैतदृष्टयैव निःशेषद्वैतकार्यपरिक्षयात् ।
न भूतमात्रोपादाने बीजमस्ति मनागपि ॥४७॥

Owing to (the dead person's) seeing of duality (in its proper perspective), there is the destruction of the entire (world of) effects of duality, therefore, there is not even a little of a seed of taking up the elements (for the body by the Ātman of the departed). [47]

This verse originates in Bhartṛprapañca's own statement: *dvaitadarśanena kṛtsnadvaitakāryam ucchinnaṃ na bhūtamātro-
pādāne bījam.*

पुमर्थावसितेः शास्त्रं कृतार्थं विनिवर्तते ।
अद्वैतदर्शनेनातो नास्ति किञ्चित्प्रयोजनम् ॥४८॥

Since there has already occurred the accomplishment of the end of human life, scriptures become (only) redundant (lit. return); for their purpose is (already) achieved. And, consequently, on the acquisition (lit. vision) of non-duality, the scriptures have no purpose to achieve. [48]

This means Bhartṛprapañca's theory of the first *samuccaya* of *dvaitabuddhi* and *karmajñāna* effects the removal of the transmigratory existence. And, therefore, there cannot be any purpose for the scriptures to achieve. This is to say that the man is already *apavṛkta* '(rendered) devoid of (any purpose)' and therefore *kṛtārtha*.

अद्वैतदर्शनार्थाय शास्त्रारम्भोऽत एव च ।
नैवोपपद्यते कृत्स्नपुरुषार्थावसानतः ॥४९॥

For this very reason, the effort (*ārambha*) of the scriptures for leading a person to the sight of non-duality does not become reasonable, for all the ends of human life have been achieved.¹ [49]

¹In the view of Bhartṛprapañca, add here *dvaitadarśanenaiva*.

उपपन्नस्तदारम्भो मिथःकार्यपृथक्त्वतः ।
द्वैताद्वैतात्मसंदृष्टयोर्दन्तोलूखलयोरिव ॥५०॥

Therefore, there rationally follows that (viz. the effort of scriptures) is useful in that the seeing of duality and also of non-duality could together have their effectiveness, each being useful for (its distinct) different purposes; (this) would be like (the effects produced by) the (upper and lower) teeth of a person and a mortar and a pestle. [50]

The use of the teeth of a man is for chewing the food and that of a mortar and a pestle is to pound the grains so that their powder becomes eatable. Different parts of the Śāstra give rise to the awareness of duality (related to ritual) and non-duality (of the Ātman); thus, these two are different in their purposes.

आसङ्गकार्यमुच्छिन्नं द्वैतदृष्ट्यात्मनो यतः ।
आसङ्ग एव भूतानामुपादानमिहेष्यते ॥५१॥

As¹ it is held by the view of duality (between the Ātman and the varied worldly objects) that the effects² of attachment become destroyed, so here (i.e. in our view also) it is accepted that attachment itself (*eva*) is the material cause of the elements.³ [51]

¹This is for *tataḥ* which literally means 'because'. However, the intention is to point out the similarity between the *dvaitādvaita* view of Bhartṛprapañca and the Advaita view.

²The singular form *kāryam* is indicative of the plural *kāryāṇi*,

i.e. *jātāv ekavacanam*.

³In the Advaita view also, attachment to worldly objects is considered to be the material cause of *bhūtādisṛṣṭi* 'the world of objects which originate from elements'. But, of course, it should not be forgotten that *āsaṅga* 'attachment' is earlier stated to be *pāpman* 'evil, or root of evil, i.e. transmigratory world'. Cf. BUB 1.3.1 (p.44): *ko 'sau svābhāvikaḥ pāpmāsaṅgo mṛtyuḥ* and, in particular, BU 1.3.10 and 11.

स एष द्वैतदृष्ट्यात्र कर्मपक्षो निराकृतः ।
कामश्च वासनाः सर्वा माहारजनपूर्विकाः ॥५२॥

This is thus the refutation (or discarding) of the view regarding (ritual) activity in the light of the view of duality; and (it is shown that) desire is (but) impressions which have (been expressed) as preceded by (the word) *māhārajana* 'turmeric'. [52]

This explains the thought of verse 51 in its fullness.

सर्वं चेद्विनिवृत्तं स्यात्किमन्यदवशिष्यते ।
तत्परिच्छेदि विज्ञानमविद्यैवावशिष्यते ॥५३॥

(Further, a question is asked by the Advaitin:) 'If (in your theory) all (the world of objects) has become destroyed (lit. turned back), what else does there remain then?' (The answer to the question can be:) 'There (yet) remains ignorance which is otherwise called *vijñāna*, 'the knowledge on the part of the inner self' which delimits it (lit. cuts it away from its natural status).' ¹ [53]

This verse is supported by SP with a quotation: *yathāhuḥ vijñānātmanah kim avaśiṣyata iti, vijñānātmanah avaśiṣyata iti bhāṣyeṇottaram āha*. This is further explained in verse 54 below.

¹NKL states: *tatparicchedakāraṇam ajñānam ity arthaḥ*.

कर्मारम्भे विकर्त्रेव स्वाश्रयस्य सदेष्ट्यते ।
इयत्ता कारकावस्था परिच्छिज्ज्ञानमेव तु ॥५४॥

It is ever accepted that, at the beginning, an activity is the specific modifier of its own substratum (and), being possessed of a certain magnitude, the characteristic of the state (of the inner self) as an agent of the activity it is only the specific knowledge¹ of the inner self which cuts it away (from the Ātman). [54]

Bhartrprapañca hereby reaffirms the effect of ritual activity only insofar as the state of duality is accepted and ignorance still continues to be there until the real state of non-duality is established.

¹We have specific knowledge in the light of what Bhartrprapañca has in mind, as explained in the next verse.

सैषाविद्या परिच्छेत्री ययायं परमात्मनः ।
संसारित्वं परिच्छिन्नो विज्ञानात्मत्वमश्नुते ॥५५॥

This¹ is that ignorance which cuts (the inner self) away from the highest Ātman, and by which there results transmigratory existence for the highest Ātman; (this highest Ātman, thus) delimited (lit. cut off) from its natural state, comes to have the nature of Vijñānātman. [55]

This explains the nature of Vijñānātman mentioned in the preceding verse.

¹This refers to knowledge mentioned in verse 54 above.

निवृत्तो द्वैतविषयाद्यप्येष तथापि तु ।
संसारावस्थ एवायं द्वैतत्वाद्ब्रह्मभेदतः ॥५६॥

Even if this one has turned away (from the status of) duality,¹ it still is in the state of a transmigratory being, on account of its difference from the Brahman and also its being subject

to duality.

[56]

Both AnSS and NKL misread *-viṣayādyadyapyeṣa*.

¹NKL points out *prathamopāstisāmarthyāt* which is paraphrased by the editor as *dvaitopāśanabalāt*.

यतोऽनवसितं वाक्यं पुमर्थानवसानतः ।
प्रवर्तते पुरेवातो ब्रह्मण्यप्ययसिद्धये ॥५७॥

Since the intended sense (lit. the sentence of Bhartṛprapañca) is not complete (in the light of above explanation),¹ the final end of the human beings (*mokṣa*) has not been accomplished; therefore, that inner self proceeds (to perform activities), as before, in order that the merger into the Brahman is (finally) accomplished.

[57]

¹That is, is not meaningful (*anavasitārtha*).

एकवाक्यत्वमेतस्माद्द्वैताद्वैतार्थवाक्ययोः ।
मोहादवस्तेर्न चाशेषः पुरुषार्थः समाप्यते ॥५८॥

Thus, these two statements, which relate to duality and non-duality, form one unified sentence(-meaning) (and) there does not occur destruction of delusion and thus the complete achievement of (the final) human end is not accomplished.

[58]

परिच्छेदं हि यत्कार्यं तदेव विनिवर्तते ।
ध्वान्तोच्छ्रितौ विकर्तृत्वं कर्मणस्त्वनुवर्तते ॥५९॥
आसङ्गश्च तथैवास्ते ते एते सङ्गकर्मणी ।
अनिवृत्ते सती भूयोऽविद्यां जनयितुं क्षमे ॥६०॥
अविनिर्भागवृत्तित्वात्सर्वदैव परस्परम् ।
न चाविशुद्धे द्वैतार्थे शक्यमद्वैतमीक्षितुम् ॥६१॥

It is only that which ceases to exist (lit. turns back) whose effect is delimiting (the inner self); but, when darkness¹ is

destroyed, there still continues to be the character of activity, viz. that it modifies (or affects the nature of the inner self).

[59]

And, attachment to the objects still continues to be there just the same. Thus, these two (viz. attachment and activity) being continuous (lit. not having turned away) are capable of generating ignorance.

[60]

Thus, since (attachment and activity) have at all times not existed mutually apart, and, the state of duality is not purified, it is impossible to experience (lit. see) non-duality.

[61]

¹This relates to 'whose effect' as already stated.

इत्यादि पूर्वपक्षोक्तिदूषणेष्वभिधास्यते ।
ग्रन्थभूयस्त्वसंत्रासात्रैह कृत्स्नोऽभिधीयते ॥६२॥

This and such other (argument) will be pointed out among the faults in the statements of the *prima facie* view; yet, for fear of prolixity of the work, I do not state the whole of it.

[62]

We should remember here that the *prima facie* view holds singleness of the Ātman consisting in *samasta* and *vyasta* forms (viz. in 'collectivity and individuality'). Sureśvara makes only the faulty statement of Bhartṛprapañca as the objects of refutation, as said in verse 46 above and as will be clear from the verses that follow.

In verses 63-83, there is refutation of the view: The first combination of knowledge and activity results in removal of duality.

भूरि दूषणमत्रोक्तं श्रुत्या च स्वयमेव च ।
पुरुषो वा इति ह्युक्त्या तथास्मादिति वाक्यतः ॥६३॥

In this respect, many faults have been pointed out by the

Śruti and he himself (has said faultily).¹ (This is clear) indeed by the statement (of the Śruti) *puruṣo vā* ...² and similarly from the statement *asmāt* ...³ (by Bhartṛprapañca himself).

[63]

¹This means that these faults in his own comments are to be gathered from his own interpretations of the Śruti.

²This refers to BU 1.5.2 and on this Bhartṛprapañca in BUBV 1.5.27-58.

³This refers to BU 1.4.15 and on this Bhartṛprapañca in BUBV 1.4.1644-1658.

कारणादक्षरादन्नं पुरुषेणेह कर्मणा ।
अव्याकृतादिभावेन व्रीह्यादित्वाय जन्यते ॥६४॥

In this view,¹ the Puruṣa who has not become manifest etc.² creates from the imperishable cause (i.e. the Brahman) the grains of rice etc.³

[64]

¹This is mentioned by SP in the sense of 'in this world which is the substratum of various enjoyments'. This could not be set aside altogether.

²The word 'etc.' refers to things like Vāc, body and intellect; see verse 66 below.

³This refers to other kinds of grains like barley.

तत्रैवं सति यद्येतदद्येतैव हि केवलम् ।
न जन्यतेऽतः क्षीयेत न त्वेतन्नेह जन्यते ॥६५॥

This being so, if this (*vṛīhi* etc.) is not created by only the eater, then, therefore, it could not either decrease or be reproduced.

[65]

This verse answers the question that the food being continuously eaten could not be eternal. The answer means: as the food is being eaten continuously, therefore it is imperishable.

Read SP: *bhogasya sargāvinābhāvadyotīti hiśabdaḥ*. This is further explained in the next verse.

नित्यं भुङ्क्ते यथैवान्नमात्मा वाग्देहबुद्धिभिः ।
अक्षीणैः कर्मसंतानैस्तथैव जनयत्यपि ॥६६॥

As this Ātman ever keeps on eating (the food etc.) by means of his Vāc, body and intellect,¹ then, in the same way, by the continuous performances of actions which do not get exhausted (i.e. do not cease to be), he also creates the food etc. [66]

¹Vāc refers to Prāṇa, body to the sense-organs, and intellect to the internal organs.

भूतानि क्षीयमाणानि कर्मणा परमात्मनः ।
पुरुषेणेह जन्यन्ते तस्मात्स पुरुषोऽक्षितिः ॥६७॥

Since these foods (lit. elements), continuously decreasing, are created by the (manifest) Puruṣa, through his activity (or the activities of Sūtra), i.e. by the highest Ātman; therefore, that Puruṣa (is described as) not having any destruction. [67]

पूर्वकर्मोपभोगो यः पुरुषाणां शुभाशुभः ।
तस्मादासङ्गवैशेष्यादन्यस्य प्रक्रिया पुनः ॥६८॥

Whatever, auspicious or inauspicious, be the enjoyment by the Puruṣas of the *karmans*,¹ done earlier owing to the particular attachment of the Puruṣas to them, the latter (i.e. enjoyment) goes on being created (*prakriyā*) again and again. [68]

The underlying thought in the verse is: As the enjoyment of this life is the result of the formerly performed *karmans*, so there is the effect of the enjoyment for the mixed life through (or, as the result of) the activity. That is done in this life, thus, there will be continuity, i.e. absence of decrease, in the enjoyment or food.

¹This refers to *karman* done in earlier life (or lives).

तत्रैवं सति सासङ्गाः प्रायेण प्राणिनो यतः ।
अतः कामाशयवशात्सृज्यतेऽन्नं मुहुर्मुहुः ॥६९॥

This being so, since the beings are generally having attachment to the objects or enjoyments, therefore the food is again and again produced on account of the contents of the desires (of the present life). [69]

क्षीयन्तेऽन्याश्च भोगेन चीयन्तेऽन्याश्च कर्मणा ।
भूतमात्राः प्रदीपस्य संतानेनार्चिषो यथा ॥७०॥

(Thus) some elements and their *mātrās* decrease through their enjoyment (by the Puruṣas) and some others are created by (their) activities. This is in the same way as the continuity of a lamp which gives rise to (more) flames. [70]

परस्परात्तृभोज्यत्वसंस्कारोपनिबन्धनम् ।
विज्ञानात्मभिरारब्धं बभ्रमीत्यखिलं जगत् ॥७१॥

Thus, this entire world keeps on revolving as it is set in motion (lit. is begun) by the Vijñānātman, depending on various impressions such as being mutual eaters and having characteristic of what is to be enjoyed. [71]

विज्ञानात्मा हि यः कश्चित्कर्मणा येन केनचित् ।
साधिभूताधिदैवस्य जगतः सर्गकारणम् ॥७२॥

Whoever¹ be the Vijñānātman and whatever¹ be his activity, that is the cause of the creation of this world together with what is related to the elements and what to the gods. [72]

¹This indicates the process mentioned in the verse irrespective of the states of the Vijñānātman, whether high or low, and the nature of the activity, whether rigorous or mild.

श्रुत्यैतत्स्वयमेवोक्तं कर्म न क्षीयते यथा ।
दैववागादिसंपत्तिस्तथा त्र्यत्रात्मदर्शिनः ॥७३॥

This is stated by the Śruti itself, viz. activity never ceases to be; so also (never cease to be) the becoming of the divine wealth as well as that of Vāc etc. in the case of the one who knows (lit. sees, i.e. understands) the nature of the three foods. [73]

This has a reference to BU 1.5.2 and 18.

इदं तत्तदिदं चेति त्रिषु कालेषु नित्यताम् ।
प्राहास्य विद्यमानस्य विक्रियामात्रमेव तु ॥७४॥

In the statement *idam tat* and *tad idam*¹ the Śruti has declared the perennial nature of this existing world, in all three times; the world is merely the modification(s) indeed (*tu*). [74]

This verse expresses Bhartṛprapañca's idea about the non-origin and, therefore, the perennial nature of the world.

¹BU 1.4.7: *tad dhedam* ... which, according to NKL, is *sāmānādhikaranyāśruti*.

यद्यत्कामयते चास्मादविद्याकामकर्मणाम् ।
ब्रह्मण्यवस्थितस्यापि त्वक्षयत्वं श्रुतिर्जगौ ॥७५॥

The Śruti has stated *yad yad kāmayate cāsmāt* and thereby declared the non-destructible nature (of the world) which has been abiding in the Brahman. [75]

कृत्स्नप्राप्त्या क्षयो नातो विद्यते कामकर्मणोः ।
प्रमाणासंभवात्तस्मादसमीचीनमुच्यते ॥७६॥

Therefore, by obtaining fullness,¹ there is not destruction (or loss) of (both) the desire and activity. Since there is the authoritative means (to show that); therefore, what you have

said is not proper.²

[76]

¹*kṛtsna* here stands for Sūtra; this is to achieve the fullness of Sūtra.

²This argument of Bhartṛprapañca is against Kevalādvaitavāda. According to him, it is to refer to the statement that knowledge and activity destroy both the forms of human being and Sūtra.

व्यक्ततायाः क्षयो यस्तु कारणात्मतया श्रुतः ।
तादृक्क्षयः सुषुप्तेऽपि नैवास्माभिर्निवार्यते ॥७७॥

And what you have said as heard in the Śruti, viz. the destruction of the manifestation (of the object(s))¹ as having the nature of the cause and also a similar destruction (seen by us) in the sleep state,² is not denied by us.

[77]

Liberation is attained by the Kevala Advaita as complete removal of the notion of cause and effect. Bhartṛprapañca opposes only on the ground that since such removal of cause and effect relation is revealed in sleep therefore liberation should not be specifically mentioned as different from sleep. Therefore there is no end of effort to acquire the knowledge of Brahman without it.

¹Cf. *yat prayanty abhisamviśanti* (Taittirīyopaniṣad 3.1).

²Read SP: *svāpe 'pi siddhes tadartham samuccayānuṣṭhānam vyartham ity arthah.*

प्रत्यक्तत्त्वपरिज्ञानजन्मैव ध्वंसहेतुताम् ।
द्वैतस्यैति पुमर्थश्च नातोऽन्यत्किंचिदिष्यते ॥७८॥

And this statement of yours, viz. the very birth of the complete knowledge of the true nature of the inner self becomes the cause of the destruction of duality (and) there would not be desired any other end of human life.

[78]

This verse discards the authority of the Śruti in relation to

pursuit of the end of human life.

तमेतमिति च तथा सर्वेषामपि कर्मणाम् ।
प्रत्यग्ज्ञानसमुत्पत्तौ विनियोगः प्रदर्शितः ॥७९॥

In the Śruti statement *tam etam* there is clearly shown the employment (or usefulness) of all the activities in causing the rise of the knowledge of the inner self. [79]

Bhartṛprapañca asserts that activity done according to the Śruti injunction is helpful towards the rise of knowledge and thus the Karma- and Jñāna- Kāṇḍas are complementary together; cf. SP: *prāṇādīkānvayānurodheneti yāvat*.

भिद्यते हृदयग्रन्थिश्छिद्यन्ते सर्वसंशयाः ।
क्षीयन्ते चास्य कर्माणि तस्मिन्दृष्टे परावरे ॥८०॥

“The knot of the heart is loosened; all doubts are cut off; and all the activities of this person come to a stop¹; immediately as the highest one is known (lit. seen).”² [80]

This is a verse from *Muṇḍakopaniṣad*, viz. 2.2.9. Translation is reproduced from Hume's edition.

This refers to that the *karman* in this verse is taken by Bhartṛprapañca as an aid to knowledge. Hereby he justifies his theory of the combination of knowledge and activity.

¹Literally, they become destroyed.

²Literally, the one, who is the high and the low, is experienced.

भोगक्षयेण काम्यानां निषिद्धानां च कर्मणाम् ।
क्षय आरब्धकार्याणां ज्ञानिनोऽपि न बोधतः ॥८१॥

In the case of the knower (of the Brahman) also, the cessation (lit. destruction) of the activities, which he has begun in this life in relation to the rituals, both desired and prohibited, comes into effect only through enjoying, i.e. experiencing the

(same) results. But (this is) not so happening from only a person's knowing (about the nature of the Brahman) from Śruti. [81]

आभवादजितानां तु सर्वेषामपि कर्मणाम् ।
क्षयोऽनारब्धकार्याणां सम्यग्ज्ञानप्रसूतितः ॥८२॥

There is cessation of all the activities (whose effects) a person has obtained from his very birth, but in the case of the activities which he has not begun (there is similar) removal revealed from the rise of proper knowledge (of the Ātman). [82]

ज्ञानोत्पत्तौ क्षये मानं कर्मणां विद्यते यथा ।
कृत्स्नप्राप्त्या क्षये मानं न तथा किञ्चिदिष्यते ॥८३॥

As there obtains in the rise of knowledge (about the nature of the Brahman) the means towards the destruction (lit. diminishing) of (ritual and other) activities, so do we not notice (lit. desire) any means towards the destruction (of the same) in securing (the nature of) fullness:¹ a means to their destruction. [83]

This verse answers a possible argument that obtaining oneness with Sūtra can, like the knowledge (about the nature of the Brahman), effect the destruction of the effects of activities.

¹This is becoming one with Sūtra.

Verses 84-89 discuss ignorance as the delimiting agent.

परिच्छेत्री न चाविद्या तमोरूपा हि सा यतः ।
आच्छादिकातः सा युक्ता समस्तव्यस्तरूपिणः ॥८४॥

(A possible objection of Bhartṛprapañca:) 'And ignorance also is not (i.e. cannot be) a delimiting adjunct (of the Ātman), since it is of the nature of darkness'. (Answer is given:) 'It is merely a cover and therefore (there is) the mention of

it (in the view of Bhartṛprapañca as of the Ātman having) the form of totality and individuality'. [84]

The argument of Bhartṛprapañca conveys that ignorance can affect the Brahman by obscuring all its forms.

न चापि मिथ्याविज्ञानं परिच्छेदकमिष्यते ।
परिच्छिनत्ति किं व्योम नीलज्ञानं मनागपि ॥८५॥

(But) ignorance is not false knowledge (which is) accepted (lit. desired) as a delimiting adjunct. Does (indeed) the knowledge (i.e. the viewing) of the blue¹ (really) cover the sky, even a little? [85]

¹This refers to false knowledge that the sky is blue.

सतो हि व्यञ्जकं मानं न तु तत्कुम्भकारवत् ।
मेयवस्त्वनुरोधित्वात्परिच्छेदकता धियः ॥८६॥

A means of knowing reveals only that which is existent, but it is not like a potter (a creator in relation to a pitcher). Knowledge (lit. intellect), (however) has the nature of a delimiting factor, since it follows¹ the object to be known.

[86]

This refers to the cause and effect relation between things if the cause has in it its effect in a potential form. The simile given in the second half of the first line refers to instance of opposite nature; that is to say a potter does not have in him the effect, viz. pot, in a potential form. Only clay can be called the cause of a pot. Thus it refers to the nature of a delimiting factor where the means has a relation to the effect, that is: the nature of the cause is in agreement with that of the effect. This is noticed in intellect with the impression on it of the object to be known, for only then the object is grasped.

¹That is, it covers or (fully) grasps.

यथावस्त्वनुरोधित्वमज्ञानस्यापि चेन्मतम् ।
मुक्ते मेये सदा मुक्तिर्बन्धो वा स्याद्विपर्यये ॥८७॥

If it is held that ignorance also has the character of being in agreement with the thing (i.e. object to be known) as it is, then the object to be known, being (already) liberated, there would ever be the state of liberation, and, if otherwise, (there would ever be) bondage. [87]

This verse answers the possibility of holding ignorance also as being in agreement with the individual just like *dhī* 'intellect', viz. the inner self as said in previous verse. This is because there would be in that case, at all time, the state of liberation or bondage.

नात्मानात्मीयकार्यस्य स्यादुपादानकारणम् ।
अतादात्म्यान्न हि घटं जनयन्तीह तन्तवः ॥८८॥

The Ātman cannot be the material cause of the product of non-Ātman because of (their) not having one nature; indeed threads do not (i.e. cannot) produce a pitcher. [88]

This verse emphasises the necessity of *tādātmya* 'having one nature' of (what are a cause and the effect). This is clarified by an instance of threads and a pitcher, which do not have *tādātmya* between them.

परात्मनः स्वतोऽविद्या बहिष्ठे कामकर्मणी ।
आगते न त्वविद्याया भवतैवैतदुच्यते ॥८९॥

Ignorance on the part of the highest Ātman comes into existence, on its own but (i.e. and) the externally obtaining desire and its object have not come from (i.e. are not produced by/from) ignorance—(and) this (i.e. latter) is what you yourself have said. [89]

Read SP: *kṣīter ūṣaravad avidyā parasmāt svato jāyate kāmakarmanī tu savāsane pūrvapūrvakāmādivaśād uttarottare pratīcy utpadyete nāvidyākṛte ity etad bhartṛprapañcair evocyate.*

Verses 90-101 refute the view that desire and activity related to it effect removal of ignorance.

न चाप्यविद्यामसतीं शक्नुतः कामकर्मणी ।
तदकारणतः कर्तुं मृत्स्नेभाश्वादिकं यथा ॥९०॥

Also, desire and its object are not capable (of producing) ignorance which did not exist before, because they are not the cause of its production, like softened clay which can produce an elephant, a horse etc. [90]

Verses 90-101 refute that desire and its object can produce ignorance which is already destroyed by knowledge.

न चात्यन्तासतो जन्म कुर्याल्लोकेऽपि कारणम् ।
नर्ते धरां सुवृष्ट्यापि पद्मिनीसंभवोऽम्बरात् ॥९१॥

Indeed, in the world, no cause can effect the rise of what is absolutely never-existent; there never can be the rise of a lotus-creeper, even if there are good rains coming from the sky unless there is the earth (for its basis of origin). [91]

ब्रह्मैव चेदविद्याया जन्मनः कारणं मतम् ।
तस्मिन्सति समुच्छित्तिरविद्यायाः कथं भवेत् ॥९२॥

(A question is asked:) If it is held that the Brahman itself is the cause (or, origin) of ignorance, how could there be the destruction of ignorance while that (viz. the Brahman) ever continues to exist? [92]

आत्यन्तिकी समुच्छित्तिः स्याच्चेन्मोहस्य कारणे ।

सत्येव नश्वरस्यास्य स्वतः किं साधनैर्वद ॥९३॥

If there would be absolute destruction of ignorance while the cause of this perishable ignorance has continued to exist, then what is necessity of the means of the destruction of this perishable one? Tell me. [93]

न चेत्ते शक्नुतोऽविद्यां रक्षितुं कामकर्मणी ।
विद्यमानां विनष्टां तु कर्तुं ते शक्नुतः कथम् ॥९४॥

If those, viz. desire and its object (which we have already stated), are not capable of protecting ignorance while it exists, how would they be able to achieve (lit. do) that, when it becomes destroyed? [94]

कामकर्मादिहानेऽपि यद्यविद्यावशिष्यते ।
नेतीति वचसो व्याख्या तथा सति विरुध्यते ॥९५॥

(An objection is raised:) If ignorance continues to exist even when desire and (its related) act are given up, then the explanation of the statement *neti neti* would be opposed. [95]

नेतीति प्रथमः शब्दो मूर्तामूर्तनिषेधकृत् ।
द्वितीयो नेति यः सोऽथ भावनाप्रतिषेधकृत् ॥९६॥

(The answer is:) The first word *neti* is for denying what has a form and what does not have a form, and the second (word) *neti* is for setting aside the *bhāvanā* 'impression' of it. [96]

This verse shows Sureśvara's opposition to the explanation of *neti neti* which is given by Bhartṛprapañca.

भावनादिविशेषेषु यच्छान्तेष्ववशिष्यते ।
निष्कलं तत्परं ब्रह्म नेति नेत्युपदिश्यते ॥९७॥

What continues to exist (lit. remains) even when particular

impressions are destroyed, is then taught (i.e. described) the spotless, the highest Brahman in the words *neti neti*. [97]

This is the meaning of the sentence *neti neti*; it opposes Bhartṛprapañca's explanation of the sentence as given under Mūrtāmūrta Brāhmaṇa.

ज्ञातं ब्रह्म यथावच्च न चापागात्ततस्तमः ।
इत्येतदविरुद्धं स्यात्प्रसादाज्जातवेदसः ॥९८॥

That the Brahman is known as it is and that ignorance did not go away from it would not be a contradictory (statement of Bhartṛprapañca) (only) on account of the favour of Fire. [98]

Here Sureśvara is mocking at Bhartṛprapañca, who, by having the favour of Fire, claims to have the right understanding about the nature of reality.

द्वैतार्थस्य विशुद्धिश्च कीदृश्यत्र विवक्षिता ।
अद्वैतानभिसंबन्धो नाशो वा मलशुद्धिवत् ॥९९॥

What kind of purification of the world consisting in duality is intendedd (by him)?, and also a non-relation to non-duality?, or even the destruction which can be compared with wiping away of dirt? [99]

¹This refers to the Bhāṣya of Bhartṛprapañca.

समस्तव्यस्तसंदृष्टौ नाद्वैताद्वैतता पृथक् ॥१००॥

In the view of totality in difference, there cannot be duality as existing apart from non-duality. [100]

तयोरैकात्म्यतो युक्ता नापि तन्नाश इष्यते ।
नष्टे द्वैतेऽखिले न स्यात्समस्तव्यस्तदर्शनम् ॥१०१॥

Owing to their having a unified nature, the destruction of them also cannot be postulated. When duality is destroyed in its entirety, there would not be any experience (lit. seeing) of totality and duality. [101]

Verses 102-107 refute the postulation of the theory of totality and individuality in relation to reality.

शीतोष्णयोरिव कथं परस्परविरोधिनाः ।
एकत्र समवायः स्यात्समस्तव्यस्तधर्मयोः ॥१०२॥

How can there be an invariable association, in one place, of the properties belonging to totality and individuality, which are mutually opposed in qualities like hot and cold? [102]

अपूर्वादिषु जीवत्सु श्रुतिवाक्येषु शक्यते ।
नेश्वरेणापि निर्वक्तुं समस्तव्यस्ततात्मनः ॥१०३॥

It is not possible for even the Lord to explain (as coming from) the Śruti sentences the totality and individuality with reference to the Ātman, while there are (postulated) *apūrva* etc. and living (transmigratory) beings! [103]

This is for specifying that the Śruti sentences are in stark opposition to the view of Bhartṛprapañca.

न च कुम्भादिवदृष्टिरात्मनोऽव्यतिरेकतः ।
अनात्मत्वप्रसक्तिः स्याद्द्रष्टृदृश्यप्रभेदतः ॥१०४॥

Also, there cannot be any seeing of the Ātman as of the pot etc. on account of its having no (association with) any differences; (again) there would be the contingency of holding its nature as that of some non-Ātman on account of (holding) distinction between the seer and (what is) seen. [104]

नो चेत्समस्तदृष्टयैव व्यस्तदृष्टिः समाप्यते ।
आत्मनीति श्रुतेर्वाक्यमप्रमाणं प्रसज्यते ॥१०५॥

If this is not so, then the seeing of individuals is already pervaded by the seeing of totality and (thereby) the Śruti statement *ātmani* ...¹ would be contingently unauthoritative.

[105]

This argument is based on the opposition to Bhartṛprapañca's view by CU and *Muṇḍakopaniṣad*.

¹Cf. *ātmani vijñāte sarvam idaṃ vijñātam bhavati*.

येनाश्रतं श्रुतमिति कस्मिन्न्विति तथा वचः ।
इत्यादि सविरुद्धं स्यान्न चापीहापरा मितिः ॥१०६॥

Also, in that case, the statement(s) of the Śruti, viz. *yenāśrutam śrutam* ...,¹ *kasmin nu* ...² etc.³ would be quite opposed; and there is not any other knowledge possible in his view. [106]

¹CU 6.1.3.

²*Muṇḍakopaniṣad* 1.1.3.

³The word 'etc.' points to *ekam evādvitīyam* (CU 6.2.1).

समस्तव्यस्तसंदृष्टौ न किञ्चिदपि दृश्यते ।
पूर्णाज्ञानैकहेतुत्वाद्रज्जुसर्पादिदृष्टिवत् ॥१०७॥

In the view of totality and individuality there is not seen any means to knowing it, (in respect of the Brahman) seeing so would be like one's seeing a serpent etc. in the place of a rope (etc.)¹ owing to (the Ātman) being a whole and (is yet seen variously) owing to just one cause, viz. ignorance.

[107]

¹Sureśvara's use of 'etc.' after a serpent entails this second 'etc.'. Use of such similes as are not fully expressed is usual in Sureśvara's verses.

Verses 108-115 discuss the futility of holding the view of totality and individuality in respect of the Brahman.

अणुप्रत्येकशः सर्वान्स गृह्णीयादयत्नतः ।
द्वैतभेदानिमान्सर्वानेकैकस्य न वेत्ति यः ॥१०८॥

(Holding that view) a person might be able to collect (i.e. get to know) each one of the numerous atoms, without much effort, even if he does not know each one of these so many different objects that comprise duality! [108]

सर्वेष्वपि च दृष्टेषु द्वैतभेदेषु केनचित् ।
आनन्त्यं ब्रह्मता चास्य दुर्घटा स्यात्तथा सति ॥१०९॥

Then, if (by any chance) somebody has seen all the different objects of duality, there will be infiniteness of them and in that case, getting to know the Brahman would be extremely difficult. [109]

This emphasises the impossibility of knowing all the different objects which are held to comprise the Brahman.

द्रव्यदृष्ट्या समीक्ष्यन्ते धर्मा नीलादयो यथा ।
आत्मदृष्ट्या तथेक्ष्यन्ते नानात्मानो विरोधतः ॥११०॥

As the properties blue etc. can be seen (i.e. known) on seeing (i.e. knowing) the substance (viz. a lotus), so cannot be seen the non-Ātmans on seeing the Ātman because of the opposition (between them¹). [110]

¹Namely, the non-Ātman and the Ātman. They do not have *tādātmya* as blue and a lotus have.

तथा चेहागमवचः पराञ्चीति विरुद्धताम् ।
आत्मानात्मार्थसंदृष्टयोः स्फुटं नः प्रत्यपीपदत् ॥१११॥

To that effect, here is a statement of the Śruti, viz. *parāñci khāni ...*¹ which clearly denies the opposite character of the experiences of the Ātman and the non-Ātman. [111]

¹*Kāthopaniṣad* 4.1.

आत्मा वा अर इत्युक्तौ नैवानात्मेक्षणे विधिः ।
अनूद्यैव यथाप्राप्तमात्मदृष्टिर्विधीयते ॥११२॥

In the statement *ātmā vā are ...*¹ there is not at all an injunction regarding seeing the non-Ātman (as the Ātman); but it is the seeing of the Ātman prescribed only after restating (the various non-objects that is only the Ātman in reality to be).² [112]

¹BU 2.4.5 (=4.5.6). Yet more more proper example is CU 6.7.1: *ya ātmā ... so 'nveṣṭavyaḥ sa vijijñāsitavyaḥ*.

²Cf. BU 4.4.6.

यत्र यत्र विधिर्दृष्टस्तत्र तत्रात्मकर्मकः ।
कृत्स्नानात्मानुवादेन प्रत्यग्दृष्टिर्विधीयते ॥११३॥

And wherever is there noticed¹ such an injunction, it has been only with reference to the Ātman as the object of it. There is a specific laying down the seeing of the inner self by merely reaffirming non-Ātmans. [113]

¹Cf. CU 6.8.7: *aitadātmīyam idaṃ sarvaṃ*

साध्यसाधनसंबन्धविज्ञानं नान्यतः श्रुतेः ।
तदन्येषु पदार्थेषु प्रत्यक्षादिप्रमाणतः ॥११४॥

The knowledge of the relation of what is to be accomplished and what is the means to accomplishing it is not obtained from elsewhere than in the Śruti (related to rituals)—and that is only in relation to objects other (than the Brahman); because

they can be perceived by the means such as direct perception.¹

[114]

¹That is to say: The nature of a sacrifice etc. can be known from other means.

सर्वमानातिवर्त्यात्मप्रतिपत्तौ ततः श्रुतिः ।
निमित्तत्वेन सन्मानं सुषुप्तोत्थापकौकितवत् ॥११५॥

From that (it follows that) the Śruti, being superior to all (other) means, is a good means¹ for getting to know the Ātman just like a statement which awakens a sleeping man.

[115]

¹Because it removes ignorance about the Ātman.

&verses 116-121 point out that the Mantra in the Śruti does not refer to the combination of knowledge and activity as a means to kaivalya.

मन्त्राम्नायोऽप्युपन्यस्तो यथेह न विरुध्यते ।
तथोदके प्रवक्ष्यामः सर्वं भद्रं ततोऽस्त्वदम् ॥११६॥
परापरत्वभेदेन द्वे विद्ये समुदीरिते ।
विद्याविद्ये इहोच्येते तमोवस्त्ववसानतः ॥११७॥

As to how a Mantra from the Śruti is so stated as not opposed to (the combination of knowledge and action), we shall say later; let (only) this much be therefore well-said: [116]

There are two lores stated in the Śruti in relation to their difference as one being higher and the other the lower, viz. there is a statement made about knowledge and ignorance for showing that they effect the end of ignorance. [117]

तपो विद्या च विप्रस्य निःश्रेयसकरं परम् ।
तपसा कल्मषं हन्ति विद्ययामृतमश्नुते ॥११८॥

(It is said) that penance and knowledge (of the Ātman) is for a Brāhmaṇa the best cause of the highest bliss; the Brāhmaṇa destroys (his) sin by penance and obtains the immortal Brahman by knowledge. [118]

This is a verse taken from *Manusmṛti* 12.104, with a slight variation: *kilbiṣaṃ* is used there instead of *kalmaṣaṃ*.

ध्वस्ताध्यात्मादिसंभेदः प्रत्यङ्मोहैकमात्रभाक् ।
द्रष्टव्य इत्यादिविधौ प्रवर्तेत जडः कथम् ॥११९॥

How would a dullard (i.e. non-intelligent person) proceed to follow the injunction '(The Ātman) should be seen ...,' (the one) who has destroyed (i.e. is not aware of) the (confusing) mix up (of matters) pertaining to the body and who entertains merely delusion in regard to the inner self? [119]

इत्यादि पूर्वमेवोक्तं दूषणं दूषितात्मनाम् ।
आत्मानमेवेत्यत्रैव न भूयोऽत्राभिधीयते ॥१२०॥

This and such other (arguments) are the blamish which is already mentioned in respect of those who have spoiled themselves (by holding wrong theories),¹ in relation to the passage *ātmanam eva* ...; therefore, that is not stated here again.² [120]

This refers to BU 1.4.8.

¹The word *dūṣitātman* means one who has obtained and entertained the wrong information about the Ātman.

²In respect of the fault in the theory of Bhartṛprapañca.

सुविस्पष्टार्थतो भाष्यं टीकां नैव व्यपेक्षते ।
तस्माद्भाष्याक्षरैरेव शेषोऽर्थोऽत्र प्रतीयताम् ॥१२१॥

The Bhāṣya (of my teacher) does not at all expect (any comment on it) because of its extremely clear meaning;

therefore, let the remainder of the matter in the Brāhmaṇa be known from the words (lit. letters) in the Bhāṣya themselves.

[121]

Verses 121 to (the end, viz.) 165 are exposition of BU 3.2.12. There is decision regarding the abode of a transmigratory being on death.

ग्रहातिग्रहरूपं तत्प्रयुक्तं केन बन्धनम् ।
प्रयोजकावधृतये याज्ञवल्क्येत्युवाच ह ॥१२२॥

(Uṣasta) then said, 'O Yājñavalkya, who caused (lit. employed) the bond which has the nature of the organs and their objects;¹ (this he asked) with a view to ascertaining what caused (that bond)'. [122]

After some other thoughts have been expounded, there is now discussion taken up of the BU text proper.

¹This refers to *graha-atigraha* in BU 3.1.

कर्माश्रयत्वतो लिङ्गादविद्वानिह गृह्यते ।
प्रकृताया विभक्तेश्च विभक्त्यन्तरसंश्रयात् ॥१२३॥

Here (i.e. in this context) is understood (a man) who does not know (about the Brahman), because of the characteristic (of him), viz. his being the performer (lit. substratum) of (ritual) activity, and also because the (grammatical) case (of a *puruṣa*), (already) under reference has changed into (lit. taken recourse to) another case. [123]

In BU 3.2.12, there was reference to a man who knows the Brahman (*vidvān*) in the words *yatrāyam puruṣaḥ* ... and in BU 3.2.13 also there is reference to a man in the words *yatrāsyā puruṣasya*. Therefore, on account of the proximity (*saṃnidhi*) of the two forms *ayam* (in the nominative) and *asya* (in the genitive), a doubt arises if there is here in Bu 3.2.13 a knower

of the Brahman under reference. The verse discards the idea of a knower of the Brahman. The performance of ritual activity is a clear characteristic (*linga*) of a non-knower of the Brahman. This is a stronger reason for understanding the reference to a non-knower of the Brahman than the proximity already pointed out. Besides, the change of grammatical case—from the nominative to the genitive—can be an added reason. The reference by SP to *yad āgneya ...* and that by NKL to *sarvanāma-prasiddhamātrālambanam* may be further useful!

यत्रास्याविदुषः पुंसो मृतस्यायुष्परिक्षयात् ।
स्वयोनिं वाक्समप्येति वातं प्राणोऽनुगच्छति ॥१२४॥

When (*yatra*), i.e. after the loss of life in the case of the non-knowing man, his speech merges into its source and so also does *prāṇa* 'of principal wind' enter into the Wind, [124]

This refers to the merger of the organs into the elements which have been their sources.

अग्न्यादिदेवतांशा ये भोगार्थं कर्मणार्जिताः ।
वागादिशब्दैरुच्यन्ते त एवात्र न पौरुषाः ॥१२५॥

the words *vāc* etc. express those different parts (in relation to the deities) such as Agni etc. that have been won by the (ritual) activity (of a person) for the enjoyment (of the different things in life)—they are (intended here, and) not those parts which belong to a human body. [125]

This verse explains what are called in the preceding verse sources of different organs.

SP shows the relation of this verse to BU 1.5.15.

पुंसः कर्मक्षये स्वांशान्संहरन्ति यथायथम् ।
अग्न्यादिदेवताः सोऽयमुपसंहार उच्यते ॥१२६॥

The deities, Agni and others, withdraw their own respective portions (in a human body), when there is the complete cessation (lit. decrease) of a man's (ritual) actions—this is what is called *upasaṁhāra* 'withdrawing'. [126]

पुंसो देहग्रहे भूयो देहस्थानेषु देवताः ।
अंशं निदधति स्वं स्वं कर्मभोगप्रसिद्धये ॥१२७॥

These (very) deities, each of them, place their portions in various parts (lit. places) of the body of a man, when he again assumes a body in order that (the man) acquires the enjoyment of (i.e. the results of) his (earlier) activity.¹ [127]

¹The singular form is *jātāv ekavacanam*.

हृद्याकाश इहात्मेति स्यादाकाशाप्ययत्नतः ।
प्रश्नस्य विषयत्वेन विज्ञानात्मोपयोगतः ॥१२८॥

It is *ākāśa* in the heart which is (to be understood as) the Ātman, since even the Ātman¹ has a merger (in the sky); (it refers to) the mention of the knowing individual self as the subject-matter of the question.² [128]

This explains the meaning of the word *ātman* in *ākāśam ātmā*.

¹This does not refer to *mukhyātman*, which is said to merge into *bhūtākāśa*.

²Cf. the question *kvāyam*

अधिष्ठातृवियुक्तानि न्यस्तदात्रोपमानि हि ।
वागादिकरणानीति नालं पुंभोगसिद्धये ॥१२९॥

The various organs, viz. *vāc* etc., which are (then) separated from the superintending one (i.e. the inner self), are indeed similar to a weapon for digging, which is laid down (by a person) and are not capable of effecting (i.e. bringing about) the enjoyment of the human being. [129]

This justifies the propriety in the question with reference to even a subtle body (*liṅgadeha*) which, though accompanied by the individual self (*jīva*), is not possessed of the (gross) limbs that can secure for it the enjoyment of objects.

विदेहदेवतः क्वायं भवत्येष पुमानिति ।
आश्रयं क्वेति पुंसोऽसावप्राक्षीन्मुनिसत्तमम् ॥१३०॥

'Where is there this¹ man, who is now without a body and the deities (of the organs in it)? and where?—thus he (viz. Ārtabhāga) asked the great (*sattama*) sage about the support.²

[130]

This clarifies the question under comment.

¹*eṣa* explains *ayam* in the question.

²*āśrayam* (in accusative) refers to the object of the verb, in answer to *kva*.

किं कारणात्मतामेति किं वा केनचिदात्मना ।
अवतिष्ठत एवायं किं वा कर्मैव संश्रितः ॥१३१॥
गुणान्वा यदि वेशानं कालं वा दैवमेव वा ।
यदृच्छां संततिं शून्यं विनाशं वेति भण्यताम् ॥१३२॥

Is it that he (i.e. the departed man) becomes the Ātman which is the cause? or does this one find support in (i.e. the help of) some Ātman? or does he resort to (some) activity itself?

[131]

or some Guṇas? or some lord (or god)? or time? or Time? or chance? (or the world of deities?) or continuity (of knowledge)? or void? or destruction? Let (this) be told? [132]

Here Sureśvara refers to various theories about the support for a man's self after death. The first question refers to the Ātman (i.e. the inner self) about which there existed ignorance, the second to some Ātman which some fellow-Vedāntins

(*svayūthyas*) have posited as the cause of the transmigratory being (cf. CU 8.3.4: *eṣa samprasādo 'smāc charīrāt*) Then the questions arise respectively from the Mīmāṃsakas, the Sāṃkhya, the Naiyāyikas, the Astrologers, the Mythologists, the Lokāyatas, the Yogācāras, the Mādhyamikas, and finally the Jīvakārya-tvavādins (viz. minor sect of Advaitavādins, SP calls them *svayūthya*).

प्रश्नेन भावितस्तुष्टः पाणिमस्याग्रहीदृषिः ।
अन्यासाधारणं प्रश्नमप्राक्षीदिति विस्मितः ॥१३३॥

The seer who was impressed and pleased by (his) question, took hold of his hand, surprised that he was (at the thought) 'This one has asked me some uncommon question.'¹ [133]

¹The singular is expressive of the many questions converging on one point.

असाधारण्यसिद्धयर्थमावामेवेत्यतोऽवदत् ।
विद्यागुप्तिश्च बहुशः श्रुतावपि समीक्ष्यते ॥१३४॥

Therefore, in order to make clear (lit. establish) the uncommonness (of the question), the seer said 'Let only two of us ...'. (This he did because), in the Śruti also, there is many times noticed secrecy (maintained) about the lore (taught, or talked about). [134]

SP and NKL refer to some passage from the Śruti, viz. *Śātyāyana* 33 and SP further cites *Manusmṛiti* 2.109 and 113-114. These are meant to support this verse.

आवयोरेव विज्ञानं यथेदं प्रागभूदितः ।
आवामेव तथैवोर्ध्वं वेदिष्यावो यथोदितम् ॥१३५॥

'Let this knowledge, which has been there herebefore, be known only for two of us; so shall we, only two of us make it known

to others hereafter, as said (below).

[135]

This verse explains the significance of *āvām* Yet read SP: *idaṃ vijñānam iti prayojakagocaram ucyate etasya prayojaka-vijñānasya yathoditam svarūpam ity arthaḥ*.

सजने प्रश्न एतस्मिन्ख्याप्यमाने त्वयोदिते ।
न सिध्येदावयोरुक्तं प्रयोजनमिदं ध्रुवम् ॥१३६॥

This question will not be decided, if it is being explained (while we are) among (the assembly of) the people. This is certainly the purpose in the statement 'Between only two of us ...'.

[136]

This brings out the purport of *na nāv etat sajane*.

न त्वन्योक्तिपरित्रासाद्याज्ञवल्क्योऽब्रवीदिदम् ।
जल्पे वाद्यतिरेकेण नान्यो वक्ति यतस्ततः ॥१३७॥

Indeed, Yājñavalkya did not say this for fear that somebody else might say (something about the matter) because, in any discussion (*jalpa*),¹ none else than the speaker (*vādin*) speaks.

[137]

¹*jalpa* is a kind of disputation (overbearing reply and disputed rejoinder). Cf. *ubhayapakṣasādhanavatī vijigīṣukathā* (*Gautama-sūtravṛtti* 1.2.2). Read further SP: *vijigīṣus tatrādhikriyate yathā-huḥ, vijigīṣuṇā saha jalpavitanda iti. tathā ca tadīyaśaktinirṇaya-paryantaṃ nānyapravṛttir ity arthaḥ*.

परिशिष्टानपि प्रश्नानुत्क्रम्य व्याकरोदसौ ।
सजनादिति नातः स्यादन्योक्तिभयकारणम् ॥१३८॥

(Later), having gone beyond (the place of the assembly), he explained even the remaining questions, therefore, from the word 'from among (the assembly of) the people' there is not

to be understood any cause of fear.

[138]

Since Yājñavalkya made answers to other questions as well, it is not proper to suppose that he was afraid of the people around. The reason why he preferred to go away from it is already stated in the second line of the preceding verse.

साध्वेतदिति संभाव्य सजनादुत्सर्पतुः ।

याज्ञवल्क्यार्तभागौ तावुत्क्रम्य च जजल्पतुः ॥१३९॥

Having considered that this was the proper thing to do, both of them, viz. Yājñavalkya and Ārtabhāga, moved away from among (the assembly of) the people, and having gone to another place, spoke to each other.

[139]

This is the meaning of *tau ha*

सजनात्तावथोत्क्रम्य मिथस्तत्र यदुच्यतुः ।

तत्सर्वं श्रुतिराचख्यावस्मत्प्रियचिकीर्षया ॥१४०॥

All that, which the two talked between themselves after having gone to another place away from (the assembly of) the people, the Śruti has clarified with a desire to do what is good for (lit. dear to) us.

[140]

कर्मादिपरतन्त्रत्वात्स्वाश्रयो नायमिष्यते ।

संसारभूमिर्वर्तित्वान्न चात्मा कारणाश्रयः ॥१४१॥

This is not taken (lit. desired) to be (that man's) own support on account of his dependence on (his own earlier) activity, (but) because he is (still) in the world of transmigratory existence,¹ it is his inner self (viz. the Ātman) which is the cause, the support.

[141]

This verse has a reference to *kenacid ātmanā* ... mentioned in verse 131 above.

¹This points to the continuance of the enjoyer-enjoyed relation.

अचित्कत्वात्प्रधानादि पुंसो न स्थानमिष्यते ।
न कर्म तत्फलं वेत्ति न च कस्यैति संगतिम् ॥१४२॥

Pradhāna etc.,¹ being devoid of sentience, would not be accepted (lit. desired) to be the resort for the man; nor (also) does he resort to (any) activity, since he does not know the result of it,² nor also does he get united with Sūtra.³ [142]

This refers to the possible alternative supports of Guṇa, Kāla and Fate which are mentioned in verse 132 above.

¹This is to preclude the idea of an insentient support for the man. The mention of Pradhāna is owing to the mention of Guṇa.

²The man does not know if the (newly acquired) state was the result of any (particular) activity. The view of the Mīmāṃsakas is thus refuted.

³This refers to Ka as Hiranyagarbha, i.e. Prajāpati or Sūtra. There is not authoritative means to show that the man, becoming Sūtra, acquires (another/some) body.

न चेश्वरे स्थितिस्तस्य शास्त्रानारम्भसकिततः ।
कृतनाशकृतप्राप्ती प्राप्नुतो नुस्तथा सति ॥१४३॥

Not also (is possible) the man's stay with/in (i.e. in the form of some) lord/god since that would involve the contingency of non-following (the dictates of) the scriptures;¹ for, that being so, there would result for the man the loss of (the result of) what he has performed and acquisition (of a result of) what he has not done.² [143]

This refers to yet another alternative, viz. Īśana 'a Lord' mentioned in verse 132 above.

¹The man's stay with/in a lord (or god) would have already secured for him either heaven or liberation and thus there would

result the want of effectiveness (i.e. uselessness) of the activities to be performed according to the dictates of the scriptures.

²Also, the man would secure all enjoyment through the favour of the lord (or god) and that should mean his continued existence in the world of enjoyments! And that would invite the two well-known faults: *kṛtahāni* and *akṛtābhyāgama*.

दैवाधिष्ठित एवायं कर्मकालवशानुगः ।

प्रवर्ततां चेत्पुरुषो नैवमप्युपपद्यते ।

जडत्वादिति पूर्वोक्तो दोषोऽत्रापि च विद्यते ॥१४४॥

If (it is held that this) man would be active, being guided (lit. superintended over) by deities¹ or being under the sway of (previous) activity or time (or Time);² that also would not be reasonable; for in this (case) also, there would be the fault, viz. on account of (their) being insentient, as already stated.

[144]

This also has a reference to verse 132 above. Also by referring to the world of deities (*daiva*), Sureśvara's objectors who seek to avert the two faults mentioned in just the preceding verse require an answer—that also is given here.

¹This is not an effective alternative, since deities, though sentient, are themselves not independent—they depend on the aid of the organs and the insentience of these latter continues to become the basis of the fault. This has to be remembered, even if the other two faults, viz. *kṛtahāni* and *akṛtābhyāgama* are averted.

²'time or Time' also does not have independence. Yet, cf. SP: *agnyādidevatānāṃ caitanye 'pi svātantryābhāvāt tadyuktasya kālāder na bhoktrāśrayatvam ity arthaḥ*. Actually, this note suffers some confusion of understanding on our part.

सदेवताकं पूर्वोक्तं समर्थमिति चेन्मतम् ॥१४५॥

प्रवृत्तिरप्रवृत्तिर्वा देवतैश्वर्यतः सदा ।

नियमे हेत्वसद्भावाच्च स्यान्नैयमिकी स्थितिः ॥१४६॥

If it is held that the propounding (*samarthana* of) the earlier stated (view) that (the man's support) is having the deities (associated) with it, then (the question would be) 'Is there any activity or non-activity obtaining even owing the powers (*aiśvarya*) of the deities?' (It [145]
is so asked since) there is no reason for determining (*niyame*) the same (i.e. either of them), that (viz. one of them) will be (ever) obtaining as a rule (*naiyamikī sthitiḥ*). [146]

न चापि केवलं कर्म पुंसः स्यादाश्रयो यतः ।
अचेतनत्वानित्यत्वदोषदुष्टं पुरोदितम् ॥१४७॥

Nor also is (or, can be) mere activity the support for the man, since it is affected by the (two) faults, viz. insentience and transitoriness—as has been stated (by us) earlier.¹ [147]

¹Cf. the second line of verse 142 above.

मयायमनुयातव्यः कर्ता चायं ममाभवत् ।
कालादिविषयं ज्ञानं ध्वंसिनः कर्मणः कुतः ॥१४८॥

How (or, whence) can there be (on the part of that man) the knowledge of the flitting (*dhvaṁsin*) activity with regard to the time for (in that he would be required to hold:) 'This one (i.e. deity) is to be followed by me as he has been for me the agent (of the activity). [148]

This verse clarifies the thought (already) expressed in verse 142 above, viz. *na ca kasyaiti saṁgatim*.

यत एवमतः सर्वे कालदैवेश्वरादयः ।
कर्मप्रधानाः पुंसः स्यादाश्रयोऽयमनुत्तमः ॥१४९॥

Since this is so, therefore all (of) Time, deities, Lord and others, who have (ritual) activity as (their) principal (guiding

force), would be the best support for that man. [149]

This implies that none of Time and others can be determined to be the impeller (*prayojaka*) of activity and therefore only *karman* has to be accepted as that.

हठो यदृच्छा नियतिः कारणत्वेन नाश्रिताः ।
संततौ चानवस्थानान्नाश्रयत्वं प्रमाणतः ॥१५०॥

Absolute (or necessary) force, chance, (and) fate¹ are not resorted to (by that man) as being the cause (of activity).² and, in respect of continuity,³ (it has to be said that) there is unsteadiness⁴ and there cannot be in that the nature of a resort (for him). [150]

¹SP and NKL point out that these words (each one of them) convey the meaning 'the nature of things (*svabhāva*)'.

²Namely, *prayojaka* or *pravartaka*.

³There is here reference to the Yogācāra view.

⁴*anavasthāna* means *kṣaṇikatva* 'momentariness'.

न कर्म पूर्वस्कन्धेषु नष्टत्वादुपपद्यते ।
न चेह परिणामः स्यादुत्तरस्कन्धसंगतौ ॥१५१॥

Activity cannot be reasonably held to obtain in (or, to belong to) the earlier existing *skandhas* 'aggregates (of elements)' which have already been destroyed (i.e. not existing any more); nor also could there be (understood their) full development (or, resulting into effects) noticeable for (i.e. as related to) the later *skandhas*. [151]

अनिष्ठितं न कर्मापि फलायालं भवेत् क्वचित् ।
न चैकत्रैकदा स्थानं विरोधाज्जन्मनाशयोः ॥१५२॥

Nor also activity, which has ceased to continue,¹ would anywhere yield a fruit (i.e. result) and there cannot be the

existence, at (just) one place and one point of time,² of the origin and the destruction (of activity) owing thier (mutual) opposition. [152]

¹This is based on *kṣaṇikatva* 'momentariness' of activity also.

²This is on account of the momentariness (i.e. the flitting character of activity).

न च स्कन्धातिरेकेण स्थिरः कश्चिदपीष्यते ।

भोगमोक्षाभिसंबन्धी यं प्रत्येतत्प्रवर्तते ॥१५३॥

Nor is any thing other than *skandha* accepted (by the holders of the theory of momentariness) as steady towards which this (viz. activity) and a person, intending to secure (lit. related to) enjoyments and/or liberation, proceeds (or strives). [153]

This is to refute the theories which hold that there are momentary *skandhas*.

अनारम्भश्च शून्येऽपि यथायमुपलभ्यते ।

मितेश्चासंभवाच्छून्यं सर्वथा नोपपद्यते ॥१५४॥

And since there is noticed this inaction (lit. non-beginning of activity)¹ and there is impossibility of (the existence of) knowledge (for more than a moment),² (the theory of) *śūnya* 'void'³ does not at all⁴ appear to be reasonable. [154]

¹This pertains to what is prescribed by scriptures.

²That momentariness of it cannot be proven by any means of knowing.

³That is *jīvanāśa* (SP).

⁴SP states: *pramāṇato yuktitaś ca*.

यत एवमतो न्याय्यं कर्मैवास्य समाश्रयः ।

संसारभूमौ पुंसः स्यात्कालादेस्तत्प्रधानतः ॥१५५॥

Since this is so, it is only reasonable to hold that the support of this man is only activity, right from the time that he has been on the level of transmigratory existence where activity is the principal thing. [155]

Here Sureśvara affirms his own view, after completing the refutation of others' views.

कर्मप्राधान्यमेवातः स्वयमेवाब्रवीच्छ्रुतिः ।
कालदैवेश्वरादिभ्यः कालादेस्तत्प्रयुक्तितः ॥१५६॥

Therefore, the Śruti of itself declared the principal significance of activity since it is urged by Time, the deities, the lord from the beginning of time. [156]

सति कर्मणि वैचित्र्यं भूतानामुपपद्यते ।
कर्मशब्देन विद्या च भावना कर्म चोच्यते ॥१५७॥

There results variety of elements (only) when there is activity. The word activity expresses knowledge, meditation and activity.¹ [157]

¹This is the meaning of the word *karman* in *karma haiva tad ūcatuḥ*.

देहारम्भे न शुद्धस्य कर्मणः शक्तिरिष्यते ।
तस्मान्नितयमप्येतत्कर्मशब्देन भण्यते ॥१५८॥

In any act of the body, it is not accepted that (there is need of) capacity for activity alone. Therefore, this triad also is expressed by the word *karman*. [158]

This explains the purpose of the second line of the preceding verse.

एवं तौ संप्रधार्यैतदुक्तदोषानभिप्लुतम् ।

यियासोः परलोकाय कर्मैवाश्रयमूचतुः ॥१५९॥

Having thus decided together—this which is free from blemishes¹ that are mentioned—they declared that activity¹ alone is the support for one who is desirous of going to the yonder world. [159]

¹This refers to the *karman* mentioned in verse 157 above.

कारणानां यथोक्तानां यच्च तौ प्रशशंसतुः ।
कर्मैवोक्तेषु सर्वेषु प्रशशंसतुरादरात् ॥१६०॥

And among the various causes, which the two mentioned (as a support for such a man), only that which those two praised is just activity alone (as stated above). [160]

कारणत्वाविशेषेऽपि किं प्रधानमितीक्षणे ।
कर्मणः स्यात्प्रशंसैवं तत्प्राधान्योपपत्तितः ॥१६१॥

When one thinks about what is (of) principal (importance), when there is no specification made about what has the nature of the cause, there can be only a praise of action, since it is only reasonable to hold the prominence of it. [161]

वशीकृत्येश्वरादीनि कारणानि स्वतन्त्रवत् ।
कर्म सिध्यद्यतो दृष्टं प्रधानं कर्म तेन तत् ॥१६२॥

Since activity¹ is seen to succeed (in bringing about its effect(s), like an independent (cause), after bringing under its control the (other) causes, viz. the Lord and others; that activity¹ is the principal (among all causes). [162]

¹This also refers to 'activity' mentioned in verse 157.

क्रियां प्रत्यगुणीभूतं नेश्वराद्यपि सिध्यति ।
कर्मातस्तेषु सर्वेषु प्रधानमिति भण्यते ॥१६३॥

Īśvara 'Lord' etc., which has not become subservient to activity,¹ does not succeed (in being the support for that man), therefore, 'activity' among all of them is described as the principal among them all. [163]

¹The word *kriyā* stands for *karman*.

यस्मादेवमतः प्रेतो देवताविरहेऽपि ना ।
 देहादस्मात्परिभ्रष्टः कर्मप्राधान्यसंश्रयात् ॥१६४॥
 पुण्यः पुण्येन भवति पापः पापेन कर्मणा ।
 इति श्रौतं वचो ज्ञेयमागमैकप्रमाणतः ॥१६५॥

Since this is so, therefore, a man who has departed from this (world) and separated from this body, (superintending over his various organs) [164] becomes, owing to his principal support in activity, pious by pious activity and/or sinful by sinful activity, even in the absence of the deities; this statement from the Śruti has to be known from the lone authority of the Śruti. [165]

इति श्रीबृहदारण्यकोपनिषद्भाष्यवार्तिके तृतीयाध्यायस्य
 द्वितीयं ब्राह्मणम् ॥२॥

BRHADĀRANYAKOPANIṢAD-
BHĀŚYA-VĀRTIKA

3.3

Bhujyu Brāhmaṇam

All these worldly dealings—(even) vaidika dealings cause but transmigratory existence.

संसारान्मुच्यमानानां तथा संसरतामिह ।
देहादिनाशे तुल्येऽपि तत्रैकेषां पुनर्भवः ॥१॥
देहाद्यात्यन्तिकी हानिरन्येषां यत्र कारणे ।
सति चासति चैवं स्यात्तत्प्रयोजकमीरितम् ॥२॥

It was told (in the earlier chapter) that, in the case of some of those who are being released from the transmigratory world and are also are transmigratory here (i.e. in this world), there is (noticed their) rebirth, even when the destruction of the body etc. is quite the same and, in the case of some others, the loss of the body etc. is absolute—and also which would occur (owing to the cause,) whether present or absent. [1-2]

This refers to BU 3.2.1 and BUBV 3.2.1-7.

ग्रहातिग्रहरूपस्य मृत्योः कर्मेति निश्चितम् ।
कियती कर्मणस्तस्य व्याप्तिः स्यादिति भण्यते ॥३॥

It is decided that (the cause¹ of) Mr̥tyu, which is of the nature of *graha* and *atigraha*, is (Vedic activity). Therefore, now is stated (in respect of the question) 'how much could be the extent of that (Vedic) activity.' [3]

This states the purpose of this Brāhmaṇa.

¹This refers to *prayojaka* in verse 2 above. Here, the reference is to BU 3.2.1-7.

साधारण्यविशेषाभ्यां कर्मणश्च व्यवस्थितिः ।
विशेषावस्था प्रागुक्ता सामान्यं त्वधुनोच्यते ॥४॥

There is clear demarkation (*vyavasthiti*) of Vedic activities owing to the generality¹ and the particularity (of them); the particular nature (*avasthā*) of them is explained earlier² and now is discussed the generality (of them). [4]

There is a reference here to the effect of *karman* in a general (*samaṣṭi*) and a particular (*vyasṭi*) form. Cf. BU 1.3.12: *so 'gnir abhavat* which is for the *vyasṭi* form of *karmaphala*.

¹This refers to the *samaṣṭi* form of the result, viz. attainment of the form of Sūtra.

संसारे कियती व्याप्तिरभिव्यक्तस्य कर्मणः ।
सामान्यात्मविशेषाभ्यामित्येतद्भुज्युनोच्यते ॥५॥

Bhujyu states (lit. asks) here as to how much is the extent of Vedic activity in this world which has revealed itself in the general and the particular forms.¹ [5]

¹The general form is *abhivyakta* in the sense of Sūtra. It is very minute whereas the particular ones are very clearly visible as gross objects, viz. cattle and other wealth.

प्रत्यग्याथात्म्यमोहस्य कार्येयत्तेह भण्यते ।
एतस्यां सम्यगुक्तायां नानुक्तमवशिष्यते ॥६॥

Here is (now) stated the extent (of the result) to be effected (by Vedic activity), viz. delusion regarding the true nature of the inner self¹ (*pratyak*). When this is clearly (or well) explained, there is nothing to be left to be explained. [6]

This is to clarify the statement in verse 3 above.

¹Note the difference from the 'individual self' (Jīva).

भ्रूणहत्याश्वमेधाभ्यां न परं पापपुण्ययोः ।
इत्येवं धर्मकाराणामपि वाक्यानि कोटिशः ॥७॥

There cannot be a greater sin or merit than the killing of a foetus or (the performance of) an Aśvamedha, respectively —thus there are numerous statements of those who write on Dharma.¹ [7]

SP refers here to *Manusmṛti* 12.55 and a verse *dharmarajjvā vrajed ūrdhvam pāparajjvā vrajedadhaḥ* (source not known). Also he refers to CU 5.10.7, but NKL states *brāhmahatyāśvamedhābhyāṃ na param puṇyapāpayoḥ* (source not known).

¹That is 'law-givers' as generally translated.

पापस्य कर्मणः कार्यमन्यत्रापि मितं यतः ।
नेहातो भण्यते भूयोऽनर्थत्वाच्चाप्यनादरः ॥८॥

Since the result of an activity resulting in sin¹ is known² from other sources, therefore, it is not stated here again; and also because that, being undesirable, there is disregard for it. [8]

¹NKL refers to the statement in BU 1.3 etc. These are naturally disregarded or avoided, while the Vedic activities are not so disregarded. The underlying thought is: Vedic activity, be it of any kind, is not regarded as resulting into sin; it may result into *adr̥ṣṭa* or attainment of Sūtra form.

²This is for *mitam*.

स्वतश्च तज्जिहासायाः सिद्धत्वात्नेह कीर्त्यते ।
परमोदारफलता त्वश्वमेधाख्यकर्मणः ॥९॥

An activity involving sin is not discussed here, because desire to abandon it occurs by itself; but (the result) of the activity called Aśvamedha (is intended), as there is profuseness of

the rich fruit of it. There can be no Vedic instruction regarding doing activity which results in sin. [9]

This is the underlying thought in the verse.

Now follows a doubt regarding the nature of Vedic activities.

निःशेषपुरुषार्थानां पुण्यं कर्म हि साधनम् ।
इत्याहुः श्रुतयः सर्वाः स्मृतयश्चाप्यनेकशः ॥१०॥

Indeed, activities which are meritorious are the means to the entire collection of the ends of human life—thus have all the Śrutis and the Smṛtis mentioned on several occasions. [10]

Here is understood the sentence in the Śruti regarding the desire for heaven (*svargakāmaḥ yajeta* and the desire to know the Brahman of BU 4.4.22 etc.) *dharmāt sukhaṁ ca jñānaṁ ca* (source not known), *Gītā* 3.20 and 5.2 are referred to by SP.

पुरुषार्थत्वसामान्यात्स्वर्गादिपुरुषार्थवत् ।
पुण्यसाधनताशङ्का मुक्तेरपि यतस्ततः ।
तदाशङ्कानिवृत्त्यर्थं प्रारब्धैषोत्तरा श्रुतिः ॥११॥

Since there can be a doubt that, in the case of liberation also, (Vedic) activity can be, means to merit, as in the case of the desire for obtaining the human goal of heaven (*svargakāma* ...)—for, they are all, ends of human life in common—therefore, this subsequent Śruti has begun with an intention to remove that doubt. [11]

ज्ञानोपबृंहितस्यापि क्रतुराजस्य कर्मणः ।
संसारविषयैवाप्तिर्मुक्तौ सा न मनागपि ॥१२॥

In the case of the activity in respect of the best of sacrifices, which is strengthened by knowledge, the attainment is only

in the sphere of transmigration (*saṁsāra*), (but) in respect of liberation, that (attainment) does not appear to be even a little. [12]

This verse explains what is meant by *āśāṅkānivṛtti* in the preceding verse.

The basis of this verse is *jñānasahitakarman* which also results in transmigratory existence. Therefore, it is to be clarified as to how the activity for achieving liberation is not related to transmigratory existence.

प्रत्यग्याथात्म्यसंमोहः क्रियाकारकरूपवान् ।
प्रथतेऽपास्तनिःशेषक्रियाकारकवस्तुनि ॥१३॥

In respect of the thing, which has (by its nature) kept from the entire activity and its means, there is clearly seen delusion regarding the true nature of the inner self.¹ [13]

¹Cf. verse 6 above.

अनिर्ज्ञातात्मयाथात्म्यैर्यत्तु कैश्चिदिहोच्यते ।
फलाभिसंधिरहितं विद्येतं कर्म मुक्तये ॥१४॥

[This verse raises an objection of those who consider ritual activity accompanied by knowledge as the cause of liberation.]

Now, as regards what is said by some, who have (really) not known the true nature of Ātman, viz. activity which is accompanied by knowledge and which, without any connection with desire for (or hankering after) the result, leads to liberation. [14]

बन्धहेत्वपि मोक्षाय विरुद्धफलकृद्यथा ।
विषदध्यादिवदिति तथोदाहृतिरुच्यते ॥१५॥

To show as to how (the ritual activity), which is the cause

of bondage, can lead to liberation, viz. as the cause of an opposite result,¹ there is an example stated in the word *visadadhyādivat*.² [15]

The *bandhahetu* is used as an adjective of *karman*.

¹The thought is: ordinarily any activity leads to bondage and liberation is the absence of bondage. Therefore, ritual activity is supposed to produce bondage and not freedom from bondage.

²This is a reference to BUB and BUBV. Cf. verses 31-32 below.

इत्युक्तपरिहारार्थं नैतत्सम्यगितीर्यते ।
अनारभ्यत्ववचनं तद्धेतुप्रतिपत्तये ॥१६॥

Therefore, to obviate its (argument), it is rightly stated: 'This is not so' and, in order to declare the reason for it, there is a statement made about (liberation) as not having any beginning. [16]

Here Sureśvara introduces the statement of BUB: *anārabh-yatvān mokṣasya*.

आरभ्यत्वाभ्युपगमे मुक्तेस्तत्स्याद्यथोदितम् ।
अनारभ्या त्वयं मुक्तिस्तत्सिद्धेर्ज्ञानहेतुतः ॥१७॥

If it is accepted that liberation is a thing having a beginning, only then would that, which is said (by those already referred to in verse 14 above) hold good, but this, viz. liberation, is what is never begun and what establishes itself only on account of knowledge. [17]

It is clearly denied that there is connection of liberation with any ritual activity.

ब्रह्म वा इदमित्युक्तेः प्रागपि ज्ञानजन्मतः ।
जगद्ब्रह्मात्मसंसिद्धेर्नातो मुक्तिः क्रियोद्भवा ॥१८॥

On the basis of (the Śruti) statement *brahma vā idam ...* (BU 1.4.10), there is established the existence of the Brahman as (the true nature) of the world, even before knowledge (of the Brahman) has arisen; therefore, from this (it is clear that) liberation is not a product of Vedic activity. [18]

The purport of this verse is to indicate that there does not exist any illustration for establishing liberation as an effect of (some) Vedic activity.

यदि वस्तु स्वतो मुक्तं परतो बद्धमिष्यते ।
मोक्षाय यत्नः फलवांस्तदा स्यान्न विपर्यये ॥१९॥

[This verse proceeds from a doubt regarding the Brahman as bound by something else or as free from bondage, by its own nature.]

If the thing (viz. reality or the Brahman) is taken to be free (from bondage), by its own nature, and bound by another, only then there would be (an effort) which would effect the result (i.e. liberation); otherwise, (it would not be) so. [19]

The argument in the verse: The cause of bondage of the Brahman may be real, i.e. existing apart from it, or that is imaginary. It is really in the first case that an effort for liberation is meaningful. If the cause of bondage is not real, there is no need of any effort!

विद्याभिव्यञ्जिकैवेयं स्वतः सिद्धस्य वस्तुनः ।
आरम्भकत्वं जगति तस्या नैवोपपद्यते ॥२०॥

In respect of the thing which is established by its own nature, this knowledge is only (its)¹ revealer; indeed, in respect of that, there does not appear in the world its potence (to begin, i.e. to cause) that (liberation). [20]

This verse is called for by verse 17 above, cf. *jñāna hetuṭah*.

In this world, the example of clay can be shown as the cause of a pitcher etc., but nothing can be shown as the cause operating for effecting liberation.

¹That is, of the Brahman.

अज्ञानमात्रव्यवधौ वस्तुनि व्यापृतिर्मितेः ।
आरभ्येऽर्थेऽफलं ज्ञानं व्यञ्जकत्वात्प्रदीपवत् ॥२१॥

In respect of the thing (i.e. reality) which is covered with ignorance only, there can be knowledge (alone) operative. (But) in respect of an object to be produced, knowledge is inoperative just, like a lamp, on account of its having a potence (only) to reveal an object. [21]

Just as a lamp reveals an already existing object, but it does not produce the same, so knowledge also reveals the already existing Brahman, it does not produce it.

न चाविद्यातिरेकेण मुक्तेर्बन्धोऽन्य इष्यते ।
निवृत्तिः क्रियते यस्य विद्येतेनेह कर्मणा ॥२२॥

It is not accepted that there is any bondage, in the case of liberation¹ except ignorance, viz that which is removed by ritual activity, accompanied by knowledge. [22]

¹That is, in the case of the Brahman, which is ever free or in the state of liberation.

अविद्यानाशमात्रश्च मोक्ष आत्मन इष्यते ।
यतस्ततोऽतिरेकेण मोक्षोऽनित्यो भवेद्ध्रुवम् ॥२३॥

Since (also) it is accepted that liberation of the Ātman is merely the destruction of ignorance (about its nature), therefore, in case there exists any apart from that, then

liberation would certainly be non-eternal.

[23]

This is another reason for not accepting knowledge accompanied by ritual activity as a means to liberation.

सम्यग्ज्ञानातिरेकेण न चान्येनास्ति निहनुतिः ।
प्रत्यङ्मोहस्य नातः स्याज्ज्ञानकर्मसमुच्चयः ॥२४॥

There cannot be the destruction (lit. concealment) of delusion (about the nature of) the inner self by any means other than proper knowledge about it. Therefore, there is no combination of knowledge and activity (as the means to liberation). [24]

निर्ज्ञातविषयत्वाच्च कर्मशक्तेर्जगत्यपि ।
दृष्टं हि कर्मणः कार्यमुत्पत्त्यादिचतुष्टयम् ॥२५॥

Also, because the effects of the force of the ritual activity are very clearly known in respect of its objects, viz. the result of the ritual activity (is known everywhere),¹ in this world, viz. those four, beginning with production.² [25]

¹This is the meaning given by SP, thus *sarvatrāpītyaperarthah*.

²Those are production, attainment, modification and purification (polishing). According to SP, liberation cannot be accomplished thereby.

उत्पत्त्याप्तिविकारा हि संस्कारश्च क्रियाफलम् ।
नातोऽन्यत्कर्मणः कार्यं नातो मुक्तौ तदिष्यते ॥२६॥

Indeed production, attainment, modification and also purification (polishing) are the results of activity;¹ (and) there is no other (effect to be produced) by activity, therefore, that (viz. activity) is not accepted (as a means) in respect of liberation. [26]

SP states, the purpose of *hi* is to suggest that there is not

any fifth kind of effect produced by a cause.

¹The sigular form *kriyāphalam* is used for the sake of metre.

न चान्यतम एतेषां मोक्षो युक्त्योपपद्यते ।
उत्पत्त्यादिप्रकाराणामनित्यत्वसमन्वयात् ॥२७॥
अविद्यामात्रव्यवधिर्यतो मोक्षोऽभ्युपेयते ।
तदन्यव्यवधाने हि प्रमाणं नोपपद्यते ॥२८॥

None of these four kinds of effects can be understood with the reason in respect of liberation, since they are invariably connected with non-eternality. [27]

Since liberation is accepted as having only ignorance as the cause of its obscurity, there indeed does not stand to reason (that there is) any authoritative means of proving it to be covered by anything. [28]

The thought is: Liberation is eternal, while all the effects are non-eternal, and therefore, liberation cannot be any one kind of the effects enumerated.

The second line of this verse anticipates an argument that there can be for liberation a covering other than ignorance.

विनाशिफलवत्त्वं चेत्केवलस्यैव कर्मणः ।
विद्येतस्य तु तस्यैव फलं ध्रौव्यं भवेदिति ॥२९॥

Since ¹ mere ritual activity is associated with (only) a perishable result therefore, the result of the same (*karman*) which has accompanied knowledge is eternality—this is the objection. ² [29]

¹*cit ... iti* is for 'since ... therefore'.

²This is the force of *iti*, referring to *codyavivarāṇa* (SP).

पूर्वशक्तिनिरासेन शक्त्यन्तरसमुद्भवः ॥३०॥
वस्त्वन्तरसमायोगाद्विषादेर्दृश्यते यतः ।
प्रमाणासंभवान्मैवं वोचो लौकिकवस्तुवत् ॥३१॥

(An argument can be made thus:) 'There can arise another potence (in a certain cause) by setting aside the earlier (existing) potence, [30]
since this is noticed in the case of poison (and others) on account of their mixture with other things. (The answer to the argument is:) Do not say so, since there does not possibly exist any other authoritative means for knowing (such a mixture of it with another thing) as in the case of (other) worldly things. [31]

As poison and others can render unusual effects on account of the other things accompanying them, *karman* cannot have similar mixing with other helping causes which can produce another effect.

नागमादपरं मानं मक्तावभ्युपगम्यते ।
विषदद्यादिवत्तस्मान्नैतत्सूक्तं भवेद्वचः ॥३२॥

In relation to liberation, there is not accepted any means other than Āgama (i.e. Vedāntic tradition) which is authoritative¹ as in the case of poison, curds etc.; therefore, this statement is not properly made. [32]

The purport of the verse is to point out that any argument regarding liberation cannot be made on the basis of an illustration (SP). Cf. [Vol.1:Introduction on *dr̥ṣṭānta*].

¹The first line anticipates and answers away an argument that obligatory religious performance associated with knowledge, can produce liberation. In other words, this would be the means of effecting liberation.

उक्तकार्यातिरेकेण विषदद्यादिवन्मितिः ।
कार्यान्तरसमुत्पत्तौ कर्मणोऽपि न विद्यते ॥३३॥

There is no knowledge about Vedic activity in relation to causing any one of the (four) effects beside those which have

been stated in the same way as in the cause of poison and food etc. [33]

The verse aims at pointing out that any obligatory Vedic activity, be it associated with or not associated with knowledge, cannot produce liberation.

साध्यावृत्त्यात्मकं ज्ञानं कर्मैवावस्तुतन्त्रतः ।
ज्ञानं हि वस्तुतन्त्रं स्यान्न तु तत्कारकाश्रितम् ॥३४॥
कर्मैतं कर्म तेनेदृग्विद्येतं न कथं चन ।
क्रियासमुच्चयोऽतोऽयं न तु विद्यासमुच्चयः ॥३५॥

Knowledge, which is of the nature of repetition of what is to be accomplished,¹ is only a (kind of) activity, since it depends on what is not-the-thing², (or, reality, *avastutantra*) and knowledge is indeed dependent on the thing² (or, reality) but it is not (ever) dependent on any means of activity. [34] Therefore,³ such kind of activity (as you have mentioned) is only accompanied by (another) activity; indeed it is not connected with knowledge in any way. Therefore, this is (only) a combination of activities but not of knowledge and activity. [35]

¹The words 'to be accomplished' refer to the mode of worship which implies a worshipper's act in relation to the object of worship, and, therefore, it is *kartrtantra* 'dependent on an agent'. Read SP: *sādhyam dhyeyam vastu tatra pratyāvṛttirūpopāstir avastutantratvāt karmaivety arthaḥ*.

²This refers to *vastu* the Brahman.

³According to SP this word suggests that *Upāsana* is a *mental* activity.

साध्यसाधनसंबन्ध आगमैकप्रमाणकः ।
मुक्तेश्च साधनत्वेन कर्म नैव श्रुतं श्रुतौ ॥३६॥

The relation between what is to be accomplished and what accomplishes it is understood to be having Āgama 'traditional

scriptures' as authoritative means; but nowhere in the Śruti is heard any activity as a means to achieving liberation. [36]

The first line of this verse sets aside the idea that *pratyakṣa* etc. can lead one to understand that liberation is but an activity, whether associated or not associated with knowledge—see SP and NKL in relation to the first line, to state that the effects of the relation of *sādhya* and *sādhana* (SP) belong to the other world (Cf. the words *pāralaukika iti śeṣaḥ*) and the second line emphasises the absence of any activity in relation to liberation. Here also both SP and NKL make a mention of the Vedic passage *apāpma somam amṛtā abhūma* (Ṛgveda 8.48.3; Taittirīya Saṃhitā 3.2.5.4) as a Vedic passage related to activity (*karma-sthāvaka*).

अज्ञानहानं नो मुक्तिस्तस्याः कर्म न साधनम् ।
न हि कर्म तमो हन्ति तमसीवोत्थितं तमः ॥३७॥

For us, liberation consists in the abandonment of ignorance; an activity is not a means (for achieving it). Indeed an activity does not destroy darkness in the same way as a darkness arising from (another) darkness (does not destroy it).¹ [37]

¹Here *tamas* is equated with *ajñāna*. Yet, in the first line, *ajñāna* refers to *avidyā* and it is so understood in the simile also. But there it relates to ignorance about the nature of worldly things giving rise to the notion of another worldly thing (cf. SP: *rajjavajñāne ... bhujajñānam*).

अविद्यैकोद्भवत्वं स्याद्यद्यपि ज्ञानकर्मणोः ।
मेयैकात्म्यानुरोधित्वं तथाप्यंतिशयो धियः ॥३८॥

Even though both knowledge and activity are of the nature of having arisen from mere ignorance, knowledge¹ has an excellence in that it follows (or emphasises) oneness in nature with what is to be known. [38]

¹Here, the word *dhī* is used for *jñāna*.

नात्माविद्यामतिक्रम्य कर्मैकात्म्यानुरोधि हि ।
तमोमात्राभिजनतो नातोऽविद्यां निहन्ति तत् ॥३९॥

For, activity cannot, without transgressing ignorance, follow (i.e. lead to) oneness with the Ātman (understand the singleness of the Ātman). Therefore, that does not (i.e. cannot) destroy ignorance by merely being born from ignorance. [39]

स्वतःसिद्धात्मवस्त्वेकमात्रोत्थानत्वकारणात् ।
ज्ञानं हन्ति तमोऽशेषं न तु कर्म तमोन्वयात् ॥४०॥

Because it is associated with mere rise (of the knowledge) of the single Ātman, which is established by itself, knowledge destroys ignorance completely but *karman* does not do so, owing to its association with ignorance.¹ [40]

¹*tamonvayāt* is for *tamomātrabhijanataḥ* in the preceding verse. Also *svataḥ* ... *mātroththānatva* is for ... *mātroththānavattva*.

अज्ञानादित्रयं प्रत्यगाभासं यद्यपीष्यते ।
ज्ञानवज्ज्ञानसंभूतेनैव प्रागभ्युपेयते ॥४१॥

Even if it is accepted then the appearance (or notion) of the inner self (is rooted in) the triad beginning with *ajñāna*;¹ yet it is not accepted before the rise of knowledge (though) it is associated with what is possessed of knowledge. [41]

¹These are *ajñāna*, *mithyājñāna* and *saṁśaya*.

कर्मातः कारणं मुक्तेर्न कथं चन युज्यते ।
साक्षादविद्याप्रध्वस्तौ पारंपर्यात्तु युज्यते ॥४२॥

Therefore, in no way can *karman* be reasonably accepted as

the cause of liberation. It is, however, accepted as reasonable only after the destruction of ignorance itself (and this) in an indirect way. [42]

This verse clarifies in the second line that the discussion, done so far, is not opposed to the Śruti sentence regarding *vividiṣā*, viz. *tam etam vedānuvacanena brāhmaṇā vividiṣanti dānena tapasānāśakena* (BU 4.4.22).

मुक्तौ च कर्मसाध्यायां किमेकैकं विमुक्तिदम् ।
किं वा संभूय सर्वाणि कर्माणि घ्नन्ति संसृतिम् ॥४३॥

And, when thus liberation is (said to be) achieved by activity, which one of them causes liberation? or whether all the activities (operating) together bring about the cessation of (lit. destroy) transmigration? [43]

सकृद्भूयःप्रयोगाद्वा यावज्जीवप्रयोगतः ।
एकादिदक्षिणास्वेतं विकल्पस्तुल्य इष्यते ॥४४॥

(In both these alternatives), there are three alternatives thus: whether (liberation is effected) by performance (of the activity) only once, or by repeated performances, or by continuing to perform them till the end of life; and whether by offering a fee of one or many or all cows? [44]

काम्यैर्वा यदि वा नित्यैः सर्वैर्वा मुक्तिरिष्यते ।
श्रौतैर्वा यदि वा स्मार्तैर्यदि वोभयकर्मभिः ॥४५॥

Or, is liberation accepted to be resulting from (or, effected by) actions related to desire? or obligatory rituals? or from (the performance of) all of them? or is it by (only) the Śrauta rites? or only the Smārta rites? or by both of them together? [45]

तेषां च ज्ञानसंयोगे प्रधानगुणभेदतः ।

त्रिधा विकल्पो विज्ञेयो विमुक्तिफलसिद्धये ॥४६॥

And also, in combination with knowledge, there should be accepted three alternatives, as both of them (i.e. knowledge and activity) are together being equally important, or related as the principal and the subordinate. (Thus) there should be understood a threefold option in respect of the accomplishing of the result, viz. liberation. [46]

एकैकं मुक्तिकृच्छ्रेत्स्याद्यवव्रीह्यादिहोमवत् ।
एकेनैव कृतार्थत्वान्नानुतिष्ठेत्ततोऽपरम् ॥४७॥

If each one brings about liberation, even as the offering of barley or rice grains etc., then, because the end is achieved by any single one of them, one should not perform any other (action). [47]

प्रयोगे दक्षिणायां च समानोऽयं परिक्रमः ।
अथ संभय सर्वाणि मुक्तिं कर्माणि कुर्वते ॥४८॥
एकैकमर्थं ध्रुवं प्रापत्सर्वेषामपि कर्मणाम् ।
दर्शादिवत्फलैकत्वात्तच्चानिष्टं प्रसज्यते ॥४९॥

This manner of activity is similar in respect of the performance and also of offering fees. (As for other alternatives,) if all the actions combined together bring about liberation, [48] then, indeed, there would result only oneness of activity in respect of all of those activities and there would contingently result the undesired effect, as in the case of the rite of *darśa* etc., since they have only one result. [49]

अन्यद्वि मुक्तिफलतः काम्यानां श्रूयते फलम् ।
तेषां मुक्तिफलत्वं तु न श्रुतेर्नापि चान्यतः ॥५०॥

(Also,) in respect of ritual activities proceeding from desire, there is heard (in the Śruti) a result which is other than the result, viz. liberation. It is not heard either from the Śruti

or from elsewhere that they have liberation as their result.

[50]

न च गोदोहनन्यायः काम्यकर्मसु युज्यते ।
तेषां मुक्तिफलत्वे हि न मानं विद्यते यतः ॥५१॥

Nor also does the procedure in the example of Godohana¹ stand to reason, in respect of the rites done with desire, since there is indeed not any authoritative means to inform that they result in liberation.

[51]

The verse emphasises *śrutivirodha* to the alternantive in respect of *kāmyādi* rites.

SP quotes here, very possibly, the view of Bhartṛprapañca: *yathāhuh anyārtham api saṁnihitam auyena sambadhyata iti*.

¹It is the rule about the result from Godohana. It cannot be reasonably understood in respect of ritual acts performed with desires.

Cp. *kāmyasūktānām mahāvrate ājyaśāstratvena yathoktānām godohananyāyena puruṣārthatvam eva na kratvarthatvam* (Taittirīya Āraṇyaka Sāyaṇabhāṣya 1.1.1.16). Also cf. Śābara's *Bhāṣya* on Jaimini Sūtra 4.1.2.2.

Sureśvara states in the verse that this example of Godohana is not reasonably accepted in relation to more than one *kāmyakarmans* functioning together.

सर्वं चाप्यप्रमाणं स्याद्यदुक्तं भेदलक्षणम् ।
मुक्तिं सर्वाणि कर्माणि यदि संभूय कुर्वते ॥५२॥

If it is held that all the ritual activities (performed) together would bring about liberation, all that is said (in Mīmāṃsā) by way of defining the distinctions (of activities) would be unauthoritative.

[52]

This argument, which is related to the performance of all the rites together as a means to liberation, points to the

contingent unauthoritativeness in the Mīmāṃsā text that discusses the variety of different ritual activities.

साध्यसाधनबद्धिर्नो वचनात्पारलौकिकी ।
न चाश्रौषं श्रुतैर्वाक्यात्कर्म मोक्षफलं क्वचित् ॥५३॥

For us, the knowledge regarding what is to be accomplished and what accomplishes it in relation to the other world comes from the statement (in the Śruti). And I have not anywhere heard from (any) sentence or from the Śruti that ritual activity has liberation as its result. [53]

न तत्र दक्षिणा यन्ति विद्ययैव तदाप्यते ।
वेदाहमिति मन्त्रश्च ज्ञानान्मार्गान्तरापनुत् ॥५४॥

The sentences *na tatra dakṣiṇā yanti*,¹ *vidyayaiva tadāpyate*² and also the Mantra *vedāham ...*³ set aside any other thing than knowledge as the way (to liberation). [54]

¹Śatapatha Brāhmaṇa 10.5.4.16.

²Not traced.

³Taittirīya Āraṇyaka 3.12.7.

न कर्मणा कनीयस्ता वृद्धिर्वा नान्तरात्मनः ।
नित्योऽस्य महिमेत्येवमुदकैऽपि प्रवक्ष्यते ॥५५॥

By (the performance of a) ritual activity there does not result inferiority and superiority in respect of the inner self;¹ its greatness is eternal—thus it would be declared later also. [55]

This verse seems to be based on BU 4.4.23.

¹The mention of the inner self refers to state of liberation. No excellence is added to it or diminished from it by any activity. The attainment of oneness with the single Ātman, which is implied in liberation, cannot be produced.

क्षयी कर्मजितो लोको नित्यो ज्ञानजितस्तु यः ।
इति स्पष्टं श्रुतेर्वाक्यं कस्मान्नाद्रियते त्वया ॥५६॥

‘The world that is obtained by ritual activity is perishable, whereas that which is obtained (lit. won) by knowledge is eternal,’ thus there is a clear statement in the Śruti; why do you not (accept) this regardfully? [56]

समुच्चयश्चाप्यसकृत्पुरैव सुनिराकृतः ।
भूयोऽपीह प्रवक्ष्यामः प्रसङ्गान्नातिविस्तरात् ॥५७॥

As for the combination¹ of knowledge and activity, it is well refuted (by us) already and here we should discuss it again, but, now, only because it is occasioned and (we shall state the refutation) not in extent. [57]

¹SP refers to the threefold combination already mentioned, i.e. knowledge and activity are on equal footing, they are related as the principal and the subordinate and *vice-versa*.

सन्निपत्य न च ज्ञानं कर्माज्ञानं निरस्यति ।
साध्यसाधनभावत्वादेककालानवस्थितेः ॥५८॥

Knowledge and activity, being together,¹ cannot set aside ignorance because of their relation as an end and a means and because they cannot belong to one point of time. [58]

Performance of rituals is a means of purification of *manas* and knowledge is the end to be accomplished. Therefore, they must belong to two different points of time and, as a result, there cannot be any relation between them as the principal and the subordinate.

¹The word *sannipatya* means ‘coming/falling together’, the idea of it occurs again in the note on verse 66 below.

बाध्यबाधकभावाच्च पञ्चास्योरणयोरिव ।

एकदेशानवस्थानात्र समुच्चयता तयोः ॥५९॥

And, since they are in a relation of what is to be stultified and what stultifies, they cannot belong to one place, in the same way as a lion and a ram; therefore there cannot be a combination of the two. [59]

This is to set aside the idea that knowledge and activity can combine, being on equal footing. The simile of a lion and a ram vividly points to the impossibility of their being together.

Here we should remember that activity is *bādhya* while knowledge *bādhaka*.

बाध्यबाधकभावेन काममस्तु समञ्चितिः ।
स्वशक्त्यनपहारेण दाह्यदाहकयोरिव ॥६०॥

(Yet one might argue:) Let there be a combination of the two standing in relation of what is to be stultified and what stultifies it. (But this cannot be) since neither of them will have given up its own nature¹ in the same way as what is burnt and what burns. [60]

Fire and grass cannot remain together because fire burns it. In the same way *bādhya* and *bādhaka* cannot coexist.

¹It literally means 'potence'.

अयथावस्त्वविद्या स्याद्विद्यैतस्या विरोधिनी ।
समुच्चयस्तयोरेवं रविशर्वरयोरिव ॥६१॥

Ignorance is a thing¹ which is not the thing (i.e. reality) as it is and activity is opposed to it; therefore, a combination of the two, thus (proposed), will be like that of the sun and darkness. [61]

¹It is merely an appearance of something which is later proven as not existing; for example, a serpent appearing in place of

a rope. That is, both of them cannot have their effects at one and the same time. Such is the case of knowledge and activity.

वस्त्वधीना भवेद्विद्या कर्त्रधीना क्रिया तथा ।
कर्त्रीदि चात्ममोहोत्थं स्वतोऽकारकतात्मनः ॥६२॥

Knowledge is dependent on the thing (i.e. reality or the Brahman) and (*tathā*) activity is dependent on an agent (of an activity) and (the notion of) the agent etc. are but the products of ignorance. So also, in the case of the Ātman, there is no agency of an act of its own.¹ [62]

¹It is only through ignorance that the variety such as an agent is superimposed on the Ātman.

बृहस्पतिसवे यद्वत्क्षत्रियो न प्रवर्तते ।
ब्राह्मणत्वानहंमानी विप्रो वा क्षत्रकर्मणि ॥६३॥

As Kṣatriya does not proceed to perform the Bṛhaspatisava sacrifice because he does not have the Ego (i.e. awareness) of (possessing) Brāhmaṇahood. So also, a Brāhmaṇa does not enter on an activity prescribed for Kṣatriya (because he does not have the Ego or awareness of being a Kṣatriya).¹ [63]

¹SP points out that this clause is warranted by the word *vā* in the verse.

विदेहो वीतसंदेहो नेति नेत्येव बोधितः ।
देहाद्यनात्मदृक्त्वद्वत्तत्क्रियां वीक्षतेऽपि न ॥६४॥

A person, who does not have the Ego of having a gross body (*videha*) and who is devoid of any subtle body (*vītasandeha*), is enlightened (by the words in the Śruti) *neti neti*. In the same way, (in the self), which looks on a body etc. as some non-Ātman, does not ever consider (lit. see) any act to be performed by that (as its own). [64]

The words *videha* and *vītasandeha* are used by Sureśvara with special meanings. Read SP: *sthūladehābhimānahīno videhaḥ saṁśayādidharmakasūkṣmadehābhimānaśūnyaś ca vītasandehaḥ*. Also, cf. NKL.

मृत्स्नेभके यथेभत्वं शिशुरध्यस्य वल्गति ।
अध्यस्यात्मनि देहादीन्मूढस्तद्विचेष्टते ॥६५॥

As a child superimposes the character of a (real) elephant on elephant made of clay and chatters (about it), so also a foolish person superimposes on the Ātman (within him) a body etc. and performs activities. [65]

स्थाणुं चोरधियालाय भीतो यद्वत्पलायते ।
बुद्ध्यादिभिस्तथात्मानं भ्रान्तोऽध्यारोप्य चेष्टते ॥६६॥

As holding (considering) a pillar to be a thief, a person becomes fear-stricken and runs away, similarly, a person who has mistaken (the real nature of the Ātman) superimposes on it intellect etc. and (thus) deluded keeps on doing activities. [66]

The doubt underlining this verse is based on *yad eva vidyayā karoti* (CU 1.10) and *jñātvā karmāṇi kurvīta* (not traced).

Earlier, there is refutation of the idea of the combination of knowledge and activity that have occurred together (*sannipatya*) here it is meant that the combination proceeds from the cause, viz. ignorance and what causes it, viz. false knowledge.

स्थाणोः सतत्त्वविज्ञानं यथा नाङ्गं पलायने ।
आत्मनस्तत्त्वविज्ञानं तद्वन्नाङ्गं क्रियाविधौ ॥६७॥

As the knowledge of the true nature of a pillar is not a part (i.e. cause) of (the ignorant's) running away, similarly, in the performance of rituals, the knowledge of the true nature of the Ātman cannot be its part (i.e. cause). [67]

यद्धि यस्याविरोधेन स्वभावमनुवर्तते ।
तत्तस्य गुणभूतं स्यान्न प्रधानाद्गुणो यतः ॥६८॥

What indeed follows in nature, something without opposing it, is to be considered as the subordinate to that, for, the subordinate does not overpower¹ the principal one. [68]

Here Sureśvara states the idea of what can stand in relation as principal and subordinate.

¹The word in verse is *pradhānād* explained as *pradhānam atti (iti)*.

अज्ञानमनिराकुर्वज्ज्ञानमेव न सिध्यति ।
विपन्नकारकग्रामं ज्ञानं कर्म न ढौकते ॥६९॥

Knowledge would certainly not be (lit. establish) itself, if it is not setting aside (or, stultifying) ignorance; therefore, knowledge does not promote (*dhaukate*) the conglomeration of various factors of activity which are set to naught (by it).

[69]

हेतुस्वरूपकार्याणां प्रकाशतमसोरिव ।
मिथो विरोधतो नातः संगतिर्ज्ञानकर्मणोः ॥७०॥

Therefore, there cannot be the occurrence together of knowledge and activity, which have their means of knowing them, the nature of them, and the effects of them, mutually opposed, as in the case of light and darkness. [70]

Read SP and note in NKL edition: *jñānasyamānam hetuḥ svarūpaṁ vastuprakāśakatvaṁ kāryam avidyādhivastiḥ. karmaṇo hetur avidyārāgādi svarūpaṁ aprakāśakatvaṁ kāryam utpattyādi.*

सकृत्प्रवृत्त्या मृद्नाति क्रियाकारकरूपभृत् ।
अज्ञानमागमज्ञानं सांगत्यं नास्त्यतोऽनयोः ॥७१॥

The knowledge (about the nature of the Ātman) from scriptures by its occurrence only once completely destroys ignorance, assuming the forms of activity and what effects them; therefore, there is no going together of these two. [71]

सर्वथा नैव घटते ज्ञानकर्मसमुच्चयः ।
विद्ययैव तमोहानादकार्ये कर्म किंफलम् ॥७२॥

Everywhere (or, At any time), thus, a combination of knowledge and activity can never occur. Because of knowledge alone there is effected destruction (lit. abandoning) of ignorance (lit. darkness). Therefore, in respect of what is not to be effected (*akārya*), what is the purpose (lit. result) of activity? [72]

न मानं किञ्चिदप्यस्ति ज्ञानकर्मसमृच्चितेः ।
प्रत्यक्कैवल्यसंसिद्धौ ज्ञानादेव तमोहतेः ॥७३॥

There is not any authoritative means of knowing the combination of knowledge and activity, because it is through knowledge alone that there is effected destruction of ignorance, towards effecting (lit. establishing) the singleness of the inner self. [73]

उत्पत्त्याद्यतिरेकेण संसारविनिवृत्तये ।
कर्मणोऽपि तथा मानं न किञ्चिदुपपद्यते ॥७४॥

So also, there is not reasonably postulated any authoritative means to conveying that activity also can lead to cessation of transmigration, besides (the four, viz.) production etc. [74]

In verses 75-78, Sureśvara states the prima facie view that the performance of obligatory ritual leads to liberation.

अस्ति मानं यतो नित्यं कर्म सर्वत्र चोद्यते ।
न चोत्पत्त्यादिमत्किञ्चित्तत्र साक्षात्फलं श्रुतम् ॥७५॥

(A view is held:) Indeed there is an authoritative means (conveying that the performance of obligatory ritual leads to liberation), since the obligatory ritual is enjoined everywhere (in the Śruti) and yet, in those places, there is not any direct result heard. [75]

All the Śrutis agree in holding *yāvaj jīvam agnihotraṃ juhūyāt* Now, normally the Śruti does not lay down any act, unless it produces some result; therefore, in the absence of the mention of any one of production etc., we should take its result to be liberation. The *prima facie* view appears to have the words *karmanā pitṛlokaḥ* (BU 1.5.16) as the guiding force. This is a direct mention of the result heard.

विश्वजिद्वन्न सामर्थ्यं तत्र संभाव्यतेऽण्वपि ।
उत्पत्त्यादिफलोद्भूतौ मुक्तिरस्तु ततः फलम् ॥७६॥

So also, not even a little of effectiveness (lit. potency) is to be thought of in that (obligatory ritual), as in the case of the sacrifice called *viśvajit* (where there is not a mention about the rise of the result, viz. production etc.; therefore, let the result be liberation. [76]

There is a text *viśvajitā yajeta* which prescribes *viśvajit* sacrifice, yet there is not any mention made of the result effected by it. Therefore in this case they adopt Mīmāṃsā rule *sa svargaḥ syāt sarvān praty aviśiṣṭatvāt* 'Let that be heaven, because that is not specially mentioned apart from activity'. The *prima facie* view states that, in a similar way as *viśvajit*, the obligatory ritual also should be taken to have a result, viz. they should produce liberation.

SP refers to a passage in the Śruti *yad yad dhi kurute jantus tat tat kāmasya ceṣṭitam* (source not known).

पुरुषार्थेऽसति फले विधानं नोपपद्यते ।

नित्यानां कर्मणां तस्मिन्सत्येव घटते यतः ॥७७॥

There cannot be reasonably any injunction (regarding a rite), unless there is some purpose (or end) of human life (to be achieved by it), since only that being there, the obligatory ritual can be acceptable. [77]

दुःखात्मकेषु नित्येषु समीक्षापूर्वकारिणः ।
पुरुषा न प्रवर्तेरन्न चैतेभ्यः फलं भवेत् ॥७८॥

(If, on the contrary,) the obligatory rituals are of the nature of (i.e. intending) merely to effect misery, then, men, who enter on activity after having thought over it, would not enter on them, if they did not produce any (useful/desired) result. [78]

In verses 79-133, Sureśvara states for the refutation of the prima facie view.

नैवं वाक्यात्फलं यस्मात् किञ्चिदपि लभ्यते ।
तत्सामर्थ्यश्रवाभावात्फले नातो मितिश्च नः ॥७९॥

It is not so, since, for us, there does not follow that result, viz. liberation, from a sentence 'from which no knowledge regarding the fruit of activity is obtained.' That is (only) because there is not heard (anywhere) its effectiveness (or, potence) (in respect of liberation). [79]

This argument is related to a certain authoritative means of knowing called Arthāpatti. Therefore, as in the case of *viśvajit*, where heaven is accepted as its result, the Siddhāntin would accept liberation as the result of the obligatory ritual, inasmuch as there is want of any authoritative means to that effect.

प्रमाणबलतः प्राप्तमपि भूरि न वार्यते ।
अणुमात्रं न तद्ग्राह्यं वस्तु यन्निष्प्रमाणकम् ॥८०॥

If, on the strength of some authoritative means, a lot of activities are known (lit. obtained), that would not be set aside by us. (But) not even a little of the thing known (from any injunction is set aside by us) when it is without any authority (for it). [80]

पुमाशयवशाच्चेयं फलकलृप्तिस्त्वयोच्यते ।
अन्यानपेक्षं सन्मानं प्रमेयार्थसमर्पकम् ॥८१॥

Also, this method¹ is upheld (lit. stated) by you, with the intention of a man in view. As against this, (we accept) that, as an authoritative means which informs us about some thing to be known,² (when it is) not dependent on any other (object). [81]

In the first line, the Siddhāntin points out the purposefulness of Arthāpatti for one who expects some worldly ends of human life. In the second line, the Siddhāntin states what can really be the authoritative statement of the Śruti, viz. it should be in relation to the knowledge of the Brahman.

¹That is, acceptance of Arthāpatti.

²That is, the Brahman.

प्रत्यवायाद्यभावश्च फलं नित्यस्य कर्मणः ।
कलृप्तं सत्कल्प्यते कस्माद्विमुक्तिर्नित्यकर्मणः ॥८२॥

And, the result of the (performance) of the obligatory ritual is the absence of any untoward thing etc.¹; then, why imagine (i.e. posit) liberation as the result of the obligatory ritual when there is existing one, viz. that is (already) stated? [82]

¹ādi stands for *pāpanivṛtti*.

तावतैव कृतार्थत्वाद्विधेर्नित्यस्य कर्मणः ।
विमुक्तिफलसंबन्धे न मानं विद्यते ततः ॥८३॥

If only thereby¹ the injunction regarding the obligatory ritual became powerful, then it does not remain as an authoritative means (to show) its relation to the result, viz. liberation. [83]

Read SP: *klptakalpyamānayoḥ klptam balavat iti nyāyavirodham arthāpatteh*, which is the basis for this verse.

¹This refers to *pratyavāyādyabhāvaḥ* in the preceding verse.

अन्यथानुपपत्त्या चेद्विश्वजिद्वत्प्रकल्प्यते ।
फलं कथं नु न भवेद्विश्वजिन्न्याय ईर्यताम् ॥८४॥

If, owing to the absence of any other reasonable basis (for an injunction regarding the obligatory ritual), the result is considered as one similar to (that of an injunction regarding) the *viśvajit* sacrifice, then, let it be told why (you do not accept) the example of *viśvajit*. [84]

This is related to verse 76 above.

काम्याग्निहोत्रवन्नित्यं काम्यं चापि प्रसज्यते ।
फलेनास्याभिसंबन्धान्निष्कामं नित्यमुच्यते ॥८५॥

And, there would be a contingency that an obligatory ritual is based on some desire just like Agnihotra, which is based on some desire, since it (viz. an obligatory ritual) has connection with a result; but it is free from any desire. [85]

मतं चेन्न फलत्वेन मोक्षो नित्योऽभ्युपेयते ।
प्रतिज्ञातार्थहानाप्तेनैवमप्युपपद्यते ॥८६॥

If it is held that liberation is not an invariable result (of an obligatory ritual), then there would follow the abandoning of what is enunciated;¹ and (your argument) also would not be reasonable. [86]

The verse is based on the argument that liberation is the result of an obligatory ritual which is not connected with the results of a Vedic sacrifice invariably.

¹This refers to the earlier statement that the obligatory ritual results in liberation.

आरभ्यमाणता मुक्तेः प्रत्यज्ञायि त्वयैव सा ।
विरुध्यतेऽफ्लोक्त्यैवमारभ्यं स्याद्यतः फलम् ॥८७॥

You yourself have already enunciated that liberation is what can be begun (to be produced) and that is opposed by the statement that there is no result, for, (it is already taken for granted) that a result is begun by the performance. [87]

The verse explains, as earlier enunciated, how there is subsequent abandoning of the view enunciated.

मुक्तेश्च कर्मकार्यत्वे विशेषो भवतोच्यताम् ।
स्वर्गादिभ्यो विनाशादौ मोक्षे तेऽनिर्वृतिर्यतः ॥८८॥

Further, in holding liberation as the effect of some activity, what difference of it from heaven etc. can be pointed out by you?—this is because there can be (the end, lit. destruction, of the same) and, thus, you do not have final peace in liberation. [88]

The argument is: The *prima facie* view holds liberation as the result of some activity (here, an obligatory ritual), therefore, it means that it has an end. Therefore, liberation is not thus perennial peace.

अथोपचारतो मोक्षः कार्यं स्यान्नित्यकर्मणः ।
ज्ञानकार्यवदित्येवं मतं चेन्नैवमिष्यते ॥८९॥
अज्ञानध्वंसकारित्वान्मोक्षो ज्ञानस्य भण्यते ।
उपचारात्कार्यमिति तदसत्त्वान्न कर्मणः ॥९०॥

If it is held: 'Liberation is metaphorically (*upacārataḥ*) held as the effect of obligatory ritual, like the effect of knowledge,' then, (the answer to this argument is:) This is not accepted (lit. desired); [89]

liberation is described as the effect of knowledge, because it (viz. knowledge) has the potency of effecting the destruction of ignorance and that, the effect can metaphorically occur, is impossible to happen. Therefore, (liberation is not the result) of (obligatory) ritual. [90]

व्यवधानापनुज्ज्ञानं न कर्माज्ञानहानिकृत् ।
यतोऽतो नोपचारेण कर्मणो मुक्तिकार्यता ॥९१॥

Since knowledge is (i.e. acts as) the remover of what obscures (the real nature of the Ātman) and not (any) ritual activity does bring about the abandonment of ignorance; therefore, it is not reasonable to say that ritual activity has liberation as its result. [91]

This verse explains *tad asatvān na karmanah* (in the preceding verse).

न चाज्ञानातिरेकेण व्यवधानान्तरं मतम् ।
निवर्त्यत्वेन मोक्षस्य कर्मणा यन्निवर्त्यते ॥९२॥

And it is not accepted that beside ignorance there can be (or, is) any cause of obscurity (of the real nature of Ātman), which is removed by an activity as what is to be removed in respect of liberation. [92]

The word *vyavadhānāntara* is understood by the commentator (of SP) to refer to some cause other than ignorance and capable of obscuring the nature of the Ātman.

विरोध्यन्तरविध्वंसो दृष्टो लोके विरोधिना ।

तमःप्रकाशवत्कर्म नाज्ञानेन विरुध्यते ॥९३॥

It is seen in the world that there is destruction of opponent by another who is opposing him, in the same way as light (opposes) darkness. And a ritual act is not opposed by any ignorance. [93]

Here it is argued that the performance of ritual activity itself proceeds from ignorance alone and, therefore, it cannot remove ignorance which obscures the true nature of Ātman. This refers to the meaning of *vyavadhānāntara* in the preceding verse.

मतमज्ञानमेवैतत्कर्म नाशयतीति चेत् ।
नाविरोधात्तमो हन्ति कर्म किञ्चित्कदा चन ॥९४॥

If (again) it is held that this (performance of) the activity destroys only ignorance, there is still no opposition between the two and thus it cannot be that the activity can destroy ignorance. [94]

अज्ञानमनभिव्यक्तिर्बोधोऽभिव्यक्तिरात्मनः ।
बाध्यबाधकभावोऽयं विरोधाद्धटते तयोः ॥९५॥

Ignorance consists in not allowing (the true nature of the Ātman) to be revealed, whereas knowledge consists in the revealing of the nature of the Ātman, therefore, the relation of what is to be stultified and what stultifies it can occur between the two, owing to the basic opposition of them. [95]

This verse completes the argument which is stated in verse 93 above.

विरुद्धधर्मकत्वं तु मिथो नाज्ञानकर्मणोः ।
बाध्यबाधकभावोऽयं न तयोर्युज्यते ततः ॥९६॥

But, in the case of ignorance and ritual activity being mutually

contradictory and the consequent relation of the stultified and stultifier cannot stand to (any) reason. [96]

कर्मणोऽदृष्टसामर्थ्यं यद्यज्ञानापनुन्मतम् ।
ज्ञानेनाज्ञानविध्वस्तेः प्रात्यक्ष्यात्तदसद्वचः ॥९७॥

If it is held that the potency of the *adr̥ṣṭa* resulting from activity is the remover of ignorance, then, a statement of that could not hold good, since the destruction of ignorance by knowledge is a matter of direct perception. [97]

Read SP: *dr̥ṣṭe sati adr̥ṣṭakalpanānyāyyā*.

तुषतण्डुलनिर्मोके प्रत्यक्षे ह्यवघातजे ॥९८॥
सामर्थ्यात्तद्विनिष्पत्तिर्नाग्निहोत्रादिकर्मणः ।
कल्प्यते तद्वदेवेह प्रत्यक्षेणावबोधतः ॥९९॥
प्रत्यगज्ञानविध्वंसे सामर्थ्यान्नित्यकर्मणः ।
न युक्तोऽज्ञानविध्वंसो बलात्कल्पयितुं त्वया ॥१००॥

When the removal of husk from rice (grains) as resulting from their being pounded is a matter directly perceived, [98]
effecting this¹ result by (the performance) of Agnihotra etc.,
owing to the potency, being imagined (is unreasonable); in
the same way, (there is the destruction of ignorance) by
knowledge directly perceived. [99]

Therefore, it is not reasonable that you hold per force² that
there can be destruction of ignorance about (the nature of)
the inner self owing to the potency of obligatory ritual. [100]

¹That is, *tuṣataṇḍūlanirmoka*.

²That is, without any authoritative means.

कर्मभिश्चाविरुद्धं यद्देवताद्रव्यतत्त्वगम् ।
समुच्चयेत तज्ज्ञानं न तु कर्मविरोधि यत् ॥१०१॥

(Only) that knowledge, which pertains to the nature of the

deity and the material, is not opposed to ritual activity and is combined with them; but not (that knowledge) which is opposed to ritual activity. [101]

This verse is based on the *prima facie* view which seeks to find support in the argument *yad eva ...* in CU 1.1.10.

कल्प्ये चादृष्टसामर्थ्ये नित्यानां कर्मणां त्वया ।
विरुद्धं कर्माभिः किं वा यदुत्पत्त्यादिवर्जितम् ॥१०२॥

Even if you were to imagine the potency of *adrṣṭa* in the case of the obligatory ritual, (you have to point out) if it is opposed to the actions or it is devoid of (any relation to) production etc. [102]

This argument proceeds from granting the potency of *adrṣṭa* and its answer indicates that, in the case of liberation, its relation to production etc. cannot be entertained.

न जन्यजनकं वस्तु न द्रव्यगुणकर्मभिः ।
जन्यते यत्फलं तादृक्कल्प्यतां नित्यकर्मणः ॥१०३॥

Let that kind of result of the obligatory ritual be imagined which does not bring about a thing which creates what is to be created and also which is not produced by materials, various qualities and activities. [103]

We follow the reading in the NKL edition as opposed to *janyam janakam* in the AnSS edition.

किं वोत्पत्त्यादिमत्किञ्चित्सामर्थ्यं यत्र कर्मणः
तादृक्फलं प्रकल्प्यं स्याद्यथा न्याय्यं तथास्त्वह ॥१०४॥

That kind of result should be imagined towards which a ritual activity has some potency, associated with production etc.; let that be here, in this respect, in accordance with what is suitable

(nyāyya).

[104]

अवश्यं चेत्प्रकल्प्यं स्यात्पुंस्प्रवृत्तिप्रयोजकम् ।
तदुत्पत्त्यादिमत्स्वेव युक्तं कल्पयितुं फलम् ॥१०५॥

If that (kind of result) is necessary to be imagined as promoting a human being's activity, it is proper to imagine such one as is suitably connected with things that are related to production etc. [105]

अर्थापत्तेश्च तत्रैव क्षीणत्वान्मोक्षकल्पने ।
न सामर्थ्यं यतस्तस्मान्न युक्ता मुक्तिकल्पना ॥१०६॥

Since (the means of knowing, viz.) Arthāpatti has exhausted itself in conveying only that,¹ it does not have potence to convey the notion of liberation; therefore, it is not reasonable to propose liberation (as the result of obligatory ritual). [106]

¹Namely, referring to production etc.

नित्यस्य कर्मणः कार्यं पारिशेष्यसमाश्रयात् ।
युक्ता कल्पयितुं मुक्तिरन्यस्यासंभवो यतः ॥१०७॥

(One can argue thus:) 'Because it is by resorting to the principle of residuum that we have to imagine the effect of obligatory ritual; it is (only) reasonable to think of liberation, since there is no possibility of another. [107]

मोक्षात्फलान्तरैर्योगः काम्यानां स्याच्छ्रुतत्वतः ।
नित्यकर्माभिसंबन्धो मुक्तेः स्यात्पारिशेष्यतः ॥१०८॥

'In the case of the rituals proceeding from desire, there is connection of them with results other than liberation; for, they are (so) heard; but the relation of obligatory ritual should be (only) to liberation, owing to the principle of residuum. [108]

मैवं कर्मफलव्यक्तेरानन्त्यादुपपद्यते ।
पारिशेष्यनयद्वारा मुक्तेः कर्मफलात्मता ॥१०९॥

(The answer is:) Do not say so, since there stands to reason the idea of the appearance of the result of ritual activity in innumerable ways, (but) liberation as the result of obligatory ritual (as posited by you) is only through the principle of residuum.

[109]

The idea of this verse is to be explained in the following verse.

पुंस्कामविषयाणां तु नेयत्तेहोपपद्यते ।
काम्यकर्मफलानां हि तथा तत्साधनस्य च ॥११०॥

And (*tu*) there is here¹ no reasonable counting (*iyattā*) pertaining to men's desires; so also, of the result of the rituals proceeding from desires, and, indeed, in a similar way of the means of obtaining the same.

[110]

¹This refers to *karmaphalabhūmi*, the word for activity and its result.

देशकालाद्यनियमात्पुमिच्छानामनन्तता ।
तथा तत्साधनानां च काम्येष्टार्थप्रयुक्तितः ॥१११॥

There is innumerableness of the desires of men owing to non-restriction in respect of the region and time (for them); so also, (it is there) in respect of their means, since they are employed towards the results suitable as the objects of desire.

[111]

NKL paraphrases *kāmyeṣṭa* as *kāmayogyatvād iṣṭa*.

प्रतिप्राणि च वैचित्र्याद्देशकालादिहेतुतः ।

इच्छातत्साधनानां च स्यादानन्त्यं तथा सति ॥११२॥
 पारिशेष्यनयो न स्यात्सर्वज्ञस्याप्यनन्ततः ।
 न च कर्मफलत्वेन पारिशेष्यं प्रसिध्यति ॥११३॥
 नित्यकर्मफलत्वेन मुक्तेरपि परिग्रहात् ।
 न पारिशेष्यसंसिद्धिस्तथापीहोपपद्यते ॥११४॥

Further, owing to the variety caused by region and time etc.¹
 (and) from person to person (*pratiprāṇi*), there would be
 innumerableness of the desires and the means of fulfilment
 of them. (And) that being so, [112]
 there would not be (involved) the principle of residuum in
 the case of even the omniscient (person), owing to innu-
 merableness² and there cannot thus be established the nature
 of the result of (the obligatory ritual) by the principle of
 residuum. [113]

Even by accepting liberation as the result of the obligatory
 ritual, its nature, as determined by the principle of residuum
 cannot be here³ reasonable. [114]

¹This refers to *icchā*.

²*anantataḥ* stands for *anantatvataḥ*.

³That is, in Vedānta.

नित्यकर्मफलत्वं चेन्मुक्तेरप्यभ्युपेयते ।
 कर्मकार्यसजातित्वात्पारिशेष्यनयः कुतः ॥११५॥

If in the case of liberation also its nature as the result of
 obligatory ritual is accepted then owing to its being same kind
 of effect produced by activity how could there be the principle
 of residuum applicable? [115]

अर्थापत्तिक्षयोऽतः स्यादन्यथाप्युपपत्तिः ।
 उत्पत्त्यादेरन्यतमो न च मोक्ष इहेष्यते ॥११६॥
 उत्पत्त्यादिविरुद्धत्वान्मोक्षरूपस्य नित्यतः ।
 नोत्पाद्यो वा विकार्यो वा विकारप्रतिषेधतः ॥११७॥

Therefore, there would be given up (lit. loss of the notion of) Arthāpatti, since there can be expectation (of the result of obligatory ritual) in some other way; (then) any one of production etc. cannot be here³ accepted as liberation. [116]
And, since its nature is ever opposed to production etc., therefore, it can never be produced, nor can it be modified, as there is rejection (of the notion of) modification. [117]

NKL edition begins verse 116 as *arthāpatteḥ kṣayo 'taḥ*

व्रीहिपात्रादिवन्नापि मोक्षः संस्कार्य इष्यते ।

असाधनत्वान्नाप्याप्यः प्रत्यङ्मात्रस्वभावतः ॥११८॥

Further, liberation is not accepted a thing to be purified like rice grains, utensils etc. So also, because it is not associated with any means, it is not what is to be obtained, since only such is the very nature of the inner self. [118]

नित्यस्य सर्वकर्मभ्यो वैलक्षण्याच्च कारणात् ।

कारणानुविधायित्वात्फलमप्यस्तु चेत्तथा ॥११९॥

(It can be argued:) 'Since there is reason for obligatory ritual to be different from all (other) rituals' the result of them, viz. to be in conformity with the cause, should also be likewise different.' [119]

नैवं कर्मत्वसारूप्यात्सालक्षण्यं भवेन्न किम् ।

काम्यकर्मफलैर्नित्यफलस्येत्यभिधीयताम् ॥१२०॥

'(This is the answer:) No, it is not so. Why should there not be similarity of the results (of obligatory ritual) with the result of other rituals proceeding from desire? Let this be told.'

[120]

वैलक्षण्यं निमित्ताच्चेन्न नैमित्तिकतुल्यतः ।

क्षामवत्यादिवन्नित्यं कस्मान्न स्यात्सलक्षणम् ॥१२१॥

If the *prima facie* view will be 'dissimilarity (of the result) is on account of the cause'; the Siddhāntin's view is: 'No, (there could not be dissimilarity), since they are not on a par with what proceeds from some causes¹ exactly in the same way as the rituals called Kṣāmavatī;² why then should not the obligatory ritual have the same character as any other rituals? [121]

The idea of the *prima facie* view is: Other rituals proceed from desires on the part of sacrificers, while obligatory rituals do not proceed from them. This explains why they are dissimilar.

¹The cause for an obligatory ritual is the statement in the Śruti *yāvajjīvam juhūyāt* which means that those rituals have to be performed as long as one is alive.

²This is a ritual prescribed for one whose house goes on fire on account of the ritual fire. SP refers in full the passage from *Śatapatha Brāhmaṇa*. SP adds more examples of some rites which are performed for some reason. Therefore, it is understood, on the basis of them, that obligatory rituals are on a par with Kṣāmavatī etc.

न हि लौकिकचक्षुर्भिवैलक्षण्यात्समर्थ्यते ।

उलूकचक्षुषोऽरूपाद्रसादिग्रहणं क्वचित् ॥१२२॥

It also cannot justify (that obligatory rituals differing from other rituals must have the result, viz. liberation), because of its dissimilarity (with the means to it) in the same way as the eyes of an owl are different from the eyes of human beings; because, in the case of an owl's eyes, there is never noticed perception of taste etc. [122]

A very fastidious argument from the *prima facie* view: Just as an owl's eyes are different from a human's eyes, so obligatory rituals, though with the result, viz liberation, should be different.

This is answered by pointing out that the eyes of an owl cannot perform any function other than seeing. The argument is clarified by the following verse.

रसादिग्रहणे शक्तिलोके दृष्टा न चक्षुषः ।
सामर्थ्यस्याग्रहात्तस्मात् विरुद्धा प्रकल्प्यते ॥१२३॥

In the world, there is never noticed the capacity of the eyes for experiencing taste, (therefore, that capacity to taste), though opposed (i.e. different), is never imagined (to be in an owl's eye), for (the simple reason that). [123]

सामर्थ्यं यस्य यत्रैव दृष्टं तत्रैव तस्य तत् ।
सुदूरमपि गत्वेह ह्यतिशीतिरपीष्यते ॥१२४॥

A capacity which is seen in respect of what must belong only to that; therefore, even if one goes so far as to cite the example of an owl's eyes. there is still here, in this respect, a certain excellence also.¹ [124]

This refers to men's eyes which are, in the act of perceiving, superior to the eyes of owls (*atīṣīti*). The idea is that liberation cannot certainly be the result of obligatory rituals though they might produce some other results.

कर्मकार्यान्तरं नित्यं विषदध्यादिवद्ध्रुवम् ।
यदारभत इत्युक्तं तच्चाप्यस्तु स्वर्गोचरे ॥१२५॥

And, as to what is said, viz. obligatory rituals, indeed begin to produce some other effects of the activities, in the same way as poison, curd etc.;¹ let that be in respect of their own objects . [125]

This refers to verse 32 above.

¹They are the four, viz. production etc.

यदेव विद्ययेत्यादि श्रुतेरपि वचस्तथा ॥१२६॥

In the same way is to be understood the statement from the Śruti, viz. *yad eve vidyayā*.¹ [126]

¹Cf. CU 1.1.10: *yad eva vidyayā karoti śraddhayopaniṣadā tad eva vīryavattaram bhavati*.

देवयाजिसकाशाच्च विशेषश्चात्मयाजिनः ।
तदाहुरिति विस्पष्टं श्रूयते श्रुतिवाक्यतः ॥१२७॥

And it is clearly heard in a statement of the Śruti, which (begins) with the words *yad āhuḥ* that there is some (particular) distinction of one who offers a sacrifice to the Ātman from one who offers a sacrifice to (some) deity/deities. [127]

This is a reference to *Śatapatha Brāhmaṇa* 11.2.6.30. SP clarifies the meaning by the statement: *sarvakratuyājīnām ātmayājī viśiṣyate*.

मनुनाप्यात्मयाजीति यदुक्तं परदर्शने ।
तत्रापि च समं पश्यन्नात्मयाजी भवत्ययम् ।
समदृष्टिप्रशंसैषा यदि वा भूतपूर्वतः ॥१२८॥

Manu also has said *ātmayājī* in respect of seeing the highest (Ātman); in that statement, there is a praise in the words *samam paśyann ātmayājī bhavaty ayam* of seeing all things as equal. And, this may be (a praise of the subsequent condition) to that, in which (the sacrificer) was earlier. [128]

SP refers to *Manusmṛti* 12.82, 83, 86 and 91 in support.

आत्मसंस्कृतये कर्म यः करोति यथाविधि ।
आत्मयाजीति मनुना स एवेहाभिधीयते ॥१२९॥

Here,¹ Manu has spoken of that person as *ātmayājī* who

performs the ritual activity according to the prescription for purifying himself. [129]

This has a basis in the *Śatapatha Brāhmaṇa* cited above. Also refer to the preceding verse.

¹See the passage referring to it in the last verse mentioned in the note on the preceding verse, viz. 12.86.

सुसंस्कृतधियः पुंसो यथोक्तैः कर्मभिः समम् ।
इह वामुत्र वा ज्ञानं जायते मोक्षकृद्ध्रुवम् ॥१३०॥

In the case of a person, who has purified his intellect by the (performance of) rituals that are prescribed (for him) knowledge there immediately arises, whether in this world or in the yonder, which certainly leads to (his) liberation. [130]

Cf. *mahāyajñaiś ca yajñaiś ca brāhmīyaṃ kriyate tanuḥ* (*Manusmṛti* 1.28).

ब्रह्मा विश्वसृजोवाक्याद्देवसाष्टर्यतिरेकतः ।
भूतापीति मनुः साक्षाद्दर्शयत्यविनश्वरीम् ॥१३१॥

(Also) in the sentence *brahmā viśvasṛjaḥ*, Manu has made (lit. makes) a clear (*sākṣāt*) mention of the eternal merger (of beings) into the basic elements over and above (their) assuming similarity with the deities (superintending over their organs). [131]

SP states as the basis of *brahmā* ... (*Manusmṛti* 12.50), viz. this verse from *Manusmṛti* 12.24, 26, 30, 41 and 51. Also he cites further *Manusmṛti* 12.88cd, 89, 90ab.

अत्येतीति तु ये पाठं कुर्वते तेऽविपश्चितः ।
यथोक्तदोषदुष्टत्वान्नात्ययो बोधतोऽन्यतः ॥१३२॥

Those who recite *atyeti*¹ as against this word *apyeti*² are

not intelligent, since there is not any other transgression (*atyaya*) than the knowledge (of the results of the rituals), owing to the fact that (that *atyaya*) is beset with faults which we have shown. [132]

¹Sureśvara has earlier (in verse 131) mentioned *bhūtāpīti* on the basis of Manu's text before him (as related to the reading) *apyeti*. Now he controverts the reading *atyeti* (adopted by others) which signifies the result that is effected by ignorance.

स्पष्टार्थमुत्तरं भाष्यं न व्याख्यानमपेक्षते ।
यतोऽत उत्तरो ग्रन्थः सम्यग्व्याख्यायतेऽधुना ॥१३३॥

Since the subsequent commentary (by Śāṅkara) ¹ is clear in meaning, it does not require any explanation by us. Therefore, now is explained the subsequent portion of the text.² [133]

¹Refer to BUB (p.410 line 5 to p.414 line 4): *na cārthavādatvam adhyāyasya ... brāhmaṇam ārabhyate*.

²Read: *karmaphalasya saṁsārasya pradarśanāyaiva*.

Verses 134-142 are an exposition of the BU 3.3.1.

प्रयोज्यस्य हि बन्धस्य प्रयोजकमिहोदितम् ।
प्राधान्येनेह कर्मैव तदन्यत्तूपसर्जनम् ॥१३४॥

Here ¹ was stated the cause of bondage for one on whom ritual is enjoined. And now ² is principally ³ pointed out that ritual activity itself is the cause and (any) other (cause) is merely (*tu*) subsidiary. [134]

¹This refers to the portion of the Ārtabhāga Brāhmaṇa.

²This refers to the Bhujyu Brāhmaṇa.

³This is to exclude time etc.

परिच्छिन्नापरिच्छिन्नं तच्च कर्म स्वभावतः ॥१३५॥

परिच्छिन्नस्य संव्याप्तिर्व्याख्याता पूर्वमेव तु ।
अपरिच्छिन्नसंव्याप्तिर्भुज्युप्रश्नेन भण्यते ॥१३६॥

And that ritual act is by nature limited and unlimited (both).

[135]

To begin with (*tu*), the extent of what is limited has been already explained¹ and now, in the form of the question by Bhujyu,² is stated the extent of what is not limited. [136]

¹This refers to the Udgītha Brāhmaṇa.

²Add: also in the form of the answer by Yājñavalkya.

ब्रह्माण्डाद्वहिरन्तश्च समष्टिव्यष्टिरूपिणः ।
व्याप्तिर्हिरण्यगर्भस्य बन्धज्ञानाय भण्यते ॥१३७॥

Now is told (for the full) knowledge about the bondage (caused by activity) the magnitude of Hiranyagarbha, who assumes outside the world and inside it, the forms, viz. (i) unified form and (ii) particular (*samaṣṭi-vyaṣṭi*). [137]

The purpose of this verse is to point out that there is not left out even a bit of Hiranyagarbha's magnitude. The kind of this magnitude is expected to effect aversion to ritual activity and aspiration for liberation.

वैषम्यप्रतिपत्त्यर्थं प्रश्नस्य त्रासजन्मने ।
प्रतिवादिधियो यत्नाद्भुज्युनाख्यायिकोच्यते ॥१३८॥

Now, a narrative is purposely (*yatnāt*) told by Bhujyu for (Yājñavalkya's) grasping the difficulty¹ of the question and also for affecting confusion² on his part. [138]

¹SP paraphrases *vaiṣamya* as *alaukikārtha* 'non-worldly nature of the thing asked'.

²SP paraphrases *trāsa* as *vyāmoha* and further states that 'full confusion' is the means to win victory over the opponent in

a bet; *jalpa* and *trāsa* could be alternatively translated as trouble or fear.

लोकानामवसानानि पर्यपृच्छाम तं यदा ।
गन्धर्वं तत्र काले तमथाब्रूम क्व तेऽभवन् ॥१३९॥

Then 'at that time'¹ we had asked that Gandharva the limit of various regions; and then we asked (*abriūma*) 'where did they² go?' [139]

Here, in this verse, Sureśvara is very cryptic while summarizing the contents of the beginning of the narrative.

¹SP states that 'at that time' is the meaning of the word 'then'.

²For the name of these, see *Śatapatha Brāhmaṇa* 13.5.4.1-3.

अप्रसिद्धाभिधानोक्त्या वादिव्यामोहसिद्धये ।
अश्वमेधकृतो वक्ति भुज्युः पारिक्षिता इति ॥१४०॥

Bhuju mentions the performers of the Aśvamedha sacrifice as the names (of Pārikṣitas), in order that there is confusion on the part of the opponents (*vādins*) by the utterance of a name not as well-known names. [140]

SP explains the name Pārikṣitas as derived from *parikṣit* 'that whereby is destroyed the sin all around, such as *brahmahatyā*

Cf. BUB for quotation: *bhrūṇahatyāśvamedhabhyām na param puṇyapāpayoh* as a line for defining a sin; it is stated there as from some Smṛti (not traced).

पारिक्षिताः क्व तेऽभवन्नित्युक्तिस्त्रिरिहोदिता ।
त्रिरुक्तेरुपयोगोऽयं विभागेनोपवर्ण्यते ॥१४१॥

Where did they go, the Pārikṣitas? In this, there is first the statement of the name three times in the narrative, (therefore)

this mention of the name three times it is now (or, here *ayam*) explained, one after another (*vibhāgena*). [141]

प्रश्नार्था प्रथमोक्तिः स्यात्प्रत्युक्त्यर्था तथा परा ।
तृतीया याज्ञवल्क्यार्थं तिस्रोऽप्युक्तीरितीरयेत् ॥१४२॥

The first statement is for asking a question (to the Gandharva) and the second is (in relation to) the answer (by him) and the third (is a question) put to Yājñavalkya—thus should one say that there are three statements. [142]

Now, in verses 143-144, there is exposition on the meaning of BU 3.3.2. This begins with the description of the magnitude of the universe (bhuvana) and then discusses the question: 'Where were the Pārikṣitas?'

भानुस्यन्दनगत्याध्वा मितो यावानहर्निशम् ।
द्वात्रिंशद्गुणितस्तावान्व्याप्तो भानुगभस्तिभिः ॥१४३॥

Thirty-two times of (whatever be the extent of) the path covered, (*mita*)¹ by the movement of the sun's chariot in a day and night is pervaded by rays of the sun.² [143]

¹This is from verb root *mā* 'to measure'.

²SP states that this refers to the expanse of the earth that is covered by rays of the sun and the moon both. Perhaps this is suggested by *aharniśam*. This is based on a passage:

*ravicandramasoryāvān mayukhair avabhāsyate /
sasamudrasaricchailā taratī pṛthivī smṛtā //*

द्वात्रिंशद्विरहोरात्रैर्यावन्तं देशमुद्रजन् ।
मण्डलीकुरुते भानुस्तावांल्लोकरवेरितः ।
शरीरमेतद्वैराजं देवताकरणं महत् ॥१४४॥

And that much region which is so described¹ (in popular speech) as the sun encircles by (continuously) moving for

thirty-two days and nights—this is the body² of Virāj; and that is great³ body of the deity.³ [144]

¹*lokaraveritaḥ* is paraphrased by SP as *lokaśabdaḥ tenerita ukto viṣayīkṛta iti yāvat*.

²SP states that this refers to fire as based on the Śruti: *agnir mūrdhā*.

³This refers to the grossness of the one unified form mentioned earlier.

इयानेव तु देशोऽयं प्राणिनां भोगसिद्धिं कृत् ।
अग्न्यादिदेवतानां च व्याप्तिरेतावती मता ॥१४५॥

Only this much is the region which brings fulfilment of the desires of beings (*bhogasiddhi*). So also, this much is understood to be the extent of the deities, Agni etc. (related to sense-organs)? [145]

This verse explains words *taṁ samantam* in BU 3.3.2.

लोकात्परं निरालोकः सर्वप्राणिविवर्जितः ।
पर्येति लोकं द्विस्तावत्पृथिवी पूर्वमानतः ॥१४६॥

Beyond (this) region, there is what is called Nirāloka, which is devoid of all beings.¹ And, as for (*tāvat*) the earth, it pervades double that region whose extent is stated earlier.² [146]

¹This is to point out that it is not *bhogabhūmi* 'region for the enjoyment for beings'.

²This is the meaning of *taṁ samantam*. Yet the translation is doubtful!

लोकालोकगिरेर्भागः सर्वप्राणिविवर्जितः ।
समुद्रो द्विगुणो भूमेः परस्तादवतिष्ठते ॥१४७॥

That portion of Lokāloka mountain is devoid of all beings. Beyond the earth there exists an ocean³ which has double the magnitude of the earth. [147]

यं घनोदमिति प्राहुः पुराणज्ञा विपश्चितः ।
ब्रह्माण्डसंपुटस्तस्मात्परेणाभ्येति सर्वतः ॥१४८॥

That region have the wise knowers of Purāṇas called Ghanoda. And beyond that, there exists all around the cover of the universe. [148]

SP states for this the Purāṇic authority, viz. verses from the *Vāyupurāṇa* 1.49.153; 1.50.82; *Brahmāṇḍapurāṇa* 1.19.160; 1.21.24.

पृथिव्यनन्तरं साक्षात्समुद्रः श्रूयते श्रुतौ ।
अण्डाद्वहिः पुराणे तु विरौधे स्मृतिबाधनम् ॥१४९॥

In the Śruti is directly heard that there is an ocean immediately after (i.e. around) the earth, but, in the Purāṇa, it is stated to be outside the universe. In such a conflict, there is (to be accepted) the stultification of the Smṛti.¹ [149]

SP clarifies this conflict by citing an illustration: there is a Smṛti text *audumbharī sarvā veṣṭayitavyā* and it is opposed by the Śruti text *audumbharīm spr̥ṣṭvodgāyet*. There is thus a conflict in this case. One might hold the Smṛti text as based on some Śruti which is to be inferred (as in the case of *aṣṭakā*). But this is of no help, since, when there is a direct statement from the Śruti opposed to some such inferred Śruti, the former prevails. See *virodhe tv anapekṣam syād ... asati hy anumānam* (Jaimini Sūtra 1.3.3).

¹This refers to Purāṇa.

व्याख्येह संप्रवृत्तेयमश्वमेधकृतां पथः ।
स चैवं शक्यते वक्तुं लोकालोकादिमानतः ॥१५०॥

This is thus stated as the description (*vyākhyā*) of the path of the performers of the Aśvamedha sacrifice.¹ And it is pertinent here to state that in order to describe in relation to the 'magnitude of *loka* 'world' and *aloka* etc.² [150]

¹There can be doubt as to why there has been given the magnitude of the universe. That is answered in second line.

²The word 'etc.' refers to earth.

यथोक्तपरिमाणेन ध्यानकर्मविवक्षया ।
लोकालोकादिकार्याणां परिमाणवचस्ततः ॥१५१॥

Therefore, there is a statement about the magnitude of *loka* and *aloka* etc., which are the effects of the rituals, with the intention to explain the nature of meditation on them as having the magnitudes (of each as) stated. [151]

अस्ति तावदयं लोको यथोक्तपरिमाणवान् ।
भानुप्रकाशसंव्याप्तो विराजो विस्तृतिस्त्वयम् ॥१५२॥

To begin with, there is, indeed, this world having the magnitude which is stated and is pervaded by light of the sun¹—and this is the extent of Virāj. [152]

This explains *ayam ekaḥ* in 3.3.2.

¹Cf. SP: *bhānuśabdas candramaso 'pi bhavaty upalakṣaṇam*.

ततो लोकाद्विनिष्क्रम्य द्विगुणा पृथिवी स्थिता ।
समन्ताद्विगुणोऽब्धिश्च संवेष्टय पृथिवीं स्थितः ॥१५३॥

Having come out of the Loka, there exists the earth (which is) double in size. And all around the earth exists the ocean, having twice its dimension. [153]

This verse refers to *tam* ... in 3.3.2.

तं समुद्रं समुत्तीर्य यदन्यत्परतस्ततः ।
गन्तव्यमुपमानोक्तिः क्रियते तस्य सांप्रतम् ॥१५४॥

That other thing, which is beyond that, i.e. after crossing the ocean, is to be reached. And now there is presented a statement of a simile for it. [154]

This verse is introductory to *yāvatī kṣurasya* ... in 3.3.2.

कपालसंधिगं व्योम सामर्थ्यात्परिमाणतः ।
यावतीत्युपमोक्तेह श्रुत्याविष्क्रियतेऽनया ॥१५५॥
तेन पारिक्षितान्खेन चित्यात्मत्वमुपागतान् ।
अन्तः संस्थाप्य नयति समष्टिव्यष्टितामसुः ॥१५६॥

There exists the sky in the hole of the cover (of the world) as is determined by (its) magnitude. Here is the simile stated in the word *yāvatī* ... And hereby (i.e. through the hole ...) ¹ is explained (the simile) by the Śruti. [155]

That the Ātman leads the Pāriksitas, the Aśvamedha sacrificers, who have come to attain the status of the worship-deserving Ātman (i.e. Sūtra), namely those who, after having well-controlled them as either joined together or as several (attained the same). [156]

¹ Because the world described earlier has such a large magnitude, one could only posit the idea of a hole.

चित्यात्मात्र सुपर्णः स्यादादित्यात्माथवोच्यते ।
इमं देशं यतः प्राप्तानादित्याद्युक्तवर्त्मना ॥१५७॥

In this context, the worship-deserving Ātman is the eagle (*suparṇa*) ¹ or perhaps it is of the nature of Āditya, ² because (this one Ātman leads them) who have reached this place by the path beginning with sun (as) already described. [157]

This explains the meaning of *tān indraḥ* ... in 3.3.2.

¹*suparṇa* can stand for Virāj or Sūtra.

²*suparṇa* may be a metaphorical description of the sun.

एवं पारिक्षितान्सर्वानग्निरिन्द्रो वियत्पथा ।
निर्गमय्याण्डतः प्रादाद्वायवे सूक्ष्मरूपिणे ॥१५८॥

Having thus led all those sacrificers of the Aśvamedha by the path in the sky,¹ Agni-Indra took them out and finally handed them over to Vāyu which has a subtle form.² [158]

¹This refers to *kha* in verse 155 above.

²This is based on BU 3.7.2: *vāyur vai gautama tat sūtram*. Also Vāyu is known to have a more subtle form than Sūtra.

अश्वमेधमखापूर्वं देवताग्निरिहोच्यते ।
वायुवेष्टनमेतच्च यदपूर्वमिहोदितम् ॥१५९॥

Here, the deity is named Agni, as the *apūrvā* produced (by the performance of) the Aśvamedha sacrifice; and this is covering (of the Pāriksitas) by Vāyu which is mentioned here as *apūrvā*. [159]

Cf. *apūrvam eva phalapradam, tad eva dharmāṇām prayojakam. vighrahavyas tu devatā naiva santi. agnyādyabhāve 'pi apūrvā-sattvād eve ...* (*Vṛtti on Mīmāṃsādarśana* by Kevalānanda 9.1.4)

वायुरेव ततोऽपूर्वमभिव्यक्ततनुर्मतः ।
अनन्तरमपूर्वस्य कार्यं निर्दिश्यतेऽधुना ॥१६०॥

Therefore Vāyu itself is considered to be possessed of a perceptible form. Now is mentioned later the effect of (i.e. produced by) *apūrvā*. [160]

पारिक्षितानथादाय वायुः स्वात्मसमाश्रयान् ।
आपाद्य गमयामास तत्र प्राणैकरूपिणः ॥१६१॥

Later, Vāyu took with it the performers of the Aśvamedha sacrifice, who had resorted to it and brought them to the form of only Prāṇa as their (final end). [161]

अश्वमेधकृतो यत्र पूर्वे तस्थुरितो गताः ।
वाय्वात्मा गमयामास समष्टिव्यष्टितामये ॥१६२॥

Where the performers of the Aśvamedha sacrifice had earlier stayed, there did the Ātman, in the form of Vāyu, lead them so that they obtained the collective or particular forms. [162]

अश्वमेधमखापूर्वफलप्रकथनेन या ।
प्रवृत्ताख्यायिकां सेयं समाप्तानवशेषतः ॥१६३॥

Thus here ends fully that narrative, which had begun with the statement of the result of the Aśvamedha sacrifice, in the statement of *apūrvā*. [163]

प्रश्नशेषमथेदानीं स्वयमेव श्रुतिर्जगौ ।
यदि वा याज्ञवल्क्योक्तिरेवमेवेति यद्वचः ॥१६४॥
तस्मादित्यादिकं वाक्यं श्रुतेरिति च निर्दिशेत् ।
वायुमेव स गन्धर्वः प्रशशंसातिविस्मितः ॥१६५॥

Now, the Śruti itself has stated (lit. sung) the remaining part of the question. Or it could perhaps be, the words *evam eva* are the statement made by Yājñavalkya. [164]

One should point out that the statement beginning with the word *tu tasmāt* is made by the Śruti (itself). That Gandharva, who was greatly wonderstruck, praised only Vāyu. [165]

This explains the purpose of the later part of the Śruti: *evam* ... in 3.3.2.

वायुं मुक्त्वा बहिर्यस्मान्नान्यस्या विद्यतेऽबहिः ।
देवताया गतिस्तस्माद्वायुर्ज्यायानिहैकलः ॥१६६॥

Since Vāyu, being kept aside, there cannot be the existence (lit. movement) of any other deity, therefore, it is Vāyu alone who is superior (to others). [166]

यत एवमतो ज्ञेयो वायुरेव न चापरः ।
व्यष्टिः समष्टिरित्येवमण्डादन्तर्बहिश्च सः ॥१६७॥

Since this is so, therefore, Vāyu alone has to be known and not any other, as particular or collective forms—thus he is both inside and outside the universe. [167]

These explain the meaning of *tasmāt* ... in 3.3.2.

व्याप्तिर्विशेषरूपेण व्यष्टिरित्यभिधीयते ।
सामान्येन समष्टिश्च वायुरेव द्विधा स्थितः ॥१६८॥

The word *vyāṣṭi* is used in the sense of pervasion by some particular form and *samāṣṭi* in (the sense of) a general form; thus it is that Vāyu alone that remains (in this universe) in a twofold form. [168]

This is the meaning of *vayur eva* in 3.3.2.

वस्तु यल्लक्ष्यते किञ्चिज्जगत्यसिंमश्चराचरे ।
सामान्येन विशेषेण वायुरेव तदीक्ष्यते ॥१६९॥

Whatever thing is noticed in this world, which moves and which does not move, is understood only as Vāyu in a general and a particular form. [169]

न सामान्यविशेषाभ्यां वायोरन्यस्य वस्तुनः ।
संबन्धो वायुरेवेति सावधारणवाक्यतः ॥१७०॥

(In this context) no other thing than Vāyu has any relation to the general and the particular forms, for (it is known from

(the emphasising statement) *vāyur eva* 'Vāyu alone'.

[170]

अन्ययोगव्यवच्छेदे प्रशंसेयमसोर्भवेत् ।
न त्वयोगव्यवच्छेद उत्कर्षस्तादृगिष्यते ॥१७१॥

In case there is another thing determined as related (to the general and the particular forms) then, that would be the praise of the inner self (i.e. Asu/Prāṇa), but that kind of excellence, resulting from such an improper relation, is not accepted (here).

[171]

अश्वमेधक्रतोरेष समष्टिव्यष्टिलक्षणः ।
महिमाविष्कृतः श्रुत्या विद्यायुक्तस्य संभ्रमात् ॥१७२॥

This is (thus revealed) as the greatness of the Aśvamedha sacrifice, which is characterized as having a unified and a particular form, because they might posit a confusion on the part of one connected with knowledge.

[172]

समष्टिव्यष्टिरूपं यो वायुमात्मेति संश्रितः ।
सोऽपहन्ति पुनर्मृत्युं मृत्युमात्मानमेत्यसौ ॥१७३॥

He, who has resorted to Vāyu as the Ātman, having unified and particular forms, averts (lit. destroys) death (which might come) again; he reaches his Death, viz. Ātman.

[173]

इति श्रीबृहदारण्यकोपनिषद्भाष्यवार्तिके तृतीयाध्यायस्य
तृतीयं ब्राह्मणम् ॥३॥

**BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA**

3.4

Uṣasta Brāhmaṇam

BU 3.1 to 3.3 dealt with transmigration of a being and 3.4 to 3.9 refer to the knowledge which destroys ignorance, the basis of the undesirable things. This is explained in verses 1-3ab.

ऐकात्म्यानवबोधस्य कार्यमुक्तमशेषतः ।
तन्मूलध्वस्तयेऽथोर्ध्वं परो ग्रन्थोऽवतार्यते ॥१॥

The entire world of effects resulting from non-knowing of the singleness of the Ātman has been described. (Now) for the purposes of the removal (lit. destruction) of that root(-cause) is introduced the subsequent part of the Upaniṣad.¹ [1]

¹The subsequence part refers to 3.4 to 3.9 and not merely to 3.4.

पुण्यापुण्यप्रयुक्तः सन्ग्रहातिग्रहबन्धनः ।
आब्रह्मास्थाणु चाजस्रं यः संसरति मूढधीः ॥२॥
सोऽयमुक्तस्तथोत्कर्षः परः पुण्यस्य चोदितः ।

He, who, from the Brahman up to a pillar,¹ being incited by merit and demerit and having the bondage of *graha* and *atigraha*, is of deluded (or, foolish) intellect and ever keeps on transmigrating. [2]

This, then, is put forth here (in 3.1-3.3), as the excellence of merit, [3ab]

¹This refers to various transmigratory forms of the Ātman.

मुमुक्षुरस्ति नास्तीति परो ग्रन्थोऽवतार्यते ॥३॥

देहेन्द्रियमनोबुद्धिवेदनाव्यतिरेकतः ।
अस्तित्वे तस्य संसिद्धे तन्मुक्त्यै यत्यते यतः ॥४॥

And the subsequent part (of the Upaniṣad) is introduced (with a view) to determining whether there is or is not one desirous of liberation,¹ [3cd]
since there is an effort made towards liberation of the one whose existence has been established to be beside the body, the sense-organs, *manas*, intellect and various sensations (of misery). [4]

¹With reference to *mumukṣu* here, Read SP: *māṭṛsākṣī taddvārātmanyadhyastasaṁsāro mumukṣus tvamartho 'tra nir-dhāryata ityarthah*.

भविष्यल्लोकसंबन्धी येषामागमतो मतः ।
न तान्प्रति समारम्भः सिद्ध एव हि तान्प्रति ॥५॥

This beginning (or the act) is not meant for them, who have known from traditional scripture that (the self) is connected with (or, related to) the world. That one is already established from them. [5]

The idea is that this Brāhmaṇa does not seek to inform them who have already made up their mind about the self as related to rituals.

कर्त्रात्मनः पुरा सिद्धेर्बुद्ध्याद्यव्यतिरेकतः ।
कर्त्रादेरिह साक्ष्यात्मा दृष्टेर्द्रष्टोच्यतेऽधुना ॥६॥

Now is here discussed (lit. described) the witness of the agent etc., apart from (or beside) intellect etc.,¹ the seer of the sight, since the self as the agent is already established (for the others). [6]

The seer of the agent of activity etc. is described here as

one eligible for receiving the instruction regarding the Brahman. That one is not established in the earlier portion of the Veda which is related to rituals and also that is not found necessary to explain.

¹This refers to the organs, the body and the feelings of sorrow etc.

विषयो ब्रह्मविद्याया योग्यः क इति चिन्त्यते ।
विषयेऽवधृते यस्मादुपदेशोऽर्थवान्भवेत् ॥७॥

It is thought here as to who is the eligible recipient (*viṣaya*) of the lore of the Brahman, since instruction would serve the purport or be meaningful, if (and when) the recipient is determined (or clearly stated). [7]

SP refers to the authority of Śaṅkara for doing this in the words *ābrahmastambaparyanta* ... and also to the practice of the learned as recorded in *Nyāyavārtika: śamāya śāstram jagato jagāda*.

ब्रह्मणो वोपदेशः स्यादथवाब्रह्मणो भवेत् ।
ब्रह्मत्वस्य स्वतः सिद्धेर्ब्रह्मणि स्यादनर्थकः ॥८॥
उपदेशशतेनापि ब्रह्मत्वं न कथं चन ।
स्वतोऽब्रह्मत्वतस्तस्य नातोऽब्रह्मण इष्यते ॥९॥

(One would ask:) 'Is this instruction about the Brahman or non-Brahman, since the nature of the Brahman is already established, (and this instruction) would be purposeless if it is related to the Brahman?' [8]

Since, in the case of him who is himself non-Brahman, even despite endless¹ instruction, there cannot be effected the character of the Brahman; therefore, it is not accepted (that this is an instruction related to the Brahman) for one on account of one's being non-Brahman. [9]

An opponent's view is expressed.

¹Literally, by hundreds of words of instruction.

Now, there is in verses 10-14 exposition on 3.4.1.

To begin with there is explanation of the question (*praśnavākya*), in more than one way.

सर्वस्यैकात्म्ययाथात्म्यात्र चाब्रह्मेह लभ्यते ।
क्षेत्रज्ञेश्वरसंभेदशङ्कानुत्त्यर्थमुच्यते ॥१०॥

Here,¹ a person, who is non-Brahman, is not accepted (as the recipient of the lore of the Brahman), because all the things in the universe are really in the nature of oneness with the single Ātman; (and yet the Śāstra) is begun for the removal of the confusion regarding the knower of field, the lord. [10]

The answer to the preceding verse is given here.

The idea is to remove every doubt regarding the real non-difference of the inner self and the Brahman. It is only ignorance which obscures the true nature of the inner self. SP points out that the nature of the Brahman has been already discussed possibly in 2.5.

¹This refers to 'in this Śāstra'.

यदित्यनेन निर्देशो विशेष्यस्य विवक्षितः ।
सामान्यमात्रविज्ञानाद्विशेषस्याप्रतीतितः ॥११॥

By the word *yat* is intended the reference to that which is to be described, since the knowledge of that particular would not result from the knowledge of any common individual. [11]

साक्षादित्यादिकं सर्वं तद्विशेषणमुच्यते ।
विशिष्टार्थावबोधित्वान्नीलरक्तोत्पलादिवत् ॥१२॥

In the words beginning with *sākṣāt* are used here the qualifiers¹ of that (Brahman), since they convey (lit. inform) the knowledge of the qualified just as the words *nīlotpala*, *raktotpala* etc.

[12]

¹In the verse only the singular is used for conveying the aggregate of the qualifiers. They are *sākṣāt*, *aparokṣāt*, *sarvāntara*.

यदित्यादिपदानां च सामानाधिकरण्यतः ।
विशेषणविशेष्यत्वं श्रुत्यैवेहावसीयते ॥१३॥

Here,¹ the words *yat* etc. have *sāmānādhikaranyā* 'the nature of belonging to the same case', in the sentence, their function (lit. nature), as qualifiers of what is to be qualified is here understood conclusively (*avasīyate*) by the Śruti itself, on the face of it (*śrutyaiva*). [13]

¹This refers to the things stated in the text; *iheti padārthoktiḥ* (SP).

साक्षादित्यभिधानेन प्रत्यक्षोऽर्थोऽभिधीयते ।
मनसोऽग्रहणं तस्य न दृष्टेरिति वारणात् ॥१४॥

By the word *sākṣāt* is mentioned (or signified) a thing directly perceptible; the perception of it is not by *manas*, since there is a rejection (of the same) by the words *na dr̥ṣṭeḥ*. [14]

This states the meaning of *sākṣāt*.

यदि वा द्रष्टरि प्राप्ते साक्षादिति विशेषणात् ।
तत्प्रसङ्गनिवृत्त्यर्थमपरोक्षादितीर्यते ॥१५॥

Or, perhaps, an actual seer may become known from the qualifier (word) *sākṣāt* (by way of contingency), therefore is stated the word *aparokṣāt* for averting (or obviating) that contingency. [15]

Here is explained the meaning of *aparokṣāt*.

द्रष्टृदर्शनदृश्यार्थप्राप्तावाद्यविशेषणात् ।
लोकवत्तन्निषेधार्थमपरोक्षादितिर्यते ॥१६॥

From the (use of) the first adjective one might imagine (i.e. think of) an object which can be one of the three, viz. the seer, the act of seeing and the object to be seen, as in the worldly life; therefore, in order to reject that, the (other qualifier) *aparokṣāt* is used (in the Śruti). [16]

This is an alternative explanation of the use of two qualifiers, *sākṣāt* and *aparokṣāt*. This is made clear in the next verse.

द्रष्टृदर्शनदृश्यार्थसंभेदविषयस्य हि ।
निषेधायापरोक्षाङ्गीरभिन्नार्थग्रहाय तु ॥१७॥

Indeed also for rejecting (the idea of) an object, which is combined (or, mixed) as the seer, the act of seeing and the object of seeing, the word *aparokṣāt* is used and only (*tu*) in order to convey (or refer to) an object which is not different. [17]

This verse explains the significance of the qualifier *aparokṣāt*.

द्रष्टृदर्शनदृश्यार्थसंभेदस्य निषेधतः ।
दृष्टिमात्रं स्वतः सिद्धं विशेषणफलं भवेत् ॥१८॥

The outcome of the use of the qualifier (*aparokṣāt*) would get itself, i.e. only seeing, established, by the rejection of the combined (or, mixed) objects, viz. the seer, the act of seeing and the object of seeing. [18]

एकं सदेकरूपं च यदि नामोक्तलक्षणम् ।
निर्द्वयं सद्द्वयं वेति नोक्तहेतोस्तदीक्ष्यते ॥१९॥
यतोऽतोऽद्वयसिद्धयर्थं ब्रह्मेत्येतद्विशेष्यते ।
अव्यावृत्ताननुगतं अस्तु ब्रह्मेति भण्यते ॥२०॥

Since (*yataḥ*),¹ indeed, that thing whose character is stated, is not understood (*īkṣyate*) from the reason given, viz. whether it is one, existing in uniform nature and devoid of any duality or associated with duality, [19]

therefore, in order to establish that this Brahman is one without a second, it is qualified by the word *etat*— thus it is said that the Brahman is a thing not distinguished from any other or not similar to any other. [20]

This is to distinguish the Ātman from any one of the Puruṣas accepted by the Sāṃkhyas, existing within a human body and is, therefore, directly perceived by one.

¹This word is taken from verse 20a.

अपुमर्थमिदं प्राप्तं न चेदात्मैव तद्ववेत् ।
यतोऽत आत्मरूपार्थमात्मेत्येवं विशेष्यते ॥२१॥

If this (i.e. what is to be qualified) is not the Ātman then there would not obtain (i.e. result any one) end of human life; therefore, it is further qualified as the Ātman for conveying the nature of the object of Ātman.¹ [21]

¹This clarifies that the Puruṣa in the sentence has the sense of *ātman*.

सजातीयासजातीयद्वितीयार्थानभिप्लुतम् ।
सांख्यराद्धान्तपुंवत्तत्प्राप्तं नानात्वदर्शनात् ॥२२॥
यतोऽतस्तन्निषेधार्थं सर्वान्तर इतीरणम् ।
सर्वेषामान्तरो योऽर्थो नाना स कथमुच्यते ॥२३॥

Since (*yataḥ*) this Ātman is not affected by any other object of the same kind or of another kind in a way similar to Puruṣa in the Sāṃkhya doctrine, since that (there) has plurality, [22] therefore, in order to reject the same,¹ there is a statement *sarvāntara* 'one within all'. How can such a thing be described as that which exists in plurality within many? [23]

This is explained in the following verse by citing usual examples of superimposition.

¹This refers to Puruṣa of the Sāṃkhyas.

स्रग्वत्सर्पादिवलुप्तानां प्रत्यङ्मात्रैकरूपतः ।
प्रत्यग्वस्तूपरोधेन नानार्थो नावशिष्यते ॥२४॥

There does not remain any idea of many objects as obscuring the nature of the inner self, since those objects are (only) imagined in the way a serpent etc. (is imagined) in the place of a garland etc., since (all those) are but having the nature of the inner self. [24]

प्रत्यग्रूपावबोधस्य भावाभावात्मवस्तुषु ।
सर्वत्राव्यभिचारित्वादात्मा सर्वान्तरौ भवेत् ॥२५॥

Since the experience of the inner self is invariably noticed in all, viz. positive entities and (also) negative entities, therefore, the Ātman is what exists within all. [25]

यत्साक्षादपरोक्षाभ्यां ब्रह्म वेह विशिष्यते ।
सर्वान्तरगृहीत्या च प्रत्यगर्थस्य संगतिः ॥२६॥

Or, by the word *yat* is the Brahman qualified here by the words *sākṣāt* and *aparokṣāt* and, further, by the use of the word *sarvāntara* there is mentioned its oneness with the thing, viz. the inner self. [26]

This explains the significance of the words *sākṣāt* and *aparokṣāt*.

साक्षादित्यव्यवहितमगौणमपरोक्षतः ।
इति द्वयं प्रतीच्येव संभाव्यं ब्रह्मणीरितम् ॥२७॥

The word *sākṣāt* means 'not obstructed or obscured by anything else' and the word *aparokṣāt* conveys that (Brahman) is 'not

subordinate', it is 'immediately perceived', thus, these two (qualifiers) are possible only in the case of the inner self which is expressed as in the case of the Brahman. [27]

This is clarified in the following verse.

तथा सर्वान्तरत्वस्य भेदवृत्तिविरोधतः ।
संभावनाद्वितीयत्वाद्ब्रह्मण्येवात्मसंस्थितेः ॥२८॥

That way of being within all by overcoming varied functioning is impossible only in the case of the Brahman, since it is without any second and it exists as the Ātman within every one. [28]

यतोऽत एकवाक्यत्वे ब्रह्मात्माख्यपदार्थयोः ।
द्वैतसंसर्गबाधेन पूर्णं वस्तु प्रतीयते ॥२९॥

Therefore, since the two things called the Brahman and the Ātman (i.e. the inner self) have just one purport, therefore, there is understood here, by the rejection of any association with duality, a thing which is complete. [29]

यदि वैकविशेष्येण विशेषणतया युतिः ।
साक्षादित्यादिकानां स्यान्मिथोऽन्योऽन्यानपेक्षतः ॥३०॥

Or perhaps, the words *sākṣāt* etc.¹ would join together as qualifiers of (just) one object to be qualified without having non-expectancy for one another. [30]

¹This refers to *aparokṣāt*, *sarvāntara*.

एकवस्त्ववसायित्वादन्योन्यार्थानुरोधतः ।
विशेषणानि सर्वाणि विशिषन्त्युत्पलादिवत् ॥३१॥

All these adjectives qualify the same object, since they confirm the meaning of one another and they end in (qualifying only)

one thing like in the case of (each of the words *nīla* etc. with reference to) lotuses etc. [31]

The word 'etc.' refers to other worldly objects.

उपात्तस्वविशेष्याणि साक्षादित्यादिकानि हि ।
परस्परोपरोधेन स्वविरुद्धार्थहानतः ॥३२॥

Indeed, the qualifiers *sākṣāt* etc. are taken to have qualified their own objects to be qualified, by having regard for one another and by abandoning any meaning opposed to themselves. [32]

स्वार्थासंत्यागमार्गेण नानासंसर्गबाधनात् ।
भेदहेतुतमोघातिप्रत्यग्याथात्म्यशेषमुषी- ।
जन्मनैवाप्तमाप्नोति स्वतोऽमेयं वचःश्रवात् ॥३३॥

By not giving up their own meaning and by stultifying the effect(s) of varied things and by the rise of faith in the true nature of the inner self, which destroys the cause of the variety, i.e. ignorance, one obtains (that) which is already obtained, viz. the unknowable, on hearing the sentence of the Śruti. [33]

This verse emphasises the nature of the inner self, the knowledge of which removes ignorance, when the Śruti statement has given rise to it (viz. knowledge).

सामानाधिकरण्योक्तेर्विशेषणविशेष्यतः ।
लक्ष्यलक्षणगत्यातो यथोक्तार्थं प्रपद्यते ॥३४॥

A person understands the matter as stated (in the Śruti) owing to the statement (of the qualifiers which) belong to the same grammatical case (or, thing, viz. the Brahman), from the (relation clearly stated of) the qualifiers and the qualified and (also) by getting to know the description (lit. defining) of what

is to be described (lit. defined).

[34]

The words *sākṣāt* etc. are put in the same case (*sāmānādhikaranyā*) and stand as the qualifiers of the qualified, viz. the Brahman, and therefore the knowledge about the inner self is easily obtained by an individual.

सर्वार्थं यदि वाद्यं स्यात्साक्षादिति विशेषणम् ।
अपरोक्षान्तमथवा ब्रह्मान्तं वोत्तरस्य तु ॥३५॥

Or perhaps, the first qualifier *sākṣāt* could be with reference to (or, could stand for) all other (words as qualifiers) or the qualifier (could be) ending in *aparokṣāt*, or even perhaps (*tu*) the ending word *brahman*, in relation to the later words. [35]

This verse states another arrangement of the words which are used as qualifiers.

Now, a statement is made as to which meaning (proposed) should be accepted.

यत्साक्षाच्चापरोक्षाच्च ब्रह्मणः स्तो विशेषणे ।
वाक्याद्ब्रह्माभिसंबन्धात्तदन्यस्य तथाश्रवात् ॥३६॥

That (the two words) *sākṣāt* and *aparokṣāt* are two qualifiers of the Brahman is understood from the Śruti which is related to the Brahman, since a relation to any other (objects) is not so heard. [36]

This points to the use of *sākṣāt* and *aparokṣāt* together as qualifiers of only (*sarvāntara*) *brahman*.

यदव्यवहितं द्रष्टुर्व्यवधानेन केनचित् ।
प्रत्यङ्मात्रस्वभावत्वाद्ब्रह्मणोऽव्यवधानता ॥३७॥

The Brahman, which is not obscured for a seer by any obstacle,

being of the nature of only the inner self, does not have any obscurity about it. [37]

अव्यावृत्ताननुगतं ब्रह्मागौणं प्रचक्षते ।
अपरोक्षाद्भवेत्तादृङ्नातोऽन्यादृक्कथं चन ॥३८॥

They state that the Brahman, which is not distinguished from (any other things) and which is not similar to (any other), is not subordinate (to any one/thing else); this can be so because of its being directly perceived. Therefore, it is not like any other (thing/person) in any way. [38]

सर्वानात्मनिषेधेन बोध आत्मन्यथैकले ।
परमार्थं त्वसंप्राप्य निषेधो नेष्यते यतः ॥३९॥

There is knowledge in respect of the Ātman alone by rejecting all non-Ātman(s) since any rejection is not accepted (lit. desired) (in this case), without having obtained the knowledge of the highest (reality). [39]

व्यतिरेकान्वयाभावैः कार्यं वस्त्वभिलप्यते ।
कारणत्वनिषेधेन ब्रह्मात्मानं प्रपद्यते ॥४०॥

The thing (i.e. the inner self), which is of the nature of an effect, can be described in relation to its absence and/or presence¹ (in relation to the others), therefore, one obtains (the knowledge of) the thing (i.e. the inner self), viz. the Brahman, by denying the idea of its being a cause (of any other thing). . [40]

The idea is to reject that the Brahman can be the cause of any other thing.

¹Translation follows the variant reading *-yabhyāṃ vai kāryaṃ* which is mentioned in AnSS edition and is adopted by NKL.

एतावन्मात्रयाथात्म्यात्कार्यकारणवस्तुनः ।

अव्यावृत्ताननुगतं ब्रह्मात्मैव ततो भवेत् ॥४१॥

Thus, the inner self, having only this much as its true nature and being in itself a thing both the cause and the effect, becomes (viz. is) the Brahman, which is not distinguished from (any other thing) and not similar to (any other). [41]

This refers to verse 24 above which refers to usual knowledge of things as that of a serpent etc. superimposed on a rope etc.—that is to say, the Brahman is without a second and exists only as the inner self.

यश्चात्मैव भवेत्प्रत्यक्सर्वान्तरतमस्तथा ।
तमेवलक्षणं मह्यं यथावद्वक्तुमर्हसि ॥४२॥

(Uṣasta said to Yājñavalkya:) ‘That inner self, the Ātman, which is thus existing within all—please explain that to me in a clear way (*yathāvat*)¹ as having those characteristics. [42]

¹Śaṅkara has offered an explanation of this *yathāvat*: as a person holds horns of cows in his own hands and points out to the other persons, ‘this is a cow’.

सामानाधिकरण्योक्तेर्ब्रह्मात्मार्थोभिधायिनोः ।
ऐकार्थ्यमेतयोर्न्याय्यं मिथोऽर्थावसितेस्तथा ॥४३॥

Owing to the use of the words signifying the Brahman and (the inner) Ātman as being in the same grammatical case relation (*sāmānādhikaranyā*), it is only logical to accept them to have only one meaning; in that way there is the understanding of (the real) meaning. [43]

ब्रह्मात्मैकस्वभावेन साक्षादिति विशेष्यते ।
असंभवात्तदन्यत्र ब्रह्मत्वस्य यतस्ततः ॥४४॥
आत्मापि ब्रह्मणोऽन्यत्र नैव संभाव्यते यतः ।
सामानाधिकरण्योक्तिस्तस्माद्ब्रह्मात्मशब्दयोः ॥४५॥

The Brahman, being of the nature as of (the inner) self, is described as directly perceived, since there cannot be the nature of the Brahman elsewhere than in it. [44]

The inner self also cannot really exist elsewhere than in the Brahman, therefore, there is the use of the two words *brahman* and *ātman* in the same grammatical case relation. [45]

These two verses explain the significance of the words *brahman* and *ātman* in the same grammatical case relation.

विशेषणविशेष्यत्वे मिथो ब्रह्मात्मनोरतः ।
अब्रह्मानात्मापह्नुत्यासंसर्गैकात्म्यधीर्भवेत् ॥४६॥

Thus, the mutual relation of the qualifier and the qualified exists between the Brahman and the (inner) self. There will arise knowledge of their oneness, which is not associated with (anything else), owing to the rejection (thereby) of the non-Brahman and the non-Ātman. [46]

ब्रह्मणोऽप्यात्मनो मोहादब्रह्मत्वं न वस्तुतः ।
आत्मनोऽपि परोक्षत्वं ब्रह्मणोऽपि तमोन्वयात् ॥४७॥

The Brahman is not Brahman, in reality, but (it is so) on account of ignorance on the part of the inner self; similarly, the inner self also has the nature of not being directly perceptible on account of the association of the Brahman with ignorance. [47]

तमसो ज्ञानविध्वस्तावब्रह्मानात्मताहतेः ।
अपूर्वाद्यात्मकं ब्रह्म निःसंसर्गं प्रपद्यते ॥४८॥

(A person) realises the Brahman which is of the nature of *apūrva* etc.¹ and which is without a contact (with any other thing), when ignorance is destroyed by the knowledge through the removal of the nature of non-Brahman, i.e. non-Ātman.

[48]

¹This stands for *anapara* and other adjectives in BU 2.5.19.

प्रत्यग्याथात्म्यविज्ञानात्तत्तमो नात्मबाधतः ।
प्रत्यङ्मात्रावशेषत्वात्स्यामपूर्वादिमानहम् ॥४९॥

(Uṣasta thinks to himself:) 'By knowing the true nature of the self (within me) and the stultification of the ignorance about it (inner self) thereby let me be one having *apūrva* etc., remaining only the inner self'. [49]

Verses 50-60 clarify the purport of Yājñavalkya's answer.

प्रणिधायान्मनि दृष्टिं प्रत्यग्बोधैकरञ्जिताम् ।
प्रतिवक्त्येष इति तं याज्ञवल्क्योऽप्युदारधीः ॥५०॥

Yājñavalkya also, being a knower of the excellent (Brahman), answered him, considering 'This one is asking the questions, after having fixed his eye on the Ātman, (the eye) which is tainted by² only knowing of the inner self. [50]

¹This is for *udāradhīḥ* where it is excellent *brahman* (SP), but we can translate it as 'possessing excellent intelligence'.

²*rañjita* is indicative of 'being inclined towards' receiving that knowledge.

आत्मप्रमातृमानादेरनेकस्येह संभवात् ।
प्रत्यक्षार्थस्यैष इति न विद्मः को विवक्षितः ॥५१॥

Since there is here¹ the possibility of varied (lit. manifold) reference to the Ātman, the knower and the non-Ātman, therefore, we do not know who is intended by the word *eṣa* 'this one' as the directly perceptible thing. [51]

This explains the significance of the word *eṣa*.

¹This refers to the sphere of worldly dealings.

विवक्षितार्थविज्ञप्त्यै त आत्मेति ततोऽवदत् ।
सर्वान्तरगृहीतिस्तु तत्पूर्वोक्तोपलक्षणम् ॥५२॥

Therefore, in order to convey to him (or inform him of) the intended thing, (Yājñavalkya) then said to him *ta ātmā* 'your (inner) self' and (*tu*) the mention of *sarvāntara* '(existing) within all' is only a pointer to the one that is mentioned (just) before. [52]

¹This refers to *ta ātmā*.

क्षोण्यपक्रममाकाशात्षष्ठ्यन्तेनाभिधीयते ।
आत्मैति च प्रमात्रादेरागमापायसाक्ष्यपि ॥५३॥

By the word ending in the genitive case suffix (i.e. by *-te*) is expressed what begins with the earth and ends with *ākāśa*¹ and the word *Ātman* (is used) for expressing the witness of the knower etc.² (of the inner self) which come into existence and which depart (from it). [53]

¹This refers to five elements.

²Cf. verse 51 above.

मातृमानप्रभेदेऽपि प्रतिदेहं न भिद्यते ।
साक्षी बाह्यार्थवद्यस्मात् आत्मेत्युच्यते ततः ॥५४॥

The witness (viz. the *Ātman*) does not differ from body to body, even if there is a variety of the knowers¹ and (their) means of knowing (or, knowledge) even like (that in) the external objects. [54]

¹Those are the worldly knowers. So it is said *ta ātmā*.

व्यभिचारो मिथो यद्वत्प्रमात्रादेः स्वसाक्षिकः ।
सर्वमात्राद्यभावार्थसाक्षित्वान्न तथात्मनः ॥५५॥

As there is mutual variability among the knower etc.¹ that is witnessed by one's own (Ātman); similarly, there is not such variability in the case of the Ātman, since it is the witness of the absence of all these knowers etc. [55]

¹This refers to the worldly knower, his instrument of knowing and the worldly objects.

साक्षादित्यादिभिः प्रत्यक्प्रत्यग्दृष्ट्या यदेक्ष्यते ।
 प्रत्यग्वस्त्वतिरेकेण नान्यदात्मा तदेक्ष्यते ॥५६॥
 प्रत्यङ्मात्रैकयाथात्म्यादात्माविद्यातदुत्थयोः ।
 तावन्मात्रावसायित्वं सम्यग्बोधादतस्तयोः ॥५७॥

When, with the help of qualifiers as 'directly perceptible' etc., the inner self¹ is viewed as the self within² then it is viewed that the Ātman is not anything else beside the thing known as the sentience within, [56]
 therefore, by knowing the true nature of the inner self, ignorance about the Ātman and also (about) what arises from that finally come to an end only in that, viz. knowing the true nature of them.³ [57]

¹This is for the embodied self.

²This is characterized as an individual's sentience.

³That is, ignorance ... from that.

आत्मनोऽनवशेषेण तदन्यार्थस्य संगतेः ।
 साक्षादित्यादिकं सर्वं संभाव्यं स्याद्विशेषणम् ॥५८॥

On account of the association of the individual self with other objects, in their entirety, it is possible to use (of it) all qualifiers viz. *sākṣāt* etc. [58]

This verse explains how the Ātman is described as *sākṣāt* etc. by accepting the individual self in relation to the objects outside

it.

प्रत्यक्तयैवावसितेः प्रतीचोऽन्यस्य वस्तुनः ।
व्यतिरेकैकरूपस्य व्यतिरेको न लभ्यते ॥५९॥

On finally knowing the nature of (the inner self) as the sentience within, there does not remain any thing in existence outside the inner self, for the other thing has the form only of what is other than the self. [59]

This verse denies the association of the nature of the inner self with anything outside it, as the general property obtaining in various particular individuals belonging to some one genus.

विरोधादन्वयो नास्य खण्डादौ गोत्ववत्तथा ।
व्यतिरेकोऽपि नैकात्म्ययाथात्म्यादुपपद्यते ॥६०॥

And this one¹ does not have any relation (to the particulars) in the same way as cowness has (with a cow called) Khaṇḍa etc. Also there cannot reasonably be any other forms/things on account of their true nature being the single Ātman. [60]

As cowness exists in every individual cow and is yet different from it, similarly, the inner self cannot exist in what is non-Ātman, for that would involve contradiction and also any non-Ātman cannot exist apart from the the inner self since they exist only in the inner self. That is to say, the other things do not exist at all.

¹This refers to the inner self.

Verses 61-74 discuss the question of Uṣasta (in the words) katama etc.) and the answer to it by Yājñavalkya.

प्रत्यङ्मात्रतयैवातोऽनात्मात्मनि विलीयते ।
तवात्मेत्यपि निर्णीतौ नैव स्यात्प्रश्ननिर्णयः ॥६१॥
ममात्मनामनेकेषां संभवादप्रबोधतः ॥६२॥

Thus, the non-Ātman merges in the Ātman, as being only the inner self. And yet there would not be a decision given in respect of (Uṣasta's) question when it is said by way of decision *tava ātmā*, [61]
 since, owing to the possibility of there being many Ātmans, I shall not understand (which Ātman is mine). [62]

Verse 61 intends to introduce the question of Uṣasta: 'Which is the Ātman that is within all?'

This is clarified in verse 62, also see the next verse.

पिण्डान्तस्तावदात्मैको लिङ्गान्तस्तु तथा परः ।
 बुद्धिसाक्षी तृतीयः स्याद्योऽयं संदिह्यते तथा ॥६३॥

There is a doubt thus: whether that Ātman is (i) of the nature of (gross) body,¹ (ii) of the nature of the subtle body, (iii) the witness of intellect. [63]

¹*piṇḍānta* is understood as *piṇḍasvarūpa*, similarly *lingāntās*, *lingasvarūpa*.

यत एवमतो ब्रूहि कतमोऽत्र विवक्षितः ।
 साक्षादित्यादिमानात्मा निर्धार्येदंतयान्यतः ॥६४॥

Since this is so, tell me which one (of the three) is intended, the one which is having (the qualifiers) *sākṣāt* etc., by distinguishing it from others thus: this is the one. [64]

This explains the meaning of the question which Uṣasta put to Yājñavalkya.

याज्ञवल्क्योऽपि तं प्राह यः प्राणेनेति लिङ्गतः ।
 प्राणादेः प्रत्यगात्मानं बुबोधयिषुरञ्जसा ॥६५॥

Yājñavalkya also declared to him in the words *yaḥ prāṇena* ... (and thus) by the indication, since he wished to inform

him about the inner self in a smooth way (using the words)
prāṇa etc. [65]

प्राणनाद्यनुमानेन ग्राहयित्वा धियः परम् ।
ततोऽवबोधयिष्यामि यथोपात्तविशेषणम् ॥६६॥
इत्येतद्धृदये कृत्वा याज्ञवल्क्यो निराह तम् ।
यः प्राणेनेति वचसा न लिङ्गादुक्तबोधनम् ॥६७॥

And Yājñavalkya explained the matter to him, thinking to himself,¹ 'I shall first make him know the highest Ātman by the indications² breathing etc. and then instruct him (about the same) as having the qualifiers that are (already) used. [66]

Since by the statement *yaḥ prāṇena* ..., viz. the indication, there cannot be instruction given (to him) about what is promised (lit. said).³ [67]

Yājñavalkya has here given the same meaning as in the Mahāvākya, *tat tvam asi* and, therefore, it is stated that Yājñavalkya first clarified the meaning of *tvam-padārtha* and then explained the nature of *tat-padārtha*.

¹Literally, keeping this in his heart.

²Literally, by inference, but we have used 'indication' so that this verse is in conformity with verse 65 above, where the word *lingataḥ* is used.

³This refers to the Brahman or the Ātman.

मुखसंचारिणाप्राणो यः प्राणेनानितीक्षिता ।
सर्वप्रत्यक्तमः सोऽयमात्मा सर्वान्तरावधिः ॥६८॥

The one, who is not Prāṇa,¹ (is mentioned) in the word *prāṇena* and that one, which breathes by that *prāṇa*, that moves in the mouth, is the seer, the innermost in all (beings)—this is the (inner) Ātman with the limit that it is within all beings.²

[68]

¹This is *aprāṇa*, rightly separated by SP from *mukhasaṃcārīṇā*.

²This is *sarvāntara*.

सुप्तेऽस्मिन्करणग्रामे योऽसुप्तोऽलुप्तदृष्टितः ।
वासनारूपकान्पश्यन्प्राणान्प्राणिति वायुना ॥६९॥

The one, who, on account of not having lost the capacity to witness and has not gone to sleep (even) when the entire collection of sense-organs has fallen asleep, seeing all those *prāṇas* 'organs' which are of the nature of desires, exhales in the form of wind. [69]

अनात्मत्वमतः सिद्धं प्राणादेः करणोक्तितः ।
प्राणात्मत्वाच्च बुद्ध्यादेः पिण्डान्तस्याप्यनात्मता ॥७०॥

From this¹ is established the nature of *prāṇas* and others as the non-Ātmans, so also, because intellect and others are of the nature of *prāṇas* 'organs' the gross body also is non-Ātman. [70]

The first refers to external organs and the second refers to threefold internal organ. Hereby is thus explained the nature of *piṇḍa* mentioned in verse 63 above.

SP as usual refers to two passages from *Kauṣītakyupaniṣad* 3.3: (a) *yo vai prāṇaḥ sā prajñā yā vā prajñā sa prāṇaḥ*, (b) *prāṇa eva prajñātamedam śarīram parigrhyotthāpayati*; as well as BU 1.5.21: *tasmāt ete etaivādyānte prāṇāḥ*.

¹That is, the mention of all organs.

दृश्यत्वाद्घटवद्देहः प्राणादेः करणत्वतः ।
अनात्मत्वप्रसिद्धिः स्याल्लिङ्गपिण्डात्मनोरतः ॥७१॥

The body is like a pitcher, since it is a thing perceptible (*drśyatva*) and *prāṇas* and others, being organs (of the body) they are established as non-Ātmans and from this it becomes clear that both the subtle and the gross (bodies) (are

non-Ātmans).

[71]

प्राणादिकार्यकरणैः स्वतोऽसंहत एकलः ।
तच्चेष्टां कुरुतेऽकुर्वन्नयस्कान्तो मणिर्यथा ॥७२॥

This one (viz. Ātman) alone, not combined with various means of activity, viz. *prāṇas* etc., does perform the activities of them, and (yet) (not doing them), is just like a lodestone.¹ [72]

SP rightly separates the Samdhi in *kurutekurvan* as *kurute akurvan*.

¹Sureśvara does not elaborate the simile. But he means: this lodestone causes activity in the pieces of iron, only being in their nearness and is taken to be doing those activities itself. In the same way, the Ātman is said to be doing activities of the organs. The cause of this is mere nearness of the Ātman and various organs.

लोकेऽनधिष्ठितस्येह केनचिच्चेतनावता ।
न दृष्टा नियता चेष्टा रथादेर्जडरूपिणः ॥७३॥

There is never seen any definite activity of a chariot etc., which is insentient in nature, unless that is superintended over by someone possessing sentience. [73]

This argument is similar to the one in BSB 2.2.2 (pp.492-493): *nahi mṛdādayo rathādayo vā svayam acetanāḥ santaś cetanaiḥ kulālādibhir aśvādibhir vānadhiṣṭhitā viśiṣṭakāryābhimukhapravṛt-tayo dṛśyante*.

देहेन्द्रियमनोबुद्धिप्राणादेर्नियतेक्ष्यते ।
प्रवृत्तिर्येन तेनैभ्यो ज्ञात्मान्योऽभ्युपगम्यताम् ॥७४॥

That, on account of which definite action of the body, the organs, *manas*, intellect and *prāṇas* is noticed, is different from these all, the knower—let this be understood. [74]

This verse explains the intention of the earlier verse.

From verse 64 up to the end there is discussion of 3.4.2, with some other points relevant upon the same.

प्रतिज्ञाय पुरा साक्षाद्गामहं दर्शयामि ते ।
अशक्नुवंस्तथा कर्तुं लिङ्गेन प्रतिबोधयेत् ॥७५॥
यथा कश्चित्तथैव त्वं प्रतिज्ञाय परात्मनः ।
साक्षात्त्वं तदसंपाद्य लिङ्गेनावेदयस्यमुम् ॥७६॥

(Uṣasta argues:) 'As someone, who first makes a promise, 'I shall show (you) a cow itself,' and then, being unable to do so, would give information about a cow by some characteristic, [75]

in the same way, you first promised to inform me about the direct perceptibility of the highest Ātman and, without doing that, you are (now) instructing me with the help of some indication. [76]

यथाप्रतिज्ञमेवातो यथा पृष्टं तथैव तत् ।
मह्यं प्रतिवचो वाच्यं दोषस्तु स्यात्ततोऽन्यथा ॥७७॥

Therefore, an answer is to be given to me, in the way as it was promised, and also, in the way, I had asked; therefore, an answer should be given to me, otherwise there would come to you a blame. [77]

यथाप्रतिज्ञं प्रत्युक्तिमवोचामासकृत्तव ।
ततोऽप्यपरितुष्टस्त्वमन्यथैव बुभुत्ससे ॥७८॥

(Yājñavalkya answered:) I ¹ have given you an answer as was promised (by me), more than once, and yet, not being satisfied (therefore), you wish to know in another way.² [78]

This explains the significance of verse 78.

¹In the text the plural (*avocāma*) is used out of confidence in himself as having the correct knowledge himself.

²That is, to know the Brahman as any other object of the world.

उक्तवत्तर्मातिरेकेण नात्मवस्तु घटादिवत् ।
शक्यते प्रतिनिर्देष्टुं प्रमाणागोचरत्वतः ॥७९॥

The (real) thing, viz. the Ātman, cannot be directly pointed out as a pitcher etc. by mentioning it, in a way other than one adopted by me, owing to its being an object of what are (commonly known as) the means of knowing. [79]

वेद्मीति यद्वलादात्थ न वेद्मीत्यपि यद्वलात् ।
तदृष्टयैवेह तं दृष्ट्वा ब्रूह्यवद्यं यदीक्षसे ॥८०॥

(Still Uṣasta asked,) 'Give me a faultless answer, if you see that one, viz. on seeing which, i.e. on account of whose strength, you say 'I know' and also, on account of whose strength, you (also) say, 'I do not know'. [80]

Verses 81-139 are the discussion of BUB regarding vastu-svabhāvyā, being based on two dr̥ṣṭis: the popular and that which is in the nature of the thing (i.e. reality).

अप्रमेयं हि यद्वस्तु न तच्छक्यं प्रमाणतः ।
कुम्भवत्प्रतिनिर्देष्टुं यथा तदभिधीयते ॥८१॥

Indeed, that thing, which is not possible to be known, cannot be shown by any means of knowing, as a pitcher (can be)—how this is so is now explained. [81]

This introduces BUB: *vastusvābhāvyāt*.

द्रष्टृदर्शनदृश्यानां संहतानां परस्परम् ।
साक्षित्वमात्मनो नित्यं वस्तुस्वाभाव्यमुच्यते ॥८२॥

What we understand by 'that which is in the nature of the thing' is the eternal character of the witness, viz. the Ātman, in respect of the mutually related (things, viz.) the seer, seeing and the object of seeing. [82]

प्रमात्रादिप्रवृत्तेः प्राक्सदानस्तमितोदिता ।
अकारकात्मना तस्थौ प्रत्यग्दृष्टिरसंगतः ॥८३॥

Before the beginning of the activity of the knower etc., there has ever been the absence of that which did not have an end (lit. setting) and a rise. The seer, viz. the inner self, (indeed) remained as not connected (with the activity) as instrumental. [83]

अकार्यकारणात्मैतद्वास्तवं रूपमात्मनः ।
सकृद्विभातमैकात्म्यं वितमस्कमभेदकम् ॥८४॥

This is real (or, natural) form of the Ātman, viz. the nature of not being effects and their causes; the singleness which is not associated with ignorance and devoid of any distinct objects within it has flashed forth only once. [84]

This is to say that the nature of the Ātman does not occur every time, as and when there is any cause and effect relation noticed in any happening of the world.

एतत्तमोऽभिसंबन्धात्साक्षित्वं प्रतिपद्यते ।
तमोमात्रैकहेतुश्च मोहसंगतिरात्मनः ॥८५॥

In the case of the inner self the nature of being the witness is reasonable only as depending on its connection with this ignorance. Indeed the association of the Ātman with delusion has only one cause, viz. ignorance. [85]

कूटस्थदृष्टितन्मोहौ दृष्ट्याभासश्च तत् त्रयम् ।

कारणं जगतः साक्षी नियन्तेति च भण्यते ॥८६॥

The twofold ignorance in respect of the immutable and also its (capacity of) seeing and the semblance of seeing—all these three are the basis of (the existence of) this world, (And) that witness is really (the one), called the controller. [86]

It is thus emphasised that ignorance about the nature of the Ātman is the basis of all worldly dealings and the seer.

कारणत्वं न कौटस्थ्यात्तन्मोहविरहाद्वेत् ।
जाड्यान्वयाच्च बुद्ध्यादेर्युक्ता तत्कारणानुमा ॥८७॥

The nature of being the cause (which is stated of the Ātman) is not on account of its immutability; it could not be there while there does not exist ignorance about it. The inference of the cause of that is reasonable in respect of intellect etc. (only) owing to their association with insentience. [87]

प्रमात्राद्यतिरेकोऽपि वस्तुनो बोधरूपिणः ।
अज्ञातस्य प्रमेयस्य युक्तः स्वध्वान्तसाक्षिणः ॥८८॥

Also, the existence of the knower etc. beside the thing having the form of the knowledge (viz. Ātman) is reasonable, (only in the case of) the knowledge, (which has not been known,) is the witness of ignorance (about itself). [88]

कूटस्थदृष्टेः साक्षित्वं जडस्येव न युज्यते ।
साक्ष्यार्थानभिसंबन्धात्तस्मिन्सत्यपि नाचितेः ॥८९॥

The nature of being the witness cannot be said to belong to the immutable seer,¹ as in the case of the non-sentient; nor also can it be of the non-sentient even if that (viz. the immutable seer) exists in it, for there is no close connection of the witness and the object of seeing.² [89]

SP rightly points out how the two lines of the verse answer away the doubt thus: (*kinī ca*) *cetanasya vācetanasya śuddh-asyājñāsyā vā*.

¹That is, while it is without its false attributes, viz. organs etc.

²In the case of any seeing only the sentient can be said to be capable of it.

तस्मात्परस्य साक्षित्वं स्वमोहाभासवर्त्मना ।
कार्यकारणसंबन्धे चिदाभासस्य संगतेः ॥९०॥

Therefore, in the case of the highest Ātman, the nature of being the witness is only by way of the appearance of ignorance about its own, because the cause and effect relation can go well with only the appearance of sentience.¹ [90]

¹That is to say: not the real sentience.

प्रमात्राद्यभिसंबन्धो यथानुभवसिद्धिकः ।
तथैव तदभावोऽपि सिद्धोऽनुभवमात्रतः ॥९१॥

As the relation of the seer etc. is established by one's experience, similarly, the absence of the same also is established by only experience. [91]

अनन्यहेतुकं तावत् त्रयमेतद्यथोदितम् ।
प्रमात्रादिपदार्थस्तु धर्माधर्मादिहेतुकः ॥९२॥

As this triad, which is already mentioned, does not have any cause other (than the Ātman) and the things, viz. the seer etc., are really having the cause in Dharma and Adharma¹ etc.² [92]

¹*dharmādharmā* mean *punya-karman* 'holy activity (according to scriptures)' and *apunya-karman* 'what is opposed to *punya-karman*' respectively.

²This refers to attachment etc.

बुद्ध्यादेरभिसंबन्धो जन्मनैव चिदात्मना ।
घटाद्यर्थोभिसंबन्धो धर्माधर्मादिकारणः ॥९३॥

The close (*abhi*) relation of intellect etc.¹ to the sentient Ātman is by the very birth (of an individual). As against this, the connection (of the sentient, viz. the Ātman) with objects like a pot etc.² has Dharma and Adharma etc.³ as the cause (for it). [93]

This verse is based on the relation of the seeing Ātman to the various organs in the body, which is to attribute blemish to an individual self while its connection with external objects like a pot is occasioned only by its having merit and demerit to his credit.

¹This stands for various organs.

²Other objects like *paṭa*, *raju* etc. are meant.

³See note 2 on verse 92 above.

प्रमातृदृष्टिरेकात्र शब्दाद्यर्थावलेहिनी ।
भूरिसाधनसापेक्षा सुखदुःखफलप्रदा ॥९४॥

Here (in this context), the one capacity of looking that belongs to the knower, touches (i.e. is connected with) the objects such as words;¹ it expects (i.e. depends on) many means (of acquiring them) and it brings as its result happiness or misery. [94]

Verse 93 has anticipated the twofold character of *dr̥ṣṭi* (capacity to see) thus the one is in the nature of the seer, i.e. the Ātman (*paramārthadr̥ṣṭi*) and the other relates to the worldly doings proceeding from ignorance, thus it is not *paramārthadr̥ṣṭi* but *vyāvahārikī* (or *laukikī*) *dr̥ṣṭi*. This verse explains the capacity of seeing on the part of a worldly seer.

¹This refers to *rasarūpagandha*.

क्षणप्रद्वंसिनी चेयं तद्धेतोर्भङ्गुरत्वतः ।
प्रतिदेहं विभिन्ना च त्वसाधारणकारणात् ॥९५॥

And that (*dr̥ṣṭi* other than *paramārthadr̥ṣṭi*) gets destroyed within a moment (i.e. does not remain permanently), because the cause of it is perishable¹ and that differs from body to body, because it has for it particular causes. [95]

This explains particular experiences of every individual.

¹This refers to the objects of seeing that are not permanent, products as they are of ignorance.

क्रियाकारकरूपेयमक्रियाकारकात्मना ।
तावन्मात्रैकयाथात्म्यात्तया व्याप्तैव जायते ॥९६॥

And this one, (viz. *laukikī dr̥ṣṭi*), which is of the nature of activity and the cause for activity, becomes revealed to one as pervaded by the Ātman, which is without any activity and also without any means of activity. [96]

Though SP and NKL do not explain the Saṃdhi in *akriyākārakātmanā* it is to be understood as *akriyā-akāraka-ātmanā* because that one (*laukikī dr̥ṣṭi*) is having only the other (viz. *paramārthadr̥ṣṭi*) as its real nature. In the case of an individual, the capacity to see and to use the means to activity depends on its relation to the inner sentience, on account of the ignorance which has pervaded it (viz. that capacity).

कात्स्नर्येन यत्र वृत्तिः स्याद्व्याप्यव्यापकवस्तुनोः ।
व्याप्तिस्तत्रैव मुख्या स्याद्रज्जुसर्पीदिवस्तुवत् ॥९७॥

Pervasion, in its primary sense, is understandable in the case of two things which are what is to be pervaded and what pervades it and also only there where the function or existence¹ (of the two is understood) in its entirety, this is as in the

case of things like a rope and a serpent etc.²

[97]

This explains the nature of pervasion.

¹Here, there is a reference to the double meaning of the word *ṛtti* derived from the verb root *ṛt* in two different senses; (i) to be and (ii) to function.

²As usual, Sureśvara does not refer to other pairs of things that provide examples of superimposition like *rajju-sarpa* which is mentioned. This is meant by *ādi*.

देशकालादिसंभेदादसाधारणतत्त्वयोः ।

व्याप्तिर्न घटते साक्षाद्विमवद्विन्ध्ययोरिव ॥९८॥

There cannot directly occur pervasion (of two things) having distinct (lit. uncommon) natures, on account of the differences in respect of region, time etc., as in the case of Mt. Himālaya and Mt. Vindhya.

[98]

प्रमात्रादिव्यपेक्षेयं लौकिकी दृष्टिरात्मनः ।

तत्प्रत्यगात्मदृष्टिस्तु विज्ञेया पारमार्थिकी ॥९९॥

This worldly capacity of seeing on the part of the Ātman is dependent on a seer etc.;¹ as against this, the capacity to see, on the part of the inner self, has to be known as belonging to the highest reality.

[99]

Here, Sureśvara uses the words *laukikī* and *pāramārthikī* to distinguish between two *dṛṣṭis*.

¹This refers to *pramāṇa* and *prameya*.

परमार्थात्मदृष्टयेयं लौकिकी दृष्टिरात्मनः ।

षड्भावविक्रियामेति व्याप्तैवाकाशकुम्भवत् ॥१००॥

Keeping in view that highest reality (i.e. Ātman), (one has to say that) this worldly capacity to see, on the part of the Ātman, undergoes sixfold modifications and it is thus pervaded

like a pitcher by the sky.¹

[100]

¹Here, Sureśvara is very cryptically expressing the simile. Actually, Sureśvara should have used *kumbhākāśavat*, but, for metre's sake, he has used *ākāśakumbhavat*, since *ākāśa* is the pervader while *kumbha* is what is to be pervaded.

धर्माधर्मानपेक्षत्वाच्चैतन्याभासतां प्रति ।

घटाद्याभासवत्तस्मान्नात्माभासो विनश्चरः ॥१०१॥

And, since in relation to appearance of sentience it does not expect *dharmādharma*, therefore, what appears as the semblance of Ātman is not perishable like what appears as a pitcher etc.

[101]

निष्क्रियश्चेतनः साक्षी सक्रियोऽचेतनः पराङ् ।

व्यावृत्तश्च प्रमात्रादेः सिद्धः साक्षी सुषुप्तगः ॥१०२॥

The sentient one, who is devoid of any activity, is the witness, while the non-sentient which is active is existing outside; (therefore) the witness which belongs to the state of sleep is established as distinguished from a seer etc. (of the worldly dealings).

[102]

This verse intends to distinguish between *paramārthadr̥ṣṭi* 'seeing in relation to reality' and *laukikī dr̥ṣṭi* 'seeing in worldly dealings'.

न चेदनुभवव्याप्तिः सुषुप्तस्याभ्युपेयते ।

नावेदिषं सुषुप्तेऽहमिति धीः किंबलाद्भवेत् ॥१०३॥

If pervasion of the experience of one who is sleeping is not accepted, then on what strength would there arise the awareness 'In my state of sleep, I did not know (anything)?'

[103]

The argument is: The individual self, being pervaded by the highest reality, viz. Ātman, alone can have post-sleep-state awareness 'I had not known any object'. That awareness (*dhit*) can arise only from *parāmarśa* 'realising the oneness of what was seen earlier' as continuing in the later moment. The words 'I did not know anything only point to the one who can be aware but has no awareness whatsoever'.

बुद्ध्यादेः प्रविलीनत्वाद्देहादेश्च जडत्वतः ।
लोष्टादेरिव नैव स्यान्नाज्ञासिषमितीक्षणम् ॥१०४॥

Since intellect etc.¹ have merged² and since the body etc.³ are insentient, therefore, there would not occur the thought (*īkṣaṇa*) 'I did not know' in the same sense as in the case of a lump of clay etc.⁴ [104]

In the first line of the verse, there are two parts; one referring to intellect and the other to body and others. This is based on the concept of the subtle and the gross form of bodies.

¹This refers to the internal organs, *manas* and *ahaṁkāra*.

²That is, in the sky in the heart, as mentioned in 2.1.

³This refers to the external organs.

⁴This refers to stone, pillar and such other things outside a body.

चिदाभासैकमात्रेण तमःसिद्धिर्न मातृतः ।
संवित्तन्मोहचिद्विम्बैः प्रात्यक्ष्यं कर्तृरूपिणः ॥१०५॥

Ignorance (lit. darkness) is established only on account of the semblance of the sentient and not on account of the seers (in the worldly sense of it); for what has the form of the agent of an activity can be directly perceptible only through being the reflections of the sentience, which is really knowing one (as associated with) ignorance about itself. [105]

The notion of an agent in the case of the individual self arises

out of its true nature of being one with the sentient Ātman. The singular form *karṭṛrūpiṇaḥ* and the plural form ... *bimbaiḥ* would mean that there is a reference to many situations in an individual's life.

स्मृतिनिश्चितिसंशीतिरागादिहिरुगात्मसु ।
अहंरूपेण योऽन्वेति स प्रमाता परो मतः ॥१०६॥

He, who continues to be existing in the form of ego in (the individual selves) which (really) stay away (*hiruk*) from memory, determining, doubt, attachment etc.¹ is understood (in the world) as the knower. [106]

What we call the knower is really the individual self affected by its ignorance about its true nature. SP states that this is in accordance with the *nyāya* 'maxim/rule' *anviṣṭaḥ syāt paramātmāiva pāpmadoṣādivarjitaḥ*.

¹This refers to sin, desire and so on.

स्मरणादिविभागेन ज्ञातर्येकत्र यत्पृथक् ।
प्रथतेऽनेकरूपाभं तज्ज्ञानं ज्ञातृकर्तृकम् ॥१०७॥

That is knowledge which appears just in one knower and is also distinct from it; with the knower as its agent (for acquiring it); (and) it appears in many forms, owing to the division, viz. memory etc. [107]

Now, in this verse, Sureśvara states what is known in the world as knowledge.

विभिन्नो बहिराभाति जातिरूपक्रियादिमान् ।
विभिन्नोऽनुभवादेव ज्ञातुर्ज्ञानात्स गोचरः ॥१०८॥

What has the characteristics genus, form, activity etc. appears outside (and) only as distinct from experience itself and it is the object (knowable) from the knowledge of the knower.

[108]

This relates to what is known as *ajñeya* in worldly knowledge.

संवित्तन्मोहधीवृत्तिशरीरादिविशेषणम् ।
भोक्तरीह यदाभाति तत्प्रमाणफलं स्मृतम् ॥१०९॥

What appears (in the enjoyer or experiencer) ¹ as his attributes, viz. intellect, its function, the body etc. that arise out of ignorance about the knowing one, is known as the result arising from the authoritative means. [109]

This verse explains the nature of the result from a knowledge situation which is discussed in the earlier verse.

¹This refers to the Ātman existing in the body in the form of the individual self. Refer to 2.1.

कर्तृत्वं करणत्वं च कर्मत्वं चात्मसाक्षितः ।
व्यतिरेकेण कर्त्रादेः सिद्धेर्नात्मत्वमस्त्यतः ॥११०॥

The nature of being an agent, the means and the object of knowing (and the result) ¹ (appear) to be established beside the Ātman, the witness; therefore, they do not have the nature of the Ātman apart from this one (*ataḥ*, i.e. *sākṣiṇaḥ*). [110]

Verses 106-109 discussed the nature of *jñātr*, *jñāna*, *jñeya*, *phala*, where *kartr̥tva* means *mātr̥tva*, where as *karaṇatva*, *jñāna*; *karmatva*, *jñeya*; *phala* are left unexplained. Here, *kartr̥* in the first line refers to a false agent and that in the second line to the real agent.

¹This is the force of *ca* which is repeated in the line.

साक्षित्वेनात्मनः सिद्धिर्मात्रादिव्यतिरेकतः ।
न कर्तृता प्रमात्रादेः साक्ष्यत्वेनैव तत्क्षयात् ॥१११॥

Establishing (i.e. deciding that) the Ātman as the witness is

different from the experience/acceptance of an agent etc.¹ The agent etc. do not have the nature of the agent etc., since those lose (their so-called status) immediately after their being perceived as the object by the witness. [111]

The thought at the basis of the verse is to set aside the notions of (i) the Mīmāṃsakas who hold the individual self in connection with intellect as the agent, (ii) the Buddhists who hold intellect itself as the Ātman, and (iii) the followers of Cārvāka, who hold only the body as the means.

¹*mātrādi* can be alternatively translated as the organs etc., viz. those which are useful for knowing (i.e. witnessing). Yet, see *pramātrādi* in the second line.

प्रत्यङ्मोहजबुद्ध्यादिजडरूपप्रधानतः ।
कर्तृत्वमात्मनो युक्तं चित्प्राधान्याच्च भोक्तृता ॥११२॥

It is only proper to hold that the Ātman is the agent, as it is the principal one in relation to the insentient forms (viz. intellect etc.) which come into existence from ignorance about the inner self and the nature of the enjoyer on the part of it is owing to the prominence of sentience. [112]

This reasserts that the inner self is really the witness, though called as the agent on account of relation to intellect etc.; it is the enjoyer when the sentience is given prominence.

अव्याकृतव्याकरणे यदुक्तं सर्वमेव तत् ।
अनुसंधेयमत्रापि वस्तुतत्त्वविशुद्धये ॥११३॥

Or that, viz. what was stated in respect of manifestation of the unmanifest, has to be understood here also, so that the true nature of the thing (viz. the highest reality, the Ātman) is clearly understood. [113]

This verse has a basis in BU 1.4.7.

स्वमहिम्ना न संसिध्येत्स्वतोऽनवगमात्मकम् ।
भावाभावौ न वस्त्वेति प्रत्याख्यातं यदात्मना ॥११४॥

What is itself of the nature of non-knowledge (i.e. that which is non-sentient) does not get established through its own strength. (Indeed) the (real) thing (i.e. the inner self), however, does not attain the state of a positive entity and/or a negative entity, since that (the existence of *bhāva* or *abhāva*) is rejected by (the existence of) Ātman. [114]

तस्मादजायमानैव जायमानेव लक्ष्यते ।
संवित्तिस्तदसंबोधहेतूत्थानात्मजन्मना ॥११५॥
तद्विनाशेऽपि तत्साक्ष्याद्विनश्यन्तीव लक्ष्यते ।
यतोऽतः कार्यतां तस्या नेश्वरोऽपि प्रसाधयेत् ॥११६॥

Therefore, the awareness on the part of the Ātman appears as becoming born, even if it is not being born, (this is) on account of the coming into existence of the non-Ātmans caused by ignorance about it (i.e. the Ātman). [115]

And (*api*), when that non-Ātman becomes destroyed, the awareness of that Ātman appears to be getting destroyed, since that is also being witnessed by the Ātman; therefore, not even the lord¹ can establish the nature of being an effect in the case of that (sentience). [116]

In the first line of verse 115 is stated the so-called birth of an individual (i.e. the inner self) and the second line gives the reason for it, viz. ignorance about its nature and consequently there arises the body etc.

¹It signifies the great knower.

अज्ञानभूमिगं वस्तु मानसंगतिमाप्नुवत् ।
मेयत्वं लभते नान्यद्यच्च त्यक्तक्षितिद्वयम् ॥११७॥

The (real) thing that has fallen in the state of ignorance gets

into association with the means of knowing etc. and therefore attains the status of what is to be known and it is not the other, viz. the highest reality, the Ātman which has given up the basis¹ of duality, viz. the cause of duality, i.e. ignorance.

[117]

¹This refers to *kṣiti*.

हेतोः कार्यसमुत्पत्तेः सिद्धेः प्रागपि संविदः ।
कार्यकारणताहीना तस्मात्संवित्प्रतीयताम् ॥११८॥

Therefore, since sentience (lit. the knowing one) is established to be existing even before its cause, viz. the rise of effects, let the sentience be understood as devoid of any relation consisting in cause and effect.

[118]

शून्यस्यापि हि शून्यत्वं तत्साक्षिणि सतीक्ष्यते ।
असाक्षिकं चेच्छून्यत्वं साक्षिवत्स्यादसाक्षिकम् ॥११९॥

The character of *śūnya* as *śūnya* also is seen, only if there is a witness of that. (But) if the character of *śūnya* does not have any witness to see it then it would be like¹ the witness having no witness to see it.

[119]

¹This implies *svaprakāśatva* 'self-illuminating character' of *śūnya* and, in that case, Sureśvara points out that there is not any controversy between him and the one who holds the concept of *śūnya*; in other words, *śūnya* and *paramātmā* are the same, therefore the word 'like' means 'identical with'.

साक्ष्यसाक्ष्यपि संसिद्ध्येत्स्वार्थत्वान्न तु शून्यता ।
पाराध्यात्स्वार्थविरहे षष्ठगोचरवद्भवेत् ॥१२०॥

And also, the witness of what is to be witnessed (*parātmā*) would get self-established, because it has its own object to illuminate, but not so does *śūnyatā*. Because, it is then for

serving the purpose of another¹ and in the absence of any purpose of its own, it would be like an object of the sixth sense.²

[120]

¹It is taken for granted that what is *jaḍa* serves the purpose of another and *śūnyatā*, being *jaḍa*, is to serve some other's purpose and therefore it is not free like the Ātman.

²This refers to *manas*, therefore *ṣaṣṭhagocara* means *mano-gocara*, that is merely *kalpita* 'imaginary'. Also, cf. BSB 2.1.2: (*alokavedaprasiddhatvāt tu mahadādīnām*) *ṣaṣṭhasyevendriyārthasya (na smṛtir avakalpate)*. This should explain what is *ṣaṣṭhagocara*; on this see [vol.1:1982] p.280.

देहान्तः प्रत्यगात्मायं पञ्चधा गम्यते मितेः ।
एककारणसाक्षित्वकर्तृदुःखित्वरूपतः ॥१२१॥

This individual self, which exists in the body, is known from experience¹ to be fivefold, viz. having the five forms, being one (person), being the cause, being the perceiver, being the agent being miserable.²

[121]

¹This is for *miti* standing for *anubhava*.

²The word 'misery' stands for happiness and misery both, because what is called happiness is, in fact, the undesired condition of the inner self and, therefore, the misery. See verse 125 below where *duḥkha* means *sukhaduḥkha*.

श्रुतितो लिङ्गतः साक्षात्कार्यकारणसंगतिः ।
यतोऽनुभूयते तस्मात्कारणत्वं परात्मनः ॥१२२॥

Since the association of the effects and their causes is experienced from both the Śruti and also the characteristic marks (*linga*), therefore, the highest Ātman has the nature of a cause.¹

[122]

¹This is noticed from *Taittirīyopaniṣad* 2.1: *tasmād vā etasmād*

ākāśaḥ sambhūtaḥ which refers to the cause and effect relations obtaining between the Ātman and the world, so also *linga* 'characteristic' of which we can understand the cause and effect relation—this is at the worldly level referring to the individual self and the various objects outside.

प्रत्यक्साक्ष्यतिरेकेण नाभावोऽपि प्रसिध्यति ।
किमु भावो जगत्समिन्साक्षी चानन्यसिद्धिकः ॥१२३॥

And negative entity also does not get established without (any reference to) the inner self which is the witness. What then can be said about a positive entity, when, in this world, the witness does not get itself established by another? [123]

यथोक्तानुभवारूढो बुद्ध्यन्तोऽपि प्रसिध्यति ।
माता मातरि मानं च मानान्मेयं प्रसिध्यति ॥१२४॥

A knower, associated with intellect which has received experience that is mentioned,¹ does not get established by itself; and when this knower gets established, the act of knowing also gets established and, consequently, the object to be known also gets established by that act of knowing. [124]

¹This refers to the word *miti* in verse 121 above.

सुखी गौरो धनी गोमान्बाह्यमेयसमाश्रयात् ।
प्रमाणभूमौ स्थित्वैतदुक्तं सर्वं प्रसिध्यति ॥१२५॥

And all that is said in the field of the worldly dealings is after our depending on the outside objects of knowing, viz. (as seen) in the statement, 'I am happy,'¹ 'I am fair,' 'I am wealthy,' 'I am possessed of cattle'. [125]

¹This has a reference also to *duḥkhitva*, which is stated in verse 121 above.

प्राक्प्रमात्रादिसंभूतेर्यत्प्रमात्रादिकारणम् ।
अनन्यानुभवात्माभं तत्प्रमाणं सदादृशेः ॥१२६॥

What appears as the cause of the knower etc., viz. what has the appearance of experience of itself (lit. of none other), is the means of knowing of the ever-seeing one, even before knower etc. has come into existence. [126]

मेयमानप्रमात्रादिविभागस्तत्र नेक्ष्यते ।
प्रत्यग्बोधैकयाथात्म्यवस्तुमात्रोपरोधतः ॥१२७॥

The division such as the object of knowing, the means of knowing and the knower etc. is not expected there; because there is only the existence of the thing itself, which is the true nature of merely the knowledge about the inner self. [127]

This verse aims at rejecting the acceptance of Arthāpatti as a means of getting to know the highest Ātman.

ईदृगेव फलं चात्र मानमेयादिकं तथा ।
कुतो भेदावकाशः स्यादद्वयैकप्रमात्मनि ॥१२८॥

Such alone is the result here and so also the means of knowing the object of knowing.¹ How can there be place/scope for discreteness in respect of the Ātman, which is merely devoid of duality? [128]

¹This refers to the imaginary (*kalpita*) nature of things related to the worldly life.

प्रमाणवर्त्मनायातमिदं मोहापनुत्तये ।
वस्तुवृत्तेन नैवालं शास्त्रानारम्भसकिततः ॥१२९॥

And this one,¹ which is thus understood by accepting the function of the means of knowing, is for the removal of ignorance; indeed, by the very nature of itself, it is not enough

(for that purpose, for otherwise) there would result the contingency of the absence of any Śāstric activity. [129]

The first line stresses the importance of the function of the means of knowing etc. in getting to know the highest reality; this would explain the purpose served by the Śāstras, which are really speaking about what are the results of superimposition.

¹This refers to the sentience which is not associated with duality.

उक्तार्थापरिहारेण तदज्ञानजभूमिषु ।
व्यवहारः प्रमात्रादेः स्वप्नमायेन्द्रजालवत् ॥१३०॥

By not giving up the matters already stated, the dealings of the knower etc. at various levels, caused by ignorance about that reality, are like a magic show, i.e. as if seen in a dream.

[130]

This refers to what was thought in the Śāstra.

अविचारितसंसिद्धितमोवत्स्यात्तदुद्ववम् ।
कृत्स्नं जगदतो मोहद्वस्तौ द्वस्तं भवेच्चित्तिः ॥१३१॥

This entire world would be like ignorance which gets established even without thought; so also its products and the world become destroyed, when there would be the destroyer of knowledge, viz. while there rules the sentience (alone). [131]

We follow the reading *citi* (locative singular of *cit*) at the end, as is known from the NKL edition and the variant reading of the AnSS edition.

भिन्नमानप्रमात्रादौ कार्यकारणवस्तुनि ।
अभिन्नमातृमानादिरात्मैवैकोऽद्वयः स्वतः ॥१३२॥

While the things, standing in the relation of cause and effect,

viz. the diverse means of knowing and the knowers etc.,¹ there exists the Ātman, which itself is not associated with any duality and which is not differentiated in different knowers, means of knowing etc.¹ [132]

¹This refers to the objects of knowing.

न देशकालावस्थादावपेक्षास्त्यात्मनः स्वतः ।
अनन्यापेक्षसंसिद्धेर्देशादेस्तदपेक्षतः ॥१३३॥

In the case of the Ātman itself, there is no dependence on (lit. expectancy of) space, time, condition etc., since it gets established without dependence on any other—and space etc. do have such dependence. [133]

देशकालनिमित्तादिव्यपेक्षं वस्तु यद्ववेत् ।
तदेव तदपेक्षं स्यान्न तु देशादिसिद्धिदम् ॥१३४॥

A thing, which depends on¹ space, time or any other causes (for its coming into existence), would be expecting the same (lit. that); but not that which causes space etc.² [134]

This explains further the thought in the preceding verse.

¹Namely, to be in relation to.

²This refers to time.

कारकादिवशाद्यावत्किञ्चिद्वस्तूपलभ्यते ।
क्रियाफलं तद्विज्ञेयमनपेक्षिततत्त्वकम् ॥१३५॥

Whatever thing is seen by us on account of the means of its production etc. is to be understood as the result of an activity (and) not depending on its own nature. [135]

The nature of a thing is determined by its causes and it comes into existence through the working of its productive causes. One might therefore compare those things with the Ātman whose

nature is determined by some cause and, for this reason an assertion is made here, viz. that the Ātman does not come into existence through the operation of any productive causes.

वस्त्वधीना यतो विद्या कर्त्रधीना क्रियाखिला ।
कर्त्रादि चात्ममोहोत्थं वस्तु सिद्धं स्वतोऽद्वयम् ॥१३६॥

(This is so), because knowledge¹ depends on only the thing (i.e. reality) and not on worldly knowledge, whereas all activities depend only on some agent and (the notions of) an agent etc.² arise out of ignorance about the Ātman. (As against this), the thing, viz. the Ātman, is established by itself and is without any duality. [136]

¹This refers to knowledge of the Brahman alone.

²This refers to *kāraka* and *kriyā*.

कारकाण्युपमृद्नाति विद्या बीजमिवोषरम् ।
तत्कारणोपमर्दित्वाज्जन्मनैव न कारकम् ॥१३७॥

Knowledge destroys the notions of the productive causes in the same way as a barren land destroys the seed; it (viz. knowledge) is a productive cause, because it rises¹ alone. It has the nature of being destructive of the causes of the same.² [137]

The simile is explained thus. In a barren land, there is not any potency of creating any effect from the seed, similarly the knowledge about the Brahman does not have any potency in producing things.

The second line explains the significance of the simile as we have explained.

¹This refers to productive causes.

²The rise is indicative of the repetition (*abhyāsa*) of the process in relation to it. It signifies the absence of ignorance.

प्रमातृपरिणामत्वात्प्रमासिद्धिः प्रमातरि ।
प्रमात्रव्यवधानेन संविदैव न वृत्तिभिः ॥१३८॥

There is verbal knowledge (of something) established in the case of the knower, (only) as a modification of the knower; (now,) owing to the absence of any obscuring factor for the knowing one (in *sanvid*), there is knowledge established not by any modifications etc. (of *sanvid*). [138]

This verse is based on the worldly notion of the knowledge of things. A thing is known by an agent when there is some kind of modification that occurs in the case of the knower. It is quite contrary in the case of the knowledge obtained by the Ātman, for the Ātman does not undergo any modification, when it is said, it knows.

मात्रन्तरे व्यपेक्षायां मातुर्मनान्तरे मितेः ।
दुर्वारत्वात्प्रसङ्गस्य ह्यनवस्था प्रसज्यते ॥१३९॥

Against the above, if a statement, is made that the knowledge occurs in the case of the knowledge (viz. the Ātman), depending on some other knower, then, in that case, there will be the contingency of *infinite regress* for the reason that it cannot be averted. [139]

In verses 140 onwards up to the end, there is the discussion of pramāṇa-prakriyā used in the worldly dealings.

प्रमात्रतिशयेनैव कारणं स्यात्प्रमात्रपि ।
विज्ञानातिशयं सिध्येन्मानं निश्चयवत्तथा ॥१४०॥

Through the excellence of only the knower, a certain means of knowing also becomes the cause (of knowledge) and the excellence of the knowing sentience (*vijñāna*) and the knowledge comes to have the form of (definite) decision. [140]

pramātrātiśaya requires some explanation here: (i) *pramātr* is basically *nirvikāra*, but a certain excellence in it has to be accepted so that there can be knowledge received by it, as we say. This knowledge is *vijñānātiśaya*. (ii) *niścayavat māna* is knowledge in the form of a (definite) decision. This can result, only if there is *vijñānātiśaya* as mentioned above. Thus, in this worldly situation of knowing, there is mutual dependence of the knower and the knowable.

मेयासाधारणात्मोत्तरूपवान्निश्चयो यथा ।
बाह्यमेयप्रधानत्वे सत्यसाधारणार्थधीः ॥१४१॥

Since, decision is of the nature of the peculiar (or, uncommon) nature of the eternal object and there results, therefore (or, in that case), the understanding of an incomparable object of reality. [141]

This verse refers to the firm impressions of the external objects produced on intellect.

मानव्यापारकाले स्याद्बाह्यमेयोपसर्जनम् ।
आभासादिप्रमाणान्तं तद्विशिष्टफलोत्थितेः ॥१४२॥

This inclination towards an external object would be possible only at the time of the function of the organs (*māna*), up to the point that there is (some) specific effect produced by that from the semblance (of the knower) up to the functioning organs. [142]

The inclination should have subservient relation to the knower, the impressions of the knower to have known that, and the function of various organs.

प्रमाणव्यापृतेस्तुर्ध्वं वासनाधानकारणात् ।
मेयोपसर्जना बुद्धिः स्मृत्या साक्षात्प्रतीयते ॥१४३॥

And after the function of the means of knowing is over (i.e. completed) intellect becomes subordinate to the object of knowing, on account of the fixing of impressions of the same on it and this is directly perceived (experienced) by memory. [143]

This is to stress the importance of intellect in respect of memory.

साक्षात्कुर्वत्स्वमात्मानं यदालम्बनंतां व्रजेत् ।
कार्यकारणरूपस्य तदेवालम्बनं मतम् ॥१४४॥

That¹ is held to be the basis of that (viz. intellect) which, directly perceiving itself, becomes the support (or, abode) of that¹ and also of what has (i.e. assumes) the form(s) of effect(s) and cause(s). [144]

NKL concludes: *ato nādvaitahāniḥ ity arthah.*

¹This refers to the inner self or sentience.

पूर्वोपलम्भसंस्कारसमुत्थस्मृतिविभ्रमात् ।
वस्तुवृत्तातिवर्त्येष व्यापारः सार्वलौकिकः ॥१४५॥

This is the activity of all people which, owing to the error consisting in becoming (the subject of) memory, arise as it does from the impression(s) obtained earlier. [145]

This stresses on the significance of the adjective *meyopasarjanā* of intellect (in verse 143 above)—it is, in reality *anālingita-bāhyārtha* 'not related to (or, based on) any external object(s)'.

मेयाभिसंगतेः पूर्वं ज्ञानं ज्ञातृसमाश्रयम् ।
ज्ञातृत्वसिद्धये ज्ञानं ज्ञातृत्वं तत्कृतं यतः ॥१४६॥

(Even) before its connection with some object of knowledge, intellect¹ is supported (i.e. based/abiding) in the knower (i.e.

sentience within) and it becomes the knower, since its nature of being the knower (of external objects) is caused/produced by that (viz. sentience within). [146]

From verse 142 up to 146 there has been discussed the nature of what are called the means of knowing.

¹This is for *jñāna* in the first line.

वासनाबलतः स्पष्टं बहिर्वद्यन्मतौ स्थितम् ।
भावनागोचरं ज्ञानं बाह्यवस्त्ववलम्बनम् ॥१४७॥

Knowledge (in memory) is (in reality) an object of the impression(s) which has (or, have) remained in intellect (*mati*, i.e. *buddhi*) owing to the power (lit. strength) of the impression(s) and becomes clear (i.e. visible), being (as it were) supported in (or, based on) external object(s). [147]

There is no doubt about that the words *vāsanā* and *bhāvanā* refer to the impressions (without any material difference between them).

अपेक्षावृत्तवद्वस्तु यावत्किञ्चिदिहेक्ष्यते ।
मातृमात्राश्रयं तत्स्यान्न स्वतःसिद्धिनिष्ठितम् ॥१४८॥

Whatever is noticed here (i.e. in worldly activities/dealings) as a thing whose usefulness (*vr̥tta*) is dependent (on) another (or, having expectation of another), is only based/abiding in the knower (i.e. sentience within) and (therefore) it would not be established by itself.¹ [148]

This explains away the nature of the world (or, transmigratory existence) as coming of its own; refer to *vastusvābhāvya* in verse 82 above—cf. *vastusvābhāvya* BUB on 3.4.2 (p.422).

¹That is, it has no existence on/of its own.

अन्तःकरणवृत्तिर्या चक्षुरादिसमाश्रया ।

रूपादिविषयाभासा लौकिकी दृष्टिरुच्यते ॥१४९॥

The popular conception is what is known/called as the function¹ of the internal organ,² that depends (lit. rests) on the eye etc.³ and which is in the form of the appearance of the object such as form.⁴ [149]

¹This refers to modification.

²This refers to *buddhi* and *manas*.

³This refers to the other external organs.

⁴This refers to the objects of other sense-organs.

तस्याश्च क्रियमाणत्वाज्जन्मनाशाभिसंगतिः ।
आत्मदृष्टिस्त्वयं नित्या जन्मनाशादिवर्जिता ॥१५०॥

And, since it is being created, therefore it has a close (*abhi*) association with the origin and the destruction. And, as against that, this perception by the Ātman is ever-abiding and not associated with the origin and the destruction etc.¹ [150]

¹The word 'etc.' refers to the other modifications beside *janman* and *nāśa*; viz. *bhāvavikāras*.

कार्यकारणयोस्तत्त्वं प्रत्यगात्मा चितिर्यतः ।
तस्मान्नित्यश्चिदाभासो बुद्धौ तत्प्रत्ययेषु च ॥१५१॥

Since the real nature of what are known as effect(s) and cause(s) is the inner self, the sentience, therefore, there is invariable (*nitya*) appearance of the sentience in intellect and its cognitions. [151]

प्रत्यक्चिदुपरक्तायां बुद्धौ धर्मादिहेतुकः ।
आकारो जायतेऽनित्यो दुःखशब्दादिलक्षणः ॥१५२॥

There is ever produced on intellect, which is tinted by sentience within, the form characterized by sorrow, word etc. that is

caused by Dharma etc.

[152]

स्थास्नौ प्रत्यक्चिदाकारे बाह्यहेतुनिबन्धनः ।
आकारो जायते बुद्धेरागमापायधर्मवान् ॥१५३॥

(Also) there is ¹ produced, in the eternal shape of the sentience within, a certain form related to (i.e. determined by) the external cause(s), which has the properties of the origin and the destruction (which are really of) intellect. [153]

¹It means: it appears to be

उपाधिभूतया दृष्ट्या हानोपादानरूपया ।
एकाश्रयत्त्वतः स्थास्न्वी संसृष्टेवोपजायते ॥१५४॥

That ever-abiding sentience appears affected as it were by the (proper) perception which has become its limiting adjunct and which is of the nature of abandoning and receiving (i.e. grasping some things), on account of its having the same substratum (as intellect), viz. the body. [154]

There follows the explanation of *sā*

बुद्धितद्वृत्तिसाक्षित्वाद्बुद्धितत्प्रत्ययैरजः ।
गृह्यतेऽविद्ययाभिन्नो मणिर्यद्वदुपाश्रयैः ॥१५५॥

Owing to ignorance, the unborn (sentience) is taken to be non-distinct from intellect and its modifications, owing to its ¹ character of being the witness of the same, in the same way as a jewel appears to be affected by what are reflected ² in it. [155]

¹That is, of the unborn sentience.

²Literally, what have resorted to it.

कर्तृकार्यावभासित्वात्कर्तृकार्याभिधायिभिः ।

लक्ष्यते नामभिः साक्षी साक्षात् त्वभिधीयते ॥१५६॥

The witness is indicated by the names that express (what is meant by) the agent(s) and (their) effect(s), because it makes known (lit. brings light to) the agent(s) and the effect(s). Yet, it is not (so) called directly. [156]

तज्जन्मनाशसाक्षित्वादजोऽनाशी स्वयंप्रभः ।
जायते नश्यतीत्येवं तत्साक्ष्यप्यभिधीयते ॥१५७॥

(Thus,) the unborn, the imperishable, the self-luminous is said to be born and to perish on account of being the witness of the origin and the destruction of that,¹ even though it is merely the witness of the same. [157]

¹This refers to what have been referred to in the preceding verse.

दृष्टेर्जडस्वभावायाः परार्थायाः स्वतश्चितिम् ।
न पश्येः प्रत्यगात्मानं द्रष्टारं दृश्ययानया ॥१५८॥

You will not (be able to) see¹ the inner self, the seer, which is, in its own right, sentience by this visible (sight), which is insentient in nature and is subservient to another. [158]

This gives the meaning of *na dr̥ṣṭer*

¹Literally, you may not see.

दिदृक्षितपरिच्छिन्नपराग्नूपाद्यपेक्षया ।
तद्विरुद्धं कथं पश्येर्दृष्ट्या तत्कर्मभूतया ॥१५९॥

How will you (be able to) see (that), which is opposed to what is visible by the sight of what has become the object of sentience, what is dependent on external for seeing etc. and what are limited and (are yet) sought to be seen. [159]

द्रष्टुर्हि व्यापृतिर्दृष्टौ दृष्टे रूपादिकर्मणि ।
ताभ्यां तत्प्रत्यगात्मानं कथं पश्येत्चित्तिं स्वतः ॥१६०॥

Indeed the function of the seer is seen in the sight,¹ in respect of what is seen, viz. the object such as form etc. (Therefore,) with these two, how can you see the inner self, viz. the sentience itself?

[160]

नाकारकं समीक्षेत द्रष्टृदर्शनगोचरान् ।
कारकत्वमृतेऽविद्यां कूटस्थस्यात्मनः कुतः ॥१६१॥

How can that, which is not connected with any activity (*akāraka*), see the object of the sight of the seer? How can there be on the part of the immutable Ātman any character of one which is connected with activity, unless there is ignorance?

[161]

कारकं सत्तथैकात्म्यं न कथं चन वीक्षते ।
अविद्यानन्वयाद्वास्वत्प्रत्यग्ज्योतिःसतत्त्वतः ॥१६२॥

Also, the existent (even if it is) connected with activity, can in no way see the singleness of the Ātman, because of its non-connection with ignorance and (also) because of its being, by the nature of itself, the flame within.

[162]

येन चक्षुरिदं दृष्टं चक्षुषा यत्र पश्यति ।
ब्रह्म विद्धि तदेव त्वं न तु तद्यदुपासते ॥१६३॥

Do you know that alone as the Brahman, on account of which this eye is seen and that which the eye does not see, but not that which they worship (as the Brahman).

[163]

It shows the agreement of the sentence *na dr̥ṣṭer* ... with another Śruti; cp. *Kenopaiṣad* 1.5 and 7.

मनसा मनुते यत्र येन चाहुर्मनो मतम् ।

ब्रह्म विद्धि तदेव त्वं न त्विदं यदुपासते ॥१६४॥

Do you know only that as the Brahman, which cannot grasp (any object) with the help of *manas* and that by which, they have said, *manas* is understood. Do you know that alone as the Brahman and not that which they worship (as the Brahman). [164]

Cp. *Kenopaniṣad* 1.6.

इत्येवमादिवाक्यानि यथोक्तार्थसमर्थने ।
श्रौतानि शतशः सन्ति दृग्मेयत्वसिद्धये ॥१६५॥

There are hundreds of the Śruti sentences, (like those mentioned above) as beginning with these (words) and others (are) in support of what is stated, i.e. for proving the imperceptibility of the seer.¹ [165]

¹This refers to the Ātman.

एतन्मोहसमुत्थत्वात्प्रमात्रादेर्मनागपि ।
नैकात्म्यं शक्यते द्रष्टुं क्लृप्तहेतोरबाधया ॥१६६॥

It is not possible to see,¹ even to a (very) little extent, the singleness of the (worldly) seer and others,² because of their having arisen from the delusion about this (inner self), because of their being (only) imagined—(and this) without being unstultified.³ [166]

So far, Sureśvara explained the passage *na dr̥ṣṭeḥ* ..., following BUB.

¹The AnSS edition reads *vaktum*, but we adopt *draṣṭum* which is noted as a variant reading in the AnSS edition and which is confirmed by NKL edition also, for, it yields better sense.

²This refers to *pramātr* etc.

³Sureśvara uses the unusual word *abādhā* for *abādha*.

Now follows in verses 167-174 the explanation by *Bhartṛprapañca* of *na dr̥ṣṭeḥ*

दृष्टिभेदमकृत्वैव दृष्टेरित्यादिकां श्रुतिम् ।
केचिद्व्याचक्षते धीराः प्रसादाज्जातवेदसः ॥१६७॥

(But) some intelligent scholars,¹ owing to the favour of Agni, explain the Śruti passage beginning with (*na*) *dr̥ṣṭer* ... without differentiating the (popular) seer (and the actual) seer.² [167]

¹Translation also retains the plural which Sureśvara has used for the singular, referring to *Bhartṛprapañca*.

²The word *dr̥ṣṭibheda* is understood here as *dr̥ṣṭyoh bhedaḥ*.

दृष्टेः कर्तारमात्मानं न पश्येः क्रियमाणया ।
दृष्ट्या रूपानुपातिन्या न क्रिया कर्तृकर्मिका ॥१६८॥

You do not see the agent of the activity of seeing, viz. the Ātman by your act of seeing which you are performing (lit. is being performed by you) and which follows the forms (to be seen). (And) the activity cannot (lit. does not) have the agent for an object. [168]

दृष्टेरिति च षष्ठीयं क्रियमाणत्वहेतुतः ।
कर्मण्येव तु विज्ञेया नासावर्थान्तरे यतः ॥१६९॥

And, since the genitive in the form *dr̥ṣṭeḥ* has to be understood in the sense of the object, the activity of seeing is being performed, for it does not belong to anything else.¹ [169]

¹The implication of *karmani ṣaṣṭhī* is that there is no subject-object relation. *dr̥ṣṭi* stands for both *draṣṭṛ* and *dr̥śya*.

दृष्टिकर्तृत्वमाचष्टे तृजन्तेन तथात्मनः ।
यतोऽतः कर्मदृष्ट्या तं द्रष्टारं नानुपश्यति ॥१७०॥

So also he explains the nature of the agent in the act of seeing (by the use of form of the verb root *drś*) which ends in suffix *tṛc*, viz. as that of the Ātman. Since this is so, Uṣasta does not see the seer. [170]

कर्मेप्सिततमं रूपं दृष्टेः कार्यत्वहेतुतः ।
चक्षुर्मनो वा बुद्धिर्वा कर्तुः करणमिष्यते ॥१७१॥

The most desired (thing), viz. the object (of the action) of seeing, is the form, for the reason that it is to be accomplished. An eye, or *manas*, or intellect is accepted (lit. desired) as the means of the agent. [171]

विज्ञानात्मा तु कर्तात्र स्वातन्त्र्यात्सर्वकर्मसु ।
फलं रूपोपलब्धिश्च कर्तुर्दृष्ट्यवसानजम् ॥१७२॥

And, the inner self is here the agent because of its liberty with reference to all actions (to be performed by it) and the result is getting (to know) the form which comes (into effect) at the agent's (act of) seeing. [172]

साधनत्वेन कर्तात्र दृष्टाववसितिं गतः ।
क्रियासिद्ध्युत्तरे काले फलं कस्यापि वेष्यते ॥१७३॥

In this, viz seeing, the agent has (finally) become (lit. ended in becoming) the means (of seeing).¹ (And) in the time after the activity (of seeing) is accomplished, the result is desired² to accrue to anyone. [173]

SP appears to quote Bhartṛprapañca while explaining the word *sāadhanatvena* in the words *uktaṃ hi kriyāsāadhanatvena viniyukta iti* and also, while explaining *kriyā*, *uktaṃ hi kriyāsiddhyuttarakāle phalaṃ kasyāpi bhaviṣyatīti*.

¹The actual agent, viz. sentience, appears to have become instrumental, i.e. subordinate, in the activity of seeing.

²This indicates that sentience comes to have or enjoy (to say so) the result, i.e. it becomes the *phalin*, or the *svāmin* as mentioned in the next verse.

स्वामिनो यदि वान्यस्य कर्म प्रत्येव च क्रिया ।
कर्म दर्शयितव्यं स्याद्दृष्ट्या द्रष्टा न दृश्यते ॥१७४॥

That activity towards its object (i.e. result) can be (said to be) of the master¹ or someone else;² (but) the object³ has to be pointed out (and) the seer is not seen by the means/act of seeing. [174]

This is for explaining *kasyāpi* in the preceding verse.

¹This is sentience (*jīva*) within.

²That is an adjunct (*upādhi*) of sentience.

³Read SP for clarity of the idea: *kriyā hīpsitatamaṃ karma praty abhimukhībhūtety uktatvāj jñānaṃ saṃvedanapalakaṃ kriyā sā rūpādiviṣayā nātmaviṣayety arthaḥ*.

तत्रैवं सति तं दृष्टेर्द्रष्टारं कर्मभूतया ।
दृष्ट्या पश्येः स्वमात्मानं न कथं चन कर्तृतः ॥१७५॥

This being so, you may see the seer of the seeing with the help of (or, by the means called) the organs of seeing—but, in no way, your own self (i.e. the inner self) as the agent (of seeing). [175]

This concludes the statement about result of what is called seeing.

Now follows the refutation of the view of *Bhārtrprapañca*.

व्याख्यानमेतन्महतां न साधु प्रतिभाति नः ।
न्यायाक्षरानुपात्तत्वाद्यथा तदभिधीयते ॥१७६॥

This explanation of the great (masters) does not appear to

us proper. How this is so, because of their non-acceptance of reasonable arguments is (now) stated. [176]

यथाप्रश्नमियं तावत्प्रत्युक्तिर्नोपपद्यते ।
यतो द्रष्टर्यसंभाव्यं कृत्स्नं प्रश्नविशेषणम् ॥१७७॥

To begin with, this answer to the question which is asked does not stand to reason, since all the specifications¹ (mentioned) in the question are not possible (to find/obtain) in the (case of the) seer.² [177]

¹The singular (-*viśeṣaṇam*) in the question is for the plural (i.e. *jātāv ekavacanam*).

²This refers to the inner self, i.e. the Ātman. This is understood from the next verse.

साक्षादित्यादिकं यस्मान्न मनागपि युज्यते ।
विशेषणं यथोक्तं तत्कारके दृष्टिकारिणि ॥१७८॥

(This is so) since the specification, viz. that which begins with (the word) *sākṣāi* etc., as stated (in the question), is, not even a little of it, reasonable in the case of that which causes the (act of) seeing, viz. the agent. [178]

क्षेत्रज्ञपरमात्मानौ नापि प्रश्ने विवक्षितौ ।
एकार्थयोगाद्वाक्यस्य नैकोक्तौ स्याद्द्वयार्थता ॥१७९॥

Also, (both) the knower of field and the highest Ātman, were not referred to¹ in the question, since (the rule is that) a sentence has only one (meaning to convey) and (therefore) it cannot have (i.e. convey) two things (or, meanings) when (only) one is mentioned (or, stated).¹ [179]

¹That is, it was not the intention of the questioner to convey both of them.

²Read SP: *arthaikatvād ekaṁ vākyam iti nyāyāt*. That means:

the sentence *sākṣāt* ... can refer only to the individual self, or to the Ātman; here, the former!

न चेप्सिततमत्वं स्याद्द्रष्टुर्दृष्टेरसंभवात् ।
दृष्ट्यन्तरस्य द्रष्टुश्च न च द्रष्ट्रन्तरं तथा ॥१८०॥

Also, there is not, in respect of the seer, the nature of being the most desired thing, since there is not the seeing (of it) possible and also there is not any other act of seeing with respect to that seer by another seer. [180]

¹This refutes the nature of *dr̥ṣṭi* '(act of) seeing' as an object obtained by the agent (viz. *draṣṭr*) that being based on the notion of the genitive as expressive of an object (*karmanī ṣaṣṭhī*).

तदभ्युपगमे वः स्यादनवस्थानिवारणा ।
दृष्ट्यन्तरेण संव्याप्तिर्नातो दृष्टेः कथं चन ॥१८१॥

In case you accept that,¹ there would be unavoidable *infinite regress*, therefore, there will not be, in any way, the pervasion of one seeing by another seeing. [181]

¹This refers to two (acts of) seeing and two seers.

तथा द्रष्टृगृहीत्यैव कामितार्थसमाप्तिः ।
निरर्थकमिदं च स्याद्दृष्टेरिति यदुच्यते ॥१८२॥

And, by the acceptance of an other seer in that way, the desired thing¹ (or, result) would have been achieved (lit. obtained)¹ and, therefore, (it would follow that) this (statement), viz. what is said in *dr̥ṣṭeḥ* ..., would be meaningless. [182]

¹This refers to (the act of) seeing.

²Read SP: *yathā dr̥ṣṭer iti ṣaṣṭhī na karmanīty uktam tathā draṣṭety api kartari na sambhavatīti*.

सदैवाव्यभिचारित्वाद्दृष्टिद्रष्ट्रोः परस्परम् ।
विशेषणविशेष्यत्वं व्यभिचारे सतीष्यते ॥१८३॥

(This is so) because both seeing and seer cannot exist without each other. The relation of qualifier and qualified is accepted only when they exist apart from another.¹ [183]

¹On this, SP gives the example of the word *nīlotpala* which means that *nīlatva* and *utpalatva* would be invariably connected with each other. One cannot think of *nīlotpala* in the absence of either *nīla* or *utpala*.

न च प्रमादपाठोऽयं सर्वेषामविगानतः ।
विध्यशेषत्वतो नापि चार्थवादत्वमिष्यते ॥१८४॥

This is not a mistaken reading, because all the followers¹ (of this Upaniṣad) have not (shown) any difference in (respect of) their recitation² of it. [184]

¹Supply: of both Kāṇva and Mādhyandina recensions.

²*avigāna* is 'absence of *vigāna*' where *vi* stands for variety but better twofold, therefore, *avigāna* means twofold recitation.

³The translation of *vidhyaśeṣatvato* is only tentative—there is not certainty about its correctness.

अहंद्दृष्ट्यधिगम्यत्वमपि द्रष्टुरिहेष्यते ।
प्रत्यक्षमाविरुद्धत्वं तथा चोक्तैः प्रसज्यते ॥१८५॥

Here (i.e. in this) is accepted (lit. desired) the nature of the seer as what can be known (or, understood) through (the acceptance of) the notion of *aham* 'ego'; (and) then, in that case (*tathā*) there follows contingently the opposition to the directly perceived knowledge. [185]

मेयमानप्रमातृणां प्रात्यक्ष्यं प्रागपीरितम् ।

व्याख्या व्यरोधि तेनेयं दृष्टेरित्यत्र या कृता ॥१८६॥

It has been earlier said that the object to be known, the means of knowing, the agent of knowing are all directly perceptible, therefore, this your explanation which you have offered in respect of the statement *dr̥ṣṭeh* is opposed. [186]

This makes reference to verse 169.

यथोक्तादात्मनोऽन्यद्यत्कार्यकारणरूपकम् ।
आर्तं विनाशि तत्तुच्छं शुक्तिकारजतादिवत् ॥१८७॥

Anything else than the Ātman, about which there is the statement made, viz that which is of the nature of cause and effect, that is afflicted, and perishable is insignificant just like silver in the shell etc.¹ [187]

¹This refers to other well-known instances of superimposition.

एतदेवमनार्तं स्यात्स्वतःसिद्धत्वकारणात् ।
सदैकानुदितालुप्तप्रत्यग्दृष्टिसतत्त्वकम् ॥१८८॥

Thus, this is ever unafflicted, for the reason that it has established itself, in its own right—(this one) which is ever single,¹ which has not come into existence² and which, in its nature, is such that it has not lost the awareness (lit. seeing) of being the inner self. [188]

b:

¹That is, without a second or without duality.

²That is, which does not originate from anything else.

हेतूक्तिरथवातः स्यादुक्तवस्तुस्वभावतः ।
तदन्यभावासंसिद्धेरार्तत्वं हेतुमद्भवेत् ॥१८९॥

Or, this is¹ therefore the statement of the reason, viz. it is the nature of the thing (viz. reality)² which has the nature

of being (ever) existent, (just) single,³ unborn⁴ and having
a never-lost awareness of the inner self. [189]

¹Literally, would be.

²That is, the Ātman.

³That is, not having any second.

⁴That is, unoriginated.

इति श्रीबृहदारण्यकोपनिषद्भाष्यवार्तिके तृतीयाध्यायस्य
चतुर्थं ब्राह्मणम् ॥४॥

BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA

3.5

Kahola Brāhmaṇa

Sureśvara gives his ideas about the connection of the fifth Brāhmaṇa with the earlier Brāhmaṇa of the third chapter.

आदावभिहितं सर्वं बन्धनं सप्रयोजकम् ।
अस्तित्वव्यतिरिक्तत्वे बद्धस्य च विनिश्चिते ॥१॥

In the beginning¹ is stated (about) the bondage in its entirety together with its causative factors.² And further³ were determined the existence and the distinction of the one who was in bondage,⁴ (as apart from the highest Ātman). [1]

¹This refers to the contents of BU 3.1-3.3.

²This refers to the transmigratory existence with the various actions and results etc. which are associated with the individual self.

³In the fourth Brāhmaṇa.

⁴Transmigratory self (i.e. the individual or inner self) which is shown as existing apart from the highest Ātman. Incidentally, this refers to the desire for liberation on the part of the individual self.

संसारानर्थसंप्राप्तिहेतोर्विध्वस्तयेऽधुना ।
संन्यासैकसहायात्मयाथात्म्यज्ञानमुच्यते ॥२॥

Now it is for the removal (lit. destruction) of the cause(s) which are the causes of the occurrence of the undesirable transmigratory existence (of the inner self) that there is stated the true nature of the Ātman which has renunciation alone as its aid.

[2]

This verse presents Sureśvara's idea of the contents of the fifth Brāhmaṇa.

उत्पन्नसम्यग्ज्ञानस्य संन्यासो लक्षणं यतः ।
साधनं च तदुत्पत्तौ संन्यासोऽतोऽत्र भण्यते ॥३॥

Since renunciation is the characteristic of one in whom the right knowledge¹ has occurred, here is therefore stated the means to the rise of that.² [3]

¹This refers to the knowledge of the true nature of the Ātman. The use of the word *samyagjñāna* is in conformity with the practice of the writers on philosophical matters during 4-5 centuries around Sureśvara.

²This is *samyagjñāna*.

प्रवृत्तिलक्षणो योगो ज्ञानं संन्यासलक्षणम् ।
तस्माज्ज्ञानं पुरस्कृत्य संन्यसेदिह बुद्धिमान् ॥४॥

'Yoga has activity as its (main) characteristic and knowledge is characterized by renunciation. Therefore, an intelligent person in worldly existence (*iha*) should renounce, keeping knowledge as the principal thing in view.' [4]

This verse appears to be a quotation, as NKL mentions this as a *vākyāntara*, viz. *smṛtivākyam* (as the edition of NKL points out).

Now follows in verses 5-14 the statement of *Bhārṭṛprapañca*'s opinion on the issue discussed above.

उषस्तप्रश्न एवायं कहोलेनापि पृच्छ्यते ।
तत्किमर्थं पुनः प्रश्नः स एव कृतनिर्णयः ॥५॥

A question can be asked: 'In this Brāhmaṇa is asked by Kahola

the same question as asked by Uṣasta in the earlier Brāhmaṇa; therefore, why this question again, when its decision is already made?' [5]

प्रष्टृभेदाददोषश्चेन्मैवं प्रत्युक्तिभेदतः ।
एकार्थप्रश्नवाक्यस्य ह्येका प्रत्युक्तिरिष्यते ॥६॥

(The answer is:) 'If one were to say that, "this is not a fault, since there is difference between two questioners", let this not (be said) owing to the difference in the two answers. One should note that (there is only one (uniform or the same) answer desired in the case of a statement related to only one question.' [6]

Bhārṭṛprapañca sets aside the *praṣṭṛbheda* in relation to one and the same question as the basis of setting aside the notion of repetition, because there is *pratyuktibheda*. In BU 3.4, the *pratyukti* 'answer' was *na dr̥ṣṭeḥ draṣṭāram paśyeh* ... while, in BU 3.5, the answer is *yo 'śanayāpipāse śokam moham jarām mṛtyum atyeti*.

पुनरुक्तं न च न्याय्यमेकप्रवचने क्वचित् ।
न चेह लौकिको जल्पः प्रष्टृभेदो यतो भवेत् ॥७॥

Nowhere¹ in one single exposition² is repetition reasonable. Further, this is not a single popular discussion (*jalpa*)¹ where there could be a difference of questioners (that would result in avoiding repetition). [7]

SP points out that the differences of speakers can be understood in popular conversations since it is merely based on imagination (i.e. wrong notions), but there is no real difference of speakers in *apauruṣeya śruti*.

¹This refers to *śāstrīya* and *laukika vyavahāras*.

²This refers to the branch of Vedic learning according to SP.

³The word *jalpa* should not be understood in its Nāya sense. It is to be understood as a mere conversation among people on some matter.

समानशब्दौ तेनेमौ स्यातां भिन्नार्थवाचकौ ।
कहोलोषस्तवक्त्रोक्तौ प्रश्नाविति विनिर्णयः ॥८॥

Therefore, the decision is that the two questions coming from the mouths of Kahola and Uṣasta are expressive of different meanings, even though they have the same¹ expressions in them. [8]

¹In Vedic language *samāna* means only *eka*; Sureśvara uses the word in the same sense.

क्षेत्रज्ञात्मानमप्राक्षीदुषस्तो न परं पदम् ।
अप्राक्षीत्परमात्मानं कहोलोऽपि न दुःखिनम् ॥९॥

(To explain:) Uṣasta asked about the Ātman which is the knower of the field and not (that which is) the highest being (lit. place). Also Kahola put a question about the highest Ātman and not the one who is grief-stricken. [9]

It seems that Sureśvara has based verse 9 on some statement in Bhartṛprapañca's Bhāṣya on BU thus: *yathāhuḥ pūrvah praśnah paramātmaviṣeśo 'yam vijñānātmaviṣaya iti. pīrva* refers to Kahola in verse 8 and, consequently, the second question is understood as coming from Uṣasta. SP refers to the Bhāṣya on Mādhyandina recension in this respect.

एकदेश उपन्यासादैकार्थ्यमवसीयते ।
मिथःसंकीर्णधर्मोक्तौ यथायोगं व्यवस्थितिः ॥१०॥

The oneness of the two meanings (of the two questions) is determined by their introduction into one part (of the instruction).¹ (And) with respect to the statement of properties

of both, being mixed together, there should be the division of the same in a suitable way (*yathāyogam*).² [10]

¹This refers to *ekapravacana* in verse 7 above. Also *ekadeśa upanyāsāt* refers to the same idea.

²This literally means 'in a way' as the contexts would demand.

Verses 11-12 explain the nature of the word *mithaḥsaṅkīrṇa-dharmoktau* in verse 10.

यदन्तरतमत्वं प्रागुक्तं तत्परमात्मनि ।
तदेकदेशाभिहितेर्विज्ञानात्मानमेष्यति ॥११॥

What was stated as being the innermost (or, nearest) with reference to the highest Ātman can belong to the *vijñānātman* also because of the statement (*abhihiti*) about it in the same portion (*ekadeśa*). [11]

Read SP: *ekasmin prakaraṇe dvayor ukter antaratamatvam paramātmāny ucyamānaṃ vijñānātmani siddham bhaviṣyatīti tadukter ity arthaḥ*.

शोकमोहाद्यतीतत्वं प्रकाशात्मकता तथा ।
विज्ञानात्मनि चोक्तापि परमात्मानमेष्यति ॥१२॥

So also, the nature of being beyond grief and delusion and also the nature of being self-illuminating, though stated in respect of the inner self, would belong to the highest Ātman (as well). [12]

This verse follows the reasoning in verse 11. That is to say, in verse 11, the properties of the *paramātmān* were extended to the *vijñānātman* and, in the same way, in verse 12, the properties of the *vijñānātman* are extended to the *paramātmān*. This brings out the significance of NKL (*imaṃ nyāyam anyatra yojayati*). *nyāya* means 'way' only here.

Whatever was mentioned in regard to the *vijñānātman* in BU 4.3 (Jyotis Brāhmaṇa) is extended to the *paramātman*.

पञ्चमाध्यायशेषेण परमात्मविनिर्णयः ।
षष्ठे तु वक्ष्यतेऽध्याये विज्ञानात्मविनिर्णयः ॥१३॥

There is decision (about the nature of the *paramātman*) as a part (viz. remainder) of the fifth chapter (according to the modern count, the third chapter); and the sixth one (viz. the fourth) will be stated as decision regarding the nature of the *vijñānātman*. [13]

SP, while explaining last line, refers possibly to Bhartṛprapañca's comment; *uktaṃ hi pañcamādhyāyaśeṣeṇa paramātmmano nirṇayo vakṣamāna iti* and, introducing the second line, it comments *jyotir brāhmaṇāder uṣastaprakaraṇaikavākyatām āha ṣaṣṭhe tv iti*. Also it states *yathāhuh śāṣṭheṇa vijñānātmana iti* (possibly again Bhartṛprapañca's words).

उपन्यासो द्वयोरत्र विज्ञानात्मपरात्मनोः ।
व्यज्ञाय्यपुनरुक्तत्वं न्यायमार्गसमाश्रयात् ॥१४॥

Thus is known here the introduction (of the ideas) of the *vijñānātman* and the *paramātman* and thus is there absence of repetition on account of resorting to the way (*nyāya*) (as we have shown). [14]

This is Bhartṛprapañca's conclusion regarding the connection of BU 3.5 to the earlier portion of BU.

Now follows in verses 15-54 the refutation of Bhartṛprapañca's view. There is an affirmation that two questions pertain to just one reality, viz. the *Ātman*.

इति व्याचक्षते केचित्प्रश्नावेतौ यथोदितौ ।

Thus have (some scholars) explained these two questions as have been mentioned. [15ab]

न सम्यगेतद्व्याख्यानं यथा तदभिधीयते ॥१५॥

But this exposition of them is not proper. How this is so is now explained (lit. stated). [15cd]

प्रत्युक्तेरेष त इति प्रश्नयोरुभयोरपि ।
क्षेत्रज्ञपरमात्मानौ नात्रात्मानौ विवक्षितौ ॥१६॥

From the answer *eṣa te* and also from both of the questions (let it be understood that) here¹ are not intended (the two, viz.) the knower of the field and the highest Ātman. [16]

This is Sureśvara's remark pertaining to the answer stated in BU 3.5.

¹This is for *pratyukti*.

प्रश्नोक्तिरेकरूपा च प्रत्यभिज्ञायतेऽञ्जसा ।
प्रत्युक्तिश्च तवात्मेति भिन्नार्थे वचसी कथम् ॥१७॥

It is clearly (or easily) understood (lit. recognized) that the statement of the question (in both the Brāhmaṇas) is of one and the same form (and therefore¹) how could the two statements, viz. the answer in the words *tava ātmā* be the conveyer of different meanings? [17]

¹Read SP: *praśnaikarūpya samuccayārthaś cakārah*.

एकत्र च न संभाव्यावात्मानौ द्वौ शरीरके ।
आत्मप्रत्यय एकार्थस्तथा श्रुतिवचांस्यपि ॥१८॥

There is no possibility (of the existence) of two Ātmans in one abode (*ekatra*), viz. the body; also (*tathā*) the awareness of the Ātman (on the part of an individual) can be (i.e. is)

on account of only one thing (*arthah*); also, there are statements in the Śruti¹ (to this very effect). [18]

This is yet another argument of Sureśvara, viz. the two sentences forming the answers in the two Brāhmaṇas do not refer to different things or objects (*artha*). SP points out that the argument in this has in view the notion of the differences in the two Ātmans on account of different conglomerations (of organs etc.), in accordance with the principle (*nyāya*) understood in the *guhādhikaraṇa* (BSB 1.2.11-12)

¹SP and NKL point to but one verse *eko devaḥ sarvabhūteṣu ...* (Śvetāśvataropaniṣad 6.11). Cp. *Kāthopaniṣad* 1.2.1ff.; 1.3.1; (the basis of the *guhādhikaraṇa*) *Taittirīyopaniṣad* 2.1; *Muṇḍakopaniṣad* 3.1.1; *Gītā* 13.2.

एकात्मकाः सर्वदेहा विवादो येष वर्तते ।
शरीरत्वाविशेषत्वात्प्रतिवादिशरीरवत् ॥१९॥

All the bodies (of individuals) in respect of which there is dispute (regarding the existence of different selves in them) have only one Self, since there is non-distinction in respect of their being a body even as there is a body of the opponent (or, disputant, *prativādin*). [19]

This has reference to SV.

सर्वान्तरावसानस्य साक्षादित्यादिकस्य च ।
ऐकार्थ्यात्प्रश्नवाक्यस्य नात्मानौ द्वौ विवक्षितौ ॥२०॥

There are not intended to be expressed two (different) Ātmans (in the question) because the sentence forming the question has only one object (meaning) to convey, viz. what ends in (the statement about) who is inside all and who is directly perceptible etc.¹ [20]

¹Namely, *gauṇa* 'metaphorical' and *aparokṣa* (which are

expressed in the next verse in the word *avyavadhānāt*).

अगौणाव्यवधानादिविशेषणविशेष्यता ।
नानेकस्यात्मनो न्याय्या तदसंभवहेतुतः ॥२१॥

It does not accord with reason to say that there is a statement of more Ātmans than one, which are the substantives of the attributes *agaṇa* and *avyavadhāna* etc., as their specifiers; since there is impossibility of them (being so). [21]

In the answer that is given to the questions of both BU 3.4 and 3.5, the words *agaṇa*, *avyavadhāna* etc. are used as adjectives of only one Ātman which can be only one and not more than one. The thought is: *agaṇa* means 'not subordinate (to any one else)'. This is not possible in respect of more Ātmans than one. Similar is the case of *avyavadhāna* etc.

व्यर्थोपनिषदारब्धिर्यदि भेदो भवेत्तयोः ।
अनिर्मोक्षप्रसक्तिश्च क्षेत्रज्ञपरमात्मनोः ॥२२॥

If there were meant difference between the two individual self and the Ātman, then the activity¹ of Upaniṣad would be futile and also there would contingently follow the absence of liberation for the knower of the field and the highest Ātman.² [22]

¹*ārabdhiḥ* is *ārambhah*. for *ārabdhi* is in the sense of activity, see *Raghuvaṃśa* 2.31: *vāmetaras tasya karaḥ prahartuś citrārpitārambha ivāvatasthe*.

²This refers to its condition of being overpowered by ignorance.

अकृत्स्नदृष्टिविषयो निषेधोऽपि न युज्यते ।
प्रविष्टस्य न चेत्कात्स्न्यं विज्ञानात्मन इष्यते ॥२३॥

Also it would not be reasonable to reject what is not the

object of incomplete (lit. not full) object, if completeness of the *vijñānātman* were not accepted in the case of (Ātman) who has entered (into a body). [23]

This verse has for its basis the rejection in BU 1.4.7: *sa yo 'ta ekaikam upāste na sa veda akṛtsno hy eṣo 'ta ekaikena bhavati*.

वस्तुवृत्तानुरोधेन नातो भेदोऽस्ति कुत्रचित् ।
वस्तुवृत्तानभिज्ञानाद्भेदः स्वप्नेन्द्रजालवत् ॥२४॥

Therefore, there is nowhere any distinction¹ (noticeable) if we follow (i.e. understand) the nature (*vr̥tta*) of the thing (viz. Ātman). There could be distinction² on account of non-recognition of the nature of the (real) thing (viz. the Ātman) like in a dream or magic show.³ [24]

¹Such as *vijñānātman* to be different from the Ātman.

²This refers to awareness of diverse object.

³Also, read Mammaṭa's *Kāvyaprakāśa*: *tathaiva tatra tasyeva* (Pāṇini Sūtra 5.1.116) *ity anenevārthe vihitasya vater upādāne* (*upamā*) and Bhīmacārya Jhalkikar's comment on the same, viz. *tatra tasyeva iti pāṇinisūtre tena tulyaṃ kṛyā ced vatiḥ* (Pāṇini Sūtra 5.1.115) *iti pūrvasūtrāt vatiḥ ity anuvartate* (*kṛyā ced iti tu nānuvartate*).

एक एव ततः प्रश्नो न प्रश्नद्वयमिष्यते ।
कंचिद्विशेषमापेक्ष्य पृष्ठो भूयोऽपि पृच्छ्यते ॥२५॥

Therefore, it is accepted that there is only one question and that there are not two of them; yet it is with some particular difference in view that this question, though already asked, is asked once again. [25]

उपदेशस्य विषयः प्रश्नप्रत्युक्तिवाक्ययोः ।
निरधारि पुरा तस्य याथात्म्यं त्वत्र पृच्छ्यते ॥२६॥

Earlier, there were determined the thing (i.e. the objects) to be imparted in the (two) sentences forming the question and the answer and here is now a query made about the true nature of that (Ātman). [26]

This verse points to the particular difference between the two answers of BU 3.4 and 3.5 to one and the same question. This is thus to justify the purport of BU 3.5 as distinct from that of BU 3.4.

These two verses now clarify the difference between the two answers in two Brāhmaṇas.

बुद्ध्यन्ताद्वयतिरिक्तोऽस्ति साक्षी प्रश्नस्य गोचरः ।
योग्यः प्रत्यङ्ङिति ज्ञेयः पूर्वप्रश्नार्थसंग्रहः ॥२७॥

The purport (lit. gist) of the first question is to be understood thus: The proper object of the question (and also of its answer) is the inner self, (viz.) the witness who is beyond (or above/apart from) the organs up to intellect.¹ [27]

The first three quarters of the verse clarify the intention of the question asked earlier, and also the answer to it.

¹Literally, the organs which end in intellect. That is, the external and the internal (viz. the threefold *antaḥkāraṇa*) organs.

अशनायाद्यतीतत्वं पूर्वोक्तस्यैव वस्तुनः ।
द्वितीयेनोच्यते तत्त्वं प्रत्यङ्मोहनिवृत्तये ॥२८॥

By (answer to) the second (question) is stated the real nature of the thing which is just the same as that stated in (the answer to) the earlier question, viz. being beyond hunger etc.—this for the sake of the removal of ignorance on the part of the individual (self). [28]

This explains: (*dvitīye tu*) *tasyaivātmano 'śanāyādisaṃsārādhara-*

mālītātvaṃ in BUB (p.428).

In brief it is stated that BU 3.4 pertains to proving the existence of the self as distinct from all the organs up to intellect and its being the witness within an individual. In the answer to the second question in BU 3.5 the emphasis is on pointing out its being beyond hunger etc.

यथाप्रश्नं प्रतिवचो न सम्यग्दितं परा ।
इति मत्वाथवाप्राक्षीत्पृष्टमर्थं पुनर्ऋषिम् ॥२९॥

Or, (perhaps Uṣasta) once again asked the sage (Yājñavalkya) about the same matter (in BU 3.5 here), after having thought that earlier a good answer was not made with reference to the question. [29]

This is another way of explaining the *raison d'être* of the question in BU 3.4.

This is clarified in the next verse.

साक्षादित्यादिना पृष्टं साक्षादित्यादिलक्षणम् ।
यथा संभाव्यते नेदृक्प्रत्युक्तौ किञ्चिदीक्ष्यते ॥३०॥

(That is to say:) There is not seen in this (lit. such an) answer like what is possible (as an answer, viz.) what (can serve as proper) description of the directly perceptible in respect of what is asked in the words directly perceptible etc. [30]

असंतोषात्कहोलोऽत उषस्तप्रश्नमेव तु ।
भूयोऽप्राक्षीन्मुनिं विद्वान्याथात्म्यार्थावबुद्धये ॥३१॥

Therefore, the learned Kahola asked the sage (Yājñavalkya) once again the same question as was asked by Uṣasta, because he was not satisfied regarding the first answer (and because) he wanted to secure (proper) knowledge of the true nature of the thing (i.e. the Ātman). [31]

एष आत्मेति प्रत्युक्तिर्यः प्राणेनेति चापरा ।
तावन्मात्रोक्तितो नासौ प्रश्नार्थोऽवधृतो भवेत् ॥३२॥

(This is to mean:) one answer is in the words *eṣa ātmā ...*¹ and the second in *yaḥ prāṇena ...*² (and therefore) from only that much of the statement there would not be fully understood the object of that question. [32]

This verse serves merely as a further clarification of the preceding verse.

The references to the Upaniṣadic sentences in the verse imply the unity of thought in various Upaniṣads (*sarvavedānta-pratyayatva*). (BSB 3.3.1-4, pp.734-749)

¹CU 8.1.16; 8.3.4-5; cf. *Maitrāyanyupaniṣad* 7.7.

²BU 1.4.1.

ननूर्मिषट्कातीतत्वं दुःखित्वं चाद्वयात्मनि ।
एकदैकत्र न स्यातां प्रकाशतमसी यथा ॥३३॥

(An objection can be raised:) But being beyond the group of six human infirmities (*ūrmi*)¹ and being miserable cannot be at one point of time and together (*ekatra*) in the non-dual Ātman as (there cannot be) light and darkness (together). [33]

¹This refers to the six human infirmities. They are *śoka*, *moha*, *jarā*, *mṛtyu*, *aśanāyā*, *pipāsā*— cf. *Bhāgavata Purāṇa* 10.70.17: *śokamohau jarāmṛtyū kṣutpipāse śaḍ ūrmayaḥ / prāviśad yanniviṣṭānāṃ na santy aṅga śaḍūrmayaḥ //*

नैष दोषस्तदज्ञानमिथ्याधीभ्रमहेतुतः ।
संसारितात्मनः क्लृप्ता कृष्णिमेव नभस्तले ॥३४॥

(The answer is:) 'No, this is not a fault because it is on account of the delusion caused by the absence of knowledge and the wrong knowledge (on the part of one) about that (viz. the

Ātman). That there is accepted the characteristic of a transmigratory being as darkness is understood (to be obtaining) on the surface of the sky. [34]

बृहद्विचारे सम्यक्च प्रागप्येतद्विचारितम् ।
विरुद्धागमविषयप्रविवेकप्रसङ्गतः ॥३५॥

And this was earlier discussed properly (i.e. in full) in our discussion of the SV¹ (and) where there was an occasion of setting aside the thought (*viṣaya*) of the opposed traditions (or theories).² [35]

¹Cf. *sambandhagranthe* as the note by the editor of NKL and cp. SV 111-126.

²Cf. SP: *madhubrāhmaṇānte*.

रज्जुत्वाहित्वयोर्यद्वदेकस्मिन्नपि वस्तुनि ।
स्वतस्तन्मोहतश्चैव संभवस्तद्वदात्मनि ॥३६॥
मुक्तत्वं च सितत्वं च परस्परविरुद्धयोः ।
धर्मयोः समवायः स्यान्न तु नीलोत्पलादिवत् ॥३७॥

As the characteristic of a rope and that of a serpent can of themselves become possible in the case of just one object because of the delusion (or ignorance) about that (thing), so (also) in respect of the Ātman, [36] there can be the simultaneous occurrence, *samavāya*,¹ of mutually opposite properties, viz. (in the words)² 'being liberated' and 'being in bondage' and (i.e. but) this cannot be as in the case of a blue lotus.³ [37]

¹This is not to refer to the invariable connection between properties and an object as understood in logic.

²Cf. SP: *sitatvaṃ cety asmād ūrdhvaṃ itiśabdādhyāhāraḥ*.

³Here, there is no specific mention of *nīlatva*, *utpalatva* which have to be understood for clearly apprehending the simile.

एवं विरुद्धधर्मत्वे न च दोषोऽस्ति कश्चन ।
 नामरूपादिसद्भावो दोषश्चेदिह चोद्यते ॥३८॥
 नेह नानेति वचनादेकमेवेति चोक्तितः ।
 नैवं परिहृतेस्तस्य मृद्दृष्टान्तादियुक्तिभिः ॥३९॥

Thus (*evam*)¹ there is no fault whatever even if (the inner Self and the Ātman) are taken to have mutually opposed properties. And, if there is pointed out here² a fault, viz. the existence of name, form etc.,³ [38]
 it is not so, since there is already a refutation of it from the Upaniṣadic statement *neha nānā*⁴ and *ekam eva*⁵ and so also from the reasonable illustration of clay⁶ etc. [39]

¹This is to refer to the condition of ignorance on the part of individual about the true nature of the Ātman.

²That is, in respect of the view of Advaita.

³The word 'etc.' points to activity.

⁴Cf. BU 4.4.19 = *Kāthopaniṣad* 4.11.

⁵CU 6.2.1.

⁶CU 6.2.1.

Now follows the refutation of Bhartṛprapañca's view proper in clear terms.

अगृह्यमाणं सत्तत्त्वं विपरीतमिवेक्ष्यते ।
 यथावस्त्वीक्ष्यमाणं तु यथावस्त्वेव वीक्ष्यते ॥४०॥

The existent thing (viz. reality), not being grasped (as it is) is grasped is stated (lit. seen) as it (really) exists. [40]

The use of verb root *īkṣ* has two ideas associated with it: (i) action of seeing which is merely physical and (ii) grasping (understanding) the nature of seeing.

यदत्र चोद्ये वक्तव्यं तत्पुरैवासकृद्बहु ।
 सम्यगुक्तं तदखिलमिह स्मर्तव्यमादृतैः ॥४१॥

What is to be stated with the (hypothetical) objection here in this regard, has been already¹ well stated many times at length;² or that is to be remembered by those who have a curiosity (lit. regard) for it (i.e. truth in it).³ [41]

¹SP refers to the statement in SV.

²Read SP: *tatroktasyālpavād buddhyasaūkaryam ity āśaṅkya āha (idam)*.

³This is for word *iha* which SP explains referring to doubt if there is duality and whether there is truth (*dvaitasatyatvaśaṅkā*).

अविचारितसंसिद्धिमोहोपहतचेतसाम् ।
अप्यद्वयं परं ब्रह्म द्वयवत्प्रथते मृषा ॥४२॥

(For) in the case of those whose intellect or mind is struck (or overpowered) by ignorance which is established even without a thought,¹ even the non-dual Brahman appears falsely as having duality (associated) with it. [42]

¹Translation is based on the variant reading noted in AnSS *avicāritasamsiddhamoho* Cf. verse 73 below.

The two following verses explain the significance of -vat in the word dvayavat in the previous verse.

यथा विशुद्धमाकाशं तिमिरोपप्लुतो जनः ।
संकीर्णमिव मात्राभिश्चित्राभिरुपलक्षयेत् ॥४३॥
तथेदममलं ब्रह्म निर्विकारमविद्यया ।
कलुषत्वमिवापन्नं भेदरूपं प्रकाशते ॥४४॥

As a person affected by (the disease of the eye called) *timira* sees the extremely (vi) clear sky as marked by (lit. scattered over by) variegated appearances¹ (of colours), [43]
similarly, this spotless Brahman which is without any modifications appears (*prakāśate*) to have acquired the nature of

distinct (appearances) since it has come to be soiled, owing to ignorance. [44]

¹We should mark here Sureśvara's peculiar use of *mātrā* which on other occasions means sense-organs—here it refers to the objects that are seen, viz. colours such as blue, yellow etc. (this is implied by the words *viśuddham* in verse 43 and *amalam* in verse 44. Read SP: *mātrābhir mīyamānanīlapītādiviṣayair iti yāvat*; also NKL: *mīyante iti mātrāḥ*, this clearly refers to the objects to be seen.

तस्यैकमपि चैतन्यं बहुधा प्रविभज्यते ।
अङ्गाराङ्कितमुत्पाते वारिराशेरिवोदकम् ॥४५॥

The sentience in it,¹ even though one, is divided variously (lit. into many), just like the waters of ocean, which are marked by various sparks at the time of the deluge. [45]

The mythical ocean has submarine fire covered underneath it. At the time of the deluge, that fire flashes forth in the form of sparks, marking the waters therewith.

¹This refers to Brahman in verse 44 above.

बाध्य एवात्मसंमोहो न त्वसौ बाधको यतः ।
प्रत्यग्याथात्म्यविज्ञानं न बाध्यं बाधकं यतः ॥४६॥

Ignorance about the Ātman is certainly to be stultified, since it is not indeed the stultifier; the knowledge of the true nature of the inner self is not stultified since it is the stultifier.¹ [46]

This verse is based on the doubt expressed only briefly by SP thus: *brahmaṇo 'vidyayā dvayavadbhāne 'pi tasyāṃ labdha-padāyāṃ vidyāyogān nānarthadhvastir ity āśanikyāha*.

¹Read SP: *na hi sati tamasi savitā nodeti tadvad vidya-mānāyām avidyāyām vidyā nānāvakāśā tathā ca sā svodaya-*

nānantarāyakatvenābodham dhunvatī tajjam api dhunotīti bhāvaḥ.

स्वभावानपहारेण संगतिः स्यात्ततस्तयोः ।

इति चेतसि संधाय सर्वयोगेश्वरेश्वरः ॥४७॥

मोहापनुत्तये प्राह प्रपन्नाय किरीटिने ।

बाध्यबाधकरूपं च न व्येतीति प्रकाशयन् ॥४८॥

या निशा सर्वभूतानां तस्यां जागर्ति संयमी ।

यस्यां जाग्रति भूतानि सा निशा पश्यतो मुनेः ॥४९॥

Therefore, having kept in mind that the two¹ are associated with each other, thanks to their own natures being unremoved, the Lord of the lords of all Yogas [47]

said to Arjuna (lit. Kirīṭin) who had submitted himself before him, for the removal of ignorance, (thereby) revealing (to Him) that the natures of the two are as the stultified and the stultifier: [48]

During that, which is night for all beings, a person with restraint (on himself) keeps awake. And that (period of time), during which beings are awake, is night for the wakeful (*paśyataḥ*) seer. [49]

Verse 49 is *Gītā* 2.69.

¹This refers to *vijñāna* and *avijñāna*.

ज्ञानाज्ञाने ततोऽपेक्ष्य व्यवहारोऽयमात्मनि ।

शास्त्रीयो लौकिकश्चातो विरोधोऽत्र न शङ्क्यते ॥५०॥

Therefore, depending on knowledge and ignorance about (the nature of) the Ātman (occurs there) this dealing (of the people), viz. that which is according to the scriptures and that which is popular. Therefore, there cannot be entertained in this regard any doubt that there is any opposition. [50]

उत्पन्नात्मप्रबोधानामात्माविद्यातदुद्भवम् ।

सम्यग्ज्ञानाग्निना नित्यं दह्यमानं प्रजायते ॥५१॥

In the case of those in whom there has arisen the (true) knowledge about (the nature of) the Ātman, ignorance about the Ātman together with its effect is ever (seen) to be burnt by the fire of right knowledge. [51]

Note SP: *tadīya* (= *jñāni*) *sarvavyavahārasya bādhitatvenānuvṛttir asakṛd ukteti bhāvaḥ* and also the editor of the NKL: *jñāninaḥ sarve 'pi vyavahārāḥ bādhitānuvṛttir iti bhāvaḥ*, since NKL points out *jñānino 'pi sarvasya vyavahāradarśanāt* as the *prima facie* objection.

ऐकात्म्यवस्तुयाथात्म्यमभिप्रेत्यात उत्तरः ।
साक्षादित्यादिकः प्रश्नो यदेवेतिपुरःसरः ॥५२॥

Therefore, the later question beginning with the word *sākṣāt* (and) preceded by (the words) *yad eva* has proceeded from the acceptance of the intention of the true nature of the thing which is of (uniform) nature of singleness. [52]

प्रत्याहैष त आत्मेति याज्ञवल्क्योऽपि पूर्ववत् ।
संभाव्यते यतोऽत्रैव साक्षादित्यादिलक्षणम् ॥५३॥

Yājñavalkya also answered, as before, *eṣa ta ātmā*, since that description (lit. definition) *sākṣāt* etc. is possible only here.¹ [53]

¹That is, in respect of the Ātman mentioned in the *ukti-pratyuktī* of the preceding Brāhmaṇa.

निःशेषनिर्णयोक्तीच्छुः कहोलोऽप्याह पूर्ववत् ।
कतमो याज्ञवल्क्येति स तं प्रत्याह शुद्धधीः ॥५४॥

Desirous (to hear) the statement which conveys complete decision, Kahola also asked, as before, *katamo yājñavalkya* ... (and he) of pure knowledge (lit. intellect) answered him. [54]

Now follows in verses 55-88 the exposition of *yo 'śanāyāpipāse*

....

योऽशनायापिपासादीन्धर्मान्सर्वान्विरोधतः ।
 अतीत्य वस्तुवृत्तेन स्वमहिम्नि व्यवस्थितः ॥५५॥
 अशनायापिपासे यस्तद्वेतोरत्ययात्सदा ।
 अत्येति वस्तुवृत्तेन स साक्षादिति गृह्यताम् ॥५६॥

The one who remains in its own greatness, viz. in the state of it (lit. the thing) as it is, transcending all the properties, viz. hunger, thirst etc. which oppose the same, [55]
 let that be understood as the Ātman that ever overcomes (lit. transgresses) hunger and thirst by its own nature (lit. by the nature of itself) since it overcomes the cause(s) (of the same).¹
 [56]

¹*taddhetoh* is the same as *aśanāyāpipāsāhetoh*.

शोकादासङ्गबीजाद्धि जज्ञाते ते यथोदिते ।
 इच्छाविशेषास्ताभ्यां च जज्ञिरेऽन्ये सहस्रशः ॥५७॥

Because indeed those two,¹ which are mentioned, have come from the seed, viz. grief and attachment, and from them proceeded in thousands (various) particular desires.² [57]

¹*aśanāyā* and *pipāsā*.

²This refers to *Gītā* 2.62cd: *saṅgāt sañjāyate kāmāḥ kāmāt krodho 'bhijāyate*.

आत्मात्येतीति' संबन्धो योऽशनायादिलक्षणान् ।
 क्रियार्थोऽत्येतिशब्दश्चेन्न क्रियार्थो विवक्षितः ॥५८॥

If it is said: 'In the statement, viz. the Ātman overcomes the objects such as hunger, there has been (used) the word *atyeti* which has the meaning of an activity'; then that is (to be

refuted as) not (being) so; it is (indeed) not intended to convey the meaning of an activity. [58]

औष्ण्यं शैत्यं यथात्येति वस्तुवृत्तेन सर्वदा ।
गर्ताद्यत्ययवत्त्वत्र न मानादुपपद्यते ॥५९॥

As reality (lit. thing) by its own nature ever overcomes heat and cold (so this is ¹); and here is it not reasonable (to accept the idea of) transgressing of some ditch by one; since there is the means (i.e. Śruti to convey that the Ātman does not do any activity). [59]

¹Namely, the Ātman overcomes

अशनायापिपासे द्वे एव नात्येति केवले ।
शोकश्च यस्तयोर्बीजं तमप्येषोऽतिवर्तते ॥६०॥

(It is not to be supposed that the Ātman) overcomes only the two, viz. hunger and thirst, but this one is (lit. goes) beyond grief and (attachment) ¹ also, which is the seed (i.e. origin) of them. [60]

¹This is because of force of *ca* which indicates *moha*, Refer to verse 36 above (and 62 below).

शोकोऽत्रारतिमात्रं स्याच्चेतसो यानवस्थितिः ।
मोहं चात्येति वैचित्यं विषयापहृतिं धियः ॥६१॥

Grief is merely absence of joy (and satisfaction) viz. that which is unsteadiness in the heart; and (that the Ātman) overcomes ignorance is only the absent-mindedness, which is merely the removal of the objects (i.e. the rest) of intellect. ¹ [61]

¹We have adopted NKL reading here; but AnSS reads: *viṣayāpahṛtiṃ* 'removal of objects ...' This becomes obvious from the following verse. Also cf. verse 68 below.

स्वतोऽनानात्मकेऽज्ञानाद्यत्रानात्मसमीक्षणम् ।
मिथ्याज्ञानमनात्माभं मोह इत्युपदिश्यते ॥६२॥

Delusion is stated to be the seeing of various objects in the place of reality, which by its nature (*svataḥ*) is not of the nature of variety; that is to say: (ignorance) is false knowledge which appears in the form of the non-Ātman objects. [62]

The concealment of reality which is understood in the previous verse results into the apprehension of variety of objects in the place of reality. Thus *apahnūti* leads to *apahṛti* of reality. This, in a way, justifies the reading in AnSS edition. That reading is like using *rājapuruṣaḥ* in the place of *rājā* in the statement of *rājā gacchati*.

सर्वग्रप्राणधर्मत्वादशनायापिपासयोः ।
समासेनाभिधानं स्याद्यदि वा शोककार्यतः ॥६३॥
असमासेन निर्देशो भिन्नकार्यत्वकारणात् ।
प्रवृत्तिररतेः कार्यं मोहस्यानर्थसंप्लुतिः ॥६४॥

Owing to (the fact) that hunger and thirst are the properties of the all-devouring¹ Prāṇa, there is here the statement of them in the form of a compound. Or (perhaps), since they are the effect of grief (and attachment),² [63]
there can be the mention of them severally (lit. not in the form of a compound) for the reason that those two are the effects of different causes. (That is to say:) (Any human) activity is the effect of unsteadiness and, being overcome by undesirable (variety), it is the effect of ignorance. [64]

¹It is necessary to read the verse as we have given. The basic edition of AnSS reads *sarvagraḥ* which is a nominative form and stands unconnected with the remaining words. Also the reading in NKL edition viz. *sarvatra* is not at all imperative or useful.

²The verse uses only *śoka* but *āsaniga* is necessarily implied; cf. verse 67 below.

जरेति परिणामः स्याद्वलीपलितलक्षणः ।
देहस्य मृत्युर्विच्छेदो वियोगो देहलिङ्गयोः ॥६५॥

The word *jarā* 'old age' is the result of (growing) characterized by wrinkles and grey hair on the body and death in the end, i.e. a separation of the (gross) body and the subtle (form of the body or *Prāṇa*).¹ [65]

¹The word *linga* is somewhat vague. It can perhaps mean the *lingadeha*, or perhaps sentience within the body as understood by the Sāṃkhyas.

प्राणाधिकरणे पूर्वे शोकमोहौ मनोगतौ ।
जरामृत्यु तु देहस्य धर्माविति विनिश्चयः ॥६६॥

In the earlier topic of *prāṇas*,¹ it is clearly determined that grief and ignorance belong to *manas* (and) old age and death are the properties of the body. [66]

This refers to verse 33 above where there was mention made of six *ūrmis*. This verse points out that the *prāṇas* are basis of them all.

¹It is not clear as to what is meant as *prāṇādhikaraṇa*.

अशनायादिसंबन्धो नात्मनो वास्तवो मतः ।
अनिर्मोक्षप्रसक्तिः स्यात्तस्य चासङ्गरूपतः ॥६७॥

(Actually), the relation of the *Ātman* to hunger etc. is not considered to be real, for there would be the contingency of (an all-time) absence (i.e. impossibility) of liberation, if (it would have been accepted that) the *Ātman* has the nature of (being affected by) attachment (*āsaniga*). [67]

यत एवमतः प्रत्यग्याथात्म्यानवबोधतः ।
अशनायादिसंबन्धः सम्यग्बोधादतो हनुतिः ॥६८॥

Since this is so, the relation (of the Ātman) to hunger etc. is (to be understood as resulting) from the non-grasping of the true nature of the inner self. Therefore, there is concealment (i.e. removal of the same) on account of properly knowing (the nature of the Ātman). [68]

The word *hnuti* in this verse confirms the correctness of the word *viṣayāpahnuṭi* in verse 61 above.

यः स्वकारणसंसर्गः कार्याणामत्ययो भवेत् ।
अनात्यन्तिकरूपत्वादत्ययोऽसौ न गृह्यते ॥६९॥

That overcoming effect, which would be (understood) as their merging into (lit. contact with) their own causes, is not understood here as the overcoming (of hunger etc.), since these are not the final forms (of the Ātman). [69]

तत्कारणनिषेधो यः स्वमहिम्नैव वस्तुनः ।
तमत्ययं मोक्षविधौ तद्विद्वांसः प्रचक्षते ॥७०॥

While explaining the nature of liberation, the knowers of that (viz. lore of liberation) explain that since, the overcoming by reality (of them)¹ as by the very greatness of reality, there is already a warding (i.e. negation) of causes of them.¹ [70]

¹*aśanāyāpipāse*. Cf. the next verse.

अशनायापिपासाभ्यां तस्मात्तत्कारणग्रहः ।
संवर्गात्मातिवर्तित्वात्तत्कार्यातिगतिस्ततः ॥७१॥

Therefore, from hunger and thirst is understood the cause of the same and from that there is overcoming of that¹ owing to the fact that the *saṁvarga* of them (viz. the Ātman) is

beyond the same.²

[71]

¹Namely, *kāraṇa* of hunger etc. is mentioned in the first line.

²This also refers to *śoka*, *āsaṇḍa* which are cause of hunger etc.

मृत्युनैवेत्युपक्रम्य तथा च श्रुतिरब्रवीत् ।

लक्षणं ह्यशनायेति प्राणमृत्युप्रबुद्धये ॥७२॥

It is to that effect that the Śruti has stated the characteristic (of death) to be hunger, after it has begun with the word *mṛtyunaiva*¹ with a view to informing about the death of *prāṇas*.

[72]

¹This refers to BU 1.2.1.

अविचारितसंसिद्धप्रत्यगज्ञानलक्षणम् ।

अशनायापिपासादिधर्मिणं प्राहुरीश्वरम् ॥७३॥

They have described the lord¹ to be possessed of such properties as hunger and thirst, (and which are at that time) having the character of ignorance on the part of the inner self which is established even without a thought.²

[73]

¹This refers to the Ātman who is at times called *deva*, *īśvara*.

²The first line indicates the correctness in reading verse 42 above as *avicāritasamsiddhamoho*

तत्प्रत्यगात्मयाथात्म्यभास्वज्ज्ञानोदयात्तमः ।

प्रध्वस्यात्मायमत्येति तदुत्थं वस्तुवृत्ततः ॥७४॥

This Ātman completely destroys the darkness by the rise of bright knowledge, viz. the knowledge of the true nature of the inner self, and overcomes what has arisen from that (ignorance) by the very nature of its being the thing (i.e. reality).

[74]

आत्मासामान्यचैतन्यरूपोत्थेनात्मगं तमः ।
जग्ध्वा मानेन निःशेषं प्रत्यङ्पूर्णोऽवशिष्यते ॥७५॥

The Ātman remains as the inner self in its fullness, viz. after having destroyed (lit. devoured) the darkness on its part¹ by the knowledge² which has arisen in the form of incomparable sentience. [75]

SP thoughtfully shows that *ātmāsāmānya* is to be read as *ātma-asāmānya*.

¹In the word *ātmagam*, *ātman* is a reflexive pronoun.

²*mānena* is to be understood as 'by *mā*(=*jñāna*)'.

यस्मादेष स्वतो बुद्धो निरविद्यः स्वतस्ततः ।
शुद्धश्चातोऽद्वितीयत्वात्प्रत्यङ्मुक्तः स्वतस्ततः ॥७६॥

Since this inner self who has, by its very nature, of knowledge (lit. being enlightened), dispelled ignorance, it is therefore (entirely) pure and, owing to its incomparableness, attains liberation by itself. [76]

In both of the verses, i.e. 75-76, in the word *pratyani* is properly understood as nominative singular form of *pratyak*.

एवं ध्वस्तात्ममोहस्य कुतोऽविद्योत्थवस्तुभिः ।
प्रतीचोऽस्त्यभिसंबन्धो ह्यशनायादिलक्षणैः ॥७७॥

How could there be a close relation of the inner self which has thus destroyed its own ignorance¹ with the objects that arise from ignorance, viz. those which are characterized by hunger etc.? [77]

¹Sureśvara uses the word *ātman* in *ātmamohasya* as a reflexive pronoun.

यथा विशुद्धमाकाशं सति वासति वा मले ।
नीहारादौ तथैवात्मा कार्यकारणवस्तुनि ॥७८॥

As the sky is completely clean (*viśuddha*) even when there is (i.e. may be) and is not (i.e. may not be) any dirt or spot such as frost etc.; similarly the Ātman is (entirely pure) even while (there is not) anything like cause(s) and effect(s). [78]

प्रत्यग्याथात्म्यदृष्ट्यात्मा कारणं स्वतमोवधि ।
बाधित्वाज्ञानसंसारौ यात्यपूर्वादिरूपताम् ॥७९॥

Since it sees (i.e. realises) the true nature of being the inner self, the Ātman is ever the cause (only) so long as it has its own darkness (viz. ignorance); later, after having stultified ignorance and transmigratory existence it regains (lit. attains to) its nature (which is described) in *apūrva* etc.¹ [79]

¹Cf. BU 2.5.19.

शोकमोहावतः स्यातां सूत्रकार्योपलक्षणम् ।
जरामृत्यू विराजश्च सर्वकार्योपसंहतिः ॥८०॥

Therefore, grief and ignorance are the indication of the effect (or activity) of Sūtra (and) old age and death are of Virāj, that is to say: there is a complete withdrawal of all that are effects. [80]

The last phrase *sarvakāryopasaṁhrtiḥ* is taken in the NKL edition as *sarvakāryopasaṁhrtelḥ* which is supported by the variant reading noted in the AnSS edition. In case we accept that, the alternative translation would be: because there is complete withdrawal

अध्यात्माद्यधियज्ञादेराधिदैवतरूपता ।
पुरोक्तार्थवती चैवं सति सर्वा भवेद्ध्रुवम् ॥८१॥

The nature (of the Ātman) which is to be in the form of the superintending deity related to the body and to sacrifice, as was stated earlier, would indeed (*dhruvam*) be all that meaningful only thus. [81]

This has reference to speech etc. merging into Agni as stated in BU earlier in *so 'gnir abhavat ...* and also to the word of Udgītha in connection with the lore of the Brahman (*udgīthopāsanā*). Thus it refers to the result of the worship of Udgītha.

सर्वाण्युपासनान्येवं ब्रह्मविद्याभिसंगतेः ।
विद्याधिकार उक्तत्वादर्थवन्तीति निश्चितिः ॥८२॥

Thus, all the (different) modes of worship, being described in the topic of the lore of the Brahman, would be connected with the lore of the Brahman and described thus (as said in the preceding verse) become meaningful (i.e. purposeful)—this is the decision. [82]

प्रतीचोऽसङ्गयाथात्म्यान्मोहादेशचाप्यवस्तुतः ।
प्रत्यङ्मात्रावशेषत्वात्कुतः षष्ठ्यर्थसंभवः ॥८३॥

On account of the true nature of the inner self, viz. being unattached (to *śoka*, *moha* ...), *moha* etc. are not real but they remain only as the inner self; therefore, how could there be understood any relation (of them to it) as the meaning of the genitive case shows? [83]

This means to say that *pratīcaḥ śokamohau* could be understood as reasonable; cf. SP: *ṣaṣṭhyarthah sambandhah sa naika-smin yukto dviṣṭhatvād ity arthah*.

हेतुहेतुमदुक्त्यैतद्व्याख्येयं त्रयमात्मनि ।
आनन्दवद्वाशङ्क्योक्तयोऽशनायेतिपूर्विका ॥८४॥

This triad¹ should thus be explained in relation to the Ātman by stating them as the cause and the effect.² Or, the statement (in the Śruti) which begins with the word *yo 'śanāyā* is made only after holding (*āśanikya*) that (the Brahman) consists of bliss.³ [84]

¹*mūlakāraṇa*, Sūtra and Virāj.

²Literally, what has a cause.

³The reading in AnSS and NKL editions is: *ānandavad vā* separated from *śanikyoktir* ..., but it is better to take as we have done, i.e. both *-dvā* and *śanikyoktir* together. If we accepted the reading in the two editions, we would be forced to take *śanikya* for *āśanikya*— a mere irregularity. And the translation of 85cd would be: Or, having taken (lit. doubted) it (viz. the triad) as full of joy, there follows the Śruti statement beginning with the words *yo 'śanāyā*. Or, we could make a bold indication in that text of both the editions as *śanikoktiḥ* for *śanikyoktiḥ*! Cf. introductory words of SP under verse 85: *śanikottarasya* and also *śanikānivr̥ttiyartham* in NKL edition.

स्वाभाविकत्वं मा प्रापच्छोकादेरात्मसौख्यवत् ।
यस्मिन्सत्येव यत्सत्स्यात्तस्मिन्सत्त्वसति तन्न सत् ॥८५॥

(This is so done in the Śruti) lest *śoka* etc. would occur in the Ātman as its natural property like bliss. (For the rule is) that which would be existent while only another existed but what could not exist while another would not be in existence. [85]

The second line of the verse is a mere statement about the Anvaya and Vyatireka relation between the pair, *śoka* and *moha*, and the inner self.

अशनायादिकांस्तस्मात्कार्यकारणलक्षणान् ।
तद्विरुद्धात्मविज्ञानाद्ध्वंसित्वात्मैकलो भवेत् ॥८६॥

Therefore, after having dispelled (lit. destroyed) hunger etc. which have characteristic of effect(s) and cause(s) by having rightly known (Virāj, i.e.) the true nature of the Ātman which is opposed to them (i.e. śoka etc.), the Ātman would remain only by itself (i.e. as one without a second). [86]

परमात्मस्वभावोऽयं स्वयं श्रुत्या प्रपञ्चितः ।
एतमेव तमात्मानं विदित्वोक्तैर्न वर्त्मना ।
व्युत्थाय ब्राह्मणा यत्नाद्विक्षाचार्यं चरन्ति हि ॥८७॥

Thus, the Śruti itself having stated at length (*prapañcita*) (the true) nature of the highest Ātman, in the manner expressed in the words *etan eva tam ātmānam viditvā ... vyutthāya brāhmaṇā yatnād bhikṣācāryaṁ caranti*. [87]

This refers to BU 3.1.6. The third line of this verse does not occur in the NKL edition and also in the two manuscripts consulted for preparing the AnSS edition.

अधिकारिविशेषस्य ज्ञानाय ब्राह्मणग्रहः ।
न संन्यासविधिर्यस्माच्छ्रुतौ क्षत्रियवैश्ययोः ॥८८॥

The mention of 'a Brāhmaṇa' (in the Śruti) is to specify the particular eligible person(s) since there is not in the Śruti any injunction regarding renunciation in the case of a Kṣatriya and/or a Vaiśya. [88]

Verses 89-142 pertain to the topic of the renunciation of the three castes found in BUB. Verses 89-92 pertain to the Smṛti: brāhmaṇaḥ kṣatriyo vāpi vaiśyo vā pravrajat grhāt.

त्रयाणामविशेषेण संन्यासः श्रूयते श्रुतौ ।
यदोपलक्षणार्थं स्याद्ब्राह्मणग्रहणं तदा ॥८९॥

In the Śruti is heard renunciation as prescribed for the three castes without any specifications, to indicate which is therefore

there the mention of Brāhmaṇa as indicative of them (viz. a Kṣatriya and a Vaiśya). [89]

The verse states Sureśvara's opinion as against that which is expressed in BUB (as recorded in the preceding verse). This implies a wrong interpretation in the BUB.

The basis for Sureśvara's argument seems to be a Smṛti a statement: *brāhmaṇaḥ kṣatriyo vāpi vaiśyo vā pravrajat grhāt*; this implies some Śruti. It is understood by the Śruti under *smṛtyadhikaraṇa* of BS that the basis of a statement merely occurring in a Smṛti should indicate an earlier existent Śruti as understood from the words *śiṣṭācārānumitaśruteḥ pramāṇatvam* (BSB). Here *śiṣṭācāra* leads to imply Smṛti also.

कर्माधिकारविच्छेदि ज्ञानं चेदभ्युपेयते ।

कुतोऽधिकारनियमो व्युत्थाने क्रियते बलात् ॥९०॥

If it is accepted that knowledge can completely set aside (*vicchedi*) any eligibility for a (ritual) activity, then why put forth the acceptance of a restrictive rule regarding eligibility in respect of (a person's) rising to activity (*vyutthāna*)? ¹ [90]

¹We have translated here the word *vyutthāna* in the sense of the rising to activity by those who seek to know the Ātman, yet *vyutthāna* is by derivation (*vyutpatti*) to mean 'a rising activity' (*utthāna*) which is opposed (*vi-*) to usual activity (*karman*). For this *vyutthāna* cf. verses 119 and 125 below. That is rising above all desires (*eṣaṇās*). Also cf. *eṣaṇāprātikūlyena nirvyāpāratayā-vasthānaṁ vyutthānam* (in the words of SP under verse 126 below).

प्रत्यग्याथात्म्यविज्ञानस्वभावश्चेत्समर्थ्यते ।

व्युत्थानं यस्य यस्य स्यात्स स व्युत्थातुमर्हति ॥९१॥

If it is upheld that the Ātman exists as (having the nature of the true) knowledge of the true nature of the inner self,

then each such person is (to be accepted) as eligible in the case of whomsoever there is activity of rising stated. [91]

एवं चेद्ब्राह्मणोक्तिः स्याद्धवस्ताविद्यगृहीतये ।
स ब्राह्मण इति स्पष्टं श्रुतिरन्ते च वक्ष्यति ॥९२॥

If it is thus, the mention of Brāhmaṇa (in the Śruti) would lead to the acceptance of a person who has destroyed his ignorance; as the Śruti does clearly state in the end *sa brāhmaṇah*. [92]

Verses 93-142 pertain to the Śruti: *etaṃ vaitamātmānam*

प्राणस्वान्ततनधर्मा अशनायादिलक्षणाः ।
य एते सर्वभूतेषु वर्तन्तेऽम्भःप्रवाहवत् ॥९३॥

All these characteristics (lit. properties) of the *prāṇas*, *manas*,¹ (and) the body, viz. those which are characterized by hunger etc., do (continue to) occur in all of the beings (ever) like a stream of water.² [93]

¹This is the meaning of *svānta* in the text.

²This indicates continuous flow of them.

संसारोऽनर्थ इत्येष प्रत्यङ्मोहैकहेतुकः ।
यतो बिभ्यति भूतानि परोत्कर्षगतान्यपि ॥९४॥

Thus, the transmigratory existence is having for its cause merely the ignorance about the (true) nature of the inner self; (and) from that all beings entertain fear even though they have attained great excellence. [94]

कारणं प्रत्यगज्ञानं कार्यं संसार उच्यते ।
तद्विरुद्धात्मकः प्रत्यङ्ब्रह्मापूर्वादिवाक्यतः ॥९५॥

(Thus) it is said that ignorance about (the true nature of)

the inner self is the cause and the transmigratory existence is the effect and (also) the inner self is of the nature which is opposed to (that of) them,¹ i.e. the Brahman, as (is) understood from the statement beginning with *apūrvam* [95]

Thus, only the *mūlakāraṇa*, viz. the Ātman is said earlier as the reality and Sūtra and Virāj are not.

¹This refers to both *kārya* and *kāraṇa*.

एतं तमिति वाक्येन दृष्ट्यादेः साक्षिणं श्रुतिः ।
 अनुद्यापेतदुःखेन साक्षात्संगतिमब्रवीत् ॥९६॥
 तं दृष्ट्यादिदृशं साक्षादात्मानं कल्पितात्मनाम् ।
 तमेतमिति विज्ञाय यथाव्याख्यातलक्षणम् ॥९७॥

The Śruti has restated (this truth) in (lit. by) the statement *etaṃ tam* ... thereby referring to the seer of seeing etc. and expressly stated the connection of it with the one devoid of misery, [96]

viz. having known from the sentence *taṃ etaṃ* ... that one, the directly perceptible Ātman, who is the seer of the organ of seeing etc., as has been explained earlier, in the case of those who have imagined (i.e. tried to guess) the nature of the Ātman. [97]

Sureśvara states here *etaṃ tam iti* ..., dropping *vai* in the original BU passage. This is for the sake of metre. Already, he has paraphrased that passage in verse 87 above as *etaṃ eva tam ātmānam* Of course, it cannot be ruled out as impossible to write verse 96 thus *etaṃ vā iti vākyena* Yet, we do not propose any emendation.

उषस्तोक्तो विशेष्योऽत्र कहोलोक्तो विशेषणम् ।
 एवं संसारविध्वस्तस्तद्धेतोर्ज्ञानहानितः ॥९८॥

Here¹ the one who is inquired about (lit. stated or asked) by Uṣasta is who is to be qualified here in this Brāhmaṇa

whereas the statement of Kahola is the qualifier—thus, there is destruction of transmigratory existence which results from knowledge about the cause(s) of the same. [98]

¹That is, in this connection.

घटाकाशो महाकाश इत्युक्तेः केवलं वियत् ।
यथाधिगम्यते तद्वत्साक्षादित्यादिलक्षणः ॥९९॥
भेदसंसर्गहीनोऽर्थस्तद्धेतुध्वंसवर्त्मना ।
एतस्मादेव विज्ञेयो वाक्यान्नान्यप्रमाणतः ॥१००॥

As from the statement 'sky in a pot' and 'sky (viz. ether)' (*ghaṭākāśa* and *mahākāśa*) is understood merely the sky,¹ in the same way, the Ātman is specified as directly perceptible etc.;² [99]

having no contact with any distinct object since that is so by way of destruction of the cause of that (transmigratory existence); it is to be known from (i.e. by) only the sentence (of the Śruti) and not by any other means of knowing. [100]

¹That is as unqualified.

²This refers to *aparokṣāt*, *sarvāntarāt*.

साक्षादित्यादिकं सर्वमपस्तप्रश्नगोचरः ।
योऽशनायेति चात्रोक्तौ संभाव्यं तदशेषतः ॥१०१॥

All that, viz. what begins with the word *sākṣāt* is the subject matter (*gocara*) of the question put by Uṣasta and here in the statement *yo 'śanāyā* all that is to be considered (as the subject-matter). [101]

This refers to the relation between the two answers given to Uṣasta and Kahola, viz. as the specified and specifier. See verse 98 above.

SP remarks, by way of conclusion, *tasmād asmaduktam viśeṣaṇaviśeṣyatvam eṣṭavyam iti śeṣaḥ*.

सामान्यमात्रप्रत्युक्तेर्न यथापृष्टवस्तुधीः ।
पूर्वत्राभूद्यथा साक्षादिति प्रत्युक्तितो मतिः ॥१०२॥

There (does not arise) the knowledge about the thing that is asked only by answering (the query) in general terms (*sāmānyamātrapratyukti*) as, for instance, there arose earlier from the answer (to Uṣasta's question) (in the words) *sākṣāt* etc.

[102]

Now follows the discussion on *viditvā vyutthāya*.

पौर्वापर्यं यथायोगं क्त्वान्तयोः पदयोर्द्वयोः ।
पूर्वं यदि विदित्वेति तदा द्वेधा प्रकल्पनम् ॥१०३॥
ज्ञानस्वभावाद्युत्थानं ज्ञेयवस्तुपरोधतः ।
व्युत्थाने चोदनापेक्षा नाधिकारौपमर्दतः ॥१०४॥
शाब्दी वा प्रतिपत्तिः स्याद्व्युत्थानादेः प्रयोजिका ।
विध्यर्थो ह्यपि बाल्यादिस्तथोद्धर्ममपि दृश्यते ॥१०५॥

There should be in the sequence (viz. the earlier and the later) of the two forms which end in the suffix *-ktvā* in a way that is suitable (*yathāyogam*). If it is held that *viditvā* is to be understood as referring to the earlier (of the two actions), then, in that case, there can be twofold presentation of the thought (*prakalpana*).

[103]

(One of the two possibilities is:) If rising to activity has occurred after knowledge of the true nature (of the reality), then, in view of that thing to be known, there is need of some injunction (*codana*) for rising to activity and not (to convey the idea) regarding setting aside (lit. destroying) the eligibility (of person) to activity.

[104]

Or perhaps, it is held that knowledge arising from (hearing) the word (i.e. Śāstra) causes the rising of a person to activity, then, in that case, there is heard (lit. seen) later the meaning of the potential such as childhood etc.

[105]

These verses are based on a doubt if the two forms in *-ktvā* should refer to the sequence in which they are heard, or otherwise.

The first alternative is answered in verse 104 and the second alternative in verse 105.

व्युत्थायाथ विदित्वेति पौर्वापर्यं यदेष्यते ।
व्युत्थानसाधना विद्येत्ययमर्थो भवेत्तदा ॥१०६॥

When again the sequence¹ is accepted to be *vyutthāya viditvā*, then, in that case, the meaning (to be understood) is that the knowledge (of the Brahman) is the means for persons' rising to activity. [106]

Now the sequence understood is *vyutthāya viditvā*.

¹This refers to the *pāṭhakrama* 'order in which the two words' (*viditvā vyutthāya*) occur in the sentence *evam vai tam (tam etam)*?

विदित्वा कथमित्यस्य प्रत्युक्त्यर्था परा श्रुतिः ।
तस्मादित्यादिका योज्या न्यासहेतुत्वसिद्धये ॥१०७॥

(A question could be:) 'How can the subsequent Śruti which purports to give an answer¹ be related to the form *viditvā*?' Therefore, there is need to understand the answer beginning with the words *tasmāt* etc. as having the purpose of being the cause of renunciation.² [107]

¹This refers to answer to the question of Kahola.

²Sureśvara uses the word *nyāsa* in place of *saṃnyāsa*.

तस्मादेवंविदित्येवं तथा चोद्धर्षं प्रवक्ष्यति ।
निःशेषकर्मसंन्यासं विद्यायाः साधनं श्रुतिः ॥१०८॥

(For) Śruti will subsequently¹ declare thus in the words *tasmād evamvid ...*— (thus) it (points to that) the knowledge (of the

Brahman) is a means to renunciation of entire activity. [108]

¹NKL refers to SV 219 for this.

संन्याससाधनं ज्ञानं निर्वक्त्यत्रापि च श्रुतिः ।
यथा तथा पराश्चात्र श्रुतयः सन्ति कोटिशः ॥१०९॥

And here also the Śruti clearly states knowledge as the means to liberation; and there are numerous¹ subsequent Śruti statements (to show) as to how that is so. [109]

¹This is the purport of the word *koṭīśaḥ*.

ज्ञानानरोधिनी यद्वत्प्रवृत्तिः प्राणिनामिह ।
तथेहापि श्रुतिर्विक्ति प्रत्यग्याथात्म्यवेदिनाम् ॥११०॥

As there is here (in this world) activity of living beings (only in) accord with the knowledge (already acquired), so also (i.e. in this respect also) the Śruti states (i.e. refers to the activity) of those who have known the true nature of the Ātman. [110]

Now follows an explanation of *putraiṣaṇā*, *vittaiṣaṇā* and *lokaiṣaṇā* in verses 111-117.

पुत्रोत्पत्तिं समुद्दिश्य दारान्परिजिघृक्षति ।
यतो दारार्थं उद्योगस्ततः पुत्रैषणोच्यते ॥१११॥

Since a man wishes to take to a wife with (a desire) to beget a son, therefore, his activity with respect to the wife is called *putraiṣaṇā*. [111]

In other words, the desire of a man for a son takes the form of the desire for a wife—this is *putraiṣaṇā*.

पुरुषार्थाय यन्नालं लब्धात्मापि कुठारवत् ।
अप्रविश्य प्रयोगं तद्विस्तमित्युपदिश्यते ॥११२॥

What, even after coming into existence (*labdhātma*), is not capable of (securing) the end of man's life (*puruṣārtha* called Dharma), is, without being put to use, just like an ax, mentioned by the word *vitta* 'wealth'. [112]

Here is the idea of *vitta* as understood by Bhartṛprapañca.

यत्त्वात्मलाभमात्रेण पुरुषार्थसमाप्तिकृत् ।
व्युत्थानं तद्वलादेव न तु यत्स्याद्गवादिवत् ॥११३॥

As against this, that which brings about the accomplishing of man's end, by mere coming into existence on account of its own strength, is (what is called) man's rising to activity which is not like (coming into existence of) a cow etc. (which is included in *vitta*). [113]

This is for setting aside the view of Bhartṛprapañca that man's rising to activity towards securing wealth is inclusive of man's worship etc., i.e. meditation and so on. This is in explanation of the basis of the view expressed in the preceding verse.

प्रत्यगज्ञानसंभूतकामोत्थं साधनात्मकम् ।
देवतादिपरिज्ञानं मन्त्रवद्वित्तमुच्यते ॥११४॥

That is *vitta*, which is like a Mantra, (viz. preceded by) a complete knowledge of the deity etc. (of the sacrifice) and is of the nature of its means which has arisen from some desire caused by ignorance of the inner self. [114]

This gives Sureśvara's own idea about *vitta*.

नात्मानं लभते कर्म यतो वित्तमृते ततः ।
वित्तैषण्यं कर्मार्था न लोकार्थेति निश्चितिः ॥११५॥

Since (a ritual) activity does not come into existence without

a person's having wealth, therefore, this desire for wealth is only for effecting (a ritual) activity. It is not for securing (another) *loka*— this is the decision. [115]

This is yet another explanation by Sureśvara of the word *vitta*.

नित्यकर्मप्रसिद्धयर्थमतो वित्तमिहेष्यते ।
न चेज्जामि भवेद्वाक्यं पृथग्लोकैषणाग्रहात् ॥११६॥

Therefore, it is held that wealth in this world is for the purpose of a man's performance of (his) daily (ritual) activity. If this is not so (understood), then the Vedic sentence (which refers to *eṣaṇās*) would be merely a repetitive sentence. [116]

लोकानुद्दिश्य यः कामस्तत्साधनसमाश्रयः ।
लोकैषणैति तामाहुः काम्यकर्मार्थमुद्यमम् ॥११७॥

That desire which depends on various means towards acquisition of *lokas* is called *lokaiṣaṇā*, i.e. it is an activity towards (accomplishing) the desired (ritual) activity. [117]

The nature of *lokaiṣaṇā* is clarified here.

यतोऽसाधनसाध्यं तं प्रत्यगात्मानमात्मना ।
साक्षादित्यादिनाज्ञासीद्विरुद्धं साध्यसाधनैः ॥११८॥
साध्यसाधनरूपाभ्यस्तस्मादुक्तार्थवेदिनः ।
व्युत्तिष्ठन्त्येषणाभ्यस्ते तद्विरुद्धात्मकत्वतः ॥११९॥

Since one knows from (i.e. by) the Śruti statement the Ātman as directly perceptible etc. and as opposed to the means of accomplishing what is to be accomplished, i.e. the inner self which could be known without any (commonly known) means, [118]

therefore, those who know the meaning of what is said in the Śruti, rise above the (three) desires which are of the nature of the means towards what is to be achieved owing to its

being of the nature opposed to them.¹

[119]

¹That refers to *sādhyasādhanarūpa*.

अज्ञानकामजन्यत्वं वाङ्मनःकायकर्मणाम् ।
सोऽकामयत इत्येवं पुराप्युक्तं तमस्विनः ॥१२०॥

In the case of a person who is overpowered by ignorance (lit. darkness), it is already pointed out that, since the activities of speech, *manas* and body have the nature of what is produced by desires; therefore, he desired (to perform them). [120]

यदज्ञानात्प्रवृत्तिर्या तज्ज्ञानात्सा कुतो भवेत् ।
प्रत्यग्ज्ञानोदयेऽतः स्यान्निवृत्तिः सर्वकर्मणाम् ॥१२१॥

How could there be a (person's) activity (pertaining to ritual etc.) after knowing the ignorance through which there has proceeded his activity? That is to say (therefore) that, after the rise of the knowledge (of the true nature) of the inner self, there would result the cessation of his activities. [121]

जिज्ञासुरपि चैतस्य यथोक्तस्यात्मवस्तुनः ।
सर्वैषणानिवृत्त्यैव तज्ज्ञानं समवाप्नुयात् ॥१२२॥

And, in the case of a person who wishes to know this thing (reality) called the Ātman, as stated, he would secure the knowledge of that by the very withdrawing from all desires. [122]

यस्तु त्यक्तुं न शक्नोति रागादिप्रबलत्वतः ।
रागादिहेतुनाशार्थं कार्यं कर्मैव तेन तु ॥१२३॥

But, a person who, owing to the great strength (*prabala*) of attachment etc., is unable to give up activity has to do that (viz. activity) for the removal (lit. destruction) of attachment etc. [123]

This is supported by a citation from *Gītā* 6.3 in the following verse.

आरुरुक्षोर्मुनेर्योगं कर्म कारणमुच्यते ।
योगारूढस्य तस्यैव शमः कारणमुच्यते ॥१२४॥

In the case of a wise man who wants to take to Yoga, performance of (ritual) activity is a cause, but, in the case of that person, when he has already taken to Yoga, that¹ becomes a cause for tranquillity (lit. pacification of desire etc.)

[124]

¹This refers to the performance of ritual activity.

न्याय्यां वृत्तिं समुल्लङ्घ्य तद्विरुद्धतया स्थितिः ।
व्युत्थानमिति तामाहुर्व्युत्थानज्ञा महाधियः ॥१२५॥

Since *vyutthāna* is a person's remaining in the state which is opposed to that (commonplace) functioning which is in accordance with *eṣaṇās* (*nyāyyā*), by transgressing it; therefore, the great thinkers who have known what is *vyutthāna*, have so called that state.

[125]

This is explained in the next verse in the light of an example of a popular word.

सामन्तो व्युत्थितो राज्ञा विरोधेन व्यवस्थितौ ।
व्युत्थानशब्दो लोकेऽपि प्रसिद्धोऽत्र तथैव सः ॥१२६॥

Even in this world, the word *vyutthāna* is known as expressive of a tributary king who, bearing in his heart an enmity (*virodhena*), has been remaining in opposition to a (sovereign). (Therefore) the word (*vyutthāna*) is used here in the same way.

[126]

SP has clearly pointed out the basis for the use of the word *vyutthāna* thus: *lokavedayoḥ śabdārthāviśeṣād aviśiṣṭas tu vākyārtha iti nyāyāt*.

भिक्षया लक्ष्यते चर्या ह्याकिंचन्यैकसंश्रया ।
अममापरिग्रहोक्तेर्निष्कर्मा मुनिरुच्यते ॥१२७॥

By the word *bhikṣā* is indicated a person's conduct of activity (*caryā*) which is based on (or rooted in) the state of having nothing. Therefore, a person is called a wise man who does not do any activity owing to there being the statement about him as not possessing anything as 'mine'. [127]

एषणा कामपर्यायः कामश्चाप्राप्तगोचरः ।
अवाप्ताशेषकामेऽसौ भवंस्तन्मोहतो भवेत् ॥१२८॥

The word *eṣaṇā* is a synonym for *kāma* 'desire' and *kāma* is an object (i.e. a thing) which is not obtained. Therefore, (that *kāma*) being in the case of a person who has not obtained all the desires,¹ would be caused by ignorance about the nature of that (*kāma*). [128]

¹NKL edition reads: *avāptāśeṣakāmo 'sau bhavans ...* despite NKL proper as: *bhavan kāma iti śeṣaḥ* and also *anāptakāmābhāve 'pi ...* as the introductory to the next verse. As such, that reading deserves little (or, no) consideration!

आनन्दैकस्वभावत्वान्नात्मनः सुखकामिता ।
विरोधात्सुखरूपस्य न दुःखेन समागमः ॥१२९॥

The Ātman does not (seem to be) given to (securing) happiness owing to its being of the nature of only happiness, (and therefore,) owing to the opposition of its being of the nature of happiness, there does not follow any contact (or union of it) with misery. [129]

बुभुक्षादिनिषेधोऽयं तथाप्यात्मन उच्यते ।
सर्वानर्थैकमूलस्य प्रत्यङ्मोहस्य हानये ॥१३०॥

So also there is the denial of a wish to eat/enjoy on the part of the Ātman. And that (is held to) result in removal of ignorance about the inner self, which (i.e. ignorance) is the only root of all undesirables. [130]

निरेषणैकयाथात्म्ये न यथावस्तुकामधीः ।
निरेषणात्मसंबोधाद्वाध्यैवेयमतो भवेत् ॥१३१॥

Therefore, this inclination of the mind (*dhī*) for knowing the thing (viz. reality) as it is would not be existing in the state of being (one) in nature with the desireless (Ātman) alone, and it would not be an object of stultification on account of the Ātman that is desireless. [131]

SP points out that this verse refers to the discussion in the preceding verses and purports to negate the cause of transmigration in the case of the inner self, i.e. the six *ūrmis* mentioned in verse 32.

फलार्थैषणयैकत्वप्रसिद्धयर्थमतः श्रुतिः ।
प्रवक्तुमुपचक्राम पुत्रवित्तैषणैकताम् ॥१३२॥

Therefore has the Śruti proceeded to establish the singleness of the desire for the result as the single desire in the two desires for a son and for wealth. [132]

SP points out: *śrutivaśād ekaivaiṣaṇety arthaḥ*.

यतो धनाभिलाषोऽयं कृतदारस्य सार्थकः ।
पुत्रैषणातोऽभिन्नैव ज्ञेया वित्तैषणात्मनः ॥१३३॥

Since this desire for wealth¹ is meaningful in the case of one who has taken to a wife, therefore the desire of a person

for wealth is to be known as non-distinct from desire for a son. [133]

¹Here Sureśvara states it to signify *dāna*.

साधनत्वाविशेषत्वात्पुत्रवित्तैषणात्मनोः ।
एवं चैकत्वमनयोरिह व्याख्येयमादृतैः ॥१३४॥

Owing to the non-distinction between the two desires for a son and for wealth in the case of a person as the means, persons who have a regard (for the Vedānta doctrine) have to explain it, thus as in the sense of the oneness of the two (stated above). [134]

This explains the purport of first line of verse 132 above.

साध्यैषणाप्रयुक्तत्वात्पुत्रवित्तैषणात्मनः ।
एका लोकैषणैवेयं त्रिधातो व्यपदिश्यते ॥१३५॥

Therefore, this single desire for *loka* is mentioned to be threefold as the desire for a son and the desire for wealth are (merely) propelled (*prayukta*) by just one desire (for *loka*) to be obtained. [135]

This is an explanation of *yā vittaiṣaṇā* in BU.

SP quotes: *uktam hi sarvaphalārthaprayukta eva hi sarva-sāadhanam upādatta iti*. Possibly, this is the citation from *Bhāṣya of Bhartṛprapañca*.

स्वमहिम्नैव निष्पत्तिर्न विना साधनं यतः ।
साध्यस्य साधनादानमतः साध्यानुरोधतः ॥१३६॥

Since a thing cannot be achieved through its greatness, i.e. not without any means, therefore, here is to be mentioned (lit. taken up) a means in accordance with the nature of what is to be achieved. [136]

This explains the meaning of *ubhe hi* in BU.

अपास्ताशेषानर्थाप्तपुरुषार्थत्वतः स्वतः ।
तन्मोहमात्रजे तस्मादेषणे प्रत्यगात्मनि ॥१३७॥

Therefore, there are two desires in the case of the inner self that are caused by mere ignorance (lit. delusion) about it for the reason that by its very nature it has had achieved the end of life by the removal of all the undesirables without any remainder (i.e. in their entirety). [137]

ब्रह्माज्ञानं यतो हेतुरेषणानां न वस्तुतः ।
परमार्थविदां न स्युरेषणा या यथोदिताः ॥१३८॥

Since ignorance about (the nature of) the Brahman is the cause of (all) the desires and (it is) not (so) in reality, therefore, in the case of those who have known the highest reality there do not obtain desires which are stated. [138]

आप्ताशेषपुमर्थत्वान्नापेक्षा साधनं प्रति ।
साध्यत्वेऽपि हि सिद्धस्य किंत्वसाध्यस्य वस्तुनः ॥१३९॥

Since they have obtained all the ends of life, they do not have any expectancy for (or dependence on) any means—this is so even in the case of an object to be acquired that has been (already) acquired and not in the case of that (object) which cannot be obtained. [139]

This verse raises a point regarding giving up the performance of ritual actions in the case of (i) one who is a knower and (ii) one who seeks to know. The first alternative is taken up in the present verse and the second alternative will be taken up in verse 141 below.

सर्वोपाया निवर्तन्त उपेयावसितौ यतः ।

चरितार्थत्वतोऽमीषां नापेक्षा सिद्धवस्तुनः ॥१४०॥
 अप्यज्ञातात्मयाथात्म्यो जिज्ञासुर्योऽत्र वस्तुनि ।
 सर्वकर्मपरित्यागो ज्ञानाप्त्यै तस्य साधनम् ॥१४१॥

Since, in respect of having obtained what was to be approached, all the means become inoperative (lit. return), therefore, in respect of a thing obtained, these (means) are not acquired (lit. expected) owing to the end (of life) already being achieved; [140]

also, in respect of him, who desires to know (the thing) in this (i.e. the context of the knowledge of the Brahman), since he has not known the real nature of the Ātman. There is the giving up of all activities (ritual and others) for obtaining the knowledge. [141]

This clarifies the thought in verse 139 up to *siddhasya*.

तस्मादेवंविदित्यत्र श्रुतिः स्पष्टं यथोदितम् ।
 निःशेषकर्मसंन्यासं स्वयमेव प्रवक्ष्यति ॥१४२॥

The Śruti itself will clearly state (i.e. prescribe) the renunciation of entire activity in the words *tasmād evamvid* (BU 4.4.23). [142]

Verses 143-156 discuss the nature of sentience relating renunciation as the cause of right knowledge (of reality).

प्रत्यग्याथात्म्यविज्ञानसाधनत्वप्रसिद्धये ।
 श्रुत्यन्तरेषु तद्वच्च सन्ति वाक्यान्यनेकशः ॥१४३॥

And, in the same way, there are in other Śrutis numerous sentences which go to establish that renunciation is a means (to liberation) to acquire the knowledge of the true nature of the inner self. [143]

मुक्तेश्च बिभ्यतो देवा मोहेनापिदधुर्नरान् ।

प्रावर्तन्त ततो भीताः कर्मस्वज्ञाततत्त्वकाः ॥१४४॥

सर्वकर्माण्यतस्त्यक्त्वा प्रत्यक्प्रवणबुद्धयः ।

मोहं भित्त्वात्मसंबोधाद्ययुः कैवल्यमुत्तमम् ॥१४५॥

(And gods) being afraid of liberation being obtained by men, wrapped up human beings in ignorance (and) then they (i.e. human beings), being afraid thereby, entered upon the (performance of) activities, [144]

therefore, they who had their intellect inclined towards (acquiring the knowledge of true nature of)-inner self having abandoned all activities, (and) having destroyed (lit. broken) ignorance (lit. delusion), attained to the excellent state of singleness (i.e. liberation) through the true knowledge of self.

[145]

These two verses are from the tradition of the Bhāllavis as is clear from the following verse. (Not traced for us!)

इति भाल्लविश्रुतिवचः सम्यग्ज्ञानस्य जन्मने ।

संन्यासं साधनं वक्ति वाङ्मनःकायकर्मणाम् ॥१४६॥

Thus is the statement in the Bhāllavi Śruti which states renunciation of the activities of speech, *manas* and body as a means to the rise of right knowledge. [146]

पराञ्चि खानीति तथा पराक्प्रवणसाधनम् ।

निषेधत्यात्मविज्ञाने मन्त्रवर्णोऽपि काठके ॥१४७॥

Also, there is in the Kāthaka tradition a certain Mantra which rejects in the verse *parāñci khāni*¹ the means inclined towards (acquiring the knowledge of) the external objects as a means to acquiring the knowledge (of the true nature) of the Ātman.

[147]

¹Kāthopaniṣad 4.4.1.

वेदान्तविज्ञानसुनिश्चितार्थाः ।
 संन्यासयोगाद्यतयः शुद्धसत्त्वाः ।
 मन्त्रोऽपि चैकात्म्यविनिश्चयाय ।
 निःशेषकर्मोज्झतिमाह साक्षात् ॥१४८॥

By the verse, 'Those who have well determined for themselves the knowledge of the Vedānta (thought), being pure in their mind (*śuddhasattvāḥ*), the ascetics, by resorting to renunciation ...,'¹ (the Śruti) has directly expressed the renouncing of entire activity (as a means) for ascertaining the oneness (of the inner self, i.e. the Ātman) in nature. [148]

¹*Muṇḍakopaniṣad* 3.2.6ab.

ब्रह्मचर्यं समाप्य गृही तस्माद्भवेद्विजः ।
 गृहाश्रमं समाप्याथ वानप्रस्थं समापयेत् ॥१४९॥

Therefore, having lived up to the end of the stage of celibate, a twice-born should become a householder. 'Then, after having lived up to the end the stage of householder, he should complete the stage of forest-dweller.'¹ [149]

¹This seems to be a Śruti stating *kramasannyāsa* for a twice-born.

यथोक्ताश्रमवासार्थं सामर्थ्यान्नियमो भवेत् ।
 एवं सति समर्थः स्यात्सर्वाश्रमसमुच्चयः ॥१५०॥

Owing to the propriety,¹ in relation to (*-artham*) adherence to the stage of life there should be (accepted) a restrictive rule which is (already) mentioned. This being so, there will be a meaningful² combination of all the stages of life. [150]

¹*sāmarthya* 'propriety', or force of singnificance of the particular stage of life which is relevant.

²*samartha* here is to indicate what is useful.

वानप्रस्थाश्रमाद्धूर्वं प्रव्रजेदविचारयन् ।
प्रत्यक्षश्रुतिमूलोऽयं सर्वाश्रमसमुच्चयः ॥१५१॥

At the end of the stage of forest-dweller, a person should take to renunciation (even) without thought, (for) this combination of all the stages of life is having a direct basis in the Śruti statements. [151]

Thus, verses 149-151 refer to the performance of different duties in different stages of a person's life and finally to renunciation, so as to be in suitable combinations.

कषायं पाचयित्वा च श्रेणीस्थानेषु च त्रिषु ।
प्रव्रजेच्च परं स्थानं पारिव्राज्यमनुत्तमम् ॥१५२॥
इति व्यासस्मृतौ वाक्यं प्रत्यक्षश्रुतिबन्धनम् ।
तथान्यान्यपि विद्यन्ते वाक्यान्यत्र सहस्रशः ॥१५३॥

(Thus) having brought to fruition, lit. ripeness, (*pācayitvā*) (the various sinful activities)¹ in the three stages of life in (their fixed) order (*śreṇī*), a person should attain to the final (*para*) stage of life, viz. renunciation which is incomparable. [152]

This is a statement in the Smṛti by Vyāsa which has a directly firm connection (*bandhana*) with the Śruti; so also, there are other thousands of statements in this respect. [153]

Verse 152 is in support of the idea of *kramasaṃnyāsa*. And cf. *Mahābhārata* 12.237.3 with variation *tu* for *ca* and *śreṇīsthāneṣu* of *śreṇīsthaneṣu*. Also, *Mārkaṇḍeyapurāṇa* 152.153 as quoted by NKL.

¹This is for *kaṣāya* 'impurity'; referring to the word *pāpman* and *āsaṅga* mentioned in BU 1.3.2, 7 and, in particular, 10-11; *Jaiminīyopaniṣad* 2.1.10; 1.3.6, 7, 10, 11.

ब्रह्मचर्याश्रमादेव यदि वा प्रव्रजेद्विजः ।

गृहाच्च प्रव्रजेत्तद्वत्प्रव्रजेच्च वनात्तथा ॥१५४॥

Or perhaps a twice-born might renounce (directly) from the stage of celibate or from the house (i.e. from the stage of householder) or perhaps he might renounce from the forest (i.e. the stage of forest-dweller). [154]

This verse points to the opposition of the Śruti to renunciation as related to the sequence of the stages of a person's life. The word *dvija* refers to the three castes.

विकल्पेनैव व्याख्यात एकद्वित्रिसमुच्चयः ।
कषायपक्वितमापेक्ष्य विकल्पोऽयं त्रिधोदितः ॥१५५॥

Thus has been explained the combination of (renunciation with one or two or three of the stages of a man's life). And this option¹ is (thus) mentioned as of three types, keeping in view (*āpekṣya*) the result (lit. ripeness) of simple activities. [155]

¹The statement giving the three options in verse 154 is specified in this verse.

परीक्ष्य लोकानित्यादि तथा चाथर्वणे वचः ।
विरक्तः कर्मभूमिभ्यो ज्ञानं प्रति नियुज्यते ॥१५६॥

And to this effect is there a statement (in the tradition of) Atharvans also as begins with (the words) *parīkṣya lokān*¹ Thus a person who has become averse to the various levels of (a human being's) activity is enjoined to secure knowledge. [156]

¹Cf. *Muṇḍakopaiṣad* 1.2.12.

Verses 157-164 discuss the meaning of *vyutthāya* as what leads to renunciation according to the Śruti and having knowledge as its means but not *tridaṇḍasaṃnyāsa* as stated by *Smṛtis*.

सर्वकर्मपरित्यागात्संत्यक्ताशेषसाधनः ।

श्रुत्युक्तोऽत्र परिव्राट्स्यादैकात्म्यज्ञानजन्मने ॥१५७॥

(Therefore) here (in this context of pursuit of the knowledge of the Brahman) is a person mentioned by the Śruti as a person who has, by giving up performance of all activities, abandoned the entire means to their fulfilment as one who should become a mendicant in order that there is (for him) the rise of knowledge of the singleness of the Ātman. [157]

मुण्डोऽपरिग्रहश्चेति प्रत्यक्षश्रुतिवाक्यतः ।

तद्विरुद्धं स्मृतेर्वाक्यं नापेक्ष्यं दुर्बलत्वतः ॥१५८॥

And, there is a directly expressed statement in the Śruti that (a person should be a mendicant, lit. a person who has shaven his head, and should have no belonging of his own; (and) the statement in the Smṛti is opposed to that; therefore, it should not be regarded (as proper or as a conveyer of truth), owing to its having no strength. [158]

This points to the conflict between the Śruti statement regarding renunciation and the Smṛti sentences (e.g. Dakṣa Smṛti) regarding the same.

विगीता च विरुद्धा च दृष्टार्था दृष्टकारणा ।

इति वेदविदाप्युक्तं तदप्रामाण्यकारणम् ॥१५९॥

(The Smṛti) has sung (some) matter(s) variously;¹ (it is) opposed (to the Śruti); it has (for its subject matter) things that are seen;² and it (mentions) causes that are seen³—this has the knower of the Veda⁴ also spoken of (i.e. pointed out) the reason for its unauthoritativeness. [159]

¹That is, in a way so as to involve self-contradictions.

²This refers to the perceptibility of the things.

³That is, proven by other means of perception (also).

क्रियमाणानि कर्माणि यथा स्युः फलसिद्धये ।
तदक्रियोक्ता श्रुत्येह तथात्मज्ञानजन्मने ॥१६०॥

Here ¹ is stated by the Śruti the non-performance of them, for the reason that the (ritual) activities would produce results; this is so said by the Śruti for the rise of the knowledge about (the nature of) the Ātman. [160]

If the Śruti has occasionally spoken of renunciation of different duties in relation to various stages of a man's life, that is to be understood as speaking about the means to acquiring the knowledge of the Brahman.

¹That is, in respect of the rise of the knowledge about the Ātman.

सत्यानृते सुखदुःखे वेदाँल्लोकद्वयं तथा ।
संन्यस्यात्मानमन्विच्छेदित्यदुष्टं स्मृतेर्वचः ॥१६१॥
त्यज धर्ममधर्मं च तथा सत्यानृते त्यज ।
उभे सत्यानृते त्यक्त्वा येन त्यजसि तं त्यज ॥१६२॥

Therefore, the statement in the Smṛti (should be understood) as faultless (*aduṣṭa*) and (conveying this:) a person should seek (the knowledge of) the Ātman after he has renounced truth and untruth (and) happiness (as well) and misery; the Vedas and also the two worlds (*iha-* and *para-* lokas). [161]
Give up the duties which are prescribed for you (*dharma*) and also those prohibited (*adharma*); and also give up (the notions of) truth and untruth; and also that with (the help of) which you have abandoned them.¹ [162]

¹Cf. *Āpastambīyadharmasūtra* 2(9).21.13.

नैष्कर्म्यसाधनेष्वेवं श्रुतयः स्मृतिभिः सह ।
मुमुक्षुं विनियुञ्जन्ति सदात्मज्ञानजन्मने ॥१६३॥

Thus, the Śrutis having agreement of the Smṛtis with themselves, ever enjoin a person seeking (or desiring for) liberation on accepting the means¹ of achieving *naiṣkarmya* 'actionlessness' so that there is rise of the knowledge about (the nature of) the Ātman. [163]

¹This refers to *śamadamādisādhanasampat*.

तथानधिकृतानां च संन्यासस्य विधानतः ।
काणकुब्जादिविषया न्यासक्लृप्तिरतोऽशुभा ॥१६४॥

Similarly, there is no prescription as regards renunciation in the case of those who are not eligible, viz. those who are one-eyed and hunch-backs and the like. Therefore, entertaining the idea of renunciation (in respect of Smṛtis) is inauspicious.¹ [164]

¹That is, unacceptable or unauthoritative in every way.

Verses 165-167 explain the objection in BUB: vyutthāya ... as referring to an injunction regarding renunciation.

सत्सु प्रत्यक्षविधिषु यथोक्तेष्वफलः श्रमः ।
भिक्षाचर्यं चरन्तीति विद्यर्थः क्रियते महान् ॥१६५॥

(Therefore) when there are specifically stated injunctions, clearly understood, as stated before, the effort (towards performance of them) is futile. As such, the purpose of the injunction that is proposed in the Śruti statement *bhikṣācaryam caranti* is futile. [165]

तिष्ठतासेदिति चात्रापि प्रत्यक्षः श्रूयते विधिः ।
तस्मिन्सति वृथा कस्माज्जनोऽयं परिखिद्यते ॥१६६॥

(An objection:) 'Also, there is here directly heard an injunction

in this (text, viz. in the words) 'Let him rest (on)...', while it is there, why then is this person fatiguing himself uselessly?

[166]

This refers to the Śruti which is expressed in Śaṅkara's commentary on *vyutthāya* as an injunction regarding renunciation. This shows how Sureśvara expresses his disagreement with his preceptor Śaṅkara, though mildly.

In verses from 67 onwards Sureśvara discusses the meaning of the sentence tasmād brāhmaṇaḥ pāṇḍityam nirvidya bālyena tiṣṭhāset.

साध्यसाधनरूपाभ्यां विरुद्धं प्रत्यगीक्षणम् ।
यतो यथोक्तं तत्सिद्धौ तस्मादेतद्विधीयते ॥१६७॥

Since seeing the inner self is opposed (to activities) which have the nature of what is to be achieved and (also) the means of achieving the same, as said so far, therefore, the following (lit. this) is now stated in proof of the same.

[167]

Verses 168-191 explain the passage tasmād brāhmaṇaḥ.

व्युत्थायातो यथोक्ताभ्य एषणाभ्यो निरेषणः ।
पाण्डित्यमथ निर्विद्य बाल्यं परिसमापयेत् ॥१६८॥

Therefore, having risen above the desires that have been stated, one who has become devoid of desires, should have fully acquired, i.e. known (*nis-vidya*) what is erudition and then (*atha*) rest on the strength¹ (of renunciation enjoined, i.e. heard, in the Śruti).

[168]

¹*bālya* is (*kartum*) *sāmarthyam balavattvam* which is acquired after knowing the meanings of Vedic words; cf. verse 176 below.

पदार्थाधिगतिः पूर्वं ततस्तदभिसंगतिः ।

विरुद्धार्थहनुतिः पश्चात्ततो वाक्यार्थबोधनम् ॥१६९॥

In the first instance, there is acquiring the meaning (of the words in the Śruti statement), then (understanding) the proper connection in them, later discarding (lit. concealing) the opposed teachings and thereafter acquiring the meaning of the sentence (is known as erudition). [169]

This gives the meaning of *pāṇḍityam*.

This is called *caturvidha jñāna*.

एकैकशयेन नीत्वाथ निष्ठां पाण्डित्यलक्षणाम् ।
बाल्यं चैव यथायोगमन्वयव्यतिरेकतः ॥१७०॥

Then, having firmly secured the final condition (*niṣṭhā*), characterized as erudition, following (the four elements stated in the preceding verse) one after another,¹ he should (rest on) the strength² in a suitable way (*yathāyogam*) by the method of Anvaya and Vyatireka. [170]

¹This is for *ekaikaśa* 'one by one' from *Śābarabhāṣya* 10.6.45.

²This is by *bālya* which is the same as *balavattva* or *balabhāvaḥ*.

अद्वितीयार्थनिष्ठत्वमात्मप्रत्ययशब्दयोः ।
तथा चात्मैकनिष्ठत्वमद्वितीयस्य मानतः ॥१७१॥
ऐकार्थ्यान्नेह संसर्गस्तद्विरुद्धार्थयोरिव ।
अशनायाद्यतिक्रान्तदृष्टिद्रष्टृपदार्थयोः ॥१७२॥

The two words *ātman* and *pratyaya* (can) pertain (only) to that object which is without a second (and) in the same way, that (object) which is without a second can abide (only) in the Ātman and it becomes known from an authoritative means (viz. the Śruti). [171]

Between the two things signified as the meanings of the two words *dr̥ṣṭi* and *draṣṭṛ*, which are above (lit. have transgressed) hunger etc., there cannot obtain any contact as between two objects (of nature) opposed to them, since they are (i.e. exist

as) but one thing.

[172]

Verse 171 refers to the *bālyā* 'strength' in the two words *ātman* and *pratyaya* and verse 172, to that in the sentence. Thus verse 172 refers to acquiring *pāṇḍitya* or *caturvidha jñāna*.

Verse 172 points to *bālyā*.

पण्डेति बुद्धिनामैतत्सा जाता यस्य मानतः ।
तं पण्डितमिति प्राहुः सोऽत्र श्रुत्या नियुज्यते ॥१७३॥

The word *pāṇḍā* 'erudition' is the word used of (lit. name given to) knowledge (obtained) through intellect and they call him *pāṇḍita* 'an erudite person' in whom has arisen that *pāṇḍā* from (various) means (of knowing). It is that person who is enjoined here (in the injunction)¹ in the Śruti. [173]

This explains the meaning of *pāṇḍā*.

¹This refers to *pāṇḍityam bālyena tiṣṭhāset*.

यत्पण्डितस्य कर्म स्यात्तत्पाण्डित्यं प्रचक्षते ।
अप्राप्ततत्त्वनिष्ठोऽतः पाण्डित्ये विनियुज्यते ॥१७४॥

Whatever is the activity of an erudite man is what they call erudition, therefore (that person) who rests himself on (the condition of) not having known the true nature (of reality) is enjoined by this injunction to acquire erudition. [174]

शास्त्राचार्यात्मतो निष्ठां नीत्वात्मप्रत्ययं यतिः ।
तिष्ठासेदथ बाल्येन कृत्स्नानात्मधियो हनूतिः ॥१७५॥
बाल्यशब्दाभिधेया स्यात्तां समाप्य शद्धीः ।
मुनिभावं ततो गत्वा ब्रह्मैव ब्राह्मणो भवेत् ॥१७६॥

Having secured the final condition (of erudition) in respect of the knowledge of the Ātman, from scripture and/or the preceptor, a mendicant should rest himself on that strength; the removal (lit. concealment) of the knowledge of all the

non-Ātmans

[175]

is signified by the word *bālya*; ¹ having obtained that (strength), a person of purified intellect should have attained the nature of a wise person and then become the Brahman, i.e. Brāhmaṇa. ²

[176]

This explains *atha munih amaunaṃ ca maunaṃ ca*

¹With reference to *bālya* SP states: *balan nāmātmavidyayā-śeṣaviśayadr̥ṣṭitiraskaraṇam atas tadbhāvaḥ bālyam [tena tiṣṭhāset]*.

²Actually this refers to a person belonging to the Brāhmaṇa caste, but here it means one who knows the Brahman.

निःशेषमात्मसंबोधं कुर्यादिति विधीयते ।

तिष्ठतासेदिति संबन्धः सर्वत्र विधिना भवेत् ॥१७७॥

What is enjoined here is: he should bring about the full knowledge about the Ātman. (And) there is connection of the word *tiṣṭhāset* everywhere (as implied) by the injunction. ¹

[177]

¹SP clarifies this by stating the injunction in its fullness.

प्राणेन प्राणितीत्युक्तो दृष्टेर्द्रष्टेति चोदितः ।

स आत्मानुभवात्सिद्ध आ देहादा परात्मनः ॥१७८॥

What is mentioned in the word *prāṇena prāṇīti* ¹ and pointed out as *dr̥ṣṭer draṣṭā* is that Ātman established through experience, (as obtaining in the things) from the body to the highest self.

[178]

¹Cf. *Kenopaniṣad* 1.9: *yat prāṇena na prāṇīti* and *BU* 1.5.1: *yat ca prāṇīti yac ca na*.

अस्य प्रत्यक्पदार्थस्य ह्या समाप्तेर्विधीयते ।

धीः पाण्डित्यगिरा साक्षादन्वयव्यतिरेकतः ॥१७९॥

It is indeed of this very thing, the inner self, that is about which is here enjoined up to the end (of the injunction, viz. the acquisition of knowledge), which is expressed by the word *pāṇḍitya*, (and which is) directly known by the method of Anvaya and Vyatireka. [179]

तथैव योऽशनायेति परमात्मापि शब्दितः ।
तस्य निष्ठाविधानार्थं बाल्येनेति परं वचः ॥१८०॥

In the same way, the highest self also is mentioned in the words *yo 'śanāyā* ... (and) the subsequent statement in the words *bālyena* ... is for the purpose of enjoining the acquisition of that (knowledge about the Ātman). [180]

नान्यत्रेहाद्वितीयार्थात्साक्षादात्मार्थसंभवः ।
इत्यर्थोऽत्र विधेयः स्यादन्वयव्यतिरेकतः ॥१८१॥

Here in this injunction the object to be enjoined cannot be other than the one without a second, for, it means to have only the directly perceptible Ātman as the thing. (This is known) by the method of Anvaya and Vyatireka. [181]

SP points out: This is ascertaining the meaning of the word *tvam*, i.e. understanding the true nature of transitory being.

अद्वितीयपदार्थस्य तथा नैवात्मनोऽन्यतः ।
संभवोऽस्तीतिविध्यर्थस्तिष्ठासेदिति भण्यते ॥१८२॥

In the verb *tiṣṭhāset* is expressed the purpose of the injunction, viz. to point out that there is not any possible existence of any object, which is without a second, that is other than the Ātman and this is expressed in the potential mood expressed by the verb *tiṣṭhāset*. [182]

This is the purpose of the words *bālyena tiṣṭhāset* in ascertainment of the nature of the inner self (*tatpadārtha* as SP

called it).

विशेषणविशेष्यत्वसंबन्धोऽथ पदार्थयोः ।
विरुद्धार्थनिवृत्त्यात्र मुनिरित्यभिधीयते ॥१८३॥

There is between the two meanings signified by the two words (viz. *bālyā* and *pāṇḍityā*) the relation of the qualifier and the qualified¹ and therefore (*atha*) through (this) averting of there being opposed senses of them, there is here² stated (who is a) *muni* 'wise (person)'. [183]

This verse expresses the meaning of the word *muni*, i.e. a wise man who is aware of the oneness of the individual self and the Ātman.

¹SP explains *viśeṣaṇaviśeṣyatvasambandha* as *sāmānādhikaranya*, i.e. their obtaining/abiding in but one thing.

²In the sentence *atha munir amaunaṁ ca maunaṁ ca nirvidya*

ब्रह्मात्मनोरसंसर्गस्तद्विरुद्धार्थयोरिव ।
पदार्थैकत्वतो भेदो द्वावन्तद्वस्तौ निवर्तते ॥१८४॥

There is want of connection between the Brahman and the Ātman as distinction consists between two objects of opposite natures. Therefore, there being only oneness of the thing (viz. reality) when there is removal (lit. destruction) of ignorance (lit. darkness) recedes as there is/remains only one object (i.e. reality). [184]

सामानाधिकरण्यं च विशेषणविशेष्यता ।
लक्ष्यलक्षणसंबन्धः पदार्थप्रत्यगात्मनाम् ॥१८५॥

There exist between the thing (i.e. reality) and the individual selves abiding in (just) one object, the relation of the specifier and the specified, and also (the relation of) the indicator and what is indicated. [185]

SP points to the sequence in understanding just one (full) meaning from a Vedic sentence. This is further clarified in the next verse.

सामानाधिकरण्यादेर्घटेतरखयोरिव ।

व्यावृत्तेः स्यादवाक्यार्थः साक्षात्तत्त्वमर्थयोः ॥१८६॥

Owing to the warding away of (such relation as) (their) abiding in (just) one object, like that in the case of the skies in a pitcher and elsewhere, the meaning of the objects *tat* and *tvam* would become directly perceptible to us, (they would) not (be) the meaning of the sentence (viz. *tat tvam asi*). [186]

चिदज्ञानैकहेतुत्वाद्वातव्यानां चिदात्मनि ।

मोहध्वस्तौ प्रतीचोऽन्यो नातोऽर्थोऽत्रावशिष्यते ॥१८७॥

For this reason there does not remain here any object other than the inner self when there is removal (lit. destruction) of delusion on the part of the sentient Ātman about the objects which are (only) to be abandoned as they are caused by ignorance about the sentient one. [187]

आत्मधीविषयं नैति तदज्ञानैककारणः ।

अनात्ममानमेयोऽर्थो यतोऽतः केवलात्मता ॥१८८॥

Since an object to be known is related to the means of knowing, (both of them) being non-Ātmans; therefore, in respect of the knowledge about the Ātman, the Ātman does not become an object to be known; for it has only ignorance as the cause (for its existence). Therefore, there is the nature of the Ātman alone (as what is to be known). [188]

समाप्त्यामौनमखिलं बाल्यपाण्डित्यलक्षणम् ।

निर्विद्य च तथा मौनं पदार्थद्वयसंगतिम् ॥१८९॥

अथ ब्राह्मण इत्युक्त्या फलावस्थास्य भण्यते ।

In the statement *atha brāhmaṇaḥ* there is here stated the state of the result (acquired) by this individual when he has completely known (*nirvidya*) the connection between two *padārthas* viz. *bālyā* and *pāṇḍityā* having finally obtained the condition up to being a *muni*¹ which is indicated by *bālyā*, *pāṇḍityā* and also having completely known the condition of *muni*.

[189-190ab]

This has a reference to verse 176 above. This explains what is meant by *amaunam ca* and the purport of *atha brāhmaṇaḥ*.

¹This refers to meditation(s) on various objects, before one becomes a *muni* 'wise person'. The translation gives the purport of *amaunam* which literally means 'the condition of not being a *muni*'.

भेदसंसर्गहीनोऽर्थः स्वमहिम्नि व्यवस्थितः ।
साक्षादित्यादिरूपोऽथ ब्रह्म ब्राह्मण उच्यते ॥१९०॥

The meaning of *brāhmaṇa* is the Brahman which is a thing devoid of any contact with distinction (i.e. a distinct object) remaining in its own greatness and having the nature directly perceptible etc.

[190c-f]

इमामवस्थां संप्राप्य सर्वो ब्राह्मण उच्यते ।
ब्राह्मण्यं गौणमन्यत्र पूर्वभूमिषु नागजसा ॥१९१॥

Every being (i.e. each of all beings) is called a *Brāhmaṇa* after he has obtained this state; the nature of being a *Brāhmaṇa* is elsewhere related to (a being's having certain) qualities this belongs to the earlier stages; it does not go well with the consequent stage.¹

[191]

¹That is, after knowing the Brahman.

Verses 192-204 are the exposition of the meaning of the question

sa brāhmaṇaḥ kena syāt.

केनाथ ब्राह्मणः स स्यादिति प्रश्नमपृच्छत ।
उक्तोपायातिरेकेण पृच्छयते साधनान्तरम् ॥१९२॥

Then (Kahola) asked the question: 'whereby would he (i.e. a being) be a Brāhmaṇa?'; this is to say: (in this question is asked information about some other means) which are in addition to the known (lit. stated) ways of asking.¹ [192]

¹This is clarified in the next verse.

यज्ञादिलक्षणं तावत्पारंपर्येण साधनम् ।
निर्ज्ञातिमागमात्तस्मात्पृच्छयते साधनान्तरम् ॥१९३॥

Usually, one comes to know about the nature of the means which is characterized as a sacrifice etc. and its means as a sequel (which are) known from the scriptures; therefore, here is asked (a question about) another means of knowing (*kenātha brāhmaṇaḥ*). [193]

चतुर्णां कतमेनेति न तु प्रश्नोऽत्र युज्यते ।
कैवल्यश्रममादाय ब्राह्मण्यस्य समाप्तिः ॥१९४॥

Here (i.e. in respect of liberation) it is not a proper question as to which of the four (stages of life) is meant (by *kena*), because the state of a Brāhmaṇa (*brāhmabhāva*) is (accepted as) obtained by one, on having resorted to the stages of life marked by *kaivalya* 'being alone'. [194]

न चाश्रमान्तरं युक्तं मुनेर्व्युत्थायिनः सतः ।
कृतार्थस्याकृतार्थस्य तस्य नैवाश्रमान्तरम् ॥१९५॥

In the case of a wise man¹ (*muni*) who has risen (*vyuthāya*), it is not proper to entertain the idea of any other stages of life, for, in the case of him, who has known (lit. obtained)

reality (viz. already being one with reality) and also in the case of one who has not known reality, there cannot be any other stage of life.

[195]

¹Cf. SP: *kṛtārthaḥ sākṣātkṛtabrahmā munih.*

प्रश्नोऽयं साधनज्ञप्त्यै ब्राह्मणस्येह पृच्छयते ।
किंसाधनो ब्राह्मणः स्यादिति साधनमुच्यताम् ॥१९६॥

This question (viz. *kenārtha ...*) is asked here about a Brāhmaṇa in order to inform one about the means to attaining it; that is to say, with a view to (answering the question) *kiṃsādhano brāhmaṇaḥ syāt* 'what *sādhana*s should a Brāhmaṇa possess?' —(is it said) 'let the means be told'.

[196]

प्रश्नप्रतिवचस्तेन ब्राह्मणः स्याद्यथोदितः ।
येनानवाप्तज्ञानोऽपि भवेदीदृश एव ना ॥१९७॥

Therefore, the answer to the question is: So then a man would become a Brāhmaṇa, as said, even if he would not have obtained knowledge, i.e. who has become such.¹

[197]

¹Cf. by SP: *nirvyāpāra* 'not doing any action'.

उक्तब्राह्मणसादृश्यं सर्वकर्मनिरासतः ।
नैष्कर्म्यसाधनेनैव ब्राह्मणः स्याद्यथोदितः ॥१९८॥

There would be similarity of this man with a Brāhmaṇa, as stated, on account of having abandoned all activities, for, he would be a Brāhmaṇa as described by the very means consisting in actionlessness.

[198]

इत्येषोऽर्थो विधेयोऽत्र येनेति वचसा श्रुतेः ।
स्मृतयोऽपीममेवार्थं तत्र तत्र प्रचक्षते ॥१९९॥

Such meaning should be understood here ¹ by the statement

of the Śruti yena The Smṛtis also have spoken here and there of this very thing.² [199]

¹That is, in respect of liberation which is the end of a thinker.

²The word *api* suggests similar statements in the Śruti; cf. verse 204 below.

लोकेऽस्मिन्द्विविधा निष्ठा पुरा प्रोक्ता मयानघ ।
ज्ञानयोगेन सांख्यानां कर्मयोगेन योगिनाम् ॥२००॥

In the world, there is a twofold system of discipline as stated by me, O sinless one, this was declared by me before; the one followed by the Sāṃkhyas consisting in the pursuit of knowledge and the other by the Yogins, consisting in the pursuit of activity. [200]

This is a verse from *Gītā* 3.3.

इमौ द्वावेव पन्थानौ कर्मतत्यागलक्षणौ ।
सजातीयाद्विनिष्क्रान्तावनुत्क्रान्ततराविमौ ॥२०१॥

These only are two ways, characterized by (the performance of) action and by abandoning the same—that is, these two consist in being different from (any path of activity apparently) of similar nature and both being followed (i.e. adopted for performance by people) more (than any other path).¹ [201]

¹This is, on the authority of SP, a verse of Vyāsa, i.e. *Mahābhārata* comparable to 12.233.6:

*dvāv imāv atha panthānau yatra vedāḥ pratiṣṭhitāḥ /
pravṛttilakṣaṇo dharmo nivṛttiś ca subhāṣitāḥ //*

संन्यास एव ताभ्यां च विशेषेणातिवर्तते ।
तथा किं प्रजयेत्यादिः पन्थाः कर्मत्यजां श्रुतः ॥२०२॥

But it is only renunciation which excels them by its peculiarity,

viz. that it is heard as the way for those who abandon action altogether with the question, 'What is the purpose of having an offspring?'¹ [202]

¹Cf. *kim prajayā kariṣyāmo yeṣāṃ no 'yam ātmāyaṃ loka iti* (BU 4.4.22).

ब्रह्मचर्याश्रमादेव प्रव्रजेदिति भरिशः ।
 संन्यासमेव ब्रुवते मुक्तये सर्वकर्मणाम् ॥२०३॥
 श्रुतयः स्मृतयश्चोच्चैः शुद्धन्यायसमाश्रयात् ।
 सर्वकर्मनिरासेन ब्राह्मण्यं लभते ततः ॥२०४॥

That one should renounce right after the stage of celibate is stated (by the Śrutis and others) many times. Only renunciation of all the activities effects (or is the cause of) liberation: They say [203]
 aloud, i.e. the Śrutis and the Smṛtis say by resorting to the way of purity (*śuddhanyāya*)¹ does one obtain the status of a Brāhmaṇa.² [204]

¹This refers to the way of understanding the true nature of the Ātman and existence of a liberated person.

²This refers to the Brāhmaṇa stated in verses 190-191 above.

Verses 205-206 state another exposition of the passage sa brāhmaṇaḥ kena syāt.

केनेति यदि वाक्षेप उत्पत्त्यादेरसंभवात् ।
 साधनानामिहैकात्म्ये तथा च प्रागवादिषम् ॥२०५॥

Or, if in the words *kena* ... there is stated an objection: 'Owing to the impossibility of origination etc.,¹ there is (mere) oneness of all the means of activity'—so have I said earlier.² [205]

¹They are *utpatti*, *saṃskāra*, *vikāra*.

²This is according to SP's reference to SV.

साधनेनैतदैकात्म्यं येन येन चिकीर्ष्यते ।
तेन तेनेदृगेवात्मा नातिशीतिर्मनागपि ॥२०६॥

By whichever means this oneness of the Ātman is sought, through this means (of activity), by that everyone (is understood) the Ātman only in this way, there is not even a little excellence elsewhere. [206]

Verses 207-214 are yet another exposition of the same thing as above.

अथवा लक्षणोक्तिः स्याद्यथोक्तब्रह्मवेदिनः ।
येनेदृगेव चिहेन ब्राह्मणस्तेन लक्ष्यताम् ॥२०७॥

Or, this is the statement of the characteristic of one who has known the Brahman as said earlier; for, by such a characteristic is to be indicated (a Brāhmaṇa). [207]

देहेन्द्रियमनोबुद्धिधर्मानेषोऽत्यवर्तत ।
प्रत्यगैकात्म्यसंबोधात्तद्वैर्लक्ष्यते कथम् ॥२०८॥

This one has arrived beyond (or risen above) the properties of the body, organs, *manas* and intellect. How then would this one be characterized by the properties of them on account of his having attained the knowledge of the oneness of the inner self with the Ātman? [208]

The properties considered here are inclusion of *śamadama* etc. This is one alternative regarding the meaning of the properties.

सर्वसंसारभावोऽस्य न यथा लक्षणं तथा ।
सर्वाभावोऽपि नैव स्याल्लक्षणं ब्रह्मवेदिनः ॥२०९॥
वेद्यानुरोधतो यस्मात्तद्विदो न्यायलक्षणम् ।
भावाभावद्वयध्वंसि ब्रह्म वेद्यं च तद्विदः ॥२१०॥

The description of this one is not such as this person's being subject to transmigration. So also there would not be, in the case of this one, the absence of all that as such is the characteristic of the knower of the Brahman; [209] since, for the knower of that,¹ the nature of reason² is/should be in accordance with³ the object to be known (*vedya*). (And), the object to be known by/for the knower of that is the Brahman which destroys (the notion of both) existential and non-existential (entities). [210]

This is the second alternative about the properties alluded to in verse 208 above, i.e. it does not mean that absence of transmigration is a characteristic of the knower of the Brahman. From this it should be concluded that the proper description of the knower of the Brahman is that he has the right knowledge about the nature of the Brahman. Absence of any properties spoken about or transmigration does not form an essential characteristic of the knower of the Brahman. That characteristic is his being aware of the oneness of the self within himself and the highest Ātman.

¹This refers to the seeker of liberation/the Brahman.

²Translation follows the reading in both the AnSS and NKL editions. Yet the variant reading *nyāyylakṣaṇam* which is noted in the AnSS edition cannot be neglected. Hence the translation could be: the proper reason

³Or, following the nature of.

येनेदृगेव तेनेति तस्मादाह श्रुतिः स्फुटम् ।
मुमुक्षोर्लक्षणं तादृक्श्रद्धधाना यदब्रुवन् ॥२११॥

Therefore has the Śruti clearly stated *yena* ..., stated characteristic of one desirous of liberation since (the knowers) having similar faith have said so. [211]

सुषुप्तेऽप्यतिमूढस्य सर्वसंसारनिहनुतिः ।

गम्यते लक्षणं तादृङ् न चासौ ब्रह्मविन्मतः ॥२१२॥

In the case of even a stark foolish person there is noticed in the state of deep sleep the concealment (i.e. unawareness) of all transmigratory existence; therefore a person of that kind is not known as a knower of the Brahman. [212]

¹This is to justify the argument in verses 209-210.

आत्मनो ब्रह्मतेहोक्ता न त्वनात्मन ईरिता ।
यथोक्तज्ञानतो ऽवस्तिरार्तश्रुत्यात उच्यते ॥२१३॥

Thus, here is stated the condition of the inner Ātman as of the nature of the Brahman, but certainly not of any non-Ātman; therefore, from the knowledge, as is imparted here, there is stated by the Śruti the destruction of transmigration by using the word *ārta* 'afflicted'. [213]

अतो ब्राह्मण्यतोऽन्यद्यत्क्रियाकारकलक्षणम् ।
आर्तं विनाशि तज्ज्ञेयं ब्रह्मानार्तं यतस्ततः ॥२१४॥

From this (it follows that) whatever is different from *brāhmaṇya* 'the state of being a Brāhmaṇa' and is having the characteristic of (some) activity is afflicted, perishable; therefore, what is sought to be known¹ is the Brahman which is unafflicted. [214]

¹That about which there is question in the beginning of this Brāhmaṇa.

इति श्रीबृहदारण्यकोपनिषद्वाण्यवार्तिके तृतीयाध्यायस्य
पञ्चमं ब्राह्मणम् ॥५॥

BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA

3.6

Gārgī Brāhmaṇa

यः सर्वान्तर इत्युक्तस्तन्निर्णयविवक्षया ।
आ शाकल्यात्परो ग्रन्थ इतो व्याख्यायतेऽधुना ॥१॥

Now is explained hereafter the subsequent text (of the Upaniṣad) up to Śākalya (Brāhmaṇa)¹ with an intention to make a decision with regard to that (Ātman) which is described (i.e. stated)² as that which is within all. [1]

¹This refers to the 6th, 7th and 8th Brāhmaṇas. Śākalya (Brāhmaṇa) is the 9th.

²Add: in the two preceding (i.e. 4th and 5th) Brāhmaṇas.

विशेषणस्य सर्वस्य साक्षादित्यादिकस्य च ।
सर्वान्तरविनिर्णीतौ निर्णयः स्यात्कथं न्विति ॥२॥

How indeed would there be a decision of all attributes, viz. those beginning with *sākṣāt* 'directly perceptible' etc., while there is decision (only) of what is within all? [2]

The intention of what follows is to explain the significance of the various specifiers of the inner self to which a reference was made in the questions of both Uṣasta and Kahola.

अशनायाद्यतिक्रान्त्या प्रश्नार्थाविष्कृतिः कृता ।
न सम्यगिति मन्वाना गार्ग्यपृच्छदतः पुनः ॥३॥

Thinking that there was not sufficient clarification offered about what was asked in the question(s) by stating the transgression of hunger etc., Gārgī then asked a question again. [3]

क्षित्यादेर्वियदन्तस्य यावन्नैकात्म्यमुच्यते ।
निर्णीतार्थो न तावत्स्यात्प्रश्नः साक्षादिति रितः ॥४॥

So long as the oneness of the nature in respect of (this world), beginning with the earth and ending in the sky is not stated, the question (that was) stated in the words ... *sākṣāt* ... would not have been (finally) answered (lit. decided). [4]

The thought in this verse is clarified in the following verse.

बुभुक्षाद्येकदेहस्थनिषेधादनिषेधतः ।
क्षित्यादेर्वियदन्तस्य नातः प्रश्नार्थनिर्णयः ॥५॥

(That is to say:) From the negation (of the Ātman being) the world, beginning with the earth and ending with the sky, (and) from the negation of the desire for eating etc. (on the part of the inner self that is within a body), therefore, (it is said) that there is no decision about the matter under question. [5]

Now follows a statement that all the worlds, viz. from the earthly world to that of Brahman, are woven lengthwise and crosswise—this is in the manner of inference.

य एते पार्थिवा भावा लोष्टकुम्भादयो मताः ।
तेषामन्तर्बहिर्व्याप्तिः पृथिव्यैवैह लक्ष्यते ॥६॥

These things, which are known as made of earth, viz. a clod of clay, pitcher and others, are understood to have their pervasion by the earth within and without. [6]

This expresses the commonly known pervasion of all the *lokas* 'worlds' as being at the basis of the question by Gārgī.

यथैव पार्थिवा भावाः पृथिव्यैवं धरित्र्यपि ।

अद्विरन्तर्बहिश्चेयं व्याप्तैवेह समीक्ष्यते ॥७॥

As these earthly things are pervaded by the earth, so this earth also is pervaded by water both within and without—this is being considered here. [7]

एवं दृष्टं यतस्तस्माद्गार्गी प्रप्रच्छ लिङ्गतः ।
प्रश्नं यदिदमित्येवं याज्ञवल्क्यं महाधियम् ॥८॥
ओतप्रोतात्मना कार्यं येन येन समाप्लुतम् ।
तस्य तस्यान्यसंव्याप्तिर्दृष्टा लोके क्षितैर्यथा ॥९॥

Since this is so noticed, therefore, on the basis of (the method of) inference,¹ Gārgī asked Yājñavalkya of great intelligence² a question *yad idam* [8]
(for) it is noticed, as in the case of the earth, that there is pervasion of every effect by whichever (cause, lit. everyone of the causes) it (viz. effect) is pervaded (lit. covered) lengthwise and crosswise (i.e. fully).³ [9]

¹The word *linga* is used in this sense in the *Sāṃkhyakārikā*. Read SP on verse 9: *lingaśabditaṃ anumānam*.

²SP clarifies: *prṣṭaniṣṭānikanaśaktimattvaṃ mahādhītvam*.

³After explaining the meaning of this verse SP observes: *anyathā saktumuṣṭivad viśaraṇayāpatter ity arthaḥ*. This is based on BUB (p.443, line 11): *anyathā saktumuṣṭiviśīryeta*.

The form of inference (*linga* in the preceding verse) is stated in BUB (p.443, lines 12-13): *yat kāryam paricchinnaṃ sthūlaṃ kāraṇenāparichinnena sūkṣmeṇa vyāptam ity (anumānam) dr̥ṣṭam*.

This verse expects a statement about what pervades the earth; this is stated by the next verse.

अद्विश्चेयं क्षितिर्व्याप्ता तस्मात्तासामपीष्यते ।
अन्येन केनचिद्व्याप्तिर्व्यापकत्वाद्यथा भुवः ॥१०॥

And this earth is pervaded by the waters; therefore it is

accepted that there is pervasion of them also by yet some other thing, owing to its pervading capacity (as is noticed earlier) in the case of the earth. [10]

प्रत्युक्तिर्गार्गी वायावित्येवमेवोत्तरेष्वपि ।
वाक्येषु प्रतिपत्तव्या प्रत्युक्तिप्रश्नयोर्गतिः ॥११॥

The answer is: 'O Gārgī, it is in Vāyu (that the waters are woven lengthwise and crosswise or, in other words, pervaded). In the same way, again, it is to be understood in later sentences, in respect of the answer(s) to the question (put by Gārgī). [11]

पार्थिवाप्यौ समाश्रित्य तेजोऽभिव्यज्यते यतः ।
धातु न तु स्वतन्त्रं सन्नावदत्तेजसीत्यतः ॥१२॥

Since fire is revealed only after it has resorted to the two elements (*dhātū*) of earth and waters, therefore that (i.e. fire) not being independent, (Yājñavalkya) did not say (that the pervasion of the waters is) in fire. [12]

It is said in the Śruti: *agner āpah*. This should have invited Yājñavalkya's answer: 'The pervasion of the waters is by fire.' Yet, owing to its dependence on (pieces of) wood and lightning (which resides in, i.e. pervaded by, water, he referred to the pervasion of the waters by Vāyu).

सूक्ष्मताव्यापिते ज्ञेये भूम्यादेरुत्तरोत्तरम् ।
अक्षरात्मावसानानां पूर्वपूर्वप्रहाणतः ॥१३॥

Therefore, in respect of every object to be known as pervaded by subtlety, i.e. by every other more subtle object, among each subsequent object of knowledge, beginning with the earth etc. and ending with the imperishable Ātman, after every former (of the objects) is pervaded (lit. given up). [13]

आरम्भकबहुत्वाच्च बहूक्तिरिह गृह्यते ।
आत्मनोऽन्यद्यतः सर्वं पञ्चभूतात्मकं विदुः ॥१४॥

In the (statement of the question) mention is made of many objects, since there is plurality (or, maniness) of those which produce (other objects) and since all else than the Ātman have they known as comprised of five (great) elements. [14]

While concluding, SP (on this verse) quotes a line (from Bhartṛprapañca's comment?): *uktam hi na ca paramātmāno 'rvāk tadvyatirekeṇa vastvantaram astīti*.

द्वात्रिंशद्गुणितो मार्गो रथगत्या विवस्वतः ।
य उक्तस्तस्य संस्थित्या तस्थुरिन्द्रान्तदेवताः ॥१५॥

On the path of the sun, which has been stated as multiplied twelve times by the movement of its chariot, have the deities up to (their king) Indra remained,¹ owing to its steadiness.

[15]

¹Add: following the rule of pervasion.

स्थूलसूक्ष्मात्मना सर्वास्तारतम्येन संस्थिताः ।
व्याप्यव्यापितयान्योऽन्यं सर्वतःपरिमण्डलाः ॥१६॥

All (those deities) who have stayed in the gross and subtle form(s), (have remained there) in their mutual relation of the pervader and the pervaded (and) having everywhere the measure of an atom.¹

[16]

This refers to their atomic size; yet, when compared among themselves, the more gross atomic form of one is pervaded by the more subtle atomic form of another.

प्रजापतिर्विराडत्र योऽण्डस्यान्तर्व्यवस्थितः ।
ओतप्रोतानि तत्त्वानि तेन पूर्वाणि सर्वशः ॥१७॥

Here (i.e. among these deities), Prajāpati Virāj, who resides within this egg (of the universe), has woven lengthwise and crosswise all of the elements stated earlier. [17]

This distinguishes Prajāpati Virāj from all other deities since he is the pervader of all of them.

तस्योत्प्रोतभावोऽयं ब्रह्मलोकेषु भण्यते ।
अण्डारम्भकभूतानां ब्रह्मलोकाभिधेय्यते ॥१८॥

This nature (*bhāva*) of him (i.e. Prajāpati Virāj), i.e. as having woven lengthwise and crosswise (the entire universe) is (widely) spoken of in the Brahmalokas, (since) the name Brahmaloka is used (lit. accepted/desired as used) in respect of the elements which have been the producers of (*ārambhaka*) the egg (viz. the universe). [18]

तदेतल्लोकनिर्माणमोत्प्रोतात्मनोदितम् ।
अण्डान्तमेव व्याख्यातं किमन्यदवशिष्यते ॥१९॥

This is then (or thus) the creation of the worlds, viz. what ends in the egg, which is explained to be of the nature of what is woven lengthwise and crosswise (by Prajāpati Virāj); what else does there remain (to be mentioned)? [19]

समष्टिव्यष्टिभावेन वायुः सर्वाश्रयः पुरा ।
व्याख्यातो यः स वक्तव्यस्तदर्थः प्रश्न उत्तरः ॥२०॥

That Vāyu which was earlier¹ explained as the support of all, owing to its being their totality as well as each individual (i.e. all of the elements) has to be described and, therefore, there is the subsequent question (asked). [20]

¹This refers to the statements in Bhujyu's question and the answer to it.

ओताः प्रोताश्च कस्मिन् ब्रह्मलोका इतीर्यताम् ।
इति पृष्टोऽब्रवीद्गार्गि मातिप्राक्षीः कथं चन ॥२१॥

‘May this be told as to what it is in which are woven the Brahmaloka and others lengthwise and crosswise.’ Thus asked, (Yājñavalkya) said, ‘O Gārgī, in any way do not ask too much.’

[21]

मातीत्य प्रश्नविषयं गार्गि प्राक्षीः कथं चन ।
मा ते मूर्धा व्यपप्तेति त्वामहं वारयाम्यतः ॥२२॥

(This is to say:) ‘In no way, do you ask, O Gārgī, leaving aside (or setting aside the limit of) the line of question;¹ lest your head should fall² off, therefore, do I warn you’.

[22]

This clarifies Yājñavalkya’s reply yet further.

¹This refers to the reasonable range of queries.

²*vyapapta* is used by Sureśvara for the form *vyapaptat* — in BU.

उचितोऽस्या भवेत्प्रश्नो देवता येन पृच्छयते ।
वर्तते यस्तमुल्लङ्घ्य सोऽतिप्रश्नोऽनुमोच्यते ॥२३॥

(To explain it further:) The question would be reasonable only in that there is a query made about the deity. And (that question of hers) which transgresses the limit (of what is reasonable) is called too much of a question, viz. an inference.

[23]

That is to say, hereby is mentioned only an inference, which is the limit of argument.

या तमर्हति पूर्वोक्ता सातिप्रश्न्येह देवता ।
तदन्यत्वादिमां त्वाहुरनतिप्रश्न्यनामिकाम् ॥२४॥

That deity, which is stated earlier, deserves that (viz. the question to be asked). There the deity (mentioned) is one beyond reason and (now) this one (about which Gārgī asked), they have been described as a deity by name, 'Beyond question.'¹ [24]

¹That is, about whose name there cannot be put any question.

तामेतामनतिप्रश्न्यामतिप्रश्नेन साहसात् ।
पृच्छन्त्या मूर्धपातस्ते स्यादेव स्वापराधतः ॥२५॥

(Yājñavalkya meant:) Your head might fall off through your own fault (lit. offence), while you are asking so boldly (or, rashly) about this deity which is beyond question in your question (which is) beyond limit. [25]

स्थूलान्यनुमया युक्तं प्रष्टुं तत्त्वानि कामतः ।
इयं तु न तथा स्थूला यां त्वं पृच्छसि देवताम् ॥२६॥

(This is to say:) It is reasonable to put a question at will (only) about the elements in general (lit. that are gross) and which are (known by) inference, but this deity about which you are asking is not similarly (or in any way) gross. [26]

अचिन्त्या चाप्रतर्क्या च प्राणभावेन च स्थिता ।
नातोऽन्येन प्रमाणेन प्रष्टव्या देवतागमात् ॥२७॥

(That deity) is beyond thought, beyond reasoning and has remained there as life (of everything). Therefore, that deity should not be sought (lit. questioned about) by any other means than by tradition.¹ [27]

¹That is, Upaniṣadic thought.

एतस्मादेव हेतोस्तां तर्कशास्त्रेषु तार्किकाः ।

नैवानुमिन्वते त्रासात्पृथिव्यादीन्यथा तथा ॥२८॥

For this very reason, Logicians do not (seek to) infer that (deity), (only) though fear,¹ as they do here and there, in the case of the earth etc. [28]

¹Namely, that their head might fall off.

प्राणोऽयमनिर्वक्तो हि कस्तं निर्वक्तुमर्हति ।
मानान्तरेणागमतो मा प्राक्षीरित्यतो वचः ॥२९॥

Since this *prāṇa* 'life of all deities' is not (i.e. cannot be) described, who indeed can describe that by any means other than mere Tradition? Therefore are uttered the words (of Yājñavalkya), 'Do not ask (beyond limit)'. [29]

इति श्रीबृहदारण्यकोपनिषद्भाष्यवार्तिके तृतीयाध्यायस्य
षष्ठं ब्राह्मणम् ॥६॥

BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA

3.7

Antaryāmi Brāhmaṇa

यत्पिपृच्छिषितं गार्ग्या समष्टिव्यष्टिलक्षणम् ।
लिङ्गेनोद्दालकः सूत्रं तदपृच्छदथागमात् ॥१॥

Whatever, viz. that which was characterized as totality and severality, was sought by Gārgī, by means of inference, through her question, now, Uddālaka asked that (same), about Sūtra as is conveyed by tradition. [1]

तथा च तन्नियन्तारं जगज्जन्मादिकारणम् ।
आगमाद्गौतमोऽप्राक्षीद्याज्ञवल्क्यमुदारधीः ॥२॥

So also did Gautama, of great intellect (*udāradhī*), asked of Yājñavalkya about the controller of that (universe), the cause of the origin etc. of the universe, as (coming or known) from tradition. [2]

सूत्राद्यागमसंप्राप्तिं सोऽथाख्यानैकवर्त्मना ।
व्याचख्यौ गौतमः साक्षाद्गन्धर्वाल्लब्धवानिति ॥३॥

Gautama explained (to Yājñavalkya), in the form of a narrative, what he learnt as tradition about Sūtra etc., saying that he had learnt it directly from a Gandharva. [3]

Sureśvara avoids the details of the narrative. He dwells only on those points from the narrative which are relevant upon the query.

ब्रह्मेह परमात्मोक्तो लोका भूरादयस्तथा ।

देवास्त्वग्न्यादयो ज्ञेया वेदाश्चैव प्रसिद्धितः ॥४॥

In this (context), the Brahman is said to be the highest Ātman and the *lokas* as *bhū* 'earth' and others, and the deities again (*tu*) are to be known in Agni and others. Further, the Vedas are (to be known) from traditional knowledge (*prasiddhi*). [4]

ब्रह्मादीनि च भूतानि ग्रथितान्यक्षसूत्रवत् ।
सूत्रेण ध्रियमाणानि सदैवेशयतानि च ॥५॥

The elements, beginning with the Brahman, are woven together by Sūtra, as in a wreath of beads, ever held fast¹ and controlled by the Lord (i.e. Sūtra). [5]

¹That is, they are sustained or supported.

सूत्रेण विधृतं चान्तर्यामिणा संयतं तथा ।
आत्मानं वेद भोक्तारं वेद सर्वं जगत्तथा ॥६॥

Also he knew the entire universe as supported by Sūtra, controlled by (him), the inner controller. Also he knew the Ātman, the enjoyer. [6]

सूत्रान्तर्यामिरूपेण यो वेदैतान्पुरोदितान् ।
स एव ब्रह्मलोकान्तान्वेदेत्येषोऽस्य संग्रहः ॥७॥

This is in brief (the thought) of this:¹ Being in (i.e. having) the form (or, nature) of Sūtra, he knew all these that are described before—he alone knew the worlds up to (lit. ending in) the Brahmaloka. [7]

¹That is, the Upaniṣadic passage: *sa brahmavit ... sa sarvavit*.

अभ्यन्तरतमं सूत्रं ब्रह्मलोकावधेरपि ।
सूक्ष्मं हि तदतीवोक्तं सर्वसत्त्वसमाश्रयम् ॥८॥

Sūtra is the nearest within and is subtler (than all universe) up to (i.e. ending in the Brahmaloka, and it is extremely subtle and is said to be the resort of all beings. [8]

The basis of the thought in the preceding verse is stated now.

Now verses 9-24 are the exposition of BU 3.7.2.

Verses 9-24 explain the meaning of Vāyu read in BU words vāyur vaigautama

सर्वसाधारणं कर्म यदभिव्यक्तमिष्यते ।
वाय्वात्मना परिच्छिन्नं तदास्ते कारणात्मनि ॥९॥

Whatever is accepted as the clearly visible common activity is pervaded by what is of the nature of Vāyu; and that (activity) rests on its cause, viz. the Ātman (=Sūtrātman). [9]

नात्मानं लभते कर्म यतोऽसंश्रित्य साधनम् ।
वाय्वाश्रितमतः कर्म स्वरूपं प्रतिपद्यते ॥१०॥

Since an activity does not come into existence (i.e. get performed), unless it has rested (i.e. depended) on a means, therefore, any activity only resting on Vāyu becomes what it is. [10]

Read SP: *na hi spandasyādhāraṇam prāṇād ṛte kāraṇam asti tadviśeṣaṇam arthavad ity arthaḥ.*

साधारणस्य यो वायुर्विशिष्टस्य च धारकः ।
समष्टिव्यष्टिभावेन कर्मणः सर्वदेष्यते ॥११॥
तं वायुं तच्च कर्मैह य उपेत्य व्यवस्थितः ।
वायुकर्माभिमानी सन्पुमान्वायुः स उच्यते ॥१२॥

That Vāyu, which is the supporter of an activity, whether common and particular, is ever accepted in the form of totality and severality. [11]

Whoever stands resting on that Vāyu and that activity (of it), being aware that he is doing the activity resting on Vāyu, is the person (lit. a man), viz. Vāyu. [12]

That is the inner sentience (Jīva) which is, in fact, a form of Vāyu, viz. Sūtra. Jīva is here the effect of Sūtra's action, his nature of performance of sacrifice etc.

स एष वायुः सत्रात्मा देवः सर्वाश्रयः प्रभुः ।
देवतालिङ्गकर्मादि सर्वमत्रैव संश्रितम् ॥१३॥

This is (then) that Vāyu of the nature of Sūtra, the divine support of all and the lord, (and) all has rested on this, viz. the deities, the subtle body,¹ the activity etc.² [13]

This explains the word *sūtra* in the words of BU *tat sūtram*

....

¹This is for *liṅga*.

²The word *ādi* refers to *apūrvā* 'result of ritual activity'.

अनेन विधृतं जन्म वायुनेदं शरीरकम् ।
यच्चोत्पित्सु परं जन्म धृतं तदपि वायुना ॥१४॥

By this Vāyu is supported the origin (of any being), this body (and) that later life, which is about to originate is also supported by Vāyu. [14]

विष्टम्भकं पृथिव्यादेः सूक्ष्ममाकाशवत्स्थितम् ।
यदात्मकमिदं लिङ्गं यत्सप्तदशमुच्यते ॥१५॥

This (subtle) body,¹ which remains as the support of the elements, viz. the earth and others, and has remained subtle like the sky, is described as made up of seventeen.² [15]

¹This is *liṅga* noted in verse 13 above.

²The word *saptadaśa* means *saptadaśaka*, i.e. made up of

seventeen, viz. the ten organs, the five elements, *antahkaraṇa* (viz. *manas*, *buddhi*, *ahaṅkāra* and *cit*) and *prāṇa*.

यस्यावहादयो भेदाः सागरस्योर्मयो यथा ।
वासनानां च सर्वामाश्रयो यस्तु कथ्यते ॥१६॥

That Vāyu is mentioned here as one, whose various forms, viz. *āvaha* and others,¹ are like various waves of the ocean, and who is the support of all impressions.² [16]

¹They are *pravaha*, *nivaha*, *saṁvaha*, *udvaha*.

²Thus there is once again a reference to Sūtra who in the form of Vāyu is the support of all being.

यत एवमयं लोकः परश्चायं च सर्वतः ।
भूतानि चैव सर्वाणि वायुना ग्रथितान्यतः ॥१७॥

Since this is so, therefore, this world and the yonder world as also the elements are woven (lit. tied) together by Vāyu. [17]

This explains the meaning of BU words *vāyunā hi ... sandrbdhāni bhavanti*.

तस्यापसर्पणेऽङ्गानि नालं स्युः कर्मणे मृतौ ।
इत्यर्थे लोकसंसिद्धां प्रसिद्धिं श्रुतिरब्रवीत् ॥१८॥
वायुनैव धृताङ्गानीत्यत्र लोकेऽपि विद्यते ।
प्रसिद्धिरिति तामाह तस्मादित्येवमादिना ॥१९॥

When this Vāyu recedes (i.e. goes away from a body) at the time of death, various parts do not remain capable of doing any activity. To convey this popularly known matter, the Śruti has stated here (that known fact). [18]

Even in popular life the fact is known that the organs (of a body) are supported by only Vāyu; therefore has the Śruti stated the same in the words beginning with *tasmāt* [19]

वायुनैव धृतं यस्माल्लिलङ्गदेहादिकं ततः ।
ज्ञातयः पुरुषं प्रेतमाहुः कार्यं मृतेरिदम् ॥२०॥

Since the subtle body and others are supported only by Vāyu, therefore do the relatives of a man say about the departed one (*preta*)¹ as the effect of death. [20]

This explains the meaning of *tasmād vai gautama ...* in BU.

¹In common parlance *preta* refers to one (spirit) departed from a dead body; here it refers to the subtle form of a human being after death, i.e. departure from the body.

यथास्याङ्गानि लक्ष्यन्ते विस्रस्तानि न पूर्ववत् ।
मृतमेनं तथा मन्ये नेदृक्चिह्नं मृतिं विना ॥२१॥

As the dissipated organs of this one are not visible (lit. seen) as before, therefore, I think,¹ this one (they call) dead, because there cannot be such an appearance (lit. sign) except when there has occurred death. [21]

¹Sureśvara has used the first person singular form *manye*, but that is to be understood as *manyate* (third person singular form) 'people think so'—this is indicated by '(they call)'.

वायुनैव यथाङ्गानि संदृब्धानि यदा तदा ।
कर्मण्यानि भवन्त्यस्य न तु तानि तथा यतः ॥२२॥
तस्मात्प्रवसितप्राणो मृतोऽयं नात्र संशयः ।
यथोक्तसूत्रसद्भावे प्रसिद्धिर्गौतमेदृशी ॥२३॥

Since, when these organs (of a human being) are well bound together by only Vāyu, then, therefore, they do not remain capable (or, they) become incapable, of performing activities;¹ but, in the case of this one who is dead, those (organs) are not likewise. [22]

Therefore, this dead man is indeed one from whom Prāṇa

(i.e. Vāyu) has departed; there is no doubt about this. Such, O Gārgī, is the known fact regarding his becoming Sūtra, as stated before. [23]

This is the description of a dead body.

¹*karmanya* is derived from *karman* by the addition of the suffix *-yat* according to Pāṇini's rule 4.4.98: *tatra sādhu*.

सम्यगुक्तमिदं सूत्रं याज्ञवल्क्य यथा तथा ।
तदन्तर्गतमात्मानं ब्रह्मन्तर्यामिणं मम ॥२४॥

As, O Yājñavalkya, this is well explained in the same way, tell me, about that inner controller, viz. the Ātman within (me). [24]

This is an exposition of the words *evam eva* ... in BU.

Verses 25-47 are the exposition on the inner controller.
This is the exposition of BU 3.7.3.

सूत्रादप्यन्तरतमस्त्वन्तर्याम्यधुनोच्यते ।
कार्यकारणभावोऽयं यस्मिन्नुक्ते समाप्यते ॥२५॥

And (*tu*) now is being explained the inner controller who is yet more near (or, within) than Sūtra and in whose being described this (known) cause and effect relation becomes complete (i.e. completely explained). [25]

This explains the purport of *yaḥ prthivyām*

तिष्ठन्पृथिव्यां योऽत्र स्यात्सोऽन्तर्यामीति गृह्यताम् ।
इत्युक्तावतिसंव्याप्तिप्रसक्तावुत्तरं वचः ॥२६॥
अन्तरो यः पृथिव्याः स्यात्क्षितेरभ्यन्तरो हि यः ॥२७॥

Let it be understood here that that one is the inner controller who is abiding in the earth.... (Yet, for fear of making too

wide a statement there now follows the subsequent statement (of the Śruti).¹ [26]

The Śruti state '(The inner controller is he) who is within the earth' means '(It is he) who is the innermost within the earth.'² [27]

¹This seeks to avoid the feeling that all those who abide in the earth are like that inner controller. It can be taken as a parenthesis.

²This refers to the elemental/material earth.

पृथिवी देवता तर्हि त्वदुक्तार्थसमन्वयात् ।
इति दोषापनुत्त्यर्थं यं न वेदेति भण्यते ॥२८॥

Then, in order to avoid the following blame (being given to Yājñavalkya), viz. 'From well construing together your words (it would mean:) 'The earth is a deity,' the sage says, '(It is he) whom (the earth) does not know.' [28]

¹Sureśvara uses *prthivī* for divine deity and *kṣiti* for material earth.

सूत्रेण ध्रियमाणेयं महाभूतशरीरिणी ।
अहमस्मि पृथिव्येका बिभर्मि जगदव्ययम् ।
इत्येवमभिमाना या नान्तर्यामीति सोच्यते ॥२९॥

This earth, having the body made up of great element, is supported by Sūtra. The one who has the ego, 'I, the earth, alone support the world ever', is not called the inner controller. [29]

¹*avyayam* is an adverb, modifying the verb *bibharmi*; (it does not get connected with *jagat* as its adjective).

पृथिव्यपि च यं देवं न वेद स्वात्मनि स्थितम् ।
सोऽन्तर्यामीति मन्तव्यो न त्वयं देवता क्षितिः ॥३०॥

Let that be known as inner controller, the god whom even the earth did not know as dwelling within itself. And this earth is not to be taken as a deity. [30]

This explains the thought of verse 29.

क्षितौ करणवत्यां किमन्योऽपि करणादिमान् ।
नैवं यतः पृथिव्येव शरीरं यस्य नापरम् ॥३१॥

(A question is asked:) 'Is there anyone else, being possessed of limbs etc., within the earth which also is possessed of various means of activity?' (The answer is:) 'No, it is not so, since the earth itself is the body (of that one),¹ i.e. who does not have any other (body). [31]

¹This refers to the inner controller.

क्षमाकार्यकरणेनैव कार्यवान्करणी च यः ।
न कार्यं करणं चास्य किञ्चिदात्मीयमिष्यते ॥३२॥

(The inner controller is he) by the very producing the effect(s) of the earth is (said to be) having produced the effects (of the same) and as having organs (for himself). But, there is not (really) accepted of this one any activity and the means of achieving it as his own. [32]

अन्तर्यामी परः साक्षादशरीरोऽगुणोऽद्वयः ।
विलक्षणोऽतो विज्ञेयः पृथिवीदेवतात्मनः ॥३३॥

The inner controller is to be known as the one, who is directly perceptible, bodiless, propertiless, one without duality and of a different nature from that who is having the nature of the deity within the earth. [33]

स्वकार्यभूतां तामेव पृथिवीं मोहवर्त्मना ।

तत्र लब्धविशेषः संस्तामेवायं नियच्छति ॥३४॥

This one having acquired a particular (appearance) there (in that earth), controls that very earth which has been his own effect owing to the ignorance (about the nature of itself).

[34]

अदाहकोऽपि वह्निः सन्दाह्यद्रव्यसमाश्रयात् ।

तत्र लब्धात्मकस्तस्य दग्धा दाह्यस्य न स्वतः ॥३५॥

यथा ज्ञातैवमेवात्मा देवताद्यात्मकार्यगः ।

देवतादिशरीराद्यैर्देवतादीन्त्रियच्छति ॥३६॥

As fire, being one that does not burn while it is residing in the material to be burnt,¹ becomes one that burns what is to be burnt,² when it has obtained its form²—and not on its own;

[35]

in the same way, the Ātman, who is the knower while it is residing in deities and others who are its own products, controls the deities and others by means of the bodies etc. of those deities and others.

[36]

¹This is wood/faggot.

²Or, when it is produced/enkindled.

स्वतस्त्वकरणोऽदेहो निर्गुणोऽभेद एव च ।

चिदाभासस्वमोहोत्थकार्यैस्तद्वानिवेक्ष्यते ॥३७॥

(That one) who is by nature devoid of any organ and/or a body, who is devoid of any property and, who is without any differentiation (in itself), having the appearance of sentience becomes visible as having them viz. the effect arising from its ignorance, on account of the effect.

[37]

चतुर्धा प्रविभज्यैनं सात्वताः पर्युपासते ।

तथा हैरण्यगर्भीयास्तथा पाशुपतादयः ॥३८॥

This one do the Sāttvatas worship after having divided him into four parts, similarly (do the) worshipers of Hiranyagarbha and similarly, the Pāsupatas and others.¹ [38]

They are the followers of the Pañcarātra school who have posited a fourfold appearance of reality, viz. Vāsudeva, Saṅkarṣaṇa, Pradyumna and Aniruddha. This is supported by SP by quoting:

param brahma param dhāma caturātmakam avyayam //
prīṇayed vāsudevaṁ ca mūrtitrayasamanvitam //

also from another:

yā vai sarveśvarī śaktir īśvarākhyā niyāmikā //
jñānādibhedabhinnena ādyena caturātmanā //
(*Pauṣkarasaṁhitā* p.36, line 260, Melkoṭe: 1934)

and yet another:

antaryāmī ca sarveśaṁ devānām puruṣottamaḥ //
(*Pauṣkarasaṁhitā* p.36, line 258)

SP quotes verses in support of the Pāsupata or Māheśvara view:

nirañjane pare vyomni nityasthaḥ kārāṇo 'vyayaḥ //
sāñjanam śaktikarāṇair adhitiṣṭhati śaṅkarah //
sthitau sa kārakānetān samākranya svatejasā //
yunakti svārthasiddhyartham bhūtair anabhilakṣitaḥ //
(*Mrgendratānta* 1.4.1-2)

¹This refers to all the Seśvaravādins. The followers of Hiranyagarbha are understood by SP as the followers of Yoga school by NKL; it specifically understands them as such: cf. the quotation (constructed together from the citations in the two commentaries thus:) *uktam hi praṇidhānād vā kleśakarmavipākāśair aparā—mr̥ṣṭaḥ puruṣaviśeṣa īśvaras tatra niratiśayaṁ sarvajñabījaṁ sa pūrveśān api guruḥ.*

NKL also adds the thinkers who hold Him as the all-knowing maker of the universe.

कृष्णद्वैपायनो व्यासो वेदात्मा ध्वान्तहानिकृत् ।
प्राहेममेव बहुशः प्राणिनां हितकाम्यया ॥३९॥
नारायणः परोऽव्यक्तादण्डमव्यक्तसंभवम् ।

अण्डस्यान्तस्त्वमे लोकाः सप्तद्वीपा च मेदिनी ॥४०॥

Vyāsa, Kṛṣṇadvaipāyana, the knower of the very soul of the Veda, the remover of ignorance (lit. the destroyer of darkness) has said on many occasions, with a desire of doing good (about) only this one to human beings. [39]

"I am Nārāyaṇa beyond the invisible and this egg, which has come from (that) invisible, and these *lokas* and the world comprising seven islands are within that egg." [40]

The first line of verse 40 with a slight alteration, i.e. *avyaktadaham* instead of *avyaktāt*, is from *Mahābhārata* 2.App.I. 21.253; *Brahmāṇḍapurāṇa* 1.5.109, and the second line is from *Vāyupurāṇa* 1.50.79; *Brahmāṇḍapurāṇa* 1.21.21.

तस्मै नमोऽस्तु देवाय निर्गुणाय गुणात्मने ।
नारायणाय विश्वाय देवानां परमात्मने ॥४१॥
एतमेव समुद्दिश्य मन्त्रो नारायणस्तथा ।
वेदविद्भिर्महाप्राज्ञैः पुरुषैर्विनियुज्यते ॥४२॥

To that one (is offered) my obeisance, to that god, to the one without any property of (*Prakṛti*), who is the very essence of property, to Nārāyaṇa, to Viśva, the highest god of gods. [41]

It is with the intention of addressing this very god that the highly intelligent knowers of the Veda have have thought of (lit. have employed) the Mantra, viz. Nārāyaṇa [42]

The word *nārāyaṇa* indicates the god of thousand heads etc. as described in the Vedic Mantra:

sahasraśīrṣaṃ devaṃ viśvākṣaṃ viśvaśambhuvam /
viśvaṃ nārāyaṇaṃ devaṃ akṣaram paramam padam //
(*Taittirīya Āraṇyaka* 10.13.28)

प्रत्यग्ध्वान्तं चिदाभासं स्वकार्यनियमात्मकम् ।
तदुपाधिर्नियन्तैष परः प्रोक्तो न तु स्वतः ॥४३॥

(They have called him) as having the nature of the control (i.e. the controller) of his own effects, (viz. with reference to) the darkness (i.e. ignorance) about the inner self (and also) the appearance of sentience—(however) he is having them as his limiting adjuncts, he is called the highest controller, but not because of (his) own nature. [43]

The verse is very cryptic!

सर्वज्ञः सर्वशक्तिश्च सर्वात्मा सर्वगो ध्रुवः ।
जगज्जनिस्थितिध्वंसहेतुरेष सदेश्वरः ॥४४॥

This is the Lord who is ever omniscient, omnipotent, the self of all, omnipresent, immovable, the cause of the origin, sustenance and merger of the universe. [44]

स एषोऽभ्यन्तरो देवः सर्वकारणकारणः ।
नियच्छति क्षितिं देवीं सर्वावस्थासु सर्वदा ॥४५॥

This one is the god within (every body), the cause of all causes; he controls the earth and divine goddess (within it) and also in all its states (or conditions). [45]

This is the meaning of *eṣa ta ātmā* in BU.

The other paryāyas in the BU 3.7.4-13 are to be taken as explicable in the same way. There is now reference to BU 3.7.14ff.

तेजःसामान्यमात्रं स्यात्तदधिष्ठातृदेवता ।
एवं तमस्यपि ज्ञेयं क्षेत्रज्ञश्चात्मसंज्ञितः ॥४६॥

Similarly, Light is merely the common fire, the deity superintending over it. Thus it should be known in the case of the word *tamas* also; and the knower of the field is (to be understood as) mentioned by the word *ātman*.¹ [46]

This explains the words *yas tejasi ...* in BU. Here in this verse *tejas* and *tamas* are used in contrast.

¹This refers to the Mādhyandina reading *ya ātmani tiṣṭhan ...* where the word *ātman* refers to *jīva* and therefore the word *kṣetrajña* is introduced.

देवतास्थानकरणत्रयं प्राणगिरोच्यते ।
नियच्छति यतो गन्धे त्रयमप्येतदीश्वरः ॥४७॥

In the word *prāṇa*¹ are described the three, viz. the deities, the bases (i.e. abodes) of the deities (organs) and the organs, since the Lord controls all these three,² even in *gandha*.³

[47]

This explains what is meant by *prāṇa* in the words *yaḥ prāṇe tiṣṭhan* (in BU 3.7.16). And also *yo vāci* (in BU 3.7.17).

¹This refers to the sense of smell.

²This refers to *devatā*, *sthāna* and *karāṇa* stated in the first part of the verse.

³This refers to smell grasped by the organ of smell, mentioned by the word *prāṇa*. But it indicates the feeling of touch, form, taste.

Verses 48-60 are the exposition of the *śruti adṛṣṭo 'draṣṭā ...* (in BU 3.7.23).

पृथिवी यं न वेदेति यदुक्तं तस्य निर्णयः ।
अदृष्टोऽश्रुत इत्युक्त्या क्रियते ज्ञानशुद्धये ॥४८॥

There is now a decision regarding what was stated in *prthivī yaṁ na veda* by the statement *adṛṣṭo 'śrutah ...*; this is done for the sake of clarification of the knowledge (on the part of one).

[48]

द्रष्टृदर्शनदृश्यानां प्रत्यग्दृष्टिसमीक्षणे ।

जाड्यपारार्थ्यहेतुभ्यां शक्तिर्नास्ति मनागपि ॥४९॥

There is not even a little of capacity (i.e. meaningfulness) in the seer, the means of seeing¹ and the objects of seeing with respect to seeing well the inner self on account of the causes (which are marked by their) grossness and subservience.

[49]

This explains why the individual controller is not like the inner self as the agent of various activities.

¹*darśana* is from verb root *drś* by Pāṇini's rule 3.3.117: *karaṇādhikaraṇayoś ca*.

न द्रष्ट्रोर्दृश्ययोर्नापि तथा दर्शनयोर्मिथः ।

ग्राह्यग्राहकसंबन्धस्तत्साक्षी न च वीक्ष्यते ॥५०॥

In the two seers, the two objects of seeing and also in the two acts of seeing, there does not obtain (any) mutual relation as that of what is grasped and one who grasps;¹ the witness of all that is not seen.²

[50]

¹This refers to the (worldly) seer and the inner self which is really the seer etc., owing to *avidyā* 'ignorance'.

²This refers to the inner self which is not affected by *avidyā* and is, therefore, the witness.

रूपादिदर्शनान्तस्थ आगमापायसाक्ष्यसौ ।

नित्यात्मदृष्टिश्चिन्मात्रः पश्येत्तं पृथिवी कथम् ॥५१॥

The one who resides within the seer¹ of the forms etc. and the witness of the coming into existence and the departure from existence of objects is the sentience alone who ever has the consciousness of the eternal self. How then would the earth be able to see that?

[51]

Earlier it was mentioned that the inner controller resides within

the earth etc., that is to say, it is present even in the deities who have their abodes in them. Yet, while the deities can see various organs and activities and what is to be seen by them, it (viz. the inner controller), though within all of them, can never be seen by them.

¹*darśana* in this sense is according to Pāṇini's rule 3.3.115: *kdr̥tyalyuṭo bahulam*.

मागोचरातिवर्तित्वादसाधारणदृष्टितः ।
द्रष्टुरन्यस्य चाभावान्न तं पश्यन्ति देवताः ॥५२॥

Owing to its being beyond the objects of knowledge and owing also to having uncommon (capacity of) seeing, and also thanks to the absence of any other seer, the deities (of the organs) cannot (i.e. do not) see it. [52]

This explains the thought in the preceding verse.

दृष्टेर्द्रष्टारमित्यत्र यः साक्षी प्रागुदाहृतः ।
अन्तर्यामीति सोऽत्रापि नातोऽन्योऽस्तीति भण्यते ॥५३॥

The words *nāto 'nyo 'sti* are stated to point out that the witness here, who was earlier mentioned in the words *dr̥ṣṭer draṣṭā* ... is mentioned here also as the inner controller. [53]

बुद्ध्यन्तः पर एवात्मा विज्ञानात्मेति भण्यते ।
बुद्ध्यागमापायसाक्षी नियन्तैवोच्यते परः ॥५४॥

It is (only) the highest Ātman, who is within intellect, and (also) is stated as the knowing self (*vijñānātman*). The highest (Ātman) is called the controller (and) the witness of the coming into existence and departure from existence. [54]

अव्यावृत्ताननुगतः पूर्णः स्वात्मन्यवस्थितः ।
संसारहेत्वसंबन्धः सर्वो ब्रह्मेति भण्यते ॥५५॥

That one (viz. the inner controller) who is not distinguished from anything else and not similar to anything else and complete (in itself) is residing in one's self and, though having no relation whatever to what causes transmigration, is stated as the Brahman. [55]

कार्यकारणरूपस्य संसारस्य मृषात्मनः ।
अपूर्वानपरानन्ततत्त्वं ब्रह्मैव वाक्यतः ॥५६॥

Indeed, it should be known from (the Śruti) statement that it is the Brahman alone which is the reality, viz. *apūrva*, *anapara*, *anantara*, of this transmigratory existence which has the nature of the form of effects and their cause and (consequently) unreality. [56]

पृथिव्यादेश्च द्रष्टृत्वं तथान्तर्यामिणः श्रुतम् ।
द्रष्टृभेदः प्रसक्तोऽतो नान्योऽतोऽस्तीति भण्यते ॥५७॥

It is so heard (from the Śruti) that the inner controller has the capacity to see (the objects) such as the earth; therefore, there follows the contingency that there is distinction of the seer (from the object seen). For this reason, it is said (in the Śruti) *nānyo 'to 'sti*. [57]

एष एवैकलो द्रष्टा कारकादिविवर्जितः ।
संभाव्यते तदज्ञानकार्यमात्रस्तमस्विभिः ॥५८॥

Just this one is the single seer, who is devoid of all instruments etc. related to activity and is yet grasped (in this world as the seer etc.) by those who are overpowered by mere darkness which is the effect of ignorance about the nature of it. [58]

मां प्रत्येवैतीह यथासाधारण्येन भास्करम् ।
संभावयन्ति द्रष्टारस्तथाज्ञास्तदबोधजैः ॥५९॥

As they, i.e. those who see, find (i.e. consider) the sun as

‘This one is coming to me (alone),’ i.e. in an uncommon way; so also do the ignorant (think) about that (inner self by such means as are) caused by ignorance about it. [59]

दृष्टिरेकैव सर्वत्र सर्वानात्मविलक्षणा ।
आभाति बहुधैवेयं तदविद्योत्थहेतुभिः ॥६०॥

Thus, there appears the varied act of seeing (which is in reality only) one but everywhere different in nature in all non-Ātmans on account of the causes which have arisen from ignorance (about the true nature) of it. [60]

इति श्रीबृहदारण्यकोपनिषद्भाष्यवार्तिके तृतीयाध्यायस्य
सप्तमं ब्राह्मणम् ॥७॥

BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA

3.8

Akṣara Brāhmaṇa

Verses 1-3 state the topic of Sūtra 'the inner controller' in connection with BU 3.7. This incidentally relates to BU 3.8.1-2.

अशनायादिनिर्मुक्तं साक्षादित्यादिलक्षणम् ।
अतोऽक्षरं प्रवक्तव्यं निरुपाध्यात्मनि स्थितम् ॥१॥

(It is stated in the earlier Brāhmaṇa, that the inner controller and Sūtra) is devoid of hunger etc. and is characterized by properties such as directly perceptible etc. Therefore, now is to be revealed (i.e. explained) (that one) as imperishable and existing in the individual self, as having no limiting adjunct whatsoever. [1]

यदुद्दिश्य प्रवृत्तैषा व्याख्या सर्वान्तरं प्रति ।
तदक्षरं प्रवक्तव्यमित्यर्थेषोत्तरा श्रुतिः ॥२॥

The subsequent (portion of the) Śruti has proceeded for the purpose of revealing the imperishable with reference to which was this explanation offered as to what obtains in everyone (lit. all). [2]

गौतमेन पुरा पृष्टे सूत्रान्तर्यामिवस्तुनी ।
ओतप्रोतात्मतां गार्गी तयोरेवान्वपृच्छत ॥३॥

Earlier, Gautama asked questions about two things, viz. Sūtra and the inner controller. (And) Gārgī (now) asked about them, having the nature of the pervader, i.e. the one who has woven them lengthwise and crosswise. [3]

There now follows in verses 4-12 the exposition of BU 3.8.3 which answer the question about the basis of this world together with Sūtra. This, there is an answer to Gārgī's first question: *yad ūrdhvaṃ yājñavalkya divo yad arvāk pṛthvyāḥ yad antarā dyāvāpṛthivī ime yad bhūtaṃ ca bhavac ca bhaviṣyac cety ācakṣate.*

दिवो यदूर्ध्वं वस्तु स्यात्सद्वासद्वा विशेषितम् ।
अर्वाग्यच्च कपालात्स्यान्मध्ये यच्च कपालयोः ॥४॥

(In what is woven lengthwise and crosswise) the thing which is above heaven, which is distinguished as existent and non-existent and which is below the shell (in the form of earth) and whatever (exists) between two potsherds (in the form of both heaven and earth)? [4]

ऊर्ध्वं दिवः कपालाद्यदधो यच्चाधरात्पुटात् ।
यस्य मध्ये कपाले ते यच्च भूतादिलक्षणम् ॥५॥

Namely that which is above the shell (in the form of heaven) and that which is below the other shell (*puta*) and also that which is between the two shells characterized as what has been there etc. [5]

In verses 6-7, Sureśvara explains *bhūtādi* in BU 3.8.5 which he thinks is not stated (i.e. *anukta*) in BUB.

पदार्थगतिमेवं वा व्याचक्षीताविरोधतः ।
भूतं यत्समतिक्रान्तं भवद्यदधुनातनम् ॥६॥
भविष्यच्च यदागामि नातीतं नापि वर्तते ।
इत्याचक्षत इत्युक्त्यानुमादोषोऽपनुद्यते ॥७॥

Or rather, one should explain the nature of the final becoming (or, end) of the things in such a way as not to involve opposition (to the Śruti).¹ (To explain) *bhūta* 'what was' is 'what has already gone (i.e. occurred before)' and *bhavat* 'being'

is what belongs to the present.

[6]

Also *bhaviṣyat* 'what will be' is what will come into being and *atīta* 'what has never occurred before' and is not at present occurring. In the phrase *ity ācakṣate* (the Śruti) has set aside any (possible) fault in the description.

[7]

These verses justify the argument in the preceding verse.

¹Sureśvara has said *avirodhataḥ* with a view to stating (in the words of SP) the following: *bhāṣyānukto 'pi padārtho vākya-rthāvirodhitvād dr̥śyate cen na kṣatiḥ*.

एतदेवंविधं सूत्रमागमज्ञाः प्रचक्षते ।

ओतं प्रोतं च तत्कस्मिन्निति पृष्टो ब्रवीहि मे ॥८॥

"Thus have the knowers of tradition mentioned Sūtra of this nature. Now tell me, (O Yājñavalkya,) since you are asked, in what is (Sūtra) woven them lengthwise and crosswise?"

[8]

सूत्रे तावदिदं सर्वमोतं च प्रोतमेव च ।

वर्तमाने जगत्काल इति तावत्सुनिश्चितम् ॥९॥

To begin with, it is well decided that, all this world is woven lengthwise and crosswise in Sūtrātman (at the present time).

[9]

NKL offers this explanation: *vyāśraṁsiṣata* (corrected word from BU 3.7.2) *ity uktatvāt vāyau sadbuddhidarśanāt sūtrosyāpi tadāśrayatvaṁ vartamānakāle siddham*.

जगच्चाप्यनभिव्यक्तमाविर्भवति सांप्रतम् ।

व्यक्तिश्चेयं सतो युक्ता नासतो घटते यतः ॥१०॥

So also, the world that is (yet) unmanifest will soon be appearing and further this manifestation is reasonably accepted as from the existent, because it would not be possible (to occur at the moment) out of what is non-existent.

[10]

अभिव्यक्तं च सदिदं पुनरव्यक्ततामितम् ।
वायुना विधृतं तस्य रूपं यद्वार्तमानिकम् ॥११॥

This existent (world), which is manifest and will once again become unmanifest, has its own form supported by Vāyu,¹ viz. that is its present form. [11]

¹This refers to that which is equated to Sūtra as seen earlier.

अतीतानागतयोस्तु कालयोर्जगदात्मनः ।
सत्ता येनात्मना कस्मिन्नोता प्रोतेति भण्यताम् ॥१२॥

And (therefore), of whatever nature be the existence of it (world) in the past and the future periods of time, let that be told in what that is woven lengthwise and crosswise. [12]

*Now follows in verses 13-22 the exposition of BU 3.8.4.
The exposition that the ether forms the support of the world etc.*

प्रत्युच्चार्याथ गार्ग्योक्तमाकाशे प्राब्रवीदृषिः ।
ओतप्रोतकतां वायोर्जगतोऽसौ प्रयत्नतः ॥१३॥

Having purposefully¹ repeated the statement of Gārgī, the seer (ṛṣi) answered, 'Vāyu is that in which the world is woven lengthwise and crosswise'. [13]

¹Read SP: *prayatnas tu praśnābhyāsadvārā pratyukter abhyāsaḥ*.

क्षमाद्येतत्सूत्रपर्यन्तं नाशादूर्ध्वं जनेः पुरा ।
आकाशे तदविज्ञातं सत्तामात्रेण विद्यते ॥१४॥

(That is to say:) This (world), from the earth up to Sūtra, has been, before its origin, existent in the ether and also it will be there, after its destruction, only as an existent. [14]

This is Yājñavalkya's answer in brief.

यावद्वि जनिमत्किञ्चिन्नामादिप्रविभागवत् ।
आकाशस्तस्य सर्वस्य तत्त्वमत्र विवक्षितम् ॥१५॥

Whatever is here in this world has an origin and it has the divisions, viz. name etc.¹ The ether is the support of all that—this is intended to be (i.e. offered as) the truth (or reality). [15]

¹The word 'etc.' stands for form and activity.

व्यतिरेकं सतो नेदं लभतेऽनात्मकत्वतः ।
नाप्यन्वयं तदव्याप्तेर्नाप्यभावः सतीष्यते ॥१६॥

That (existent world), being a non-Ātman, does not attain (i.e. come to possess) any separate existence apart from the real existent. So also, it would not attain similarity (*anvaya*), since it is not pervaded (by any thing else). The condition of being a negative entity is also not accepted in respect of the (really) existent. [16]

सदतो जनिमत्तत्त्वं सर्पादे रशना यथा ।
सत्तत्त्वव्यतिरेकेण नान्या जनिमतो गतिः ॥१७॥

Therefore, the existent is reality which is (i.e. appears as) associated with origination; this is like a rope which comes to have the nature of reality with respect to a serpent etc.¹ That which has an origin cannot be explained as an existent apart from the existent reality. [17]

¹The word 'etc.' is redundant; but it means something else than the serpent.

सदेवेदमतः सर्वमुद्भूतिस्थितिहानिषु ।

सदेवेति तथा स्पष्टं छान्दोग्योपनिषद्वचः ॥१८॥

Therefore, all this is only the existent reality, in its states of origin, sustenance, and merger; to this effect, there is a clear statement of CU: *sad eva ... (ekamevādvitīyam)*.¹ [18]

¹CU 6.2.1.

अर्वागेवाक्षराज्ज्ञेया सत्तेयं जगतो निधिः ।
कार्यकारणनिर्मुक्तमक्षरं वक्ष्यते यतः ॥१९॥

The decision¹ (is): This existence of the world has to be understood as that which obtains only below (or up to) the imperishable, since it (viz. the imperishable) will be declared (by the Śruti) as free from all causes and effects. [19]

¹The word *nidhi* is paraphrased by SP as *nidāna* which is in the sense of decision. Refer to our book [Vol.8:1997] 2.1.27.

सर्वशक्तिरियं शक्तिर्या सदित्यभिधीयते ।
न च सत्तेति सामान्यं प्रत्ययार्थासमीक्षणात् ॥२०॥

This power, which is omnipotent and which is described (or called) as the existent, since there is not accepted (here) to be the common property, owing to meaning of the suffix *-tā*,¹ viz. '(the) nature' (of some *sat* 'existence'). [20]

¹NKL refers to Pāṇini Sūtra 5.1.119: *tasya bhāvas tatalau* conveying the sense of the suffix (*pratyaya*), this is explained further in the next verse.

न सतो व्यतिरेकेण सतोऽन्यो भाव ईक्ष्यते ।
अप्यभावो न लभते किमु भावोऽतिरेकताम् ॥२१॥

There is not any other thing beside the existent, as having

the nature of an existent. So also, the absence (of anything else) is not noticed, what then to say of something in addition to it? [21]

सदन्यबुद्धिगम्यस्य श्रुतिस्तस्मादनेकशः ।
अब्रवीद्भ्रान्तिमात्रत्वं मृत्तिकादिनिदर्शनैः ॥२२॥

Therefore, the Śruti has several times declared that it is merely the delusion in respect of what is (considered as an object) grasped by intellect as other than the existent, (this is done) by (citing various) examples of clay etc.¹ [22]

¹These examples are noticed in CU in the dialogue between Śvetaketu and Āruṇi in 6.1.4-6.

Now follows the exposition of the difference between ether and the inner controller.

आकाशवचसात्मैव ज्ञेयो नान्योऽत्र कश् चन ।
सर्वान्तरत्वं नान्यस्य युज्यतेऽनात्मनो यतः ॥२३॥

Here is to be understood by the word *ākāśa* only the Ātman and none else, because the nature of being within all cannot be reasonably ascribed to anything else that is non-Ātman. [23]

This is in refutation of the view of Bhartṛprapañca who holds the inner controller to be within the undifferentiated *ākāśa*.

आकाशो वा इति तथा ब्रह्मैव श्रुतिरब्रवीत् ।
कारणं चात्मनो नान्यन्नयन्तेषूपलभ्यते ॥२४॥

So has the Śruti stated in the words *ākāśo vai*¹ that there is only Brahman and even in the Vedānta texts² there is not noticed (i.e. mentioned) anything else than the Ātman as the cause (of this illusory world). [24]

¹CU 4.1; on *ākāśa*, refer to *ākāśādhikaraṇa* in BS 1.1.22-24, and, according to SP, *daharādhikaraṇa* in BS 1.3.14-21 also.

²This is for *trayyanteṣu*.

जगज्जनिस्थितिध्वस्तिनियमाद्यर्थकार्यपि ।
नात्मनः कारणादन्यः कश्चित्संभाव्यते श्रुतेः ॥२५॥

It cannot be understood from the Śruti that anything else than the Ātman is the cause, viz. the one who effects such things as the origin, sustenance, merger and control of the world.

[25]

एषोऽन्तर्याम्येष योनिः सर्वस्य प्रभवाप्ययौ ।
माण्डूकेयश्रुतिवच इति स्पष्टमधीयते ॥२६॥

So is this clearly stated (lit. recited) in the *Māṇḍūkyaopaniṣad* ¹ in the words *eṣo 'ntaryāmy eṣa yonih sarvasya prabhavāpyayau* 'This one is the inner controller, the source of all (and also) the origin and the end'.

[26]

¹*Māṇḍūkyaopaniṣad* 6.

नातोऽन्तर्यामिणः कल्प्यमन्यदव्याकृतं बुधैः ।
अक्षरान्तेषु तत्त्वेषु नाव्याकृतवचो यतः ॥२७॥

Therefore, the wise ones should not entertain the idea of another who is the inner controller, viz. that which is not unmanifest, since there is not a mention made of any unmanifest among various principles ¹ 'ending in imperishable'.

[27]

¹Those are various expressions used in the explanation of the different things in the world.

तद्वेदमिति चात्रापि जगदेवाभिधीयते ।

अव्याकृतगिरा तस्य व्याकृताव्याकृतत्वतः ॥२८॥

In the statement *tad dhedam* also, it is only the world that is expressed by the word 'unmanifest', because it has not (yet) become possessed of the nature of the differentiated and the undifferentiated. [28]

The employment of the word *eva* in this verse points to that the imperishable (*akṣara*) is not anything else than the inner self. This is based on the idea of the sameness of the world which is mentioned in BU 1.4.7 as both *vyākṛta* and *avyākṛta*.

सर्वस्यैष वशीत्युक्त्वा यतस्तस्यैव वेद्यताम् ।
यत्नात्प्राह श्रुतिस्तस्माद्यन्ताव्याकृतमुच्यते ॥२९॥

Also, having stated *sarvasyaiṣa vaśī*¹ (about the controller of all), the Śruti has emphatically (*yatnataḥ*) stated that it alone has the nature of what is to be known; therefore, (we can conclude that) the controller is called the undifferentiated. [29]

¹BU 4.4.22.

विद्या कर्म च संस्काराः प्रत्यगज्ञानतत्त्वकाः ।
देहग्रहणहेतुत्वं येषां नः श्रुतिरब्रवीत् ॥३०॥

One's knowledge, activity and impressions are things which have the nature of the ignorance about (the nature of) the inner self, in respect of which the Śruti has told us their being the cause of (one's) having a body. [30]

Sureśvara takes for this verse a support of the view of Bhartṛprapañca, who has not really made any difference between the unmanifest reality and the inner controller for explaining his ideas.

अविचारितसंसिद्धिप्रत्यगज्ञानसंस्थितिः ।

त्रयमेतत्सदा ग्राह्यं न कार्यं कारणं विना ॥३१॥

It should always be understood that this triad¹ consists in the existence of ignorance in respect of the inner self and which is established even without thought;² (because) there cannot be any effect without a cause. [31]

¹This refers to *vidyā*, *karma*, *saṃskāra*.

²This is for *avicāritasaṃsiddha*.

कर्मैवैतन्नयं तच्च नात्मानं लभते यतः ।

कारकाणि विनोत्पत्तौ प्रयोगमनुरुध्यते ॥३२॥

And since the triad which is but activity does not come into existence without (some) instrument of activity, therefore it rests on the employment of them. [32]

This states the view of Bhartṛprapañca; Sureśvara derives from it strength of his argument.

SP apparently cites the words of Bhartṛprapañca in support: *tathāhuh sarvāntaram vijñānātmarūpam mahārajanādilakṣaṇam trayamapy etat karmaiveti*.

प्रयोगरूपेणैवातो वेष्टितं कर्म तिष्ठति ।

कारणात्मनि संसृष्टं नान्यथातोऽस्य संस्थितिः ॥३३॥

Therefore, activity stands as determined (lit. encompassed) by (the triad in the) form in its employment in combination; for, that cannot come to exist in any other way. [33]

सप्रयोगगणः सर्वः सौक्ष्म्येण परमेण तु ।

प्राक्फलोद्भवतो नष्ट्वा प्रतीचि व्यवतिष्ठते ॥३४॥

And (*tu*) this group (of *kāraṇas*) together with their employment exists in the inner self in its most subtle form,

getting destroyed (in their apparent form) before the rise of their result. [34]

This also is on the basis of the view of Bhartṛprapañca as quoted by SP: (*saprayogagaṇam karma*) *vināśottarakālam pareṇa saukṣmyeṇa vyavatiṣṭhate astitvamātreṇa*.

प्रत्यक्संवित्तिवस्तुस्थः प्रमाणविरहादयम् ।
न ज्ञातः कुम्भवन्नापि चित्स्थत्वात्खरशृङ्गवत् ॥३५॥

But, this (group as mentioned above), existing in the consciousness of the inner self, does not become known because of the absence of any means of knowledge in the same way as a pitcher becomes (known); (and) also since it exists (only) in sentience, it is like the horn of a mule.¹ [35]

¹We do not see any horn of a mule; therefore, the simile only indicates the existence of the group of instrumentals (*kāraṇas*) in some unseen form like that of a mule's horns!

न चायं नेति नेतीति कारणत्वादिहोच्यते ।
विशेषस्याग्रहात्तद्वद्ब्रूयते नेदमित्यपि ॥३६॥

Further, there cannot also be a statement made regarding this, in the words *neti neti*,¹ for the reason that it is a cause. So also, it is not taken as in the words *nedam* 'not this', because there is not postulated any particular characteristic of it. [36]

In an example like *nedam nabhaḥ* there is an awareness of some characteristic of *nabhas* understood; but, in the case of group activity etc. existing in the inner self in a concealed form, no particular characteristic is observed.

¹BU 2.3.6.

क्षित्यादिसूत्रपर्यन्तं नियम्यापेक्षयोच्यते ।

नियन्ता कारणं चेति न तु सूत्रान्तिकेऽसति ॥३७॥

It is said to be the controller and the cause, since there is dependence on what is to be controlled, viz. what begins with the earth and what ends in Sūtra. But (this is) not (so) when it is not in the vicinity of Sūtra. [37]

After stating the view of Bhartṛprapañca, Sureśvara says by way of conclusion how that view is useful in the discussion under comment.

Unless and until there is ignorance about the nature of reality, there cannot be any notion of the earth etc. up to Sūtra and also of their controller.

It is helpful to read SP (at length): *sati sābhāse pratyagajñāne sūtrāntikaśabde niyamyakāryāpekṣayā niyantrkāraṇavyapadeśo nānyatheti bhartṛprapañcānām api matam. trayam api karmaiveti hi vadanti; tac ca kārakādhīnam āvidyam iti sādhitam ato matāntare 'pi svāvidyādhīnakarmakāryajagadapekṣatvān niyantrtvāder nāntaryāmikāraṇakṣarabheda iti bhāvaḥ.*

स्वात्मानुभवतन्त्रत्वात्प्रत्याख्यातुं न शक्यते ।
व्यावृत्तिविधिरूपाभ्यां सुषुप्तिरनुभूयते ॥३८॥

(Also) it (viz. ignorance) cannot be denied, since it depends on one's own¹ experience (of it). (And) sleep (i.e. ignorance) is experienced in the form of keeping from (activity) and performance (of it in the state of waking). [38]

This is clarified in the following two verses. About the meaning of *vidhi* here, we are not certain.

¹In the word *svātmā*, the component (of the compound) *ātman* is a reflexive pronoun.

व्यावृत्तः शुक्लपीतादेरन्धकारोऽनुभूयते ।
तथा विधिमुखेनापि द्विरेफोदरवत्तमः ॥३९॥

Darkness is directly experienced (i.e. becomes known) as distinguished/distinct from white and/or black (substances); so also (it becomes known) from an instructive statement, viz. 'Darkness is like a bee's belly.' [39]

स्वप्नबोधात्तदा तद्वद्विविक्तोऽर्थोऽनुभूयते ।
मूढोऽस्मीत्यपि साक्षाच्च मोहोऽयमनुभूयते ॥४०॥

After rising from sleep, the object which is experienced is known to be distinct (from that in the dream). Similarly, in the experience 'I have been a fool', ignorance is directly experienced. [40]

मूढोत्पत्तेः पुरा मोहः प्रत्यग्वस्त्वनुरोध्यभूत् ।
तदुत्पत्तौ ससंवित्को मोहो मूढप्रधानकः ॥४१॥

Before the origin of ego,¹ there was delusion which had obstructed the real nature of the thing (i.e. reality), viz. inner self. And whenever there is rise of it, ignorance is accompanied by a sentience and it is principally guided by ego. [41]

¹*mūḍha* is ego, which has arisen from delusion. This is because there is in one the rise of ego only when there is delusion.

सोऽयमैकात्म्यगर्भः सन्मोहः सर्वस्य कारकः ।
धर्मो च सर्वधर्माणां न परोक्षस्ततोऽश्ववत् ॥४२॥

Thus, delusion, being non-dual Ātman in its embryonic stage, is the producer of activity among all. That is the one possessing properties (known) and is not beyond all the properties, even like a horse. [42]

In the last part of the verse, there is simile based on dissimilarity (*vaidharmya*). The basis for this is a verse from the *Śloka-vārtika*, viz. 7.358:

paśyataḥ śvetimārūpaṃ heṣāśabdaṃ ca śṛṇvataḥ /

khuranispeṣaśabdaṃ ca śveto 'śvo dhāvatīti dhīḥ //

यन्तृत्वहेतुविध्वस्तावेष संपद्यतेऽक्षरम् ।
कूटस्थस्य द्वितीयेन संबन्धोऽबोधकारितः ॥४३॥

This one becomes the imperishable, when there occurs the destruction of the cause, viz. the capacity of a controller. The relation of the immutable with any second (thing or person) is only caused by the absence of knowledge (of its true nature).

[43]

Now begins the discussion of the second question of Gārgī.

प्रश्नोऽयं न तृतीयः स्यात्प्रतिज्ञातत्वतो द्वयोः ।
पूर्वोक्तस्यैव दाढ्यार्थं प्रश्नोऽयं पृच्छयते पुनः ॥४४॥

This¹ is not the third question (put by Gārgī), since the two questions have been already asked. And (it should be noted that) this question is asked with a view to lending strength to what was asked earlier.²

[44]

¹This refers to Gārgī's speech *yad ūrdhvam*

²Read SP: *dvābhyām praśnābhyām ity upakramāt (ataḥ) pr-
ṣṭasyaiva punarvacanam.*

पृष्टं भूयोऽपि चापृच्छदुक्तधीदृढनिश्चितौ ।
परायत्तप्रबोधोऽपि शक्तो वक्तुं यतस्ततः ॥४५॥

She once again asked what was asked earlier, in order that whatever knowledge or information was stated by Yājñavalkya was firmly confirmed. This is because it is possible for one to impart instruction that has depended on (yet) another (person altogether).¹

[45]

¹Here we get in Sureśvara (and possibly in Śaṅkara also) some expression in the popular belief in the existence of spirits

such as ghosts, who can make some person speak or blurt anything. Hereby, Sureśvara suggests that Gārgī wished a positive confirmation of the instruction as by Yājñavalkya himself. That is to say she wanted to ascertain if Yājñavalkya was not influenced by any being like a ghost etc.

एवेत्यवधृतेर्यद्वा पूर्वप्रश्नार्थशेषता ॥४६॥

Or rather, (there is to be understood) the remainder of the question (asked) earlier—(this is understood) from the specifying by (the word) *eva*. [46]

The word *eva* occurs in *ākāśe eva tad otam*

किमनेकत्र लीनिः स्यात्सत्रस्यापि क्षितेरिव ।
आकाश एव किं वा स्यादित्येवं पूर्वशेषता ॥४७॥

(The intention of the question is:) Is it that even the Sūtra merges into many objects like the earth? Or, does it merge only in ether? Such is the nature (of the question), viz. the remainder of the earlier (question). [47]

मोहोच्छित्तिर्यथावस्तुसम्यग्ज्ञानप्रसूतितः ।
सम्यग्ज्ञानप्रसिद्धयर्थमतः प्रश्नोऽयमुत्तरः ॥४८॥

The destruction of delusion results from the rise of proper knowledge of the thing as it is. Therefore, this subsequent question is asked with a view to rousing (or securing) the rise of proper knowledge. [48]

This is the purport of the question *kasmin nu khalv ākāśah....*

सूत्रादिक्षितिपर्यन्तमर्वाग्यन्तुरचेतनम् ।
निष्प्रमाणं यतस्तस्मात्पृच्छयते सप्रमाणकम् ॥४९॥

Since all the non-sentient below the controller, viz. all that,

which begins with Sūtra and ends in the earth, is without any authoritative means (for proving its existence), therefore, is the question asked about what can be understood with an authoritative means (of proof).¹ [49]

This expresses the general purport of Yājñavalkya's argument. The particular purport however, is given in the following verse.

¹This explains the two words here, viz. *niṣpramāṇa* and *sapramāṇaka* which distinguish between the Brahman for which there is an authoritative means, viz. Āgama (which leads to the right knowledge of reality), while all of the worldly things are understood by what are known as authoritative means, though in fact they lead to illusory knowledge.

सूत्रं तावत्सुदुर्ज्ञानमाकाशस्तु ततोऽप्यति ।
तस्मात्परतरं तत्त्वं दुर्वचोऽपि बृहस्पतेः ॥५०॥

Insofar as Sūtra is concerned, it is very difficult to perceive (lit. know), whereas the ether is yet more (difficult to know) than that. The (highest) reality is yet further more (difficult) to know; it is, even for Bṛhaspati, very difficult to speak about it.¹ [50]

The following verse clarifies the thought in this verse.

¹This points to the lord of speech

सूत्रान्तं वस्तु निर्देश्यमनिर्देश्ये प्रवेशितम् ।
यन्तरि व्योम्नि तदपि दुर्वाच्यमतिसूक्ष्मतः ॥५१॥

The things ending in (i.e. up to) Sūtra,¹ though they can be easily shown (lit. pointed out), are (said to have) merged in what cannot be shown, viz. the controller, the sky; that also is very difficult to speak about, because of its being extremely subtle (in form). [51]

¹We have translated as 'things', because the singular stands

for plurality of things (*jātav ekavacanam*).

सर्वमानातिवर्त्येकमुक्तं प्रत्यक्चिदात्मकम् ।
अव्यावृत्ताननुगतं ततोऽप्यक्षरसंज्ञितम् ॥५२॥

It is said that the thing having the nature of inner sentience, is beyond (lit. transgress) all means (of knowing); it is not distinguished (from any other thing) and is not similar (to any other thing) and, that is (beyond Sūtra) and is called the imperishable. [52]

This points to the extremely subtle form of the imperishable.

अज्ञातज्ञाततोऽन्यत्वान्निर्देश्यं न तदक्षरम् ।
साक्षादित्यादिरूपत्वान्नापि स्यात्तदपह्नुतिः ॥५३॥

That imperishable cannot be shown, since it is other than (i.e. different from) any unknown knower (or thing) and also since it has a form which is directly perceptible etc. There is not any concealment of it (i.e. of its existence) possible. [53]

अपि चेद्वक्त्यनिर्देश्यं कथंचिन्मोहविभ्रमात् ।
तथा विप्रतिपत्तिः स्यादनुक्तौ च पराजितः ॥५४॥
इति चेतसि संधाय याज्ञवल्क्यमपृच्छत् ।
गार्ग्यक्षरमनिर्देश्यं तां चासावब्रवीदिदम् ॥५५॥

Furthermore, if he (i.e. Yājñavalkya) were to state it (that the imperishable is) as what cannot be pointed out, somehow because of the play of delusion,¹ then, in that case, there could not be a dispute (i.e. disagreement in argument), and, in case there was no statement (made by him), he was (to be considered as) defeated. [54]

Having entertained this thought in mind (*sandhāya*), Gārgī asked Yājñavalkya (her question) and he (i.e. Yājñavalkya) said to her that it was difficult to show. [55]

This expresses the purport of the argument in Yājñavalkya's description of the imperishable, in a general way.

¹SP points out that *mohavibhramāt* means *gotṛṣṇāblāt*.

Verses 56-129 are the exposition of BU 3.8.8.

Now there is the exposition of the word akṣara.

एतद्वै तदिति प्राह प्रत्यक्साक्षिकमक्षरम् ।
अपास्ताशेषनिर्देशं यदनन्यप्रमाणकम् ॥५६॥

In the words *etad vai tat*, he pointed out that the imperishable has the inner self as its witness; also (in that he stated) that it refused every description and does not have a single (authoritative) means (for proving its existence). [56]

This explains the meaning of *idam* in Yājñavalkya's answer.

यत्साक्षाच्चापरोक्षाच्च ब्रह्मात्मेति विशेषितम् ।
प्रत्यक्तया तदैकात्म्यं स्वयमेव प्रतीयताम् ॥५७॥

Since the Brahman is specified in the words *sākṣāc cāparokṣāc ca*, as being within (an individual); therefore, let its singleness be understood from itself. [57]

न व्यावृत्तं विशेषेभ्यो नानुवृत्तं च गोत्ववत् ।
अव्यावृत्ताननुगतं चैतन्यं संविदीक्ष्यताम् ॥५८॥

It is not distinguished from what are particulars¹ and it is not repeatedly occurring (*anuvṛtta*) (in many individuals), like cowness (in all cows), (therefore) the sentience, the knowing one; be considered as not distinguished from or similar to (any other things). [58]

This verse explains the meaning of *avyāvṛttānanugata*. It means to say: It is not like a pitcher which is an object of direct

perception.

¹They are things known as having some specific attributes.

यस्मात्प्रसिद्धं नास्त्यन्यत्प्रसिद्धं यत्र कस्यचित् ।
अनन्यममषष्ठ्यर्थं वैशब्दस्तत्प्रसिद्धये ॥५९॥

Since there is not any other thing known, what is not known to any one, what is not known (lit. whose knowledge cannot be obtained) by any other (means of knowing)¹ and what is not (the object for one) expressed in the genitive (form); (therefore) the word *vai* is for establishing that (i.e. the object of that knowledge).²

[59]

¹This is for *ananya-ma*.

²This is for *aṣaṣṭhyartha*; but the correctness of the interpretation is doubtful.

साक्षादित्यादिवाक्येन योऽशनायादिना तथा ।
प्रत्यङ्ङभिहितो यत्नात्तन्निरा सोऽत्र युज्यते ॥६०॥

Since the inner self was specifically (*yatnāt*) described by the sentence beginning with the word *sākṣāt* and also by (the statement) *yo 'śanāyā*, therefore that one is here reasonably understood (*yujyate*) by the word *tat*.¹

[60]

¹This refers to the word *tat* in the question of Kahola. But, according to the editor of NKL it occurs in the statement *tat akṣaram gārgi*.

प्रत्यक्षासन्ननिष्ठत्वादेतच्छब्दस्य कुम्भवत् ।
यदेतदिति तत्साक्षाद्यथावत्प्रतिपद्यताम् ॥६१॥

Since the word *etat* is related to (*niṣṭhā*) what is directly perceived and near at hand, like a pitcher, therefore, the phrase *yad etat* should be understood in the same way as (conveying the idea of) that which is directly perceptible, as before

(*yathāvat*).

[61]

प्रत्यक्षैकप्रमाणोऽर्थो लौकिकोऽपि न शक्यते ।
प्रत्यक्षवद्वोधयितुं किमु प्रत्यङ्निरञ्जनम् ॥६२॥

Also it is not possible to say about a thing known in worldly dealings (*laukika*) as having direct perception as the means of knowing (it) like a thing which is directly perceptible.¹ What then to say about the inner self which is untinted (by any means of perception)?

[62]

¹This refers to agent (*pramātr*) of an act of perceiving other things directly.

क्षराद्विरुद्धधर्मत्वादक्षरं ब्रह्म भण्यते ।
कार्यकारणवद्वस्तु क्षरमत्र निषिध्यते ॥६३॥

The Brahman is described as imperishable on account of its having properties which are opposed to (those of) the perishable. Herein, a thing associated with cause and effect relation, viz. the perishable, is denied (or, refused).¹

[63]

¹This is the meaning of *a-* (really *nan*) in the word *akṣara*.

हानिवृद्धिस्वभावेन कारणात्मैव वर्तते ।
तत्प्रत्यगात्मा तद्धीनः कूटस्थोऽनन्यमानगः ॥६४॥

There exists only the Ātman marked as the cause (of some other object(s)) on account of its nature of losing and/or increasing its properties (lit. nature). (And) the inner self of it,¹ which is devoid of that,² is immutable and unknowable by any other means.

[64]

¹This refers to Jīva which is affected by delusion.

²This refers to the nature of the *kāraṇātman* mentioned in the first line of the verse.

ब्राह्मणास्तद्वदन्तीति स्वापराधनिषेधगीः ।

नात्माज्ञानाय सा युक्ता स हि साक्षात्तदीक्षते ॥६५॥

The statement (of Yājñavalkya), viz. *brāhmaṇā vadanti*, is for averting (any notion regarding) his own fault.¹ It is not made by him for (conveying) his (own) ignorance (about the nature) of the Ātman; for he sees (i.e. perceived) that² directly. [65]

¹The fault would consist in two things—(i) *avācyokti* which would lead to dispute, and (ii) *anukti* which would indicate his ignorance.

²This is for *tat*, i.e. the *akṣara* Brahman (in neuter), since already the masculine word *ātman* is used.

निर्देश्यत्वानुमादोषप्रसङ्गविनिवृत्तये ।

आगमैकप्रमाणत्वे वदन्तीत्यभिशब्दनम् ॥६६॥

The utterance of (the word) *vadanti* is for the purpose of avoiding contingency of the fault, viz. the quality of the (Brahman) as a thing which can be shown and the fault in the inference (about it) and also pointing to that (the argument of Yājñavalkya) as having only tradition as the authoritative means (of proving reality). [66]

एतावदेव प्रत्यक्षं सर्वयाथात्म्यवेदिनाम् ।

ब्राह्मणानामतो युक्तं फलपर्यवसायिनाम् ॥६७॥

Since only this much (of the great) magnitude is directly perceptible to Brāhmaṇas, who have been the knowers of the true nature of all (things of the world) and have secured the (final) result,¹ therefore, (the meaning of them) is (only) according to reason (or, reasonable). [67]

¹Namely, attainment of liberation. This points to the correctness and propriety in Yājñavalkya's answer.

ध्वस्तात्माज्ञानतत्कार्याः प्रत्यग्याथात्म्यबोधतः ।
वदन्ति ब्राह्मणास्तेऽतस्त्यक्तसर्वैषणास्पदम् ॥६८॥

Brāhmaṇas, who have destroyed their ignorance about the (inner) self and also the effects thereof, say (this) after (their having attained) the knowledge of the inner self (as it is). Therefore, it (viz. what they say) deserves to be called what is above (lit. has cast off) all desires.¹ [68]

¹This is *eṣaṇātraya*, viz. *putra* 'son', *vitta* 'wealth' and *loka* 'fame'.

एतदेव तु विज्ञाय व्युत्तिष्ठन्त्येषणात्रयात् ।
यतोऽतस्तत्स्वसंवेद्यं गार्ग्यक्षरमिदं ध्रुवम् ॥६९॥

Since they (viz. the Brāhmaṇas) rise above the three desires, only on knowing this (*etadeva*), therefore, this, which is known by it, O Gārgī, is certainly the imperishable. [69]

This verse sums up the thought in Yājñavalkya's statement *etat ... gārgi*.

Now follows in verses 70-110 a discussion on the purport of *asthūla* etc. in BUB 3.8.

तेषां चेत्स्यात्स्वसंवेद्यं निर्देश्यं तद्वटादिवत् ।
अस्थूलत्वान्न तच्छक्यं निर्देष्टुमिति सोऽब्रवीत् ॥७०॥

If this, i.e. what is known by itself, is for them a thing that can be pointed out like a pitcher etc., then it is not possible to point out that, on account of its non-grossness—this he (i.e. Yājñavalkya) said. [70]

अक्षरं यदि न स्थूलमणु तर्हि तदिष्यताम् ।
यतस्तत्प्रतिषेधार्थमनृण्विति जगाद ताम् ॥७१॥

Since (one would say:) 'If the imperishable is not gross, then let it be accepted as atomic in size'; therefore, Yājñavalkya said in order to reject that (argument), to her, '(it is) *anāṇu* 'non-atomic'.' [71]

परिमाणमहाभतप्राणनामान्वयादयः ।
कारणाद्या निषिध्यन्ते क्रमेण प्राप्त्यपेक्षया ॥७२॥

Here are negated the causes etc.,¹ viz. magnitude, great elements, *prāṇas*, names, continuity (of properties) etc.,² in their order stated, with an eye on (the argument regarding) their existence. [72]

¹This word 'etc.' here refers *rasa*, *gandha*, *cakṣuṣ*, *śrotra*, *vāk* and *manas*.

²This 'etc.' refers to fire, waters

प्रसज्यपर्युदासाभ्यां नञर्थः कोऽत्र गृह्यते ।
स्थूलापह्नुतिरेकत्र पर्युदासे तदन्यता ॥७३॥

(The objector might ask:) 'Which of the two meanings of *nañ* is understood here, viz. *prasajya*(*pratiṣedha*) 'negation of the possible contingency' and *paryudāsa* 'negation'? In one there is the rejection (lit. concealment) of what is gross¹ and in the second, i.e. *paryudāsa* (there is the idea of) its being something else (than grossness etc.)², [73]

¹This would only mean the absence of grossness etc.

²This will involve non-acceptance of Advaita 'non-duality (of reality)'.

स्थूलापह्नुतिरत्र स्याद्वस्तु यत्पारमार्थिकम् ।
नाभावनिष्ठोऽन्यत्रापि निषेधः किमुताक्षरे ॥७४॥

(The Siddhāntin answers:) 'Here there is rejection (of the idea

of its being) gross, since the thing is having the nature of the ultimate reality. Elsewhere (i.e. in popular dealings) also, there cannot be a negation of a negative entity which is not directly perceptible. How then could one say that there is a negation of the imperishable?'¹ [74]

The imperishable is the thing which is really in existence. It is not directly perceptible and, therefore, the fault, viz. the concealment of grossness cannot be brought against one who describes the imperishable as *asthūla* 'non-gross'.

¹This also is what cannot be directly perceptible.

पर्युदासेऽपि क्लृप्तानां न पृथक्त्वेन संस्थितिः ।
रज्जुसर्पादिवत्तस्मान्नोभयत्रापि दोषता ॥७५॥

In *paryudāsa* also, there is not an existence of what are imagined (or hypothesized) as different (from what exists in reality), as in the case of a rope and a serpent etc. Therefore, there is not thus in both the cases any possibility of a fault (*doṣatā*). [75]

दृष्टोऽपवादो लोकेऽस्मिन्नुत्सर्गविषये सति ।
स्थूलादेरपवादोऽयं निर्द्वये घटते कथम् ॥७६॥

(An objector would say:) 'There is exception seen in this world in respect of what is stated as a general rule. Therefore, how would this exception (or rejection) of gross etc., be properly (spoken) of what is devoid of duality? [76]

उत्सर्गस्यास्ति विषयो योऽनिर्ज्ञातात्मतत्त्वकः ।
अपवादस्य विषयो ज्ञातात्मैकसतत्त्वकः ॥७७॥

(The Siddhāntin answers:) The subject(-matter) of a general rule is that whose nature is not known, (whereas) the subject(-matter) of a rule for exception is of the nature of what is essentially known.¹ [77]

This verse sets aside the possible counter-argument that, even in respect of reality, there could be pointed out a case of exception to the general rule.

¹The translation of *jñātātmaikagatattvaka* had to be a bit hackneyed! It could alternatively be '... is of the nature of only known thing.'

अध्यस्तदिङ्निषेधश्च व्योम्न्येकस्मिन्यथा तथा ।
उत्सर्गापवादविधिनिषेधा एकलात्मनि ॥७८॥

As there could be a negation of the different quarters which are superimposed on a single (i.e. undifferentiated) sky; so also, there are, in respect of the non-dual Ātman, general rules, exceptions, injunctions and prohibitions. [78]

The argument in verses 76-78 is in respect of the negation of what can occur as *prasajya*(*pratiṣedha*), whereas, in verses 79-81, there is an argument about *paryudāsa*.

यदि वाक्षरयाथात्म्यं स्थूलादेरिह भण्यते ।
स्रग्वाथात्म्यमहेर्यद्वत्तथास्याक्षरमात्रतः ॥७९॥

Or rather, here is stated the nature of the imperishable, as it is, (in respect) of gross (objects of the world), as the true nature of a wreath (of flowers, in respect) of a serpent, since this one (viz. the Ātman/inner self) is only the imperishable. [79]

स्थूलादिहेतोर्दाहो वा द्रव्यान्तस्य प्रत्यगात्मनि ।
अस्थूलोक्तिसमुत्थात्मयाथात्म्यज्ञानवहिना ॥८०॥

Or rather, there is, in respect of the inner self, the destruction (lit. burning) of the cause, viz. gross(ness) etc., viz. the ignorance (about the nature of the inner self), by the fire (which is effected) by the fire in the form of the knowledge

of the true nature of the Ātman which arises from the statement (about it as) non-gross. [80]

क्षित्यादौ वियदन्तेऽस्मिन्स्थलादेः संभवो ननु ।
तदोतप्रोतवाक्येन तच्च सर्वं निराकृतम् ॥८१॥

(An objection is raised:) 'There is indeed the possibility (of the existence) of the gross etc., from the earth up to sky'. (The answer is:) 'But (ca) all that is refuted in the statement about its being woven lengthwise and crosswise.' [81]

The objection is based on the idea of properties in discretely existent objects and the answer to it is based on the rejection of them all on the ground of the absence of any substratum for them.

तस्याक्षरे कः प्रसङ्गो यतस्तत्प्रतिषिध्यते ।
अपि खे तदसंभाव्यं किमु तत्प्रत्यगात्मनि ॥८२॥

How could there be the contingency of the occurrence of those properties in the case of the imperishable, since all of that is rejected (as existent)? In the case of sky also, it is impossible (that they¹ occur therein), what then to say (about its impossible occurrence) in the inner self. [82]

Sky cannot be differentiated into this part or that. This holds good in the case of inner self also; cf. verse 78 above.

¹These are properties already mentioned. This refers to *sthūlādi* etc. which is negated in *apsu ... pṛthivyādaḥ*.

समस्तव्यस्ततां केचिद्ब्रह्मणः प्रतिजानते ।
यतोऽतस्तन्निषेधार्थं निषिद्धं सन्निषिध्यते ॥८३॥

Since some scholars¹ postulate that the Brahman has its appearance of totality and severality; therefore, here is rejected what is already rejected only for the sake of refutation (lit.

rejection) of that.

[83]

¹According to SP, these are individuals who may be some Vedāntins with only slight differences with the Kevalādvaitins. However, NKL states that the word *kecit* points to these just mentioned and Bhartṛprapañca also; this is possibly because the verse uses the word *samastavyastatā*.

व्यक्तावस्थाथवैतेषां निषिद्धा कारणात्मनि ।
शक्त्यवस्थानिषेधोऽयं क्रियते त्वक्षरात्मनि ॥८४॥

Or perhaps, the unmanifest existence of these¹ is rejected (as obtaining) in the Ātman which is their cause.² As such, this is rejection of the state of (having) the ability (to produce them) in respect of the imperishable Ātman. [84]

¹This refers to discrete objects.

²This is held as the cause of the discrete objects, through ignorance.

एवं च सति तत्पूर्णं ब्रह्म कृत्स्नं च युज्यते ।
अन्यथाकृत्स्नमेव स्यादनिर्मोक्षश्च सज्यते ॥८५॥

Such being the case, it is only reasonable (to understand) the Brahman as full and complete; otherwise, it would be only incomplete and there would result only absence of liberation. [85]

This seeks to establish that the scripture regarding liberation (viz. *ātmajñānāt mokṣaḥ*) is only purposeful.

न वा निषेधः स्थूलादेस्तस्य प्रागेव सिद्धितः ।
तन्निषेधानुवादेन प्रतीचि ब्रह्म बोध्यते ॥८६॥
स्थूलादिमैयमामातृनिषेधफलं स्वभम् ।
विद्धि सर्वान्तरं ब्रह्म साक्षादित्यादिलक्षणम् ॥८७॥

Or perhaps, there is no rejection of what is gross etc., because that is already established and, therefore, by mere repeating the rejection in respect of the inner self, it is the Brahman which is made known. [86]

Therefore, know you the Brahman as the existence within all and having the characteristic of being directly perceptible etc., (that Brahman) which is self-luminous (and) as resulting from the rejection of the objects to be known, such as gross etc. right knowledge and the means of knowing (the objects). [87]

The sentence *asthūlam* ... is thus described here as not meant for the rejection of objects which are gross etc.; it is an *anuvāda* 'repeated statement' for conveying the real nature of the inner self as the Brahman.

सर्वेषामपि चोद्यानामेवं सति न संभवः ।
नेति नेतीतिवद्व्याख्या सर्वापीह समीक्ष्यताम् ॥८८॥

This being so, there cannot be any other possible counter-objection (*codya*). (Therefore), let here be understood (lit. well seen) that this explanation here¹ is like that in the statement *neti neti*. [88]

¹That is, in the statement *asthūlam anāṇu* ...

स्थूलादिपरिमाणं हि द्रव्यमात्रव्यपाश्रयम् ।
तस्माद्द्रव्यनिषेधोऽयं परिमाणनिषेधतः ॥८९॥

Since the reference to magnitude in *sthūla* etc. is supported only in substance, therefore, this is the rejection of the substances through the rejection of the magnitude (understood from the word *asthūla*). [89]

In verses 89-92 is explained the significance of the rejection (*niṣedha*) as pertaining to substances.

सर्वथापि तु यत्किञ्चिद्वाचो गोचरतां गतम् ।
प्रमाणस्य च तत्सर्वमक्षरे प्रतिषिध्यते ॥९०॥

In every way, then, there is rejected, in the case of the imperishable whatever has become the object of speech and (also) of the means of knowing. [90]

In the sentence *asthūlam* ... the Upaniṣad uses different words for the purpose of rejecting every argument based on the use of different words in language for describing the various objects of knowing. Cp. SP: *uktaviśeṣaṇiṣedho 'nuktaviśeṣaṇiṣedhopa-lakṣaṇam iti bhāvaḥ*.

विशेषप्रतिषेधे च क्रम आश्रीयते ध्रुवम् ।
सामर्थ्यादेव नान्यस्मात्कारणादिति निश्चयः ॥९१॥
पूर्वोत्तरनिषेधयानां सामर्थ्यादेव च क्रमः ।
पूर्वस्मिन्प्रतिषिद्धेऽन्यः सामर्थ्यादेव ढौकते ॥९२॥

There is a definite sequence accepted (lit. resorted to) in rejecting the particular (attributes); this is owing to propriety (*sāmarthyā*) and not because of any other reason; such is the decision. [91]

And the order of the former and the subsequent properties (of objects), to be rejected, is owing only to propriety, since the latter, being rejected, pushes itself there (*dhaukate*) owing to its propriety. [92]

अस्थौल्यादणु तत्प्राप्तं तन्नानण यतोऽक्षरम् ।
ह्रस्वं नैव यतोऽह्रस्वं नापि दीर्घं यतोऽक्षरम् ।
अदीर्घमित्यतो द्रव्यं न स्यादक्षरमव्ययम् ॥९३॥

(To explain:) It is not gross, therefore it is to be accepted (*prāpta*) as subtle (and) it is not subtle, since it is the imperishable. It is not all short and because it is neither short nor long, since it is the imperishable. From being not long, it is not (to be accepted as) a substance—it is the imperishable

(and) never diminishing (or, never varying).

[93]

Verses 93-107 clarify the thought in the two preceding verses.

आदित्यवर्णवचनादस्तु तद्रोहितात्मकम् ।
नैवं यतोऽलोहितं तत्सर्वरूपादिवर्जितम् ॥९४॥

(One might say:) 'On the basis of the statement (about it as) *ādityavarṇa*, let that (imperishable) be red in colour'. (The answer is:) 'No, it is not so, since it is devoid of all, viz. form etc., therefore, it is not red'.

[94]

अपां गुणोऽत्र स्नेहः स्याच्छायादीप्तिरिहेष्यते ।
तमो ध्वान्तमिति ज्ञेयमतमोऽक्षरमुच्यते ॥९५॥

Here (i.e. in the word *asneha*) *sneha* means the property of waters; so also, *chāyā* is accepted to mean the absence of brightness. (Also) *tamas* is to be taken as the object called darkness (i.e. ignorance) and, therefore, is called the imperishable (which is) free from darkness.

[95]

SP has rightly observed on *chāyādīpti* that *adīptir iti cchedah*.

न भूतं तत्पृथिव्यादि नापि भूतगुणास्तथा ।
सर्वान्तराधिकाराद्धि तथोभयनिषेधतः ॥९६॥

It is not any element such as the earth etc., not also the properties of the elements; this is so, because there is a rejection of both¹ for the reason that the topic or context is of what is within all.

[96]

This explains *arasam agandham*.

¹Namely, the elements and their properties.

अस्तु सङ्गात्मकं तर्हि वासनासङ्गदर्शनात् ।
नैतद्यतोऽसङ्गमिदमसङ्गो हीति वक्ष्यति ॥९७॥

(One would say:) 'Let there be the reference to what has the nature of attachment, since there is noticed attachment of impressions to it.' (This is refuted:) 'This is not the case, it is without any attachment to anything. (The Upaniṣad itself) will declare (about the Ātman) as 'this one devoid of (any) attachment.'¹

[97]

¹Cf. *asaṅgo na hi saṃyate* ... (BU 4.2.4; 4.4.22; 4.5.15).

नापीन्द्रियमिदं ज्ञेयं यतोऽचक्षुष्कमक्षरम् ।
नेन्द्रियाण्यस्य विद्यन्ते नापि तत्स्वयमिन्द्रियम् ॥९८॥

Let this not be known as a sense-organ also, because (it is said that) the imperishable does not have an eye. This is to say: it does not have any sense-organ and also it is not itself a sense-organ.

[98]

विज्ञानलक्षणं तेजोऽतेजस्कमिति वार्यते ।
कस्मादेतन्न तत्सर्वं यतोऽप्राणं तदक्षरम् ॥९९॥

(One might say:) (It is to be known) as light which is characteristic of knowledge (on the part of an individual). But this is rejected by the use of the word *atejaska* 'not having light'. (One asks a question:) 'Why is this not all that?' (The answer is:) 'Because the imperishable does not have any *prāṇa*.'

[99]

कारणप्रतिषेधेन कृत्स्नकार्यनिषेधतः ।
पूर्णं तदक्षरं ज्ञेयं साक्षादित्यादिलक्षणम् ॥१००॥

(Thus) by rejecting (it to be) the cause and also (from the rejection of the idea of) all effects, let the imperishable be understood as full, having the characteristics such as directly perceptible etc.

[100]

अक्षरं येन रूपेण स्थूलं वस्तु निषेधति ।
तेनैवाण्वादि निःशेषं तस्य सर्वविरोधतः ॥१०१॥

With that nature, whereby the imperishable opposes (lit. rejects) any gross object (does it oppose) all the objects beginning with the subtle in their entirety, for it is opposed to all of them. [101]

अन्येनान्येन रूपेण विरुद्धान्हन्ति पावकः ।
विरोधिना यथा तद्वन्नेह स्थूलाद्यपाक्रिया ॥१०२॥

As fire burns all the opposed objects, by assuming different forms which are opposed (to the objects to be burnt), so (is not to be accepted) the rejection of the gross etc. [102]

The argument in the verse is based on *vaidharmya*. Fire can be different in forms, as the one in the stomach of an individual and another in some mountain valley etc. and can help digestion and burn logs of wood (and other objects). But the imperishable does not undergo any change of form and does not consume (i.e. reject) other objects, viz. the gross etc., because none of them really exists beside itself.

मानित्वादिनिषेधः स्याद्यथैकाक्रियरूपतः ।
प्रत्यक्कूटस्थरूपेण तथा सर्वनिषेधकृत् ॥१०३॥

There is rejection here of (the imperishable as) having any means of activity—since it is only of the nature of what is not the performer of any activity. Further, being the inner self, the immutable, it rejects all (other objects). [103]

कूटस्थबोधपर्णत्वं प्रत्यक्त्वं वस्तुनः स्वतः ।
एतदस्य विरोधित्वं कार्यकारणवस्तुभिः ॥१०४॥

(Thus, therefore) the thing (viz. Ātman) itself is really in the form of the inner self and also has the nature of the immutable

and being full of knowledge. This is its character being opposed to all things (that can be differentiated as) cause(s) and effect(s).

[104]

द्वारं मुखं प्रतीकं वा यदि वा लिङ्गमुच्यते ।
निषेधोऽमुखमित्येवं त्रयस्याप्यभिधीयते ॥१०५॥

The word *mukha* is understood in the sense of a door or an opening, or even as some characteristic mark (*liṅga*), therefore, in the word *amukham*, there is rejection of all the three of them.

[105]

This is the explanation of the word *amukham*.

मात्रेति मानमिच्छन्ति मेयोऽर्थस्तेन मीयते ।
अक्षरे तदसंभाव्यममात्रं तद्यतस्ततः ॥१०६॥

They understand the word *mātrā* in the sense of the means of knowing, for hereby an object to be known becomes known. (But) all that is not possible (to think of) in the case of the imperishable; therefore, it is (described in the word) *amātra*.

[106]

This explains the word *amātra*.

मात्रादिलक्षणा यत्र सामग्री वस्तुनीष्यते ।
तत्प्रमेयमिति न्याय्यं न तु वस्त्वद्वयं स्वतः ॥१०७॥

It is reasonable that, only that has to be known as the object of knowledge, in respect of which there is expected every aid (*sāmagrī*) such as characterized by the word *mātrā*; but not the thing (viz. reality) which is by nature non-dual. [107]

व्याप्यव्यापकसंबन्धा न चाप्यक्षरवस्तुनि ।
न तदशनातिवाक्येन यतस्तद्वार्यते द्वयम् ॥१०८॥

Also, in respect of the imperishable thing (viz. reality), there is (not to be entertained) the relation as obtaining between the pervaded and the pervader, for, in the sentence *na tad aśnāti*, that pair¹ is denied. [108]

¹This is for *vyāpya* and *vyāpaka* objects.

निषिद्धमखिलं वस्तु यत्किञ्चिज्जगतीक्ष्यते ।
अवशिष्टं च यत्तच्च न प्रमाणोपपादितम् ॥१०९॥
एवं चेदक्षरं तादृक्कथमस्तीति गम्यते ।
न हि प्रमाणविरहादस्ति वस्त्विति वीक्ष्यते ॥११०॥

All the things that are seen in this world, without any exception, are rejected; therefore, that which remains (in reality) is not explained (or presented) by any means of knowing. [109]
(An objector asks:) 'If such is (the nature of the imperishable), then how does it become known; because, in the absence of any means of knowing, nothing is understood as existing?' [110]

Verses 109-110 are the refutation of an objection that the earlier argument would lead to acceptance of *śūnyatā*.

सिद्धसाध्यत्वतो नैवं तथा चोक्तोत्तरत्वतः ।
भावाभावातिरेकित्वादभ्युपेतं त्वयोच्यते ॥१११॥

So also, (the imperishable) is not like this (viz. *śūnya*), because it has the nature of what is established and what is to be established (both); for that has been so given in (your) answer (i.e. proof).¹ You have yourself² accepted that as existing beside a positive entity and (also) a negative entity. [111]

¹This refers to *svaprakāśatva* of the imperishable.

²This refers to an objector.

Verse 112-129 are the discussion of the existence of the imperishable on the basis of *pramāṇa* and tradition.

मानाभावे च तत्रेति व्यतिरेकः कुतोऽन्वयम् ।
मानाभावं किमद्राक्षीर्येनैवमभिधीयते ॥११२॥

Further, the absence of any means being accepted, there is no rule based on the idea of Vyatireka of that;¹ how then there could be the rule based on the idea of Anvaya? And have you known the absence of means of proof on the basis of which you state that this (the imperishable) does not exist?

[112]

सर्वं हि मानं लोकेऽस्मिन्वस्त्वभिव्यक्तसाधनम् ।
तदभावेऽनभिव्यक्तं वस्तु नास्तीति दुर्वचः ॥११३॥

Indeed, all the means of knowing, in this world, is an aid to the manifestation of (an existent thing) and, in the absence of that, it is difficult to say that the unmanifest thing does not exist.¹

[113]

¹Read SP: *na hi dīpābhāve tadabhivyaṅgyam ghaṭādi tamas-āvr̥tam nāstīti suvacanam iti hiśabdārthaḥ*. It is impossible to say that a pitcher does not exist, while it is not brought to notice by some light which shines on it.

स्थलाद्यनेकधर्माणां निषेधायासकारणात् ।
अस्तित्वमक्षरस्येह सिद्धं तावद्गात्मनः ॥११४॥

On account of the effort (of the Śruti) for rejecting many objects such as the gross¹ here (i.e. in the passage of the Śruti) is established the existence of the imperishable, which is the Ātman, that has the nature of the seer of them all (*tāvat*).

[114]

¹This refers to the properties which begin with the gross.

स्वमहिम्ना त्वभावोऽपि सेद्धुं नैवात्मवत्क्षमः ।

तत्पारार्थ्यजडत्वाभ्यां मित्यभावस्तथा समः ॥११५॥

Even the absence of that¹ cannot be reasonably² established owing to its own greatness,³ as in the case of Ātman; because, owing to their being helpful towards something else and being insentient, therefore (*tathā*) the absence of any knowledge (of them) is similar (to that of the object to be known).⁴ [115]

¹This refers to the absence of *mānameya* as in verse 112.

²This is for *kṣama*.

³That is, owing to its not being *svaprakāśa*.

⁴NKL adds: *svataḥ asiddhāḥ ity arthaḥ*.

मामेयमात्रसद्भावात्तेभ्योऽत्यन्तनिवृत्तिः ।
स्वमहिम्ना प्रसिद्धेश्च कुतोऽभावस्य संभवः ॥११६॥

Since (the imperishable) is altogether away from (*atyantanivṛtti*), those (viz. knowledge and object of knowing), while there exist only knowledge and object of its knowing, and that (the imperishable) becomes established by its own greatness; therefore, how could there be possible the non-existence of it? [116]

स्वतो माफलरूपत्वान्न माकार्यं प्रमाणतः ।
नास्तीति तु विना मानं न सिध्येत्कुम्भवत्स्वतः ॥११७॥

It being itself right of the nature of the result of knowledge it cannot be by any means of knowing (shown as) the result of (another)¹ knowledge; and (*tu*) that it does not exist cannot be proved without any (authoritative) means just on its own like a pitcher.² [117]

¹Read SP: *mānena saṁvidantaram tatra kāryam iti na mānataḥ śakyam vaktum ity arthaḥ*.

²Read SP: *vimatam meyaṁ jaḍatvād ghaṭavad anyathā svarūpahānir iti bhāvaḥ*.

कुम्भ आरोप्यते यद्वत्प्रकाशो भानुसंगतेः ।
भानुप्रकाशसंबन्धे भानोर्नान्यदपेक्षते ॥११८॥

As a pitcher is imagined (i.e. becomes known) as existing (*prakāśa*) when it is in contact with the sun; so, in the case of the existence of the sun (*prakāśatva*) nothing else than the sun such as relation to the light of the sun is expected. [118]

The sun exists in its own light: it doesn't require the aid of anything else as in the case of a pitcher which requires that. So also the imperishable, being *svaparakāśa*, does not require any aid of anything else. This is clarified in the following verse.

स्वतोऽवगतिसंबन्धात्तथाभावोऽवगम्यते ।
तथावगतिसंबन्धे नापेक्षावगतेः स्वतः ॥११९॥

A negative entity is not¹ understood from itself, owing to its relation to knowledge. So also, even while it has relation to knowledge knowledge itself does not have any dependence (on another). [119]

¹Cf. SP: *uttarārdhe sthitam naipadam pūrvārdhe 'pi sambadhyate*.

अतोऽवगत्यभावोऽपि न स्वतोऽवगतिं विना ।
सिध्यतीह ततोऽस्तित्वं स्वत एवाक्षरात्मनः ॥१२०॥

Therefore, the absence of knowledge also cannot become established, through itself, unless there has been the experience of it (which is other than itself); from that (it follows here that) there is existence of the imperishable Ātman only on account of itself. [120]

उक्तो निरन्वयोऽभावो न बौद्धादिसमाश्रयात् ।

तत्त्वमस्यादिवाक्योत्थविज्ञानविरहात्क्वचित् ॥१२१॥

This continuous absence of any relation is not stated (by the Śruti) by resorting to views of the Buddhists and others anywhere, while there is the absence of the right knowledge which arises from sentence(s) such as *tat tvam asi*. [121]

नान्यदज्ञानतोऽस्तित्वं द्वितीयस्यात्मनो यथा ।
निवृत्तिस्तद्वदेवास्य नागत्यात्मनोऽपरा ॥१२२॥

As there is not an existence of anything other than the Ātman unless without there being ignorance of the nature of the Ātman, similarly there is not any other distinction (*nivṛtti*) of this one (viz. the imperishable) from being aware of itself as knowledge. [122]

अकार्यकारणं साक्षादित्यादिगुणलक्षणम् ।
कूटस्थमक्षरं ध्वान्तध्वस्तौ स्यान्नो निरन्वयम् ॥१२३॥

For us, the immutable (and) the imperishable, which is neither effect nor cause,¹ (and) characterized by properties such as direct perceptibility; would not remain there, when ignorance (lit. darkness) is destroyed without anything left of it. [123]

¹In other words, 'is not cause(s) and effect(s)'. This might be better.

नास्यास्तित्वे यथा मानमेकत्वादक्षरात्मनः ।
तन्नास्तित्वेऽपि च तथा तयोस्तस्मात्प्रसिद्धितः ॥१२४॥

As there is not any means of knowing the existence of this one, which is the imperishable Ātman; so also, there is not any means of knowing its non-existence, since the two¹ have not come into existence, (unless) from (ignorance about it). [124]

¹The refers to *māna-meya*.

सत्त्वं वा यदि वासत्त्वं कार्यकारणवस्तुनः ।
अतद्वद्बोध एवैतत्सिध्यतीव न तु स्वतः ॥१२५॥

Be it either existence or non-existence of the thing(s) known as effect(s) and/or cause(s), knowledge of the same as (reality), is not what becomes established there through the knowledge of that; but this one (the inner self) itself. [125]

यत एवमतो नेह कश्चिद्विप्रतिपद्यते ।
अक्षरात्मनि नास्ति तत्त्वे तस्माद्वेतूक्तिरिष्यते ॥१२६॥

Since this is so, no person has difference of opinion here (i.e. in this respect); therefore, there is no expectation in reality of any proof(s) (or reason(s)) for proving its existence. [126]

यतो विप्रतिपद्यन्ते त्वन्तर्यामिणि वादिनः ।
तत्सिद्ध्येऽनुमायत्नः क्रियतेऽतः परोक्तिभिः ॥१२७॥

But, since objectors have difference of opinions about (the nature of) the inner controller, therefore, there is an effort made towards establishing it by the subsequent statements (in the Śruti).¹ [127]

¹This refers to *etasya vā akṣarasya praśāsane ...* in BU 3.8.9.

ईशितव्यार्थसंबन्धादन्तर्याम्येतदक्षरम् ।
चैतन्याभासमोहाख्यवर्त्मनैव न तु स्वतः ॥१२८॥

On account of there being the object(s) that require to be controlled, there is this imperishable inner controller. If then, in the way that it is so understood, owing to the delusion regarding it to be semblance of sentience, but it is not so because of its nature. [128]

The idea of the inner controller arises out of ignorance about the real nature of it, that is to say, owing to the acceptance of discrete object(s), thanks to ignorance.

अनुमानश्रुतिस्तस्मादागात्तस्यैव सिद्धये ।
कारणात्मनि संसिद्धे सर्वं सिद्धं भवेद्यतः ॥१२९॥

Therefore, there is (made) the Śruti statement regarding the inference of it for proving (the existence etc.) of it; (this is so), since everything else becomes known (lit. established), when the Ātman, which is the cause (of the existence of those things), becomes known. [129]

SP observes that inference becomes useful owing to the fact that even in BS 1.1-2: *janmādy asya yataḥ is svarūpalakṣaṇasiddhi* of the Brahman.

Verses 130-162 are the exposition of BU 3.8.9.
Now there is the exposition of inference establishing the existence of the inner controller.

एतस्य वा अक्षरस्य प्रशासनविधौ सति ।
सर्वतःस्थिरमर्यादं जगदेतद्विवर्तते ॥१३०॥

When there is the description of controlling (other things), there is the statement *etasya vā akṣarasya*; thus this, which has fixed limits on all sides of it, undergoes various changes. [130]

This is a brief explanation of *etasya vā ...*, viz. the statement of the inference in BU.

प्रशासने यथा राज्ञोऽभिन्नमर्यादिकाः प्रजाः ।
पृथिव्याद्यास्तथैवेमा अक्षरस्य प्रशासने ॥१३१॥

As, under the rule of a king, the subjects do not transgress

any limits of conduct, so do all these, viz. the earth and others, (not do it) under the rule of the imperishable. [131]

SP has properly shown the Saṃdhi of *rājñō 'bhinna-* as *rājñō* and *abhinna-*.

विवादगोचरापन्ना यन्तृपूर्वा जगत्स्थितिः ।
व्यवस्थितत्वाल्लोकस्य राजपूर्वा स्थितिर्यथा ॥१३२॥

The sustenance of this world, which is preceded (i.e. governed) by the controller, has become the object of disputation even like the sustenance of the people, which is established or determined, as being (preceded or governed) by the king. [132]

सूर्याचन्द्रमसौ तज्जकार्याभिज्ञपुरःसरौ ।
सर्वप्राण्युपकारित्वात्प्रासादस्थप्रदीपवत् ॥१३३॥

The sun and the moon, which head as the knowers of its effect(s), are, owing to their being useful to all beings, like a lamp placed in a mansion. [133]

This refers to a lamp put in a mansion for a specific purpose, similarly, the sun and the moon know what they have to (do (i.e. produce) for the benefit of the world, viz. heat, cool, light, (both) bright and delightful.

This justifies the word *tajjakāryābhijñā-*. This explains the word *vyavasthā* in verse 137 below, which is implied in this verse also.

सूर्याचन्द्रमसावीशौ मर्यादां नातिगच्छतः ।
येनेह विधृतौ नित्यं सोऽन्तर्यामीति गम्यताम् ॥१३४॥

Both the sun and the moon, who are lords,¹ do not transgress the limit (for their functions); therefore, that one is to be the knower of the inner controller, by whom these two are ever specifically sustained (*vidhrta*). [134]

Cf. the direct perception of the lord in *eṣa setur vidharaṇaḥ* (BU 4.4.22).

¹This refers to the deities in the physical sun and the moon.

कुसूलवन्न भिद्येते सांशत्वात्पततोऽपि न ।
गुरुत्वाल्लोहवत्पृथ्वी द्यौरपीत्यतिविस्मयः ॥१३५॥
चैतनावत्स्वतन्त्रत्वाद्देवतात्मत्वकारणात् ।
नान्तरेण नियन्तारं तयोरेषा व्यवस्थितिः ॥१३६॥

These two, being made up of parts though, do not, like a granary, flitter away, and fall.¹ Thus, it is, indeed, a great wonder that the earth, which, owing to its weightiness, and heaven also (do not fall). [135]

This condition of their sustenance cannot be without any controller of them, (even though) both of them are independent like one possessed of sentience and also are of the nature of deities. [136]

The first line of the verse explains the not-falling-apart of the sun and the moon of the previous verse and also of heaven and the earth, and, therefore, this translation can be taken to be predicated of the second line.

In verse 136, there is an emphasis on *dyāvāpṛthivī* as two dieties; cf. *sūryācandramasāvau īśau* in verse 134 above.

¹This indicates the breaking into pieces and (the consequent) falling apart of heaven and the earth.

संयुक्तयोर्वियोगोऽपि न तयोरीक्ष्यते क्वचित् ।
प्रशासनमृते शास्तुर्न व्यवस्थेदृशी भवेत् ॥१३७॥
द्यावापृथिव्योर्लोकेऽस्मिन्नन्यथेयं समीक्ष्यते ।
स्वभावमतिलङ्घ्यैते तिष्ठतः शास्तृशासने ॥१३८॥

Never is observed the separation of these, which are (always) in union; such a condition of sustenance (*vyavasthā*)¹ could not be without the rule of some controller. [137]
As this is noticed in the case of heaven and the earth, so

it is noticed in this world also. (That is to say:) these two, overpowering their own nature,² stay under the control of the controller. [138]

What is stated in the preceding verse is rejected in Vyatireka form, that is by resorting to the proof of knowledge called Arthāpatti.

¹Cf. verse 134, where this word is used.

²That is, they would flutter easily, as said in verse 135 above.

निमेषादिविभक्तानां कालांशानां व्यवस्थितिः ।
या स्वलिङ्गाजहद्वृत्त्या तदीशस्य प्रशासनम् ॥१३९॥

The condition of the different parts of time, which is divided into (parts) such as *nimeṣa*¹ etc., which obtains as there is the rule of their lord through his not giving up his characteristic.² [139]

¹This refers to the smallest unit of time which is taken for the wink of an eye.

²This refers to the cause, viz. the overture by time (*kalayitṛtva*).

नियतैव प्रवृत्तिश्च स्रोतसां महतामपि ।
नान्तरेण नियन्तारं संभाव्येत्यवसीयताम् ॥१४०॥

In the case of great streams of water (i.e. rivers) also their movement (lit. activity) is only determined. Let it be understood that it would not have been that one is not possible without a controller. [140]

दुःखार्जितधनत्यागिनुतिश्च जगतीक्ष्यते ।
नेयं युक्ताप्रसिद्धेशे तत्कर्मफलदायिनि ॥१४१॥
दातृप्रतिग्रहीत्रोश्च क्रियात्यक्तव्ययोस्तथा ।
अन्वक्षमेव विलयो दृश्यते सार्वलौकिकैः ॥१४२॥
तथापि तान्प्रशंसन्ति दुःखार्जितधनत्यजः ।

अपि सम्यक्प्रमाणज्ञास्तच्च नर्ते महेश्वरम् ॥१४३॥
 दानादिकर्मणः साक्षात्पश्यन्तः फलसंगतिम् ।
 प्रमाणज्ञाः प्रशंसन्ति यच्च तच्च सतीश्वरे ॥१४४॥

Also it is noticed in the world that there is praise (offered to) them, who give away (their own) wealth, which is obtained by them with effort (lit. misery or trouble). And it¹ would not have been proper, under some controller yielded the result(s) of their doing. [141]

Also the end of both the giver and the recipient as also of the activity and the giving away (of wealth) is directly perceived by all of this world. [142]

And yet they offer praise to them who give away their hardly earned wealth. And those, who know the science of the means of (right) knowing (state that) that happening is not without (having the notion of) the great lord.² [143]

That the knowers of means of knowing praise the connection with the result of activity such as making gift, (as if) directly perceiving the same is (possible) while there is (accepted) lord. [144]

¹This refers to praise (*nūti*).

²This refers to the learned Mīmāṃsakas, who are considered as authority on the system of sacrifices and their results and who therefore have to accept the idea of an overlord. Thus, this is the proof of the lord who controls all the activities, ritual and others.

शास्तर्यसति तत्कर्मफलवैचित्र्यवेदिनि ।
 सर्वज्ञेऽनुपपन्नं स्यात्कर्मज्ञानफलप्रदे ॥१४५॥

In the absence of the controller, the knower of the variety of the results of his activities, (and) the omniscient, the one who brings (lit. gives) the fruit/result of knowledge and activity, (all the above-mentioned praise of a giver of gifts) would have been unreasonable/unproved. [145]

Now follows, in verses 146-162, the refutation of the view that the result is obtained only by accepting the existence of *apūrva* which is produced by sacrificial activity.

नाप्यनीशमपूर्वं च प्रकल्प्यं फलसंगतौ ।
यतोऽपूर्वस्य संसिद्धौ प्रमाणं नोपपद्यते ॥१४६॥

So also, one should not accept *apūrva*, which is not the lord, in order that there is connection (of an activity) with a result, for the reason that there does not reasonably exist any means of knowing that could/would lead to establishing *apūrva*. [146]

नियन्तुरपि चेन्मैवं श्रुतेर्वस्तुन्यपि ध्रुवम् ।
प्रामाण्यस्य पुरोक्तत्वात्तत्सिद्धेश्चानुमानतः ॥१४७॥

(An objector would say:) 'But this¹ should be held in the case of the controller as well.² (The answer is:) 'Do not say so, because there has been already mentioned the unfailing (*dhruvam*) authoritativeness of the Śruti in respect of the thing (i.e. reality, viz. the existence of the inner controller). And also because that (controller) becomes established by inference (proper). [147]

¹It is the argument put forth in the preceding verse.

²This is to distinguish the *antaryāmin* from *apūrva* (both being only what is posited).

अर्थापत्तेरपूर्वस्य कल्पनापि न युज्यते ।
अन्यथाप्युपपन्नत्वादर्थपत्तेः क्षयो यतः ॥१४८॥

Also even postulating the concept of *apūrva* on the basis of Arthāpatti is not reasonable; since (the existence of that (*apūrva*) is shown to be unreasonable) in an other way of reasoning (*anyathā*), and, therefore, it is better to give up (the concept of) Arthāpatti. [148]

सेव्यात्सेवाफलप्राप्तिदर्शनान्न त्वपर्वतः ।
सेवायाश्च क्रियात्मत्वाद्दानयागादि च क्रिया ॥१४९॥

(This is also) on account of seeing that a person obtains the result of his services from (his master), who is to be served, and not from *apūrva*. And service is of the nature of some activity, therefore, making of gifts and/or performing (of sacrifices) is an activity. [149]

This is to state that there cannot be a seen reward brought to a person by *apūrva*. This is how direct perception does not justify the concept of *apūrva*.

दानादिफलसंप्राप्तिः सेव्याद्ववितुमर्हति ।
क्रियात्मकत्वाद्दानादे राजसेवाफलाप्तिवत् ॥१५०॥

Obtaining the result such as gift etc. is possible only from (some master), who is to be served. This is so, since (making of) gifts etc. is of the nature of an activity like obtaining the reward (lit. result) of a service to a king. [150]

सर्वकर्मफलप्राप्तिरीश्वरादेव नान्यतः ।
इत्याह भगवान्व्यासः सर्वज्ञोऽपि महामतिः ॥१५१॥

'Obtaining the result of all activities is possible only from the lord and not from any other', so said the omniscient revered Vyāsa of great intellect: [151]

This is stated in the actual words of Vyāsa, viz. *Gītā* 18.46.

यतः प्रवृत्तिर्भूतानां येन सर्वमिदं ततम् ।
स्वकर्मणा तमभ्यर्च्य सिद्धिं विन्दति मानवः ॥१५२॥

"That from which proceeds activity of (all) beings, that by whom is all this (world) extended—having worshipped him

by one's own activity, a human being attains liberation." [152]

अपि दृष्टक्रियाधर्मसामर्थ्यमनिरस्य तु ।
फलाप्तिकल्पनासिद्धावपन्यायोऽन्यथा भवेत् ॥१५३॥

(Also, if one holds) that there is obtaining of a result even (tu) without giving up (the idea of) the capacity of a directly perceiving propriety, in an activity that would be wrong reasoning (*apanyāya*). [153]

लोकदृष्टक्रियाधर्मसामर्थ्यत्यागलक्षणः ।
अपन्यायो न युक्तोऽतो न्यायवर्त्मासमन्वयात् ॥१५४॥

Therefore, wrong reasoning, which consists in (lit. is of the nature of) abandoning the capacity of and propriety in the activity known among the people, is not acceptance (lit. improper), for that does not go well with reasoning. [154]

कल्पनाधिक्यतश्चैतदपूर्वं नोपपद्यते ।
कल्प्य ईशोऽथवापूर्वं किं कल्प्यमुपपद्यते ॥१५५॥

And this *apūrva* does not appear reasonable owing to having an additional (entertaining of) some notion also. (Therefore, the question is:) 'Whether one has to imagine that there is a lord or there is to be imagined (*apūrva*)— what is reasonable? [155]

सेव्यात्क्रियाफलप्राप्तिर्दृष्टेयं न त्वपूर्वतः ।
नाप्यपूर्वं क्वचिद्दृष्टं तन्मानासंभवादिह ॥१५६॥

It is seen that there is obtaining of the result of an activity from (a master), who is to be served, but (it is not seen to have been obtained) from *apūrva*. Also nowhere is *apūrva* seen (i.e. perceived), because here (in the worldly and Śāstric dealings) owing to the absence of any means of knowing that (to be so). [156]

अपूर्वं निष्प्रमाणं च दातुं शक्तिरथास्य च ।
फलदातृत्वसामर्थ्ये दानं चाभ्यधिकं तथा ॥१५७॥

apūrva is (thus) without any means of knowing (associated) with it (i.e. for proving it). Nor also has it the capacity of a maker of gifts and the granting of gifts is an additional thing in comparison with the capacity to yield results. [157]

इह त्वीशातिरेकेण नान्यत्किञ्चित्प्रकल्प्यते ।
परिशिष्टस्य कल्प्यस्य सेव्ये दृष्टत्वकारणात् ॥१५८॥

But, here there is nothing else accepted or imagined (to be in existence) beside the lord. And this is so, for the reason also that (in the other view) there is accepted a thing to be granted (in addition to) the master (to be served). [158]

देवाश्च पितरश्चैव मनष्याणामधीनताम् ।
नाप्नुयुर्हव्यकव्यार्थं यदि नाभूत्प्रशासिता ॥१५९॥

Gods and manes also would not receive objects, viz. *havya*, *kavya* and through that dependence on human beings, if only there did not exist the controller (of the various ritual activities). [159]

यदज्ञानाज्जगत्यसिंमस्तीव्रानर्थपरंपरा ।
ज्ञानाच्च मुक्तिः संसारात्कथं नास्ति प्रशास्तृ तत् ॥१६०॥

How could there not be that controller, owing to the ignorance about whom there is in this world a severe sequence of miseries and owing to the knowledge (about whom) there is liberation from transmigratory existence? [160]

ननु क्रियात एवेयं संसारोच्छित्तिरिष्यते ।
नैवं यतो न कर्मभ्यो मुक्तिः संभाव्यतेऽश्रुतेः ॥१६१॥

(An objector's view:) 'But it is from activity that there is accepted (to come into effect) the removal (lit. destruction) of transmigratory existence.' (The answer:) 'Not so, because liberation does not come from activities, as (it is not so heard) in (lit. from) the Śruti. [161]

यथा च कर्मणा मुक्तिर्न कथं चन यज्यते ।
तथोक्तत्वात्पुरा नैह भूयो वक्तव्यमिष्यते ॥१६२॥

Further, as it is stated earlier, liberation is not in any way connected with activity and therefore it should not be said again and again. [162]

Sureśvara intends to point to the earlier statement (like this:) *na paramaśruter eva tebhyo muktyayogaḥ kiṃtu nyāyavirodhāc ca* (SP).

Now follows the exposition of BU 3.8.8.

असंभवो यथा मुक्तेः क्रियासाधनसंश्रयात् ।
तथेयं श्रुतिरप्याह यो वा इत्यादिवाक्यतः ॥१६३॥

As to how there is impossibility of (securing liberation) by resorting to the means in the form of activity, there is this Śruti statement, viz. *yo vā*¹ [163]

Read SP: *na karmabhyo muktir ity atraivāntaravākyam avatārayati.*

¹This is about the imperishable inner controller. *tad akṣaram* is connected by *yaḥ* (in verse 163), *yāt* in *yad abodha* (in verse 164) and also in *yat kārpanyam* (in verse 165). This justifies adjectival clauses in our translations.

उदारफलदायीनि बहुशोऽनुष्ठितान्यपि ।
क्षयिष्णुफलवन्त्येव कर्माणि यदबोधतः ॥१६४॥

(This is to say:) Activities (are considered as) yielding abundant results, even if they are performed many times but have only the perishable results to yield, since there exists ignorance (on the part of a person). [164]

तथा च यत्परिज्ञानात्कृत्स्नकार्पण्यनिःसृतिः ।
कथमेवंविधं गार्गि नास्तीत्यक्षरमुच्यते ॥१६५॥

So also, on account of the all-sided knowledge about whom there is annihilation (complete loss) of entire misery (*kārpanya*), how, O Gārgī, it is (i.e. can be) said that the imperishable of this nature does not exist? [165]

सर्वे कार्पण्ययुक्ताः स्युर्यदि न स्यात्तदक्षरम् ।
ईक्ष्यन्ते चाप्यकृपणास्तच्च सत्येव यन्तरि ॥१६६॥

All would be affected by misery (*kārpanyayukta*), if there did not exist that imperishable. And, they are free from misery and that is possible (only) if there is a controller. [166]

यो वा एतदिति स्पष्टं श्रुतिरप्याह यत्नतः ।
अक्षराज्ञानतः पुंसां कार्पण्येनावियुक्तताम् ॥१६७॥

The state of men's being unseparated from the condition of misery is owing to their ignorance (about the true nature of the inner self). [167]

The AnSS shows a variant reading: ... *pumsām kārpanyenāpi yuktatām*— this also conveys the same meaning; yet the translation could be: The state of men's being connected with misery is owing to their ignorance....

अक्षरं यो विदित्वास्माल्लोकाद्गार्गि प्रमीयते ।
निवर्तते स कार्पण्यात्तज्ज्ञानाद्ध्वान्तबाधतः ॥१६८॥

He who departs from this world after knowing this

imperishable, O Gārgī, keeps himself from misery owing to stultification of darkness by the knowledge of the perishable.

[168]

यस्त्वक्षरपरिज्ञानान्मृत्युमृत्युः प्रमीयते ।
स एव ब्राह्मणो नान्यो जगत्यध्यवसीयताम् ॥१६९॥

And one, who departs from this world, who has effected the end of death (*mṛtinṛtyu*) by complete knowledge of the imperishable is alone Brāhmaṇa in this world and none else.

Let this be concluded (or, the conclusion).

[169]

सर्वज्ञः सर्वकृच्चासौ निरस्ताशेषसंसृतिः ।
प्राप्ताशेषपुमर्थश्च ब्राह्मणोऽत्राभिधीयते ॥१७०॥

Here, that one is said to be Brāhmaṇa, who is omniscient, omnipotent and has cast off transmigratory existence in its entirety and obtains all the ends of human being(s), without exception.

[170]

Now follows in verses 171ff. the exposition of BU 3.8.11.

ज्ञेयत्वसिद्धये प्राह यथोक्तेश्वरवर्त्मना ।
अक्षरस्य श्रुतिः साक्षात्तद्वा इत्येवमादिना ॥१७१॥

In the words *sākṣāt tad vā* ..., has the Śruti spoken about the imperishable to be known as the object (in one's life), in the way there description (of it by the word) *īśvara*. [171]

The purpose is to justify the use of other words (appearing as adjective), which are not to be taken as expressive of any limiting adjuncts (*upādhis*).

एतदस्य प्रशास्तृत्वं स्वमोहाभासहेतुकम् ।
नेति नेत्यादिवाक्येभ्यो दृष्टिमात्रात्मवस्तुनः ॥१७२॥

This is the nature of this controller, caused by the semblance owing to ignorance about itself; this is clear from the sentences such as *neti neti*, viz. of that thing called the Ātman, which is merely the seeing one. [172]

इत्येतत्प्रतिपत्त्यर्थं तद्वा एतदिति श्रुतिः ।
मागोचरातिवर्तित्वाददृष्टं स्यात्तदक्षरम् ॥१७३॥

In order that one understands this, there is the Śruti statement *tad vā etat* The imperishable would be not directly perceptible, because it transgresses (the world of) objects, that are the objects (of what is called) knowledge. [173]

This is to ward off the idea of *pramāṇaprameyavyavahāra* being useful in knowing the imperishable lord the inner controller.

अभावत्वनिषेधार्थं द्रष्टृक्षरमिहोच्यते ।
कूटस्थदृष्टिमात्रत्वान्न तु द्रष्टृत्वमुच्यते ॥१७४॥

Here the imperishable said to be the seer: (this is) for rejecting its non-existence. And (*tu*), since it is merely the immutable seeing, there is not stated its capacity for seeing. [174]

This verse rejects the idea of the imperishable's association with any sort of activity.

ओतप्रोतगिराशेषदृश्यवस्तुनिराकृतेः ।
अकारकाद्वयत्वाभ्यां द्रष्टृत्वं नाक्षरात्मनः ॥१७५॥

Because there is rejection of the perceptible things, in their entirety, by the words *otaprota*, therefore there is not the property called seeing (said to be existing) in the imperishable Ātman, its being unconnected with any instrument of activity and one without duality. [175]

In this, the idea of the innate properties of the perceptible

and also any contingent idea of duality are rejected.

Verses 176-181 state that the things in the world are, in reality, but the immutable perishable.

बहुद्रष्टृनिषेधार्थं नान्यदित्याद्युदीरणम् ।
विजातीयसजातीयवस्त्वन्तरनिषेधतः ।
कूटस्थमेकं चैतन्यं सिद्धं श्रुत्यनुसारतः ॥१७६॥

Also the statement—(it is) ‘not anything else’ is for the purpose of rejecting (the existence) of many seeing ones. (Also) by the rejection of any other thing of a different nature or of similar nature is established the immutable sentient, which is just single—this is in keeping with Śruti’s teaching. [176]

This is the purport of *nānyat* in BU.

एतस्मिन्नक्षरे गार्गि स्रजि क्लृप्तफणीन्द्रवत् ।
ओतः प्रोतश्च निःशेष आकाशोऽकारणात्मनि ॥१७७॥

In this imperishable which is not of the nature of cause, O Gārgī, is woven lengthwise and crosswise the entire ether like an imaginary serpent (lit. king of cobras) that is seen in a wreath of flower. [177]

अक्षरं स्वात्मसंमोहात्कारणत्वं निगच्छति ।
तथा कार्यत्वमप्येतन्निरवद्यं तदेकलम् ॥१७८॥

And (yet) the imperishable, which is spotless or free from any blemish and which is single, becomes a cause on account of the delusion about its own nature and also the effect. [178]

This is to state about an inner self of the individual as not different from the imperishable.

सर्वस्याक्षरमात्रत्वान्न किञ्चिन्नोपसंहृतम् ।

प्रत्यग्विरोधतस्तद्वन्न किञ्चिन्नापि निहनुतम् ॥१७९॥

All that (exists in the world), being (only) the imperishable (in reality), there is not anything that is not withdrawn (within itself by the imperishable). Similarly, there would not be any opposition of the inner self, (being posited) and there would not be any thing (that might be) concealed. [179]

This is to reaffirm the significance of the word *ekala* in verse 178 above. It affirms the *aikalasya* 'oneness/identity (of all)'.

तथा ज्ञेयस्य सर्वस्य ज्ञाताज्ञातविभागिनः ।
उक्ताक्षरात्मावसितेर्न किञ्चिदवशिष्यते ॥१८०॥

Also, there is nothing excluded owing to (i.e. in the light of) the conclusion (about the existence of) only the imperishable, from the (already) explained (lit. stated) words (lit. letters) (of the Śruti) as (non-distinct from) all the objects to be known, being divided into known and unknown (objects). [180]

नानुत्पन्नमितो ज्ञानात्किञ्चिदप्यवशिष्यते ।
नाप्यध्वस्तं तथाज्ञानं कृत्स्नज्ञेयसमाप्तिः ॥१८१॥

(It follows that) there does not remain anything else than knowledge, which is not produced from this (exposition). Nor also is ignorance not destroyed; for there has been acquired (the knowledge of) whatever is to be known. [181]

इति श्रीबृहदारण्यकोपनिषद्भाष्यवार्तिके तृतीयाध्यायस्य
अष्टमं ब्राह्मणम् ॥८॥

**BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA**

3.9

Śākalya Brāhmaṇa

Verses 1-6 pertain to the introductory explanation of BU 3.9.

सूत्रादिकार्यमार्गेण यन्तृत्वं कारणात्मनः ।
यदभ्यधायि प्राक्श्रुत्या तदेवानूद्य पूर्ववत् ॥१॥
साक्षादित्यादि याथात्म्यं भयोऽप्यात्मन उच्यते ।
नियम्यदेवताभेदव्याससंक्षेपवर्त्मना ॥२॥

What was earlier stated in the Śruti, viz. that the nature of the Ātman as being the controller of what is the cause¹ (of the world), by way of describing the effects (of it), viz. Sūtra etc.,² is first restated, and [1]

There is once again stated in the words beginning with *sākṣāt*, the true nature of the Ātman in the way that (there is a description of them) in their extent and in groups, based on distinction, viz. as the deities which are to be controlled.³ [2]

¹This is according to accepted limiting adjuncts of the Ātman.

²This refers to BU 3.7.3.

³This refers to *vikṣepa*, *saṁhāra* in verse 7 below.

चिदाभासं स्वमज्ञानं संनिपत्य तदक्षरम् ।
कारणं सत्स्वकार्येषु नियन्तृत्वं प्रपद्यते ॥३॥

The ignorance (about the nature) of its own (which is) the (varied) appearance of sentience, come together and then that perishable, being the cause, attains the character of the controller in respect of its own effects. [3]

Though the imperishable, is immutable and without any attachment, it is stated to be the controller owing to the appearance of the ignorance associated with it—this is stated in the verse.

सुषुप्तप्रलयावस्थप्राणात्माक्षरमुच्यते ।
स ब्रह्म त्यदिति तथा श्रुतिरप्याह तत्स्फुटम् ॥४॥

That imperishable is called *prāṇa* 'wind' and the inner Ātman, in the two conditions, viz. being in sleep state and the (final) merger of the world; it is so stated in the Śruti also clearly *sa brahma tyat*.¹ [4]

This verse is intended to convey the objection that *prāṇa* here means wind which goes out from body, this on the basis of the Śruti *prāṇam tarhi vāg apyeti*.

¹BU 3.9.9.

इत्यन्तर्याम्यवस्थायां स्थित्वैकां प्राणदेवताम् ।
सूत्राद्यवच्छेदवशात्सर्वमेतन्नियच्छति ॥५॥

Thus, the imperishable controls all this (world) after having controlled the single deity called *Prāṇa*, first being in the condition of the inner controller and then being delimited by the conditions of being *Sūtra* etc. later. [5]

This explains the twofold state of the imperishable as the inner controller in human body and one outside it.

नानात्वैकत्वरूपाभ्यां सा पुनः प्राणदेवता ।
स्थिता जगदिदं व्याप्य प्राणिकर्मवशादियम् ॥६॥

And (*punaḥ*) this deity called *Prāṇa* exists in the form of varied objects and as a single (object/being) after having pervaded this world owing to (the influence of) the activities of various beings (in it). [6]

Verses 7-10 are the exposition of the extent and the grouping of the deities in the various objects of the world, BU 3.9.1. This goes to explain Śākalya's question.

तस्या विक्षेपसंहारौ शाकल्यः पर्यपृच्छत ।
नियन्तव्यनियन्तृत्वसंबन्धस्य प्रसिद्धये ॥७॥

Śākalya asked about that deity multiplying itself into various objects (*vikṣepa*) and withdrawing them within itself (*saṁhāra*) in order that there is established the intended relation of what is to be controlled and the nature of the controller. [7]

देवसंख्यां स संपृष्टो निविदैव प्रपेदिवान् ।
देवा निविदि यावन्तो वैश्वदेवस्य संश्रिताः ॥८॥
तावन्त एव सोऽसुः स्याज्जगत्यस्मिंश्चराचरे ।
आनन्त्यं बहुशब्देन देवानां प्राब्रवीन्मुनिः ॥९॥

Asked about the number of the deities, he (viz. Yājñavalkya) answered that the number of them becomes known in the *nivid*¹ itself, (since) the deities are as many as are included in the *nivid* to the Viśvadevas [8] and that Ātman (*asu*) becomes (i.e. is) as many as they are in this world, moving and non-moving; infiniteness (in number) of the gods is stated by the seer in the use of the word *bahu* (in his answer). [9]

¹BUB explains *nivid* as the words in the Mantras which are addressed to Viśvadevas, stating the number of various deities in the same; cf. *nivin nāma devatāsaṁkhyāvācakanī mantrapadānī kānī cid vaiśvadeve śastre śasyante tānī nivitsaṁjñākānī* (BUB p.470).

त्रयस्त्रिंशत्प्रभृत्येषां षडादिषु यथाक्रमम् ।
संहतिः प्रातिलोम्येन व्यूहस्त्वागणनाक्षयात् ॥१०॥

(In the statement of the *nivid*), the number (of the deities) is given as the collection¹ (of them) in (the words) thirty-three, and then in six etc. in order; but their extent¹ is given (by Yājñavalkya) in reverse order (*prātilomyena*)² up to the end of enumeration (i.e. in the infiniteness of them). [10]

¹*saṃhṛti*, *vyūha* stand for *vikṣepa*, *saṃhāra* in verse 7 above.

²That is, not following their statement in the text of BU.

Verses 11-31 are the exposition on the contents of BU 3.2.2-9 together.

कतम इति पृष्टोऽथ वस्वादीन्प्रत्यपद्यत ।
वसूनप्यथ संपृष्टः सोऽग्न्यादीन्प्राब्रवीद्वसून् ॥११॥

Then (since he was) asked about how many of the Vasus (are there) ..., he said about the Vasus (and) then, when he was asked about the Vasus in particular, he stated them as Agni and others. [11]

संहतात्मप्रभेदा हि सैवैका प्राणदेवता ।
वसुत्वमष्टधा भिन्ना बिभर्ति जनिमत्स्थितौ ॥१२॥

That deity Prāṇa, being single in itself and with the various forms of itself collected in itself, assumes the nature of the Vasus, differentiated in eightfold, and remains in the condition of the beings (*janimat* of the world). [12]

वसु कर्मफलं चाहुः कर्मणः साधनं वसु ।
यस्मात्तदेषु निहितं तस्मात्ते वसवः स्मृताः ॥१३॥

They have said that the word *vasu* means the result of ritual (activity) and also they call *vasu* as the means (of performing the ritual activity).¹ And since that¹ is dependent on (lit. placed in) these, therefore they are known as Vasus. [13]

The verse is based on deviation of the word *vasu* in BU from the verb root *vas* 'to stay or to enable others to stay' as given in BU and BUB.

¹The word *sādhana* refers to *karmasādhana*.

पुरुषे ये दश प्राणा इन्द्रियाणि सहात्मना ।
मनसैकादशात्रैतान् रुद्रानित्याचक्षिरे ॥१४॥

And these ten organs viz. *prāṇas* which are in a human being's (body), together with *ātman* which is the same as *manas*, are together these eleven Rudras; so have they said. [14]

Here the word *ātman* is specifically paraphrased as *manas* in BU, followed by BUB and BUBV.

रोदयन्तो द्रवन्त्येते रुदन्ति च यतस्ततः ।
रुद्रा इत्यभिधीयन्ते प्राणा एकादशोदिताः ॥१५॥

Since they make a being cry or/and depart (from its body) and also they themselves cry, therefore they are called Rudras. Thus are mentioned the *prāṇas* 'organs'. [15]

This verse explains *te yadā*

This deviation of Rudra is presented by BU, BUB and BUBV.

आददाना यतो यन्ति मर्त्यानां स्थितिकारणम् ।
मासाभिमानिनो देवा आदित्यास्तेन ते स्मृताः ॥१६॥
आयुर्वीर्यं स्मृतिं प्रज्ञां सौकुमार्यं वपुःश्रियम् ।
आददाना यतो यन्ति तेनादित्या अमी स्मृताः ॥१७॥

Since they become the sustenance of the mortals, while they go on receiving (what is stated below), they are therefore known as *Ādityas*, the deities identifying themselves with the months (*māsābhimānin*); [16]

(that is to say:) Since they go on receiving, the life span, strength, memory, intelligence, softness (*saukumārya*) and the

splendor of the body, therefore these are called Ādityas. [17]

Verses 16 explains *ete hi* ... and verse 17 supplies further clarification of the same.

इन्द्रश्च देवता ज्ञेया मेघनादाभिमानिनी ।
स्तनयित्पुरिह ज्ञेयस्तथा यज्ञः प्रजापतिः ॥१८॥

So also Indra is to be known as the deity of the thunder of a cloud identifying itself with it (*abhimānin*). He is to be known here (as signified by the word) *stanayitnu*. Similarly, sacrifice is to be known as Prajāpati. [18]

This verse explains the significance of *stanayitnu* and Prajāpati.

This completes the list of thirty-three gods whom Yājñavalkya had in mind; these are: eight deities called Vasus, twelve Ādityas, eleven Rudras, Indra and Prajāpati. This is in accordance with the BU statement.

वीर्यं वज्रोऽशनिरिति स्तनयित्पुरिहोच्यते ।
पशुसाधनको यस्माद्यज्ञस्तस्मात्पशुः स्मृतः ॥१९॥

Strength is the thunderbolt called Aśani, Stanayitnu. Since a sacrifice has animals as the means for its performance, therefore, *yajña* is known as animal. [19]

This is the meaning of *aśani*.

अग्न्यादिषु यतः षट्सु यथोक्ताः सर्वदेवताः ।
षट्संख्यामेव संयान्ति षडग्न्याद्यास्ततः स्मृताः ॥२०॥

Since in the six, viz. Agni and others, are mentioned in brief (i.e. are included) all the deities as six in number, therefore these are known as the six, viz. Agni etc.¹ [20]

This clarifies *ete hīdam*

¹The six are Agni, Vāyu, Prthivī, Antarikṣa, Āditya and Dyau.

आधाराधेययोरैक्यात्पृथिव्यग्न्यादिषु त्रिषु ।
त्रयो देवास्ततोऽग्न्याद्याः कृत्स्नान्तर्भावकारणात् ॥२१॥

(In Yājñavalkya's statement in BU) the three gods, Agni and others,¹ (are comprised) in the earth and Agni etc.,² since, owing to (the acceptance of) the oneness (or, identity) of the support and the supported,³ (thus) on account of the inclusion of all (of them in them). [21]

From *ādhārādheya* ..., the verse explains *ima eva* ... in BU and in *kṛtsnāntar* ..., there is explained *eṣu hi*

¹This refers to Vāyu and Antarikṣa (i.e. Dyaus).

²There are three pairs meant: Earth and Agni, sky and Vāyu, and heaven and sun.

³'The supported' means 'what is to be supported (by the support)'.

अन्नं प्राणश्च देवौ द्वौ द्वयोरेष विनिर्णयः ।
एतावन्मात्रयाथात्म्यं सर्वस्य जगत्स्ततः ॥२२॥

Food and Prāṇa are two deities. This is the decision regarding the two (mentioned in Yājñavalkya's statement). Therefore, the real nature of the entire world is only of this magnitude.

[22]

योऽयं पवत इत्युक्तिरध्यर्धस्य विनिर्णये ।
एकत्वात्पवमानस्य तदाहुरिति चोदना ॥२३॥

(Yājñavalkya's) statement *yo 'yam pavate* is for the explanation (or, decision) (in respect) of the god (who is) named as one and half, but owing (to the statement) of only one in the Śruti injunction¹ which decides (the character of *adhyardha*).

[23]

¹This refers to *yo 'yam pavate....*

एकसंख्यैव नान्यास्ति द्विसंख्याया यतस्ततः ।
 पृष्ठोऽध्यर्ध इति प्राह सोपहासमृषिः सुधीः ॥२४॥
 वायुर्वा देवता कृत्स्ना तदन्यस्य तदात्मनः ।
 अर्धत्वं स्यात्कनीयस्त्वाद्व्याप्यस्याग्न्यादिरूपिणः ॥२५॥

Since there is not mentioned the number (called) one beside number two, therefore, the intelligent/brilliant sage (Yājñavalkya) said in scorn/ridicule *adhyardha*, when he was asked (the number). [24]

Vāyu in its entirety is indeed deity, since whatever else than that there is, it is of the nature of that (Vāyu), as such there would be halfness (*ardhatva*) of the deity in the nature of Agni and another, owing to its being younger and being pervaded (by Vāyu). [25]

This explains *yad asmin ...*, which is Yājñavalkya's answer. Also, it extends the Vedic meaning, viz. about the number, to another sphere (i.e. of the deities).

ऋद्धिं प्रापद्यतः सर्वं वायौ सति चराचरम् ।
 तस्मादध्यर्ध इत्येवं वायुमाचक्षते बुधाः ॥२६॥

Since all (else), moving and non-moving obtained richness owing to the presence of Vāyu, therefore (it is that) the learned people call Vāyu (*Adhyardha*). [26]

This explains the words *yad asmin*.

संख्याप्राधान्यमध्यर्धे विदग्धेन विवक्षितम् ।
 सर्वमृध्नोति यत्प्राणे तेनेति श्रुतिहृद्गतम् ॥२७॥

All that was intended by Vidagdha¹ (Śākalya) was the prominence given to the number in the word *adhyardha*. Therefore, the intended meaning of the Śruti word *adhyardha*

is all that whichever prospers through (only) Prāṇa. [27]

In the first line, the literal sense of *adhyardha* 'one and a half' is indicative of ridicule. This is clarified by the derivation of *-ardha* from the verbal root *ṛdh* 'to prosper'.

The next verse clarifies the derivational sense.

¹There is a play on the word *vidagdha* which has the sense 'intelligent one'. This is used of Śākalya and is understood by Yājñavalkya in mere ridicule!

अन्नाशितृत्वसिद्धयर्थं यथा व्युत्पत्तिरुच्यते ।
अन्नेनाश्नुत इत्येवमध्यर्धस्यापि योजना ॥२८॥

'Since there is stated in the Śruti the derivation (of the word *adhyardha*) for establishing the sense of 'being the eater of (all) food' on the basis of the statement *annena aśnute*'—such is the derivation offered.¹ [28]

Read the note of the editor of NKL edition: *asmin sati sarvam adhyārdhnot iti vyutpattir ity arthaḥ*.

¹*Aitareyopaniṣad* 2.1.2: *annena hīdam sarvam aśnute prāṇaḥ*.

जनिमत्सर्वभूतानां प्राणेऽन्तर्भावहेतुतः ।
प्राणो देवोऽत एवैकस्तस्यैव महिमा परः ॥२९॥

For the reason that all the beings which have an origin are included in Prāṇa, there is only one god Prāṇa and its greatness is the highest. [29]

This brings out the significance of the word *prāṇa* in *katama eko deva iti prāṇa iti sa brahme tyad ity ācakṣate*. Cf. the next verse also.

भरणात्सर्वकार्याणां प्राणो ब्रह्मेति भण्यते ।
त्यदित्याचक्षते तस्मात्प्राणं ब्रह्म परोक्षतः ॥३०॥

On account of its supporting (*bharaṇa*) all effects¹ Prāṇa is called the Brahman. Therefore, they describe Prāṇa, the Brahman, as *tyat* in indirect manner.² [30]

¹They are worldly objects.

²This is a peculiar Brāhmaṇical tendency to explain certain names as intentionally changed, i.e. they are indirect names of the deity: cf. oft-repeated phrase in the Brāhmaṇas *tad etad ... ācakṣate parokṣeṇa, parokṣapriyā vai devāḥ*.

साक्षान्निर्देशनुत्तर्यं कारणत्वावबुद्धये ।
प्राणं ब्रह्म त्यदित्याहुः पारोक्ष्येण महाधियः ॥३१॥

The highly learned men have described in indirect manner Prāṇa in the words *brahma tyat ...*, in order that the direct mention (*sākṣānnirdeśa*) of it is avoided and that one comes to know (that Prāṇa) as the cause (of discrete objects in the world). [31]

In this verse Sureśvara emphasises the character of Prāṇa as the Brahman which is not directly perceptible.

Verses 32-57 discuss the contents of BU 3.9.10-17 and they are the discussion on Prāṇa being conceived as eightfold in the manifestation of the Brahman.

करणेष्वेषु सर्वेषु तथा कार्यात्मकेषु च ।
अध्यात्मादिषु कात्स्नर्येण तेषु तेष्ववतिष्ठते ॥३२॥

(That Prāṇa) resides in each of all the organs (*karaṇas*) and also those which are of the nature of effects (of the same) and abide in the body (*adhyātma*) etc. [32]

This is for introducing the words of the Śruti *pṛthivy eva yasyāyatanam anger loko*

अष्टधातः पुनस्तस्य भेदोऽयमुपवर्ण्यते ।
अधिकारविशेषेण पृथिवीत्यादिनाधुना ॥३३॥

From this follows the mention of the eightfold distinct appearance (*bheda*)¹ in the words *pr̥thivī* ... in relation to some specific topics.² [33]

¹These are *pr̥thivī*, *kāma*, *sāmānyātman*, *ākāśa*, nightly darkness, bright form, residing in a common abode and finally residing commonly in the semen.

²Cf. the note by the editor of the NKL edition: *adhikāra-viśeṣeṇa pr̥thivyādaḥ svāmitvena sambandhaviśeṣeṇa*; this is based on the end of SP on this verse.

अनन्तभेदभिन्नस्य पुनरप्यष्टधोच्यते ।
देवतासमुदायस्य भेदः संक्षेपलक्षणः ॥३४॥

Here are stated the distinct appearances of (the deities in) the groups of the deities as being eightfold, even though it (viz. the reality) has differentiated itself into innumerable (forms)—this is for securing brevity in the statement (*saṁkṣepa*).¹ [34]

¹This, the innumerable forms, is for making the meditation on them easy, cf. *dhyānasaukaryārthan saṁkṣepoktir iti bhāvaḥ* (SP).

पृथिव्यायतनं यस्य तत्स्थोऽग्निर्लोक एव च ।
तस्यालोकनहेतुः स्यादग्निर्देवस्य सर्वदा ॥३५॥

And¹ the cause of the appearance of that deity called Agni is ever with reference to that Agni which is the world, reside as it does in it, the one who has ever the earth as its support. [35]

The statement is to be connected with the statement in the

verse BU 3.8.10: *tam yo vidyāt sa veditā*

मनश्च ज्योतिर्विज्ञानं संकल्पादिस्वलक्षणम् ।
स्वरूपं वा मनोज्योतिर्यस्य देवस्य भण्यते ॥३६॥

And that deity, about whom is stated *mano jyotiḥ*, is *manas* having the nature of light, viz. knowledge (*vijñāna*) and having the forms of design (*saṃkalpa*) etc. [36]

As in the case of the preceding verse, this also is connected with *tam yo vidyāt*

क्षितिदेहोऽग्निनयनो मनःसंकल्पसाधनः ।
यः पृथिव्यभिमान्यत्र सर्वस्यैव परायणम् ॥३७॥
आध्यात्मिकस्य सर्वस्य कार्यस्य करणस्य च ।
परायणमवष्टम्भ आत्मनः स्यात्तथाविधम् ॥३८॥
याज्ञवल्क्येह यो विद्याद्वेदिता स्यात्स एव तु ।
पण्डितो न त्वनेवंविद्यथा त्वं पण्डितायसे ॥३९॥

The one who identifies oneself with *Prthivī* is (the *Ātman*) having the form (lit. body) of the earth, eye in the form of fire and having *manas* and (its various) designs as the means (of activity)—it is the ultimate end (lit. goal) certainly of (*eva*) all things (in the world). [37]

That kind of becoming the final goal of the *Ātman*¹ means its being the support of the entire (world of) effects and means of activity residing in the body. [38]

O Yājñavalkya, one who knows (thus), in this (context), is alone the knower, (and) a learned man, but certainly not one who does not know like this and like yourself who boast of being a learned man. [39]

These verses sum up the thought in the three sentences beginning with *prthivy eva*.

¹This is for *Prāṇa*.

इयता यदि पाण्डित्यं लभ्यते वेद तर्हि तम् ।
शारीरः पार्थिवेऽशेऽत्र देवोऽध्यात्माभिमानवान् ॥४०॥

If the status/character of a learned man can be obtained by (only) this much (knowledge), then know him (as one) here, in this earthly part that god who has assumed a body and identified himself with it.¹ [40]

This explains the meaning of *veda*

¹This is clarified in the second line of the next verse.

पृथिव्येवाहमित्येवं योऽभिमानो व्यवस्थितः ।
लोमत्वङ्मांससंघातः कार्यं तस्यायमेव तु ॥४१॥

He, who has (thus) identified himself, saying 'I am the earth itself', is but a conglomeration of hair, skin, flesh, yet he is but the effect of the same. [41]

The two lines refer to the two forms of the Ātman, viz. Pṛthivī and its effects, which belong to it which comprise the body (*śārīra*).

स एष देवो यः पृष्टो वद भयोऽप्यहल्लिक ।
यतोऽसमाप्तमेवेदं दर्शनं ते विवक्षितम् ॥४२॥

'It is this god about whom you are asked, tell me, (O Śākalya) O Ahallika,¹' (answered Yājñavalkya), 'since this view of yours, viz. what you have intended to express, is only incomplete.'² [42]

This explains *sa eṣa* ... in BU.

On the verse, read SP: *ukta devasambandhitvena vācyasya hetoḥ aprṣṭatvād ity arthaḥ*.

¹It is established by some as a ghost. Ahallika is a proper name as explained in verse 83 below and this justifies the translation of the word *ahallika* as 'O ghost,' given by some

translators. But this is, in all likelihood, another name given by Yājñavalkya to Śākalya.

²That is, incompletely expressed.

तस्य का देवतेत्येनमप्राक्षीत्क्षोभितो रुषा ।
तं प्रत्याहामृतमिति याज्ञवल्क्योऽपि देवताम् ॥४३॥

Being excited (by these words), (Śākalya) asked angrily 'Which is the deity of that?'. To him then answered Yājñavalkya, 'That deity is immortality'. [43]

The first line explains the question of Śākalya as expressed in *tasya* ... and the second, the answer of Yājñavalkya.

यतो यो लभते सिद्धिं तस्यासावेव देवता ।
विवक्षितेह विज्ञेयामृतमित्यादिलक्षणा ॥४४॥

'That is the deity for a person from whom he secures the desired object (*siddhi*). Therefore, in this (our conversation), the deity intended (*vivakṣita*) is characterized as *amṛtam* [44]

The first line explains the *devatā*.

योषिज्जग्धस्य योऽन्नस्य रसः स्यात्परिणामजः ।
मातृजस्यासृजो हेतुरमृतं सोऽत्र भण्यते ॥४५॥

That sap of food, which is eaten by woman and is thus the modification of it, is the cause of the blood of the mother; that is here described as *amṛta*. [45]

This explains what is meant by *amṛta*.

रसाच्छोणितनिष्पत्तिः शोणिताद्वीजसंश्रयात् ।
शरीरं जायते साक्षाद्येन शरीर उच्यते ॥४६॥

That (deity) is called as residing in the body, since a directly perceptible body originates from the resort in the blood and the seed, since the origin of the blood is from the sap (of eaten food). [46]

अन्येऽमृतमिदं प्राहुर्दिव्यं चान्द्रमसं पयः ।
तत्पर्जन्यादिना जातं दाढर्यकृत्क्षितिदेहयोः ॥४७॥

Others have called this *amṛta* as the divine water which has originated from the moon and that, causing solidity (or firmness *dārdhyakṛt*) in the earth and the body (i.e. human body), thus being born from the rain etc.¹ [47]

This is another explanation of *amṛta*.

¹This stands for showers, life-giving energy.

उत्तरेष्वपि वाक्येषु यथोक्तमुपपादयेत् ।
न्यायः साधारणं सर्वं विशेषस्तु प्रवक्ष्यते ॥४८॥

In the subsequent sentences, also one should everywhere (*sarvam*) adopt a common way of explanation (*nyāya*) and the particular (meaning which is to be conveyed in each of them) will be stated (in what follows). [48]

योषित्समागमेच्छेह काम इत्यभिधीयते ।
हृदयं बुद्धिरालोकः सर्वं तेन हि पश्यति ॥४९॥

Here (i.e. in this context), the expression *kāma* is used for conveying the sense of the desire for union with a woman, because a human being's heart, intellect and sight, all of them, see only through that. [49]

This explains *kāma eva yasya*

स च काममयो देवः कामभावनयाञ्जितः ।
देवतास्य स्त्रियो ज्ञेयाः कामः स्त्रीतो हि जायते ॥५०॥

And that is the deity consisting in desire, (fully) tainted with the feeling of *kāma*. The deity for it are women, because *kāma* is produced on account of (or from) a woman. [50]

शुक्लादीन्यत्र रूपाणि भास्वराण्युत्तरत्र तु ।
सावित्रः पुरुषस्तस्य चक्षुः सत्यं च देवता ॥५१॥

Forms such as white (mentioned here) and (*tu*) bright (forms) (mentioned) later are the man in the sun and his eye, viz. *satya* is the deity. [51]

Up to verse 51, there was a statement made of the threefold appearance of the deity in the body and this verse extends the same explanation to other statements about the sky etc.

रूपभास्करसत्येषु त्रिधैषोऽपि व्यवस्थितः ।
पूर्ववच्चोत्तरत्रापि सर्वत्रैव त्रिधा त्रिधा ॥५२॥

Thus, this one has remained threefold in the form, in the sun and in *satya*. As in the case of the earlier in the later statements also, the deity in every one of them is to be considered as threefold. [52]

प्रतिश्रवणवेलायां श्रोत्रे यः संनिधीयते ।
स त्वयेहाभिनिर्दिष्टो दिशस्तस्यापि देवता ॥५३॥

The one, who is brought into the vicinity of the ear at the time of listening¹ (to someone else's speech) is here² mentioned by you, (O Śākalya), and the deity of that is the quarters. [53]

This explains *sa evāyam śrautaḥ*. This refers to *ākāśa*.

¹The preposition *prati* does not cause here the usual change of meaning (viz. promising).

²This refers to the sky.

अन्धकारस्तमो ज्ञेयं तथा छायामयः पुमान् ।
मृत्युश्च देवता तस्य तमसैव मृतिर्यतः ॥५४॥

(By the word) *tamas* is to be understood dark (or, darkness); so also, one having shadow (is to be known as) a man and for that man the deity is death, since death is caused by darkness alone. [54]

This explains *tama eva*

रूपायतनदेवस्य प्रतिबिम्बोदयाश्रयः ।
विशेषकार्यं प्राणोऽसुस्तस्यापीहाधिदेवता ॥५५॥

For the god residing in the form, the support is the rise of a reflection, and the particular effect of that is *Prāṇa*, and here also the deity is *asu*. [55]

सामान्याम्मयदेहस्य विशिष्टाः कार्यमस्य ताः ।
वरुणो देवता तस्य वरुणाद्धि स जायते ॥५६॥

Those specified (waters) are the effect of this one, who has assumed a body which consists in the commonly known waters; its deity is *Varuṇa*, because he is born from *Varuṇa*. [56]

This explains the meaning of *āpa eva*

शुक्रस्नायवस्थिमज्जानो भवन्ति पितृतो यतः ।
प्रजापतित्वं पितरि तस्मादेतदिहोच्यते ॥५७॥

Since semen,¹ muscle, bones and marrow originate from father, therefore, the nature of *Prajāpati* (obtains) in father and this is therefore stated here. [57]

¹NKL reads *śukla* in place of *śukra*.

Verses 58-63 are the discussion of BU 3.9.18.

यावत्किञ्चिद्विजानाति शाकल्यः सर्वमेव तत् ।
पर्यपृच्छद्यथाशक्ति मुक्त्वा दिग्ज्ञानमात्रकम् ॥५८॥

Whatsoever Śākalya knew, all that he asked according to his ability, only with reference to (just some) knowledge about quarters. [58]

अवशिष्टं यदप्यस्य तन्मां पृच्छतु कामतः ।
इति चेतसि संधाय याज्ञवल्क्योऽभ्यभाषत ॥५९॥

'And also¹ whatever is left (in your mind), you do ask me freely (*kāmataḥ*), (O Śākalya).' with this thought in mind, Yājñavalkya spoke to him. [59]

¹*api* is for conveying 'though not asked by Śākalya'. This is the substance of Yājñavalkya's thought. This is expressed in yet another way in the following verse.

अतिनिर्बन्धतो वापि निषेद्योऽयं प्रमादवान् ।
इत्येतद्धृदये कृत्वा कारुण्यात्तमथाब्रवीत् ॥६०॥

'Or, this person (i.e. Śākalya), who has committed a fault (viz. asking rather boldly), should rather be warded off.' Having this in mind, (Yājñavalkya) said to him out of compassion (or pity). [60]

मय्यग्नौ शिशुवन्मोहात्प्रविशन्तं न कश्चन ।
त्वां वारयति यत्नेन साधुब्राह्मणसंसदि ॥६१॥

'While you are entering into the fire, viz. in me, owing to your ignorance, (just) like a child, nobody here in the assembly of good Brāhmaṇas wards you off carefully.¹ [61]

Verses 60-61 point to the ignorance of Śākalya who is, in

scoff as it were, called elsewhere as *vidagdha*. Cf. verse 27 above.

Verse 61 explains *tvām svit*

¹This is for *yatnāt* which is clarified by SP thus: *sabhāto bahirṇayanādi yatnaḥ*.

सर्वेषामपि नूनं त्वं हन्तव्यत्वेन संमतः ।
अकृत त्वां यतो विप्राः संदंशं मयि पावके ॥६२॥
तस्माद्बुध्यस्व शाकल्य महद्भयमुपस्थितम् ।
अतिनिर्मथनादग्निश्चन्दनादपि जायते ॥६३॥

Indeed, for all these, you are considered unanimously (*sammata*) as fit to be killed, since these Brāhmaṇas have made (i.e. used) you into a pair of tongs towards me (who am considered by them) as fire. [62]

Therefore, be on your guard (lit. wakeful), O Śākalya; there has occurred great danger for you; (you must know that) even from (the wood of) sandal tree there is fire produced by rubbing the same for a longer time (*ati*, lit. too much). [63]

Yājñavalkya gives the reason for warding Śākalya from asking any (other) question. The idea is: The Brāhmaṇas in the assembly, who were fully aware of the powers of Yājñavalkya, a knower of the Brahman, have only pitilessly pitched Śākalya against him only to be crushed.

The explanation in the second line of verse 63 is to indicate that there can arise anger in the mind of even a knower of the Brahman, despite his tranquillity.

Verses 64-69 are the discussion of BU 3.9.19.

विषायतेऽमृतमपि यथा पथ्यं मुमूर्षतः ।
तथैव नाग्रहीत्सूक्तं शाकल्यः कालचोदितः ॥६४॥

Since even nectar, which, though (beneficial) for one, acts as poison for one who is about to die,¹ therefore Śākalya, who was (as it were) goaded by death², did not accept that

good advise (*sūkta*).

[64]

This is to explain the BU sentence *yā*

¹Though the literal meaning is 'one who wishes to die,' it is not so meant!

²This is *kāla*.

ब्राह्मणैर्घातयिष्यामि मां जिघांसन्तमाश्विमम् ।
इत्यर्थं कोपकृद्वाक्यं शाकल्यो मुनिरब्रवीत् ॥६५॥

With this thought in mind (*ityartham*), viz. 'I shall get killed by (these) Brāhmaṇa this one who wishes to (i.e. can) kill me ¹ (only) quickly,' ² the sage Śākalya said to him this (lit. the sentence) that would cause his anger.

[65]

This is the purport of *kālacoditaḥ* ... in the preceding verse.

¹SP refers to the commonly accepted code of conduct (*nyāya*): *jighāṃsantaṃ jighāṃsīyān na tena bhrūṇahā bhavet*.

²SP explains the significance of these words thus: *śāpadānāt prāg evety āśuśabdārthaḥ*.

अङ्गारावक्षयणोक्त्या विद्वान्किं ब्रह्म श्रेयसः ।
अत्यवादीस्त्वमज्ञः सन्का विद्या फलिनी तव ॥६६॥

'It is to be understood by your statement regarding (the pair of tongs for) picking up cinders that you are a knower of the Brahman so that you have spoken ill (lit. too much) about the respectable Brāhmaṇas, though you are ignorant, while the lore of yours has really yielded fruit?'

[66]

The meaning of the BU sentence *yad idam* is under reference.

From SP we can infer that the intention of Śākalya was to hint at Yājñavalkya's eye on cows as the reward for whatever he said.

दिग्विभागाधिकारेण यथोक्ता एव देवताः ।
पञ्चधेहोपदिश्यन्ते तदेतदनुवर्ण्यते ॥६७॥

In the following verses (viz. verses 70ff.) are enumerated the deities, which are stated, as fivefold in relation to the topic of the division of quarters. [67]

This states the purport of *diśo veda*.

का विद्या सफला साक्षात्तवेतिप्रश्नवादिनम् ।
सदेवाः सप्रतिष्ठाश्च दिशो वेदेत्यथाब्रवीत् ॥६८॥

To him who asked 'Which lore of yours has directly yielded fruit?', he (Yājñavalkya), then said, 'I have known the quarters together with their deities and their abodes'. [68]

This is the meaning of the BU sentence *diśo veda*

सदेवसप्रतिष्ठादिशरीरं प्रतिजज्ञिवान् ।
आत्मानं स मुनिः पृष्टो यतस्तं पर्यपृच्छत ॥६९॥

Since the sage answered¹ (about) the Ātman as having a body, together with the deities and their supports etc.² (in it), he (i.e. Śākalya) asked him a question. [69]

¹Cf. the word *pratiśravaṇa* in verse 53 above—it is equivalent to *pratijñāna* (as understood from *pratijajñivān*).

²The word 'etc.' refers to the questions (*diśa*).

Verses 70-79 state the fivefold mode of worship in accordance with the different quarters such as the east, as but the worship of *Prāṇa*. Also, this is an exposition of BU 3.9.20-24.

सदेवाः सप्रतिष्ठैता दिशोऽहमितिवादिनम् ।
प्राच्यां किंदेवतोऽसीति विदग्धस्तमपृच्छत ॥७०॥

To him who said, 'I have known the quarters together with those deities and their abodes, Vidagdha questioned, 'What do you have as the deity in the east?' [70]

This is the meaning of *kimdevato 'syām*.

In this verse, Sureśvara uses *sapraṭiṣṭhāitāḥ* which is the case of double Saṁdhi, viz. that of *sapraṭiṣṭhāḥ etāḥ*. Sureśvara often follows the Vedic style of Saṁdhi.

पूर्वदिगात्मभूतं मां त्वं विद्वद्यादित्यदेवतम् ।
इत्युक्ते तमृषिं भूयः स प्रतिष्ठामपृच्छत ॥७१॥

When it was said (in answer that), 'Do you know me as one having become the Ātman of the eastern quarter, viz. as one having the sun as the deity,' Śākalya once again asked the sage about the abode of it. [71]

This is the meaning of the BU sentence *sa ādityadevataḥ*

सर्वरूपात्मकः सूर्यश्चक्षुष्येव प्रतिष्ठितः ।
सर्वरूपेषु चक्षुश्च रूपाणि हृदये तथा ॥७२॥

'The sun, who reveals itself in the nature of all forms, has his abode just in the eye and the eye has it in all the (visible) forms and, further, the forms (have it) in the heart. [72]

This explains the word *cakṣuṣi*.

रूपारब्धमिदं चक्षु रूपाणामेव तद्ग्रहात् ।
अभिव्यङ्ग्यसजातीयो व्यञ्जको रूपदीपवत् ॥७३॥

This eye is supported¹ in the forms, because it is only the forms which it (viz. the eye) grasps. What reveals some object belongs to the class of what is being revealed, as, for instance, a lamp and the form (are of the same class). [73]

The first line is justified by the generally accepted truth. This is an instance of the figure of speech, called *Arthāntaranyāsa*.

¹This is from the word *ārabdha* which is derived from *ārabh*, (equivalent to verb root *ālabh* also) 'to hold'.

अशेषविषयात्मत्वं मनोबुद्धयोर्विनिर्दिशेत् ।
सर्वगोचरभासित्वात्तादात्म्ये तच्च युज्यते ॥७४॥

One should point to the fact that *manas* and intellect have (or grasp) the nature of the worldly objects without exception (*aśeṣa*); and that is justified when we accept similar ¹ nature of them all because (*manas* and intellect) are capable of making all the objects apparent (to an individual). [74]

This stands for *tādātmya* 'oneness (in nature)' of *manas* and intellect with the objects revealed by them.

एष एवानुसंधेयो न्यायो योऽयमिहोदितः ।
वक्ष्यमाणासु सर्वासु दिक्षु प्रत्येकशः क्रमात् ॥७५॥

This very way of explanation (*nyāya*) which is stated here is to be extended to all the other quarters which will be mentioned, each one of them in order. [75]

प्राच्यां रूपोपसंहारो दिक्त्रये कर्मसंहतिः ।
ध्रुवायां संहतिर्नाम्नो हृद्येवं सर्वसंहतिः ॥७६॥

(Such is the intended thought of the Śruti:) In the eastern quarter there is a mention of all forms (collected together), in the three quarters, there is mention made of all activities in their collection. In the quarter above (called *dhruvā* = *ūrdhvā*), there is the mention of all the names together and, similarly, in the heart, there is the mention of all ¹ (of their collection). [76]

A note by the editor of the NKL edition under verse 76 above

would prove useful in understanding the relevant verses together that is, with reference to the five alternatives (*paryāyas*) in the sentences beginning with *hr̥daya hy eva rūpāṇi ... ūrdhvāyām*

¹This refers to the world which is made up of *nāmarūpa-karmāṇi*.

केवलं कर्म याम्यायां प्रतीच्यां पुत्रजन्म च ।
ज्ञानयुक्तमुदीच्यां च कर्मैवमुपसंहतम् ॥७७॥

In the direction of Yama, there is only (collection of) activities, in the west, there is (only) the birth of a son, and, further, in the north, there is collected in a similar manner (that) activity which is combined with knowledge. [77]

This refers to the three quarters (*diktraya*), mentioned in the preceding verse.

नाम्नश्चाप्युपसंहारो ध्रुवायां हृदि वर्णितः ।
एवं क्रमेण निःशेषं जगद्ध्युपसंहतम् ॥७८॥

The collection of all the names is also mentioned as belonging to the quarter above (*dhruvā*). This is described as supported in the heart. Thus is the entire world collected together—in this order. [78]

This explains BU sentence *dhruvāyām*

सामर्थ्याच्च मनोऽप्यत्र विज्ञेयमुपसंहतम् ।
रूपादिपञ्चकं यस्मात्तद्द्वारेणाश्रितं हृदि ॥७९॥

Owing to the significant power (*sāmarthya*) of (the word) *manas* also, it is to be known as merged (lit. collected together with others); it is supported in the heart through that very manner as the five things, viz. form etc.¹ [79]

This sets aside the doubt if *manas* were not included in the merger, for it was not mentioned in *niḥśeṣaṃ jagad upasaṃhṛtaṃ hr̥di*

¹This refers to *rūpa, rasa, gandha, sparśa, śabda*. Read NKL: *rūparasagandhasparśasaṃjñaviṣayapraṇcam manovikalpitaṃ atah manasa upasaṃhārābhāve tadvikalpitānāṃ hr̥di upasaṃhārā-nupapattirūpasāmarthyāt mano 'pi upasaṃhṛtaṃ draṣṭavyam ity arthaḥ—* also similarly explained in SP.

निःशेषं ब्रह्मलोकान्तं संहृत्य हृदयात्मना ।

याज्ञवल्क्यं स्थितं भूयो विदग्धः पर्यपृच्छत ॥८०॥

After Yājñavalkya stopped after mentioning the entire world ending in the Brahmaloḥka as what merged (lit. is collected together) as the form of (the Ātman) in the heart, Vidagdha (i.e. Śākalya) once again asked him (a question)! [80]

This introduces the question in *kasminn nu hr̥dayam*

सर्वोपसंहृदयं ब्रूहि क्वैतत्प्रतिष्ठितम् ।

Do you state where then does the heart abide?, viz. that which collects all (the world).

Now follows up to verse 84 the exposition of BU 3.9.25.

इत्युक्तोऽहल्लिकेत्येवं संबोध्योत्तरमब्रवीत् ॥८१॥

Thus asked, (Yājñavalkya) addressed him (by the word) O Ahallika and then made an answer. [81]

Here is taken up the exposition of the word *ahallika*. The AnSS edition reads *ahāllika* which we have ignored. In fact BU and also Sureśvara in BUBV elsewhere (cf. verse 42 above, e.g.) *ahallika*.

अहल्लिकेति वचसा नाधारान्तरमुच्यते ।
आद्युदात्तत्वलिङ्गेन ह्यभिधानं विदग्धवत् ॥८२॥

By the word *ahallika*, it is stated that there is no need of another as a support.¹ By the characteristic of the word as having an acute initial vowel, (it is understood) as a proper name like (the name) *Vidagdha*. [82]

From the statement of Sureśvara of *ādyudāttatvalinga*, we have to understand that the BU text also shows the use of accents in it. It seems from SP that Sureśvara bases his explanation of the initially accented name on (the similarly accented), on the basis of BUB (p.487): *nāmāntareṇa sambodhanam kṛtavān*; cf. NKL on this verse.

One can refer to SP for the derivational explanation of *ahallika* which the AnSS edition uses. The initial accent of this word compares well with the name *Vidagdha*.

¹It is to refer only to the heart as the support and nothing else.

प्रेतीभतोऽसि नूनं त्वं प्रेतवद्भाषसे यतः ।
लीयतेऽहनि रात्रौ च व्यज्यतेऽहल्लिकस्ततः ॥८३॥

Indeed you have become a ghost (lit. dead body) and indeed you speak like a ghost which disappears (*līyate*) in the day and appears in the night; therefore (you are) *Ahallika*. [83]

This explains the purpose of BU sentence *yatra etat*

मत्तः शरीरात्क्वान्यत्र मय्येवातः प्रतिष्ठितम् ।
अस्मदन्यत्र मन्वीथा यत्रेदं हृदयं क्वचित् ॥८४॥

Where else could (that heart be), if away from me, i.e. from my body? Therefore, (it is clear that) it is firmly fixed¹ in me (only). You consider that (the heart is) elsewhere than in me (and) this heart is somewhere else (then). [84]

This is the purport of *yatraitad anyatrāsmat*

¹This is for *pratiṣṭhita* and comes from *pratiṣṭhā* which we translated in earlier verses as 'abode', meaning: it is an abode. See verses 68-72 below and cf. *āyatana* 'support'.

यद्येतद्देहतोऽन्यत्र हृदयं स्यादवस्थितम् ।
हृद्वियुक्तं तदा देहमद्युः श्वानो मृतं ध्रुवम् ॥८५॥

If this heart had abodes elsewhere than in this body, then indeed would have dogs eaten the body which would certainly be as a dead one.

[85]

This explains *yad dhyetad*

Now follows in verses 85-101 the exposition of 3.9.26.

न त्वयं मृत इत्यस्मात्कारणादवसीयताम् ।
वनसिंहवदेवैतद्वयमन्योऽन्यसंश्रयम् ॥८६॥

Then let this not be concluded that this one (the Ātman residing in and identified with the body) is dead. Let this pair¹ be considered as supported in each other, just like a forest and a lion.²

[86]

¹This refers to the heart and the body.

²Commentators do not explain the word of *vanasinhavat*, yet we are in a position to explain the significance of the simile owing to word *anyonyasamśraya* with reference to the heart and the body. The simile of a forest and a lion is therefore to be understood thus: There cannot be a forest which does not afford any abode to a lion and so also there cannot exist a lion without a forest, for its residence; forest and lion are mutually dependent. That establishes the significance of the simile. This is clarified with reference to heart and body in the next verse.

नर्ते लिङ्गं शरीरस्य स्थितिः काचिदिहेष्यते ।
न शरीरं विना लिङ्गं कस्मैचित्कर्मणे क्षमम् ॥८७॥

Nowhere is it held (lit. desired) that a body can sustain without (the basic) subtle one; similarly, a body which is without the basic subtle one is not capable of performing any activity.

[87]

This justifies the opinion regarding the mutual dependence of heart (the subtle one) and body. That subtle one is explained by SP as subtle body (*sūkṣmadeha*).

न ह्यन्योऽन्यातिरेकेण संहतानां क्वचित्स्थितिः ।
संहतं च प्रतीचोऽन्यज्जगदेतच्चराचरम् ॥८८॥

Indeed, those which are combined together (or dependent on one another)¹ cannot exist without one another. And (therefore) this world, which is made up of moving and non-moving objects, is combined (with the inner self) and does not therefore exist elsewhere than in the inner self.

[88]

The first line presents a general rule and that is justified by the second line; this can be understood *vice versa*.

¹This is for *saṃhata*.

कार्यत्वाद्द्वयमप्येतद्यतो न स्वाश्रयं ततः ।
तत्प्रतिष्ठामथाप्राक्षीच्छाकल्यो निर्णयेच्छया ॥८९॥

Since both these have the nature of effects, therefore they do not really have a basis (or, an abode) in themselves; therefore, Śākalya, who wishes to have a decision in the matter, then asks about their basis (or, abode).¹

[89]

¹This explains the question in the Śruti *kasminn nu tvam*

....

द्वावप्येतौ ममात्मानौ प्राण एव प्रतिष्ठितौ ।
 प्राणोऽपाने स च व्यान उदाने व्यान आश्रितः ॥९०॥
 समाने च तथोदानः सूत्रात्मनि समाश्रितः ।
 एवमेष समानान्तः शाकल्यप्रश्ननिर्णयः ॥९१॥

Both of these are my Ātmans and abide in *prāṇa* 'the principal wind in the body' and that *prāṇa* in *apāna* and that (in turn) in *vyāna* and further *vyāna* (also) is supported by *udāna*. [90] *udāna* again is supported in *samāna*, viz. the one of the nature of Sūtra—thus this is, that is, up to that which ends in *samāna*; this is the decision about the question asked by Śākalya. [91]

देहहृद्वायवोऽन्योऽन्यप्रतिष्ठाः संहतत्वतः ।
 प्रयुक्ताः कर्मणा पुंसां वर्तन्ते भोगसिद्धये ॥९२॥

Like the heart and the body, the (five) winds also are mutually dependent,¹ because they are combined together and then they are (capable of) fulfilling existence (lit. enjoyment) of men, when connected with (i.e. employed for) their activity. [92]

¹That is, rest or abide in on one another.

सकारणमिदं सर्वमाकाशान्तं यथोदितम् ।
 ओतं प्रोतं च यत्रेदं तदक्षरमथोच्यते ॥९३॥

Thus, all this, up to what ends in *ākāśa*, as stated so far, has a cause for it and that is the one in which is woven lengthwise and crosswise (the entire world made up of cause(s) and effect(s)) and that is then called the imperishable. [93]

This is the explanation of *sa eṣā*

विहायाख्यायिकारूपं स्वेनैव वचसा श्रुतिः ।
 पुरुषार्थं समापित्सुः स एष इति चावदत् ॥९४॥

(Then suddenly) Śruti gives up (the narration in) the form of the narrative and, on its own, states "Thus this one, wishing to secure the end of man's life".¹ [94]

¹That is *sa eṣa*

प्रशासन इदं तस्थौ यस्यान्तर्यामिरूपिणः ।
स एष नेति नेतीति मधुकाण्डेऽपि वर्णितः ॥९५॥

This one is so described in the Madhu Kāṇḍa also,¹ this one is described in the words *neti neti*, who is the inner controller (and) under whose control has remained this world. [95]

¹This is a reference to 2.3 (Mūrtāmūrta Brāhmaṇa), by the force of *api*, 4.2 (Kūrca Brāhmaṇa) is referred to, according to SP. NKL says 4.3.6 which is not Kūrca Brāhmaṇa.

ननु ब्रह्माधिकारत्वात्कथमात्मेत्यनूद्यते ।
नैष दोषोऽतिरेकेण नात्मनो ब्रह्मता यतः ॥९६॥

(Objection:) 'Indeed this being the topic of the Brahman, how can it be restated in the word *ātman*?' (Answer:) 'This is not a fault, since the nature of (the Ātman) as the Brahman is not what exists in addition to it.' [96]

ग्राह्यत्वं शरणं सङ्गो भयं चाज्ञानकारणम् ।
तदत्ययाद्भयान्तानि न सन्ति प्रत्यगात्मनि ॥९७॥

(The attributes, viz.) being an object to be grasped, (and) to be fissiparous, attachment, fear, the cause of ignorance and ending into only fear on account of the loss of it (i.e. inner self). These do not belong to the inner self. [97]

निरविद्योऽसितो भास्वदविलुप्तचिदात्मकः ।
यत एवमतो नास्य नाशान्ता विक्रियात्मनः ॥९८॥

Since (this one is) unaffected by ignorance, unbound, luminous, having never lost its nature as sentience, therefore there cannot be any modification of the Ātman which ends in destruction.

[98]

कार्यधर्मानतीत्यैतांस्तद्धेतोरप्यतिक्रमात् ।
अपूर्वानपराद्येकः पूर्णः स्वात्मन्यवस्थितः ॥९९॥

(Thus,) this one, all alone, complete in itself and (having the characteristics) *apūrva* 'having no cause (for it)', *anapara* 'having no effect (of it)' ¹ etc., has remained in its (unaffected) nature by transgressing these attributes of effects (which are mentioned in the preceding verse).

[99]

¹BU 2.5.19; 3.8.8(Mādhyandina).

श्रुतिः स्वेनैव वचसा साक्षादित्यादिलक्षणम् ।
समापय्यात्मविज्ञानं भूयोऽप्याख्यानरूपकम् ॥१००॥
गृहीत्वा परिपप्रच्छ शाकल्यमभिमानिनम् ।
याज्ञवल्क्यात्मिका भूत्वा ह्यतिनिर्बन्धकारिणम् ॥१०१॥

Having thus completed the statement of the characteristics (of the Brahman) *sakṣāt* etc. (which were already expressed), the Śruti took up once again the form of (a statement of) the narrative in its own words: asked Śākalya who was full of pride (*abhimāna*), and was very much insistent, by assuming the role of Yājñavalkya for itself.

[100-101]

This verse explains the connection of the earlier sentence *etāni aṣṭau* ... with the question of Yājñavalkya that is put to Śākalya.

Verses 102-122 pertain to Yājñavalkya's question to Śākalya.

धनं निसृष्टं राज्ञेह ब्रह्मिष्ठोद्देशतो यतः ।
प्रष्टुं नैवाधिकारोऽतोऽब्रह्मिष्ठस्येह विद्यते ॥१०२॥

Since, here,¹ there is given away some reward (lit. wealth or money) intended for the best knower of the Brahman, therefore one should not understand here that a non-knower of the Brahman is fit to put such a question. [102]

This verse indicates that one should not take that Śākalya put a question because he is not fit to put such a question.

SP and NKL have rightly shown the dissolution of the Saṃdhi of *-tobrahmiṣṭha* into *to 'brahmiṣṭha*.

¹This refers to giving away of plentiful gifts to Brāhmaṇas.

अब्रह्मिष्ठत्वसिद्ध्यर्थमतोऽप्राक्षीद्रुषान्वितः ।
स याज्ञवल्क्यः शाकल्यं सापराधत्वसिद्ध्ये ॥१०३॥

Therefore, in order to establish (the characteristic of Śākalya) as a non-knower of the Brahman and also of an offender (in asking questions), Yājñavalkya, full of anger, asked him the question (which is stated in the Śruti). [103]

SP states in its introductory to verse 104 the view that the BU passage *sa eṣa neti neti* and the sentence *etāny aṣṭau ...* are to be considered as one question.

स एष नेति नेत्याद्यः प्रश्नो वायं समीक्ष्यताम् ।
मध्ये वाक्यच्छिदोऽभावादिति शब्दस्य पूर्ववत् ॥१०४॥

Or, let the sentence *sa eṣa neti neti* be considered as the first question, since there is not between (that sentence and the other beginning with *etāny ...*) a word *iti*¹ which breaks the two (sentences as parts of one and the same sentence). [104]

¹Such a word *iti* occurs between sentences *kasminn nu hrdayam* and *tad dhetuḥ ...* This indicates that the words *sa*

eṣa neti neti and *etāny* ... are but one sentence—there is no *vākyabheda*.

समासव्यासरूपेण शाकल्यो यदपृच्छत ।
ततः परस्ताच्छाकल्यं याज्ञवल्क्योऽप्यपृच्छत ॥१०५॥

Since Śākalya asked¹ (his question), referring to the collected form and discrete forms together, Yājñavalkya asked Śākalya a question thereafter. [105]

¹Sureśvara uses the verb root *praccha* as in *Ātmanepada*.

ऐकात्म्ये सर्वमेवेदं कार्यकारणलक्षणम् ।
समापनीयं निःशेषं समासव्यासवर्जिते ॥१०६॥

(The intention in Yājñavalkya's question is:) All this world, having characteristic of cause(s) and effect(s), has to be concluded as being (only) one with (i.e. in the form of) the *Ātman*, without (any division into) collected and discrete (objects). [106]

अपि शास्त्रार्थसंबन्ध उत्तरस्याः श्रुतेरयम् ।
तदनुक्तौ यतः पूर्वं सर्वं स्यात्तुषकण्डनम् ॥१०७॥

Also this is the relation of the matters in the Śāstra¹ and the subsequent Śruti, because if this were not pointed out, all that has been said earlier would only be considered as pounding the chaff. [107]

¹Namely *ekarase sarvasamāptes tadviśeṣatā*. Or, *akhaṇḍātmani* (NKL).

अष्टावायतनान्यत्र पृथिव्यादीनि निर्दिशेत् ।
अग्न्यादयस्तथा लोका अमृताद्याश्च देवताः ॥१०८॥

In this context, one should point to the earth etc.¹ as the

eight resting places (or supports) and so also Agni and others² as the *lokas* 'regions', and the deities beginning with Death.³

[108]

¹This refers to *kāma*, *rūpa* (this is in the general sense of form), *ākāśa*, *tamas*, *udaka*, *rūpa* (this is bright form), *retas* 'semen'.

²This refers to *hṛdaya*, *cakṣus* and *śrotra*.

³This refers to women, *satya*, quarters, Death, *asu*, Varuṇa and Prajāpati.

शारीरप्रमुखास्तद्वदष्टौ ज्ञेया यथोदिताः ।
पुरुषाः सर्व एवामी पुनर्दिक्षुपसंहताः ॥१०९॥
दिशश्च हृदये सर्वाः समाने हृदयादिकम् ।
एवं समाने संक्षेपो विकासोऽनन्तदेवताः ॥११०॥

So also should be known eight Puruṣas, as stated, viz. with the body as the first¹ among them, (and) all these are again collected in the quarters,²

[109]

and all the quarters (which are together supported) in (but) one heart (and) the heart etc. (supported) in but one (body); Thus is, in *samāna* the collection (i.e. summarising in brief of all of them in but one support). (As against this), the manifestation (of but one basis) is (in the forms of) innumerable deities.

[110]

¹This refers to *kāmamaya*, *ādityapuruṣa*, *śrotrapuruṣa*, *chāyā-maya*, *putramaya*.

²This is the purport of *sa yas tān*

प्रत्यग्याथात्म्यमोहस्य महिमैष त्वयोदितः ।
यतोऽविद्यैव प्रथते कार्यकारणरूपिणी ॥१११॥

This is so far described by you as the greatness (i.e. effect) of ignorance about the true nature of the inner self; therefore, it is to be understood as only ignorance that takes the form

of the effect(s) and the cause(s), showing (*prathate*) itself in its extensive existence. [111]

This reveals that Śākalya's knowledge was nothing else than ignorance about reality. This is clarified in the following verse.

स्वात्माविद्यानुरोध्येव समासव्यासतामगात् ।
आत्मा स्वतस्तु भास्वच्चिन्मात्रः पूर्णो निरञ्जनः ॥११२॥

The Ātman assumes the (various) forms (lit. states) of (various) collections and their expanse only in consonance with ignorance about itself; however, it is merely sentience which is brilliant, complete in itself, and untainted (by anything else). [112]

The second line brings out the intended meaning of the verbal form *atyakrāmat* in the Śruti.

यः स एतांस्त्वया पृष्टांश्चतुरोऽप्यष्टकानिह ।
निरुह्य कार्यतां नीत्वा प्रत्युह्याथात्मकारणे ॥११३॥

(I am saying about that) which has made apart (*niruhya*) all of these, viz. all the four groups of eight, about which you asked, as (rendered into) effects, and having collected them together (*pratyuhya*) in their cause, viz. Ātman; [113]

This is a kind of paraphrase of *sa yas tān*

This (viz. the manings of *niruhya* and *pratyuhya*) is further explained in the following two verses.

विभज्य कारणादुच्चैर्नीत्वा कार्यात्मतां मुहुः ।
वस्तुवृत्तेन निःशेषान्कार्यकारणलक्षणान् ॥११४॥
योऽत्यक्रामदनानात्वो भेदसंसर्गवर्जितः ।
तं त्वौपनिषदं देवं साक्षादित्यादिलक्षणम् ॥११५॥

that is, (about) that divine being of the Upaniṣads who is characterized by the words *sākṣāt* etc. and who does not have

any contact with duality (lit. discrete objects) and having no variety in him, whose real nature went beyond all (discrete objects) that are characterized as effect(s) and cause(s) in their entirety, after having separated (himself) from the cause and rendered them into the nature of effects.

[114-115]

आस्वेवोपनिषत्स्वेनं यतो व्याचक्षते बद्धाः ।
कर्मकाण्डे विरोधित्वान्नैवैनं व्याचक्षिरे ॥११६॥

Since the learned describes (i.e. explains the nature of) this one only in the Upaniṣads, they have not spoken about the same in the Karmakāṇḍa, owing to the opposition (of its nature to the matter in them).

[116]

This is the meaning of the word *upaniṣada*.

तं त्वौपनिषदं धीरा ब्रह्मात्मानं प्रचक्षते ।
तं त्वा पृच्छामि शाकल्य तं मह्यं ब्रूहि तत्त्वतः ॥११७॥

The wise ones describe that as the Brahman, the Ātman and Puruṣa of the Upaniṣads. About that one, I ask you, O Śākalya, tell me his true nature.

[117]

This is the meaning of the sentence *taṁ tvā prcchāmi*

न चेद्वक्ष्यसि तं मे त्वं मूर्धा ते विपतिष्यति ।
न विजज्ञौ च शाकल्यस्तमात्मानं यथोदितम् ॥११८॥

If you do not tell me that, then your head will fall off. But (ca) Śākalya did not know that, viz. the Ātman who is described (as above).

[118]

NKL edition reads ... *sākalyaḥ taṁ* ... (i.e. without Saṁdhi).

ततः स याज्ञवल्क्योत्थशापवाक्याख्यवह्निना ।

दग्धः सद्यो ममारैव ब्रह्मविद्विड्ज्वरान्वितः ॥११९॥

Being burnt by the fire in the form of (lit. called) words of the curse of Yājñavalkya, he, (Śākalya) the hater of the knower(s) of the Brahman and, affected by heat, immediately died. [119]

This is the meaning of *tasya ha mūrdhā vipapāla*.

कर्मप्रकरणे नायं श्रुतः पूर्वं कदा चन ।
नित्यं ह्युपनिषत्स्वेव श्रूयते वैदिकीष्वयम् ॥१२०॥

This one is not ever heard earlier in the section on ritual activities; indeed, it is ever heard only in the Upaniṣads which belong to the Veda. [120]

SP states: *yathāhuḥ— yasyaitac chārīraṃ so 'pi tair yajñāyudhair yajñāyudhīti*. Also cf. NKL (note): *yathoktam anupayogād adhikāravirodhāc ca, (kiṃ ca aupapātikasūtre) sa eṣa yajñāyudhī yajñamānaḥ aṇjasā svargaṃ lokaṃ jayati*. The editor of the NKL has borrowed material from SP's comment on the immediately following verse. This can be read with profit.

कर्मकाण्डादपच्छिद्य तेनात्रैवैष भण्यते ।
अपि प्राप्तं कर्मकाण्डे तद्विरोधात्तु नाब्रवीत् ॥१२१॥

Therefore, this one (the Aupaniṣada Puruṣa) is first taken away from (i.e. not mentioned in) the Karmakāṇḍa and stated only here (i.e. in the Upaniṣads) yet, implied (*prāpta*) through necessity, in the Karmakāṇḍa¹ (also), Śākalya did not mention that owing to his opposition to the (matter related to) ritual activities. [121]

¹Read SP: *uktam hi— dr̥ḍhatvam etadviśayaś ca bodhaḥ prayāti vedāntaniṣevaneneḥ* (Ślokavārttika 21.148).

प्रत्यग्ज्ञानस्य नैवातः कर्मणा स्यात्समुच्चयः ।
ऐकात्म्यवस्तुविज्ञानं कर्मभिर्हि विरुध्यते ॥१२२॥

Therefore, the knowledge of the inner self cannot have combination (with ritual and its activity), since the knowledge of reality viz. the singleness of the Ātman is opposed to (them).

[122]

In verses 123ff. there is incidentally a reference to the theory of the combination of knowledge and activity (of Bhartṛprapañca) and then follows its refutation.

अपरे पण्डितमन्याः सम्यग्ज्ञातात्मतत्त्वकाः ।
कर्मव्यध्वेषु कुर्वन्ति यथावस्त्वात्मबोधनम् ॥१२३॥

Others, who consider themselves (learned) Paṇḍitas, who (think that they) have well thought about the truth of the Ātman state (lit. make) the knowledge about one's own self only in the context of matters which are not in the domain of activity.

[123]

The holder of the theory of combination (i.e. Bhartṛprapañca) understands (of knowledge of the Ātman and ritual activity) the unity of the Vedic texts in such a way that, in one part of it, there is the context of activity and, in the other, that of reality--this justifies their theory of combination.

वस्तुतन्त्रं न हि ज्ञानं कर्तृतन्त्रं क्रिया यथा ।
कर्मव्यध्वोपरोधेन ह्यन्यथात्वं प्रपद्यते ॥१२४॥

(But the following is said in refutation:) 'Indeed, knowledge which is dependent (only) on the thing (viz. reality) is not dependent on (mere) activity in the same way as (activity depends on the agent); therefore, it (viz. knowledge) comes to have dissimilarity (with activity) owing to its opposition to the way of activities that are of opposite character.

[124]

This is the refutation of the theory.

यत्कर्तुमन्यथा कर्तुमकर्तुं वापि शक्यते ।
स्वातन्त्र्यात्तत्र भवता क्रियतां तद्यथेष्टकम् ॥१२५॥

Whichever is possible (for one) to do or to do otherwise or not to do, may that be done according to one's (own) will, owing to one's freedom¹ (to do that activity). [125]

This verse is based on the acceptance of the combination of repeated performances of some activity and the provisional activity (of obtaining knowledge), for both of them have same nature.

¹*yatheṣṭakam* is for *yatheṣṭam*, an example of the use of *svārthaka*.

वस्तुवृत्तानुरोधेव यत्तु ज्ञानं भवेदिह ।
व्यभिचारं न तद्याति पुरुषेच्छावशात्क्वचित् ॥१२६॥

But what knowledge arises out of this (viz. the Upaniṣad) is merely in consonance with real thing as it is and that never varies (lit. becomes of different nature), owing to the (changing) wish(es) of a man. [126]

This verse shows the intention of the author to discard the theory of combination of knowledge and activity.

उपवादिनेह विदुषो न भाव्यं कस्य चित्क्वचित् ।
एवंविदपि सञ्शत्रुरपवादादभूद्यतः ॥१२७॥

Nowhere should one be a person speaking against (*upavādin*)¹ a knower (of the Brahman), since even such a knower would become an enemy (of the knower of the Brahman), owing to (i.e. by) his ill talk (*upavāda*). [127]

This is to explain *tasmān nopavādī syāt* in BUB.

¹SP paraphrases this as *paribhava-kartr* 'one who insults'.

दग्धक्रोधनिदानः सन्याज्ञवल्क्योऽपि शत्रुताम् ।
शाकल्यस्यापि संयात उपवादैकदोषतः ॥१२८॥

Even Yājñavalkya who had burnt the cause ... of anger became an enemy of Śākalya also,¹ only on account of one fault, viz. talking in opposition (*upavāda*). [128]

SP points out the force of *śākalyasya api* thus: of Śākalya also, though he was a Brāhmaṇa.

तस्मान्नैवोपवादी स्याद्याज्ञवल्क्योऽपि शत्रुताम् ।
यस्मादगात्कष्टतरं नोपवादादतः परम् ॥१२९॥

Therefore, one should not be speaking against a kower of the Brahman, since Yājñavalkya also came to have enmity with Śākalya. As such, there cannot be anything more painful than speaking against (the knowledge of the Brahman). [129]

The force of *api* is to emphasise the nature of the knowledge of Brahman as full of tranquillity.

परलोकविनाशोऽपि विद्वद्विद्वेषकारणात् ।
अग्निहोत्राग्निसंस्कारं यतो नावाप शापतः ॥१३०॥

(In the case of Śākalya), destruction (i.e. leaving no possibility) of another world results from the cause, viz. hatred towards the learned (possessing the knowledge of the Brahman), because, owing to the curse (of Yājñavalkya), he did not have any ritual of the fire of Agnihotra (performed after his death).

[130]

परिमोषिणो यतोऽस्थीनि धनशङ्काप्रचोदिताः ।
तान्यप्यस्यापजहुस्ते ब्रह्मविद्वेषहेतुतः ॥१३१॥

That also was on account of his hatred of the knowledge of the Brahman, viz. that the robbers stole away his bones, impelled as they were by a doubt (i.e. a feeling that) those (bones) were wealth. [131]

This justifies the statement in verse 127 above: *upavādineha vidhuṣo na bhāvyam kasya cit kva cit*.

Now follows in verses 133 up to the end the purport of BU 3.9.27 and 28.

अनात्मार्थनिषेधेन यो नेतीति पुरोदितः ।
 विधिद्वारेण तस्यैव निर्देशार्थं परा श्रुतिः ॥१३२॥
 मूलं च जगतो वाच्यमत आख्यानतोऽपि च ।
 जित्वा देया द्विजान्गाव इत्यर्थं चोत्तरा श्रुतिः ॥१३३॥

The subsequent Śruti (which is), by way of an injunction, intends to point to that very (Ātman), that was earlier stated (in the words) *neti* ... by rejecting (the idea of its being) a non-Ātman, [132]

and the Śruti subsequent to this proceeds from the narrative to state about the cause of the world, and has also the purport, viz. cows are to be given to one, when one has conquered Brāhmaṇas in discussion. [133]

Now follows in verses 134-150, which occur at the end of BU 3.9.27 (viz. as BUB 3.9.28) the exposition of the meaning of the questions put by the objector.

साधर्म्ये सति वैधर्म्यं शक्यं प्रष्टुं यतस्ततः ।
 साधर्म्यमुच्यते श्रुत्या तद्वनस्पतिमर्त्ययोः ॥१३४॥

Since it is possible to ask about the dissimilarity (of things) even while (there is) similarity (between/among them), therefore in the (subsequent) Śruti is stated similarity between a tree

and a mortal.

[134]

बीजाद्वनस्पतेर्जन्म मूलाच्चेहोपलभ्यते ।
मर्त्यस्य जन्ममूलं यत्तद्ब्रूत ब्राह्मणा मम ॥१३५॥

It is noticed here (in this world) that there is origination of a tree from a seed and/or root, therefore, tell me O Brāhmaṇas, that which is the cause of the birth of a mortal. [135]

रेतो मूलं न वो वाच्यं जीवतस्तद्धि जायते ।
न मृतस्येह रेतोऽपि विद्यते कस्य चित्क्वचित् ॥१३६॥

You do not have to say that semen is the cause, since that is indeed produced only from living being. And there is nowhere and at no time noticed semen to exist in the dead. [136]

अपि धानारुहो वृक्षो बीजात्तज्जन्मदर्शनात् ।
मृतस्य बीजस्थानीयं न च किञ्चिदिहेक्ष्यते ॥१३७॥

A tree is noticed to sprout forth from a seed, therefore it is said to be arising from a seed. But, in the case of a dead man, there is not noticed here (i.e. in this world) anything that can be taken as the seed. [137]

धानारुहो यथा वृक्षः साक्षादव्यवधानतः ।
मर्त्यजन्म तथा साक्षाद्यतस्तदभिधीयताम् ॥१३८॥

Since it is directly perceptible that a tree is sprouting from a seed, without anything intervening, similarly, let it be told me from which there is the birth of a man without anything intervening. [138]

यथानुभूतशक्तीह बीजं वृक्षस्य दृश्यते ।
न च तादृङ्मृतस्यास्ति यस्मात्तस्य पुनर्भवः ॥१३९॥

There is noticed here (in the case of a tree) the seed whose capacity (lit. power) has revealed itself; but nothing like that is seen in the case of a man from which he becomes reborn.

[139]

दृष्टः काण्डरुहोऽपीह वृक्षस्तद्वच्च नेष्यते ।
हस्तपादादितरिच्छन्नात्र मृतस्य पुनर्भवः ॥१४०॥

So also is noticed a tree which proceeds from even a branch; but there is not noticed (lit. accepted) here the rebirth of a man who is dead, from his hand or feet etc. that is cut off from his dead body.

[140]

मूलाद्वीजाच्च वृक्षस्य साक्षाद्यद्वत्समुद्भवः ।
तद्वन्मृतस्य वक्तव्यं न तु पुत्रप्रपौत्रवत् ॥१४१॥

There is directly perceived that a tree proceeds (i.e. grows) from a seed or from a root; it cannot be said in the same way that there is the birth of a man, who is dead, from a son or grandson.

[141]

This concludes the meaning of *dhānārūhaḥ*

For *putraprapautravat*, refer to Pāṇini Sūtra 5.1.116: *tatra tasyeva*.

समूलबीजं चेद्वृक्षमावृहेयुस्तदोभयम् ।
मर्त्यः स्विन्मृत्युना वृक्णः कस्मान्मूलात्प्ररोहति ॥१४२॥

If they would cut off a tree together with its root(s) and seed, then both (of them, would not appear again);¹ (therefore, I would ask), 'From what cause (lit. root) there is born (lit. arises or springs) a man, (if/when) he is cut off by death?'

[142]

This is a very cryptic and therefore quite obscure verse of Sureśvara. Therefore, the translation of it is based on the original

verse in BU.

मतं न जायमानोऽस्ति जातत्वादेव कारणात् ।
पुमाञ्जनिष्यमाणो वा संसारस्य प्रवाहतः ॥१४३॥

If it is held that he would not be born, since he was already born (earlier), then (it could be asked) 'Would there be (at all) a man born in the stream of transmigratory existence?'

[143]

This is the meaning of *jāta eva*

प्रवाहरूपी संसारो दीपार्चिर्वदवस्थितः ।
न जायते जनिष्यन्वा तस्मादस्तीह कश् चन ॥१४४॥

Transmigratory existence, which has the form of streams, is noticed here (to be) like the flame of a lamp. Therefore, no one here (i.e. in this world) is born and would become born (again).

[144]

जात एवेत्यतोऽसाधु यदुक्तं पूर्वपक्षिणा ।
जनित्वा म्रियते सर्वो मृत्वा भूयश्च जायते ॥१४५॥

As to what the *prima facie* view has stated, viz. *jāta eva*, it is not well said, (because) all beings die (only) after having begotten (an offspring) and also would be born again after dying.

[145]

This has reference to the verse cited in BU: *jāta eva na jāyate ko nv enam janayat punaḥ* and explains the meaning of *naṁ* (i.e. *na*) in the same.

निर्बीजस्य च जन्मेह नागमात्र च युक्तितः ।
ब्रूतातो जगतो मूलं यतो भूयोऽभिजायते ॥१४६॥

Further, in this (world), there is never the birth of what has

no seed whatever; this (i.e. such birth) cannot be (argued) on the basis of tradition and reason. Therefore, tell me the cause of the world from which it becomes born (once) again.

[146]

तत्पृष्टं जगतो मूलं न विदुर्ब्राह्मणा यतः ।
अतो जिता हता गावो याताः सर्वे यथायथम् ॥१४७॥

Since the Brāhmaṇas did not know that cause of the world, which was inquired about, therefore all (the cows) were won and carried (by Yājñavalkya) and all (the Brāhmaṇas) went away as they had come (*yathāyatham*).

[147]

पृष्टं यद्याज्ञवल्क्येन न विदुर्ब्राह्मणाश्च यत् ।
श्रुत्या स्वतन्त्रया तन्नो ब्रह्माविष्क्रियते परम् ॥१४८॥

That which Yājñavalkya had inquired about and which the Brāhmaṇas did not know is revealed to us by the Śruti which is independent¹ as the highest Brahman.

[148]

¹SP explains the 'independence' of the Śruti as *ākhyānato vyutthiti* 'giving rise to a thought by mere expression (about it)'.

साक्षादित्यादिना प्रोक्तस्तथा सर्वान्तरश्च यः ।
अस्थूलोऽनणुरित्येवमक्षरात्मावधारितः ॥१४९॥
नेति नेतीति यश्चोक्त इहौपनिषदः पुमान् ।
तस्य साक्षादयं श्रुत्या निर्देशः क्रियतेऽधुना ॥१५०॥

That Ātman is affirmed in the words: 'The one who is described in the words *sākṣāt* etc. and also as (abiding) within all, (the one that is) not gross, not subtle etc.'

[149]

And about that one, who is described, in this context, as the Puruṣa of Upaniṣads and in the words *neti neti* is directly stated in the Śruti about that (again).

[150]

Now follows in verse 151-177 the exposition on the Śruti sentence *vijñānam ānandam brahma*.

Verses 151-165 refer to the word *vijñāna* and 166-177, the word *ānanda*.

विज्ञानमिति चैतन्यं कटस्थमभिधीयते ।

न कारकं न धात्वर्थो नापि यत्स्यात्क्रियाफलम् ॥१५१॥

It is said (that the Ātman is) knowledge (*vijñāna*), sentience (*caitanya*) and immutable (*kūṭastha*); that is not the means to (any) activity, nor is it the meaning of some verb root, nor also, the result of any activity. [151]

This is the meaning of *vijñāna* used for the Brahman.

न चापि तदभावश्च नेत्यस्थलादिशास्त्रतः ।

अभावस्यापि तत्साक्ष्यात्तदभावः कुतो मितेः ॥१५२॥

Not also¹ is there the absence of that (Brahman or Ātman). This is on the basis of the scriptural text *neti* and *asthūla* etc. And (if it is accepted that there is) the absence of that, (even that) becomes what is directly perceived and, thus, since there is knowledge about it, how could there be its absence? [152]

¹Also (*api*) refers to *kāraka*, *kriyā* and *kriyāvat*.

एतावन्मात्रयाथात्म्यात्कार्यकारणवस्तुनः ।

अतस्तत्त्वमसीत्युक्त्या तादात्म्यं प्रतिपाद्यते ॥१५३॥

Since reality which consists in effect(s) and cause(s) has only this much as its true nature, therefore, in the statement *tat tvam asi*, there is proposed the identity (of the cause(s) and effect(s)). [153]

tādātmya is to be understood as *aikātmya*.

निर्धताशेषदुःखौघहेतुत्वात्सुखमेव तत् ।
अर्थैष एव परमो यो वै भूमेतिशास्त्रतः ॥१५४॥

That is only bliss on account of its causing the destruction of the entire flow of misery. This is on the basis of the scriptural text *atha eṣa eva paramaḥ ... (and) yo vai bhuīmā*.¹

[154]

This is the meaning of *ānanda*.

¹Cf. BU 4.3.33 and CU 7.23.1.

विषयेन्द्रियसंबन्धाद्यत्तु दुःखं सुखायते ।
आद्यन्तवत्त्वात्तद्दुःखं दुःखसंस्कारजं तथा ॥१५५॥

And whatever misery arises from a connection between objects of desire and the relevant sense organs appears as happiness. (Happiness) is only misery on account of its having a beginning and an end (for it); so that is produced by (merely) impressions (on intellect) made by misery.

[155]

This explains the true nature of the bliss and of what arises from existence of sense-organs, viz. only misery.

अव्यावृत्ताननुगतभास्वद्विज्ञानमात्रतः ।
निरविद्याद्वयत्वात्तत्साक्षाद्ब्रह्मेति शब्दयते ॥१५६॥

That is described by the word *brahman* because it is merely brilliant knowledge, which cannot be distinguished from and is not similar to (any other thing); and because it is non-dual, having been bereft of ignorance and what is directly perceived.

[156]

साविद्यः प्रत्यगात्मा यो वियद्योनिरुदाहृतः ।
अन्तर्याम्यादिरूपेण स एव प्रथते मृषा ॥१५७॥

That inner self, which is associated with ignorance and which is stated to be the origin of the sky, is the one that reveals itself as an appearance (of the Ātman), (and exists) in the form of the inner controller. [157]

अदृष्टफलसंप्रेप्सोर्दृष्टकर्मफलत्यजः ।
रातेर्धनस्य दातुस्तद्ब्रह्मेदं स्यात्परायणम् ॥१५८॥

This Brahman is ¹ the ultimate goal of the giver of wealth, viz. of the *rāti* ² 'gift'; i.e. for one who has a desire for the unseen result and who has given up (some) seen result. [158]

There is a play on the words *dr̥ṣṭa* and *adr̥ṣṭa*. Actually, *adr̥ṣṭa* stands for some unseen power generated by ritual activity, as the Mīmāṃsakas have postulated. This explains the meaning of the word *rāti* as the giver of (some) gift.

¹*syāt* is for *asti*.

²This is equated with *dātr*.

अस्मिन्प्रशास्तरि सति क्रियातत्फलसंगतेः ।
नियमो युक्तिमानेष कर्मिणामुपपद्यते ॥१५९॥

This rule (holds good) in the case of the performers of (ritual activities), since the ritual activity and its results are properly connected (with them only) when this one (viz. the inner self, the Ātman) exists as the controller. [159]

एवं संसरतस्तावत्परं ब्रह्म परायणम् ।
जगतश्चाप्युपादानं स्वात्माविद्यासमन्वयात् ॥१६०॥

Thus, for a transmigratory being, the ultimate goal is the highest Brahman. Also that is the material cause of this world, owing to its invariable association with ignorance about its own (real) nature. [160]

This explains *tiṣṭhamānasya*

निविवृतसोस्तु संसारान्मुनेस्त्यक्तैषणस्य च ।
तद्विदस्तिष्ठमानस्य समाप्तिः स्यात्परायणम् ॥१६१॥

Since that is ¹ the ultimate goal for a person who is desirous of withdrawing from transmigratory existence, (and also) of the stage (of him) who has abandoned (all) the desires, i.e. *eṣaṇātraya*, the knower of the Brahman, and being devoted to (the world of) it. [161]

¹*syāt* is for *asti*.

दग्धमोहान्धकारस्य प्रत्यग्बोधाग्निना मुनेः ।
एकात्म्ये वर्तमानस्य ब्रह्मात्मास्य परायणम् ॥१६२॥

The Brahman, the Ātman, is the ultimate goal of this sage who has removed (lit. burnt) his own darkness in the form of delusion by the fire of knowing about (the true nature of) the inner self and is thus in the state of oneness with the (single) Ātman. [162]

तद्विदो ब्रह्मणश्चेह भेदहेतोरसंभवात् ।
ब्रह्मैव ब्राह्मणः साक्षादुपचारात्परायणम् ॥१६३॥

Since, for a knower of Brahman, (who is) the Brahman (itself), there could not be any possibility of the existence of what might cause the distinctions (i.e. distinct objects), therefore the Brahman itself is called Brāhmaṇa (and) the directly perceived ultimate goal, by way of a metaphor (*upacāra*). [163]

यत्र वा अन्यदित्येवं यत्र त्वस्येतिवाक्यतः ।
इत्युक्त्यर्थोपरोधेन व्याचक्षीत परायणम् ॥१६४॥

And, following the meaning of the sentence *yatra vā anyat* ...¹ and also *yatra tvasya* ...,² one should explain (the nature of) the ultimate goal. [164]

¹BU 4.5.15.

²BU 4.3.31.

तस्मात्तमस्विनो ब्रह्म भेदेनैव परायणम् ।
 ध्वस्ताविद्यस्य चैकात्म्यात्कैवल्येन परायणम् ॥१६५॥

Therefore, the Brahman is the ultimate goal for the ignorant (lit. one who is overcome by darkness) by (mentioning the Brahman as) being distinct (from him). On the contrary, in the case of him who has destroyed ignorance and its effect, it is the ultimate goal by itself, owing to his being one with it in nature. [165]

Now follows in verses 166-176 an exposition on the word ānanda.

ब्रह्मण्यनन्दशब्दोऽयं प्रयुक्तः सुखवाचकः ।
 संवेद्ये च सुखे लोक आनन्दाख्या प्रयुज्यते ॥१६६॥

This word *ānanda* is used for the Brahman and is used as expressive of (only) happiness; and when happiness is being experienced, the word *ānanda* is used in the worldly conversation (*loka*). [166]

विशेषणतयानन्दशब्दोऽन्यत्रापि दृश्यते ।
 वेदान्तेष्वत आनन्दो विचार्योऽयं प्रयत्नतः ॥१६७॥

The word *ānanda* is seen to be in use elsewhere also as a qualifier¹ (of someone or something else); therefore, there is no particular effort made to ascertain the nature of *ānanda* 'bliss' (as used) in the Vedāntic text. [167]

¹This is clarified in the following verse.

आनन्दो ब्रह्मेति तथा तैत्तिरीयश्रुतौ श्रुतम् ।
 अथैष एव इति च तथोदके प्रवक्ष्यते ॥१६८॥

So it is heard in the *Taittirīya Śruti*: *ānando brahma ...*¹ and also will it be stated later in *athaiṣa eva...*³ [168]

There is noticed the absence of Saṃdhi in *athaiṣa eva iti*, this is Vedic practice.

¹*Taittirīyopaniṣad* 2.4.

²BU 4.3.33.

भ्रमा तत्सुखमित्येवं छान्दोग्योपनिषद्वचः ।
संवेद्योऽयं किमानन्दः किं वा नेति विचार्यते ॥१६९॥

Such also is the statement of CU¹ *bhūmā tat sukham*; (therefore,) it is discussed whether this *ānanda* is what can be experienced (and also) whether it is not so (experienced). [169]

¹CU 7.23.1.

ब्रह्मण्यानन्दः संवेद्यो लौकिकानन्दवद्यदि ।
युक्ताः शब्दास्तदैते स्युर्ब्रह्मण्यानन्दवाचकाः ॥१७०॥

If (it is held that) *ānanda* in the Brahman is also what is experienced like any worldly happiness; (then we have to say:) 'these words are¹ properly used (ever) as expressive of the bliss in Brahman. [170]

¹*syuh* is for *santi*.

संवेद्यानन्दरूपं तद्वाक्याच्चेत्परिनिश्चितम् ।
प्रमाणावगतेस्तत्र किं चिन्त्यमिति चेन्मतम् ॥१७१॥

(An objection:) If it be held: 'What is there to be thought over (or, considered) if the nature of the bliss, which is to be experienced, is ascertained from a (Śruti) statement, for that is understood (from a Śruti statement) as the means of

knowing?'¹

[171]

This expresses an objection to the proposed explanation in verse 169 above about the nature of the bliss as an object to be known.

¹Or, ... that has been understood as a (proper or an authoritative) means of knowing.

नान्योऽन्यातिविरुद्धार्थवाक्यानां तत्र दर्शनात् ।
अतिप्रमाणविषयं ब्रह्म सर्वत्र विश्रुतम् ॥१७२॥

(The answer is:) 'No other thought is necessary, since there are noticed in the Śruti such sentences as do not have mutually opposed meanings in their extreme measure and also as is well known everywhere that the Brahman is beyond the world of objects for (various) means of knowing.'

[172]

This is clarified in the following verse.

यत्र त्वस्येति वचनं न दृष्टेरिति चापरम् ।
विदिताविदिताभ्यां तदन्यदेवेति च श्रुतिः ॥१७३॥

There is a statement (in the Śruti), viz. *yatra tv asya*¹ and also (yet) another *na dr̥ṣṭeḥ* ...² also there is a sentence *tad anyad eva*.³

[173]

¹BU 4.5.15.

²BU 3.4.2.

³*Kenopaniṣad* 1.6.

निरानन्दं तथा केचित्कैवल्यं प्रतिजानते ।
तेषामपि निषेधार्थं कर्तव्यातो विचारणा ॥१७४॥

Some (thinkers) affirm that liberation consists in merely (achieving) segregation (of oneself from worldly objects), which is devoid of any (worldly) bliss, therefore, in order to reject

their views also, the proposed¹ consideration should be done.

[174]

¹See verse 169 above.

विकल्पासंभवश्चात्र वस्तुवृत्तत्वकारणात् ।
क्रियायां स्याद्विकल्पोऽयं न तु वस्तुन्यसंभवात् ॥१७५॥

There is no possibility of any option regarding (the nature of the Brahman) since it pertains merely to the nature of the thing as it is; such an option is possible only in respect of an activity, but it is not at all possible in respect of the thing (viz. reality).

[175]

In the Karmakāṇḍa, we come across sentences like *udite juhoti* and *anudite juhoti* and these create the idea of an option regarding the relevant ritual activity. But, here, in respect of bliss arising from liberation, such an option cannot be entertained.

वादिविप्रतिपत्तेश्च केचिदिच्छन्ति वादिनः ।
असंवेद्यं सुखं मोक्षे केचिन्नेति प्रचक्षते ॥१७६॥

Some opponents think that happiness is not what is (i.e. can be) experienced in liberation and some others that this is not so, for thus is there difference of opinion amongst the opponents.

[176]

This is an additional argument for discussing the thought about the options, as mentioned in verse 169 above.

कर्तव्योऽतो विचारोऽत्र युक्तिमार्गेण यत्नतः ।
सम्यङ्निश्चयसिद्ध्यर्थं पक्षयोरुभयोरपि ॥१७७॥

Therefore, in respect of this (i.e. bliss in liberation), there has to be a thought given to (the doubtful nature of it) by resorting carefully¹ to way of reasoning, so that there can

be a definite decision (regarding the views) of the two opposing sides. [177]

SP states *parapakṣanirākaraṇe* for *yatnāt*.

Verses 178-185 are the prima facie view in regard to the proposed discussion.

संवेद्यानन्दकं तावद्ब्रह्मेतीहावसीयताम् ।
जक्षत्क्रीडन्नममाण इत्यादिश्रुतिवाक्यतः ॥१७८॥

To begin (our) argument, let it be concluded that the Brahman is that wherein bliss is (certainly) experienced; this from the sentence in the Śruti beginning with (the words) *jakṣat kṛīḍan ramamāṇaḥ*¹ [178]

¹CU 8.12.3.

नन्वेकत्वे विभागोऽत्र नास्ति कारकसंश्रयः ।
भूरिकारकसाध्या च क्रिया लोकेऽपि दृश्यते ॥१७९॥

(But one might object:) Indeed, there cannot be (the existence of) any discrete objects in what is just a single thing, so that it is related to some means (*kāraka*). (Indeed) an activity even in the worldly sphere is noticed as what has to be accomplished by many means (of activity). [179]

The *prima facie* view anticipates an objection from the Siddhāntin that one should not object to the acceptance of the division of an activity as related to the various means of knowing.

विज्ञानस्य क्रियात्वाच्च न सिद्धिः कारकैर्विना ।
नातः संवेद्य आनन्दो ब्रह्मणीहोपपद्यते ॥१८०॥

Since knowing (*viññāna*) is an activity, it cannot be accomplished

without any means; therefore, it can be held as reasonable that there cannot be bliss in the Brahman, as what can be experienced (by some means). [180]

नैष दोषोऽस्ति विज्ञानं स्यादेवानन्दगोचरम् ।
विज्ञानमानन्दमिति शब्दप्रामाण्यकारणात् ॥१८१॥

This is not a fault, since knowing would have bliss as its object, for this is (already) known from the scriptural authority saying *vijñānam ānandam brahma*. [181]

ननु सत्स्वपि वाक्येषु नैतदध्यवसीयते ।
प्रत्यर्थिनि श्रुतेर्वाक्ये सत्यैकात्म्यावबोधिनि ॥१८२॥

(But one might object:) 'This cannot be so decided, even while there are such sentences, while there is an opposing statement of the Śruti which informs about the singleness of the Ātman. [182]

मानान्तरविरोधेन न हि लोकेऽपि किं चन ।
मानं प्रवर्तते तस्मान्नैतदध्यवसीयते ॥१८३॥

Indeed, there is not any means of knowing in this world which can be operative (in effecting right knowledge), while there is opposition of any other means; therefore this is not so decided.¹ [183]

¹As said in verse 184.

व्यञ्जकत्वाच्च मानानां सिद्धवस्तुप्रयोज्यता ।
कारकत्वेऽप्यकार्यत्वाद्दुःसंभाव्यं त्वयोदितम् ॥१८४॥

And since the means of knowing reveal to one (their objects) and are the causes of already existing things to be instrumental (to some activity); therefore, (the Brahman) not being the effect, what you have said¹ is not possible. [184]

¹This refers to the argument in verse 183 above.

ननु सुख्यहमस्मीति विज्ञानमनुभूयते ।
प्रतीच्यानन्दविषयं न प्रत्यक्षं विरोध्यतः ॥१८५॥

(The *prima facie* view still persists:) 'But, indeed, knowledge (*vijñāna*) of one is experienced (in the form), 'I am happy' and, therefore, direct perception of the object, in the case of the inner self, is not opposed (in nature to *vijñāna*). [185]

Verses 186-205 are the exposition by the Siddhāntin: 'In liberation, bliss is not an object of existence.'

नैतदेवं यतो मोक्षे विज्ञानं नोपपद्यते ।
देहाभावो हि मोक्षोऽयं करणानि न सन्त्यतः ॥१८६॥

This is not so, since any (worldly) knowledge (of someone), in the state of liberation, is not reasonable; indeed this liberation consists in the absence of body and, therefore, there are no organs (by which one knows the objects etc.) [186]

करणाद्यनपेक्षस्य न च विज्ञानसंभवः ।
तथा सति शरीरादेरुपादानमनर्थकम् ।
तथैकत्वविरोधान्न संवेद्यानन्दकं परम् ॥१८७॥

There is no possibility of any knowledge of one, since that one is not dependent on organs etc. That being so,¹ the acceptance of a body etc. (in the case of the liberated) is meaningless and, so also, owing to being opposed to the state of liveness (i.e. singleness of the Ātman), the highest Brahman cannot have bliss as the (external) object of its knowing. [187]

We have accepted the reading of NKL edition and also a variant reading in AnSS edition which reads *karaṇādyanapekṣaḥ san na*. Doing this, we arrive at a suitable translation, avoiding

uncouth construction of the AnSS text.

¹In the state of liberation.

Verses 188-191 are the prima facie view's counterobjection.

यद्यानन्दात्मकं ब्रह्म नित्यमात्मानमात्मना ।
तद्विज्ञानस्य नित्यत्वाज्जानीयान्नित्यमेव तत् ॥१८८॥

If the Brahman has the nature of bliss, then the knowledge (of it) would be eternal and occur of itself; and, therefore, one's knowing that bliss would always be occurring. [188]

जले जलं यथा तस्मिन्संसार्यप्येकतां गतः ।
सर्व एकीभवन्तीति न पृथक्त्वेन संस्थितः ॥१८९॥

As water (poured) into water (is not distinct from that latter), so also a transmigratory existent being, who has obtained oneness (with the Ātman), would not remain apart (from it), since (there is a Śruti statement) *sarva ekībhavanti*.¹ [189]

¹*Muṇḍakopaniṣad* 3.2.7.

तदानन्दात्मकब्रह्मविज्ञानाय मनागपि ।
न तदेकत्वतो वेत्ति ब्रह्मानन्दं स्वकं तथा ॥१९०॥

Therefore, that Brahman is not even a little capable of knowing about the Brahman which has the nature of bliss. And so, owing to its being single (i.e. without a second), the Brahman does not know its own bliss. [190]

मुक्तोऽपि न च संसारी तयोरेकत्वहेतुतः ।
मुक्तो वेत्ति परानन्दमिति तस्माद्वचो मृषा ॥१९१॥

Also, a liberated one is not (any more) a transmigratory being, for the reason that they are (not existing) as only one single (entity); therefore, the statement that liberated person knows

the highest bliss is (indeed) false.

[191]

ब्रह्मानन्दमथान्यः सन्वेद मुक्तो घटादिवत् ।
ब्रह्मत्वमन्यो वेदेति तदैकत्वं विरुध्यते ॥१९२॥

If (it is argued that) one remaining different (from the Brahman) knows the bliss of the Brahman just in the same way as a person (knows) a pitcher (remaining apart from it); then (this is to be said in answer:) 'In that case, the oneness (attained by a liberated person) is opposed (i.e. becomes rejected)'.

[192]

प्रेत्य संज्ञेह नास्तीति श्रुतिरेव निषेधति ।
मुक्तौ विभागविज्ञानमेकत्वादेव कारणात् ॥१९३॥

Also, the Śruti itself rejects (that idea) as it says *pretya sañjñeha nāsti*.¹ In liberation any knowledge of difference such (as the knower and the known) arises only from one cause, viz. the single Ātman.

[193]

This is justified in the following verse.

¹The actual words of Śruti are *na pretya sañjñāsti* (BU 2.4.12; 4.5.13).

स्त्रीपुंढृष्टान्तवचनं यद्वै तदिति चापरम् ।
ज्ञात्राद्यसंभवं वक्ति कूटस्थैकत्वकारणात् ॥१९४॥

There is stated in the illustration of man and woman,¹ viz. *yad vai tad* ... and also another which states the impossibility of the knower and the others, and only for one reason, viz. immutability.²

[194]

¹*tad yathā priyayā striyā sampariṣvaktō na bāhyaṃ kiṃ cana veda nāntaram* ... (BU 4.3.21).

²This refers to BU 4.3.23: *yad vai tan na paśyati paśyan vai tan na paśyati*.

नेति नेत्यादिभूयांसि विरुध्यन्ते वचांस्यपि ।
कारकाद्यभ्युपगतौ मुक्तौ ब्रह्मणि केवले ॥१९५॥

Also, many Śruti sentences such as *neti neti* would also be opposed (i.e. become rejected), if it is accepted that, in liberation, there are instruments of activity etc., while there exists only the absolute Brahman. [195]

विज्ञानानन्दयोश्चैक्यादसंयोगविभागतः ।
आनन्दज्ञानविषया कल्पनेयं वृथा श्रमः ॥१९६॥

Therefore, owing to the oneness of knowledge and bliss and also the absence of conjunction of separation (of the same), (entertaining) this notion about the existence (i.e. knowledge) of bliss is merely (an activity inviting) fatigue (i.e. futility). [196]

अज्ञानान्यार्थविज्ञानप्रसक्तावेव युज्यते ।
वेत्ति ब्रह्म सुखमिति न तु ज्ञानघनात्मनि ॥१९७॥

The statement, 'The Brahman knows (viz. experiences) bliss' is reasonable only when there is the contingency that there is knowledge of an object other than ignorance; but (it is) not so, when there is existent only the Ātman which is a solid mass of knowledge. [197]

This rejects the idea of *brahmajñāna* being a composite entity of the knowledge of the Brahman and of the bliss.

अज्ञानान्यार्थविज्ञानप्रसङ्गाङ्गीकृतावपि ।
जाड्यं जन्मादिबद्धत्वं ब्रह्मणः प्राप्नुयाद्ध्रुवम् ॥१९८॥

And in case one were to accept the contingency that there exists for knowledge an object other than ignorance, there would certainly follow then insentience and the state of being

bound by birth etc. in the case of the Brahman.

[198]

तस्माद्विज्ञानमित्यादि यथावस्थितवस्तुनः ।

वचोऽन्वाख्यायकं ग्राह्यं न ज्ञानादिविधायकम् ॥१९९॥

Therefore, the statement which states about the thing as it exists, viz. *vijjānam* ... is to be accepted as authoritative, and not that which describes (the acquisition of) knowledge etc.¹

[199]

¹This refers to *gūṇitva* of the Brahman.

जक्षदित्यादि यच्चोक्तं तच्चापि न विरुध्यते ।

सर्वात्मकत्वाद्विदुषः सर्वतःपाणिपादवत् ॥२००॥

As to what is said, viz. *jakṣat* ...¹ also, it is not opposed on account of (the knower) of the Brahman having become the nature of all (*sarvātman*) and one possessed of hands and feet on all sides.¹

[200]

¹CU 8.12.3; cf. verse 178 above.

²*Gītā* 13.13: *santaḥpāṇipādaṃ tad sarvato akṣīśiromukham*.

योगिदेवादिदेहेषु जक्षणाद्युपपत्स्यते ।

सर्वात्मकत्वाद्विदुषः स्याद्विमुक्तिस्तुतीरणम् ॥२०१॥

The statement about *jakṣaṇa* etc. would have become reasonable in respect of the bodies of yogins, gods and others, but (referring to that) in the case of the knower (of the Brahman) would be on account of his being of the nature of all is merely the expression of praise related to liberation.

[201]

मतं जक्षणवन्मुक्तौ सर्वात्मत्वात्परात्मनः ।

दुःखित्वमपि संप्राप्तं कुम्भीपाकादिदेहेषु ॥२०२॥

(Objection:) If it be accepted that there is a liberation together with *jakṣaṇa* etc. in the case of the highest Ātman, on account of its being the nature of all, then, there would follow even the state of unhappiness which is noticed in beings who are residents of the Kumbhīpāka (hell). [202]

नैवं नामादिसंभतिपिण्डप्राणादिसंश्रय-
संपर्कजनितभ्रान्तिदुःखित्वाद्यस्तिहेतुतः ॥२०३॥

(Answer:) This is not so, because (all) that has resulted from the delusion of being miserable, owing to the error produced by the contact with name etc., birth and assuming a body or organ etc. [203]

विषयप्रविभागश्च विरुद्धवचसां मिथः ।
प्रागेवास्माभिरुक्तोऽसौ यथावदुपपत्तिभिः ॥२०४॥

And the division of the sentences (of the Śruti) (as mutually) opposing as subject matter has been already explained by us earlier with suitable reasons. [204]

This refers to Madhu Brāhmaṇa.

आनन्दब्रह्मविज्ञानपदार्थैकत्वहेतुतः ।
नीलोत्पलादिवन्नातः संसर्गो ब्रह्मणीष्यते ॥२०५॥

Therefore, since there is only one object to be known, viz. bliss, the Brahman, there is not accepted in the case of the Brahman any kind of contact (between a thing and a property) as in the case of a blue lotus etc. [205]

In the statement about a blue lotus, we accept the invariable contact of blueness and the object lotus, but such a contact does not obtain among knowledge, bliss and Brahman.

Now follow the concluding verses which are statements about

the bliss of the Brahman as the highest one.

मर्त्याच्छतगुणेनात उत्तरोत्तरवृद्धितः ।
कार्यकारणरूपस्य निष्ठानन्दः परो मतः ॥२०६॥

Therefore, it is accepted as the ultimate end of what have the forms of cause(s) and effect(s) in such a way that it goes on increasing from (every state of) a mortal's happiness by becoming a hundredfold. [206]

साधनादिव्यपेक्षैव सुखसंवित्तिरिष्यते ।
लौकिकी नश्वरी सापि दुःखसंस्कारजा तथा ॥२०७॥
कैवल्ये न तु सापेक्षा सर्वसाधननिःस्पृहा ।
आत्मैवानन्दयाथात्म्यं नातो ज्ञानादिसाधनम् ॥२०८॥

Knowledge of happiness in the world is accepted as only dependent on the means (of securing effects) and also that it is produced from the impressions of misery; [207]
but, in absolute oneness, that (existence of happiness is) not so dependent (on the means etc.); it is without any dependence on (lit. the desires for) all the means. Since the Ātman alone has bliss for its true nature, it is not having any means of knowing etc. [208]

न जडं ज्ञानरूपत्वादानन्दत्वात् निःसुखम् ।
नान्तवद्ब्रह्मरूपत्वादिति वाक्यप्रमाणतः ॥२०९॥

vijñāna (i.e. Brahman) is not insentient, because it is the very nature of knowledge; it is not without any happiness, because it is itself bliss; and it is not with an end (since it is of the nature of the Brahman—this (is known) from the authoritative sentence (in the Śruti). [209]

आनन्दैकस्वभावोऽस्य सुषुप्तेऽध्यवसीयते ।
व्यावृत्ताशेषमात्रादेरनन्यानुभवात्मना ॥२१०॥

The nature of this one as consisting in bliss is determined (i.e. becomes known) in the state of sleep, since all the organs have withdrawn (from their activities) and there is merely the experience (of its existence) on the part of the Ātman. [210]

**BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA**

4.1

Ṣadācārya Brāhmaṇa

This relates to acquiring (the knowledge of) the Brahman as vijñāna (and) ānanda through the (knowledge about the) deities Vāc and others.

Verses 1-2 point out the connection between the earlier (i.e. the third) Adhyāya and this Brāhmaṇa (4.1) which marks the beginning of a new (i.e. the fourth) Adhyāya.

आनन्दं ब्रह्म विज्ञानं साक्षादित्यादिलक्षणम् ।
पञ्चमान्ते विनिर्णीतं जल्पन्यायेन सांप्रतम् ॥१॥
वागादिदेवताद्वारा भूयस्तस्यैव वित्तये ।
षष्ठ आरभ्यतेऽध्यायो वादन्यायेन यत्नतः ॥२॥

In the end of the fifth¹ Adhyāya, it is decided, by way of² *jalpa*³ (as to) what has the characteristics of being bliss, (particular) knowledge,⁴ directly perceptible etc.,⁵ (and) now

has (lit. is) begun the sixth⁶ Adhyāya, in the way of *vāda*,⁷ so that there (results) the knowledge about the same through (identifying it) with the deities Vāc and others,⁸ with an effort (for presenting it).⁹ [1]

[2]

¹This is the third Adhyāya according to modern count.

²That is, in the manner of.

³This is conversation between two parties, one wishing to secure the conquest of the other by vanquishing it in speech, just like the fight between two players in the game of chess—cf. SP: *caturaniganirvartyajayaparājayapradhānanyāyena*.

⁴This means: that which does not involve subject-object relation in the worldly manner.

⁵This refers to *sākṣāt*, *aparokṣāt* and *sarvāntara* (about the Brahman).

⁶This is the fourth Adhyāya according to modern count.

⁷This is like instruction imparted by a preceptor to his pupil which is aimed at ascertaining the truth of a doctrine or system.

⁸This is on the basis of SP: *vāgādyadhiṣṭhātrīṣv agnyādidevatāsu brahmadṛṣṭidvārety arthaḥ*.

⁹SP explains this as one's effort at establishing the correctness of one's own doctrine or system, by first refuting the opponent's (or opponents') view or views and then affirming the same with reason.

SP introduces the next verse thus: *paraparājayam ātmavijayaṃ ca nyāyato labdhavatas tattvanirdhāraṇe buddhisvāsthyam bhavatīty adhyāyayor utthāpyotthāpakarūpaṃ sambadham uktvā*

In verses 3-9, there is expositioin of BU 4.1.1.

योग्यकालावबोधार्थमासांचक्र इतीरणम् ।
कल्पं बुद्ध्वाथ तमृषिराजगाम महीपतिम् ॥३॥

The use (lit. utterance) of (the verb) *āsāṃcakre* is for conveying (that it was) suitable time (for one to inform/instruct the king regarding some matter). Then, having known that as suitable time (*kalpa*),¹ the sage approached the king. [3]

¹Add 'for going to the king's presence' to complete the sense.

पशूनिच्छन्किमागास्त्वं प्रश्नान्वा सूक्ष्मनिर्णयान् ।
वक्तुं किमागतोऽसीति नृपः पप्रच्छ तं मुनिम् ॥४॥

The king asked the sage, 'Why! Have you come (to me) with a wish for cattle? or, to answer (my) questions (which require) careful (lit. subtle) decisions?' [4]

This explains the BU sentence *kimartham acārīḥ paśūn icchann anyantān iti*.

धनार्थं ब्राह्मणा यान्ति राजानमिति युज्यते ।
न त्वनापदि विद्यार्थं तं यान्तीह द्विजोत्तमाः ॥५॥

It is understandable that the Brāhmaṇas approach a king for (obtaining) wealth (from him).¹ Not, however, do excellent Brāhmaṇas approach him here,² unless in the absence of difficulties (and) for (securing) knowledge (or lores).³ [5]

¹Cp. *Yājñavalkyaśmṛti* 1.100: *upeyād īśvaram caiva yoga-kṣemārthasiddhaye*.

²SP points out that *iha* means to the *śāstrīyavyavahārabhūmi*.

³This is intended for setting aside the view of some that Yājñavalkya approached the king for *yogakṣema* and also for acquiring *vidyā* 'knowledge', with a view to imparting it to others. They have in mind, perhaps, Gārgya who approached the king Ajātaśatru for *vidyā* (BU 2.1).

नान्यत्र क्षत्रियाद्विद्या यत्र संभाव्यते क्वचित् ।
उपसीदन्ति तत्रैव ब्राह्मणाः क्षत्रियान्सदा ॥६॥

(Again) it is possible that knowledge (of a certain lore (*vidyā*)) does not obtain elsewhere than in a Kṣatriya (*yatra*). Only in that case (*tatraiva*) do Brāhmaṇas approach (lit. sit near unto) Kṣatriyas. [6]

This brings out the significance of the use of *anāpadi* in the preceding verse. Reference to Ajātaśatru Brāhmaṇa (BU 2.1) is obvious.

याज्ञवल्क्यस्य शिष्यत्वे ग्रन्थच्छायापि नेष्यते ।
जनकस्यैव शिष्यत्वे ग्रन्थच्छायोपलक्ष्यते ॥७॥

There is not even a small portion of the text (of the Upaniṣad) pointing to Yājñavalkya's being a pupil (of Janaka); but, on the contrary, there is noticeable some portion of the text

pointing to Janaka's being (his) pupil.

[7]

The verse aims at driving away a doubt, viz. the text of BU indicates that Yājñavalkya was a pupil of Janaka (cf. SP quoting: *uktaṃ cācāryatvaṃ hitvā*). This can be so doubted, on the basis of Yājñavalkya's words *tac cṛṇavāma*. Yet the remark of SP may be noted: *ekavacanabahuūktibhyāṃ rājño muneś ca śiṣyā-cāryatve bhāsete sambhavati cācāryaśyāpi śiṣyabuddhiśodhanā-rthaṃ tam prati praśnavākyaṃ iti bhāvaḥ*.

अण्वन्तानिति शब्दोऽयं न स्यात्पशुविशेषणम् ।
उभयं त्वित्यतः शेषाद्द्वयं पृष्टमतौ भवेत् ॥८॥

This word *aṇvanta-* is ¹ not an adjective of (the word) *paśu-*; ² (for), from the remaining part (of the text), ³ viz. from the remainder (i.e. the subsequent words) *ubhayam ...*, it becomes ⁴ (clear) that both (the things are intended to be sought). [8]

¹ *syāt* is for *asti*.

² This is suggested on the basis of *sāmānādhikarāṇya* 'being in the same case' of the two words *paśūn* and *aṇvantān*.

³ This is *ubhayam eva śamrāt*.

⁴ *bhavet* is for *bhavati*.

तद्धेतुहेतुमत्त्वस्य प्रसिद्धयर्थमथावदत् ।
इच्छाम्युभयमप्येतदित्येवं ह्यन्यथा वदेत् ॥९॥

Then, in order to clarify the relation of (his asking the questions and receiving the gift of cows) as the cause and the effect, (the sage) said, 'I wish these (lit. this) both of them'. (Otherwise), he would have indeed said (some other words).

[9]

SP clarifies the force of *ubhayam api*: this is indicative of that the things he wishes to secure are equally important.

In verses 10ff. there is exposition on the remaining six *kaṇḍikās* (together), i.e. from 4.1.2 onwards.

वाग्देवताग्निरत्र स्यात्तथायतनमिन्द्रियम् ।
ब्रह्माकाशः प्रतिष्ठा च नामोपनिषदुच्यते ॥१०॥

In this ¹ context/text, the deity of *vāc* is Agni, the organ is the abode and the Brahman, viz. the ether, is the support. So also is the name (viz. *Prajñā*) the *upaniṣad* (viz. the secret name).²

[10]

¹That is, in the sentence *vāg vai brahman*. The exact reference to the sentence is: *vāg evāyatanam ākāśaḥ pratiṣṭhā prajñety enad upāsīta*.

²This refers to *prajñety etad upāsīta* where *prajñā* is the name for the Brahman.

करणायतनान्देवान्स्वप्रतिष्ठान्ब्रजेत् सः ।
प्रज्ञाद्युपनिषत्कान्यो ध्यानाद्देवो भव्रेदिह ॥११॥

And (*tu*) the (worshipper's) self (*Jīva*) becomes (lit. goes to) the deities which have the organs for their abodes, viz. those who have *Prajñā* and others as their names, (the one) who, by worship of (i.e. meditation on) them (first) becomes (lit. would becomes) here ¹ a god.

[11]

This explains *devo bhūtvā ...* in the various *kaṇḍikās*.

¹This refers to the worldly life of one.

देवतायतने चैव प्रतिष्ठोपनिषत्तथा ।
षट्स्वप्येतेषु विज्ञेयमेतदेव चतुष्टयम् ॥१२॥

In (all) these six (*paryāyas*) has to be known this very quartet, viz. the deity, (its) abode, (its) support and its secret name.

[12]

This is to state that, in 4.1.2-7 also, the quartet mentioned there has to be understood in a similar way to that in 4.1.1.

मातृमानिति हेतूक्तिः सम्यक्वक्तृत्वसिद्धये ।
सम्यक्त्वप्रतिपत्त्यर्थं तथैव स्यात्परं वचः ॥१३॥

The use of (the word) *mātrmān* is the statement of the reason for one's being a good speaker.¹ In the same way, the subsequent (use of) the words (also) is for understanding the rightness (in the speech of everyone).² [13]

¹This refers to the good quality of a speaker obtaining in the knowers of the Brahman, viz. Śailini and others.

²This is based on the phrase in BU *avadato hi kiṃ syāt*. The rightness or correctness (or, even, reasonableness) of the words of Jitvan and others are: *aprāṇato hi ...*, *apaśyato hi ...*, *aśṛṇvato hi ...*, and *ahṛdayasya hi ...*

यस्मादवदतो लोके पुरुषार्थो न कश्चन ।
दृष्टो वा यदि वादृष्टो वाग्ब्रह्मातः प्रतीयताम् ॥१४॥

Since, for any one, who does not speak, there is not (secured) any one end of life, whether seen or unseen, therefore, let it be understood that *vāc* 'speech' is the Brahman. [14]

¹This clarifies *avadato hi ...* mentioned above.

न चेदायतनाद्युक्तमेकपाद्ब्रह्म तर्हि तत् ।
असमस्तमिदं ब्रह्म न युक्तं समुपासितुम् ॥१५॥

(An objector's statement:) 'If (the knowledge of) the abode etc. that is (thus) mentioned is only a foot of the Brahman, then it is not reasonable to worship (i.e. meditate on) this (incomplete) Brahman'. [15]

This explains the answer of Yājñavalkya *ekapād vā etat samrāt*.

स त्वं जानंश्चतुष्पान्मे ब्रह्म व्याख्यातुमर्हसि ।
वागेवायतनमिति याज्ञवल्क्योऽप्युवाच तम् ॥१६॥

(The king said), 'Then you, who know (that), should explain to me (the nature of) the four-footed Brahman'¹ (and) Yājñavalkya answered him in the words *vāg evāyatanam*

[16]

¹This is for *sa vai no brūhi* in BU. The pronoun, i.e. you, is indicative of the sage's compassionate nature (*anugrahaśīlatva*).

वागेवायतनं तस्य वागेव करणं भवेत् ।
ब्रह्माकाशः प्रतिष्ठा स्यात्प्रज्ञास्योपनिषत्तथा ॥१७॥

(He said), 'Vāc is the abode of that, *vāc* is the organ for it; the Brahman is the ether, its support, and the secret name of it also is Prajñā.

[17]

This is only to remind the king of what is said earlier (in verse 10 above).

प्रज्ञेयं किं ततो भिन्ना प्रतिष्ठायतने यथा ।
किं वाभिन्नेति मे ब्रूहि प्रज्ञोपनिषदं स्फुटम् ॥१८॥

(Again, the king said), 'Tell me clearly if this secret name Prajñā is different from that (i.e. the Brahman), as the abode and the support (are different from it), or not different (from the same)'. [18]

This is to present the question *kā prajñatā* of twofold nature.

स्वयमेव तु वाक्प्रज्ञा ब्रह्मणो न तु भिद्यते ।
कुतः प्रज्ञात्वसंसिद्धिर्वाच इत्येतदुच्यते ॥१९॥

(Yājñavalkya answered), 'Vāc itself is Prajñā and (*tu*) it is

not differentiated from the Brahman'. (The king asked, once again,) 'Whence does Prajñā come (to be established)?'; *vācaḥ* ... 'from *vāc*' was (lit. is stated as) the answer (of Yājñavalkya)'. [19]

यत एवमतो वाचं परं ब्रह्मेति चिन्तयेत् ।
 विराङ्गुहीतिरत्र स्यात्साधारणग्रहात् ॥२०॥
 तथा देवतया सत्रं नियन्तापि वियङ्गिरा ।
 कारणाद्यखिलं विश्वं देवतावधि भण्यते ॥२१॥
 यतो वागाद्युपास्त्यत्र तस्मात्सर्वं विवक्षितम् ।
 एनं भूतानि सर्वाणीत्युपासनफलाभिधा ॥२२॥

Since this is so, therefore, a person should look upon *Vāc* as the highest Brahman. Here (in this respect), there is the understanding (lit. acceptance) of *Virāj*, on account of the mention (lit. inclusion) of organs,¹ together with their support (viz. the body). [20]

So also, by (the mention of) the deity (of each), *Sūtra* (is understood)² and by the word expressive of the sky (is understood) the controller³—thus is mentioned this entire universe beginning with the causes⁴ up to (lit. ending with) the deities. [21]

Since all this here is intended to be (consisting in) the worship of *Vāc* etc., therefore, there is a mention (made) of the result of the worship, such as 'To this one (come) all the elements'. [22]

The purport of these three verses is that the whole of the world is to be worshipped as identical with the Brahman.

¹This refers to the mention of *vāc*, *cakṣus*, ... as *āyatana*s, since again these organs are gross.

²In *vāg vai brahma* ... is expressed *Sūtrātman*, having the subtle forms of *Agni* and others.

³This is conveyed by *ākāśaḥ pratiṣṭhā*.

⁴The effects are implied.

देवो भूत्वेति देवान्हि प्रधानफलकीर्तनम् ।
विद्वान्य एवमित्युक्त्या साध्यसाधनसंगतिः ॥२३॥

Since *devo bhūtvā devān* is, indeed,¹ the statement of the principal result; therefore, by the words *vidvān ya evam ...* (there is to be understood) the connection between the end(s) and the means.² [23]

¹This is for *hi*; it indicates that devotion expressed in repeated worship(s) is effective in producing oneness of the worshipper(s) with the deity (i.e. deities).

²This is the purport of *ya evam ...*, having reference to knowledge and activity of the various worships.

देवो भूत्वेति जीवन्संभावनोपचयात्तरः ।
वैलक्षण्यमुपास्तीनां भण्यते ब्रह्मबोधतः ॥२४॥

In the words *devo bhūtvā ...* is expressed the thought that a man, who by the increase in his devotion, becomes on the strength of it (one with the deity worshipped), while he is alive—thus there is expressed the different natures of these worships from that of the knowledge of the Brahman.¹ [24]

¹NKL brings out this only succinctly thus: *yathā brahmadhīḥ sattāmātreṇa phalahetuḥ naivam devatādhīḥ abhyāsaṁ vinety arthaḥ*.

तथैव वचसोक्तिः स्याद्देवो भूत्वेति संभवात् ।
प्रतिवाक्यं बहुवितश्च षण्णामेकत्वसिद्धये ॥२५॥

So is the statement in the words *devo bhūtvā ...*, for that (becoming) is possible and the repeated (lit. many times made) statement in each sentence (of the six *pariyāyas*) is for establishing the oneness of (all) the six (deities). [25]

प्रागपि ब्रह्मविज्ञानाद्ब्रह्मैवाभूद्यथा तथा ।

देवोपासनतः पूर्वं नाभूद्देव उपासकः ॥२६॥

As it was said earlier (in the repeated statement) *brahma-vijñānād brahmaivābhūt*, so here (also has to be understood that) a worshipper (of a deity) could not (i.e. did not) become a deity before the worship/worships was/were offered to the deity. [26]

This is to point out the difference between *brahmopāsti* and the *upāsti(s)* of other deities. In the first, the worshipper was already, before the worship of it, the Brahman, whereas, in the latter, the situation was not the same.

भावनोपचयाद्देवो भूत्वा विद्वानिहैव तु ।
देवानप्येति सोऽग्न्यादींश्शरीरत्यागतः परम् ॥२७॥

A learned man, by the increase in his devotion, first becomes a god¹ here itself, but he becomes one with (i.e. merges in) the deities, Agni and others, (only) after he has given up (i.e. becomes bereft of) his (worldly) body.² [27]

¹That is, 'comes to have a nature similar to that of the god whom he worships'.

²This refers to the devotee's *tādātmya* with the deity.

उत्पत्त्याद्यात्मकं कार्यं साध्यं सर्वस्य कर्मणः ।
उपासनं च कर्मैव युक्तमुक्तमिदं ततः ॥२८॥

All effects, which have the nature of being a product etc.,¹ can be obtained by (performance of) activities, therefore, it is only properly said that worship is but (some) activity. [28]

¹This is the well-known *utpattyādicatuṣṭaya*.

ब्रह्म वा इदमित्येवं तथा ब्रह्मैव सन्निति ।
प्रागपि ब्रह्मविज्ञानातिसिद्धं तादात्म्यमुच्यते ॥२९॥

In the statements (of the Śruti) *brahma vā idam* and also *brahma vai san* ... is established the identity (i.e. oneness) (of a worshipper) with the Brahman even before the knowledge of the Brahman (has occurred to him). [29]

This implies that the removal of ignorance on the part of a worshipper means the occurrence to him of the knowledge of the Brahman. Also, it indicates how the worship of the Brahman is distinct from any other worship to which the preceding verse has referred.

हस्त्यृषभमिति चोक्त्या भण्यते गुरुदक्षिणा ।
स च तां नाग्रहीदत्तां पिता म इति हेतुगीः ॥३०॥

In the statement *hastyrṣabham* is mentioned the fee (to be offered) to the preceptor and *pitā me* ... is the expression of the reason why he (i.e. the preceptor, viz. Yājñavalkya) did not accept it. [30]

Read SP: *śiṣyaṃ kṛtārtham akṛtvā tato dakṣiṇā na grāhyeti pitur mama cābhiprāyo na ca tvam adyāpi kṛtārthaḥ paradhī-virahād atas tvatto dakṣiṇa na grāhyeti.*

नन्वनुशिष्ट एवायं पूर्वोक्तैरनुशासनैः ।
पितृव्रतोपरोधोऽत्र नातः कश्चन विद्यते ॥३१॥

(A doubt:) 'But this (king) was already instructed by the teachings which have been stated earlier; as such, there is not (in the instruction now imparted by Yājñavalkya) any swerving from his father's vow.' [31]

The doubt is: Even if Yājñavalkya accepted the fee, there should not be understood his swerving from the vow of his father (SP).

नात्मविद्यातिरेकेण पितुर्वस्त्वन्तरे यतः ।
 असमाप्तेः पुमर्थस्य मतं नास्यानुशासनम् ॥३२॥
 यस्मिञ्ज्ञातेऽखिलं ज्ञातं कृतमाप्तं च कामितम् ।
 तित्यक्षितं च संत्यक्तं पितुस्तदनुशासनम् ॥३३॥

(The answer is:) 'Since, according to his father, there was no completion (of a preceptor's task) if the instruction were different, viz. it was about (i.e. pertained to) a thing other than the Ātman. It is not for this one (i.e. Yājñavalkya) an instruction proper. [32]

That would be his father's instruction, which being obtained (lit. known), all could be known; all the desired could be done and obtained, and all that was sought to be abandoned was given up. [33]

यतो वस्त्वन्तरं नान्यदात्मनो विद्यते परम् ।
 सम्यक्तज्ज्ञानमेवातस्तदन्यत्र मृषा मतिः ॥३४॥

Since there cannot be (lit. is not) any other thing beyond (i.e. higher than) the Ātman, the only proper knowledge is (the knowledge about the nature) of that; knowledge in any other respect is (only) false. [34]

आत्मज्ञानोदयायैव याज्ञवल्क्योऽप्यतोऽवदत् ।
 उपासनान्यशेषाणि तथा कर्माण्यशेषतः ॥३५॥

Therefore, Yājñavalkya also spoke (what he knew) with a view to the rise of the knowledge about (the true nature) of the Ātman (on the part of Janaka and others), viz. all the (different) modes of worship and also (ritual) activities in their entirety. [35]

इति श्रीबृहदारण्यकोपनिषद्भाष्यवार्तिके चतुर्थाध्यायस्य
प्रथमं ब्राह्मणम् ॥१॥

**BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA**

4.2

Kūrca Brāhmaṇa

Verses 1-35 are the exposition of 4.2.1.

These contain a certain opinion expressed by Bhartrprapaṇca in verses 14cd-18 and its refutation in verses 19-29.

अनुशिष्यापि स नृपं यदा नैच्छद्भनं नृपात् ।
अननुशिष्टहेतूक्त्या मती राजस्तदाभवत् ॥१॥

When, even after instructing (about the thing), the sage did not wish (to receive) any wealth from the king, he wondered (i.e. began to think) about the cause for the statement (as to how he was) not instructed. [1]

यथोक्ता नानुशिष्टिश्चेत्कीदृक्तदनुशासनम् ।
संभावितानुशिष्ट्यर्थं तं राजोपससाद ह ॥२॥

(He asked,) if there was not any instruction, as it was promised, what kind of instruction was it then? (Therefore,) the king approached unto him, for the instruction for which he wished. [2]

SP states the reason for the king's approach, viz. the Śruti statement *ācāryavān puruṣo veda* (CU 6.14.2) and also the Smṛti *ācāryopāśanaṃ śaucam*.

उपासनानां सर्वेषामैकात्म्यज्ञाननिष्ठता ।
ब्रह्मविद्याधिकारत्वादित्येतदधुनोच्यते ॥३॥

All the modes of worship¹ culminate (i.e. have an end) only in one's (acquiring the) knowledge of oneness (with the Ātman).

(And) since there is the topic regarding the lore of the Brahman, this is now (being) explained hereafter. [3]

¹Namely, those which were stated earlier.

कूर्चादुत्थाय विधिना तं राजोपससाद ह ।
भगवन्ननुशाधीति यथेहाभिमतं तव ॥४॥

The king got up from his exalted seat,¹ sat at the feet of Yājñavalkya (and said to him), 'Instruct me, revered sir,' as you would like (to instruct) in this matter.² [4]

This is the meaning of *janaka ha*

¹For *kūrca* as paraphrased by Śaṅkara in *viśiṣṭa*.

²*iha* stands for the statement about the highest man of the Upaniṣad, as clarified by SP.

यथा जिगमिषुः पान्थो रथं वा नावमेव वा ।
आददीताप्तिसिद्धयर्थं गन्तव्यस्य तथैव च ॥५॥
यथोक्तोपनिषद्विस्त्वं संस्कृतात्मासि भावितः ।
एवं वृन्दारकः पूज्य आढ्यो मानुषवित्तवान् ॥६॥
तथैवाधीतवेदश्च युक्तः साधनसंपदा ।
गतिसाधनवत्त्वाच्च गन्तव्यमनुमीयते ॥७॥

(Yājñavalkya said,) 'As a person, who sets out to travel, would choose (or, secure) either a chariot or a boat in order that he would attain to the goal desired (or, to the desired destination), just (*eva*)' similarly, [5]

on account of having known the secret name¹ as are stated (earlier), you have enriched yourself (*saṃskṛtātmabhāvitah*); thus, you are *vṛndāraka* 'worship-deserving', *ādhyā* 'possessing all the wealth for me', [6]

so also, you have studied the Vedas and are possessed of all the wealth of means (to knowledge). (And) because you have all the equipment for getting to know (*gati*) the Brahman,² his goal is (easily) understood (lit. inferred). [7]

This explains *yathā vai samrāt*

¹This refers to BUBV 4.1.11 and the relevant passages from BU.

²We have understood this as the meaning of *gati* in view of the subsequent verses 21-23.

अध्यात्मादिव्यवच्छेदान्मुच्यमान उपासनैः ।
आविरिञ्चादितो भूप यास्यसि क्वेति भण्यताम् ॥८॥

‘Tell me, O king, where you will go when, on account of your performance of worships you will move from (this world) up to the Brahman, being released from the (limiting) adjuncts of (i.e. pertaining to) the body etc.’ [8]

पप्रच्छ याज्ञवल्क्योऽत इतस्त्वं क्व गमिष्यसि ।
सर्वस्यैवात्मभूतत्वाद्गन्तव्यं न स पश्यति ॥९॥

That is Yājñavalkya asked him: ‘Where will you go from here?’ This was because everything had become (for the king) the Ātman, and (therefore) you do not know the goal (lit. where to go)’. [9]

ननुक्तोपनिषद्भिर्हि गन्तव्यं प्राक्प्रबोधितम् ।
देवौ भूत्वेति वचसा तत्कस्मादिह पृच्छयते ॥१०॥

(An objection is raised:) ‘Why, by the secret names (which were told him), the goal has been already pointed out to him and also in words *devo bhūtvā* ...; why then is here (a question) asked him (about the goal)?’ [10]

नाहं वेदेति च नृपो जानन्नप्यब्रवीत्कथम् ।
नैष दोषो यतोऽप्राक्षीद्याज्ञवल्क्यो नराधिपम् ॥११॥
पूर्वभर्मेर्मुच्यमान उत्तरां कां गमिष्यसि ।
देवतौपासनाद्येतज्ज्ञानोत्पत्त्यै विवक्षितम् ॥१२॥

How (again), the king who knew (what was told him) said, 'No I do not know'? (The answer is given:) 'But this is not a fault, since Yājñavalkya asked the king, [11] 'What later region would you go, being released from the former region?' This has been intended for effecting the rise of knowledge of this (i.e. the Brahman) from the worship of the deities etc.¹ [12]

¹SP clarifies as *śuddhidvārā dhīsādhanaṁ karma grhyate*.

उपासनानि सर्वाणि परविद्याधिकारतः ।
क्रममुक्तिफलानीति क्व गमिष्यसिगीरतः ॥१३॥

Since there is the topic of the lore of the highest (Brahman), all modes of worship result into gradual liberation (and), therefore, there is a question (lit. statement) 'Where will you go?'. [13]

राज्ञस्तु तदविज्ञानान्नाहं वेदेति युज्यते ।

And, owing to the king's ignorance about that, it is rightly answered (lit. said) by him, 'I do not know'. [14ab]

Now follows the view of *Bhārtrprapañca* on BU passage *itah*

अन्ये गतिविवक्षार्थं मुनेः प्रश्नं प्रचक्षते ॥१४॥

The other thinkers explain the sage's question as purporting to explain (the king's) movement.¹ [14cd]

¹This refers to the outcome of the king's performance of various worships, viz. the goal which he had in mind.

साक्षाद्ब्रह्मविदप्येष नात्माप्तौ गतिविनृपः ।

परमात्मैव गन्तव्यः परमात्मविदा ननु ।
अथ कः संशयो येन स तेनैव नियुज्यते ॥१५॥

Since this king, though he knew (or learnt) about the directly perceptible Brahman, was not a knower of his movement (really, reaching) up to the attainment of the Brahman, (a question can be asked:) 'But, indeed, should it not be that the highest Ātman is the goal for one who has come to know about the highest Ātman? Then, therefore, what doubt can be there so that the king should be impelled (i.e. instructed) thereby?' [15]

गतिर्न विदिता तस्य तां स तस्मै विवक्षति ।
एवमर्थमुपोद्धातमेवं स कृतवान्मुनिः ॥१६॥

The goal was not known to him, therefore, the sage intends to tell him about that. For introducing this matter, therefore, the sage began thus (by asking the question). [16]

श्रुतौ यद्यपि नैतस्यां श्रूयते गतिचोदना ।
तथापि गतिरेवेयमुत्तरत्र स्फुटं हि तत् ॥१७॥

Even though there is not heard in the Śruti any injunction regarding a movement, there is yet a movement (necessarily) understood, since it is very clearly stated later. [17]

This refers to *yaiṣā hṛdayād ūrdhvā nādy uccarati*

गतिविज्ञानवैकल्यात्परमात्मविदप्यसौ ।
न जाने क्व गमिष्यामि कथं वेत्यब्रवीन्नृपः ॥१८॥

On account of not having the knowledge of that movement, the king, though he learnt about the highest Ātman, said, 'I do not know, where I would be going and how?' [18]

Now starts the refutation of Bhartṛprapañca's view.

इति व्याचक्षते केचिद्ग्रन्थमेतं महाधियः ।
श्रुत्यक्षरानुसारेण नायमर्थोऽत्र लभ्यते ॥१९॥

Thus have some highly learned men explained this text, but on following closely the words (lit. letters) of the Śruti, such a meaning¹ does not become known. [19]

¹Namely, movement for *gati* is to be understood in the sense of knowledge. See verse 29 below. Also, almost all verbs, having the sense of movement, mean knowing as well.

ब्रह्मवित्त्वे तु राज्ञोऽस्य मितिं नोपलभामहे ।
ग्रन्थे नानन्तरे यस्मादात्मज्ञानं समीरितम् ॥२०॥

We really do not find in the immediately preceding portion of the text any indication about the king's having secured the knowledge about the Brahman, viz. that there was imparted to him (the definite) instruction about the Brahman. [20]

गत्यर्थो नापि च प्रश्नः क्व गमिष्यसिलक्षणः ।
गन्तव्यं पृच्छ्यते यस्मात्र पिपृच्छिषिता गतिः ॥२१॥

Also, the question worded (characterized as expressed in the words) in *kva gamisyasi* does not purport to mean movement; since what is sought to be known is the god, not the 'movement' which is put under question. [21]

यत्साक्षादित्युपक्रम्य य आत्मेत्युपसंहतेः ।
तदन्यस्य तदात्मत्वाद्ब्रह्मणि स्यात्कथं गतिः ॥२२॥

Having begun with (the words) *yat sākṣāt* and having concluded (in the words) *ya ātmā*, (the question is raised,) 'How could there be a movement unto the Brahman and of that which is other than that and also as the nature of that.' [22]

This is clarified in the following verse.

गतिगन्तव्यगन्त्रादेरोत्प्रोतात्मवर्त्मना ।
ब्रह्मात्मनि समाप्तत्वाद्गतिः का परमात्मनि ॥२३॥

What movement can there be towards (lit. into) the highest Ātman, when (all the universe) is contained in the Brahman, the Ātman, in the manner that all movement, all goals of movement and all the goers are expressed as woven lengthwise and crosswise (in the Ātman)? [23]

अब्देशा पृथिवी कृत्स्ना तेजोदेशं तथा जलम् ।
वायुदेशं तथा तेजो विद्यद्देशोऽनिलोऽखिलः ॥२४॥

The entire earth is but the region of waters, so also, all water is the region of lustre and also lustre is the region of wind and the entire mass of wind is the region of ether. [24]

This refers to BU 4.1 as intended in verse 23 above.

स्वार्थदेशः परार्थोऽर्थः स्वप्नदर्शनवद्यतः ।
आत्ममात्रैकयाथात्म्यान् मुक्तौ स्याद्गतिस्ततः ॥२५॥

Since the region belonging to one particular thing becomes the region of another, as in the case of the objects seen in a dream; therefore, there is no movement with respect to liberation, because it consists only in being the single Ātman, i.e. its (coming to have its) own true nature. [25]

ब्रह्मैव सन्नवाप्नोति ब्रह्मेति वचनं स्फुटम् ।
गन्तृगन्तव्ययोर्भेदे विरुध्येत न संशयः ॥२६॥

In that sense, there is clear statement of the Śruti *brahmaiva sann avāpnoti brahma* and this Śruti statement would undoubtedly oppose (or thwart) any distinction accepted between the goer and the goal. [26]

क्रियाकारकभेदे हि गतिः सर्वत्र दृश्यते ।
गन्तव्य आत्मनि कुतः क्रियाकारकसंभवः ॥२७॥

Indeed, there' is movement seen wherever there is distinction of an activity and what is connected with it (*kāraka*) and if the Ātman is taken as the goal, where is then the possibility of activity and what is connected with it? [27]

नैवात्र गतिरस्तीति स्पष्टमागमशासनम् ।
सर्वमात्मैव ब्रह्मैव तथा च श्रुतिशासनम् ॥२८॥

There is again a clear statement from tradition that there is no movement whatever in this respect;¹ so also, there is an affirmation in the Śruti *sarvam ātmaiva brahma*. [28]

¹The second line is a brief expression for the Śruti statements BU 2.4.6: *idam sarvaṃ yad ayam ātmā*; and *Muṇḍakopaniṣad* 2.2.12: *brahmaivedam*.

तमोमात्रातिरेकेण व्यवधानान्तरं न च ।
यस्मादस्ति ततो मुक्तौ नात्मनो गतिरिष्यते ॥२९॥

And since there is not any other obstruction (to knowing it) beside merely ignorance (lit. darkness) about it, therefore it is not accepted that there is in the state of liberation movement unto (lit. into) the Ātman. [29]

Now, in verses 30-35, there is exposition on the statement in the Śruti *nāham*

अध्यात्मादिपरिच्छेदाद्यथोक्तोपासनाश्रयात् ।
विमुच्यमानः क्वेतस्त्वं गमिष्यसि वदाशु मे ॥३०॥

(The meaning of Yājñavalkya's words is:) 'Tell me quickly where you will go, being released from this (body or

transmigratory existence) by resorting to the (various) modes of worship which are stated (earlier) and whereby you would have put an end to what pertains to the body etc.' [30]

नाहं तद्भगवन्वेद यत्र यास्याम्यतः परम् ।
देवतावर्त्मना नाहं गन्तव्यं वेद्मि किं चन ॥३१॥

(The king said:) 'I do not know. O revered sir, as to where else I shall go from this (world), going by the way (on which I have to go) to deities (also); I really do not know anything as goal'. [31]

देवतावाप्तिमात्रं हि त्वत्तः प्राक्श्रुतवानहम् ।
उक्तोपासाफलं नातो गन्तव्यं वेद्मि किं चन ॥३२॥

'It is only from you that I have heard attaining to the deity earlier, as a result of the modes of worship that was stated; therefore, I do not know whatever be the goal.' [32]

इत्युक्तवन्तं प्रत्याह तद्वक्ष्यामि तवाधुना ।
मुच्यमानोऽथ यत्र त्वं गमिष्यसि नराधिप ॥३३॥

To him who had said thus, the sage (*ṛṣi*) answered, 'I shall now tell you where, viz. being released from here, you will go, O king'. [33]

अविद्यामात्रविध्वस्तौ यतोऽनाप्तवदाप्यते ।
गमिष्यसीत्यतो वक्ति स्वास्थ्यं यातो यथा तथा ॥३४॥

He states, 'You will go,' since after there is destruction of only ignorance, that which was as if not obtained before, is obtained. It is like when one attaining one's natural health. [34]

अतोऽवगतिरेवात्र गतित्वेन विवक्ष्यते ।
प्राप्तोऽसीति यतो ज्ञानजन्ममात्रं प्रवक्ष्यति ॥३५॥

Even (like this *api*) in this world eminent persons hate the mention of their names directly and they like (lit. desire) (their own) mention (made) as persons of such and such name (*amukamiśrāḥ*). [43]

Verses 44-85 are exposition of the meaning of BU 4.2.3, first, description of *Taijasa* (form of being) and explanations of the words *Indra*, *Indrāṇī*, thier union and thier covering.

तस्यैवात्रपतेर्जाया येयं सव्येऽक्षिण संस्थिता ।
भोग्यत्वात्सा विराडुक्ता तद्भोक्ता दक्षिणाक्षिणः ॥४४॥

This one, who is (abiding) in the right eye of that (being), is the wife of the enjoyer (lit. lord) of the food(s); because she is an object of enjoyment,¹ she is called *Virāj* and the enjoyer of her is the one who is (abiding) in the right eye. [44]

This explains *athaitad vāme ... patnī virāt*.

¹This is the reason for her being called *Virāj*.

एकस्यैव हि देवस्य विभागः स्थानभेदतः ।
अग्नीषोमात्मना श्रुत्या ध्यानार्थमिह भण्यते ॥४५॥

The Śruti has stated here the (fourfold) division¹ of just² one god, belong as the divisions do to different places (in the body),³ viz. being of the nature of *Agni* and *Soma*; (this) for the sake of meditation. [45]

¹This is in accordance with the AnSS edition. The NKL edition reads *vibhāgāḥ* '(four) divisions'. These are: *Viśva* and *Taijasa*, who are really of the nature of *Agni* and *Soma*, and *Indra* and *Indrāṇī*.

²The word *hi*, translated as just, points to the imaginary (*aupādhika*) differences, not real ones.

³The reading *vibhāgaḥ* is adopted on the basis of SP and the NKL edition. The reading *vibhāgāḥ* does not make any significant sense.

नानयोर्व्यतिरेकोऽस्ति भोक्तृभोग्यात्मनोः क्वचित् ।
प्रधानगुणभावेन सर्वत्रैते व्यवस्थिते ॥४६॥

There is never any (real) difference of these two, who are of the nature of the enjoyer and the object of enjoyment, (since) these two everywhere (or, at all times) ¹ abide (together) as the principal one and the subordinate. [46]

¹This refers to the two states of dream and sleep.

तयोः समागमश्चास्मिन् हृद्यन्तस्थे सुषौ मिथः ।
संस्तुतोऽत्रैति संस्तावो हृद्याकाश इहोच्यते ॥४७॥

And the union of those (two) occurs (i.e. takes place) in the hollow inside the heart; here the word *saṁstāva* means *saṁstutah* 'where the two have a union', that refers to the sky (i.e. space) in the heart. [47]

This explains *tayor eṣa ... ākāśaḥ*.
Cp. *Maitrāyanyupaniṣad* 7.11.

ऊर्ग्रसो लोहितस्यात्र पिण्डो यः सोऽन्नमेतयोः ।
अन्नं दामेति यत्पूर्वं व्याख्यातं शिशुबन्धनम् ॥४८॥

Here, ¹ strength is the fluid, i.e. blood, the lump is the food for the two; that the food is the cord, what is earlier explained as the bond for the young one of a calf (*śiśu*). ² [48]

¹This is a reference to (the hollow of) the heart.

²Refer to BU 2.2 and relevant verse from BUBV.

मिथो नाडीशतानद्धं तयोः प्रावरणं तथा ।

तज्जालकमिवाभाति बहुच्छिद्रत्वसाम्यतः ॥४९॥

So also, the covering for both of them (*mithaḥ ... tayoḥ*) is well-woven (*ānaddham*) by hundreds of veins¹ and it appears like a net on account of their similarity of having many holes.²

[49]

¹Cf. *śataṃ caikā ...* (*Kāthopaniṣad* 6.16; CU 8.6.6).

²That the heart has many holes is known from *tasya ha vā etasya hrdayasya ...*; cp. CU 3.13.1.

तयोः संचरतोर्मार्गो यैषोर्ध्वा हृदयाद्गता ।
जाग्रद्देशाप्तये ज्ञेया नाडी स्वप्नाख्यभूमितः ॥५०॥

The path for the two, who move about from the state (lit. level) of a dream for attaining to the state of waking, is this vein which has proceeded from (lit. of) the heart upwards.

[50]

This explains *athainayor eṣā*.

अन्नस्य प्रविवेकार्थं भोक्तुः सौक्ष्म्यार्थमेव च ।
नाडीनां परिणाहोऽथ सम्यक्श्रुत्येह वर्ण्यते ॥५१॥

Now, here¹ is fully (*samyak*) described by the Śruti the extent (or expanse) of the veins² in order to distinguish the foods³ of the enjoyer and to cover their subtle nature.

[51]

¹That is, in this sentence.

²Cf. BU 2.1.19.

³Actually the *kārikā* uses *annasya* in the singular; but, since two foods (*annadvaya*) are meant for Viśva and Taijasa, the translation uses 'foods' (in the plural). That helps the intended function of distinguishing (*praviveka*).

नाड्योऽतिसूक्ष्माः पुंसोऽस्य व्यवहारप्रसिद्धये ।

सहस्रभेदसंभिन्नकेशैकांशसमा हिताः ॥५२॥

The veins of this *puruṣa* are extremely fine (in dimension)¹ and are equal (in size) to one part of a hair made (lit. divided) into a thousand (parts),² so that they are helpful³ for fulfilling (his) purpose.⁴ [52]

¹Literally, subtle in form.

²Cf. also BU 4.3.20.

³That is, they can effect the enjoyment (lit. dealing/doing) of him.

⁴Namely, deriving enjoyment which belongs to either the state of waking or that of dream.

नोपमेह यतस्तासां सौक्ष्म्ये जगति विद्यते ।
तस्मात्केशविभागोऽयं नाडीसौक्ष्म्यार्थमुच्यते ॥५३॥

Since there is not noticeable in this world anything to compare with them, in respect of extreme fineness or subtle dimension, there is here mentioned this division of a hair, for referring to their extreme fineness. [53]

यथा संचरणी नाडी प्रोक्तेयं देवतात्मनोः ।
देवतानां तथान्यासां नाड्यो ज्ञेयाः सहस्रशः ॥५४॥

As this vein is said to be the path for the two of divine nature (or, of the nature of deities), so also are to be known (as existing) thousands of veins¹ for other deities also. [54]

¹SP quotes the following verse in support:

*ekonatrinṣal lakṣāṇi tathā nava śatāni ca /
śatpañcāśad vijānīyāt śīrā dhamanisaṁjñitāḥ //*

NKL also quotes this with *yad āhuh*

शब्दाद्यत्रवहाः सूक्ष्माः श्रोत्रादिकरणाश्रयाः ।
देवता देवतात्मानं तर्पयन्तीह ताः सदा ॥५५॥

Those subtle (or, extremely fine) veins, which have their supports in the organs, viz. ears and others, are carriers of foods such as words etc., ever bring satisfaction (or pleasure) to the deities and the Ātman of the deities.¹ [55]

This explains what is said in verse 52 above (viz. *hitāḥ*).

¹This is for *devatātman* which can be taken as the inner organ (*antahkaraṇa*).

अतिसूक्ष्माभिरेताभिर्जग्धमन्त्रं समास्रवत् ।
देवता आस्रवत्येतद्व्याप्नोत्येतद्यथोदितम् ॥५६॥

The food eaten (by a person), flowing through these extremely subtle (veins), reaches (lit. flows up to) the deities, i.e. this (food) pervades this (body), as described (earlier). [56]

सर्वास्वेव हितास्वासु सर्वा अध्यात्मदेवताः ।
चरन्त्यूर्गसपूर्णासु भोगार्थं पुरुषस्य तु ॥५७॥

In all of these helpful (*hitā*) (veins), which are filled with (i.e. full of) strength and the fluid, all the deities, which are related to (the organs of) the body, flow on (*caranti*) only (*tu*) for the enjoyment of the man (*puruṣa*). [57]

This precludes the idea of the veins being the enjoyers of food.

स्वचिदाभाससंव्याप्तिः पुंभोगः सुखदुःखयोः ।
सोऽप्यस्य देवतातन्त्रो देवताश्चात्रसंश्रयाः ॥५८॥

Man's enjoyment of happiness and/or misery is (but) the pervasion (occupying) by the semblance of his¹ own sentience. And that also is for him dependent on the deities (abiding in the body) and those deities also have their support in food. [58]

This verse has an argument to offer on the question as to how the immutable sentience has hunger—this question is (as quoted by SP): *maṇḍalaṃ tasya madhyastha ātmā dīpa ivācalaḥ* (*Yājñavalkyasmṛti* 3.109).

¹This refers to the man, i.e. the sentient Ātman within him which is in reality the semblance of the Ātman.

अन्नं नाड्याश्रयं सूक्ष्मं तच्छ्रुत्येहोपवर्ण्यते ।
एताभिरित्यतो यावच्छारीरादिति चोदना ॥५९॥

That food, in its subtle form, taking resort in the vein(s) is here described/stated by the Śruti sentence from *etābhiḥ* ... up to *śarīrāt*.¹ [59]

¹This is: *etābhir vā etad āśrayati, tasmād eṣa praviviktāhārātara ivaiva bhavaty asmāc chārīrād ātmanaḥ* (BU 4.2.3).

प्रविविक्ततरोऽन्नांशस्तर्पयन्प्राणदेवताः ।
प्राप्नोति लिङ्गमाहारः स तस्येत्यभिधीयते ॥६०॥

The extremely fine portion of the food, bringing pleasure to the deities of *prāṇas* 'organs', reaches *linga* 'the subtle (*antaḥkaraṇa*)' and that, it is said, is the food for that (sentience within).¹ [60]

Read with profit some portion from the NKL thus: *yaḥ annāṃśaḥ lingam indriyāṇi tarpayan ... antaḥkaraṇaṃ vyāpnoti sa āhāraḥ tasya lingasyeti vighrahavākyagataṣaṣṭhyā nirdiśyate*. It is apparent that the word *linga* has to be read twice and in two senses.

¹This is referred to as *pumān* in verse 58 above.

चीयमानादितो देहाद्रसाद्यन्नेन भौतिकात् ।
प्रविविक्ततराहारो लिङ्गात्मायं पुरोदितात् ॥६१॥

This subtle sentience (*lingātman*) is (said to be) one who has (i.e. eats) a finer food than that (worldly) body, which is made up of elements and kept on becoming nourished (lit. fat and fat) by the food consisting in juices etc., as already stated.

[61]

This explains BUB on BU 4.3: *tasmāt praviviktāhārād api pravivikrāhāratarah eṣa lingātmā*.

रसादिः प्रविविक्तः स्यात्पुरीषादिव्यपेक्षया ।
रसादेरपि सूक्ष्मोऽयमाहारो लिङ्गतृप्तिकृत् ॥६२॥

The fluid (food) is, in comparison with the excreta etc., finer and this food which causes satisfaction to the *linga(-ātman)* 'the subtle sentience' is finer than the fluid food also.

[62]

यत एवमतः प्राह तल्लिङ्गं स्थूलदेहतः ।
प्रविविक्ततराहारं श्रुतिः सूक्ष्मान्नसंस्थितेः ॥६३॥

Since this is so, therefore, the Śruti has stated that the *linga(-ātman)* 'the subtle sentience' is, in comparison with the gross body, one of finer food—(this is so) on account of its sustenance from/on fine food.

[63]

यतोऽतिसूक्ष्मो लिङ्गात्मा नातोऽयं स्थूलदेहवत् ।
देहादेहान्तरं गच्छन्केनचित्प्रतिहन्यते ॥६४॥

Since the *linga(-ātman)* 'the subtle sentience' is extremely subtle (in form), therefore it is not, like a gross body, obstructed (lit. struck down) by anyone, while going from one body to another.

[64]

This supplies the reason as to why the subtle sentience takes 'finer food'.

इवेत्यनर्थकं केचिदेवार्थेन विरोधतः ।

एवार्थस्योपमामन्य इवार्थे चावधारणम् ॥६५॥

iva (in this sentence) is without any meaning. (Yet) some (scholars)¹ hold (it to be having) the meaning of *eva*, in opposition to the meaning of *iva*, and postulate that there is a simile -*anya iva*. (But) the specification (by *eva*) is to be understood for conveying the sense of *iva*.² [65]

The verse seems to be somewhat difficult! It seeks to explain the meaning of *iva* in *praviviktāhārātara ivaiva bhavati*.

The following verse explains the view of Bhartṛprapañca which is here hinted at.

SP is more extensive and clear than NKL. As such, the notes are based on SP. And they are more extensive as well.

¹This is a reference to Bhartṛprapañca. His view is brought out by SP thus: *liṅgātmā praviviktāhārātara evety avadhāryate tasyopamām ivaśabdārtham āhur iti yojanā. uktam hi yathā khalu bāhyasya piṇḍasyopacayārtham āhāras tathā tasyāpīty etatsāmānyāt praviviktāhārātara ivaiveti*.

²This is Sureśvara's own view (so SP). This is explained by SP thus: *tathā ca yathā praviviktāhāro viśvas tathāyam api taijaso na praviviktāhāra eva kiṃ tu praviviktāhārātara iva yathā ca kāraṇātmā pravivikatahārātara eva na tathā liṅgātmā kiṃ tu praviviktāhārātara iveti dvayor ivaivaśabdayor arthaḥ*.

लिङ्गाहारादप्यणीयान्यतः प्राज्ञात्मनस्ततः ।

उपमार्थमिवेत्येतत्पदमत्र प्रयुज्यते ॥६६॥

Since the nourishment/food (*āhāra*) of Prājña is finer than the nourishment/food of the subtle (*liṅga*) self, therefore, is used here the word *iva*, which conveys the sense of a simile.

[66]

This verse supports Sureśvara's view stated in the preceding verse. Also, as NKL remarks, it is in approval of Bhartṛprapañca's explanation of the process (*prakriyā*).

कदम्बपुष्पवत्सैषा देवता हृदयाश्रया ।
बहिर्गतासु नाडीषु विषक्ता हृदयादधि ॥६७॥

This deity, who has a support in the heart, has clung to the veins which have gone out from the heart, just like a Kadamba flower.¹ [67]

¹The veins look like the fibrelike petals of a Kadamba flower, which spread out in various directions from a round-shaped central bulb that looks like the lump of the heart.

यथेयं देवता सर्वास्तथान्या अपि देवताः ।
साधारणत्वात्सर्वासां कार्यस्य करणस्य च ॥६८॥

As (is described) this deity,¹ so also (are to be understood) all other deities, because there is similarity of their functions and organs (with which they are associated). [68]

This verse explains *evam ekaikā devatā* in BUB.

तत्रैकस्या यदा कार्यं दृष्ट्यादि स्यादुपस्थितम् ।
गुणभावं तदा यान्ति सर्वास्तां प्रति देवताः ॥६९॥

In that (situation also), if there was to be performed a function such as seeing,¹ then all those deities would come to have a subordinate position (i.e. role to perform) with respect to it (i.e. the relevant deity).² [69]

¹The words 'such as seeing' refers to other functions, viz. hearing, touching, smelling and speaking.

²NKL cites a Śruti in this context: *vācam vadantīm sarve prāṇā anuvadanti* (*Kauṣītakyupaniṣad* 3.2).

नाड्यन्तरेष्वपि तथा सर्वासां संहतत्वतः ।
एष एव क्रमो ज्ञेयः प्राधान्यगुणभावयोः ॥७०॥

In respect of other veins as well, this very order (*krama*) of position of the principal and the subordinates, should be understood on account of their being in close connection. [70]

एवं च सति यावत्यो नाड्यो हृदयबन्धनाः ।
संवत्सराश्च तावन्तस्ते प्रजापतयोऽग्नयः ॥७१॥

This being so, there are (to be understood) as many Samvatsaras and Prajāpatis, fires, as there are veins having been bound to the heart. [71]

This has reference to the words *yathā keśaḥ* ... in BU.

प्रतिभागं समाप्तत्वात्पूर्वोक्तस्येह वस्तुनः ।
देवतातो यथाध्यात्ममधिभूतं तथैव सा ॥७२॥
अधिदैवं च विभ्वीयं द्वैतैकत्वेन विष्टिता ।
यथास्य नाड्यः पुंसः स्युरध्यात्मं सर्वतो गताः ॥७३॥
अधिभूतं तथास्यैव वायुमय्यः समन्तगाः ।
एतस्मादेव निःसृत्य शरीरात्सर्वतो गताः ॥७४॥

Since the (real) thing (viz. Sūtra) is obtaining in every part (of the body), it is (understood) here as the deity (to be worshipped). (As it is understood) in the sphere of a body, so it is (to be understood) [72]

in the sphere of deities also. This all-pervading (deity) is resting in them (*viṣṭhita*) as one in duality. As the veins of a man have moved (or, run) everywhere (or, in all directions) in the sphere of a body [73]

so (also) in the sphere of the elements (the veins) of this (man) move everywhere, being in the nature of Vāyu. From this very body have they moved out and gone everywhere (or, in all directions). [74]

In relation to verse 72, SP quotes *yathāhuḥ pratyavayavam kṛtsnasya parisamāptatvāt saishā yathādhyātmam evam adhibhūtam*

adhidaivam cetyādi. Also in relation to *yathāśya* ... in verse 73, it quotes *uktam hi yathādhyātman nādyah samantāc charīra-vartinya evam asyaiva puruṣasyādhyātmikasyā- dhidaivātmanā vakṣyamāṇasya prāṇanādyo vāyumaṃya iti*. Further, in relation to *etasmād eva* ... in verse 74, it quotes *uktam ca etasmād eva śarīrād abhiniḥsr̥tya sarvaṃ jagad āpūryāvasthītā iti*. [We wonder if all the three citations are from the commentary of Bhartr̥-prapañca—the first is probably from him.]

अधिभतात्मनैवायं नाडीलक्षणवर्त्मना ।

आपूर्येदं जगत्सर्वं स्थित आध्यात्मिकः पुमान् ॥७५॥

This *puruṣa*, who is related to the body,¹ remains by pervading (lit. remains after filling) the entire universe by his form, which is related to the sphere of elements, in the manner of (being possessed of) the nature of the veins (thus described before).²

[75]

¹This refers to the individual self which is transmigratory.

²This refers to *niḥsr̥tya śarīrāt sarvato gatāḥ* in the preceding verse and indicates how the individual self pervades the whole universe, which is the object of the individual's worldly knowledge.

नाड्य आध्यात्मिकस्येव ह्यधिदैवात्मनस्तथा ।

विराजो रश्मयो ज्ञेयाः प्रत्यंशावसितास्तथा ॥७६॥

The veins are to be known as the rays of Virāj; they are like those of (Puruṣa), the one who resides in the body (of an individual) as also of the one who resides in the deities. And also they are residing in every part¹ of the Ātman. [76]

¹This refers to the sun and other bodies having rays.

आध्यात्मिकस्येव पुंसः कृत्स्नाध्यात्माधिभूतयोः ।

अनन्तभिन्नकार्येषु समाप्तिर्देवतात्मनः ॥७७॥

The divine Ātman has pervaded all the bodies performing functions extremely distinct from one another as it does the various limbs of (Puruṣa) residing in a body and of the one residing in different elements. [77]

This is supported by SP which apparently quotes Bhartṛprapañca: *yathāhuhḥ yathāivādhyāpratyavayavaṃ kārtsnyena samāptir evaṃ vairājasyāpy ātmanaṃ pratyavayavam ādhyātṃmikādhibhūtādhidaivikeṣv iti.*

There is now explanation of the detailed description of the entire universe in order to convey that all of it is for the true knowledge of the Ātman.

आध्यात्मिकं परिच्छेदमुक्तदर्शनवर्त्मना ।
देवतासुपसंहृत्य विराज्यपि च देवताः ॥७८॥
विराजं चोपसंहृत्य प्राणविज्ञानविग्रहे ।
हिरण्यगर्भे तं चापि सर्वकारण आत्मानि ॥७९॥

Having (thus) concluded (the description of) the pervasion (by the Ātman) of what resides in bodies—in accordance with the view (of Bhartṛprapañca)—and also in Virāj and (then) those of deities and Virāj in what (is said) to constitute the body of Prāṇa, the knower, i.e. Hiraṇyagarbha and finally in the Ātman which is the origin (lit. cause) of all. [78-79]

अध्यात्मदेवताः सर्वा हृदि नीत्वात्मनस्ततः ।
हृदयाद्युक्तनाडीभिः संदध्यात्सूर्यरश्मिभिः ॥८०॥

After leading (lit. taking) all the deities in the sphere of the body to one's heart and then (taking them) from the heart, through the veins, may he connect (them) with the rays of the sun. [80]

रविहृन्मध्यगं यायात्ततो रश्मिभिरावृतः ।
हिरण्यगर्भमात्मानं ततस्तत्कारणं बुधः ॥८१॥

Then, may the wise, wrapped by the rays, go so as to reach the centre of the sun's heart, then to Hiranyagarbha, the Ātman, then to the cause of it (i.e. Hiranyagarbha), the Ātman. [81]

वैश्वानरात्तदात्मानं प्राप्तस्य हृदि तैजसम् ।
हिरण्यगर्भं तं चापि प्राणात्मन्युपसंहरेत् ॥८२॥

Then he ¹ should merge ² in the heart Taijasa, which is reached (lit. obtained) from Viśva ³ as its Ātman, and also that one, i.e. Hiranyagarbha in the Ātman which is his Prāṇa (i.e. the inner self). ⁴ [82]

¹This refers to a seeker of liberation.

²The words 'should merge' mean this: The seeker of the knowledge of the true nature of the Ātman should conclude that (i.e. Taijasa) as having merged into the heart where the inner self resides.

³Viśva is mentioned in this verse as Vaiśvānara; cf. NKL: *vaiśvānarād iti viśvād iti yāvat*.

⁴The verse concludes with the thought that the seeker of liberation has completely lost the awareness of the body.

प्राणशब्देन चाप्यत्र कारणात्माभिधीयते ।
बीजं कार्यस्य सर्वस्य प्राज्ञश्चेति निरुच्यते ॥८३॥

And the word *prāṇa* here expresses the Ātman which is the cause, (for) it is explained that Prājña is the root cause (lit. the seed) of all (the world of) effects. ¹ [83]

The verse explains the meaning of the word *prāṇa* which is used in this context.

¹This is based on the idea that the effect merges into its cause. And Prājña is understood as the origin of the world of objects (i.e. effects). The next verse clarifies this idea.

कार्याणां कारणं मुक्त्वा नान्यत्रास्त्यप्ययो यतः ।
तस्मात्कारणसंप्राप्त्या यायान्नेतीत्यकारणम् ॥८४॥

Since the effects do not merge elsewhere than in (lit. leaving aside) their cause; therefore, let that inner self proceed, with a desire to merge into (its own) cause.¹ [84]

This verse justifies the idea of the merger of an individual self (from the dream state) into Prājña.

Here, our translation follows the verse up to ... *kāraṇa-samprāptyā* (this is *hetau tṛtīyā*) *yāyāt*. The last part *netītyakāraṇam* is a puzzle for us!

साश्रयैः करणैर्हीनो ग्रस्ताध्यात्माधिदैवतः ।
प्राणात्मा एक एवास्ते प्रज्ञानघनविग्रहः ॥८५॥

Bereft of the organs with their supports and having given up (lit. devoured) the (related) deities in the sphere of the body, there remains only Prāṇa, the single Ātman,¹ who has the form of the mass of excellent (*pra*) knowledge. [85]

This refers to the Turīya Ātman above Viśva, Prājña and Taijasa. Also that is *akāraṇātman*.

¹SP points to the absence of Saṃdhi in *prāṇātmanā ekaḥ*, which is Sureśvara's following the practice of Vedic times.

Now follow in verses 86-113 the introductory remarks and exposition of 4.2.4, together with the observations on the faults in the exposition by *Bhārtrprapañca*.

निर्विभागात्मनस्तस्य प्राञ्चः प्राणाः पुरास्य ये ।
प्राची दिगेव संवृत्तास्तदवच्छेदहानतः ॥८६॥
दक्षिणा दक्षिणे प्राणाः प्रत्यञ्चश्चापि पश्चिमाः ।
उदीची दिगुदञ्चश्च सर्वे सर्वा दिशस्तथा ॥८७॥

(Now, the following is stated about) the organs of that person

who is now of the nature of one that is undivided:¹ Those which were earlier mentioned as turned eastwards became the eastern quarter, after the limits² (on them) have been lost, [86]

those which (had turned) southwards³ became the southern quarter, and those turned westwards became the western quarter and those turned northwards became the northern quarter—thus all (the organs) became all quarters. [87].

In these verses Sureśvara states about the movements of a man's organs while he is in sleep or is liberated. About Viśva and Taijasa there was already some mention made.

¹This refers to a man who is either in sleep or is liberated.

²In the states of waking and dream, the organs of the man had been connected with his body in certain fixed places. Yet, in the states of sleep and liberation, they do not have any fixed places for them.

³The word *dakṣiṇe* is not like the words *prāṇāḥ*, *pratyañcaḥ* and *udañcaḥ*. Therefore we have put the words 'had turned' in round brackets.

यत्साक्षिकी तमःसिद्धिस्तत्कार्यस्य च लक्ष्यते ।
तद्भावाभावयोरात्मा न कार्यं नापि कारणम् ॥८८॥

And that, on account of which, the witness,¹ darkness exists, is noticed (as the merging place) of the effect;² yet the Ātman³ is neither effect nor cause of their existence and/or non-existence. [88]

¹This refers to the individual self, i.e. the inner self which is overpowered by darkness.

²This refers to darkness and its effects (*avidyā* and *tajja*).

³This is reality, the inner self unaffected by darkness.

तेनैव ज्ञात्मनाशेषं तद्ध्वान्तं ध्वान्तजं तथा ।
जग्ध्वा नित्यात्मना विद्वान्पूर्णदृष्ट्यावशिष्यते ॥८९॥

With that knowing Ātman itself, the knowing man,¹ first destroys (lit. eats up) that darkness and also what is produced by darkness, and then comes to remain in the form of the eternal Ātman² and with a full vision. [89]

¹This is the seeker of liberation.

²That is, after liberation, he does not remain a transmigratory being, subjected to miseries.

एष मार्ग उपन्यस्त ऐकात्म्यज्ञानजन्मने ।
न त्वर्चिरादिवत्तस्य प्राप्तये गतिकल्पना ॥९०॥

This is thus presented the way to the rise (lit. birth) of the knowledge of the singleness of the Ātman.¹ And (*tu*) there is not (here associated with it) any notion of moving to (it), as (there is) in the case of (the way unto) the flame etc.

[90]

This is the conclusion of Yājñavalkya's statement regarding the result to be attained through the knowledge about Viśva etc.

¹That is, to attaining liberation.

आत्मत्वादाप्ततत्त्वोऽयं न देशाद्यन्तरायवान् ।
ज्ञानं मुक्त्वा ततः प्राप्तौ नान्यत्किंचिदपेक्षते ॥९१॥

Because he is himself the Ātman, he has attained the truth (about the nature of the Ātman) and he does not have any obstacle in the form of other regions (to deter him).¹ [91]

¹This is to say about the *arcirādi(mārga)* mentioned in the preceding verse. On that he, the departed person, has to move from one region/place to another. In becoming one with the Ātman, by knowing the same as it is, there is not any movement—naturally not from region to region.

प्रत्याययैवं परात्मानं मुनिराह नराधिपम् ।
प्राप्तोऽस्य भयमित्येवं भयहेतुविनाशतः ॥९२॥

Having thus (made him) understand about the highest Ātman,¹ the sage said to the king, 'You have (now) attained (to that which is) free from fear,' This is so owing to the destruction of the cause of fear. [92]

¹That is, having informed him about the nature of it.

²This is *avidyā* 'ignorance' as stated in just the next verse.

भयहेतुरविद्यैव सा च दुःस्थितसिद्धिका ।
प्रागप्यैकात्म्यविज्ञानादविचारितसिद्धिका ॥९३॥

The cause of fear is just *avidyā* 'ignorance' and that brings about sorrowful (or, miserable) condition (*duḥsthita*). It is established (as existent) even without any thought (about it), even before knowing fully (*vi-jñāna*) about the singleness (or uniqueness) of the Ātman. [93]

यतोऽतः प्रत्यग्याथात्म्यभास्वद्विज्ञानभास्कर-
प्रसूतिमात्रादेवास्या ऽवस्तिरात्यन्तिकी भवेत् ॥९४॥

Since (this is so), therefore there comes to be the absolute (i.e. ever-lasting) destruction of this one only by the rise of the sun in the form of the bright knowledge about the true nature of the inner self. [94]

This is the purport of *prāpto 'si*.

प्राप्तोऽसीति च निर्देशाज्ज्ञानमेवात्मनो गतिः ।
ज्ञानादन्या गतिश्चेत्स्यात्प्राप्स्यसीत्येव तं वदेत् ॥९५॥

From the statement (lit. mention) 'You have (now) attained' it is to be understood that attaining (i.e. attainment) by the

inner self is nothing else than (i.e. just the same as) knowing (about the true nature of) the Ātman. If there were meant any *gati* 'movement' other than knowledge (about it), the sage should have said to him, 'You will reach (the Ātman)'. [95]

This is to affirm that the Ātman is not a *prāpya* or *āpya* '(an object) to be reached/obtained'.

ज्ञानतुल्याममन्वानो दक्षिणां गुरवे नृपः ।
अभयं त्वामिति प्राह याज्ञवल्क्यं स पार्थिवः ॥९६॥

The king was unable to think about any fee to be paid to the preceptor as befitting the knowledge (which he imparted to him). The king said to Yājñavalkya, 'May freedom from fear (come) to you'. [96]

This explains *sa ha*

उचिता दक्षिणैषैव योक्तेहाभयलक्षणा ।
सम्यग्ज्ञानारुयदानस्य तदन्या संसृतिर्यतः ॥९७॥

Proper/suitable is only this fee, mentioned as indicated by (the word) *abhaya* 'freedom from fear' for the gift called right knowledge; since any other (gift) than that would have meant only transmigratory existence. [97]

Read SP on this: *na hi saguṇāyām api vidyāyām योग्या दक्षिणास्ति kim tu vaktavyam itarasyām yady apy "asmā imām adbhiḥ parigrhītāṃ dhanasya pūrṇām dadyād etad eva tato bhūya"* iti śruter iti bhāvah.

यच्चाभयं वेदयस इति प्रत्यूचिवानृपः ।
तत्तमोऽवस्तितः कार्यं नान्यदस्तीति लिङ्ग्यते ॥९८॥

And that, which the king said in answer (to him), viz. (in the words) *cābhayaṃ vedayase* 'You make known freedom

from fear,'¹ is the effect (produced) by the destruction of darkness; and not any other—this is indicated (or, understood).

[98]

¹Or, 'You impart instruction to me about freedom from fear'.

अभयस्य प्रदातृत्वान्नन्ववाप्ताभयो गुरुः ।
अभयं त्वामिति कथं राज्ञाशीस्तं प्रतीर्यते ॥९९॥

'But (one would ask:) 'Indeed, because he is one who imparted (instruction of) freedom from fear, the preceptor, he is free from fear, how then could/can the king convey/speak to him '(May) freedom from fear (come) to you' as his best wish?'

[99]

इत्यस्य परिहारोक्तिं केचिदाचक्षते बुधाः ।
शब्दादवाप्तमभयं न तु साक्षाच्चकार तत् ॥१००॥

On this, some wise man¹ states (by way of) an explanation: 'By his very words came to (the preceptor) freedom from fear, but he did not, in fact (*sākṣāt*) effect it'. [100]

¹This (actually in plural 'wise men') is a reference to Bhartṛprapañca with mock respect.

साक्षात्करणसिद्धयर्थमतो राजाब्रवीन्मुनिम् ।
अभयं त्वामिति वचस्तद्वयस्याप्राप्तमुच्यते ॥१०१॥

Therefore, the king said to the sage the words *abhayaṃ tvāṃ* 'freedom from fear ... to you', in order that he should actually get it—it is meant (lit. said) that this (viz. freedom ...) was not obtained by him. [101]

In connection with this verse, SP quotes (probably from the commentary of Bhartṛprapañca): *uktaṃ hi prāptam abhayaṃ yājñavalkyena nāprāptam na tu sākṣātkṛtam iti ato rājāśīr ucitety*

arthah.

यदि वा द्विविधो मोक्षो जीवत्येव शरीरके ।
एकः साक्षात्कृतब्रह्मा मृतेरुर्ध्वं च तल्लयः ॥१०२॥

Or perhaps, there is a twofold liberation (attained by one) while the body continues to be with life in it (lit. continues to live) (and) one (type of it) is wherein the Brahman is directly perceived and the other (type consists in) the merger of that (viz. the body) into it (viz. the Brahman) after death.

[102]

SP and NKL report that this is an alternative explanation offered by Bhartṛprapañca. SP quotes: *yathāhur dvididho mokṣo 'sminn eva śarīre sāksātkṛtabrahmā mukta ity ucyate na brahmaṇi līnas tasya śarīrapātottarakālam brahmaṇi layo dvitīyo mokṣaḥ sa tvāśāsītavya iti.*

Now follows in verses 103-113 the discussion on the faults in the explanation offered by Bhartṛprapañca.

एवं परिजिहीर्षन्ति न तु न्यायोक्तिरीदृशी ।
प्राप्तोऽसीति मुनेरुक्तेः परिहारो न युज्यते ॥१०३॥
तज्ज्ञानमात्रमैवोक्त्वा प्राप्तोऽसीति यतोऽवदत् ।
तत्साक्षात्करणान्नान्यस्तल्लयो वात इष्यते ॥१०४॥

Thus he¹ wishes to explain (the question). But such cannot (lit. is not) an answer with reason. The explanation of the sage's statement *prāpto 'si* 'You have come to ...' is not proper/reasonable,

[103]

since he (i.e. the sage) said 'You have come to...' after stating merely the knowledge of it.² Or perhaps, it is held (lit. desired) that there is not any other merger of it than having direct perception of it.

[104]

Verse 104 points to that there is no necessity of the king's

good wish. It would not at all be any means to attaining oneness with the Brahman.

¹Actually, the plural in the original would expect it. 'They wish ...'. But that is really not warranted by English language.

²Here *tat* (used three times) refers to the Brahman.

शाब्दविज्ञानमात्रेण नाचार्यत्वे नियुज्यते ।
श्रोत्रियं ब्रह्मनिष्ठं च गुरुं यायादिति श्रुतेः ॥१०५॥

(It should be remembered that) no person would be accepted (lit. appointed) as a preceptor, only for his having known fully ¹ what is contained (only) in words, for, there is a statement in the Śruti, 'May a man approach a Śrotriya, devoted to (the worship of) the Brahman, as (his) preceptor.'² [105]

¹Cf. *vi-jñāna* in verse 90 above.

²Cp. ... *gurum evābhigacchet ... śrotriyam brahmaniṣṭham* (*Muṇḍakopaniṣad* 1.2.12).

अभयं वेदयसीत्येतन्न चासाक्षात्कृते परे ।
शाब्दमात्रपरिज्ञाने राज्ञो युक्तं प्रभाषितुम् ॥१०६॥

Also, the statement *abhayam vedayasi* 'You make known to me freedom from fear'¹ is not (properly addressed to another person) when the highest Ātman is not directly perceived (by him). [106]

¹Cf. note 1 on verse 98 above.

असाधारणधर्मोत्थं विज्ञानं वस्तुनि प्रमा ।
शब्दमात्रप्रमोत्थं तु न मानं वस्त्वसंश्रयात् ॥१०७॥

Right knowledge in respect of the (real) thing¹ consists in full knowledge which has arisen from (knowing) the uncommon property (of it).² But (*tu*) (the full knowledge) which arises from merely understanding right (meaning) of the words, is

not the means of knowing (the Brahman), since it does not pertain to (or, relate to) the (real) thing. [107]

¹This is the Brahman.

²This refers to *aikātmīya* of the Brahman or the nature of it as *avyāvṛttānanugata*.

साक्षात्कृतैकतत्त्वस्याप्यैकात्म्यप्रलयं प्रति ।
किं समाशङ्क्यते येन तदाशीः संप्रयुज्यते ॥१०८॥

(The king thought to himself:) what (more) is expected (lit. entertained in mind) by (Yājñavalkya) who has directly perceived (i.e. experienced) the one reality (which can lead) to his merger in oneness with the Ātman, so that he has expressed (words of) blessings. [108]

ज्ञानानुरूपामेवातो दक्षिणां दित्सुरब्रवीत् ।
अभयं त्वामिति नृपो यथोक्तज्ञानलिङ्गनम् ॥१०९॥

Therefore, wishing to offer (unto him) the fee which was befitting (his) knowledge,¹ the king said (the following words to him), '... May freedom from fear come to you' which is indicative of (his) knowledge that was expressed (by him).² [109]

¹Namely, *brahmavidyā*.

²This refers to Yājñavalkya.

साक्षाज्ज्ञानातिरेकेण नालमन्यद्विमुक्तये ।
यथा तथासकृत्पूर्वमवोचाम पदे पदे ॥११०॥

We (i.e. I) have said it on many occasions and in many places that any thing (i.e. knowledge) other than (i.e. different from)¹ knowledge obtained by direct perception (of the Brahman) is not capable of (effecting) liberation. [110]

¹Or, which is beside (or away) from

भवानप्यहमेवेति यदा साक्षाद्विनिश्चयः ।

विदेहादि तदा विश्वं त्वत्तः कस्येति कथ्यताम् ॥१११॥

If there is a clear (or, directly expressed) decision, viz. 'I am you also'; then may you tell me.¹ 'To whom else than yourself should this world, viz. (the country of) Videha etc. belong'.

[111]

¹Literally, let this be told: 'To

ममेव भवतोऽपीदं न च किञ्चिदसंगतम् ।

अभावाच्च त्वदन्यस्य सर्वमात्मेति शासनात् ॥११२॥

(In holding) 'As this is mine, so it is yours also,' there is nothing unreasonable (in saying this), since there is none else than yourself (to be thought of) and also for the instruction in (your words) 'All (this) is the Ātman'.

[112]

अहं ममेत्यविद्याधीः सहेतुर्नाशिता यदा ।

पूर्णात्मनि तदा दृष्टे कः कस्मै किं प्रदित्सति ॥११३॥

When the wrong awareness, 'I (am this) and (this is) mine'¹ etc. is destroyed, together with its cause,² then the full/complete Ātman being seen (the question would arise:) 'who wishes to give what and to whom?'

[113]

¹This refers to *ahaṁkāra* 'ego which is the result of delusion'. This justifies the use of the word *avidyādhīḥ*.

²This is ignorance about the real nature of the Ātman, or false perception of reality, viz. delusion.

**BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA**

4.3

Jyotis Brāhmaṇa

Verses 1-9 discuss the introductory in BUB.

नामरूपादिमत्कार्यं यः प्रविष्टः स्वमोहजम् ।
जलार्कवदकृतस्नत्त्वमापेदेऽविद्यया परः ॥१॥
तदविद्यापनुत्त्यर्थं गार्ग्यकाश्यादिच्छद्मना ।
अपूर्वादिस्वभावोऽयं प्रविष्टः प्रतिपादितः ॥२॥

The highest (Ātman), who (first) entered into its effects, viz. name, form etc. which are caused by delusion about itself, and then attained to the state of incompleteness,¹ like (the reflection of) the sun in waters,² owing to ignorance (about it); [1]

i.e. this one, who is (really) of the nature of *apūrva* etc., is stated as one who has entered (into other things) in order that ignorance about it is removed; (this) under the pretext of (the narrative of) Gārgya, Kāśya etc.³ [2]

This argument is based on BU 4.3.11 which is later explained in verses 951ff.

¹That is, lost its fullness.

²This refers to earlier chapters.

³SP states *ādi* to refer to the other questioners who put different questions to Yājñavalkya.

आगमादेवमात्मानं प्रतिपाद्याथ तर्कतः ।

स एव पञ्चमेऽप्युक्तः साक्षाज्जल्पैकवर्त्मना ॥३॥

Having first expounded (the nature of) the Ātman on the

basis of traditional scripture, (it is ¹ later pointed out that) the same Ātman has been stated in the fifth Adhyāya by way of stating *sākṣāt* ² etc. in the manner of *jalpa*. [3]

¹This has a reference to *na tam paśyati kaś cana ...* in BU 4.3.11. Cf. verses 951ff. for fuller exposition.

²SP clarifies *sākṣād aparokṣād ityādinoktalakṣaṇaḥ*.

वादन्यायेन तस्यैव प्रतिपत्त्यर्थमञ्जसा ।
षष्ठे क्रमादुपन्यस्तं जाग्रदादिचतुष्टयम् ॥४॥

In the sixth Adhyāya, there is introduced by way of refutation, ¹ (of others' views), in the course of the discussion, matter related to the four states of waking etc., in order that in the same (Ātman) should be properly (*añjasā*) grasped. [4]

¹This refers to the manner in chapter 4.1 and 2ff.

Now follows explanation of *tad eva punar ...* in BUB in verses 5-7 and of *ākhyāyikā tu ...* in BUB in verses 8-9. .
Actually, verses 9-47 discuss the thought contained in BU 4.3.1.

इन्धतैजससौषुप्ततुरीयाण्येव सांप्रतम् ।
संश्रित्य पूर्वं एवार्थं इह साक्षाद्विभाव्यते ॥५॥
विसंवादनिरासेन सद्भावश्चात्मनः पुनः ।
व्यतिरिक्तत्वशुद्धत्वस्वयंज्योतिष्ट्वनित्यता ॥६॥
स्वतोऽनतिशयानन्दस्वाभाव्यैकात्म्यनित्यता ।
दृष्टिमात्राद्वयत्वं च तर्केण महतात्मनः ॥७॥
विभाव्यते सुविस्पष्टं वादन्यायेन यत्नतः ।
विद्यायाः संप्रदानादिविध्यार्थारण्यायिकात्र च ॥८॥

Now is explained ¹ here that same thought (*artha*) by referring (lit. resorting) to (the forms) *indha*, *taijasa*, *saṁsupta* and *turīya* ² [5]

Now, here is (clearly explained) by way of discussion and

also by refutation of the difference (of opinions of others), the existence of the Ātman as having the nature of being distinct, pure, self-illuminating light, eternal, [6] most excellent happiness (in its own right) and being only one at all times, the seer alone having no duality associated with it—all this is stated at length (*mahatā tarkaṇa*) with reasons, [7] (all this) is clearly clarified with effort (and) by way of refutation (of others' views). Also here is introduced a narrative related to imparting of instruction etc.² [8]

There are references to the four states in which the Ātman abides.

¹SP defines this *vibhāvyate* as *prakāśyate*.

²SP clarifies etc. in the sense of instructor and his act of instruction to the instructed.

याज्ञवल्क्योऽथ जनकं योगक्षेमार्थमभ्यगात् ।
न वदिष्ये नृपेणाहमिति बद्ध्वा व्रतं किल ॥९॥

Then, Yājñavalkya came unto Janaka for livelihood and well-being, possibly (*kila*) making a resolve (*vrataṁ baddhvā*), 'I shall not speak (i.e. declare) to the king (anything). [9]

This introduces *sam enena vadisyē* in BU.

संवदिष्ये नृपेणाहमिति वा तं जगाम सः ।
समित्यस्याभिसंबन्धादेनेनेत्येवमुच्यते ॥१०॥
अविवक्षुरपि प्राह यत्पृष्टं जनकेन सः ।
तत्र हेत्वभिधानार्थं वरदानं श्रुतिर्जगौ ॥११॥

Or, (he did so, with the idea) 'I shall speak to (lit. converse with) the king,' he (Yājñavalkya) came to him (king). The word *enena* is used (lit. uttered)¹ because (the preposition) *sam* is connected with (the preposition) *abhi*. [10]

Since he (i.e. Yājñavalkya), though not desirous of speaking,

i.e. declaring, to the other, said to Janaka the Śruti stated (lit. sung) in this respect the gift of a boon with the intention of stating the reason (for his so doing). [11]

This is an alternative introductory remark that understands the sentence in BU as *sam enena vadiṣye*.

¹It is clear that Sureśvara reads BU text *sa mene na vadiṣya iti* ... as *sam enena vadiṣya iti* SP states that the second line is for explaining away a doubt by any one regarding the explanation which is given in the first line as not in conformity with the original text.

There is now stated in verses 12-14 the purpose of the second explanation of sam enena vadiṣye.

एनेन संवदिष्येऽहमिति व्याख्यायते यदा ।
 तदाख्यायिकया हेतुस्तयोः संवाद इष्यते ॥१२॥
 राजैव पूर्वं पप्रच्छेत्येतस्माद्गम्यते शुभा ।
 लिङ्गाद्व्याख्योत्तरा पूर्वा न साध्वीत्यप्रमाणतः ॥१३॥
 न वदिष्येऽहमित्यत्र व्रते हेतुर्न वीक्ष्यते ।
 यतोऽसंतोषतस्तस्मात्कृता व्याख्योत्तरा शुभा ॥१४॥

When the Śruti states (*vadiṣye*) it is this explained in the sense *enena samvadiṣye 'ham*, then there is understood (lit. desired) ¹ conversation of the two as the reason for this narrative. [12]

By this (explaining it) is understood that it was the king himself who asked the question first. The second explanation which I (i.e. Sureśvara) have offered), is more suitable (*śubha*) owing to the propriety (*linga*) ² and then the first (explanation) is not suitable, for that has no reason to be so; [13]

since, in (holding the option) *na vadiṣye 'ham*, there is not noticed any reason (indicative of) the (sage's) resolve, therefore it is that this second explanation is given by us (and it is) more suitable. [14]

NKL (ms. p.572) reads *anena* for *enena* in verse 12.

Verse 12 is the reason for Sureśvara to offer the second explanation of the BU passage and also the reason for holding that there is no change of resolve (*vratabhaṅga*).

SP on verse 13 states *tatra mānābhāvāt*.

These verses are for justifying why the second explanation is offered and also for pointing out that as more suitable than that which is stated in the preceding verse.

¹The verb in the text is *isyate* and not *ucyate* as shown by a variant reading.

²*linga* is taken in the sense of *sāmarthyā* 'propriety'.

Now is explained *tatra evānuktiḥ* in BUB, in verses 15-17.

नाप्राक्षीत्तत्र यद्राजा वरदानादनन्तरम् ।
प्रश्नानुक्तिर्विरुद्धत्वाद्विद्यायाः कर्मभिः सह ॥१५॥
स्वोत्पत्तावेव विद्येयं हेत्वन्तरमपेक्षते ।
प्रत्यगात्मतमोऽवस्तौ नासावन्यदपेक्षते ॥१६॥
स्वरूपलाभमात्रेण यतोऽविद्यां निहन्त्यतः ।
प्रयोगमपि विद्येयं नोपरुध्यति दात्रवत् ॥१७॥

That the king did not ask (any question about the Ātman) immediately after the gift of the cows was made was because the question and the answer about the lore (of the Brahman) were opposed to (the exposition of) the rituals.¹ [15]

This lore (of the Brahman) expects some other (thing) as the cause only for its rise,² but it does not expect anything else for the destruction of ignorance (lit. darkness) about (the nature of) the inner self. [16]

Since this lore (of the Brahman) by its mere rise destroys delusion, therefore it does not expect any performance of an activity, like an instrument of cutting (*dātra*).³ [17]

These verses explain *tatraivānuktiḥ* ... in BUB.

¹This has reference to the exposition on the Agnihotra ritual in the earlier portion of the *Śatapatha Brāhmaṇa*. Refer to verse 11 above for justifying Sureśvara's position.

²Refer to *sarvāpekṣādhikaraṇa* (BS 3.4.26-27), for the argument the first line of this verse. Its second line implies the necessity of fire and sacrificial sticks in the performance of rituals.

³This is an illustration based on dissimilarity of properties of *vidharmyadr̥ṣṭānta*, or, NKL (ms. p.572): *vyatirekadr̥ṣṭānta*). In connection with rituals which we learn from scripture about the necessity of instrument of cutting but that instrument also does require further effort by a person using it and only afterwards it can produce the desired effect. Such is not the case of the lore about the Brahman (SP, NKL).

verses 18-20 bring out the intention behind the question; *kiṃ vācīr ayam*

व्यवहर्तुमशक्तोऽयं देहो मृत्पिण्डवत्स्वयम् ।
परतन्त्रव्यवहृतिः स्वतो जाड्यस्वभावतः ॥१८॥

The body, which is, like a dead body, unable to act on its own; because its activity, which is caused by its dependence on others,¹ is on account of its innate nature of being insentient. [18]

¹This refers to various means required for performing ritual activity for some end. SP states *parādhīnavyavahāratvāj jaḍa-adr̥ṣṭhādivad iti*.

पृथिव्याद्यद्यवस्यायं स्वयं ज्योतिरनुग्रहात् ।
कर्मासनादि कुरुते तस्माच्च फलसंगतिः ॥१९॥

Since this one, self-illuminating light, by favouring the earth etc., i.e. residing in them, does perform activities such as sitting etc. and therefore there is its association with the result. [19]

The basic idea of this is: What is by nature insentient requires for the performance of any activity an impulse from some sentient one. And also cf. BS 2.2.1-10.

यत एवमतोऽप्राक्षीद्याज्ञवल्क्यं नराधिपः ।
किंज्योतिरयमित्येवं प्रत्यग्ज्योतिर्बुभुत्सया ॥२०॥

Since this is so, therefore the king asked Yājñavalkya (the question) *kiṃ jyotir ayam ...*, with the desire to get to know (the nature of) the inner light. [20]

Verses 21-23 state the nature of the (self-illuminating) puruṣa.

करणानि च देहश्च पुरुषोऽत्र विवक्षितः ।
आसनादिक्रियाकारी पौठक्षेत्रादि कर्म च ॥२१॥
किं स्वावयवसंघातभिन्नजात्यतिरेकिणा ।
ज्योतिषा व्यवहार्येषोऽसंहतेन पुमानिति ॥२२॥
किं वा तद्विपरीतेन ज्योतिषेत्यभिधीयताम् ।
किं चांतो यदि नामैवं शृण्वतो यत्प्रसिध्यति ॥२३॥

Here are intended the body, the various organs and the transmigratory being, as the cause of the performance of activities, such as sitting down etc. and activity a seat and a field etc. [21]

Tell me, if this person (*puruṣa*) does (all worldly) activities, being unrelated to (or, uncombined with) the light which is besides (that one) and of a kind (or, species) different from the cogglomeration of its (own) limbs. [22]

Or (does it act) contrarily through (that) light? (If it is asked:) 'What indeed comes from this?', then, listen what is the outcome (from this). [23]

This is the analysed thought contained in the king's question.

Verses 24-27 explain kiṃ cātaḥ ... in BUB.

तयोः पूर्वोक्तरूपेण ज्योतिषानुग्रहो यदि ।
अप्रत्यक्षेऽपि तस्मिन्स्तत्पुंस्क्रियालिङ्गदर्शनात् ॥२४॥
अनुमास्यामहे ज्योतिस्तादृगेव तदा वयम् ।

अथ तद्विपरीतेन संगतिर्ज्योतिषेक्ष्यते ॥२५॥
 तथाभूतं तदा ज्योतिरनुमास्यामहे वयम् ।
 अथोभयात्मतादृष्टा तदापि स्यादनिश्चितिः ॥२६॥
 इत्येतदभिसंधाय पप्रच्छ जनको मुनिम् ।
 स च पृष्टो यथाप्रश्नं प्रत्युत्तरमभाषत ॥२७॥

If there is help (lit. favour offered/made) by the light which is mentioned¹ first, then, in that case, (the light) remaining invisible also, there would be the indicative sign of the action of the transmigratory person (*puruṣa*), [24]

and then we shall infer the light to be of that nature. If again it is accepted (i.e. desired) that there is the combination (of the transmigratory person) with the light which is opposite in nature² then we shall infer the light of that type. [25]

If again it is well that (the combination is) of both the types then also that light would not be seen and thus there would be no decision.³ [26]

Having kept this in mind, Janaka asked the sage (his question) and he also, thus asked, made a reply, according to the question.⁴ [27]

¹This refers to *atirekiṇā jyotiṣā* in verse 22 above.

²This refers to *saṃhatajyotiḥ* in verse 23.

³SP has rightly pointed out the dissolution of the *Samdhi ubhayātmataḍṛṣṭā* into *ubhayātmata* and *adrṣṭā*.

⁴SP states *bubhutsayā praśnam anatikramyati yāvat*. Cf. verse 28 above.

verses 28-39 explain *na caivam ... in BUB*.

नन्वेवं कौशले राज्ञः किमर्थं पृष्टवान्मुनिम् ।
 स्वयमेवानुमायेद्गज्योतिः किं न प्रपद्यते ॥२८॥

(A doubt has arisen:) Indeed, when the king has the ability

(to decide matters), why did he ask the sage? why does he not understand the light to be of such and such type, after inferring its nature himself? [28]

सत्यमेवं तथाप्येष नृपः पप्रच्छ तं मुनिम् ।
लिङ्गलिङ्ग्यभिसंबन्धदुर्ज्ञेयत्वात्सुसूक्ष्मतः ॥२९॥

(The answer is:) "This is truly so and yet the king asked that sage (the question), because of the extremely subtle and obscure relation between indicator and the indicated activity".¹ [29]

¹SP paraphrases *lingalingyabhisambandha* as *vyāpyavyāpakayos tat sambandhaḥ*.

बहूनामपि संमोहो लिङ्गादिषु समीक्ष्यते ।
किमुतैकस्य वक्तव्यं पर्यपृच्छदतो नृपः ॥३०॥

Such a confusion (or, uncertainty) is noticed on the part of even many (wise persons), what then to say of one person?¹ Therefore, the king asked the question. [30]

¹This refers to Janaka.

सूक्ष्मधर्मविवेकार्थमत एवाब्रवीन्मनुः ।
दशावरा पर्षदिति ह्यपेक्षन्ते च सद्वियः ॥३१॥

It is only for this reason that, for clearly ascertaining matters of subtle nature (*sūkṣmadharma*), Manu has said,¹ "an assembly is made up of at least ten persons—thus do persons of great intellect expect."² [31]

¹*Manusmṛti* 12.110. SP quotes *Manusmṛti* 12.109-112.

²This refers to the help of many people for deciding subtle matters.

याज्ञवल्क्यादिरूपेण श्रुतिरेवाथवा स्वयम् ।
अनुमावर्त्मना ज्योतिः साक्षात्तः प्रत्यपीपदत् ॥३२॥

Or, the Śruti itself has, assuming the form of Yājñavalkya and others, declared that light is directly visible to us, (this) by way of inference. [32]

नृपाभिप्रायवित्प्राह याज्ञवल्क्योऽपि तं नृपम् ।
यथोक्तज्योतिषः सिद्धावादित्यज्योतिरित्ययम् ॥३३॥

Yājñavalkya also, understanding the king's intention, assured the king, with a view to establishing the light to be of that nature,¹ that this one is the light of the sun. [33]

¹This refers to *asaṁhatajyotiḥ*.

देहावयवसंघातजातिसंस्थानतत्क्रिया-
देशाद्यत्यन्तसंभिन्नतद्विलक्षणभास्वर-
स्वप्रतिष्ठैकभान्वाख्यज्योतिषैव पुमानयम् ।
आस्ते पल्ययते कर्म कृत्वा भूयो निवर्तते ॥३४॥३५॥

This individual (transmigratory being) sets down, goes out, does activity and, once again, returns together with this light, called the sun, which is entirely different from the body, the conglomeration of organs, their various arrangements within, their activities and the place (which forms the basis) etc.¹ and which is full of lustre different from them all and existing in its own right. [34-35]

¹*kāla* is meant here.

मध्ये जडस्वभावोऽयं ज्योतिषोर्वर्तते पमान् ।
बुद्ध्यादिविषयान्तो हि प्रत्यक्चैतन्यबिम्बितः ॥३६॥

This individual (transmigratory being) of insentient nature abides between the two lights;¹ since the inner sentience is

reflected in various insentient (objects or things) such as the intellect² etc. and their conglomeration, i.e. the body. [36]

The argument of verses 34-36 is based on the acceptance of *dehātimavāda*. This explains why the transmigratory being is described as *jaḍasvabhāva*.

¹This refers to *ādityajyoti* and less bright conglomeration of body etc.

²The word *buddhyādi* refers to various organs.

प्रत्यगेकस्वयंज्योतिःस्थिरासंहतनिष्क्रिय-
तद्विरुद्धरवीन्द्रादिज्योतिषोर्मोहहेतुकः ॥३७॥
मातृमानप्रमेयात्मा कर्तृसाधनकार्यवान् ।
अशनायादिसंसारधर्मापायागमात्मकः ॥३८॥

The inner self is one, self-illuminating, steady, ever abiding as uncombined with the body etc., devoid of any activity and being affected by the cause, viz. delusion about the two lights, viz. the sun and the moon, those which are of opposite nature, [37]

of the nature of one, who is the knower, means of activity (of knowing), (and) the object of knowing, the performer of an activity

being possessed of the means (of producing some effects) and of the products (lit. those things to be produced) of that activity); the one having the nature of hunger etc. which are the characteristics of transmigratory existence and their appearance and disappearance(s). [38]

तद्विरुद्धात्मकेनैव ज्योतिषोद्दीपितेक्षणः ।
आदित्येन सदैवास्ते यात्यायाति करोति च ॥३९॥

That transmigratory being, with its eyes brightened by the luminary ever abides with the sun, who is a light of the opposite nature, goes out and comes back and performs the activities.

Verses 40-42 bring out the purpose of *eva* in *ādityenaiva* in BU 4.3.2; verses 43-44 offer another purpose of the same word.

आदित्यात्परमेवेति नादित्यस्यावधारणे ।
पिण्डप्राणादिधर्मेभ्यो वैधर्म्यावधृतौ यतः ॥४०॥

In the words *ādityāt param eva*, (the word) *eva* is not for restricting it to *āditya* alone, since it is for restricting the sense of transmigratory being's dissimilarity from the properties of the body, organs etc.¹ [40]

BU 4.3.2 *ādityenaivāyam* is being explained only to differentiate *jyotis*. Read SP *anugrāhyād anugrāhakaṃ jyotir ativilakṣaṇam iti niradhārayitum evakāro nādityam avadhārayitum ity arthaḥ*.

Similar use of *eva* in the subsequent paragraph also is not for restricting.

¹This refers to activity.

आदित्यावधृतिश्चेत्स्यान्नेन्द्रादेः स्यादनुग्रहः ।
तस्मात्पिण्डादिवैधर्म्यमेवेतीहावधार्यते ॥४१॥

If there were restriction with regard only to the sun, then there it would not have been (possible to think of) the favour of the moon and others;¹ therefore, it is only the dissimilarity (of them with the body etc.) that is emphasised here. [41]

¹This refers to fire and speech (sound).

नृपस्त्ववेति संश्लेषादादित्यस्यावधारणम् ।
मत्वास्तमित इत्येवं मुहुर्विप्रमचूचुदत् ॥४२॥

But because of proximity of *eva* with *ādityāt*, the king, he took that there is emphasis on (only) *āditya* and therefore he again put a question to (lit. urged on) the Brāhmaṇa sage (in the words) *astamite*. [42]

Verses 43-44 present another way of understanding the word *eva*.

आत्मैव ज्योतिरथवा रविसोमाग्न्युपाधिगम् ।
अवधियत एवेति तमेव इति च श्रुतेः ॥४३॥

Or, only the Ātman is the light, or, is the light as having the delimiting adjuncts (in the form of) the sun, the moon and fire—that is asserted/emphasised. (This is prompted) by the Śruti (stated) *tam eva*¹ [43]

The subject of this verse is the word *ātman*. It may be understood possibly to have the purpose of setting aside the accepted meanings, the sun etc. as the light.

¹This refers to *tam eva bhāntam anubhāti sarvam*.

रवीन्द्रादिपदार्थेभ्यो ह्यनुमानैकवर्त्मना ।
स्वार्थं विज्ञापयिष्यामि विभज्यातः परा श्रुतिः ॥४४॥

(With the idea:) 'Let me convey (lit. instruct) my thought (*svārtha*) by only resorting to inference from the things, viz. the sun, the moon etc.,' the subsequent Śruti proceeds by making them apart from one another. [44]

This verse intends to answer any doubt regarding the Śruti *ātmaivāśya ...* as meaningless.

Verses 45-50 bring out the purpose of more than one verb. In verses 48-49, there is explanation of BU 4.3.2-4.

ज्योतिषोऽत्यन्तवैधर्म्यप्रसिद्धयर्थं विशेषणम् ।
आस्त इत्यादि सुबहु श्रुत्योपन्यस्तमादरात् ॥४५॥

In the verbs (lit. words *āste*) and others,¹ which are more than one, are distinguishing mark(s) (*viśeṣaṇam lingam*) which

the Śruti has purposefully (lit. respectfully) introduced, for establishing clearly the completely distinct nature of the light.

[45]

This establishes the purpose of the words *āste*

¹This refers to *palyāyate karma kurute viranyati*.

भयसां चाप्यपन्यासो बाह्यानां ज्योतिषामिह ।
लिङ्गस्याव्यभिचारार्थं बुद्धिवाक्कायकर्मणः ॥४६॥

And this introduction of more lights than one here is to convey (or indicate) the invariable (association of) the indicators (viz. activities) of the intellect (and the organ of) speech and the body.

[46]

Read SP: *anekaparyāyopanyāso bahavo hi dr̥ṣṭāntāvyāptim dradhayatīty arthaḥ*.

आदित्येनैव चेत्पुंसोऽनुग्रहो भवतोच्यते ।
तस्मिन्नस्तंगते पुंस आसनादि कुतो भवेत् ॥४७॥

If it is said by you that, by (making a reference as) *ādityenaiva* 'there is stated a favour done to a transmigratory being,' then the question is: 'How could sitting etc. be possible for a man when that (viz. the sun) has set?'

[47]

चन्द्रमा एव पुंसोऽस्य तदा ज्योतिरनुग्रहे ।
तस्याप्यस्तमयैऽग्निः स्यादासनादिप्रवृत्तये ॥४८॥
आदित्यादित्रयं ज्ञेयं ज्योतिषामुपलक्षणम् ।
मण्यादीनां प्रवृत्तिर्हि पुंसां तैरपि दृश्यते ॥४९॥

Then it is only the moon which is to do the favour to the man; and on the setting of that also there would be fire to do (the favour viz.) the activity of sitting etc.

[48]

The triad,¹ beginning with the sun, should be known as indicative of the lights (for the man), because the activity of

shining stones (*maṇis*) is seen to be (favourable) for man only through them (i.e. the triad). [49]

It is noticed that men are empowered to act by the light coming from jewels, but these also become helpful only through the light of the sun and others.

¹These are the sun, the moon and fire.

Verses 50-68 explain BU 4.3.5.

तेष्वप्यस्तमितेष्वस्य पुंसो वाग्ज्योतिरिष्यताम् ।
वाक्च शब्दोऽत्र विज्ञेयो ज्योतिष्कार्यसमन्वयात् ॥५०॥

When these (viz. the triad) also have set, let the light for the man be in speech; here, the word *vāc* is to be known (as the light) on account of its association with the activity of light. [50]

jyotiskārya consists in making a man undertake activity; it is only sound, which is a product of speech organ that makes a man's mind active; therefore *vāc* is to be understood in the sense of sound.

Verses 51-56 explain BUB: vāgiti sparśādīnām upalakṣaṇam.

स्पर्शादिविषयाणां वागिह स्यादुपलक्षणम् ।
यतः स्पर्शादिनाप्येषां प्रवृत्तिर्दृश्यते नृणाम् ॥५१॥

Here (i.e. in this context) speech is to indicate the different objects (of senses) of touch etc., since there is noticed activity of man on account of (i.e. when urged by) touch etc. [51]

बाह्यादित्यादिज्योतिर्भिः पमान्संदीपितेन्द्रियः ।
प्रत्यक्चैतन्यसंदीप्तः सर्वाश्चेष्टाः प्रपद्यते ॥५२॥

A man has his organs of activity incited by external lights

such as the sun, but he takes to all activities (only) when incited by the inner sentience. [52]

Read SP referring to another question, viz. that connected with the light different from the external lights.

सर्वेष्वेतेषु शान्तेषु ज्योतिःष्वक्तेषु कर्मणे ।
पुमान्किञ्ज्योतिरेवायं तमस्यन्धेऽभिधीयताम् ॥५३॥

(Question is asked:) 'When all of these lights, which are stated earlier, have been extinguished (i.e. ceased to work), what light does this man (come to have) in pitch-dark (andhe)? Let this be said.' [53]

This indicates another question referred to by SP.

सर्वचेष्टानिरोधोऽस्य पुंसः प्राप्तस्तदासति ।
यथोक्तज्योतिषि ततो न स्युश्चेष्टा यथोदिताः ॥५४॥

(This is so,) because there would follow the cessation of all activities of a man, when none of the (already) mentioned lights exists and then there would not be the (already) mentioned activities. [54]

स्मृतिस्वप्नसमाधाने पुरुषस्य समीक्ष्यते ।
चेष्टातः पूर्ववत्तस्य ज्योतिस्तत्रानुमीयते ॥५५॥

While explaining the memory and the dream of a man, his activity is noticed even as before and (therefore) there¹ is a light inferred to be existent (within the same). [55]

¹This refers to memory and dream.

बोद्धुः कर्तुश्च पुंसोऽस्य प्रवृत्तिर्येह का चन ।
यथोक्तज्योतिर्विरहे नासौ दृष्टा कदा चन ॥५६॥

Whatever activity is seen here on the part of a man, who knows and who acts, is not even seen in the absence (*virahe*) of the light that are (already) mentioned. [56]

Verses 57-61 state that all other dealings of a human being are determined by the presence of the other lights.

भान्वाद्युद्दीपिताक्षः सन्प्रमात्रादिः प्रसिध्यति ।
ततः कर्त्रादिसंसिद्धिः प्रमाकर्मफलं ततः ॥५७॥

(That) there is a knower etc. becomes apparent when a human being has his eyes lightened up by the sun etc.; therefore it is only from that there is established the coming into existence of the agent etc. and then the knowledge, activity and the result (also come into being) therefrom. [57]

This refers to a person's activities in the waking state.

कूटस्थानित्ययोर्भासोर्मध्यवर्ती पुमानयम् ।
वाङ्मनःकायकर्माणि सर्वदैव प्रपद्यते ॥५८॥

This man is thus existing between the two, immutable light and the non-eternal light, and ever performs various activities of speech, *manas* and body. [58]

This refers to the *kūṭastha* for explaining the activity of a man in his dream; refer also to verse 52 above when *pratyakṣecaitanya* is mentioned.

ध्वान्तादिविषयान्तोऽर्थो जडत्वान्नात्मसिद्धिकृत् ।
आत्मज्योतिरभावेऽतो नाभावमपि विन्दति ॥५९॥

An object falling within the compass of darkness etc., being insentient, does not help to prove the existence of the Ātman; therefore, in the absence of the light of the inner self, that does not come to have (its own) absence as well. [59]

आगमापायिज्योतिर्भिर्धर्माधर्मनिबन्धना ।
संगतिः पुरुषस्यास्य निर्हेतुः प्रत्यगात्मना ॥६०॥

The association of this transmigratory being with the lights that come into existence and depart from it, is dependent on merit and demerit, (whereas that) with the inner self has no cause (for its existence). [60]

कुम्भस्य वियता यद्वन्निर्हेतुः संगतिः सदा ।
विनश्वरी सहेतुश्च जलक्षीरादिसंगतिः ॥६१॥

It is like a pitcher which has an all-time association with the sky, (even) without having a cause for it, (and) its association with water and/or milk is transitory (*vinaśvarī*) and has a cause for it. [61]

In this verse Sureśvara gives an illustration to justify the statement, in the preceding verse regarding a man's twofold association (i) with various objects of ignorance and (ii) with the inner self.

Verses 62-66 clarify that the light of the inner self is not associated with any external object(s) (dharma(s)).

यथेहासंहतान्येव भान्वादीनि प्रकुर्वते ।
अनुग्राहेण पुंसेह सर्वदानुग्रहं मुहुः ॥६२॥

As the sun etc., though (*eva*) being uncombined (with the man), do favour a man, who is to be favoured; so also, here (in the case of the inner self), it ever does favour to a man. [62]

अकारकात्मकान्येव पुंसः कारकरूपिणः ।
नाकृत्वा तानि कुर्वन्ति प्रकाशं गतिवद्यतः ॥६३॥

(This is so,) since not without doing any activity of their own (and yet) being no causes (*kāraṅkas* of, or factors related to) activity, those (lights) produce lumination, like a movement, in the case of a man who is of the nature of agent. [63]

व्यञ्जकानां हि सर्वेषां न स्वरूपातिरेकतः ।
व्यङ्ग्येष्वतिशयो दृष्टस्तिष्ठतो नु गतिर्यथा ॥६४॥

In the case of them, there is not seen any excellence of their own in the things revealed beside (themselves) having only their nature (of a light); this occurs in the same way as (the existence of a capacity to) move (appear) in the case of one who is (merely) standing. [64]

आत्मज्योतिस्तथैवेदं सदानस्तमितोदितम् ।
भान्वादिष्वपि सर्वेषु तदेव प्राग्विवक्षितम् ॥६५॥

Exactly of the same nature is this light of the inner self which has never set or has not ever risen; in the case of all of the sun etc. also, it is intended to convey (the situation to be) just the same. [65]

पुंस्प्रवृत्तिरियं लिङ्गं यथोक्तज्योतिषो भवेत् ।
सर्वत्राव्यभिचारित्वात्तथा स्वप्नादिभूमिषु ॥६६॥

As this activity of a man is an indicator of the light¹ which is described; so also it invariably exists owing to its presence everywhere in the states of dream etc. [66]

¹This refers to the inner self who is responsible for a man's activities in his waking state and dream state as well. That is to say, the inner self is never absent in a man.

Verses 67-72 are an exposition of BUB: *jāgradviṣaye hi*
From verse 69 up to 275 there is exposition of BU 4.3.6.

जाग्रत्काले नरस्यास्य भान्वादिय्योतिषा यदा ।
चक्षुराद्यनुगृह्येत स्फुटा व्यवहृतिस्तदा ॥६७॥

When, in the state of dream, the eye etc. of this man etc. would be favoured by the light of the sun etc., there is (man's) activity already visible; [67]

एवं जागरिते तावदादित्याद्युक्तलक्षणम् ।
विभिन्नासंहतज्योतिरनुग्रहपुरःसरः ।
पुंव्यापारः सदक्षोत्थप्रमाणप्रमितः स्फुटः ॥६८॥

Thus, in the state of waking (of a man), there is clearly visible the man's activity, which is grasped by (various) means of knowing through capable organs, which is determined (lit preceded) by the favours of the uncombined lights, which is distinct and which has the character of the sun etc., as stated before. [68]

Regarding the translation of the first line, the variant reading *lakṣaṇaḥ* is adopted. If the reading above, viz. *-lakṣaṇam* is accepted, the alternative translation would be: "Thus in the state of waking of a man, (there is operative the light) of the sun etc. whose description is (already) given".

लिङ्गलिङ्ग्यभिसंबन्धो यस्मादेवं मितस्ततः ।
सर्वज्योतिरभावेऽपि तादृगेवानुमीयते ॥६९॥
ज्योतिर्जागरिते यद्वद्रवीन्द्रादि समीक्ष्यते ।
नरव्यापारलिङ्गेन धूमाग्निवदसंशयम् ॥७०॥

Since thus is known the relation between the indicator and the indicated; so also only a similar relation is inferred even in the absence of all (those) lights, [69]
as light, such as the sun, the moon etc., is undoubtedly noticeable in the waking state of a man through the characteristic, viz. man's activities, just like (the existence of) fire is noticeable through smoke. [70]

This refers to *asamhatatva* character of light which is not combined with various organs etc. of a man.

लिङ्गात्सामान्यतो ज्ञाते विशेषेणाप्यनीक्षिते ।
भान्वादिवदतो राजा भूयः पप्रच्छ तं गुरुम् ॥७१॥

Since (such uncombined lights) as the sun etc., become (thus) known in a general way by (their) common characteristic of them, even though their particularity is not directly seen; the king again asked the preceptor his question. [71]

शान्तेषु सर्वज्योतिःषु पूर्वोक्तेष्वस्य देहिनः ।
किंज्योतिरिति मे ब्रूहि पुंव्यापारानुभूतितः ॥७२॥

'When all these lights, which are stated before, have become extinguished, what then has this man for a light for himself?' Tell me from the experience of a man's activity. [72]

This verse states the king's question in brief. This is further clarified in the following verse.

Verses 73-77 point to ignorance as the cause of a desire to know the undoubted self-illuminating light.

सर्वज्योतिरुपरतौ भूरिव्यापारकारणम् ।
स्वयंज्योतिष्कमपि तं राजा पप्रच्छ मोहतः ॥७३॥

Out of his delusion, the king asked him (Yājñavalkya) the cause of the multiple/various activity (of a man) (even) when all the lights have gone out, though that is self-illuminating (light). [73]

यत्प्रसादादविद्यादि सिध्यतीव दिवानिशम् ।
तमप्यपह्नुतेऽविद्या नाज्ञानस्यास्ति दुष्करम् ॥७४॥

(This is so because) ignorance conceals even that through whose favour ignorance etc. it is, as it were, established day and night; there is nothing difficult for ignorance (to effect). [74]

स्वतो बुद्धं स्वतः शुद्धं स्वतो मुक्तं निरात्मिका ।
अविचारितसंसिद्धिरविद्या लिङ्गते कथम् ॥७५॥

(The question is:) 'How does ignorance which does not have any specific nature and which gets established even without a thought, embrace (i.e. obscure) the naturally enlightened, pure and free (i.e. liberated inner self)?' [75]

निःसङ्गस्य ससङ्गेन कूटस्थस्य विकारिणा ।
पूर्णस्यानात्मना योगो वास्तवो नोपपद्यते ॥७६॥

There does not reasonably exist any real association of (the inner self which is) devoid of any contact with another, immutable and complete or full in itself with a non-Ātman (which is in) contact (with another) and which undergoes modification.¹ [76]

¹The adjective *apiūrṇena* is implied through the force of *īrṇasya* in contrast.

सर्वज्योतिरुपरमे किंज्योतिरिति चोदिते ।
आत्मैवास्येति जनकं याज्ञवल्क्योऽप्युवाच ह ॥७७॥

When he was asked the question, 'What light has one when all (other) lights are extinguished?', Yājñavalkya, on his part (*api*), made, an answer to Janaka, 'The inner self indeed is for this one (the light)'. [77]

verses 78-80 affirm that the Ātman is self-luminous.

आत्मप्रत्यय आत्मैको द्वितीयः पुनरात्मनः ।

अनात्मप्रत्ययोऽतोऽहं स्वत एवास्मि केवलः ॥७८॥

Only the single inner self has the awareness of its own existence, whereas a second, who can be different from the inner self, has the awareness of the non-Ātman (associated with the inner self); therefore, I myself am absolute (or only by myself). [78]

न सामान्यं विशेषं वा प्रत्यग्धीरवगाहते ।
तद्याथात्म्यात्प्रतीचोऽतः सम्यग्दृष्ट्या न वीक्ष्यते ॥७९॥

The knowledge on the part of the inner self does not pertain to (lit. enter into) what is general or what is particular, since that is the true nature of the inner self and, therefore, that is not seen as with a proper vision. [79]

It is because of ignorance on the part of the inner self that the world, made up of what is general and what is particular, becomes apparent; therefore the inner self cannot really notice either or both of them.

नाविद्याघस्मरैकात्म्यसम्यग्दृष्ट्या समीक्ष्यते ।
आत्माविद्या तदुत्थो वा बाध्यत्वाद्गज्जुसर्पवत् ॥८०॥

Ignorance about the self or what comes from it is not seen as the proper act of knowing because of its real oneness with what destroys ignorance, since that (ignorance) is what is stultified as a serpent noticed in place of a rope (is stultified).

[80]

Verses 81-85 discuss an objection: 'How can there be only question about the nature of the Ātman which is devoid of both generality and particularity?'

आध्यात्मिकस्य नेत्रादेर्बाह्यज्योतिरसंगतौ ।
तद्द्वारेण प्रकाशोऽयं न मनस्युपजायते ॥८१॥

Thus) in the absence of (any) association of the eye etc., which belongs to a body, with the external light there would not enter into *manas* any information (lit. light) through them.¹

[81]

For normal viewing of objects, there is a need that some sense organs are in association with an external light so that the shape of the object gets fixed in the *manas* of a person. In the case of the inner self as a knower, there is no such mechanism, or sense organs and *manas* and, therefore, there can be no viewing of objects.

This is a reference to the waking state of an individual.

भान्वाद्यनुग्रहाभावे तस्मादेष पुमानिह ।
प्राप्तोऽद्रष्टा तथाश्रोता स्मृतिस्वप्नादिभूमिषु ॥८२॥

Therefore, in this, i.e. in respect of memory and in the state of dream etc., there being absence of any helping light as of the sun etc., a person becomes non-seer or non-listener.

[82]

मनसैवेक्षते यस्मात्सर्वानिन्द्रियगोचरान् ।
तदभावे पुमानेष किंज्योतिरिति कथ्यताम् ॥८३॥

Since a person sees all the objects of all sense organs only through the help of *manas*; therefore, in the absence of that,¹ i.e. *manas*, what light can this person have? Let this be told.

[83]

This refers to BU 1.5: *manasā manute* But cf. SP: *yadyaśvapne mano 'sti tathāpi tasya viṣayatvān na prakāśakateti vyakhyate* where *viṣayatva* determines *viṣayākāreṇa pariṇamana* and excludes *prakāśakatvarūpa* (of *manas*).

आत्मैवास्य तदा ज्योतिर्भवतीत्यभ्यधादृषिः ।

आत्मनैव तदा चेष्टां ज्योतिषा संप्रपद्यते ॥८४॥

Then the Rṣi said 'The inner self itself serves (lit. becomes) for this person as the (external) light; (and) only through (the help of the inner self, the (illuminating) light can this person perform any activity'. [84]

Further, read SP: *svapnādaṁ vāsanārūpā dhīr ātmajyotir dīpitā svavyāpāraṁ karotīty arthah.*

प्रत्यक्षाद्युपलब्धौ यो बुद्धौ संस्कार आहितः ।
कर्मणोद्भावितः सोऽयं स्मृतिरूपेण जायते ॥८५॥

That impression, which has been impressed on the intellect for acquiring the knowledge of directly perceptible things etc., becomes here (*ayaṁ jāyate*) visible (in this person) in the form of some memory, caused as it is by (an earlier) activity. [85]

Verses 86-93 point out that the intellect etc. can illuminate external objects owing to their being in the vicinity of the inner self.

आत्मा स्वाभाससचिवो धियमिच्छादिरूपिणीम् ।
अनुगृह्णाति कर्मोत्थां प्रत्यगज्ञानकारणात् ॥८६॥

The inner self, who has its own appearance as a helper favours (a man with) some knowledge which has the form of desire etc. that is produced by (earlier) activity,¹ on account of ignorance on the part of itself, i.e. the inner self. [86]

¹Cf. SP: *svapnādibhāvinyah smṛtīcchādivṛttayah sarvāḥ*. Also NKL (ms. p.577): *svapnakālīnāḥ sarvāḥ smṛtayo buddher vyāpāra ity arthah.*

यथा प्रकाशयत्येकः कृत्स्नं लोकमिमं रविः ।

क्षेत्रं क्षेत्री तथा कृत्स्नं व्यनक्तीति तथा स्मृतिः ॥८७॥

In this sense, there is a (statement in the) Smṛti. As only one sun illumines this entire world, so does the possessor of the field (i.e. the inner self) reveal the entire field. [87]

prathā ... kṛtsnam vyanakti forms a quotation, viz. *Gītā* 13.33, with only one variation viz. *vyanakti* standing for *prakāśayati*.

नानासंस्कारसंसर्गिप्रत्यगज्ञानमेव तत् ।
बुद्ध्यादिस्मृतिरूपेण प्रथते कर्मणो वशात् ॥८८॥

That (memory) is but ignorance on the part of the inner self, which is associated with numerous impressions; (that ignorance) reveals itself (*prathate*) in the form of memory of cognition of the intellect etc. through the force of (earlier) act. [88]

Read NKL (ms. p.577): *icchāder buddhikāryatvenāvidya(?)syāt* *anāntareṇaiva nirapekṣatvād atrāha*.

भान्वादिवदतो बुद्धिं स्वाभासैकसहायवान् ॥
अनुगृह्णाति कूटस्थः स्वात्माविद्यानुरोधतः ॥८९॥

Therefore, the immutable inner self does help a person just as the sun and others, having its own appearance as the helper, and in accordance with the ignorance about itself. [89]

Read NKL (ms. p.577), introductory remark: *ajñānasye-* *ādihetutve tasmād ātmano 'nugrāhakatvam iti phalitam āha*.

अनुग्राह्याभिसंबन्ध एकजातिसमन्वयात् ।
आदित्यादेरिहावाप्तिरात्मनोऽज्ञानवर्त्मना ॥९०॥

Here, in the case of the inner self, the relation of the sun etc. to a person to be helped is through (the force of), i.e. by way of ignorance and (also) on account of its being one

in nature with the only one (*ekajātisamanvaya*).

[90]

For clarification, read SP: *iha buddhyādāv ajñānadvārātmanas tādātmyasaṃgatir atah sājātyābhāve 'pi sākṣitvalakṣaṇam anugrāhakatvam.*

चिदाभाविद्ययैवात्मा कटस्थोऽप्येति साक्षिताम् ।
आगमापायिरूपेषु स्थितौऽनेकेषु चैकलः ॥९१॥

The inner self, even though immutable, comes to possess the nature of witness only through the ignorance in the form of the semblance of sentience among numerous objects (of that knowledge) which have the forms of what comes into existence and what departs from it. (And) that (inner self) remains just alone (amongst many). [91]

Read NKL (ms. p.577) introductory remark: *anugrāhakatvaṃ nāma sākṣitvaṃ tat kūtasthasyātmano 'nupapannam atrāha.*

दृश्यार्थवदभिन्नोऽयं द्रष्टृदर्शनसाक्ष्यपि ।
द्रष्टृदर्शनभेदेऽपि न भेदोऽस्य मनागपि ॥९२॥

Even though this one is the witness of the seer and the act of seeing, it is non-distinct like the object to be seen;¹ thus, even when there is such a distinction as the seer and the act of seeing, there is not even a little of difference/distinction in respect of this one (i.e. the inner self). [92]

The basis of this verse is the doubt: Just as there are discrete objects of different sense organs, so also, owing to the discreteness among the objects to be witnessed, there should be discrete (or distinct) witnesses of them. Therefore, it is not proper/reasonable to hold that there is only one witness for the various/numerous objects to be witnessed.

¹Actually the objects to be seen are but the product(s) of ignorance and, as such, not distinct from the inner self.

कारणान्वयवद्बुद्धेश्चिदाभासोऽपि सर्वदा ।
चिदाभासातिरेकेण बुद्धेः परिणतिर्वृथा ॥९३॥

The semblance of sentience arises on account of the intellect which has a (continued) association with its cause, viz. ignorance and, therefore, that modification of the intellect, which is held to be apart from the semblance of sentience is (only) futile. [93]

This verse affirms that the semblance of sentience does continue to be existing in the different organs such as the intellect.

Verses 94-95 affirm that the inner self is the witness of the objects to be seen.

विषयः प्रत्यगात्मा च स्वाभासेन विशेद्वियम् ।
स्वाभासवत्स्वयं साक्षाद्वियत्कुम्भादिगं यथा ॥९४॥

And the inner self, (becoming) the object(s) to be seen enters through its own semblance into the intellect, in the same way as the sky itself enters into a pitcher etc. itself becoming the semblance of it (in various forms). [94]

योऽप्यविद्यादिसंबन्धः सोऽप्यविद्याप्रकल्पितः ।
वास्तवस्त्वभिसंबन्धो नोपपत्त्यात्मनो यतः ॥९५॥

And that relation (of the inner self) to ignorance etc.¹ is also produced by ignorance, since it is not for any reason that there is any real association (*abhisambandha*) of the Ātman (with ignorance). [95]

¹This refers to the world produced by ignorance.

In verses 96-99 is pointed out that the Ātman does not have the nature of agent of any activity.

यथा ज्ञानप्रकाशाभ्यां संप्लुतावेव नान्यथा ।
कुम्भादेः कर्मयोग्यत्वं स्यादेवं धिषणादिसु ॥९६॥

As a pitcher etc. can become useful for any activity of a man owing to only knowledge and light, when there is only ignorance;¹ (and) not otherwise; similarly, in the case of the intellect etc. should it be held as (possible).² [96]

¹*sampluti* stands literally for overpowering (of the inner self by the so-called) knowledge (of external objects) and light (of the external sun).

²That is, *jñāprakāśābhyām samplutāv eva*.

चिद्वाह्याकृतिसंबन्धे कर्मणेऽलं भवेन्मतिः ।
तयोर्भिन्नाश्रयत्वे तु दुःख्यस्मीति न सिध्यति ॥९७॥

Only when there is association of sentience with the external appearances (of objects), a person's thought/intention can result into some activity, but, in their having the different abodes, there cannot be established (the experience) 'I am miserable'.

[97]

This explains the *dārṣṭāntika* intended in verse 96 above.

कौटस्थ्याद्विक्रियाभावान्निश्चितकत्वाद्विकारिणः ।
आत्मनः स्यादिदं विश्वमन्धकारप्रनृतवत् ॥९८॥

For the inner self, which has (owing to ignorance) become subject to modification and is associated with absence of sentience this (entire) world would be like (some) dance (performed) in darkness—since it has (in reality) the nature of being immutable and absence of any modification in it.

[98]

घटाद्याभासवत्तस्मान्मोहादेरभ्युपेयताम् ।

चिदाभासोऽपि सर्वत्र न वेद्मीत्यनुभूतितः ॥९९॥

Therefore, let this be accepted that like the appearance of a pitcher etc., this semblance of sentience also has resulted from delusion; for there does not everywhere obtain the experience, 'I do not know'. [99]

एषोऽस्यानुग्रहः श्रुत्या प्रतीचोऽत्र विवक्षितः ।
भान्वनुग्रहवत्पुंस आसनादिप्रसिद्धये ॥१००॥

This help of the inner self in the case of an individual is intended by Śruti. It is like the favour of the sun for a human being which lead to his activities of sitting etc. becomes possible. [100]

Read NKL (ms. p.578) for explanation of the idea: *cidābhāsavyāptirūpa ity arthaḥ*.

This is to bring out how the inner self also serves as some external light for a man even like the sun and others for sitting etc.

Verses 101-105 explain what is the Ātman and also that it becomes the inner self of an individual.

आत्मेति प्राणपिण्डादितदंशसमुदायतः ।
तज्जात्याकृतिसंबन्धगुणकर्मविलक्षणः ॥१०१॥

What is called the Ātman is different in characteristic from (a conglomeration, viz. organs and) body consisting of them which are its parts and also in respect of their activities, properties related to thier forms and genera of them. [101]

तत्सतत्त्वं तदात्मत्वादज्ञानाद्यवभासयत् ।
ज्योतिरेकात्मकं नित्यमसाधारणमानगम् ॥१०२॥

Being the inner self (of an individual being) the Ātman¹ is

the nature of that. It is the light which reveals (or manifests) ignorance etc. Having the nature of only one it is eternal and it cannot be understood from common means of knowing.

[102]

¹SP states this as that characteristic of the Ātman which distinguishes it from the sun etc.

तदन्यस्य जडत्वाच्च नान्यप्रत्यक्षमिष्यते ।
तथानतिशयत्वात्स्यान्न पुमन्तरगोचरः ॥१०३॥

And since everything else is only insentient, it (viz. the inner self) is therefore not accepted as what becomes directly perceptible, so also, because it does not have any other things excelling it, it is not to be an object for any other person.

[103]

शब्दादिगुणहीनत्वात्प्रत्यक्त्वासंहतत्वतः ।
दृष्टिमात्रस्वभावाच्च नात्मा दर्शनमर्हति ॥१०४॥

The Ātman cannot become visible (or, become an object of seeing), since it is devoid of any properties such as sound etc. and also because of its being within (an individual being), since it is uncombined with (the organs etc.) and also because it is only of the nature of the seeing one, or the seer. [104]

Read NKL (ms. p.578): *bāhyāviṣayatve hetvantaram āha.*

देशान्तराद्यसंबन्धान्मोहाद्यव्यवधानतः ।
न च मोहादिवत्प्रत्यक्तथा दर्शनमर्हति ॥१०५॥

Because it has no connection with any region other (than its own) and has not (any) hindrance (to its existence) such as delusion etc., the inner self cannot become an object of seeing like (the objects of) delusion etc. [105]

This is to explain why the Ātman cannot be known by inference.

Verses 106-111 affirm that the Ātman is not a light similar to other lights such as the sun.

नादित्यादिसजातीयमात्मज्योतिरितीष्यताम् ।
तन्मानानवगम्यत्वादादित्यादेश्च तद्ग्रहात् ॥१०६॥

Let not this light of the inner self be accepted as of the same type (as the light of) the sun etc., because that (i.e. the inner self) cannot be grasped by any means of knowing (other than the scripture) whereas (the light of) the sun and others can be grasped by that (means of knowing).¹ [106]

¹In the second line the word *tat* is used twice: the first refers to the Ātman and the second to the means of knowing.

अनुग्राह्यसजातीयं यच्च ज्योतिरिहेष्यते ।
तच्चक्षुरादिकरणग्राह्यं दृष्टं घटादिवत् ॥१०७॥

And whatever light is here accepted as that which belongs to the type (or class) of what requires help (i.e. external object) is noticed to be what can be grasped by means of the sense-organs such as the eye etc., even like a pitcher. [107]

Here Sureśvara points out that the other kinds of light like the sun etc. which could be objects grasped like other worldly objects are grasped by the Ātman.

न चाप्रमेयमिति तच्छशशृङ्गादिवन्मतम् ।
तदनन्यमिति व्याप्तेः प्रत्यक्त्वाद्दिनकृद्यथा ॥१०८॥

So also it is not considered to be similar to the horn of a hare because it is not (at all) an object of knowing. This is because it does not have anything else (existing beside it) and it is inside (of a human body) and is like the sun (an

illuminator).

[108]

The point of similarity here is only the illuminating character. Also cf. NKL (ms. 579): *svaprakāśatayāparokṣānubhava ity arthaḥ*. And SP: *prakāśarūpatve dr̥ṣṭāntaḥ*.

प्रत्यक्षमानगम्यत्वं विषाणस्यावधारितम् ।
स्वभावस्तमृते शृङ्गं स्वभावमतिवर्तते ॥१०९॥

What is certain as the nature (*svabhāva*) of a horn is its being known by (the means called) direct perception. But, (that is so done) without (the help of) it;¹ thus (the existence of the horn of a hare) transgresses the nature (of objects). [109]

Read SP *mānayogyasya tadaviṣayatve yuktam asattvam iti bhāvaḥ*. And read the introductory in SP: *ātmajyotiṣo meyatvād ṛte sattve śaśaṣṛṅgasyāpi kiṃ na syāt tatrāha*

¹Or, in the absence of (the light of) the inner self.

मानपादोपजीवित्वं स्वभावोऽनात्मवस्तुनः ।
मात्रादिसिद्धिदस्यैष स्वतःसिद्धेर्न सर्वदा ॥११०॥

The nature of a thing other than the Ātman is to be dependent on the means of knowing and, therefore, this one (i.e. the inner self), which helps establishing the (commonly accepted) means of knowing etc. gets established by itself and is not ever (dependent on any means of knowing). [110]

Verses 111-115 affirm the Ātman as self-illuminating and also an illuminator of the intellect etc.

अस्तं यातेषु सर्वेषु ज्योतिःषूक्तेषु वासनाः ।
ज्योतिः प्रत्यक्स्वयं दृष्टमासनाद्याः प्रकाशयेत् ॥१११॥

The light within (viz. the inner self) would itself, it is known (lit. seen), illuminate the impressions such as (having) a seat,¹

when all the said (or, already mentioned) lights have set (i.e. disappeared). [111]

This is to conclude the thought in *ātmanaivāyam*

¹Read SP: *svapnādāv āsanādīnāṃ vāsanāmātratvenābhāsatvam ity abhipretya vāsanāpadam*.

एष आत्मा स्वयंज्योती रविसोमाग्निवाक्षु यः ।
यातेष्वस्तं दृशैवास्ते भासयंश्चित्तचेष्टितम् ॥११२॥

This Ātman, the self-illuminating light, does exist with his power of seeing, revealing the activities of (human) intellect, when the lights, viz. the sun, the moon, fire, and speech have set. [112]

आत्मप्रत्ययमामेयः सर्वेषामपि देहिनाम् ।
यतोऽतोऽनात्मयोगोऽस्य न मानादवसीयते ॥११३॥

Since (this Ātman) is, for all the human beings without exception (*api*) an object to be grasped (only) by the knowledge in the form of (the individual being's) awareness (of the inner self), therefore its association with any non-Ātman cannot be inferred (lit. concluded) with the help of any other means of knowing. [113]

This is the same idea of BSB 1.1.1 (p.78-81): *tatpunar brahma prasiddhāprasiddham vā syāt ... sarvo hyātmāstitvaṃ pratyeti na nāhamasmūti*. Read SP: *svaprakāśatvād evātmano na karṭṛtvā-dyanātmamayogaḥ svaprakāśe mānāt tadasiddhes tasya tadaviṣayatvāt tasyāpi svataḥsiddhāv anatirekāḍ ity arthaḥ*. Yet NKL (ms. p.579) briefly thus: *svaprakāśasya karṭṛtvādisambandho na mānagamyā ity arthaḥ*.

न चेदात्मेतिधीमानात्प्रतीचोऽन्योऽर्थ ईक्ष्यते ।
प्रमान्तराविरोधेन य आत्मेत्युपपद्यते ॥११४॥

(And) if (this were) not (so), then (it would be that) an object other than the inner self understood from the awareness (I myself am) the Ātman. (But the Upaniṣadic assertion) *ya ātmā ... is (only) reasonable, in the absence of any (other) conflicting knowledge.* [114]

We demur in respect of the accuracy in our translation. SP supports the argument by citing CU 8.7.1: *ya ātmāpahatapāpmā vijarah* and refers to the citation in the verse as from BU 3.4.1: *ya ātmā sarvāntarah* More clear (though brief) in NKL (ms. p.579): *ya ātmā sarvāntara iti vākyaṁ cātmano na karṣṭvādir ity āha na ced iti.* This supports our addition of '(And)' in the translation, for connecting this verse with the preceding.

आत्मा ब्रह्मेति वाक्येभ्यस्तथा चेदं प्रतीयते ।

प्रत्यक्षाद्यनवष्टब्धमैकात्म्यं बाधवर्जितम् ॥११५॥

So also, this is understood from sentences (like) 'Ātman is the Brahman' that the nature of its being unopposed (by any other means of knowing) such as direct perception and devoid of any stultification. [115]

So far there has been the discussion on the nature of the Brahman, and now in verses 116ff. is presented the argument made by one who holds the body as the Ātman (dehātmavādin), viz. Cārvāka.

In verses 116-123, the support for that view is noted as lying in direct perception.

ननु देहाद्यभिन्नत्वादात्मनो मुक्तता कुतः ।

प्रत्यक्षेण विरुद्धत्वादैकात्म्यं चापि न श्रुतेः ॥११६॥

Now, (a question is asked:) 'Indeed, since the Ātman is not distinct from the body etc., how could there be for it the state of liberation? And, since it is opposed to direct perception (also) its singleness cannot be upheld as stated by the Śruti.

[116]

तथा हि क्षितितोयाग्निमरुतां योगजं मतम् ।
प्रत्येकं शक्त्यभावेऽपि चैतन्यं मदशक्तिवत् ॥११७॥

To explain this: It is held by us¹ that like the power of intoxication, the sentience is the product of the combination of (the elements:) earth, water, fire and wind, even if each of them individually does not have the power (of intoxicating).

[117]

Sureśvara uses here a simile in quite an incomplete form. What is meant is: Certain things, when put together, can produce intoxication, but not each one of them can. SP only refers to *kinva* as one of the intoxicating things, it does not mention others. NKL (ms. p.579) refers to some betels, betel plant (*nāgavallī*) and the pot in which these things are kept. When these things are together, they can produce toxic product and not otherwise.

¹This refers to *dehātmavādin*.

अहं मनुष्य इत्येवं सामानाधिकरण्यतः ।
प्रत्यक्षबुद्धिर्देहेऽस्मिञ्जायते कृष्णसर्पवत् ॥११८॥

It is only on account of the existence together of the elements in one thing (*samānādhikaraṇa*), viz. in this body, that there arises the knowledge/awareness by direct perception *pratyakṣabuddhi* 'I am a man'; it is just like (the perception, 'This is) a black serpent'.

[118]

Even here, as in the preceding verse, Sureśvara uses a simile in its incomplete form. What is meant is that the cognition 'This is a black serpent' is the cognition of black and serpent in one (and the same) thing; similarly, the elements, being together, give rise to the cognition of a sentient person. Probably therefore this idea is clarified (by Sureśvara) in the following verse.

न चाहंबुद्धिगम्योऽर्थो दृष्टो देहातिरेकतः ।
सर्पादेरिव काष्ण्यादिर्देहधर्मस्ततश्चितिः ॥११९॥

There is not seen apart from a body, a thing known from the cognition having the form 'I am (this)'; in the same way as the property of being dark etc. of a body of a serpent and there arises then the knowledge (as said before). [119]

ननु युक्ता पराभूते प्रमातुर्व्यतिरेकतः ।
सर्पादौ धर्मसंबन्धप्रमा नात्मन्यभेदतः ॥१२०॥

(Counterargument:) 'Indeed, the awareness of the connection of a property, viz. blackness, is noticed by a knower in a serpent etc. as apart from (the body), which has been outside it; but it is not so in the case of the Ātman as it does not exist apart from it. [120]

The basis of the verse is the relation between *dharma* and *dharmin* in the case of the Ātman: its sentience cannot be made apart from it, while it can be so done in the case of a black serpent.

जडस्वभावतश्चापि काष्ण्यादिर्धर्मतेष्यते ।
स्वसंविदितमात्रत्वान्न त्वेवंरूपता चित्तेः ॥१२१॥

'Also, blackness etc. is understood as a property (of a serpent etc.) owing to their being insentient in nature, but such is not the nature¹ of sentience (*citi*) which is merely of the nature of being self-revealed.' [121]

¹This is *dharmatā* 'being a property of another'.

यथैकबुद्धिनिर्ग्राह्यं द्रव्येणेह विशेषणम् ।
नैवं चित्काययोः सिद्धिश्चिच्छक्त्यविषयत्वतः ॥१२२॥

'As there is here, in the case of a black serpent, the specifier

(*viśeṣaṇa*) understood only from a single cognition caused by substance (i.e. the thing *dravya*), so this is not known, i.e. established (*siddhi*) in the case of sentience and the body, because the nature of sentience cannot be an object (of such direct cognition).’ [122]

नैवं येनैव मानेन सत्ता संविद ईक्ष्यते ।
तेनैव धर्मता तस्याः काष्ण्यादेरिव मीयते ॥१२३॥

(The counterobjection is answered:) ‘This is not so; the cognition (of sentience) as being a property (of a body) is grasped by that very means (of cognition) whereby the existence of it is cognized, in the same way as blackness etc. of a serpent etc.’ [123]

Verses 124-126 state the *Siddhāntin*’s doubt and also its answer in respect of the *dehādi* as *buddhigrāha*.

ननु देह इदंबुद्धिर्घटादाविव जायते ।
प्रत्यग्बुद्धिस्त्वहंभागे नानयोर्धर्मधर्मिता ॥१२४॥

(A further counterargument:) ‘But (let me point out) the cognition of a body as this one arises as in the case of a pitcher etc. whereas the awareness of the inner self on the part (of sentience) *aham* does not (so arise and, therefore) there is no relation of a property and a substance (to which it belongs).’ [124]

यथैव पारिहार्यादि हेमैकद्रव्यनिष्ठितम् ।
अलब्धात्मकमन्यत्र लब्धात्मकमिवेक्ष्यते ॥१२५॥
तथैव वस्तुस्वाभाव्याच्चिच्छक्तिर्भूतनिष्ठिता ।
अहमित्यादिबुद्धीनां व्यवहाराय कल्पते ॥१२६॥

(Answer:) As a bracelet etc., made of only one substance viz. gold, does not obtain as existing anywhere else (than in gold), [125]

similarly, owing to the nature of the things, the quality of sentience, residing in the elements becomes helpful in (the worldly) dealings whose cognition is of the form 'I ...'. [126]

The argument of the *dehātmavādin* is: There can be different ornaments made of gold and they look apart from each other, but their real existence is in the form of gold. Similarly it is held that the dealing of the world 'I am this...' can occur only when sentience is produced by the combination of various elements mentioned earlier.

Verses 127-128 discuss the absence of sentience in a dead body.

चैतन्यं देहधर्मश्चेन्मृतावविकलस्य तत् ।
कस्मान्न गम्यते साक्षाज्जीवदेहगतं यथा ॥१२७॥

(A counterargument:) 'If sentience is held as a property of a body, why is it not cognized (*gamyate*) in the whole of the body when a man is dead in the same way as it is directly cognized in the living body?' [127]

नैष दोषश्चतुर्णां हि भूतानां संहतिस्तनुः ।
ततो वायावपक्रान्ते चैतन्यमपि नश्यति ॥१२८॥

(The answer:) 'This is not a fault (in our view), because body is a conglomeration of the elements and when the wind has departed from that (conglomeration), even sentience gets lost.' [128]

The argument is: If wind separates from earth, water, fire (verse 117 above) sentience ceases to be product of all the elements together. This means the loss of *caitanya*.

Verses 129-131 discuss the distinction of sentience and body:

स्वप्नदेहादिसंबन्धिप्रत्यभिज्ञाबलान्ननु ।

व्यतिरेकश्चित्तेः सिद्धो भूतेभ्यो जाग्रतोऽप्यतः ॥१२९॥

(Another counterargument:) 'But, indeed, on the strength of recognition which is related to the body of the dream,¹ the existence of sentience as apart from the elements is established (in the same way as) from this (its existence apart) from the elements is established'. [129]

¹NKL (ms. p.580) uses *supta* in place of *svapna*.

देहान्तरविनिर्माणं जाग्रच्चैतन्यवद्ध्रुवम् ।
करोति भूतसंघातः स्वप्ने बालयुवादिवत् ॥१३०॥

(Answer:) 'Certainly it is (only) the conglomeration of elements that produces another body (in the dream) as (it produces) sentience in (the body of) the waking state; this is like (the bodies) of a small boy and a young man. [130]

न चात्र प्रत्यभिज्ञास्ति मिथ्यापरिणतेस्तव ।
नैव बाल्यादिवद्यस्मात्स्वप्ने देहः प्रतीयते ॥१३१॥

Further, there is not here (any) recognition, because this development is, in your opinion, a false modification—(this is so) since, in the dream, a body is not at all seen as (it was) in boyhood etc. [131]

Verses 132-135 discuss a doubt and its refutation regarding the perennial character of the Ātman on the ground of one's memory of the past life.

जातिस्मरणदृष्टान्तादात्मा नित्यो मतो यदि ।
व्रणं पूर्वकृतं दृष्ट्वा देहः किं नोच्यते ध्रुवः ॥१३२॥

If, on the basis of the remembrance of past life as an example, it is held that the inner self is eternal; then, why is it that, on having seen a scar made in earlier life (on the body) it

is not seen in (said to be possessed by) this body? [132]

प्रत्यभिज्ञानतस्तत्र ध्रौव्यं चेदात्मनो मतम् ।
स्वप्नात्मप्रत्यभिज्ञेयं मृषार्था सापि पूर्ववत् ॥१३३॥
सशल्यदेहशयीनि भूतान्येव तथाविधम् ।
देहान्तरं करिष्यन्ति प्रत्यभिज्ञा यदीष्यते ॥१३४॥

If the Ātman is held to be eternal on the basis of recognition, then this recognition of sentience of the dream state also should be ever as before false. [133]

If (the notion of) recognition be held (lit. desired), then (it must follow that) the elements which would lie (in the deep sleep state) with a wounded body would then produce a body of the same kind. [134]

These two verses explain the nature of *jātismaraṇa* mentioned in verse 132. It could be either memory or recognition but both these verses explain how these two means are useless for establishing the Ātman as distinct from the body.

Verses 135-137 discuss if the lights outside the body and that within are of the same kind.

तान्येवैतानि भूतानीत्येवं तद्वत्प्रजायते ।
प्रत्यभिज्ञा स एवाहमिति तद्वद्वेत् किम् ॥१३५॥

(Counterargument:) As there arises the cognition, 'These elements are just the same as before,'¹ then, why is it that there would not arise (the recognition), viz. 'I am the same'? [135]

In the end of the AnSS edition, we find *yadvadbhaven na kim* in 135d, but that seems to be faulty inasmuch as that reading does not balance with *yadvad* in 135b, therefore, we have emended the text accordingly, even if there is no variant noted in the footnote of the edition and also on the page of the

manuscript of NKL it is missing and therefore no help could be derived from it.

¹Namely, in the earlier existing body.

यच्चैतदात्मज्योतिष्टवं व्यतिरिक्ततयोदितम् ।
आदित्यादिलयेनेह भौतिकं त्वेव तद्ववेत् ॥१३६॥

And the nature of the light in the form of the inner self, which has been mentioned as (existing) apart (from the organs and the body etc.) in a way similar to the merger of the sun etc. (in the sea etc.) would indeed be only belonging to the elements. [136]

This is clarified in two following verses.

उपकारि सजातीयमुपकार्यस्य वस्तुनः ।
जगत्सिमन्यतो दृष्टमादित्यश्चक्षुषोर्यथा ॥१३७॥
शब्दादिभिर्हि घ्राणादेर्नोपकारः समीक्ष्यते ।
विजातीयैरतो ज्योतिर्भूतजातीयमिष्यताम् ॥१३८॥

Since we notice in this world that the things which help the thing which requires to be helped belong to the same species (or, kind) as of that (i.e. the latter), as in the case of the sun for the two eyes, [137]

and, indeed, since there is not noticed any help offered by words etc. to the senses of smell and others, as they belong to different species (or, kind), therefore, one should accept (lit. desire) the light to be belonging to the species (or, kind) of the elements. [138]

In these verses, there are examples given as demanded by yaya and Vyatireka relation also. The word *yataḥ* 'since' in verse 137 is to be connected with *ataḥ* in verse 138.

भौतिकस्यैव कुम्भादेर्भौतिकैरेव वीक्ष्यते ।
उपकारो जगत्सिमन्नादित्याद्यैर्यथा तथा ॥१३९॥

As, it is noticed in this world that the (things) pitcher etc. which are made up of elements are helped by such others as the sun that (also) are made up of element, so is this.¹

[139]

This verse is to reaffirm what is said in the two preceding verses.

¹We have to supply: that the bodies are helped by the lights (viz. the sun and others).

देहादेर्यदि नामेदं ज्योतिरर्थान्तरं मतम् ।
तथापि नासजातीयं व्यञ्जकत्वात्प्रदीपवत् ॥१४०॥

If this light (of the inner self) is considered to be an object as different from the body etc.,¹ even then it does not belong to the same species as of them, because it is only a revealer of them like a lamp.

[140]

¹This refers to the organs also.

Verses 141-143 express another doubt in this regard.

ननु देहासजातीयमन्तस्थातीन्द्रियत्वतः ।
यद्यद्देहासजातीयं ज्योतिर्दृष्टं तदिन्द्रियैः ॥१४१॥

But, this (light of the inner self) does not belong to the species (or, kind) of the body owing to its being inside and, therefore, is beyond the sense-organs. (And) whatever light is of the species of the body is seen (i.e. grasped) by the sense-organs.

[141]

The objection has *antasthatva* and *atīndriyatva* of the Ātman as the twofold basis of the argument. Sureśvara uses *antasthā-tīndriyatvataḥ* for *antasthatva-atīndriyatvataḥ*.

मैवं नैकान्तिको हेतुश्चक्षुरादीन्द्रियैः स्फुटम् ।
अन्तस्थानि यतोऽक्षाणि प्रत्यक्षाणि न चात्मवत् ॥१४२॥

(Answer:) Do not say so, because the logical basis of the argument does not lead to but one conclusion, since the organs are internal and not directly perceptible even like the inner self. [142]

It is the fallacy of contradicted middle (*bādhita*).

आदित्यादिसजातीयमात्मज्योतिरतीन्द्रियम् ।
अन्तस्थातीन्द्रियत्वाभ्यां चक्षुरादीन्द्रियं यथा ॥१४३॥

And so, the light of the inner self, which is beyond the sense-organs, is of the same species (or, kind/type) as of (the lights of) the sun and others and it is like the organ of the eye on account of its being internal and beyond the organs. [143]

So far the dehātmavādin has argued about the light of the inner self as being of the same species as of the elements. Hereafter, in verse 144 onwards to verse 147 he makes an argument that inference does not help to understand correctly the nature of the light of the inner self.

विशेषेऽनुगमाभावः सामान्ये सिद्धसाध्यता ।
इत्यादिदोषदुष्टत्वाच्च नोऽनुमितिः प्रमा ॥१४४॥

For us (*dehātmavādins*), inference is not (i.e. does not lead to) right knowledge, because it is violated by faults such as absence of inference (of the *vyāpti*) in case (it is) a particular (proposition) and proving (what is already) proved in case (it is) a general (proposition). [144]

The first line is a quotation from *Nyāyamaiṅjari* 1.108.21.

अनुमानबलेनैव देहादिव्यतिरेकतः ।

प्रत्यगात्मा स्वयंज्योतिः साध्यते तच्च नानुमा ॥१४५॥

(For) only through the strength of inference the inner self is proved to be apart (or, distinct) from the body etc. and self-illuminating; (but) (there can be) no inference! [145]

प्रत्यक्षैकप्रमाणेन देहे चिद्धर्मकेऽञ्जसा ।

गृह्यमाणेऽनुमानेन न तच्छक्यं प्रबाधितुम् ॥१४६॥

When the body is (lit. can be) clearly (or, in a smooth way) taken as having the properties of sentience by means of direct perception alone, then it is not possible to stultify that (perception) by inference. [146]

The argument is that there is opposition of inference to direct perception of sentience belonging to the body and the property of the same.

दर्शनादिक्रियां कर्वन्सर्वदाव्यभिचारतः ।

प्रत्यक्षेणैव दृष्टौऽयं देहो नातस्ततोऽपरः ॥१४७॥

This body, which has been performing such activities as seeing etc. invariably is directly perceived and, therefore, it is not any other than that.¹ [147]

¹Or, there cannot be any body beyond a seen body.

In verses 148-149, it is stated that the body is not the Ātman since it is different from sentience.

दर्शनादिक्रियाकारि देहश्चेदभ्यपेयते ।

कस्मादविकलस्यैव दृष्ट्यादिर्न तथेक्ष्यते ॥१४८॥

(Objection:) 'If this body is taken to be that which performs activities of seeing etc., then why is it that seeing etc. is not

noticed as belonging to it when it is not devoid of (sentience)?' [148]

This has a basis in the states of sleep and stupour (i.e. fainting away) when the function of seeing etc. is not perceptible.

नैष दोषो भवेदत्र प्रत्यक्षप्रमितत्वतः ।

न हि दृष्टं समुल्लङ्घ्य ततोऽन्यद्वलवन्मतम् ॥१४९॥

(Answer:) This is not a fault here¹ (as you have put forth), since it is directly perceived, because indeed no other (argument) is considered to be strong in supercession of what is directly perceived. [149]

This is a reply made by *dehātmavādin* who is also a *svārthavādin*. SP clarifies this thus: *dr̥ṣṭam api nyāyavirodhe (na) tyājyam*.

¹Cf. SP: *kādācitkadarśanādarśanayor iti śeṣaḥ*.

Verses 150-152 explain the BUB: *na hi khadyote ...*

भास्वराभास्वरत्वं च प्रत्यक्षेणैव वीक्ष्यते ।

खद्योतस्यानुमानेन न हेत्वन्तरकल्पनम् ॥१५०॥

It is only directly perceived in the case of a glow worm that there is brightness or the absence of brightness; there is no other reason to be entertained in that respect. [150]

This is to point to the absence of some property of a thing which is unseen sometimes as implied in verse 148 above—that may be the result of some adventitious situation as in the case of a glow worm. The absence of brightness of it can be caused by the flutter of its wings!

हेत्वन्तरेऽनुमेये च किञ्चित्सामान्यगन्धतः ।

सर्वं सर्वस्य लिङ्गं स्यात्तच्चानिष्टं प्रसज्यते ॥१५१॥

Also, if an object is to be inferred on the basis of some other logical reason owing to the semblance of some general character, then all can be the indicator of all and there would result what is undesirable. [151]

The argument of this verse is based on the following (faulty syllogism); *vahniḥ anuṣṇaḥ vastutvāj jalavat* and it is answered *na ca vahneḥ anuṣṇatvam yuktam pramitapadārthavyavasthā-dausthyaprasaṅgāt*.

न च नास्ति पदार्थानां लोकेऽसाधारणः क्वचित् ।
स्वभावोऽग्न्यादिकानां हि नोष्णत्वाद्यन्यहेतुतः ॥१५२॥

Further in the world, any characteristic of the things is not uncommon, for being hot etc. which is the nature of fire etc. and is not caused by other causes. [152]

SP carefully points out the Samdhi of *loke* and *asādhāraṇaḥ*.

Verses 153-155 explain BUB: *na ca padārthasvabhāvaḥ*

प्राणिधर्माद्यपेक्षं चेदुष्णत्वादि हविर्भुजः ।
नैवं तत्रापि दोषस्य प्रसक्तेरनिवृत्तितः ॥१५३॥

If it is held that being hot etc. of fire depends on the merits etc.¹ of living beings, it is not so. Even there (i.e. in the case of depending on merits) also necessarily (or contingently) follow the fault since there is no cessation of regress (in the form of dependence on yet another merit). [153]

¹This implies demerits also.

तदप्यस्त्विति चेन्मैवं धर्मादेरप्रसिद्धितः ।
धर्माभ्युपगमे दोषो ह्यनवस्था प्रसज्यते ॥१५४॥

If (you were) to say: 'Let that¹ also be there', 'do not (say) so, since merit etc. are not accepted (by you),² (also) in accepting merit, there arises the fault of infinite regress. [154]

¹This refers to *dharmādyapekṣam*, i.e. *dharmāntarāpekṣam* as understood from the preceding verse.

²Add—in your system.

न चानवस्थया सिद्धिरभिप्रेतस्य वस्तुनः ।
तदलं क्षितितोयाग्निमरुतां परिणामजे ।
चेतोवत्यक्षसंवेद्ये कष्टकल्पनयानया ॥१५५॥

And, owing to infinite regress, there cannot be established the thing which is desired (or, held, by you). Thus (or, therefore), enough of (i.e. give up) this overstressed (*kaṣṭa*) notion of (or, in regard to) the perceptible sentient being which is the product, i.e. modification (resulting) from (the combination of) earth, water, fire and wind. [155]

Verses 156-159 bring out the internal contradiction in (or self-refutation) of the view of Cārvāka.

सर्वतीर्थदृशां सिद्धिः स्वाभिप्रेतस्य वस्तुनः ।
यदभ्युपगमादेव तत्सिद्धिर्वार्यते कुतः ॥१५६॥

Why are you refuting/discarding that [or, why is that being denied/rejected by you] on the acceptance of which the propounders (lit. seers) of all theories have established that? [156]

This refers to the basic concept of all the theorists, viz. what is to be established is the experience of the unknown (or, unexperienced).

प्रत्यक्षेण विरुद्धत्वं न तावदुपपद्यते ।
विषयाभावतस्तस्य प्रामाण्यं दुर्लभं यतः ॥१५७॥

To begin with, being opposed to direct perception is not reasonable, because it is difficult (or, impossible) to accept the validity of it in the absence of any objects to be grasped.

[157]

The thought in the verse is: Only in respect of the Ātman one can posit the Śruti as the means of knowing, but, in respect of everything else, it is direct perception which is capable of proving their existence.

सर्वतीर्थदृशां तावत्सामान्यं मानलक्षणम् ।
अज्ञातार्थाधिगमनं त्वदुक्ते तत्र युज्यते ॥१५८॥

In the case of all the propounders of theories, there is (noticed) one common characteristic of a means of knowing, viz. its capacity to inform others of what is not known. But, in your view, that is not reasonable.

[158]

The idea is: all the direct perception or any means of knowing is not informative of what has been unknown/unobtained.

प्राक्प्रमाणसमत्पत्तेर्देहादेर्विषयस्य ते ।
प्रमाणहेतोः कैः स्यादज्ञातत्वमितीर्यताम् ॥१५९॥

Let it be told that as even before the means of knowing (object) have come into being by which means there can be unknownness (or, the absence of knowledge) of the object, viz. the body etc. which can be known only by some means of knowing.

[159]

Verses 160-164 explain BUB: *anadhigatārthagatṛtvam prāmāṇyam tava ajñātaviṣayāpekṣam*.

स्वतः सिद्धोऽथवासिद्धो देहादिस्ते भवन्भवेत् ।
प्रमाणानां प्रमाणत्वं नोभयत्रापि लभ्यते ॥१६०॥

For you, the body etc. will be either established by itself or non-established, even though certainly existent (*bhavann eva*); but, in both cases, the means of knowing (accepted) would not have the character of being the (authoritative) means.¹

[160]

This verse introduces the impossibility of proving by the means of knowing what is to be known for certain; read NKL (ms. p.583): *prakārāntareṇa prāmāṇyānupapattiṃ vaktuṃ vikalpyati* (SP with *pratyākhyātum* for *vaktum*).

¹This means: There is not any means for knowing what is already known, since *deha* is known (*jñātārthajñāpana*).

प्रमाणान्यन्तरेणापि देहादिश्चेत्प्रसिध्यति ।

वद प्रमाणैः को न्वर्थो न हि सिद्धस्य साधनम् ॥१६१॥

If the body etc. become established, even without any means of knowing; tell me then 'What is the use of the means of knowing?' Indeed there is never any proving of what is already proven.

[161]

The thought in this verse is: A means of knowing is meaningful only if it proves an unknown thing (though in existence) and, therefore, the *dehātmavādin* notices that there is a body etc. even without any means for proving its existence. This is impossible to think of.

स्वतोऽसिद्धेऽप्रमेये च नासतो व्यञ्जिका प्रमा ।

नाभिव्यनक्ति सविता खरशृङ्गं स्फुरन्नपि ॥१६२॥

Right knowledge does not reveal an object which is not established by itself, and which has not been an object of knowledge and is not one that reveals a non-existent thing. The sun, even when it shines, does not ever reveal horn of a donkey.¹

[162]

SP thoughtfully breaks up the Saṁdhi of *siddhe'prameye* into *siddhe* and *aprameye*.

¹This is *khara* in the verse, but SP introduces the stanza by referring to a hare's horn.

प्रमाणव्यतिरेकेण नाप्यसत्त्वं प्रसिध्यति ।
सत्त्ववन्नापि चाभेदे मानमेयौ प्रसिध्यतः ॥१६३॥

Also, the non-existence of anything is not (or, cannot be) established without any means of knowing. Nor can the means of knowing and the object of knowing get established like an existent thing, the two cases being non-different in that.

[163]

यदि मानातिरिक्तार्थोऽमितः संभाव्यते तदा ।
तं बोधयद्भवेन्मानं न तु तत्कुर्वदिष्यते ॥१६४॥

If it is held that an unknown thing exists even when it is without any means of proving it; then, in that case, (beyond/beside) the means of knowing is accepted as one that informs us, not as one that is creating it.

[164]

This verse points out that the means of knowing cannot be a productive cause of the thing to be known; it is only informative of that.

अबुद्धबोधनं मुक्त्वा नान्यत्कार्यं क्वचिद्यतः ।
सत्त्वं वा यदि वासत्त्वं नातो मेये प्रमाणतः ॥१६५॥

Since, except informing of what is not known, there is not anything (else) to be done (by a means of knowing), therefore, there is not existence or non-existence in respect of object to be known with the help of a means of knowing it.

[165]

In verses 166-167, it is asserted that a *pramāṇa* is *ajñātārtha-*

jñāpaka.

मानव्यापारतः पूर्वं सिद्धामेवावबोधयत् ।
शुक्तिकां मानतां याति नासिद्धं रजतादिकम् ॥१६६॥

What informs us about a mother-of-pearl, which has been already existent even before the operation of the means of knowing it, becomes a means of knowing, but it is not (a means of knowing which informs us) of the already non-existent silver etc. [166]

शुक्तौ रजतविज्ञानाच्छुक्तिवन्नामितं यतः ।
रजतं विद्यते किञ्चिद्विज्ञातं चात्मवस्तुवत् ॥१६७॥

Since, there does not exist silver as a mother-of-pearl, even before the silver in the mother-of-pearl was not known; therefore, it is not like the thing, viz. the Ātman, which has been already known (to everyone). [167]

The verse points to the wrong apprehension of silver in a mother-of-pearl as contrasted with the inner self of which everyone is aware.

Verses 168-170 establish that a mother-of-pearl is not supported by any pramāṇa.

नातिरेकान्वयाभ्यां यद्वस्तु संभाव्यते कथम् ।
तत्प्रति स्यात्प्रमाणत्वं शुक्तिकारजते यथा ॥१६८॥

How can there be authoritativeness of a means in respect of that thing which cannot be said to be in existence by means of showing the Anvaya and the Vyatireka of the same as it is in the case of the silver seen in a mother-of-pearl? [168]

The character of a means of knowing as informer of what is expressed and is yet to be known cannot occur in the mistaken

awareness of silver in a mother-of-pearl.

किं मानसंगतेरर्थे जातेयमवबुद्धता ।

किं वा प्रागपि संबन्धाद्बुद्धोऽर्थोऽभून्न मानतः ॥१६९॥

(Let this be clarified:) Was this character of having been known there (in the silver in a mother-of-pearl) produced by its association with any (other) authoritative means of knowing, or was it there even before its association with that so that this known thing, viz. the silver, is to be known without any means of knowing? [169]

बोधात्मकत्वं च मितेः किमासीन्मेयसंगतेः ।

प्राग्वा मेयाभिसंबन्धान्मितेर्बोधात्मता भवेत् ॥१७०॥

Or, did right knowledge consist in the nature of the awareness (on the part of the knower), because of its being in association with the object to be known? or, could there be (the nature of it) already (i.e. even) before its association with the object to be known? [170]

Verses 171-174 affirm that anubhava makes known the ajñātatva of object.

नार्थानधिगतत्वं च प्रमाणेभ्यः प्रसिध्यति ।

रूपानधिगतत्वं नो न श्रोत्रादेः प्रमाणतः ॥१७१॥

Not again does the unknownness of an object get established by (or, with the help of) the means of knowing. (For example,) the unknownness of a form is not acquired by us through the means of hearing etc. [171]

मानव्यापारतश्चेत्स्यान्मेयानधिगतिस्तदा ।

तद्व्यापारात्पुरा मेयः स्यात्स्वतोऽधिगतात्मकः ॥१७२॥

If the unknownness of an object to be known comes from

the activity (or, operation of a means of knowing), then, even before the operation of the same, the object to be known should have been an already known object. [172]

यत एवमतोऽवश्यं प्रमाणव्यापृतेः पुरा ।
मेयोऽनधिगतः सिद्धो ह्यभ्युपेयोऽवबुद्धवत् ॥१७३॥

Since this is so, the object to be known is to be accepted, like (every other) unknown object, as what was certainly not known before the means of knowing has been operative. [173]

न चानाहितसन्मानस्वतश्चिन्मात्रविग्रहात् ।
प्रत्यगैकात्म्यतोऽन्यत्र यथोक्तां धुरमुद्धहेत् ॥१७४॥

And, the inner self, (merely) by having a body in (the form of) sentience alone, cannot bear the said burden, when a proper (i.e. good/valid) means of knowing (it) has not been operative, elsewhere (when it is) than in oneness with the Ātman.¹ [174]

This statement aims to emphasise that the sentient inner self alone can determine what can be described as *ajñāta*.

¹Cf. SP: *anāhitam viṣayīkartum na pravartitam nirduṣṭam mānam yatra svataś cinmātrarūpe tatpratyaqbhūtam aikātmyam tadatirekeṇa pramāṇabalān nājñātatvādi siddhyatīty arthaḥ*. Yet, remaining unsatisfied, SP offers an alternative explanation thus: *ad vā yad anāhitam anādy anantaṁ sadekatānam sarvasādhakam svataś cinmātraśarīram pratyaqbhūtam aikātmyam tadatirekeṇa pramāṇato 'jñātatvādi siddhyatīty arthaḥ*. Our translation follows the first alternative.

We have introduced the text of the first line of the verse from AnSS edition, yet we suspect that the line should be read: *anāhitasanmānam svataś* (referring to *pratyak*):

Here Sureśvara emphasises that the inner self (*anubhava*) alone can be considered as the self-establishing means. But any other means of knowing cannot exist by itself. That is, unless it is

related to some other existing object of knowing.

Verses 175-178 oppose that *ajñātatva* can be known with the help of some means of knowing.

न ह्यज्ञाते यथा ज्ञाते विशेषणविशेष्यता ।
ततश्च नैतत्संसिध्येदज्ञानादि प्रमाणतः ॥१७५॥

Indeed, there does not exist, the relation as the specifier and the specified in¹ respect of what is not known (before) as (there exists) in respect of what becomes known. And, from this, ignorance etc. (about a thing) gets established from some (other) means of knowing. [175]

This verse seeks to emphasise that ignorance of a thing before and the knowledge of it later depends only on one's experience.

¹Naiyāyikās postulate a special contact of a sense (e.g. an eye) with negation, e.g. of a pot on the ground, technically known as *viśeṣaṇaviśeṣyatā* 'the relation of the qualification and the qualified' to explain the perception of a negative entity (e.g. absence of a pot on the ground).

प्रमाणाच्चानधिगतौ तन्निवृत्तिः कुतो भवेत् ।
न दाहज्वरनुत्थर्थमग्निना स्याद्विषविक्रया ॥१७६॥

Again, that (ignorance) which is not known by any means of knowing, how could that disappear (withdraw itself)? Indeed, there cannot be (useful) any activity of a physician, with fire as its means, for the removal of burning fever. [176]

साक्ष्यमातृप्रमारूपं मानभूमौ यथेक्ष्यते ।
नाज्ञातेऽनुभवादेशां कश्चिदन्यस्तथेक्ष्यते ॥१७७॥

As, in this field of a means of knowing, it is expected that there are forms of what is to be perceived, of the perceiver and of right knowledge; so, in respect of what is unknown

there is not expected any means of knowing other than experience (*anubhava*). [177]

Sureśvara brings out the unique character of the experience of the Ātman in comparison with the knowledges of various external objects by different means of knowing.

प्रमाणव्यापृतेरुर्ध्वं ज्ञाताज्ञातद्वयं मिथः ॥
संधत्तेऽनुभवेनैव न तदन्येन केनचित् ॥१७८॥

That pair of the known and the unknown gets united only after the means of knowledge has (or, have) operated, through the experience (of the pair) and not by any other means. [178]

The witness gets established by itself, even before the operation of any means.

यदि नाम न मानानि व्याप्रियन्ते विनिश्चितेः ।
प्राक्तथाप्यपलापोऽस्या नानुभूतेर्घटादिवत् ॥१७९॥

If, indeed, the means of knowing are accepted as not operative before the decision was arrived at, there cannot be the denial of experience (i.e. the inner self) as that of a pitcher. [179]

एवं सिद्धेऽप्यनुभवे स्वमहिम्ना पुरा मितेः ।
प्रमाणोत्पत्तिरन्वेष्ट्या प्रत्यग्ध्वान्तापनुत्तये ॥१८०॥

Thus, when experience (i.e. the inner self) being established, on its own strength, before its being known (by other means) one has to look for the existence of the means (of knowing it), in order that the darkness about the inner self is removed. [180]

verses 181-185, it is argued that the witness cannot remove ignorance unless there has occurred knowledge with the help

of the means of knowing.

अवबुद्धस्वभावोऽपि सहतेऽनवबुद्धताम् ।
वस्तुत्वान्न तमो हन्ति तथापि प्रमितिं विना ॥१८१॥

(The inner self), though its own nature is known, does tolerate (i.e. allow) the state of its being unknown, but, being the real thing it does not remove ignorance (i.e. the darkness) without getting the knowledge of it (through the means of knowing).

[181]

Verse 181 expresses the same idea as in the preceding verse.

प्रमाणफलकारुढं स्वतमो हन्ति नान्यथा ।
वस्तु मेयाभिसंबद्धं मानं तद्वत्तमोपनुत् ॥१८२॥

The (real) thing, when united with (lit. mounted on) the board of some means of knowledge, can destroy darkness, not otherwise. Similarly, a means of knowledge, (only) when associated with object of knowing can be the remover of darkness about that (viz. the real thing).

[182]

प्रत्यक्षमानसिद्धयर्थं तस्मात्प्रत्यक्षवादिना ।
प्राङ्मानादभ्युपेयोऽर्थो योऽज्ञातत्वादिसिद्धिकृत् ॥१८३॥

Therefore, in order to establish the direct perception as the means of knowledge, the theorist, who propounds merely direct perception (as source of knowing), has to accept that, even before that means of knowing became operative, there was that object of (its) knowing in existence, so that it effected the unknownness etc. of it.

[183]

वागादिव्यापृतेः कर्ता शब्दादिगुणलाञ्छितः ।
प्रत्यक्षो गम्यते मात्रा प्रतीचोऽत्यन्तभेदतः ॥१८४॥

The agent of the activities of speech etc., which is possessed

of the properties, words etc., is directly perceived by the knower as apart from the inner self, on account of its extreme difference (from it). [184]

श्रोत्रादिव्यापृतो माता दुःखादिगुणवान्पराङ् ।
कर्तेवानुभवेनैव प्रतीचा गम्यतेऽञ्जसा ॥१८५॥

The knower, who has been engaged in (the activity of) the ear etc., is possessed of the properties, viz. misery etc. and external, is smoothly experienced as the agent (of those activities), only by experience (i.e. inner self). [185]

Verses 186-188 conclude that the inner self is self-luminous and is destroyed every sin.

अनन्यानुभवः प्रत्यङ्ग प्रमात्रादिगोचरः ।
यतोऽपहतपाप्मादि युक्तं स्यात्तद्विशेषणम् ॥१८६॥

Since the inner self does not experience any thing else than itself and is not an object to be known through the help of the knower etc.;¹ therefore, it is only proper that there are qualifiers of it like one whose sin is destroyed etc. [186]

¹The word *ādi* refers to activities and the means of them.

लोकायतस्य बौद्धस्य कणभोज्याक्षपादयोः ।
प्रत्यक्षेणैव मानेन विमुखीकरणं कृतम् ॥१८७॥

In respect of the Lokāyata, the Bauddha, (the followers of) Kaṇāda and Akṣapāda, there is (thus) a clear refutation, effected by only that means, viz. direct perception (of the inner self). [187]

This verse refers only to those who do not regard the scripture as informative of the Ātman and who hold only logic (or, rather, direct perception) as the means of knowing.

प्रमाणफलयोर्भेदस्तथा मानप्रमेययोः ।

स्वतःकूटस्थचित्सिद्धिरैकात्म्यं चानुभूतितः ॥१८८॥

Also, there is distinction between the means of knowing and the result which is achieved by (i.e. comes from the relation of) the means of knowing and the object of knowing. The existence of the immutable sentience is established by itself and the singleness of the self is by experience. [188]

Verses 189-198 establish that the Ātman is the cause of direct perception etc. becoming authoritative means of knowing.

प्रत्यक्षं मानमेवेदमिति यस्मात्प्रसिध्यति ।

प्रत्यक्षदृक्स्वयंज्योतिस्तदात्मेत्यभ्युपेयताम् ॥१८९॥

मेयादींस्तदभावं च संशयानृतनिश्चयान् ।

विविच्य योऽनुगृह्णाति शब्दादींश्च जडान्पृथक् ॥१९०॥

Therefore, may you accept that there is the Ātman, the inner self, the seer, the self-illuminating direct perceiver (of all things) and (the one) light on account of whom there can be established direct perception as the means of knowing; [189] (and also) the one, who favours a knower by distinguishing between (the presence of) the objects of knowing as also their absence, and discriminating between doubt, falsehood and definite knowledge and further the insentient word etc. as apart from one another. [190]

These two verses point to the entire world of the means of knowing and the consequent knowledge of the same as dependent merely on the inner self which is sentient.

देहेन्द्रियमनोबुद्धीः सुखादींश्च घटादिवत् ।

तमेकमन्तरात्मानमप्रत्यक्षं प्रपश्य भोः ॥१९१॥

Indeed, my dear sir (*bhoh*), see just as a pitcher etc. that

the single inner self, who does not directly see just as a pitcher etc. that single inner self, and the body, the organs, *manas*, the intellect, happiness etc. (as well) [191]

In this verse, there is a mild rebuke to one who does not want to accept the existence of the inner self as he does that of a pitcher.

द्रष्टृदर्शनदृश्यांश्च यः स्वप्ने प्रसमीक्षते ।
तदभावं सुषुप्ते च स आत्मेत्यभ्युपेयताम् ॥१९२॥

Let it be known that that who well sees (*prasaṁīkṣate*) in the dream state the seer, the act of seeing and the objects to be seen and also, in the deep sleep state, the absence of them is the Ātman. [192]

चक्षुरादीन्द्रियाणां च न च स्वप्नेऽस्ति संभवः ।
सुषुप्ते चानुभूतिस्तु तयोरव्यभिचारिणी ॥१९३॥

Further in the dream state the existence of the organs such as the eye etc. is not possible yet, in the deep sleep state, the experience of both¹ of these is unfailing. [193]

¹The word 'both' includes the waking and dream states.

प्रमाणं मेयविषयं तत्फलं मातृसंश्रयम् ।
यत्साक्षिकं द्वयं सिध्येत्स आत्मेत्यभ्युपेयताम् ॥१९४॥

An authoritative means of knowing has for its object the things to be known and the result (lit. fruit) of that abides in (or, occurrence to) the knower (of them). (Therefore,) let that be known as the Ātman on account of whose being the witness there is said to exist the pair, viz. the means of knowing and the knower. [194]

मानस्य हि फलं यत्र न तन्मानस्य गोचरः ।

तस्य मेयैकनिष्ठत्वात्फलं तु स्यात्प्रमातरि ॥१९५॥

That in whom there accrues the result (lit. fruit) of (the operation of) the means of knowing that cannot be the object of the means of knowing, since that operates only in (i.e. is related only to) the object of knowing. The result would, nevertheless, be accruing to the knower (viz. the inner self).

[195]

This is to point to the distinction between the means of knowing and the one who profits thereby, i.e. it distinguishes the knower (the Ātman) from the means of knowing (i.e. the body and its organs etc.).

प्रत्यक्षं वर्तते यत्र तत्फलं तत्र नेक्ष्यते ।

तत्फलं वर्तते यत्र मानं तत्र न वर्तते ॥१९६॥

Where there obtains (the means, viz.) direct perception, there is not accepted the existence of the result of it (i.e. the object to be known, lit. result from it) and, where the result of that (means) obtains, there does not obtain the means of knowing.

[196]

tatphalam in both the lines mean *pratyakṣaphalam* and, in the first line, it is related to the knower. The verse refers to the difference between the means of knowing and the knower.

एवं सति प्रमामातृफलमेयात्मनां तव ।

कुतः प्रत्यक्षतासिद्धिर्यदि नात्माभ्युपेयते ॥१९७॥

This being so, how could there be, for you, the possibility of establishing that direct perceptibility in the case of those that have the nature of being the knower, knowledge and the object of knowing, if (the existence of the Ātman is not accepted?

[197]

It appears that the AnSS edition has used the word *pramā* in the sense of *pramāṇa*. Further noted the variant reading *pramātrtvaphala*- note in the edition—but, in that case, the word *mātr* is omitted.

The introduction in SP: *mātrāder mānāviṣayatve...* indicates that variant reading is less acceptable.

व्यभिचारिषु सर्वेषु प्रत्यगात्मैकसाक्षिषु ।
प्रत्यक्प्रत्यय एवैकः सर्वत्राव्यभिचारवान् ॥१९८॥

While, then, all these, which have the seer in (the form of) only the inner self, are variable, there is only experience within (viz. the Ātman) as invariable everywhere (or, at all times).

[198]

The reference to variability of those related to experience as the mechanism of knowing points to the correctness of reading in the preceding verse.

In this verse, i.e. 199, there is now the conclusion of the discussion about the witness as distinct from the body.

एवं प्रत्यक्षतस्तावद्देहादिव्यतिरेकतः ।
तथानुभवतः साक्षादात्मायं प्रतिपादितः ॥१९९॥

Thus, on account of the distinction (of it) from the body etc. being directly perceptible, and also from experience (it becomes clear that here) it is the Ātman that is talked about (or discussed by all thinkers).

[199]

Verses 200-201 show that the reasons adduced by the prima facie view are not sound.

यच्चैतत्कृष्णसर्पादिदृष्टान्ताद्भवतोदितम् ।
अहं मनुष्य इत्यादि तत्र प्रतिविधीयते ॥२००॥

And, as to what you have said, viz. 'I am a man' etc. on the basis of (or with the support of) the illustration of a black serpent etc.,¹ there now follows an argument in refutation. [200]

¹This has reference to verse 118 above.

चैतन्यं कायधर्मश्चेन्मनुष्योऽसाविति प्रमा ।
असाधारणतो न स्यादहं वेद्मीतिवत्तदा ॥२०१॥

If (the) sentience is (taken) as a property of body, then the knowledge that it is a man would not arise (lit. be) on account of its being uncommon like (the knowledge or awareness expressed in the words) 'I know'. [201]

The argument is: sentience, being a property of body, the experience that 'I am a man' would not be peculiar to only one body and it would refer to a number of bodies. Such is not the matter of fact, when a person says 'I know'—for this would point to only one particular individual.

In verses 202-212, it is argued that there would be only disorder in the things of the word, if sentience were accepted as a property of a body.

समवेतं हि यद्यत्र चैतन्यं स्याच्छरीरके ।
तस्यैव तद्ववेत्साक्षान्नान्यदेहाश्रितस्य तत् ॥२०२॥

Wherever in a body sentience would be invariably associated it (sentience) would be directly perceived only in that (body), (and) that would not be belonging to any other body. [202]

The point of argument is: sentience cannot be a property of body and it pervades all the bodies (therefore, there is directly perceived the experience in 'I am' with reference to any one of them. This indicates the all-pervading experience of sentience.

करणव्यापृतिं चर्ते मनुष्योऽस्मीति धीर्भवेत् ।
पूर्ववन्न तु तत्तादृग्देहाद्विन्ना ततश्चितिः ॥२०३॥

Also, there would not result the awareness, 'I am a man', as before, without the operation of the organs (or, the means of knowing), but, it is not distinct from the knowledge of body; therefore (it is to be accepted that) there is sentience (as a property) not belonging to the body). [203]

न चाहंबुद्धिनिर्ग्राह्यमिदं धीग्राह्यगोचरः ।
विरोधात्त हि शीतत्वमुष्णस्याग्नेर्विशेषणम् ॥२०४॥

So also, what can be grasped as knowledge of myself (lit. I) is not an object which can be grasped in the knowledge 'This one is', because of the mutual difference; indeed being cold cannot be a specifier of hot fire. [204]

On this point, NKL (ms. p.586)) makes a brief and yet clear remark: *ahamdhīvedyaṃ caitanyam idaṃdhidedyadehaviśeṣaṇam na bhavati pratyaktvaparavirodhād ity arthaḥ*.

कायस्यापि न चैतन्यमेवमेव विशेषणम् ।
विरोधिना जडत्वेन व्याप्तेः किमु परस्य तत् ॥२०५॥

In this very way, sentience cannot be a specifier of the body, because of its pervasion by insentience which is its opposite. What to say (i.e. how could it be said) then that (it is a specifier of any) other (than the body)? [205]

विशेष्यमपि नाप्नोति धर्मान्तरविशेषितम् ।
विशेष्यमात्रनिष्ठत्वादन्यत्र स्यात्कथं नु तत् ॥२०६॥

Even what is to be specified does not come to be specified by any other property,¹ because (the distinct property of it) belongs only to what is to be specified; how, indeed, could

that be elsewhere than in that.

[206]

This verse explains the thought in the preceding verse more specifically. This is to mean: If sentience could not be taken to be the specifier of the body, it would not be a specifier of any other.

¹Also *viśeṣita* is to be understood with *viśeṣaṇena*.

विशेषणविशेष्यत्वे संगतिश्चेद्वेत्तयोः ।

एकप्रत्ययगम्यत्वं स्यात्तदा कृष्णसर्पवत् ॥२०७॥

If there would have been an association together of those two (viz. sentience and body), owing to their being the specifier and what is specified (by it); then, there could have been the occurrence of them together only in one cognition as in (the cognition of) a black serpent.

[207]

This is another argument to assert that sentience and body cannot be related as a property and the substance which is possessed of it. These two are noticeable in different objects, the property, viz. black and a serpent are noticed in only one object. In other words, a *dharma* and *dharmin* have an invariable association (that is, the relation *samavāya*); but it does not obtain between sentience and body, whereas it is seen to obtain in black and serpent as in a black serpent?

आविद्वदङ्गनाबालं देहादौ घटवन्मतिः ।

पृथक्त्वेन भवन्तीयं कथं स्याच्चिद्विशेषिता ॥२०८॥

Thus, this awareness in respect of a body etc. occurs among persons, from a knower to women and children as in the case of a pitcher. How could that awareness, being peculiar, be considered as specified?

[208]

Sureśvara argues: the awareness 'this is a pitcher' is peculiar to one pitcher. And the awareness of this body etc. as associated

with sentience is similar to the same and; therefore, can belong to only the particular body; how could that belong to all bodies, without exception.

Verses 209-214 affirm that direct perception, though related to an object perceived, cannot belong to the knowing self.

मातारमपि नाप्नोति यत्प्रमेयैकनिष्ठितम् ।

प्रत्यक्षं तस्य का शक्तिः स्वार्थायां चिति वर्तितुम् ॥२०९॥

And, that (means of knowing, viz.) direct perception cannot belong (only) to the object of knowing. How can it have the power to specify sentience as an object to be referred to (by it)? [209]

असाधारणरूपोत्थज्ञानेनैव प्रमीयते ।

यथा घटस्तथैवात्मा नानात्मप्रत्ययप्रमः ॥२१०॥

As a pitcher is grasped only by the cognition which arises in a peculiar form (of something), so is not the Ātman which becomes known from (only) one's awareness of some non-Ātman (objects)? [210]

स्वार्थं सन्न परार्थस्य स्वातन्त्र्यात्स्याद्विशेषणम् ।

न च चैतन्यमिदं किञ्चित् चैतन्याल्लभ्यते पृथक् ॥२११॥

Being a referent to a certain object, a specifier cannot be a referent to another, with (every/any) liberty. And, further, that which refers to (lit. leads to the knowledge of) sentience, cannot obtain elsewhere than in (that) sentience.¹ [211]

¹ Namely, obtain apart from sentience.

ग्रहीत्रेव हि चैतन्यमात्मनोऽनात्मनस्तथा ।

ग्रहीतुर्ग्राह्यता लोके न न्यायेनोपपद्यते ॥२१२॥

It is only sentience that can be the cognizer of the Ātman as well as of the non-Ātman; therefore, the character of being an object of cognition cannot be reasonably attributed to the cognizer. [212]

प्रत्यक्तया विभिन्नस्य चैतन्यस्य विशेषणम् ।
पराकत्वान्नापि कायः स्याच्छीततेव विभावसोः ॥२१३॥

Not also can a body being quite distinct from (i.e. outside) sentience be the qualifier of sentience, which is inside (the body); this is like coolness which is distinct from fire. [213]

पारिहार्यादिगं हेम्नि प्रमाणं मेयनिष्ठितम् ।
कथमात्मचित्तौ तत्स्यात्तद्विरुद्धार्थसिद्धये ॥२१४॥

Also how can a means of knowing (e.g. direct perception) related to gold existing in bracelet etc., which is an object to be known by that means, be a means of cognizing the Ātman, i.e. for establishing a thing which is opposite of it in nature? [214]

Verses 215-219 go to refute the idea of the origination of sentience from the elements.

भूतेभ्यश्च चिदुत्पत्तिर्न प्रत्यक्षप्रमाणिका ।
भूतान्वयस्य चासत्त्वान्नापि लिङ्गात्प्रसिध्यति ॥२१५॥

And the origin of sentience from the elements does not have direct perception as the means of knowing it and, owing to the absence of its association with the elements, it (viz. sentience) cannot be proved through *linga* (i.e. inference). [215]

मृतोऽस्मीत्यपि संवित्तिश्चैतन्यापगमे कुतः ।
जाड्यात्स्यान्नापि कायस्य चिदभावश्चित्तेः कुतः ॥२१६॥

How again can there be on the part of a person the cognition,

viz. 'I am dead' when sentience has departed (from him), owing to (the presence only of) insentience? So also, how could (there be the awareness that) there is absence of sentience, unless there had been sentience (existing earlier)?

[216]

नापि स्वप्नानुभूतेश्च मिथ्यात्वं स्वप्नवन्मतम् ।
बोधानुभववत्तस्या बाधको नेक्ष्यते यतः ॥२१७॥

Nor also is the falsehood of experience (i.e. the inner self, the experiencer) in a dream considered like that of a dream(-object) because there is not noticed any stultifier of it like the experience in the waking state which is associated with it.

[217]

This refers to the argument in verse 131 above.

वायोरपि समुत्क्रान्तिः प्रत्यक्षान्नावसीयते ।
चित्तेस्तद्भावभावित्वाद्वायुरेवास्तु चेतनः ॥२१८॥

The departure of the wind from a body also is not determined on the basis of direct experience therefore; let wind itself be sentience inasmuch as it is capable of producing sentience by its (own) being.

[218]

This refers to the argument in verse 128 above.

चैतन्यं भूतकार्यं चेत्कायवत्तिष्ठतां चितिः ।
चितिवन्नश्यतां यद्वा कायोऽयं हेतुनाशतः ॥२१९॥

If sentience were the product of the elements, may then sentience stand as a body; or, let this body perish (i.e. disappear) just like sentience owing to the destruction of its cause (viz. the elements).

[219]

In verses 220-223, it is argued that the body in the dream state

could also be real like the body in the waking state.

जाग्रच्छरीरवच्चेत्स्यात्स्वप्नकायोऽपि भूततः ।
सत्यभूतैकहेतुत्वान्मिथ्यात्वं तस्य किंकृतम् ॥२२०॥

If the body in the dream state has also originated from the elements even as the body in the waking state, then, on account of what could there be unreality of it (viz. the body in the dream state), when the cause of its origin is real, viz. the existing elements? [220]

सत्यो वा यदि वा मिथ्या स्वप्नदेहोऽभ्युपेयते ।
चित्तेरव्यभिचारित्वात्तथापीष्टं प्रसिध्यति ॥२२१॥

The body in the dream, be it accepted as real or as unreal, there would be the unfailing (existence of) sentience in it and, in that case, would get proved (what we have posited as truth). [221]

तस्मान्नृहस्तिदेहादौ जाग्रत्स्वप्नादिभूमिषु ।
भिन्नः शरीरतः सिद्धः प्रमाता प्रत्यभिज्ञया ॥२२२॥

Therefore, it is settled that in the bodies of a man or an elephant etc., and in the states of waking or dream etc., the knower is proved as distinct from the body through recognition. [222]

There was already a reference made to *pratyabhijñā* in verses 129-131 above.

देशकालवयोजातिरूपशक्त्यादिभेदतः ।
देहे न प्रत्यभिज्ञा स्याज्जाते स्मर्तारि युज्यते ॥२२३॥

And recognition does not occur in the case of a body in respect of its differences (from other bodies) in place, time, age, species, form and capacity etc.; it (viz. recognition) is

understandable (only) in case the one who recollects was born.

[223]

This verse points out the vyāptibhaṅga in respect of anugrāhya and anugrāhaka as belonging to one species.

अनुग्राह्यसजातीयं न च प्रत्यक्षमानिनः ।

ज्योतिः साधयितुं युक्तमनुमानद्विषः सतः ॥२२४॥

And it is not proper for one who holds (only) direct perception as the means of knowing, (at the same time) hating inference (as a means of knowing) to posit a light as belongs to the species of what is to be favoured.

[224]

Verses 225-228 refute the hypothetical sājātya.

सजातीयगिरा चात्र भवता किं विवक्षितम् ।

सामान्यमथवा व्यक्तितर्यदि सामान्यमुच्यते ॥२२५॥

सजाति नास्ति सामान्यमनवस्था तथा सति ।

निःसामान्यानि तेनाहुः सामान्यानीति वादिनः ॥२२६॥

(And tell me again) what is intended (or, held, lit. mentioned) by you in the (use of the word *sājātya* 'belonging to the same species'); whether it is generality or individuality? If it is understood (lit. mentioned as) generality;

[225]

then, generality cannot have any other thing which belongs to the same species; for that being so, there would result *infinite regress*. For that reason, those who are engaged in (this) discussion have stated that generalities do not have (any) generality among them.

[226]

SP states by way of conclusion of the verse: *uktam hi—āmānyaviśeṣeṣu sāmānyaviśeṣābhāvāt tata eva jñānam iti.*

भौतिकत्वेन चेज्ज्योतिर्देहानुग्राहकं मतम् ।

देहेऽपि तस्य सद्भावनापेक्षा स्यात्तदा रवौ ॥२२७॥

If it is held that the light (of the sun and others) is helpful to the body on account of its being made up of the elements; then, there being a (continuous) existence of the same even in the body, there would not be any need of the sun (etc. as helpers). [227]

विशेषश्चेदपेक्ष्यः स्याद्यो देहेऽस्मिन्न विद्यते ।
नानुग्राह्यसजातित्वं तस्यानुग्राहकत्वतः ॥२२८॥

If again it is held that some particularity (of that light) is expected; then it does not exist in the body; the character of belonging to the same species as of what is to be helped does not, therefore, belong to it, on account of its being the helper. [228]

This verse points out that the sun etc. cannot belong to the same species as of a body.

देहात्स्याद्विन्नजातीयं वस्तु देहावभासि यत् ।
विवादगोचरापन्नं भास्वरत्वाद्भवीन्दुवत् ॥२२९॥

If that thing which reveals the body, belongs to a species different from that of the body; then it becomes the subject matter of dispute on account of its being luminous like the sun and the moon. [229]

This verse points to actual vyāptibhaṅga.

नानुग्राह्यसजातीयं नाप्यनुग्राहकं तथा ।
घटौ घटं रविर्वेन्दुं नानुगृह्णाति कुत्रचित् ॥२३०॥

Also, what helps is not of the same species as of what is to be helped (for) nowhere does a pitcher help (another) pitcher, nor does the sun (help) the moon. [230]

Verses 231-232 explain *niyamadarśanāt* in BUB and point out illustrations of the presence of *anugrāhya-anugrāhaka* relation between things of the same species.

सजातीयासजातीयैर्देहोपकृतिरिष्यते ।

क्ष्माबग्निवायुभिः साक्षान्नातो नियम इष्यते ॥२३१॥

It is accepted by you that there is a direct favour made for the body by what belongs to and what does not belong to the species of it, viz. earth, water, fire and wind (as helpers of a body); therefore, no rule (in this regard) is (i.e. can be) accepted. [231]

विजातीयोपकारश्चेद्भवता नाभ्युपेयते ।

चतुर्भूतात्मको देह इत्येतत्कथमुच्यते ॥२३२॥

If you do not accept that the favour is done by what does not belong to the same species as of the body; then, how is it stated (by you) that the body is of the nature of four elements? [232]

The argument is: Four elements, which do not belong to the same species as of one another and also of that of the body, how can the *dehātma-vādin* reject the idea of help offered by what does not belong to the same species as that of the helped.

Verses 232-234 state the illustration of *abhāva* as helpful to others.

अभावोऽप्युपकुरुते लोकेऽस्मिन्भाववद्यतः ।

नातोऽनुग्राहकत्वादिनियमोऽयं समञ्जसः ॥२३३॥

Since (it is noticed that) in this world a negative entity also helps an entity, just like a positive entity; therefore this rule of yours, i.e. regarding the helper etc.¹ is not reasonable. [233]

SP cites here the example of a thorn which beomes helpful

to any walker by its absence. Thus the absence of something, whether or not it belongs to the same species can be helpful.

¹The word *ādi* refers to *sājātya*.

पार्थिवैः पार्थिवस्याग्नेरुपकारो यथेन्द्रैः ।
वैद्युतस्य तथैवाद्विरुपकारः समीक्ष्यते ॥२३४॥

As an earthly pieces of wood offer help to fire which belongs to the earth, so also is help noticed to be offered by waters to the fire in lightning. [234]

The instance in the verse points to the absence of *sājātya* in things which are helpful to others.

Verses 235-238 point to the absence of any rule regarding not doing any help.

अद्विः काष्ठैश्चोपकारः पावकस्यैव वीक्ष्यते ।
अग्न्यम्बुभिश्च शमनं तथाग्नेरेव दृश्यते ॥२३५॥

And, the help is noticed to be made by waters and pieces of wood only to the fire; so also is noticed the extinction of the very fire by the waters in the fire, while it is (existing in lightning). [235]

This verse points out that a rule regarding *sājātya* or *vaijātya* of the helper and the helped is not necessarily to be accepted. This is clarified in the next verse.

सजातीयासजातीयनियमोऽतो न युज्यते ।
उपकारापकारत्वे पूर्वोक्तेनैव वर्त्मना ॥२३६॥

Therefore, this rule regarding the oneness of species and the distinction in respect of the species is not reasonable. The qualities of being helpful or of not being helpful (do obtain) there, in the way stated before. [236]

This refers to the two preceding verses.

Verses 237-238 refer to the argument in the *prima facie* view mentioned in verse 142 above, which pertains to *antahsthatva* and *atīndriyatva* of *ātmajyotis*.

यच्चाप्यक्षैरनैकान्त्यं हेतोरभिहितं पुरा ।
तच्चाप्यसत्त्वयाभाणि धर्मित्वेन परिग्रहात् ॥२३७॥

As to what you have said about the argument, in respect of the (different) organs as leading to more than one conclusion, that also is (to be held as) false, since you have accepted (lit. said) that is accepted by you as having them (viz. the organs) as properties.

[237]

सेन्द्रियस्यास्य देहस्य पुरुषोक्त्या परिग्रहात् ।
न ह्येकदेशः साध्यस्य दृष्टान्तत्वाय कल्पते ॥२३८॥

Owing to the acceptance of this body as being possessed of the (different) organs in the statement about a person, (if follows that) indeed a part of what is to be proven cannot be mentioned as an illustration.

[238]

SP on these two verses is very prolix and can be read with profit.

Verses 239-240 pertain to the *prima facie* view on 239 in regard the *Ātman* to be inferred.

लिङ्गस्य मात्वसंसिद्धौ दूषणं दूषणं भवेत् ।
विशेषेऽनुगमाभाव इत्यादि यदुदीरितम् ॥२३९॥
सामान्येतररूपत्वात्साध्यस्याग्न्यादिरूपिणः ।
अपि दोषद्वयं न स्यादेकरूपे हि शङ्क्यते ॥२४०॥

As to what is said: (i) there is fault in accepting (as a rule)

inference leading to right knowledge,¹ and (ii) with regard to a particular, it (viz. inference) cannot be useful;² it has to be considered a faulty argument. [239]

Since in the case of fire etc. which are the object(s) to be inferred, there are (two) forms, viz. (i) a general form and (ii) particular form(s); there cannot (lit. should not) arise the two faults. There is scope for your doubt only when there exists an object in just one form. [240]

Here now begins the refutation of the *prima facie* view stated in verses 144-147 above; it refers to *siddhasādhyatā*.

The *prima facie* view is about the real nature of the body which is directly perceived and, therefore, leaves no scope for inference (of it).

¹The *prima facie* view is: *anumānam mānam eva na*.

²With reference to an *ekarūpa* object, one could raise the objection: *vyāptyabhāva*. This is because, according to the Siddhāntin, the Ātman has not two distinct forms, viz. *sāmānya* and *viśeṣa* and thereby leaves no scope for *aumāna*.

न चेन्द्रियाणि ते सन्ति प्रत्यक्षैकप्रमाणिनः ।

अनुमानादृते तेषां संसिद्धिर्नेष्यते यतः ॥२४१॥

And, for you, who hold only direct perception as the means of knowing, there do not (lit. cannot) exist the organs of sense, because establishing (the existence) of them is not be accepted (by you) in the absence of (i.e. without the acceptance of) inference (as a means of knowing). [241]

ग्राहकग्रहणग्राह्यभावाभावविभागवित् ।

स्वार्थमन्यानपेक्षं सच्चैतन्यं नाक्षमानगम् ॥२४२॥

Indeed, sentience, which is a knower of (such) distinction (as) what grasps (cognizes), the act of grasping, what is to be grasped, the positive entity and the negative entity and what is existent for its own purpose and without any expectancy

of (or dependence on) another thing, it is (certainly) not grasped by direct perception. [242]

In verses 243-244 it is pointed out that there is absence of sentience in case there is no body present.

न च तद्भावभावित्वं व्यतिरेकाप्रसिद्धितः ।
देहाभावे ह्यभावोऽस्याश्चित्तेः स्यात्किंप्रमाणकः ॥२४३॥

And, without establishing (its existence) apart (from the body), there cannot be its existence only while there is existence of the body; indeed, by what means (of cognition) is there (proved) the absence of this sentience while there is absence of the body? [243]

अनुमानाप्रमाणत्वं न प्रत्यक्षेण साध्यते ।
लिङ्गेनापि तत्सिद्धौ त्वदुक्त्यैव विरुद्धता ॥२४४॥

In respect of inference, its character of not being a means of knowing is not (cannot be) established by direct perception; (and) to be established by your very statement with the help of *linga* or reason (i.e. inference) there would result self-contradiction (lit. opposition). [244]

Verses 245-247 explain sāmānyato dr̥ṣṭasya in BUB.

त्वदशेषप्रवृत्तीनां निरोधश्च प्रसज्यते ।
लिङ्गस्येहाप्रमाणत्वे निश्चेष्टं स्याज्जगत्तथा ॥२४५॥

And there would contingently result the cessation (lit. stopping, or, opposition) of all of your activities; and also the entire world would be devoid of all activities if inference is not here a means of knowing its true nature. [245]

It is held that all the dealings of the world proceed from a commonly accepted inference of related things and, therefore,

the non-acceptance of inference as a means to knowledge would result into entire absence of activities.

वागभिव्याहृतिश्चेयमपि ते न प्रसिध्यति ।
नैवात्मप्रतिपत्त्यर्थं भारत्युच्चार्यते त्वया ॥२४६॥

Further, this employment of speech by you would not be useful (lit. would not yield the desired end);¹ for, certainly you do not utter speech for conveying to yourself (i.e. your thoughts or intentions). [246]

On this, read SP: *paraprayuktaśabdaśravaṇānantaram ātmano jñānam upalabhya svadr̥ṣṭāntād itarasyāpi svakīyaśrotuḥ svaprayuktaśabdaśravaṇād arthajñānam anumāya svayaṁ śabdam prayuikte tadanumānam pramāṇam anyathā vākyaprayogā-narthakyān na hi svapratipattiyartham tad uccāryate etena vākyasyāpi prāmāṇyam prayetaryam iti bhāvaḥ.*

¹What you accept as possible.

विवादगोचरापन्ना प्रमाणमनुमेष्यताम् ।
अनुमानत्वतो लिङ्गाद्दूषणानुमितिर्यथा ॥२४७॥

Let this inference, which has become the subject of dispute, be understood as the authoritative means, for the reason that the inference of a fault is by distinguishing mark (*liṅga*) owing to its having the nature of inference.¹ [247]

It is asserted by Sureśvara that the *dehātma*vādin rejects *anumiti* as a means of knowing only by depending on some inference which really disproves his position, because that argument itself is a kind of inference.

¹We may note here that the word *liṅga* 'a characteristic as smoke of fire' is used often (even by Sureśvara) in the sense of inference (*anumāna*).

In verses 248-249 there is presented BUB's refutation of the

argument about a glow worm; the reference is to verses 150-152.

खद्योतादिप्रकाशस्य यच्चानित्यत्वमुच्यते ।

पक्षादिव्यवधानत्वात्तच्चास्माकं न तान्प्रति ॥२४८॥

As to what is said about the flittering nature of the light of a glow worm etc.,¹ it is to be understood as having the character of what is obscured by the wings etc. which bring about that loss of light (for us) the observers and not for those beings themselves.

[248]

¹The use of the word *ādi* is meaningless since in the verse under dispute there is no mention made of any being other than a glow worm.

भावाभावग्रहो नापि सिध्येत्प्रत्यक्षमानतः ।

विद्यमानार्थसंबन्धात्प्रत्यक्षस्येह सर्वतः ॥२४९॥

The acceptance of a positive entity and/or a negative entity would not be established by means of direct perception, because everywhere (or, in all circumstances) there arises direct perception on account of its relation to some existing object(s).

[249]

verses 250-252 is stated that a negative entity cannot be an object of direct perception.

अथाभावोऽपि तद्ग्राह्य इति चेदभिधीयते ।

प्रत्यक्षाभावसंसिद्धौ किं प्रमाणमितीर्यताम् ॥२५०॥

If it is said that a negative entity also is an object of it (i.e. direct perception), it should be told as to what is the authoritative means for establishing directly perceptible negative entity.

[250]

प्रमातृमानाभावोऽपि भवता प्रतिपाद्यते ।

यद्भावेऽपि न यन्मानं तदभावेऽपि तत्कथम् ॥२५१॥

Also, it is asserted by you that there is an absence of a means of knowing which grasps an object (viz. a negative entity). How can that be (a means of knowing) a thing when it is absent, while it has not been a means of knowing a thing when it was present? [251]

व्यावर्तते स्वभावश्चेदित्येतदतिदुर्घटम् ।
स्वभावो वस्तुनस्तत्त्वं तत्त्वात्तत्त्वं न हीयते ॥२५२॥

(To say) that it is only the nature of the thing that (sometimes) changes—this is difficult to happen, (because) the essence of a thing is its own nature and that essence of that thing is never lost. [252]

In verses 253-254 is stated the prima facie view that dharma etc. yields results, by its very nature.

धर्मादेः फलदातृत्वं स्वभावोऽवश्यमेव तत् ।
अभ्युपेयस्त्वयापीह यथा तदपि मे शृणु ॥२५३॥

It is said that merit has a capacity to yield fruit; it is certainly so according to us also but you also have to accept that (existence of) merit; how?, listen to that also. [253]

क्रियातः स्तुतिनिन्दादेः सुखदुःखादिलक्षणम् ।
धर्माधर्मफलं साक्षात्प्रत्यक्षेणानुभूयते ॥२५४॥

The result(s) of *dharma* and *adharma* is (or, are) experienced directly by direct perception, (as it is seen) that from some action, viz. praise and/or censure, there results the experience of happiness and/or misery. [254]

Verses 255-260 state the incongruity in thus giving merit and demerit any scope (or, place) in the opponent's view; they go

only with āgama, i.e. Veda.

आगमैकप्रमाणत्वात्कथं धर्माद्युदाहृतिः ।
अथाभ्युपगमाद्युक्तं वेदाभ्युपगतिस्तथा ॥२५५॥

How is there your introducing merit and/or demerit (in your scheme), because that is known only from Āgama, as a means of knowing? Also if you accept that (viz. Āgama) as authoritative means, then is reasonably understood in your doctrine, because of the acceptance of Veda. [255]

मानातराभ्युपगमाद्भवतश्च तथा सति ।
स्वसिद्धान्तविरोधोऽयं बलादायात्यनीप्सितः ॥२५६॥

That being so,¹ there would be (your) acceptance of another means of knowing and thus there would perforce occur an opposition to your own doctrine, much though it is not desired by you. [256]

¹Namely, your introducing merit and/or demerit.

दग्धृत्वादिस्वभावोऽग्नेः शक्तिश्चेद्भवतोच्यते ।
प्रत्यक्षात्तदसंसिद्धेर्विरोधस्तेऽनुमाश्रितेः ॥२५७॥

If you hold the capacity for burning the very nature of fire, then, that being unestablished by direct perception, there arises opposition (to your view); because of your holding to (or acceptance of) inference. [257]

This refers to verse 152 above. In this connection, read NKL (ms. p.591): *dahan- ādyagneḥ svabhāva ity uktam. tatra dahan- ādikāryaṃ svabhāvaḥ śaktir vā. nādyas tasya vināśitvāc chaktir eva ced atrāhadagdhṛtvād iti. pratyakṣeṇa siddher asiddher mān- tarasvīkāre siddhāntavirodha ity arthaḥ*. SP also states likewise. The argument is: If burning is the effect of fire, it (viz. the latter) must continue to exist in the form of its effect—but,

fire becomes extinguished, i.e. it is no more noticed to exist. This is to say: burning is not the effect of fire. So also, *śakti* 'capacity for burning' in fire has to be 'inferred' from the effect; it is also not directly perceived.

मदभ्युपगमो यद्वद्वक्तोऽपि तथा यदि ।
सर्वमानाभ्युपगमात्र किञ्चिन्नोऽस्ति दुःस्थितम् ॥२५८॥

If your acceptance of the view (i.e. of inference) is similar to the acceptance (of it) by me, then, there will not be any bad situation, for you will have accepted all the means of knowing (which are acceptable to me). [258]

Read with profit NKL (ms. p.591): *pramāṇatvād āyātah pravāhaḥ kena vāryata iti nyāyād anumānatvam apīṣṭam iti ced atrāha—madabhyupagama iti. lingaśabdādipramāṇye dehātirikṭātmādisiddhir ity arthaḥ.*

त्वदभ्युपगमार्थाय यत्नोऽयं क्रियते मया ।
अभ्युपेतो मदुक्तश्चेत्सिद्धं नः स्यात्प्रयोजनम् ॥२५९॥

I have made this effort (to establish your view about inference; thus, there is acceptance by you (of inference) which I have spoken of; then there is achieved our purpose.¹ [259]

This is just a reassertion/clarification of the idea in the preceding verse.

¹This leads to the validity of our acceptance of *ātmajyotis* through inference.

अनवस्थेति योऽप्युक्तः सोऽपि दोषो निराकृतः ।
सर्वमानाभ्युपगमात्रानवस्था ततो बलात् ॥२६०॥

And, as to what you have posited as, (the fault) consisting in *infinite regress*; even that fault is explained away, because on accepting all the means of knowing (as in our view), there

would not result *infinite regress*, through the force of it. [260]

This refers to verse 154 above.

Verse 261 affirms the establishing of the *Ātman* as apart from the body. In verses 262-266, there is explanation of *svapnasmrtyoh* ... (in *Śābarabhāṣya*) which gives blame to *dehātmavāda*.

देहादिव्यतिरिक्तोऽत आत्मा सिद्धो यथोदितः ।
आदित्याद्यसजातीयः पूर्वोक्तादनुमानतः ॥२६१॥

Therefore, the *Ātman*, which we have said to be apart from the body etc.,¹ is (thus established) as not belonging to the same species as the sun etc.,² on the basis of inference as is already explained by us. [261]

This refers to *Śābarabhāṣya*. (possibly SP quotes:) *śarīraṃ nātmā śarīrād anyad ātmeti śarīrapraṭiṣedhenaivātmo pradiśyata iti ... pūrvoktād atīndriyatvādihetor iti yāvat*. Yet, NKL (ms. p. 591) introduces verse 261 thus: *antasthatvādihetārāddhyattam (?) nigamayati*.

¹This refers to the organs of the body.

²This refers to the moon, fire, speech.

दर्शनादिक्रियावांश्चेद्देह एवाभ्युपेयते ।
दृष्टस्यैव स्मृतौ न स्यात्स्वप्ने चार्थस्य दर्शनम् ॥२६२॥
बाह्यादित्यादिविरहे करणव्यापृतिं विना ।
जाग्रद्वद्वीक्षते स्वप्ने दृष्टपूर्वं यतो नरः ॥२६३॥

If it is accepted (by you) that it is only the body that performs the activities such as seeing;¹ then, because there will be only the memory of what is already seen there would not be² the direct perception of any object in a dream, [262] since a man sees in the dream state what is seen earlier, as in the waking state, even without any activity of the organs even while the external sun etc. are absent.³ [263]

See (in this context) Sūtra of Akṣapāda (Nyāyasūtra 3.1.14): *tadātmaguṇasadbhāvād apratisedhaḥ*. Also read the introductory in NKL (ms. p.591): *ātmano dehādivyatiriktatve hetvantaram āha darśanā iti*.

¹Namely, remembering and recognising.

²That is: it would not be reasonable to postulate that

³SP points out the remaining part implied by the verse: *ato dehasya na draṣṭṛtā*.

सामग्र्या स यथा पूर्वमद्राक्षीच्छिखरं गिरेः ।
तथा विनैव स्वप्ने तदात्मा पूर्ववदीक्षते ॥२६४॥

For, the Ātman sees in the dream state, as before (i.e. in the waking state), that peak of the mountain, which he saw earlier with the necessary mechanism (*sāmagri*)¹ for it, even without it.² [264]

¹That is, various organs, *manas*, the intellect.

²Read SP: *na khalv anyo jāgarty anyah svapitīti śeṣaḥ*.

उत्खातनयनश्चायमनुत्खाताक्षवद्वटम् ।
स्वप्ने समीक्षते नात आत्मनोऽन्यः प्रपश्यति ॥२६५॥

This person, whose eyes are taken out (i.e. which are not in operation), sees in the dream a pitcher (just) like a man whose eyes are not taken out; therefore, it cannot be said that anyone else than the Ātman sees (i.e. can see the objects).

[265]

See SP (introductory remark): *atiriktasyaiva draṣṭṛtvam ity atra hetvantaram*.

ततश्चैतद्वेत्ति सद्धं यः स्वप्ने कुम्भमीक्षते ।
विचक्षुः प्रागपि घटं स एवैक्षिष्ट चक्षुषा ॥२६६॥

And from that this becomes established: He, who, without eyes, sees a pitcher in the dream state, himself has seen even before (i.e. in the state of waking) that pitcher with his eye(s).

[266]

Verses 267-268 state another reason for the nature of the body as non-Ātman; also, they explain (at the same time) BUB: *dehasyaiva draṣṭṛtve*

मृतौ चाविकलस्यैव दर्शनादेरसंभवात् ।
न स्याद्देहस्य तच्चापि देहो द्रष्टा भवेद्यदि ॥२६७॥

And, in death, there is no possibility of seeing by the body (though it is not) short of (any limbs etc.). If it (were held) that it is the body who would see; that (seeing) also would not be possible.

[267]

नेक्षितृत्वेऽक्षबुद्ध्यादेः प्रत्यभिज्ञोपपद्यते ।
न भिन्नद्रष्टृकं यस्मात्प्रतिसंधानमर्हति ॥२६८॥

In the case of the organs, the intellect etc., recognition is not reasonably acceptable in relation to (the body's) being the seer; since what is seen by someone cannot be remembered (or recognised) by some other person.

[268]

Refer to verse 263 above.

Verses 269-270 explain BUB: *yad aham adrākṣam.*

यमद्राक्षं पुरा कुम्भं तमेवाद्य स्पृशाम्यहम् ।
इत्येतत्प्रतिसंधानं न भिन्नद्रष्टृकं भवेत् ॥२६९॥

'It is the same pitcher which I formerly saw that I touch today.' Now, this recognition cannot be one which has another seer (as the agent).

[269]

Again, there is a reference to *Nyāyasūtra* quoted above under verse 263.

This refers to *yad aham adrākṣam* ... in BUB.

प्रतिसंधानकृत्तर्हि मनः संस्कारसंश्रयात् ।
नैवं तस्यापि मनसो विषयत्वेन दर्शनात् ॥२७०॥

(You might state:) 'Let then *manas* be the one that recognises, on account of its resorting to the impression (of the earlier experience)'. That also is not so, since *manas* also has been accepted as an object of seeing. [270]

This refers to *Nyāyabhāṣya*, *Nyāyasūtra* 3.1.19.

This refers to *manaso 'pi* ... in BUB.

Verses 271-272 explain BUB: *manaso 'pi* ... for showing that *manas* also is non-Ātman.

शब्दादिखचितं साक्षात्स्मृतिस्वप्नगतं मनः ।
कुम्भवद्वीक्ष्यते यस्मान्नात आत्मा मनोऽपि नः ॥२७१॥

Since *manas*, which is firmly connected (*khacita*) in the words etc. and related directly to memory and/or the dream state, is itself seen as a pitcher (is seen), therefore, *manas* is not for us the Ātman (that sees). [271]

SP indicates the thought *tasya viṣayatvād anātmatva*.

भावाभावौ प्रमात्रादेस्तद्विलक्षणरूपभृत् ।
प्रत्यक्समीक्षते नित्यं नातो द्रष्टृ भवेन्मनः ॥२७२॥

The inner self ever sees the presence and the absence of the *pramātr* etc.,¹ possessing such a form (nature) as is different from theirs. Therefore, *manas* can not be the seer.

[272]

¹This 'etc.' seems to refer to *pramāṇa* and *prameya*?

Verses 273-275 bring out that the body is (or, cannot be) the experiencer.

भोग्यत्वं चास्य देहस्य प्रत्यक्षैकप्रमाणकम् ।
प्रत्यक्षाप्रमितं कस्माद्भोक्तृत्वं तस्य कल्प्यते ॥२७३॥

And that this body has the nature of an object of enjoyment is (a matter) having only direct perception as the means of knowing it. Therefore, (the question is:) How could enjoyership be posited of that, which does not become known by direct perception? [273]

अयंरूपेण भोग्योऽर्थो ह्यहंरूपेण भोजकः ।
विरुद्धरूपौ प्रत्यक्षाद्भज्येते भोज्यभोजकौ ॥२७४॥

An object of enjoyment is grasped in the form (expressed) by the word *ayam* and the enjoyer is grasped in the form expressed by (the word) *aham*. Therefore, these two, being possessed of opposite forms, become known by direct perception. [274]

इत्यलं शुष्कतर्कोत्थवाङ्मात्राक्षेपदूषणैः ।
पुंसां पुमर्थसिद्ध्यर्थं प्रक्रान्तमभिधीयते ॥२७५॥

This (much) is enough of the objections and the blemishes in *prima facie* view in words which come from reasoning (which is) dry (as dust). Now is stated what has been (already) introduced, with a view to establishing the ends of life for men. [275]

The second is an introductory to the subsequent portion of the Śruti.

Now BU 4.3.7 is under reference, verses 276-279 relating to

the question *katama ātmā*.

आत्मैवास्येत्युपश्रुत्य पूर्वोत्तरविरुद्धताम् ।
आशङ्क्य जनकोऽप्राक्षीदात्मायं कतमो न्विति ॥२७६॥

On having heard (the words) *ātmaivāśya*, Janaka entertained (a feeling that there is) opposition between the aforesaid (or, earlier statement) and the subsequent. (Then) he asked, 'Which one indeed is the Ātman?' [276]

देहादिसंहतावस्थामात्मेति ह्यभिधाधियौ ।
सुप्रसिद्धे जगत्यस्मिन्नायोषिद्बालपण्डितम् ॥२७७॥

In respect of this conglomeration of body etc., there are well known in this world the name and the cognition, viz. this one is the inner self—(and) this is (known to all) from a woman and a child up to a learned man. [277]

पुंव्यापारस्य संबन्धो देहादिव्यतिरेकिणा ।
ज्योतिषानात्मना पूर्वं लिङ्गेन प्रतिपादितः ॥२७८॥

Earlier, it was shown by means of inference that the relation of a man's activity is to the light which exists apart from the body and the non-Ātman object. [278]

आत्मैवास्येति वचनात्पूर्वोत्तरविरोधतः ।
संजातसंशयो राजा याज्ञवल्क्यमपृच्छत ॥२७९॥

(Therefore) owing to the statement: *ātmaivāśya*, which involves contradiction between the earlier and the later statements, the king with a doubt arisen in his mind put a question to Yājñavalkya. [279]

Verses 280-285 refute the apparent contradiction between the earlier and the subsequent statements.

अर्थान्तरं चेद्देहादेरात्मज्योतिर्विवक्षितम् ।
पूर्वोत्तरविरोधोऽयं तदा नैवेह ढौकते ॥२८०॥

If it is intended that the light of the inner self is an object other than the body etc., then this contradiction between an earlier and the later statement would not push forward itself.

[280]

आत्मशब्दश्च लोकेऽस्मिन्प्रसिद्धोऽनेकवस्तुषु ।
साक्षिबुद्धिशरीरान्तेष्व्वात्मबुद्धिसमन्वयात् ॥२८१॥

And, in this world, the word *ātman* is known (as used) with reference to many things, viz. the witness, the intellect and (the organs etc.) up to the body, on account of their close association with the inner self and the intellect.

[281]

इतमचप्रत्ययस्तस्माद्बह्वर्थस्यात्र संभवात् ।
कतमो भवतात्मेति ज्योतिष्ट्वेन विवक्षितः ॥२८२॥

Therefore, the use here of the suffix *-datamac*¹ (in the question *katama*) in the statement *katamo bhavatātmā* is intended to stand for (or, relate to) the light, since there are many meanings here possible.

[282]

¹This is a grammatical term for the suffix *-tama* which is noticeable in superlative forms of words.

इति पृष्टोऽनुमानेनाविरुद्धं प्रत्यपीपदत् ।
आत्मज्योतिः सुविस्पष्टं राजानं योऽयमित्यतः ॥२८३॥

Thus asked, (the sage) very clearly pointed out to the king, in the sentence *yo 'yam* ... It is the light of the *Ātman* (the inner self) so that it is not opposed to inference.

[283]

भान्वादिज्योतिषा तावद्व्यवहर्तुरनुग्रहः ।

कृष्णसारादिदेशेषु स्वान्तस्यानुग्रहस्ततः ॥२८४॥

As for the help by the light of the sun etc., there is a help to a person who undertakes an activity, in relation to the regions of the black pupil of the eyes etc. and then there will be a help offered to his mind (*svānte*). [284]

मनःप्रधानः संघात आत्मचैतन्यबिम्बितः ।
अभिव्यक्तस्मृतिः सोऽथ बाह्यां चेष्टां प्रपद्यते ॥२८५॥

The conglomeration (of the body), which has *manas* as the principal (element in it), is having the reflection of sentience (or, the inner self) and then that (i.e. body), becoming awakened with the memory in it, takes to external activity. [285]

SP cites *yathāhuh— smṛtyāśrayaś ca prāṇabhṛtām sarve vya-vahārā iti*; (this is possibly from *Bhārṭṛprapañca*).

Verses 286-288 state that there appear through imagination many *Ātmans*.

पिण्डस्तावदिहात्मैको द्वितीयो लिङ्गसंज्ञितः ।
चिद्विम्बितावधिरचान्यश्चतुर्थो नेति नेति यः ॥२८६॥

To begin with, the first lump here is the inner self, the body, the second one, called *liṅga*, yet another is the one having confinement or limit by the reflection of sentience¹ and the fourth is what is described (in the words) *neti neti*. [286]

¹Read SP: *cidbimbitāvadhir ity antaryāmī sākṣi cocyate*.

बाह्यान्तज्योतिषोर्मध्ये देहो बुद्ध्यादिसंहतः ।
वर्तते वाङ्मनःकायक्रियाकारी सुखादिमान् ॥२८७॥

The body connected with (or, made up of) the intellect etc.

exists between the external and the internal lights and is the performer of activities through (i.e. with the help of) speech, *manas* and the entire body thus becoming possessed of happiness. [287]

भान्वादिज्योतिषा सोऽयं सम्यक्संदीपितेक्षणः ।
तद्द्वारेद्धमनाः स्मृत्वा बाह्यां चेष्टां प्रपद्यते ॥२८८॥

This one (i.e. the body), whose eye¹ is well enlightened by the light(s) of the sun etc.² and, through that,³ has the *manas* (in it) incited and then, having remembered (all that), takes to external activity. [288]

¹This stands for other organs also.

²This stands for the moon, fire and speech.

³*taddvārā* is explained by SP as *ādityādyanugrāhītendriyadvārā*.

Verses 289-294 explains the extent of favour done by the lights of the sun and others.

धर्माधर्मसमुत्थोऽस्य बाह्यज्योतिरनुग्रहः ।
हेत्वन्तरानपेक्षस्तु प्रत्यग्ज्योतिरनुग्रहः ॥२८९॥

The favour done by the external lights for this one (viz. this individual) arises from the merit and demerit (of him), but that favour done by the internal light is not dependent on any other cause (viz. external light). [289]

देहैकदेश एवास्य देवतानुग्रहस्ततः ।
कृत्स्नाध्यात्माधिदैवादावात्मज्योतिरनुग्रहः ॥२९०॥

From that it follows that the favour of the deities is only in respect of some part of the body, whereas the help of the light of the inner self is for the entire (worlds)¹ related to the body and deities. [290]

¹*adhyātma* and *ādhibhautika* are implied.

न तत्र सूर्यो भातीति तथा चाथर्वणे वचः ।

यथा प्रकाशयत्येक इति चाप्यैश्वरी स्मृतिः ॥२९१॥

To this effect is there a statement in the Ātharvaṇa (Śruti): *na tatra sūryo bhāti*¹ and also there is a Smṛti coming from the Lord, viz. *yathā prakāśayaty ekaḥ*.² [291]

¹*Kāthopaniṣad* 5.15.

²*Gītā* 13.33.

अस्थास्नुत्वाच्च धर्मादेः प्रयोज्यं साधिदैवतम् ।

अध्यात्ममधिभूतं च तेनास्थास्न्वात्मसाक्षिकम् ॥२९२॥

Owing to the not ever-lasting nature of merit etc.. The one which is related to deities, to the body and to the elements are to be connected/construed (accordingly). Thus the one not ever-lasting has the Ātman as the witness. [292]

बाह्यज्योतिरभावेऽतो वाङ्मनःकायहेतुके ।

स्वप्नादिव्यवहारेऽस्मिञ्ज्योतिरात्मैव नापरम् ॥२९३॥

Therefore, in the dealing(s) in the dream state etc. which have speech, *manas* and body as the cause, there is only the inner self as the light and not any other, during absence of the external light(s). [293]

देहेन्द्रियमनोबुद्धिव्यतिरेकप्रसिद्धये ।

योऽयमित्युच्यते प्रत्यग्ज्योतिषो भानुवद्वचः ॥२९४॥

Therefore, in order to establish the distinction (of the inner self) from the body, organs, *manas* and the intellect, there is the statement made *yo 'yam* This is a statement of the light within, as there can be other statement(s) about the sun (etc.). [294]

Verses 294-299 are the statement about the ever-existing light of the Ātman.

स्वयंप्रमाणकस्तावत्साक्ष्यन्तोऽर्थो व्यवस्थितः ।
भावाभावौ प्रमात्रादेस्तत्प्रसादात्प्रसिध्यतः ॥२९५॥

Now, thus, there has been (properly) established the (real) thing which has itself as the means to prove its (own) existence, viz. that which is in the witnessing (one) within (each individual). The existence and non-existence of a knower etc. would be determined (or, established) by the favour of that (witness). [295]

तदाभासानुविद्धेन प्रमात्राहंवपुर्भृता ।
प्रमाणादेः प्रसिद्धिः स्यान्मेयस्यापि प्रमाणतः ॥२९६॥

There is proven (or, established) the existence of the means of knowing etc.¹ only through a knower, who is penetrated by the semblance of that (Ātman), and which is possessed of a body marked by *aham* 'ego' and so also of the existence of the object of knowing through that (very) means of knowing. [296]

¹The word *ādi* refers to ignorance and its effects.

प्रमाणव्यापृतिफलप्रसिद्धिश्च प्रमातरि ।
अवगत्यवसाना स्यात्प्रमातः प्रत्यगात्मनि ॥२९७॥
यतोऽवगतिरेवात्र प्रमात्रादिविशेषणा ।
साक्षात्प्रमाफलं न्याय्यं प्रत्यगात्मैकसाक्षिकम् ॥२९८॥

And, securing of the result of the activity of the means of knowing (is seen) in the knower, having his knowledge as the end and that also would be in the intellect finally. [297]
Since it is only knowledge, which is specified by knower etc., therefore, it is only to be considered as reasonable (*nyāyya*)

that the direct result of right knowledge is having the inner self as the witness. [298]

प्रत्यविचदाकृतिर्बुद्धौ मेयार्थाकृतिवत्स्थिता ।
बुद्धिः कारणसंस्थैव कृत्स्नव्यवहृतिक्षमा ॥२९९॥

The shape of the inner sentience exists in the intellect in the same way as the shape of an object of knowing. (But) the intellect is only dependent on its cause which is the inner self and is then capable of (doing) all the dealings. [299]

Verses 300-304 explain the word *ayam* in *yo 'yam*.

यः पृष्टः स परावृत्तिप्रमामेयातिलङ्घितः ।
प्रत्यक्षेणैव मानेन त्वयमित्यभिधीयते ॥३००॥

The one, about which a question was asked, is that who exists beyond (lit. has transgressed) all the object(s) of knowing in (any) knowledge, which is a modification¹ of the thing outside (the body). But the word *ayam* (with reference to the inner self) is used with the help of only direct perception as the means of knowing. [300]

The verse states the meaning, of different words in *yo 'yam* in BU.

In the verse, there is reference to two pronouns *yaḥ* and *ayam*; *yaḥ* has reference to what is not directly perceived, whereas *ayam* refers to what is only visible.

¹This is for impression on the intellect. The knowledge about anything outside the body is in the shape of an impression of on the intellect.

पराञ्चीति च मन्त्रोक्तिः साक्षादात्मेति च श्रुतिः ।
पराङ्मानाप्रमेयत्वमात्मनः प्रत्यबूबुधत् ॥३०१॥

The statement in the Mantra *parāñci khāni*¹ and also the

Śruti (statement), *sākṣād ātmā*, have (each) revealed (the nature of) the Ātman being imperceptible through the external means of knowing. [30]

¹*Kāthopanīṣad* 4.1.

कुम्भाकारेण कुम्भार्थो यथा प्रत्यक्ष ईक्ष्यते ।
विज्ञानेन तथा प्रत्यङ्मात्माकारेण गृह्यते ॥३०२॥

As the object (called) a pitcher is directly perceived by the potter in the shape of a pitcher, similarly is the inner self perceived in some (particular) shape by the internal organs (*viñāna*).¹ [302]

¹Refer to BUBV 2.1.190; this is the intellect. Yet read SP: *ātmākāreṇa viñānēti sambandhaḥ*.

घटासामान्यरूपोत्थप्रत्यक्षैकप्रमाणकः ।
घटार्थोऽव्यभिचारित्वात्तयोर्मानप्रमेययोः ॥३०३॥

The object, viz. a pitcher, has for it only one means of knowing, viz. direct perception, which has arisen from the particular (lit. special) form of the pitcher, because the means of knowing an object to be known have an invariable character (i.e. relation) between them. [303]

आत्मासाधारणात्मोत्थभास्वच्चैतन्यरूपिणा ।
प्रत्यक्षेणेक्ष्यते नित्यमात्मनात्मा त्वकारकः ॥३०४॥

But, the Ātman which is not a means to any activity¹ is ever perceived by direct perception which has the shape of the bright sentience that arises from the exceptional (lit. uncommon) nature of itself. [304]

Thus is distinguished the knowledge of the inner self from the knowledge of any worldly object.

¹This is so said for averting the contingent notion that the inner self is related to an object and also some activity.

अनात्माकारमानेषु ह्यन्योन्यव्यभिचारिषु ।
प्रत्यक्प्रत्यय एवैकः सर्वत्राव्यभिचारवान् ॥३०५॥

While (all other objects are) having the shapes of the mutually variable non-Ātman (objects), the Ātman is alone whose knowledge is invariable everywhere/at every place (*sarvatra*).

[305]

Direct perception of external object varies from object to object, yet, in the case of the inner self, the knowledge (or experience) of it is never variable.

यत एवमतः प्रत्यक्प्रत्ययेनोपदिश्यते ।
तदन्यधीगृहीतौ स्याद्यतोऽनात्मत्वमात्मनः ॥३०६॥

Since this is so, therefore, the inner self is expressed through the experience by direct perception. (And,) in case it was taken to be any other (object), the Ātman (i.e. the inner self) would be (known as) some non-Ātman.¹

[306]

¹SP adds: *ato na vedyateti śeṣaḥ*.

अपास्तान्यव्यपेक्षं चेदात्मदृष्ट्या समीक्षितम् ।
जगदात्मैव कृत्स्नं स्यान्न ह्यज्ञातोऽवशिष्यते ॥३०७॥

If the entire universe were to be seen as the Ātman, which has given up its dependence on other (organs etc.); then, there would not remain anything else as an unknown object.

[307]

In verses 308-323, there is exposition on the word vijñānamaya. Yet, in verses 318-323, there is a reference to the view of Bhaṭṭa-prapañca on the notion of vijñānamaya.

अयमित्यभिधायोग्यबहोरर्थस्य संनिधिः ।

विज्ञानमय इत्युक्तस्तदवच्छिद्यते यतः ॥३०८॥

In the word *ayam*, (there is expressed) the proximity of many (or, numerous) objects (which are) suitable for expression, since the expression *vijñānamaya*¹ is for delimiting the same.²

[308]

¹Refer to BUBV 2.1.187.

²This refers to *bahu artha* mentioned in the first line.

विज्ञानमय इत्यस्माद्व्यपदेशान्निवर्तते ।

ज्योतिरात्मा जडाद्देहात्तस्याचैतन्यरूपतः ॥३०९॥

Owing to the mention (of it as) *vijñānamaya*, the light of the inner self is distinguished¹ from the inert body, which has the nature of insentience.

[309]

¹Here the verb *nivartate* is to be understood in the sense of *vyāvartate*.

विज्ञानमित्यनेनात्र बुद्धिरेवाभिधीयते ।

बुद्ध्युपाध्यविविक्तश्च विज्ञानमय उच्यते ॥३१०॥

It is the intellect itself which is here expressed by the word *vijñāna* and (that one) which is not distinct from the adjunct, viz. the intellect, is expressed (by the word) *vijñānamaya* 'mostly consisting in particular knowledge'.

[310]

बुद्धिविज्ञानसंपृक्तो यस्मादेष प्रमीयते ।

राहुवच्चन्द्रसंपृक्तः प्रत्यग्ज्ञानमयस्ततः ॥३११॥

Since this one is known (*pramīyate*) as marked by (the impression in the form of the intellect, therefore the inner self, which is mostly of the nature of (particular) knowledge, is to be considered like Rāhu who is fully associated with

the moon.

[311]

The knowledge about Rāhu cannot be entertained unless he is associated with the moon:¹ so also is the knowledge of the inner self to be taken as associated with the impression on the intellect.

¹BUB adds the sun also.

द्रष्टृत्वाद्यभिसंबन्धोऽकारकस्यापि सर्वदा ।
बुद्धियोगकृतोऽतोऽयं विज्ञानमय उच्यते ॥३१२॥

Since this connection with seership is ever understood of even non-agent¹ (inner self), caused as it is by its association with the intellect, therefore, this (the inner self) is described as *vijñānamaya* 'mostly consisting in some particular knowledge'.

[312]

¹The inner self is always *akāraka* 'not connected with activity'; therefore, a non-agent.

आत्मानात्मावबोधाय यतो धीरेव कारणम् ।
सर्वार्थकरणं सातो दीपो ध्वान्ते यथा तथा ॥३१३॥

Since, for understanding the Ātman and non-Ātman, it is only the intellect which is (the determining) cause, therefore, it is a means to understanding of all (the objects), it is like a lamp that is (a means of seeing) in darkness. [313]

विज्ञानालोकसंपृक्तं मेयं वस्त्वखिलं यतः ।
विजानाति मयट् तस्मात्प्रायार्थोऽत्रावसीयते ॥३१४॥

Since a person knows all the things, which are objects of knowing that are associated with the light of *vijñāna* 'the intellect', therefore it is concluded that the suffix *-mayat* is here understood to be in the sense of 'mostly consisting (in

some particular) knowledge'.

[314]

यावांल्ल्युडर्थस्तेनायं तदविद्यैकहेतुतः ।
अविशिष्टौ मतो यस्मात्तदाभासैकवर्त्मना ॥३१५॥
विज्ञानमय इत्येवं तस्मादात्माभिधीयते ।
सर्वधीवृत्तिसाक्षित्वात्तादात्म्याच्चाप्यनात्मनः ॥३१६॥

Since this one is taken to be not specified by the meaning of the suffix *-lyut*,¹ of whatever extent, on account of only one cause, viz. ignorance about it, therefore, by way of the semblance of it, [315]
is the inner self thus expressed by the word *viññānamaya*. (This is so) on account of its nature, viz. being the witness of all the modifications of the intellect and also identified with them. [316]

¹Cf. Pāṇini 3.3.117: *karaṇādhikaraṇayoś ca*, here it has the following purpose to serve, viz. *karaṇe*: The affix *lyut* comes after a root when the relation of the word to be formed to the verb is that of an instrument.

सर्वार्थग्रहणं तस्मात्परोऽवस्थितदीपवत् ।
प्रधानं करणं बुद्धिर्द्वारमात्रं ततोऽपरम् ॥३१७॥

Therefore, the inner self's grasping of all the objects (becomes possible) as by a lamp with reference to (objects that are) in front of it. Intellect is the principal organ (of the knowledge) and whatever else than that there is merely a door to it (i.e. the intellect). [317]

व्याचख्युर्मयटं ये तु विकारार्थे महाधियः ।
स्वव्याख्यानविरोधः स्यात्तेषां चानर्थसंगतिः ॥३१८॥

But those, who is possessed of great intellect, have explained the suffix *-mayat* in the sense of modification¹ have an opposition in or to their own explanation and that would be

(in association) with the undesired.

[318]

The discussion of the explanation of *vijñānamaya* as given by Bhartṛprapañca is now begun and it is pointed out that it is beset with self-contradiction.

Refer to BU 4.4.5 and 2.1.17 regarding *vijñānamaya*.

¹Read SP: *vijñānam param brahma tatprakṛtiko jīvo vijñānamaya iti bhartṛprapañcoktam.*

आत्मनश्चापि निःशेषविकारप्रतिषेधतः ।

न जायत इति स्पष्टं श्रुतिमन्त्रोक्तिसंश्रयात् ॥३१९॥

But this is so because of the refusal (or, denial) of every modification in the case of the Ātman; (and) this becomes clear by turning (lit. resorting) to the Mantra in the Śruti *na jāyate*¹

[319]

¹*Kāthopaniṣad* 2.18: SP refers to *Gītā* 2.20.

अनिर्मोक्षप्रसक्तिश्च विकारश्चेत्परात्मनः ।

मयण्नातो विकारे स्यात्प्रायार्थस्त्वत्र युज्यते ॥३२०॥

And, if there is modification held (in the case of the Ātman); then, there would result contingently the absence of liberation for the highest Ātman. Therefore, the suffix *-mayat* is not (to be understood) in the sense of modification, but meaning 'mostly consisting in' is here reasonably acceptable.

[320]

यदि वाज्ञानतस्तस्य विकारो जगदिष्यते ।

रज्ज्वाः सर्पादिको यद्वन्न तथा दोष इष्यते ॥३२१॥

If, owing to ignorance (about the nature of the Ātman), the universe is held to be its modification, as a serpent etc. is of a rope (etc.); then, (it is to be said,) that kind of fault is not accepted (or, desired).

[321]

विज्ञानमय इत्यत्र वाक्ये प्रायार्थतेष्यते ।
पृथिव्यादिमयोऽप्यात्मा यस्मादूर्ध्वं प्रवक्ष्यते ॥३२२॥

(And) in this sentence *vijñānamaya* ... -*mayat* is desired having the sense 'mostly consisting in', since there will also be said later that the Ātman is *prthivyādimaya*.¹ [322]

¹The use of -*mayat* with more nouns than one points to the said meaning.

संदिह्यमानः सर्वत्र पदार्थोऽन्यत्र निश्चितात् ।
प्रयोगात्सुविनिश्चेयो न्यायाद्वात्यन्तनिश्चितात् ॥३२३॥

On the basis of a rule, which is (already) well settled, the meaning of a word, being under doubt, is to be properly settled from its use elsewhere. [323]

SP points out why the meaning of -*mayat* in the *vijñānamaya* in the sense of 'mostly consisting in' should be determined by the use of that word in that sense elsewhere. For this, SP cites examples from the field of the Mīmāṃsā statement *puroḍāśaṃ caturdhā kṛtvā barhiṣadam karoti* would require specification of *puroḍāśa* and thus that specification becomes available in the mention of *āgneyam caturdhā karoti* in the text of another school. So also, the statement *aktāḥ śarkarā upadadāti* requires the knowledge of the material for anointing *śarkaras* and this is understood from a statement elsewhere *tejo vai ghṛtam* which conveys that material to be ghee. In this way, the meaning of *vijñānamaya* has to be ascertained as 'mostly consisting in', knowledge, as understood in BU 4.4.5. In this connection SP states some relevant passage from *pramāṇalakṣaṇa*. NKL (ms. pp.595-596) repeats the same idea.

In verses 324-329 is explained the significance of the word *prāṇeṣu*.

देहादिवेन्द्रियेभ्योऽपि व्युत्थापनचिकीर्षया ।
 प्राणेष्विति श्रुतिर्विक्त प्राणाः पञ्चदशोदिताः ॥३२४॥
 तेभ्यो निर्धारणार्थाय सप्तमीयं प्रयुज्यते ।
 प्राणेषु योऽर्थोऽनुगतः स आत्मेत्यवधार्यताम् ॥३२५॥

The Śruti statement uses here the word *prāṇeṣu*, with the desire of conveying the rising of the Ātman from the organs as from the body; and there are mentioned fifteen organs (*prāṇas*),¹ [324]

(and) in order to distinguish specifically (the Ātman) from them is used here the locative case. (This yields the meaning:) it should be known for certain (*avadhāryatām*) that, what has continued to be (existing) in the *prāṇas* 'organs', is (but) the Ātman. [325]

¹The fifteen organs are: five sense-organs, five organs of activity and five winds.

प्राणेष्व्वात्मीयरूपेषु प्रत्यक्त्वेनावभाति यः ।
 स एवात्मेति विज्ञेयस्तेषु सर्वेष्वनात्मसु ॥३२६॥

That one, who appears to be present within the *prāṇas*, which have the nature of belonging to the Ātman, has to be known as the Ātman, in all of them that are non-Ātman. [326]

SP remarks *na hi karaṇeṣu dīpavat ātmasambhāvanety arthaḥ*.

मतं प्राणसजातीया धीरेवात्मेति चेन्न तत् ।
 यतो धीव्यतिरेकार्थं हृदीति श्रुतिरभ्यधात् ॥३२७॥

If it is held that the intellect, which belongs to the same species as *prāṇas*, is itself the Ātman, it is not (to be held) so, because the Śruti has stated (in this context) the word *hr̥di* in order to distinguish the Ātman from the intellect. [327]

हृच्छब्देन च धीरेव तात्स्थ्यादत्राभिधीयते ।

स्वार्थस्तस्यां य आभाति स आत्मा बुद्धिवृत्तिदृक् ॥३२८॥

re, by the word *hr̥di* is expressed the intellect itself, owing its existence in that. (And) that one, which flashes forth that (the intellect) as its own meaning is the Ātman, the support of the modifications of the intellect. [328]

BU 2.1.17.

हृदीत्याधारनिर्देशाद्धीस्था आत्मेति शङ्क्यते ।
वृत्तयोऽतो निवृत्त्यर्थमन्तरित्युपदिश्यते ॥३२९॥

is suspected here that the Ātman is the modification of the intellect, from the mention of the support for the intellect by the word *hr̥di*; therefore, in order to ward off that suspicion here stated the adverb *antah* in the Śruti. [329]

ss 330-333 clarify what is meant by the word *ātman*.

देवताविषयप्राणबुद्धितद्वृत्तितः परः ।
प्रत्यक्तया यः प्रथते ज्योतिरात्मा स ईक्ष्यताम् ॥३३०॥

at Ātman which reveals itself as the inner one, being above the deities, the object(s) of knowing, the organs, the intellect and its modification(s), is to be seen as the light. [330]

ग्राहकग्रहणग्राह्यरूपोऽनात्मा प्रवाहवान् ।
बुद्ध्यादिर्विषयान्तोऽर्थो यत्साक्षिक इवेक्ष्यते ॥३३१॥

what is the Ātman) through whose being the witness is seen the entire world of objects (*viṣayānta*) to be known including the intellect etc. which is in the stream of the non-Ātman object(s) having the nature of what grasps, the act of grasping and the object of grasping. [331]

भूत्वाभवंस्तथाभूत्वा भवंश्चेहातथात्मना ।

अज्ञातोऽलुप्तदृष्टिर्यः स आत्मा ज्योतिरुच्यते ॥३३२॥

That one which, having come into being, does not attain that nature (*tathā*),¹ and (now) here without having come into being, which appears what it had not been, viz. not of that nature, the unknown and the one whose power of seeing is not lost is understood as (lit. called) the Ātman, the light.

[332]

SP does not show here Samdhi's of *bhūtvā abhavan* and *tathā abhūtvā*, as it does elsewhere. Yet, it refers to the basic thought in BS 2.3.17: *nātmaśruter nityatvāc ca tābhyah*.

¹That is, having the nature of the intellect etc.

आगमापायितासिद्धिर्बुद्ध्यादेर्यत्समाश्रयात् ।
साक्षादात्मेति तं पश्य प्रत्यग्दृष्ट्यैकमात्मनि ॥३३३॥

See that as the directly perceptible Ātman, after resorting to which the intellect etc. have their character of coming into existence and departing from it established, (thus) looking on that single Ātman as the inner self (or one within). [333]

परागर्थानुसारिण्यो यतो धीवृत्तयस्ततः ।
विशेषणादन्तरिति व्यावर्त्यन्ते पराक्त्वतः ॥३३४॥

Since the modifications of the intellect are in agreement with the external objects that are outside, therefore, by the specifier *antaḥ* they are distinguished (from the inner self) on account of their being external. [334]

This verse states that the word *antaḥ* is for setting aside the inner self's being any modification of the intellect.

Verses 335-336 explain the significance of the word *jyotis*.

कारणं तर्हि बुद्ध्यादेरात्मेत्यत्र प्रसज्यते ।
कार्यस्यान्तर्यतो दृष्टं सर्वत्रैव च कारणम् ॥३३५॥

(One would say here:) 'Then it contingently follows here that the Ātman is the cause of the intellect etc. since (at all times) it is noticed that a cause continues to be inside the effect.'

[335]

जाड्यं चात्मन इच्छन्ति कणभुङ्मतजीविनः ।
तेषां विप्रतिषेधार्थं ज्योतिरित्यभिधीयते ॥३३६॥

Those ¹ who follow (lit. conduct themselves according to) the view of Kaṇāda, postulate (lit. desire) that the Ātman has insentience. Therefore, with a view to refuting them, it is said in the Śruti (about the Ātman that) it is a light. [336]

¹Those are the Vaiśeṣika, the Naiyāyika, and the followers of Prabhākara Mīmāṃsā.

In verses 337-345 is pointed out another significance of the word jyotis.

योऽयमित्यादिना यद्वा यथोक्तस्यात्मवस्तुनः ।
प्रकृतज्योतिःसंबन्धो ज्योतिरित्यभिधीयते ॥३३७॥

Or, (it is like this: In the statement of Śruti) *yo 'yam* ... there is expressed the relation of the (real) thing, viz. the inner self to the light under discussion and the same is called *jyoti*.

[337]

उपादानं हि बुद्ध्यादेरात्माविद्येति भण्यते ।
सकृद्विभातं चिन्मात्रं ज्योतिरित्युपदिश्यते ॥३३८॥

The Ātman is indeed (*hi*) taken as the material cause of the intellect etc. is ignorance; (thus) only sentience, which has flashed forth (only) once, is stated as the light. [338]

वस्तुवृत्तेन प्रध्वस्तनिःशेषाज्ञानमात्मनः ।

ज्योती रूपमिदं भास्वत्प्रत्यङ्मात्रसतत्त्वकम् ॥३३९॥

In reality, this is the (proper) form of the inner self, viz. this light which has the nature of being the bright light alone whereby is destroyed the entire ignorance. [339]

ज्योतिः संविच्चितिः प्रत्यङ्ङात्मेति व्यपदिश्यते ।
स्वार्थं यत्प्रथते नित्यं जाग्रत्स्वप्नसुषुप्तिषु ॥३४०॥
बुद्ध्यादिषु परार्थेषु ह्यागमापायिवस्तुषु ।
स्वयं रूपेण यो भाति स्थासुः स्वार्थः स भण्यते ॥३४१॥
ज्योतिरित्यस्य बुद्ध्यादेरागमापायसिद्धिदः ।
स्वयंमातृक एवायमात्मत्वादेव कारणात् ॥३४२॥

(This) inner self is mentioned (in this context of the text) as Jyotis, Samvid, and citi, the one which ever reveals itself, for its own sake, in the states of waking, dream and deep sleep. [340]

The one is said to be (living for its own self) who in its own form shines as the permanently abiding thing while (the external objects, viz. the intellect etc., are things as come into existence and depart from it. [341]

What is called as this light causes the coming into existence and departing from it of the intellect etc. and is its own knower, because being the (highest) Ātman it is the cause. [342]

The use of the word *svārtha* 'having a purpose its own' in verse 340, is emphasised, because this is distinct from *parārtha* 'other objects of desire'.

अनेनैव यथोक्तेन ज्योतिषा सकलं जगत् ।
षड्भावविक्रियामेति निर्विकारेण भास्वता ॥३४३॥

Thanks to this very light, viz. the one which does not undergo any modification, the bright one, which is thus described, the entire universe undergoes the sixfold states¹ of modifications. [343]

¹*jāyate asti vipariṇamate vardhate apakṣīyate vinaśyati* (Nirukta 1.2).

अचेतनोऽपि बुद्ध्यादिश्चेतनावानिवेक्ष्यते ।
देहेन्द्रियमनोबुद्धिसंघातो वायुभिः सह ॥३४४॥

The intellect etc., which is a conglomeration of the body organs, *manas* and the intellect, together with life-breaths,¹, though insentient it is, is seen here possessed of sentience as it were.

[344]

¹Here the word *vāyus* mean five winds in the body.

यथा प्रकाशयत्येकः कृत्स्नं लोकमिमं रविः ।
क्षेत्रं क्षेत्री तथा कृत्स्नं व्यनक्तीति स्मृतेर्वचः ॥३४५॥

There is in statement from a *Smṛti*: as this single sun illumines this entire world, so does the knower of the field reveal the entire field.

[345]

This is *Gītā* 13.33.

Verses 346-347 explain *yathā mārakato maṇiḥ* in *BUB*.

आत्मच्छायं पयोऽशेषं यथा मारकतो मणिः ।
परीक्षणाय प्रक्षिप्तः कुर्यादात्मा तथैव च ॥३४६॥
बुद्ध्यादिदेहपर्यन्तं प्रत्यगज्ञानहेतुकम् ।
जडस्वभावकं नित्यमवभासयति स्वयम् ॥३४७॥

As an emerald jewel put (into milk) for examining (its quality), makes the entire milk as possessed of the colour belonging to itself, so is the *Ātman*.

[346]

The inner self itself ever illumines whatever has ignorance (about the *Ātman*) as a cause, viz. the world of objects beginning with the intellect etc. and ending in a body, which

have insentience as their nature.

[347]

Verse 346 means: the Ātman makes all the non-sentient objects as sentient objects by being in their midst.

In verses 348-356 is presented the existence of ignorance.

बुद्ध्यादिष्वपि सक्ष्मेषु यत्सक्ष्मतममुच्यते ।
बुद्ध्यादिकारणं नित्यमात्माविद्येति भण्यते ॥३४८॥

Even among the intellect etc. which are subtle, that which is described as the most subtle, is the eternal Ātman and the cause of the intellect etc.—this is called ignorance. [348]

अपि कूटस्थवपुषः प्रतीचः सङ्गकारकम् ।
तत्त्वमस्यादिवाक्योत्थज्ञानबाध्यं च यद्विदुः ॥३४९॥
यन्निमित्तं च साक्षित्वं कारणत्वं तथात्मनः ।
सर्वकार्यविनाशेऽपि यद्वीजमवशिष्यते ॥३५०॥
तदात्मज्योतिषेद्धं सन्नित्यमेवावतिष्ठते ।
उत्पत्तिस्थितिभङ्गानां न वेद्मीति च साक्षितः ॥३५१॥

That¹ which causes the connection/association (with external objects) of even the inner self, having an immutable form and which, they have known, as what can be stultified by the knowledge arising from the sentence such as *tat tvam asi*²—

[349]

(that)¹ on account of which there arises the nature of being a witness in the Ātman and also of being a cause (of external objects) and seed of which remains even when all (the world of) effects has come to be destroyed,

[350]

that, kindled by the light of its own and ever existent, continues to be amongst (the variety of) origination, sustenance and destruction as the witness of them, (in the form of the experience (or, awareness):) 'I do not know'.

[351]

¹This occurs in verse 351 below; it is to be continued in

verses 350-351.

²CU 6.8.7ff.

कूटस्थ एव साक्ष्यत्र स्वमोहाभासहेतुतः ।
अविचारितसंसिद्धि तमोऽनुभवसंश्रयात् ॥३५२॥

It is the very immutable sentience which is here the witness on account of the cause, viz. the semblance of its own delusion. (Here is) ignorance which is established without thought as its resorting to the experience (i.e. awareness of the same).¹
[352]

¹This is clarified in the next verse.

निःसाक्षिके न वेद्मीति न कथंचित्प्रसिध्यति ।
तथा कूटस्थसंवित्के नितरां नैतदिष्यते ॥३५३॥

There would (or, does) not in any way arise (the awareness: 'I do not know' in (a body which is) devoid of a witness; so (also) this is not at all accepted (lit. desired in a body) which has (in it) the immutable witness.¹
[353]

¹This refers to the pure state of Ātman while it is unaffected by any delimiting adjunct. In this context, SP refers to a verse: *svayaṃ sedhum asāmārthyāt sādhakāntarahānataḥ / bādhakasya ca sadbhāvāt tamasā sāksitāciteḥ //*

ऐश्वर्यं कारणत्वं च साक्षित्वमपि चात्मनः ।
सदेशितव्यकार्यार्थसाक्ष्यार्थेनास्य संगतेः ॥३५४॥

The nature of the Ātman as being the lord, the cause and the witness also can be (understood) on account of its association with (the objects) only in the sense of its ever being the witness of the objects to be effected and lorded over.
[354]

Read SP: *na hi sāpekṣaṃ svarūpaṃ svābhāvikam asvābhāvikam cāvidyaṃ rajatavad ity arthaḥ*. Also it adds: *ye tu kecid aiśvaryaṃ anāropitaṃ āśrayante te punar aiśvaryaṃ kāraṇatvaṃ cety-ādivārtikārthaṃ nālocayante*.

आत्माज्ञानमतः प्रत्यक्चैतन्याभासवत्सदा ।

आत्मनः कारणत्वादेः प्रयोजकमिहेष्यते ॥३५५॥

Therefore, here (i.e. in this context) is accepted that ignorance about the Ātman like the appearance of sentience of the inner self leads to the Ātman as ever the cause etc.,¹ i.e. its productive (force) [355]

¹This refers to *aiśvarya* in verse 354 above.

चैतन्याभासवत्प्रत्यङ्मोहान्तात्प्रत्यगात्मनः ।

बुद्ध्यादेर्विषयान्तस्य सिद्धिः स्यात्साक्षिणस्ततः ॥३५६॥

(Only) then, there can be established the existence of all the objects such as the intellect etc. consequently from the inner self as the witness (of all) which have consisted in the delusion in respect of the inner self which has (lit. is possessd of) the appearance of sentience. [356]

This verse states the reason for holding ahaṃkāra as the foremost in this acceptance of superimposition.

स्वकारणाभिसंबन्धाच्चैतन्याभासता धियः ।

जायतेऽतोऽभिमानोऽस्यां जायते महतामपि ॥३५७॥

The appearance of sentience arises in this (superimposed) intellect on account of its close (*abhi*) connection (or, association) with its own cause; (indeed), there occurs ego in the case of even the great (thinkers).¹ [357]

¹SP cites in the explanation of this verse : *uktam hi— aham*

iti tāvat prathamam 'dhyāsa iti, tatra vidvatbhrāntir api sādhanam ityarthah.

Verses 358-363 are the exposition on BUB: buddhis tāvat

कारणानन्तरत्वाच्च तथा स्वच्छस्वभावतः ।
चैतन्याभासवत्येषा धीः पूर्वमभिजायते ॥३५८॥

Further, this intellect is the first to become possessed of the appearance of sentience, because it is immediate to ¹ its cause (i.e. sentience) and also because of its having a pure (lit. clear) nature. [358]

¹It means; being in the extreme nearness.

तस्मादात्माभिमानो हि बुद्धौ जनिमतां सदा ।
जायते सर्वभूतानामपि सर्वविदामिह ॥३५९॥

Therefore, in the case of all the beings that are born (*janimat*), there arises the intellect and the ego about themselves, even ¹ in the case of those who know of all of the objects (of the world). [359]

¹SP explains the purpose of the word *sarvavidām api* thus: *aviduṣām īdrg abhimāno na viduṣām ity āśanikyāhāpīti.*

चिदाभासोऽथ मनसि बुद्ध्यनन्तर्यकारणात् ।
मनःसंबन्धतश्चैवमिन्द्रियेष्वभिजायते ॥३६०॥

Then, there occurs the appearance of sentience in the *manas*, since it is immediate to the intellect and (then) owing to their connection with *manas* that ¹ comes to exist in the organs also. [360]

¹This is appearance of sentience.

मनःकरणसंबन्धाद्देहेऽप्यस्योपजायते ।

एवमाभासयत्यात्मा कृत्स्नं कार्यं सकारणम् ॥३६१॥

On account of the connection with *manas* and the organs in the body also there arises (that awareness, viz. ego).¹ Thus does the Ātman cause its own appearance in the entire (world of) effects together with the causes of the same. [361]

This is understood by *tour de force* in these verses; cf. the next verse also.

सौक्ष्म्यस्य तारतम्येन स्थितस्य विषयावधि ।

आत्माभिमानधीः पुंसां जायते नियता ततः ॥३६२॥

(Then) from that there is produced in men the awareness of their own ego, on account of the gradation of the subtlety which exists in them as far as the extent (i.e. the entire world) of objects. [362]

नित्योऽनित्यानामिति च येन सूर्यस्तथा परः ।

न तत्र सूर्यो भातीतिमन्त्राम्नायौ ह्यनेकशः ॥३६३॥

There are to this effect many statements in the tradition, viz. the Mantras: *nityo 'nityānām*,¹ *yena sūryas tathā parah*,² *na tatra sūryo bhāti*.³ [363]

¹ *Kāthopaniṣad* 5.12.

² *Taittirīya Brāhmaṇa* 3.12.97.

³ *Kāthopaniṣad* 5.5.

Verses 364-368 are an explanation of the word *puruṣa*.

आत्मन्येवं प्रबुद्धेऽस्मिञ्ज्योतिषि ध्वान्तनाशतः ।

सर्वस्यैवात्मयाथात्म्यादात्मा पुरुष उच्यते ॥३६४॥

Thus, in this light, viz. the Ātman, which is awakened, there

arises (the knowledge of) the true nature of the Ātman (present) in everything on account of the destruction of the ignorance (lit. darkness). Therefore, the Ātman is called Puruṣa.

[364]

आत्माज्ञानसमुच्छित्तौ तज्जस्य न हि वस्तुनः ।
प्रत्यग्रूपात्पृथग्रूपं संभाव्यं केनचित्क्वचित् ॥३६५॥

When there is the complete destruction of the ignorance about the inner self, at no time or nowhere should anyone think of a different nature of what is born of that ignorance as different from the nature of the inner self.

[365]

स्रगज्ञानसमुच्छित्तौ न तज्जस्यान्यतः स्रजः ।
रूपं संभाव्यतेऽह्यादेरेवमात्मस्वरूपतः ॥३६६॥
न कार्ये कारणे वापि तदभावेऽथवान्यतः ।
प्रत्यङ्मात्रैकयाथात्म्याद्रूपं संभाव्यतेऽण्वपि ॥३६७॥

When ignorance about a wreath of flowers is removed (lit. destroyed) there cannot possibly exist any form of a serpent on account of the effect (lit. product) of that (viz. ignorance) or of the wreath itself which is other than one of itself (viz. the wreath).

[366]

Similarly, it is not possible to think of even a little of a form (what is called) the effect, or the cause of that effect, or in the absence of (or, on account of) any other (thing); because of the nature of the reality consisting in the mere inner self alone.

[367]

अव्यावृत्ताननुगतप्रत्यङ्मात्रावशेषतः ।
पूर्णत्वात्पुरुषो ज्योतिरात्मैवैकोऽभिधीयते ॥३६८॥

Since the Puruṣa remains only as the inner self, which is neither distinguished from nor similar to (any other thing) and on account of his eternity/fullness, that (viz. Puruṣa) is called the

lone Ātman, the light.

[368]

सद्भावेऽपि च भान्वादेः पाराथ्याद्देहवन्न तत् ।

स्वार्थस्य ज्योतिषोऽभावे भावत्वायापि च क्षमम् ॥३६९॥

Even though the sun and others exist, they are not able to reveal their object (to the individual being), because they have, like a body (etc.), the nature of being subservient to others, in the absence of the (inner self's) light. [369]

We think that the thought here is: in the absence of the inner light, the usually known lights also are, like the body and its organs, incapable of revealing objects to anyone. It is only the light of the Ātman in their body that illuminates, viz. that causes the existence of, other object. The sun and others cannot do so. Yet, to be frank, we demur about the correctness/accuracy of the translation of this verse which is (according to us) slightly awkward in expression!

देहादेर्व्यापृतिश्चेत्स्याज्जडादित्यादिहेतुतः ।

भवेन्निःसाक्षिकैवेयमन्धकारप्रनृत्तवत् ॥३७०॥

If the activity of the body etc. could be on account of (or, produced by) the insentient cause, viz. the sun etc.; then, that would be just like a dance performed in the dark, without having any witness to see it. [370]

स्वार्थात्मज्योतिषैवातो भावाभावात्मतां जगत् ।

लभते तमृते यस्मान्नेयात्संभावनामपि ॥३७१॥

Therefore, the existence and the non-existence of the universe comes to obtain only an account of the light of the Ātman, which is for its own sake; since, in the absence of that (viz. the Ātman) the universe would not be a thing to think of.

[371]

यदेतद्धृदयमिति तथा चागमशासनम् ।

प्राणिव्यवहृतिः सर्वा प्रत्यगात्माभिमानतः ॥३७२॥

To this effect is there an instruction in tradition, viz. *etad hrdayam*;¹ all the activity of beings proceeds from (their) ego (of being) the self-within.² [372]

¹Also see: *Aitareyopaniṣad* 3.2: *hrdayam manaś caitad ubhayaṁ samvidavabhāsitatvāt sannvinmātram* (as quoted by SP).

²SP quotes: *uktam hi— svābhimāno hi sarvaprāṇinām samvyavahāra iti*.

Verses 373-384 explain BUB: *yady apy evam etat*

सर्वाभिमानहेतुं च चिदाभासं पुराब्रवम् ।

सम्यङ्मारकतदृष्टान्तदर्शनेनात्मवस्तुनः ॥३७३॥

And I have already clearly stated (lit. spoken) that the appearance of sentience is the cause of all ego, by citing (lit. showing) the illustration of emerald.¹ [373]

¹This refers to verse 346 above.

Verses 374-379 explain *yady apy evam etat ... in BUB*.

यद्यप्येवमिदं वस्तु यथोक्तमहिमं परम् ।

तथापि तज्जागरिते शक्यं दर्शयितुं न तु ॥३७४॥

Even though this thing (viz. reality, the inner self) is the highest and is having greatness¹ as already stated; yet, it is not possible to show it (to others) to be present in the state of waking.

[374]

The inner self, though it is an object of knowledge, cannot be pointed out like any external object.

¹Sureśvara uses the word *yathoktamahimam* which is

ungrammatical. But he does this under the force of metrical exigency.

आत्मबुद्धिमनश्चक्षुर्विषयालोकसंकरात् ।
जाग्रद्वृत्तौ न तच्छक्यं ज्योतिर्दर्शयितुं ततः ॥३७५॥
स्वप्ने बुद्ध्याद्युपरतौ वासनामात्रशेषतः ।
ज्योतिर्दर्शयितुं शक्यं स समान इतीर्यते ॥३७६॥

(Since) it is not possible to point out that light (of the Ātman) in the state of waking, owing to being there confused mixture of the Ātman, the intellect, *manas*, eyes, objects (of knowing) and light; [375]

as such, it is possible to show that light as the remainder of only impressions, when, in the state of dream, the intellect etc. have stopped (functioning); hence it is stated here (about it as) *sa samānah*. [376]

कथं चैवंस्वभावस्य तदज्ञानजभूमिषु ।
व्यवहारः प्रतीचोऽस्य स समानाद्यतो वचः ॥३७७॥

How again could there be any dealings of this inner self which has such nature (as described earlier) in the states caused by ignorance about itself? Hence, there follows the statement *sa samānah* [377]

Read SP: *ātmano nityamuktasya saṁsāritvam avidyeti vaktum uttaro granthaḥ ity arthaḥ*. Also read NKL (ms. p.598): *svato muktasyāpi saṁsāritvam ajñānād iti vaktum uttaro grantha ity arthaḥ*.

ज्योतिर्भ्यो देहतो लिङ्गाद्बुद्धयन्ताच्चातिरेकतः ।
योऽञ्जसा दर्शितस्तस्य विशुद्धयै वोत्तरं वचः ॥३७८॥

Or, the subsequent statement (i.e. *sa samānah* ...) is for clarifying that (the inner self) which was very clearly described

as existing apart from (other) lights, the body, the subtle body and (the bodily organs) ending in the intellect. [378]

स्वयंज्योतिः शरीरादेर्बुद्ध्यन्तादनुमानतः ।

निष्कृष्याभिहितो योऽत्र स समानः स्वमोहतः ॥३७९॥

That one, the self-shining, which is described here¹ by (resorting to) inference² after separating (i.e. understanding it as apart) from the body etc. which end up in the intellect, is *samāna* 'the same', on account of its own delusion (about itself). [379]

¹Alternatively, 'this' refers to the immediately preceding portion of BU 4.3.7 (SP).

²SP explains *anumānataḥ* as *vyavahāraliṅgāt iti yāvat*.

Verses 380-383 clarify the meaning of the word *samāna*.

समान एकः सन्नात्मा स्वात्माविद्यातदुद्भवैः ।

अज्ञानमिथ्याविज्ञातप्रत्यक्त्वादात्मवस्तुनः ॥३८०॥

केनैक इत्यपेक्षायां हृदयेनेति भण्यते ।

सधीरिति श्रुतेरत्र हृदीति प्रकृतत्वतः ॥३८१॥

In the expectancy (of an answer to the question) *kenaikah* 'With what is it identical?', it is stated in the Śruti in the word *hr̥dayena*; *samānaḥ*¹ means 'becoming identical (with)', the Ātman becomes possessed of the intellect² (or, comes to have awareness of the external objects), owing to the (inference of) ignorance/delusion about itself (i.e. its own nature) and the products/effects of the same, for the reason that the (real) thing, the Ātman, is but the inner self (or, but within an individual being) which is falsely understood through (that) ignorance—as, in this respect, there is already the beginning with the word *hr̥di*. [380-381]

¹SP points to *ekah sann anusacaratīti sambandhaḥ*. Also NKL

introductory (ms. p.598): *evam arthasaṁkṣepakam uktvā vākyam yojayati svayaṁ jyotiriti samānaśabdārtham āha samāna iti.*

²Here Sureśvara refers to the Mādhyandina text *sadhiḥ* which states that the Ātman and the intellect are but one.

अविचारितसंसिद्धि यत्तु बुद्ध्यादिकारणम् ।
कूटस्थात्मैकचैतन्यबिम्बितं सत्स्वदोषतः ॥३८२॥
स्वात्माविद्यावधिः सोऽयं परः कारणमुच्यते ।
साक्षी चेता जगद्बीजमन्तर्यामीति च श्रुतौ ॥३८३॥

All that (or, whatever is known as the) cause, viz. the intellect etc., which is established even without a thought, being a reflection of the single sentience, i.e. the immutable Ātman (is so) on account of the defect in it. [382]

And, this one, the highest, is stated to be the cause, so long as it is delimited by ignorance about itself; this one is further stated in the Śruti as the witness, the knower, the seed of the universe and the inner-controller. [383]

Read in this context NKL introductory (ms. p.593): *svāvidyayāpy ekatvaṁ sāmānyaśabdenoktaṁ tatra kim phalam ity āha.*

Verses 384-388 point to the connection of the unattached Ātman with the intellect etc. through the semblance of sentience.

बुद्ध्यादिकार्यसंस्थस्य कूटस्थासङ्गरूपिणः ।
सर्वं स्यात्कारणत्वादि तदाभासैकवर्त्मना ॥३८४॥

All, viz. being the cause (of all the effects) etc., is (said) in respect of this one, who abides in the effect(s) of the intellect etc. and, is in reality, the immutable and unattached (by anything outside), only by way of pointing to the semblance/appearance of the same in others. [384]

चैतन्याभासवपुषा कूटस्थैकत्वमिष्यते ।

कारणस्य स्वकार्यैश्च तदबोधसमन्वयात् ॥३८५॥

Oneness (or, singleness) of the immutable is accepted (lit. desired) in its form of semblance of sentience, because, indeed, owing to its own ignorance, the cause¹ (that it is) has an invariable relation to its effects. [385]

This explains the significance of the word *tadābhāsaikavartmanā* in the preceding verse.

प्रतीचोऽनवशेषेण कार्यकारणसंगतिः ।

तयोस्तु सावशेषेण प्रतीचा संगतिस्त्विदम् ॥३८६॥

In respect of the inner self, there (certainly) is the association of the causes and the effects in their fullness but this association of the same with the inner self (it has to be understood) with some remainder.¹ [386]

Read NKL (ms. p.599): *yathā pratyak prthak tiṣṭhati tathā prakāraṇe pratīcā sambandho ity arthaḥ*.

¹That is, not in their fullness.

नात्मत्वाद्व्यतिरेकोऽस्य कार्यकारणभूमितः ।

न सामान्यं विशेषो वा कात्स्न्यदात्मा ततो भवेत् ॥३८७॥

This one (i.e. the inner self) does not have an existence apart from the levels of the effects and the causes, because of its being the Ātman. Neither generality nor particularity would be (thought of this one) wholly on account of the completeness of it, consequently there would exist only the Ātman. [387]

Read SP (introductory): *tarhi tābhyām ātmano bhedas tatrāha*.

अनात्मनस्तु या सिद्धिः सा सर्वाव्यतिरेकतः ।

जाड्यात्सापेक्षतः सातो मृषासिद्धिरुदाहृता ॥३८८॥

Whatever (may be adduced as the) proof for the existence of the non-Ātman, it is on account of non-exclusion (from the inner self) (and) that (proof) has dependence on insentience; therefore, that is pointed out as false proof. [388]

It is asserted that the non-Ātman can be said to exist only on account of the ignorance about the Ātman.

SP remarks *sarvāvyatirekataḥ* is Saṁdhi of *sarvā* and *avyatirekataḥ*.

Verses 389-391 explain what is samānatva.

किं पुनः स्यात्समानत्वमात्मबुद्ध्यादिवस्तुनोः ।
विवेकतोऽननुभवो वराहोरगवत्तयोः ॥३८९॥

What again can be *samānatva* 'oneness' between the Ātman (on one hand) and the external objects, the intellect etc. on the other? The absence of experience (of the oneness) between the two (will result) from proper discrimination, (it would be like that) between a pig and a snake. [389]

Read NKL (ms. p.599): *pūrṇaṁ samānaśabdasyaikyam artha ity uktvā tasyārthāntaram āha.*

यत्तत्तयोः समानत्वं रज्जुसर्पादिवन्मतम् ।
आत्माविद्यैव संबन्धस्तस्मादात्मन इष्यते ॥३९०॥

That (which is said to be the) oneness of the two is held like that between a rope and a serpent etc.¹ Therefore the relation (of the Ātman with non-Ātman), viz. ignorance about (the nature of) the Ātman is posited to the Ātman. [390]

¹This is the usual way of Sureśvara in the use of meaningless 'etc.'.

अकारकस्वभावस्य परमार्थात्मवस्तुनः ।

अविद्याकल्पितैव स्यात्संगतिः खेऽसितादिवत् ॥३९१॥

the association of the (real) thing, viz. the highest Ātman, which does not have the nature of a *kāraṇa* 'a factor connected with an activity', (with non-Ātman) is merely imaginary (lit. imagined) on account of ignorance (about the nature of the Ātman); (it is) like (the association of) dark etc. with the light.

[391]

verses 392-397 affirm that the sameness/oneness of the Ātman is merely imaginary.

कूटस्थात्मचिदाभेऽस्य प्रत्यग्ध्वान्ते हि तद्वैः ।
विषयान्तैर्भवेद्भ्रान्तिः सामानाधिकरण्यतः ॥३९२॥

This would have a delusion (individual being, or, this inner self) in respect of what has the appearance of sentience, viz. the immutable self, while there is ignorance (lit. darkness) about (the nature of) the inner self, on account of the products of it (viz. that ignorance) ending in various external objects and that is) owing to their existence in one (and the same) substratum, i.e. the body.¹

[392]

The *sāmānādhikaranyā* refers to the existence together of ignorance about sentience and the inner self in the same body.

विकारिणः प्रकाशस्य नीलरक्तादिसंगतेः ।
नीलादिविक्रिया युक्ता परिणामस्य न त्वसौ ॥३९३॥

It is reasonable to accept the modifications blue etc. as belonging to light, that is possessed of (or, is said to have) modifications, (only) on account of its association with (some substances) blue, red etc.; but it is not of the modification.

[393]

परिणामो हि मोहादेश्चिदाभासः सदेष्ट्यते ।

परिणामान्तरप्राप्तिस्तस्यापीति न युज्यते ॥३९४॥

Indeed modification is ever held as the appearance of sentience (in the intellect etc. that is) delusion/ignorance (but) it is not reasonable that undergoing some modification be (accepted) of that (sentience) also. [394]

In the edition of MRI, the reading in this verse is *mohādeś cidābhāṣyaḥ* (a variant *cidābhāṣyaḥ* is also shown). That seems to be supported by SP which states *cidātmaprakāśya*

सुखिदुःखित्वसाक्षित्वं दुःस्थितं स्यात्तथा सति ।
सुखाद्यनुगमात्तस्य व्यतिरेकः सुदुर्लभः ॥३९५॥

If that were so, the nature of being happy or miserable or the witness (posited of sentience) would be in an ill condition (*duḥthita*).¹ It is extremely difficult to have a distinction of it from *kūṭastha*, since it is ever associated with happiness etc.² [395]

¹That is, wrongly spoken of; or, contradicted.

²This refers perhaps to bliss.

नर्ते स्याद्विक्रियां दुःखी साक्षिता का विकारिणः ।
धीविक्रियासहस्राणां साक्ष्यतोऽहमविक्रियः ॥३९६॥

There cannot be (a being) miserable unless without some modification (in him). What capacity could there be in the case of one who undergoes modification to be the witness? Therefore, (sentience, characterized by) *aham*, the witness of thousands of modifications in the intellect. It remains without any modification. [396]

This refers to the temporarily accepted modification of the inner self.

परिणाम्यात्मनोऽप्येवं कटस्थावगतेरिव ।

न युक्तः परिणामोऽयं लौकिकस्यापि नेष्यते ॥३९७॥

This condition of the inner self which has thus undergone modification is not reasonable on account of its being known as immutable. Even the modification of things occurring in the ordinary life (e.g. milk into curd) is not (really) accepted.

[397]

It is useful to read in this context NKL (ms. p.600) introductory: *pramāṇaḥ pariṇāmaḥ svīkrītyātmanaḥ pariṇāmo āstīty uktam idānīm tasyāpi pariṇāmo mithyety āha ...* and later *kṣīrāder iva mātuh pariṇāmaḥ kiṃ na syād atrāha laukikasyeti. tathābhūtasyātathābhūtasya vānyathābhāvo na sambhavatīty arthaḥ.* Read also the concluding remark in SP: *tathā ca kṣīrādipariṇāmo 'pi prāmāṇiko na bhavatīti bhāvaḥ.*

This verse is the final deduction from the meaning of the word *samāna* as presented in BUB.

धीस्वान्तेन्द्रियसंघाते चिदाभासैकवर्त्मना ।

सर्वात्मकत्वं संयात आत्माविद्यावशादतः ॥३९८॥

Therefore, the Ātman has appeared through becoming only reflection (lit. appearance) of sentience in the conglomeration of the intellect, *manas* (*svānta*) and the organs, as being the nature of all (this) owing to ignorance (about itself). [398]

In verses 399-400, Sureśvara states his own meaning of the word *samāna*—and a different one.

समानः कारणात्मा वा यत्र सर्वोपसंहतिः ।

कारणात्मा हि संवर्त्य कार्यात्मत्वं प्रपद्यते ॥३९९॥

(Or perhaps the word) *samāna* means sentience (as) of the nature of origin (of all variety), wherein there is (later) the

merger of all (that variety). Indeed, what is the origin (of variety) does undergo a modification, and become possessed of the nature of the effect. [399]

अपेक्षाज्ञानमात्रैकहेतुत्थानत्वकारणात् ।
न कार्ये कारणे वातो वस्तुतत्त्वं समीक्ष्यते ॥४००॥

Therefore, the reality of the thing (viz. sentience) is not accepted (lit. seen) in either an effect or its cause, because of their having arisen only from one cause, viz. ignorance (rooted in their mutual) dependence. [400]

अन्वयव्यतिरेकाभ्यां नातो वाक्यार्थबोधनम् ।
वस्तुतत्त्वावसायोऽतो वाक्यादेव प्रमाणतः ॥४०१॥

Therefore, there cannot be a (proper) understanding of the meaning of the sentence¹ by the method of Anvaya and Vyatireka. Consequently, the decision regarding the nature of reality is only from the Vedic sentence which is the authoritative means. [401]

¹This is: *sa samānah*.

अतः सर्वविकल्पानामविद्यामात्रहेतुतः ।
विषयत्वं समापेदेऽविकल्पोऽपि स्वतः परः ॥४०२॥

Therefore, in the case of all the notions entertained there has occurred the nature of the object of cognition only for one reason, viz. ignorance, even if the highest self is of itself without any such notions (of duality to be entertained). [402]

Verses 403-406 explain ubhau lokān anusamīcarati.

समान एव सँल्लोकौ प्राप्तप्राप्तव्यलक्षणौ ।
अनुक्रमेणाविद्यावान्सदा संचरतीश्वरः ॥४०३॥

Being, just the same, the Lord (viz. the inner self) ever moves unto the worlds having the nature of what is obtained and what is to be obtained, gradually (but at the same time) being associated with ignorance about (the nature of) itself. [403]

देहेन्द्रियाद्युपादानत्यागसंतानलक्षणः ।

प्रबन्धशतसंपातैः संचरत्येष न स्वतः ॥४०४॥

This one, characterized by its continuous taking up and abandoning the body and organs etc. moves falling in hundreds of worldly bonds and not on its own. [404]

Any statement about sentience as being associated with body etc. originates in ignorance about its nature. No other causes would make it undergo any modification.

We have ignored the edition of MRI which has the first line as one word in *dehendriyādi ... prabandhaśatasampātaiḥ*.

कार्यैकनीडमेवास्य चिदाभासैकहेतुतः ।

संसारित्वं यतो नातः स्वतः संसारितात्मनः ॥४०५॥

Since the nature of being transmigratory of this (inner self) has the support (lit. nest) only in the various effects, due to only one cause, viz. the appearance of sentience; therefore, there is really no transmigratory character of the inner self.

[405]

अकार्यकरणोऽप्यात्मा बुद्धिप्राणादिहेतुगः ।

अविद्यया चिदाभासः संसारीवावभासते ॥४०६॥

The inner self, though not related to the effects and the cause (or the organs (*karana*)), (thus) existing in the causes such as the intellect and *prāṇas* 'organs', the semblance appears like a transmigratory being through only ignorance. [406]

Verses 407-415 explain the sentence *dhyāyatīva*

असंभवः स्वतो यस्मात्तदबोधाच्च संभवः ।
 क्रियाकारकरूपस्य तस्माच्छ्रुत्याभिधीयते ॥४०७॥
 क्रियाकारकरूपस्य मिथ्यात्वं प्रत्यगात्मनि ।
 ध्यायतीत्यादिवाक्येन प्रत्यक्कौटस्थवित्तये ॥४०८॥

Since there cannot be the origin of what has the nature of activity and its instrument from themselves and also have their origin in ignorance about it (i.e. the inner self), therefore has the Śruti declared [407]

in the sentence *dhyāyati* 'it meditates ...' the unreal character of what has the nature of activity and its instrument while there exists (only) the inner self, so that the immutability of the inner self becomes known. [408]

ध्यायतीव स कौटस्थ्यात्तथा लेलायतीव च ।
 ध्यानादिकारिसाक्षित्वान्नात्मा ध्यानादिकार्यवान् ॥४०९॥

That one (the inner self), on account of its immutability, meditates, as it were, and, so also, performs activities, as it were. The inner self, being the witness of one who does meditation etc., is not the performer¹ of any activity such as meditation.² [409]

¹Or, possessed of any

²This stands for activity like speaking and smelling.

निःशेषबुद्धिवृत्तीनां ध्यानं स्यादुपलक्षणम् ।
 लेलायनं क्रियाणां च सर्वासामुपलक्षणम् ॥४१०॥

Meditation should be (taken as) indicative of all the modifications of the intellect; and performance of activities is indicative of all (other) activities. [410]

SP points out that this proceeds from the argument at BU

3.4.2. Cf. further BU 4.3.23.

ध्याता ध्यानं तथा ध्येयं त्रयं स्वात्मैकसाक्षिकम् ।
करणं कर्म कर्ता च नातो ध्यात्रादिसाक्षिणि ॥४११॥

The meditator, the act of meditation and the object of meditation—(this) triad has only the inner self as the witness; therefore, the means of action, the action and the agent of it do not exist in the witness of the meditator etc. [411]

SP: This points to the *tatasthya* 'indifference or aloofness of the inner self, as the witness of activity'. Read NKL (ms. p.601): *dhyānāder anātmadharmatvaṃ drśyatvena sādhyati dhyāteti*.

बोद्धुः कर्तुश्च संबन्धो ज्ञानेन क्रियया यथा ।
कूटस्थसाक्षिसंबन्धो बोद्धृकर्त्रोस्तथैव च ॥४१२॥

As there is connection of a knower and an agent (in any worldly dealings) with knowledge and activity, so also, there is a connection of the immutable witness with the (two, viz.) the knower and the agent. [412]

This relates to the connection which is in fact unreal, because the knower and the agent are of the nature of ignorance/superimposition. Read also NKL (ms. p.601) introductory: *dhyānāder drśyatvaṃ asiddhaṃ svaprakāśatvād atrāha boddhur iti*.

सर्वस्य प्रत्यगात्मत्वात्कूटस्थैकचिदात्मनः ।
अतोऽस्यानभिसंबन्धः सर्वप्रत्यक्त्वहेतुतः ॥४१३॥

Since all (this)¹ has the inner self as its (real) nature, therefore, there is no connection of the immutable and the single sentience with this (world of the knower and the agent), because of its being inside (the body). [413]

SP briefly points out the argument *sambandhasya dviṣṭhatvād ekatrāyogād iti bhāvaḥ*

¹This refers to every knower and the agent mentioned in the previous verse.

एकनीडत्वहेतुत्था साक्षिणः साक्ष्यसंगतिः ।
न तु मोहोत्थचिद्विम्बहेतुवृत्तव्यपेक्षया ॥४१४॥

The connection of the witness with the object to be witnessed has arisen from the cause, viz. belonging to (but) one substratum (lit. nest);¹ but, it is not through its dependence on the nature² of its cause, viz. the reflection of sentience which arises from delusion. [414]

NKL (ms. p.601) which introduces the second line thus: *ajñāna caitanyapratibimbasya hetubhūtaṃ yad bimbabhūtaṃ caitanyam svasvarūpeṇaiva sāksitvaṃ kiṃ na syād atrāha*.

¹Read NKL (ms. p.601): *ekasmin kūṭasthe caitanye 'vidyā-tatkāryasya cidābhāsasya ca sthitatvāt tadamśasākṣiṇaikāśraya-tvasaṃgater yuktaṃ sāksitvaṃ ity arthaḥ*.

²*vṛtta* here seems to be for *svabhāva*.

कूटस्थात्मैकहेतुत्थचिद्विम्बो मोहगस्तु यः ।
स्वोपादानानुरोधितत्वात्केनचिन्नास्य संगतिः ॥४१५॥

Because that which is reflection of sentience that originates in the one cause (viz. the immutable) and is the product of (or, belonging to) delusion of this one's (about the nature of the Ātman), and because of not following (the nature of its own material for creation, this one does not have connection with anyone. [415]

Verses 416-422 discuss the quality of a meditator, attributed to the pure inner self.

चिदाभासाश्रयाज्ञानात्कार्यसंगतिहेतुतः ।

स्वाभासान्तः परोऽप्यात्मा ध्यायतीवेति वीक्ष्यते ॥४१६॥
